I would prefer that the conservation plan be prepared prior to the producer signing the conservation reserve contract so that he knows, in advance, what he will have to do in order to return the land to cultivation and be in compliance with the sodbuster provision.

However, I would point out that I am not interested in imposing an undue burden on the Department as they implement this bill. I am not asking that a detailed, highly complex conservation plan be prepared. I simply want to be assured that the producer is made aware, in advance, that he might be required to install certain conservation practices in order to return the land to cultivation in compliance with the sodbuster provisions. Also, I would like to know whether there are some lands that could not be returned to cultivation even with a conservation plan if the producer is to be in compliance with the sodbuster provisions?

Mr. JONES of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. MARLENEE. I yield to the gentleman from Tennessee.

Mr. JONES of Tennessee. I appreciate the gentleman yielding, and let me say that we have discussed it. I feel that we could save some time by revising and extending our remarks because there is nothing serious about the problem that the gentleman from Montana [Mr. MARLENEE] and I have discussed.

In implementing this program the Secretary should ensure that a producer is fully informed as to his responsibilities and the requirements that must be met as a condition of participation. One of the conditions of the sodbuster provision is that land which the producer returns to cultivation after the contract expires be covered by a conservation plan, developed with the assistance of the Soil Conservation Service District conservationist and, approved by the local Soil and Water Conservation District.

It would be very expensive and time-consuming for SCS to prepare detailed conservation plans for all land entering the conservation reserve. For instance, it is possible to use a number of combination of conservation practices to adequately treat the land. In this case, the producer might change his mind as to which combination of practices that he preferred several times during the life of the contract. This would require much extra time and resources by SCS in modifying the contract.

Those lands that SCS classifies as capability classes VI, VII, or VIII probably could not be returned to cultivation and meet the criteria for adequately treated cropland and thus meet the sodbuster provision. These lands should remain in permanent vegetation such as grass or trees in order for the producer to be in compliance with sodbuster. It should be possible to include a statement in the contract to this effect.

In addition, on those lands that are classified in other capability classes that probably can be returned to cultivation, a statement such as "In order to return the land covered by this contract to cultivation and meet the sodbuster provisions, the producer must operate the land in accordance with a conservation plan approved by the local Soil and Water Conservation District. Such conservation plans in this district, for the land capability classes covered by your contract, normally include practices such as conservation tillage, terracing, etc." could be included. That seems like a reasonable solution. It would assure that the producer is made aware of his responsibilities and the requirements that are placed on him as a consequence of his participation in the conservation reserve. It also seems to be a solution that would not place an undue burden on the Soil Conservation Service as the program is implemented.

The CHAIRMAN pro tempore. Are there other amendments to title XII?

Mr. BEREUTER. Mr. Chairman, I move to strike the last word.

The CHAIRMAN pro tempore. Without objection, the gentleman from Nebraska [Mr. BEREUTER] is recognized for 5 minutes.

There is no objection.

The CHAIRMAN pro tempore. Are there other amendments to title XII?

Mr. FRANKLIN. Mr. Chairman, I move to strike the last word.

The CHAIRMAN pro tempore. Without objection, the gentleman from Mississippi [Mr. FRANKLIN] is recognized for 5 minutes.

There is no objection.

Mr. FRANKLIN. Mr. Chairman, I take this time concerning the swampbuster provisions of the conservation title.

I would like to engage in a colloquy with my distinguished colleague, Mr. DASCHLE.

In my district, which in the past had been mainly swampland, small areas of wetland still exist. These areas are located on many farms.

Because of the devastating droughts and proven economic benefits of higher yields many farmers are considering going through the expense of installing a center pivot irrigation system. A center pivot irrigation system is the type of modern technology that enables the farmer to irrigate an entire field as long as the field is open and clear. However, if a small area of wetland is located within the field it is impossible for this equipment to function because these areas would be in the path of the irrigation system.

I am very concerned that these farmers would be prevented from breaking into small areas of wetland and installing an irrigation system because of the provisions that exist in the present farm bill, H.R. 2100.

Mr. DASCHLE, would the farmers in my district, given the situation that I described, be able to convert a small area of wetland into agricultural use in order to install a center pivot system?

Mr. DASCHLE. Mr. Chairman, if the gentleman will yield, in the bill, we have outlined a definition of wetland, and added specific unique argicultural practices that we intend to be exempt from swampbuster sanctions. In addition, we have added the following provision, under which wetlands conversions would be exempt from swampbuster sanctions:

(iv) wetlands on which production is possible as a result of actions by the producer whose cumulative and individual effect on the hydrological and biological values of the wetlands is minimal, as determined by the Secretary under regulations prescribed by the Secretary in consultation with the Secretary of the Interior;

Another section of the proposal directs the Secretary to encourage local conservation districts to reflect unique, local agricultural practices within the context of the definition and the above exemptions.

This legislation is not intended to preclude the situation you described. This legislation would provide clear direction that I, as the author, intend such requests to be considered within the wetlands conservation plan, and not automatically be ruled as a violation of swampbuster.

Mr. FRANKLIN. I thank the gentleman. Reclaiming my time, I would ask if it is your intention to exempt these farmers from any penalties that are presently in H.R. 2100 regarding swampbusting.

Mr. DASCHLE. If the gentleman will yield,

Within the context of the definition contained in the legislation, the specifed exemptions, and the earlier clause to which I referred, it would not be unreasonable to consider economic impacts in determining "minimal impact".

Mr. FRANKLIN. And the last question:

When the decision regarding the hydrological and biological impact on wetlands is made regarding the installation of a center pivot system will the economic benefits to the farmer also become and important and perhaps an overriding factor?

Mr. DASCHLE. If the gentleman will yield, I would certainly think that that would be within the confines of the definition as we intended it, and we would accept that kind of understanding.

Mr. FRANKLIN. I thank the gentleman.

Mr. Chairman, I had an amendment that would address these concerns I had with the swampbuster provisions. But in lieu of the conversation and the colloquy we have just had, I do not intend to introduce that amendment.

The CHAIRMAN pro tempore. Are there additional amendments to title XII? If not, are there any amendments to title XIII?

AMENDMENT OFFERED BY MR. ANTHONY

Mr. ANTHONY. Mr. Chairman, I offer an amendment.

The CHAIRMAN pro tempore. Is the amendment printed in the RECORD?

Mr. ANTHONY. It is printed in the RECORD, Mr. Chairman.

The CHAIRMAN pro tempore. The Clerk will report the amendment.

Mr. ANTHONY. Mr. Chairman, I ask unanimous consent that the amendment be modified to read, "Page 323, strike lines 6 through 10."

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Arkansas?

Mr. FRANKLIN. Mr. Chairman, reserving the right to object, is this the amendment that was originally offered by the gentleman from Illinois [Mr. ROSTENKOWSKI]?

Mr. ANTHONY. Yes, it is.

Mr. FRANKLIN. I would like to ask, under the reservation, if I could, if the amendment that is presently at the desk is in the same form as the one printed in the RECORD.

Mr. ANTHONY. It is the identical amendment. All it does is correct the pages, inasmuch as when the amendment was filed, it was according to the bill that was reported out of the committee rather than the one that was under the Union Calendar version. It is the identical amendment.

Mr. FRANKLIN. Continuing under my reservation, then the amendment that is now offered is not in the same form as was printed in the RECORD?

Mr. ANTHONY. I think it is very clear it is the identical intent of the same amendment. All it does is correct the page and the lines under which the bill before us is being debated. There is no change in the amendment. All it does is correct the notations as to the page and the proper lines.

Mr. FRANKLIN. Mr. Chairman, I thank the gentleman.

POINT OF ORDER

Mr. FRANKLIN. Mr. Chairman, continuing under my reservation, I would like to raise a point of order to the amendment now offered, which was originally filed by the gentleman from Illinois [Mr. ROSTENKOWSKI], and state that the amendment as printed in the RECORD does not refer to the sections to be amended on H.R. 2100, the Union Calendar, under which we are dealing.

I would call the Chair's attention to a previous ruling on a point of order when the distinguished gentleman from Massachusetts attempted to strike the honey provisions of H.R. 2100 and the Chair ruled, because of a not specific reference to line and title and page number, that that amendment was ruled out of order.

I at this time insist on my point of order to the amendment.

The CHAIRMAN pro tempore. The amendment that is in the RECORD has a specific line and title and may be offered in that form.

The Clerk will report the amendment.

Mr. FRANKLIN. Mr. Chairman, if I could continue under my reservation of objection, I have the amendment here. It is not the same one printed in the RECORD and it does not refer to the line and title as attempted to be amended by the gentleman's amendment.

The CHAIRMAN pro tempore. Does the gentleman from Arkansas offer the amendment in the original form as printed in the RECORD?

Mr. ANTHONY. Yes, I do, Mr. Chairman.

The CHAIRMAN pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. ANTHONY: Page 322, strike out lines 17 through 21.

The CHAIRMAN pro tempore. The gentleman from Arkansas [Mr. ANTHONY] is recognized for 5 minutes.

Mr. ANTHONY. Mr. Chairman, this amendment would strike section 1311(d) of H.R. 2100 which modifies the Federal income tax consequences of certain loan cancellations. It is very clear that the tax treatment of cancellation of debt is an issue that is in the jurisdiction of the Committee on Ways and Means. The rule under which we are considering H.R. 2100 waives a point of order under clause (5)(b) of House rule XXI that this matter was not considered by a committee within whose jurisdiction this tax matter falls. Consequently, I offer an amendment to strike subsection 1311(d) of the substitute.

Mr. Chairman, it is my understanding that section 1311 of H.R. 2100 allows the Secretary of Agriculture to accept and retain certain easements in payment for farm loans which the borrower is unable to repay otherwise. Subsection 1311(d) provides that any part of a loan canceled under the section shall not be included in income and shall not have any effect on any tax attributable with respect to any taxpayer or property.

I understand and personally sympathize with the intent of this provision. As the gentleman knows, the Committee on Ways and Means has begun the long and difficult process of enacting tax reform. If the present tax laws make it impossible for today's farmers to get out from under their exorbitant debts through rational means such as the Easement Program contemplated by the gentleman, I will work, in the context of the tax bill, to correct the law.

Mr. Chairman, I offer this amendment now because this tax issue should be addressed in the context of tax legislation and not farm legislation.

I urge adoption of my amendment which would strike subsection 1311(d) from H.R. 2100.

Mr. FRANKLIN. Mr. Chairman, will the gentleman yield?

Mr. ANTHONY. I yield to the gentleman from Mississippi.

Mr. FRANKLIN. I thank the gentleman for his comments, particularly in support of the theory that is incorporated in H.R. 2100 that was originally H.R. 1000 that I introduced. I would like to point out to the gentleman, however, that without the tax relief as is stated in the agriculture reported bill, the effect of the amendment would be useless for those farmers who tried to take advantage of it. That is why I think it was allowed by the Committee on Agriculture to stay in, and I do not think that we in the Agriculture Committee, and I certainly did not intend to usurp the authority of the Ways and Means Committee, and I do hope that you and the other members of the Ways and Means Committee realize the possible benefits of this

section and when considering the tax reform will realize it is not workable without some tax relief as is already in this agriculture bill that you now wish to strike.

Mr. ANTHONY. I can assure my colleague from Mississippi that I will work very hard. I will offer the amendment at the proper time during the tax reform markup.

Mr. FRANKLIN. If the gentleman will continue to yield, with that assurance, then I will have no objection to striking this, and, as I stated, I did not intend to usurp the power of the Ways and Means Committee.

Mr. ANTHONY. I thank the gentleman.

□ 1945

The CHAIRMAN pro tempore. Does the gentleman wish to ask unanimous consent to modify his amendment?

Mr. ANTHONY. Mr. Chairman, I ask unanimous consent to modify my amendment to conform with the Union Calendar version of the bill.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The text of the amendment, as modified, is as follows:

Amendment offered by Mr. ANTHONY, as modified: Page 323, strike out lines 6 through 10.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Arkansas [Mr. ANTHONY], as modified.

The amendment, as modified, was agreed to.

AMENDMENT OFFERED BY MR. MICHEL

Mr. MICHEL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MICHEL: Page 332, line 21, insert the following:

"FARM CREDIT REPORT

"SEC. 1317. The President shall, prior to November 1, 1985, prepare and submit to the Congress his findings and recommendations concerning the continued sound and efficient operation of the Farm Credit System."

Mr. MICHEL. Mr. Chairman, my amendment to H.R. 2100, would require the President to prepare and submit to the Congress by November 1, 1985, his findings and recommendations concerning the continued sound and efficient operation of the farm credit system.

First and foremost, I think we must recognize the critical importance of American agriculture to the well-being of our people, and to America's constructive role as leader of the free world. This is not an overstatement. Between 1970 and 1982, grain production in the United States climbed from 170 to 330 million metric tons. And while U.S. exports climbed from 38 to 150 million tons, Soviet imports climbed from 8 to 43 million tons. American enterprise agriculture accomplished this with 350 million acres of land under plow, in contrast to 500 million acres cultivated in the Soviet Union. The 44 billion dollars' worth of American agricultural exports in 1981 were an essential offset to our otherwise rapidly deteriorating balance of trade.

Despite this unexcelled record, American agriculture today stands at a troubled and uncertain crossroad. All is not well on the farm. Aggregate income is the lowest it has been in 50 years. Farmer return on equity in 1981 and 1982 was a negative 9.2 and 6.5 percent, respectively, and the negative return continued through 1984. Land values declined for the first time in 27 years. Exports have slipped, suffering more than a 20-percent shrinkage. The debt/equity ratio is way up as farm debt climbed 300 percent between 1971 and 1983. Bankruptcies and foreclosures have become daily events.

Our farmers are now in a most difficult financial bind because of high real interst rates, stagnant farm prices, rising production costs, and erosion in the value of farm assets, and the severe financial problems of our Nation's farmers are adversely affecting the single most important source of agricultural credit—the farm credit system. The privately financed farm credit system is a nationwide network of 37 farmer-owned banks and hundreds of cooperative associations. The system accounts for $70 to $80 billion worth of farmers' loans.

The system, which makes loans for farming, was formed after World War I, and except for its intital Federal seed money, it has required no Federal assistance until now even during the Depression. But the deteriorating farm economy and falling land values have led to an increasing number of bad loans. Many American family farmers are unable to carry their heavy det load, and are faced with the loss of further credit and, consequently, the loss of their farm.

Why is this happening? Are we talking about another American industry whose time has passed, whose methods and practices have become obsolete? Absolutely not. If anything, the American farmer is too good at his job, too efficient. This is not a sector of the economy which needs retraining, relocation, reindustrialization, reeducation, or reinvestment. On the contrary, the American family farmer is already high tech, and his methods and practices are envied and emulated around the world.

Exports account for nearly 40 percent of U.S. farm product sales. For the fourth time in 6 months, however, the USDA has lowered its value estimate of U.S. farm exports. As it looks now, farm export value is expected to decline to a 6-year low of $32 billion, down 16 percent from more than $38 billion in 1983-84. This decline in U.S. exports has been a major factor in the problems that have dogged the farm credit system.

How can it happen, then, that agriculture banks, historically a healthier group than any other commercial banks, are falling at a faster rate than the others—fastest since the Depression? I'm told that of the 77 banks that have closed their doors in the first half of this year, 43 were agriculture banks. How did we lose ground? How did we get ourselves into the mess we're in?

To be sure, agriculture has always been subject to great uncertainties. Historically, these uncertainties were predominantly on the supply side. No one can control the weather or the onslaught of disease and pests. The uncertainties will continue. But uncertainties in demand have now become as great, or greater. I refer to the astronomical national debt and the mounting trade deficit, the resulting high rate of dollar exchange that prices U.S. exports out of markets, the past embargoes, the confusing policies that called on farmers to "feed the world" and at the same time called for land retirement. That farmers are being forced to bear a major share of such burden is both unjust and unwise.

There are serious consequences of the farm debt crisis—and it is a crisis—of the U.S. economy. The unhappy results are higher interest rates, lower employment, reduced gross national product, fewer housing starts, lower personal income and a larger Federal deficit. If preemptive actions are not taken, the losses could significantly affect U.S. financial markets. Such outcomes would seriously jeopardize the farm sector and also impose important costs for even those people not employed by or involved in agriculture. The potential negative economywide effects of a farm financial crisis, and in addition to the direct adverse impacts on agriculture, call for comprehensive measures to address the problem.

I recognize that several committees of the Congress have already begun hearings, and that in due course they will be submitting legislative remedies. I recognize, too, the constructive effort our colleague, the gentleman from Montana [Mr. MARLENEE] has made in proposing a Commission on farm credit. In each of these instances, however, there is delay involved so I hope we can begin the process of remedy as soon as possible.

That is why I am offering this amendment requiring that the President recommend to the Congress the road we should take to bring strength and viability back to the farm credit system. Early corrective and preventive measures will be less costly than

absorbing the impacts of doing nothing or approaching the problem in a divisive or reactionary mode. The stakes for agriculture and national economy performance are high.

In summary, I am asking that the President submit to the Congress, in 1 month, his recommendations for keeping the farm credit system solvent. In an interview just a few weeks ago, Secretary Block admitted that, "we don't have a good feeling for where the system really is," and that we need a "full accounting" of the depth of its problems. One can wonder why this has taken so long. American farmers have known about this problem for some time, and have been waiting on the farm bill for over 9 months to give them some direction and hope.

Mr. Chairman, it is time to get off the dime. It is time to move forward toward coping with the credit crisis.

It is time to adopt this amendment.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Texas.

Mr. DE LA GARZA. I thank the gentleman for yielding to me.

Mr. Chairman, I wish to advise the gentleman, I am sure that he already knows, that the subcommittee of jurisdiction has initiated hearings. They have already had the first of a series of hearings. They will have a second series of hearings and will listen to all concerned and will do the necessary research.

We have no objection to involving the President. I do not know why we should burden the President with any more work while the distinguished gentleman from Tennessee [Mr. JONES] is willing to do the work. Otherwise, we have no objection.

Mr. JONES of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman.

Mr. JONES of Tennessee. I thank the gentleman.

Mr. Chairman, I certainly commend the distinguished minority leader for his interest and for his sincere concern about the future viability of the cooperative farm credit system. I share those views, and there are many others who share them the same as the gentleman and I do.

I assure the gentleman that we are going to do everything that we know to do in our subcommittee to make it a viable procedure to do something to save the farm credit system as well as the other institutions of higher lending that are in trouble. As my chairman has already said, we do have hearings scheduled. We have already had hearings. I am in constant touch with the Department of Agriculture. We are talking almost daily about what the procedure will be as well as the Farm Credit Administration and the farm credit system, because I realize, as the gentleman does, that we must all work together. We do have a very serious job in front of us.

Mr. MICHEL. I certainly appreciate what the chairman and his subcommittee have already done. I just want to put a little bit more pressure on that they fully, completely understand also downtown that it is of concern enough to us that we also have them cooperating fully with the intention of the Members of Congress to do what is right.

Mr. MARLENEE. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman.

Mr. MARLENEE. I thank the gentleman for yielding to me.

Mr. Chairman, I rise in strong support of the Michel amendment, which instructs the President to prepare and submit to the Congress, prior to November 1, 1985, his findings and recommendations concerning the continued sound and efficient operation of the farm credit system.

I want to thank my distinguished Republican leader for offering this amendment, which compliments the measure I introduced on September 12—House Concurrent Resolution 190. My resolution calls on the President to appoint a select blue ribbon panel, called the National Commission on the Farm Credit System. This 12-member panel, composed of Members of Congress, officials of the Government and farm lending institutions, would examine the crisis and make recommendations to the Congress in 3 weeks time. This crisis in the farm credit system demands immediate action!

Mr. Chairman, many of us saw this farm credit crisis coming. This crisis, which now threatens the very existence of the farm credit system, is the result of years of selling farm products at prices below the cost of production, and then going to the lender to finance that cheap food policy.

The greatest transfer of wealth the world has ever seen is occurring: the credit crisis. We have two options: First, either we address the problem in a nonpartisan cooperative spirit or second, within 6 to 8 months we will see the damnedest crash in real estate values that this Nation has ever experienced. It will make the slide of the 1930's look like a mere seasonable adjustment.

Those of us in a position of responsibility, beginning with the President, must sit down and, without partisanship or pride of authorship, put in place actions which reestablish confidence in the farm credit system.

The Michel amendment instructs the administration to provide the required leadership to see that the problem is examined and addressed. I would remind my colleagues that, unless we take immediate action on the crisis in the farm credit system, the rest of the farm bill could be an exercise in futility.

Again, I want to thank the distinguished Republican leader for offering this amendment, and I strongly urge my colleagues to support it.

Mr. MICHEL. Mr. Chairman, in view of the receptive attitude on the part of the chairman, the distinguished chairmen of the full committee and the subcommittee, and I think apparently the agreement of our minority Member, I would certainly forego the very profound, extensive remarks that I might make in support of this amendment outlining the history of the bank, the credit institutions, the problems that are confronting the farmer today and ask for a favorable vote on the amendment.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman.

Mr. MADIGAN. Is the gentleman going to revise and extend so that those remarks will be in the RECORD for all of us to read?

Mr. MICHEL. That was the gentleman's intention particularly out of deference to the time restraints under which we find ourselves this evening and in all courtesy to those who have been so good to give the gentleman the time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. MICHEL].

The amendment was agreed to.

Mr. VOLKMER. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. Without objection, the gentleman is recognized for 5 minutes.

There was no objection.

Mr. VOLKMER. Mr. Chairman, I had previously introduced to have in the RECORD an amendment that would strike the authority of the Secretary to lease the land that Farmer's Home presently has, approximately 600,000 acres. Of course, there is language in the committee bill that may address this, but before I make a decision whether to offer the amendment, I would like to inquire either of the ranking minority Member or of the committee or subcommittee, especially the subcommittee, since he helped work it, in here it says:

> The Secretary shall not lease or operate the real property for the production of agricultural commodities that the Secretary has determined to be in surplus supply.

Now, those are the words that concern me as to, in other words, some of us do not really trust everything that the Secretary would do, to be honest with the Members. If he makes a determination and says that it is not in surplus, then he can go ahead and lease it.

I would like to get on the record here, what do we mean by "surplus"?

Do we mean at least 1 year's supply like of wheat we are going to have at the end of this year and carry over approximately 1.6 billion bushels?

Would the gentleman agree that would be a surplus supply of wheat?

I yield to the gentleman from Missouri [Mr. COLEMAN] for his response.

Mr. COLEMAN of Missouri. I would say to the gentleman the purpose of the language that he cited is to prohibit the Secretary from allowing crops to be grown under his authorization responsibility as the landowner, basically, of inventory property, any commodities that are in surplus.

The gentleman has asked about the definition of surplus and how you would handle that. Of course, I would assume that reasonable people could define it. There is a definition of normal supply in the 1949 act which he might conclude would be defined as an agricultural commodity in a marketing year under normal supplies, the estimated domestic consumption; the estimated exports of that commodity, plus an allowance for a carry over.

We do not want to drop down to the bare bottom. As a result, I think that definition within that framework would probably define the word surplus supply. From that standpoint, I think the intent is probably clear.

Mr. VOLKMER. In other words, if we had a supply beyond the normal supply, that would be in surplus?

Mr. COLEMAN of Missouri. If the gentleman will continue to yield, I would conclude that reading, normal reading of those words would conclude that, yes.

Mr. VOLKMER. I thank the gentleman and I will not offer my amendment.

□ 1955

AMENDMENT OFFERED BY MR. BRUCE

Mr. BRUCE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BRUCE: On page 332, after line 21, insert the following:

"FMHA LOAN APPEAL STUDY

"SEC. 1317. (a)(1) The Secretary of Agriculture shall conduct a study concerning the administrative appeals procedure used under the farm loan programs of the Farmers Home Administration.

"(2) In conducting such study, the Secretary shall examine—

"(A) the number and type of appeals initiated by loan applicants and borrowers;

"(B) the extent to which initial administrative actions are reversed on appeal;

"(C) the reasons that administrative actions are reversed, modified, or sustained on appeal;

"(D) the number and disposition of appeals in which the loan applicant or borrower is represented by legal counsel;

"(E) the quantity of time required to complete action on appeals and the reasons for delays;

"(F) the feasibility of the use of administrative law judges in the appeals process; and

"(G) the desirability of electing members of county committees established under section 332 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1982).

"(b) Not later than September 1, 1986, the Secretary shall submit a report describing the results of the study required under this section to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.".

Mr. BRUCE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. BRUCE. Mr. Chairman, the amendment I am offering would call for a study to review FmHA loan appeal procedures. Nationwide, 97 percent of farmers who appeal when their loans are rejected have their appeals rejected as well. In my home State of Illinois, only 1 percent of farmers appealing had the loan decision reversed.

One reason appeals may be rejected is that in most cases the person who hears the appeal is the FmHA district director, the immediate boss of the FmHA county supervisor who turned down the loan. It seems to me that this process raises some questions about whether farmers can get a fair hearing. In addition, farmers often experience long delays before their appeals are heard. It can take months—months that a farmer waiting to plant cannot afford—to go through the entire loan-appeal-rejection process.

My amendment would initiate a study of why and to what extent loan decisions are sustained on appeal, of the reasons for delays, and of several ways the process could be made more impartial. Nothing in my amendment would increase the budget of the U.S. Department of Agriculture.

Given the current agricultural financial crisis, we need to be certain that farmers are not turned away without a just hearing of their loan appeals. I urge my colleagues to support this amendment to ensure that farmers are given a fair chance to stay in business.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. BRUCE. I yield to the gentleman from Illinois.

Mr. MADIGAN. Mr. Chairman, in the interest of conserving the time of the membership, I would like to say to the gentleman that we have had the opportunity to study his amendment over here, and we think it is a good amendment and are quite anxious to accept it.

Mr. JONES of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. BRUCE. With that explanation, I will gladly yield to the gentleman from Tennessee.

Mr. JONES of Tennessee. Mr. Chairman, I thank the gentleman for yielding. I do commend the gentleman for offering this proposal, and certainly this side has no objection. We commend him for offering the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. BRUCE].

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. TOWNS

Mr. TOWNS. Mr. Chairman, I offer amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. TOWNS: Page 322, after line 21, insert the following:

PROMPT APPROVAL OF LOANS AND LOAN GUARANTEES

SEC. 1317. (a) Subtitle D of the Consolidated Farm and Rural Development Act is amended by inserting after section 333 (7 U.S.C. 1983) the following new section:

"SEC. 333A. (a)(1) The Secretary shall approve or disapprove the application for a loan or loan guarantee made under this title, and notify the applicant of such action, within forty-five days after the Secretary has received a completed application for such loan or guarantee.

"(2) If an application for a loan or loan guarantee under this title is incomplete, the Secretary shall inform the applicant of the reasons such application is incomplete within five days after the Secretary has received such application.

"(3) If an application for a loan or loan guarantee under this title is disapproved by the Secretary, the Secretary shall state the reasons for the disapproval in the notice required under paragraph (1).

"(b) If an application for an insured loan under this title is approved by the Secretary, the Secretary shall provide the loan proceeds to the applicant within five days (or such longer period as the applicant may approve) after the application for the loan is approved by the Secretary, except that, if the Secretary is unable to provide the loan proceeds to the applicant within such five-day period because sufficient funds are not available to the Secretary for such purpose, the Secretary shall provide the loan proceeds to the applicant as soon as practicable (but in no event five days unless the applicant agrees to a longer period) after sufficient funds for that purpose become available to the Secretary.

"(c) If an application for a loan or loan guarantee under this title is disapproved by the Secretary, but such action is subsequently reversed or revised as the result of an appeal within the Department of Agriculture or to the courts of the United States and the application is returned to the Secretary for further consideration, the Secretary shall act on the application and provide the applicant with notice of the action within five days after return of the application to the Secretary.

"(d) If the Secretary fails to comply with subsection (a), (b), or (c) on an application

for a loan or loan guarantee that is approved by the Secretary, the Secretary shall—

"(1) for insured loans, reduce the interest payments due on the loan, or

"(2) for loan guarantees, make payments on behalf of the borrower to cover interest due to the lender on the loan,

in an amount calculated by multiplying the outstanding principal of the loan by that part of the annual rate of interest being charged for the loan that bears the same proportion to the full annual rate of interest as the period furing which the Secretary was not in compliance with such subseciton bears to a full year.

"(e) Upon receipt of an application for a loan or loan guarantee under this title, the Secretary shall inform the applicant of the requirements of this section.".

(b) The amendment made by subsection for loans or loan guarantees under the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) received by the Secretary of Agriculture after the date of enactment of this Act.

Page 332, after line 21 insert the following new section:

CONTINUATION OF SMALL FARMER TRAINING AND TECHNICAL ASSISTANCE PROGRAM

SEC. 1317. The Secretary of Agriculture shall maintain at substantially current levels the small farmer training and technical assistance program in the office of the Administrator of the Farmers' Home Administration.

Page 332 after line 21, insert the following:

NONSUPERVISED ACCOUNTS

SEC. 1317. Section 312 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1942) is amended by adding at the end the following:

"(e) Notwithstanding any other provision of this title, the Secretary shall reserve at least 10 percent of any loan made under this subtitle to be placed in a nonsupervised bank account which may be used at the discretion of the borrower for necessary family living needs or purposes not inconsistent with previously agreed upon farming or ranching plans. If the borrower exhausts this reserve, the Secretary may review and adjust the farm plan with the borrower and consider rescheduling the loan, extending additional credit, the use of income proceeds to pay necessary farm, and home and other expenses, or additional available loan servicing.".

Page 232, after line 21, insert the following:

FARM PROGRAM APPEALS

SEC. 1318. Subtitle D of the Consolidated Farm and Rural Development Act is amended by inserting after section 333A (as added by section 1317(a) of this Act) the following new section:

"SEC. 333B. (a) The Secretary shall provide an applicant for or borrower of a loan or loan guarantee under this title who has been directly and adversely affected by a decision of the Secretary taken under this Act (hereinafter in the section referred to as the 'appellant') with the right to written notice, an opportunity for an informal meeting, and an opportunity for a hearing on the record, with respect to such decision, in accordance with regulations promulgated by the Secretary consistent with this section.

"(b) Within ten days of such adverse decision, the Secretary shall provide the appellant with written notice of the decision, the opportunity for an informal meeting and formal hearing, and the procedure to appeal such decision (including any deadlines for filing appeals).

"(c)(1) An appellant shall have the right to—

"(A) access to the personal file of the appellant maintained by the Secretary, including a reasonable opportunity to inspect and reproduce the file at an office of the Farmers Home Administration located in the area of the appellant; and

"(B) representation by an attorney or nonattorney at an inspection and reproduction of files under clause (A), an informal meeting under subsection (d), and a formal hearing under subsection (e).

"(2) The Secretary may charge an appellant for any reasonable costs incurred in reproducing files under paragraph (1)(A).

"(d)(1) In order to provide an opportunity for parties to reconsider and resolve differences over decisions referred to in subsection (a) and to minimize the need for formal appeals of such decisions, the Secretary shall establish producers for informal meetings between appellants and officials of the Farmers Home Administration to discuss such decisions.

"(2) In establishing procedures for an informal meeting between an appellant and official concerning a decision of the Secretary, the Secretary shall—

"(A) require the appellant and official to conduct an informal meeting, or to waive such meeting in accordance with clause (E), before a formal hearing may be conducted under subsection (e) on such decision;

"(B) preserve the rights of the appellant to further review under this section;

"(C) require completion of the informal meeting process (including notice of any reconsidered decision required under clause (F)) within thirty days after notice of the original adverse decision provided to the appellant under subsection (b);

"(D) provide for the direct involvement in the informal meeting of the official who originally made the decision and, if such official is a country supervisor of an office, the district director of the office;

"(E) permit a waiver of the informal meeting if the appellant and official agree that such process would likely not avoid a formal appeal under subsection (e); and

"(F) require the Secretary to provide the appellant with written notice of any reconsidered decision of the Secretary reached after such informal meeting or waiver and, in the case of an adverse reconsidered decision, the reasons therefor.

"(3) If an appellant and official agree to waive an informal meeting under paragraph (2)(E) with respect to a decision of the Secretary, the Secretary shall notify the appellant of the right of the appellant to a formal hearing on the decision under subsection (e).

"(4) For the purpose of an appeal, a reconsidered decision reached by the Secretary under paragraph (2)(E) shall become the record of the Secretary with respect to the original decision made by the Secretary.

"(e)(1) If an informal meeting is conducted or waived under subsection (d) with respect to the decision of the Secretary under this title and the reconsidered decision reached under subsection (d)(2)(E) remains adverse to the appellant, the appellant may request a hearing on such reconsidered decision before an administrative law judge appointed under section 3105 of title 5, United States Code, by filing a complaint with the Secretary with twenty days of notice of such reconsidered decision.

"(2) The Secretary may submit an answer to a complaint filed under paragraph (1).

"(3)(A) A hearing under this subsection shall take place within thirty days of the filing of the complaint of the appellant.

"(B) Such hearing shall be held at a Farmers Home Administration Office located in—

"(i) the state in which the appellant resides or in which the farmland of the appellant is located; or

"(ii) an adjacent State if the office in the adjacent State is no more than five hundred miles from the location at which the appellant resides or the farmland of the appellant is located.

"(C) Evidence at such hearing may include the complaint of the appellant, the answer of the Secretary, the notice of any reconsidered decision, and any testimony by any official of the Farmers Home Administration, the appellant, and any relevant expert, except that affidavits by such official, appellant, and expert may be substituted for direct testimony when agreed to by the parties or allowed by the administrative law judge.

"(D) Such hearing shall be tape recorded and a transcript of such hearing shall be made available at cost upon the request of any party to the proceeding.

"(4)(A) The administrative law judge shall decide all questions of fact and law in a proceeding brought under the subsection and shall uphold, reverse, or modify the reconsidered decision of the Secretary.

"(B) The decision of the administrative law judge shall be final unless appealed pursuant to subsection (f).

"(5) Within ten days of the hearing, both parties to the proceeding shall be provided with a copy of the decision of the administrative law judge setting forth all findings of fact and reasons for the decision.

"(6) The Secretary shall report and make available to the public—

"(A) a decision of an administrative law judge reached under this subsection; and

"(B) a description of any subsequent action taken by the Secretary pursuant to subsection (f).

"(f)(1) If a party is aggrieved by the decision of an administrative law judge under subsection (e), such aggrieved party may request a review of the decision within ten days of the issuance of such decision.

"(2) Upon such request, the Secretary shall review the decision of the administrative law judge and make a determination on the record to modify, uphold, or reverse such decision.

"(3) The Secretary shall make such review and determination within twenty days of the request for review.

"(4) Such determination shall be the final administrative determination subject to judicial review.".

Mr. TOWNS (during the reading). Mr. Chairman, I ask unanimous consent the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. TOWNS. Mr. Chairman, my amendments will assist particularly the small farmer. I would like to move that these amendments be considered en bloc. This package would: First, continue the Small Farmer Training

and Technical Assistance Program in the office of the Administrator of the Farmers' Home Administration; second, create a 10 percent discretionary account for farmers with supervised bank accounts; third, establish time limits on loan decisions; and fourth, create a program appeals procedure which emphasizes the farmers access to his records and his due process rights.

I want to emphasize that this amendment does not require new moneys but stresses administrative changes within the existing structure at FmHA. In this regard, I am pleased that a broad range of groups and individuals have indicated their support for this package including Governor Pepich of Minnesota, the Center for Rural Affairs in Nebraska, the Rural Coalition, the Interfaith Action for Economic Justice, the North American Farm Alliance, the United Farmers Organization of North and South Carolina, the American Agriculture Movement and the Federation of Southern Cooperatives.

Mr. Chairman, I believe that this amendment will improve the day-to-day operations at FmHA and this agency's relations with the American farmer. It's a sad day when an agency designed to help a constituency is viewed as "the enemy" by that constituency. I hope that this amendment will help to change the farmers' current attitude toward FmHA.

I urge my colleagues to support this amendment.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. TOWNS. I am happy to yield to the distinguished Chairman.

Mr. DE LA GARZA. Mr. Chairman, I appreciate the gentleman yielding to me.

I take this time very sincerely to commend the gentleman for his interest in the plight of rural America and in the small farmers.

As all of us know, the gentleman hails from Brooklyn, but he has roots from another area of the South. But the interest he has shown and the time which has devoted in this effort we welcome. We hope that we will have more participation in a positive way from the Brooklyns of all the urban areas of the United States.

As far as I am concerned, after commending the gentleman, we would be very happy to accept his amendment.

Mr. Chairman, I would like for the gentleman to yield to the distinguished chairman of the subcommittee to make that approval at this time.

Mr. TOWNS. I would be delighted to yield to the distinguished chairman of the subcommittee.

Mr. JONES of Tennessee. Mr. Chairman, I thank my good friend from New York [Mr. TOWNS] for yielding.

I, too, want to share in the praise and support of the amendment. I want to commend the gentleman for having done the research work that he has on the amendments, because I am familiar with what has taken place as far as staff work goes, and for the diligence that the gentleman has shown on behalf of all farmers and the small rural communities of rural America, particularly those who are hard pressed and who need some special assistance here in the country.

Time after time the committee has heard testimony from farmers who have been victims of discrimination and neglect by the Farmers Home Administration.

I think it is very appropriate that this study be made and that this kind of abuse is not confined to any one particular area of the Nation or any single class of borrower. It should not continue to be tolerated.

I share the gentleman's concern very much as chairman of this subcommittee and I commend the gentleman for the work he has done and certainly am willing to accept the amendments.

Mr. LEWIS of Florida. Mr. Chairman, will the gentleman yield?

Mr. TOWNS. I would be happy to yield to the gentleman from Florida [Mr. LEWIS].

Mr. LEWIS of Florida. Mr. Chairman, will the gentleman give me just a quick explanation on a 10-percent allocation on supervised bank accounts, on that portion, and also the creation of a new appellate procedure for FmHA borrowers?

Mr. TOWNS. The 10-percent supervised bank accounts, as it stands now, many times small farmers have an opportunity to get things on sale or be able to buy at a discount. As a result of not being able to do it in a very quick fashion, they lose out on these things. So this would allow them to have 10 percent flexibility to go in and to avail themselves of these kinds of situations.

Many of the farmers in the hearings have said that they feel that if they are able to do this, this might make the difference between making it and not making it. As the gentleman knows, many of these small farmers are going out of business at a very, very rapid rate.

Mr. LEWIS of Florida. Mr. Chairman, will the gentleman also explain the new appellate procedure he is proposing?

Mr. TOWNS. What happens there is the informal process within the majority of appeals would be settled at that level. It would be an informal process, because what happens now is that they have to wait so long before this occurs that many of them do not have the——

The CHAIRMAN. The time of the gentleman from New York [Mr. TOWNS] has expired.

(At the request of Mr. LEWIS of Florida, and by unanimous consent, Mr. TOWNS was allowed to proceed for 1 additional minute.)

Mr. TOWNS. What happens is, as the gentleman knows, as it stands now, while they are waiting to hear, many times they pass the season to plant. So what we are asking for is an informal process where they would be able to appeal and be able to get an answer and, as a result, that they would be able to do it within the time limit of planting.

Mr. LEWIS of Florida. Mr. Chairman, I thank the gentleman for yielding.

Mr. FAUNTROY. Mr. Chairman, the amendment offered by my distinguished colleague from New York, Congressman EDOLPHUS TOWNS is deserving of support and is reflective of the gentleman's wisdom in recognizing the stake that urban consumers have in the survival of our Nation's hard-pressed small-scale agricultural producers.

This amendment would enhance the access of small farmers to the programs of the Farmers Home Administration. Specifically, the amendment would:

Continue the FmHA's Small Farmer Training and Technical Assistance Program;

Create a discretionary 10 percent allocation within FmHA-supervised bank accounts for use by the borrower for unforseen needs consistent with the original loan;

Require that an FmHA loan be approved or disapproved within 45 days and that funds be ordered within 5 days of a loan's approval; and

Create a new appellate procedure for FmHA borrowers.

We all know that our Nation's small farmers are in deep economic distress crushed by the impact of a huge budget deficit resulting in high interest rates and an overvalued dollar.

As is often the case, the problems confronting our Nation are hitting the most vulnerable. This is certainly the situation in the agricultural sector. Also, as is often the case, the problems that confront our Nation are most acutely reflected in the context of the black experience and the difficulties facing the 57,000 black farmers of America.

The amendment offered by Congressman TOWNS seeks to assist in the preservation of our small scale agricultural producers and in doing this it would also address the alarming situation described so graphically by the U.S. Civil Rights Commission in a 1982 report entitled, "The Decline of Black Farming in America." That report documented a disturbing pattern and practice of inaccessibility of the FmHA to black farmers. I urge all of my colleagues to study this most important and disturbing document. The conclusion of the report was that:

The Farmers Home Administration has not given adequate emphasis or priority to the crisis facing black farmers today. • • • In 1981, blacks received only 2.5 percent of

the total dollar amount loaned through FmHA's farm credit programs.

I urge my colleagues to approve this amendment offered by Congressman TOWNS. It is a positive first step in improving FmHA's accessibility to our small farmers and in doing this will also begin to remove the barriers at the FmHA to the black framers of America.

Mrs. COLLINS. Mr. Chairman, I rise in support of Congressman TOWNS' amendment. This much-needed amendment would give new life to the Farmers Home Administration's [FmHA], small farmer support programs in a variety of ways, and in so doing, would provide vital assistance to this Nation's long ignored black farmer, who typically owns or operates a small farm.

First, the amendment would continue the Small Farmer Training and Technical Assistance Program. The clear value of this program is that it helps the small farmer help himself or herself. The dollars allocated for such training now are dollars saved later, for small farmers, black and white, armed with new technical knowledge, become increasingly able to manage without Government assistance. Without question, we cannot turn our backs on this important program.

Second, the amendment creates a discretionary 10 percent allocation within FmHA-supervised bank accounts for use by the borrower for unforeseen needs consistent with the original loan. Given the very hard times our Nation's farmers are facing, and the unprecedented conditions facing black farmers, this provision is both compassionate and realistic. Clearly as America faces its worst farm crisis since the Great Depression, Congress must ensure that our FmHA loans are flexible enough to help the small farmer through conditions not foreseen at the time of the original loan. When we live in a time where the farm crisis seems to grow worse each day, we must have a loan policy that can adapt to the tough realities of the situation.

Third, Mr. TOWNS' amendment would require that an FmHA loan be approved or disapproved within 45 days, and that funds be ordered within 5 days of a loan's approval. This provision squarely recognizes that time is the worst enemy of the struggling small farmer waiting for approval or receipt of a loan. Loans must be approved and funds must be ordered quickly, or the result will be one of deserving applicants facing financial disaster, while redtape grows longer and longer. Moreover, a uniform deadline reduces the possibility of unequal and unfair treatment by those who would quickly approve loans for certain farmers while others are still unable to plant their crops.

Fourth, this amendment would create a new appellate procedure for FmHA borrowers. Specifically, it would provide professional assistance for farmers appealing FmHA decisions on loans. This is a change that is long overdue, and one that will ensure that the small farmer, regardless of race, be treated fairly by the FmHA.

As I have already made clear, this amendment is particularly important because of its ability to ease the struggle of the black farmer. I would like for a moment to describe those difficulties, recently documented by the U.S. Civil Rights Commission's report, "The Decline of Black Farming in the United States." The Commission concluded that black family farmers are a rapidly diminishing group in this country, and could disappear by the end of the century. While all family farmers face problems in this dreadful farm crisis, the Commission stated that blacks face special problems of racism and a disproportionately low share of available credit, including the last resort credit supplied by the FmHA.

The statistics cited in this report underscore the dire situation. In the last decade, the number of black farmers fell 57 percent, which is about 2½ times the rate of decline for white farms. There were 926,000 black-run farms in 1920, and about 57,000 by the end of the 1970's. Unless we break the present trends by adopting such measures as the Towns amendment, the experts predict there will be only 10,000 black farms by the end of this century.

Given these shocking statistics, the FmHA can and must play a role in reversing these unacceptable trends. When the Civil Rights Commission released its report on the black farmer, it was revealed that despite the pressing need of black farmers for credit, they received only 2.5 percent of the total dollars lent by the FmHA. The Commission observed further, "There are indications that FmHA may be involved in the very kind of racial discrimination that it should be seeking to correct." That is why the Towns amendment, with its strengthened appellate procedures, its guarantees of speedy loan decisions, its adaptability to unforeseen credit needs, and its emphasis on small farmer training must be adopted today.

In the words of the Civil Rights Commission's report:

A society where whites control virtually all agricultural production and land development * * * is not racially equal. Such an imbalance can only serve to further diminish the stake of blacks in the social order and reinforce their skepticism regarding the concept of equality under the law.

I call upon this Congress to ensure that this bleak possibility does not become a reality, to guarantee that racial equality is a goal we will strive for not just in our schools and factories, but on our farms.

Mr. Chairman, in closing, I am reminded of a line from an essay about Illinois farming, applicable, I think, to farming throughout this country. As the essayist aptly observed, "To plow is to pray—to plant is to prophesy, and the harvest answers and fulfills." I urge my colleagues to answer and fulfill the prayers and prophecies of black farmers all across this Nation. Please join me in supporting the Towns amendment. And together we shall plant the seed for a most bountiful harvest, not just of black agricultural revival, but of fairness, justice, and racial equality.

The CHAIRMAN. The question is on the amendments offered by the gentleman from New York, [Mr. TOWNS].

The amendments were agreed to.

Mr. BEREUTER. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. Without objection, the gentleman from Nebraska [Mr. BEREUTER] is recognized for 5 minutes.

There was no objection.

Mr. BEREUTER. Mr. Chairman, I would like to use this time to engage in a discussion or a colloquy with some of my colleagues, particularly the gentleman from Texas [Mr. STENHOLM] and the gentleman from Wisconsin [Mr. GUNDERSON], who were active in committee in drafting this language and moving it through the committee markup.

First of all, I recognize that we need to move toward a more uniform system of handling the clear title/double jeopardy problem. I compliment the members of the Agriculture Committee for the effort they have put into this section and I know what a difficult issue it has been to resolve.

This issue has been a particularly divisive issue between farmers, ranchers, agriculture producers, purchasers of agricultural products, and lenders. Until it is resolved, double jeopardy will pose continual problems for lender, agricultural producers who each year must borrow operating capital to finance their operation, and for purchasers of agricultural products.

Indeed, the clear title issue has affected many of my constituents in Nebraska.

I wish to make it clear that I raise this issue not because I wish to champion the cause of bankers over that of farmers or ranchers. In fact, I am not sympathetic to the actions taken by banks in collecting double jeopardy claims when those claims bankrupt innocent purchasers of agricultural products.

Mr. BEREUTER. Mr. Chairman, I take this time to engage in a colloquy instead of offering an amendment that I had filed to this title. I would ask if the gentleman from Texas [Mr. STENHOLM] and the gentleman from Wisconsin [Mr. GUNDERSON] who have been very active in this subject would be willing to engage in a short colloquy with me.

As the Members know, I had filed a clear title amendment concerning the issue of double jeopardy. This is a matter of great concern to us. I agree with the objectives that I think the gentleman is attempting to pursue through the legislation. I have some questions and some doubts about its applicability.

I would like to submit a complete list of questions to the gentlemen since they have been so active.

One of the questions that I would like to have answers for, particularly since my State has just passed legislation to move to a highly accessible computerized information system on this subject, the questions include

these: What would be written notice as described by the bill, certified or registered mail? If written notice does not in reality mean certified or registered mail, what does it mean? Would it preclude a computerized central filing system as some States have established? Does this require each lender in effect to keep his own filing system to protect their liens or to protect themselves from double jeopardy? Why is the maximum fine $5,000? I do believe the "clear title" provisions in the bill will create problems and hope that other relevant committees in the two bodies will also examine this crucial issue. Some States like Nebraska have struck a compromise, legislatively, after some difficulty and have taken steps to move to a highly accessible computerized information system. Of course there are problems of interstate sales, but the solution is technologies through a computerized filing system.

Mr. Chairman, I would be pleased to yield now to the gentleman from Texas.

□ 2005

Mr. STENHOLM. Mr. Chairman, I thank the gentleman for yielding.

I have looked at the questions and listened as the gentleman has asked them. I believe that the answers to these questions will go a long way toward defining the legislative intent of the clear title legislation that we have in this bill.

After deferring to my colleague, the gentleman from Wisconsin [Mr. GUNDERSON], who has worked very hard with me on this legislation and within our committee, I would then ask unanimous consent that we be allowed to insert the answers to the questions that the gentleman has posed at this particular point in the RECORD.

Mr. Chairman, before addressing the specific questions, I want to clarify a misperception that runs through them. The questions suggest that, under the bill, the lender's security interest becomes somehow "unperfected" unless the lender prenotifies buyers. "Perfection" of security interests under the Uniform Commercial Code generally refers to the filing of financing statements in public offices, and this step is necessary for the lender to establish priority rights over other creditors and in bankruptcy. Nothing in the pending bill affects any lender's right to perfect his security interest in the normal way, and lenders may still gain a wide array of rights against third-party claims by doing so. All the bill does is modify the lender's position vis-a-vis buyers in the ordinary course of business. "Prenotification" is not the same as "perfection."

Question 1. Under the provisions of this bill, what burden is placed upon a purchaser to make an inquiry of the seller what liens are upon his farm products? What burden is upon the seller to notify the purchaser of existing liens on his products?

Answer 1. The bill places no burden on a buyer of farm products to make an inquiry of the seller about outstanding liens. Indeed the major purpose of the bill is to relieve the buyer of that burden, and the resulting risk of wrong, incomplete or misleading answers. The buyer, however, cannot be oblivious to information that comes to him, through lender pre-notification or otherwise.

Likewise, the bill imposes no specific burden on the seller (the farm products producer) to notify purchasers of existing liens. But the lender may require the seller to disclose such liens to prospective purchasers, by including such a provision in the underlying security agreement.

Questions 2 and 3. What type of notice does this provision prescribe? The bill prescribes "written notice." What constitutes written notices? Certified, or registered mail?

Answers 2 and 3. The bill contemplates that lenders may give prospective buyers "written notice" that identifies the lender and the seller, and contains a basic description of the collateral, sufficient to permit a buyer to relate specific farm products to that lender's security interest. The notice may also specify how the buyer is to account for the sale proceeds, such as by issuing a joint-payee check or otherwise arranging for the proceeds to be transmitted to the lender or applied on the debt. The notice could be in the form of a letter, a telegram or telex, or even a postcard. Registered or certified mail is not required, although a lender may choose one of those methods to assure that the notice is received.

Question 4. If written notice does not in reality mean certified or registered mail, how does a lender prove that the purchaser received notice? Or, the purchaser prove that a lender mailed a notice?

Answer 4. Whether a lender registered or certified mail, or ordinary mail, or even hand-delivers the notices, proof that the notice was given would be by the usual means of proving communications: receipts, business records, eyewitnesses, discovery (depositions, interrogatories, etc.) and similar means.

Question 5. Does written notice preclude the use of computerized central filing systems, which some states have established?

Answer 5. The bill contemplates that the lender's "prenotification" will be physically delivered to the prospective purchaser. Thus the existence of a statewide central filing system, where a buyer would have the burden and expense of inquiring about existing liens, would not provide sufficient notice to buyers to deny them protection under this bill. The bill, or course, does not preclude any state from instituting or maintaining a computerized central filing system for the various other purposes those systems serve.

Question 6. Doesn't this bill require each lender, and each purchaser, to maintain their own filing systems to either perfect their liens, or to protect themselves from double jeopardy claims?

Answer 6. As a matter of technicality, the bill does not assume any formal "filing system" and does not affect the "perfection" of a lender's security interest. As a practical matter, however, in order for lenders preserve their rights against ultimate purchasers, they will need to identify those prospective purchasers, and pre-notify them. In most cases, the borrower (seller) will be in a position to list his likely customers, and the bill contemplates that security agreements may require borrowers to produce such lists for their lenders from time to time.

The bill does assume that buyers who have received notices from lenders will retain them in some accessible form, so that when dealing with sellers the purchasers can ascertain whether the particular goods are encumbered. Buyers are willing to pay this price for clear title protection.

Question 7. Doesn't the clear title provision in this bill impose an unrealistic burden and expense on rural, small town banks if they are required to maintain their own filing systems to perfect and monitor their liens?

Answer 7. The incremental costs of establishing a prenotification system under this bill should be miniscule for any bank. There are no elaborate formalities beyond sending the prenotifications, and most banks should be abe to incorporate a routinized prenotification stage into their normal loan writing and monitoring operations. Indeed, some lenders may choose to ignore the prenotification mechanism altogether where their normal loan monitoring procedures provide adequate protection against the seller's dissipation of loan proceeds. Any measurable cost burden would fall on the *buyers* who will need to retain and index the notices they receive from lenders, consult those records in connection with specific purchasers, and make arrangements for joint-payee or similar payments. But this burden is one the buyers will assume in exchange for protection from double jeopardy claims.

The CHAIRMAN. The Chair would point out to the gentleman from Texas that he cannot insert a colloquy into the RECORD.

Mr. BEREUTER. Mr. Chairman, I thank the gentleman. He is an expert and I appreciate the time he has delivered.

Mr. Chairman, I yield to the gentleman from Wisconsin [Mr. GUNDERSON].

Mr. GUNDERSON. Mr. Chairman, I appreciate the gentleman yielding, and I join with my colleague in this regard.

I think the way to handle this, not only in the interests of time, because I thought I just heard the gentleman ask a question about a limit on penalty which was not on the list of questions we had. I think the way for it to be handled is for the gentleman to submit the questions in his revised and extended remarks and then following that, within the 5 legislative days that we have, we will be able to insert into the RECORD as well specific answers as to some of the details to these questions so that the legislative history is very clear on this issue.

Mr. BEREUTER. Mr. Chairman, I thank the gentleman.

I would say that I did not think the approach the committee has taken will work adequately, but I would hope that we might be able to accommodate the States that are moving toward a computerized information system, because I think that when we cross State borders we are talking about a techno-

logical solution to this problem eventually.

Mr. MORRISON of Washington. Mr. Chairman, will the gentleman yield?

Mr. BEREUTER. I am pleased to yield to the gentleman from Washington.

Mr. MORRISON of Washington. Mr. Chairman, I thank the gentleman from Nebraska for yielding. I, too, have some concerns about the clear title provisions included in the farm bill.

I rise to express my reservations to the "clear title" provisions of H.R. 2100. We all agree that these provisions address a very real problem. Currently, a farmer who sells farm products used as collateral for a loan can shift liability for the loan to the purchaser. Put another way, the lender has recourse against a purchaser of farm products because there is no clear title conveyed with a sale. Agricultural sales are often conducted on such short notice that purchasers have little opportunity to check property for liens. In some cases, purchasers have had to pay twice for the same product, once to the farmer who failed to repay the bank, and again to the bank that holds the loan.

H.R. 2100 contains provisions that are intended to protect agricultural purchasers from this double whammy. While I welcome the effort to address this problem, I believe the bill leans too far in protecting purchasers and places an unfair burden on agricultural lenders. This problem will come back to haunt us if we simply allow the pendulum to swing to the opposite extreme and require farm lenders to sustain all of the losses from defaulted loans. These are tough times for farm lending, and this is no time to dramatically change the rules.

I understand that the Senate Banking Committee will soon hold hearings on the clear title provisions of the Senate farm bill. I urge my colleagues in the House to be receptive to any compromise that might emerge in conference that would be fair to both agricultural lenders and purchasers.

Mr. MARLENEE. Mr. Chairman, will the gentleman yield?

Mr. BEREUTER. I am pleased to yield to the gentleman from Montana.

Mr. MARLENEE. Mr. Chairman, I would certainly encourage the author of the bill to include in the legislative intent of this the fact that the State of Nebraska, the State of Montana, and other States that deal in livestock heavily and in agricultural loans have passed in fact very adequate lien laws and a computerized system for recording those. I think that they should be grandfathered into this situation or that they be covered under this situation.

I want to encourage the gentleman to do that in his remarks of legislative intent.

Mr. Chairman, I thank the gentleman for yielding.

Mr. GUNDERSON. Mr. Chairman, will the gentleman yield?

Mr. BEREUTER. I am pleased to yield to the gentleman from Wisconsin once again.

Mr. GUNDERSON. Mr. Chairman, I just want to acknowledge to the committee that there are two important things here. No. 1, there is nothing—correct me if I am wrong—in the proposal that is now in front of us from the committee that prevents any State from using the registry if they so choose.

Second, by virtue of doing this I think we are going to be able to clarify under a mutually agreed set of scenarios to the Department, so that when the regulations are implemented, clearly they will be able to deal with any specific concerns the gentleman and others might have.

Mr. BEREUTER. Mr. Chairman, I thank the gentleman, and I yield back the balance of my time.

PARLIAMENTARY INQUIRY

Mr. STENHOLM. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state the parliamentary inquiry.

Mr. STENHOLM. Mr. Chairman, in light of the statement that the Chair just made to me regarding the colloquy, is it not in order at this point in the RECORD to accept the questions that were stated from the gentleman from Nebraska [Mr. BEREUTER] and have the answers to those questions inserted into the RECORD at this point?

The CHAIRMAN. They can appear in the RECORD. It will not be effective legislative colloquy as a part of the legislative history, but it will appear.

Mr. DE LA GARZA. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. Without objection, the gentleman is recognized for 5 minutes.

There was no objection.

Mr. DE LA GARZA. Mr. Chairman, I take this time to advise the Members that unless the pace that we have been taking in the past several amendments and colloquies is accelerated tremendously, we would not be able to finish this legislation by 10 o'clock. We have a mandated 2 hours, 1 on the so-called Petri amendment, and 1 on food stamps, and we have various and sundry amendments. If we were to set a limit for 10 o'clock, I am sure that we could finish; otherwise, it does not look like we will, and I would be ready to rise at this time—I am not making that motion yet—and hopefully conclude on Monday.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to my distinguished colleague, the gentleman from Illinois.

Mr. MADIGAN. Mr. Chairman, I thank the gentleman for yielding.

I am looking at the list of what I understand is outstanding here in title XIII.

There is an amendment by Mr. DORGAN of North Dakota, which we are ready to accept on this side.

There is an amendment of mine, which the gentleman from Texas has indicated he is willing to accept.

There is a study amendment by the gentlewoman from Maine [Ms. SNOWE], which I am ready to accept.

In title XIV, there are two study amendments which we are ready to accept on this side.

That gets us down to the point where we really only have left tobacco and food stamps, on which we have a 1-hour limit on both of those, so theoretically by 10 after 10, plus the time to vote on those things, we could be done with this whole bill.

Mr. DE LA GARZA. I agree with the gentleman. I do not want to be accused of cutting anyone off or limiting debate. I would hope that we could conclude, and I am ready to proceed to conclusion, but there is no sense in prolonging the agony of many Members who have commitments otherwise, if we are not going to finish.

Perhaps if we could continue for another few minutes, but if we do not get the necessary cooperation, which we have not up to this point, we will not be able to proceed expeditiously.

Mr. Chairman, perhaps if we just attempt to finish the title we are on now, and then we will see where we are.

AMENDMENT OFFERED BY MR. MADIGAN

Mr. MADIGAN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Is the amendment reported in the CONGRESSIONAL RECORD as of September 24?

Mr. MADIGAN. Yes, it is, Mr. Chairman.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. MADIGAN: Title XIII, page 332 insert the following new section and designate it accordingly:

SEC. . Sections 302 and 311 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1922 and 1941) are amended by adding, at the end of the parenthetical provision in clause (3) of the second sentence, the following: "or, in the case of holders of the entire interest who are related by blood or marriage and all of whom are or will become farm operators, the ownership interest of each such holder separately constitutes not larger than a family farm, even if their interests collectively constitute larger than a family farm, as defined by the Secretary.".

Mr. MADIGAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MADIGAN. Mr. Chairman, this amendment modifies the eligibility criteria for Farmers Home Administration operating and ownership loans. It is an amendment which has been discussed with the chairman of the committee.

Mr. NIELSON of Utah. Mr Chairman, I rise in strong support of the Madigan amendment which will strip from the bill the mandatory marketing certificate program authored by the gentleman from Iowa (Mr. BEDELL].

I do so for the following reasons:

First. Even though the Bedell provision claims to be voluntary, the fact is that 60 percent of the grain producers can dictate what the other 40 percent of the grain producers do. This is taking away people's property rights.

Second. As the gentleman from Montana (Mr. MARLENEE] observed, the vote impacts all of the grain consumers—the pork, beef, poultry, and dairy producers—and yet these groups have no say in the matter. I did not support the dairy diversion program, but even that program recognized the adverse effects of culling the dairy herds and made provisions to mitigate the economic impact on beef and pork producers by producing more meat.

Third. The Bedell provisions puts the livestock, dairy and poultry producers at a competitive disadvantage with respect to foreign competitiors who can buy American produced grain cheaper than can the domestic producers.

Fourth. The Bedell provision may lead to strict import restrictions to prevent foreign grain or meat or poultry products because of the artificially high prices relative to the world markets. The American farmer would definitely be less competitive than at persent.

Fifth. We already rejected the approach on the amendment regarding dairy by the gentleman from Wisconsin [Mr. OBEY]. What is not right for dairy is also not right for grain.

For all these reasons and many others which have been mentioned, I strongly urge a "yes" vote on the amendment from the ranking member of the Agriculture Committee, the gentleman from Illinois [Mr. MADIGAN].

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. MADIGAN. I yield to the gentleman from Texas for any comment he might wish to make or would wish to make.

Mr. DE LA GARZA. Mr. Chairman, we have examined the gentleman's amendment and have no objection on this side.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. MADIGAN].

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to this title?

If not, the Clerk will designate title XIV.

AMENDMENT OFFERED BY MS. SNOWE

Ms. SNOWE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Has the amendment been printed in the CONGRESSIONAL RECORD as of September 24?

Ms. SNOWE. Yes, Mr. Chairman.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Ms. SNOWE: Page 379, line 21, strike out "(5)" and insert "(7)" in lieu thereof.

Page 380, line 14, after "system," insert "(5) an assessment of how economic policies and trade policies of the United States affect the financial operation of, and prospects for, family farm operations, (6) an assessment of the effect of Federal farm programs and policies on family farms and nonfamily farms which (A) derive the majority of their income from non-farm sources, and (B) derive the majority of their income from farming operations,".

Ms. SNOWE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Maine?

There was no objection.

Ms. SNOWE. Mr. Chairman, my amendment to section 1448 would require the Secretary of Agriculture to report to Congress annually on the status of the family farm in this country.

My amendment simply broadens the scope of the annual report to include two additional analyses that are key to the survival of the family farm. First, the Secretary would be required to measure the effect of economic and trade policies on the family farm, and second, to evaluate the effect of Federal farm policies and programs on family and nonfamily farms which earn the major portion of their income from off-farm sources.

As we are all well aware, the agricultural sector has been fully integrated into this Nation's economic system. Probably the most fundamental difference between the agricultural industry of today and that of only a decade ago is the tremendous influence of national macroeconomic forces outside the farm sector on the U.S. food economy.

I contend that the survival of the family farm has become largely dependent upon Government choices in fiscal, monetary, and trade policies. These policies determine the rate of inflation and the level of interest rates, investment and savings, the value of the dollar, the volume of exports and imports, and employment opportunities. What is missing, in my opinion, is a firm understanding of how these policies effect the family farm. Without such an understanding, we may unknowingly cripple the very farms that need our assistance the most.

I believe it is particularly important for us to understand how our trade policies affect these smaller farm operations. Let me use Maine's potato industry as an example. The survival of this industry, composed largely of family farms, may depend on new trade policy developments, especially with Canada. Both the Maine farmers and agriculture officials concerned with trade matters need to fully understand the issues and concerns in need of redress during future bilateral negotiations. The Department of Agriculture, under my amendment, will be responsible for determining how trade policies and actions affect family farm operations. Such an annual review, I think, will be constructive for farmers and the Department.

My amendment calls on the Secretary of Agriculture to identify, review, and analyze economic and trade policy decisions made during the previous year and to assess their impact on the family farm.

The second part of my amendment would require the Secretary of Agriculture to report on the influence and effect of Federal farm programs and policies on those farms where the majority of income is earned from off-farm sources as opposed to those farms where the majority of income is earned on the farm.

I believe that one of our important responsibilities in enacting the 1985 farm bill is to ensure that our Federal farm programs primarily serve to support family farm operations. These farming families, now having to rely more and more on an off-farm source of income to keep their farms going, are the same ones that are in the most financial trouble today.

I am concerned that our policies are squeezing out family farm operations in favor of large, industrialized corporate farms and also, so-called hobby farms, whose owners depend almost totally on off-farm income and where farming is not their primary occupation.

Our policies should not work to discourage these hobby farms or the large, corporate farms. However, as this bill already makes clear in this section, neither should our Government policies work to the detriment of family farm operations.

The growing importance of off-farm income to keep a farm operation in business, Mr. Chairman, should be a real concern. We need to know more about the direction our farmers are heading in before the traditional family farm becomes truly extinct.

My amendment, by requiring the Department of Agriculture to focus on the importance of off-farm income, will help to determine whether our programs are efficient, and are helping the farmers who really need the assistance. I urge my colleagues to support these small, but important, additions to the Secretary's annual report so that we may better utilize scarce resources to further the cause of American agriculture.

Mr. BEDELL. Mr. Chairman, will the gentlewoman yield?

Ms. SNOWE. Yes, I am glad to yield to the gentleman.

Mr. BEDELL. Mr. Chairman, we have looked at the gentlewoman's amendment on this side of the aisle and we are willing to accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Maine [Ms. SNOWE].

The amendment was agreed to.

The CHAIRMAN. Are there other amendments to title XIV?

AMENDMENT OFFERED BY MR. TALLON

Mr. TALLON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TALLON: Page 374, strike out line 12 and all that follows through line 17 of page 376 and insert in lieu thereof the following:

SEC. 1445. (a) The Secretary of Agriculture and the Secretary of Health and Human Services shall jointly conduct an assessment of existing scientific literature and research, respecting—

(1) the relationship between dietary cholesterol and blood cholesterol and human and nutrition, and

(2) dietary calcium and its importance in human health and nutrition.

In conducting the assessements under this subsection, the Secretaries shall consult with agencies of the Federal Government involved in related research. Upon completion of such assessments the Secretaries shall each recommend such further studies as the Secretaries consider useful.

(b) The Secretary of Agriculture and the Secretary of Health and Human Services shall each submit to the House Committees on Agriculture and Energy and Commerce and the Senate Committees on Agriculture, Nutrition, and Forestry and Labor and Human Resources a report on the results of the assessment conducted under subsection (a) and any recommendations made under such subsection, including a protocol, feasibility assessment, budget estimates and a timetable for such research as each Secretary shall deem appropriate.

Mr. TALLON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. TALLON. Mr. Chairman, I ask unanimous consent to modify the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

The CHAIRMAN. The Clerk will report the modification to the amendment offered by the gentleman from South Carolina [Mr. TALLON].

The Clerk read as follows:

Modification of amendment offered by Mr. TALLON: Strike out page 2 of the proposed amendment and insert in lieu thereof the following:

(b) Not later than one year after the date of enactment of this Act, the Secretary of Agriculture and the Secretary of Health and Human Services shall each submit to the House Committees on Agriculture and Energy and Commerce and the Senate Committees on Agriculture, Nutrition and Forestry and Labor and Human Resources a report which shall include the results of the assessments conducted under subsection (a) and recommendations made under such subsection, for more complete studies of the issues examined under such subsection, including a protocol, feasibility assessment, budget estimates and a timetable for such research as each Secretary shall deem appropriate.

Mr. TALLON (during the reading). Mr. Chairman, I ask unanimous consent that the modification to the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

The text of the amendment, as modified, is as follows:

Amendment offered by Mr. TALLON, as modified: Page 374, strike out line 12 and all that follows through line 17 of page 376 and insert in lieu thereof the following:

SEC. 1445. (a) The Secretary of Agriculture and the Secretary of Health and Human Services shall jointly conduct an assessment of existing scientific literature and research, respecting—

(1) the relationship between dietary cholesterol and blood cholesterol and human health and nutrition, and

(2) dietary calcium and its importance in human health and nutrition.

In conducting the assessments under this subsection, the Secretaries shall consult with agencies of the Federal Government involved in related research. Upon completion of such assessments the Secretaries shall each recommend such further studies as the Secretaries consider useful.

(b) Not later than one year after the date of enactment of this Act, the Secretary of Agriculture and the Secretary of Health and Human Services shall each submit to the House Committees on Agriculture and Energy and Commerce and the Senate Committees on Agriculture, Nutrition and Forestry and Labor and Human Resources a report which shall include the results of the assessments conducted under subsection (a) and recommendations made under such subsection, for more complete studies of the issues examined under such subsection, including a protocol, feasibility assessment, budget estimates and a timetable for such research as each Secretary shall deem appropriate.

Mr. TALLON. Mr. Chairman, this amendment clarifies section 1445 of H.R. 2100, dealing with research done by the U.S. Department of Agriculture.

It has been worked out and agreed upon by the commodity groups involved, the chairman of the Agriculture Committee and members of the House Energy and Commerce Committee, which had some jurisdictional concerns.

I appreciate the cooperation of the Energy and Commerce Committee, Chairman DINGELL, Subcommittee Chairman WAXMAN, and their staff in working out this compromise.

Quite simply, as reported from the House Agriculture Committee, the section requires the Secretary of Agriculture to conduct an assessment of existing literature and research on dietary cholesterol and blood cholesterol as well as calcium and their relationships to human health and nutrition. It also calls for a report to the Agriculture Committees on further research recommendations.

The amendment being offered now would make the assessment a joint project between USDA and HHS. This and some other changes will solve the jurisdictional situation between the two committees.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. TALLON. Yes, I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Chairman, we have looked at the amendment. We have no objection to the amendment on this side of the aisle.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield to me?

Mr. TALLON. I am happy to yield to the gentleman from Illinois.

Mr. MADIGAN. Mr. Chairman, we have no objection on this side of the aisle.

We further understand that with the gentleman's modification, the Energy and Commerce Committee no longer has a reservation against the gentleman's amendment.

Mr. Chairman, I thank the gentleman for yielding.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina [Mr. TALLON], as modified.

The amendment, as modified, was agreed to.

Mrs. KENNELLY. Mr. Chairman, I am pleased to note that the House Agriculture Committee has reconciled a printing error in its report to accompany H.R. 2100. Language was inadvertently omitted regarding the implementation of Integrated Pest Management under Title XIV, the National Agricultural Research, Extension, and Teaching Policy Act Amendments of 1985. The official committee's report language that was omitted now appears on page H 7665 in the September 20, 1985, CONGRESSIONAL RECORD. This language is important to me because it incorporates a section of my bill, H.R. 2339. The language would essentially help farmers reduce their dependence on chemical pesticides. The First District of Connecticut, which I represent, is particularly concerned with pesticide pollution, where nearly 1,000 water wells have been contaminated by agricultural pesticides.

Again, Mr. Chairman, I am pleased this error was corrected and that the language was inserted in the CONGRESSIONAL RECORD.

The CHAIRMAN. Are there further amendments to title XIV?

If not, the Clerk will designate title XV.

Under the previous agreement, debate is limited to 1 hour on the food stamp section of title XV. Are there amendments?

AMENDMENTS OFFERED BY MR. GLICKMAN

Mr. GLICKMAN. Mr. Chairman, I offer two amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. GLICKMAN: On page 413, line 21, strike the word "and", and on line 22, insert before the period the following: ", and system security and privacy."

On page 414, line 4, strike the word "and" and insert in lieu thereof a comma, and after the word, "cost-effective", insert the following: ", and secure".

Mr. GLICKMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. GLICKMAN. Mr. Chairman, the two amendments I am offering will strengthen accountability in the food stamp program by encouraging States to take steps to assure that both data and Federal food stamp dollars flowing through their automated data processing systems are secure.

Specifically, my first amendment adds "computer security and privacy" to the components of the model computer plan the Secretary is directed to develop under this section. As provided in the bill, States choosing to adopt this plan will receive 90-percent matching funds for improvements to their system, instead of the current 75 percent.

The second amendment requires the USDA's report on the adequacy of each State's automated data processing and computerized information system include not only analyses of steps needed to achieve system effectiveness and cost efficiency, as the bill currently directs, but an analysis of system security as well.

Mr. Chairman, the issue of computer security is not new to any of us; however, we are just beginning to realize the dimensions and the seriousness of the threat unprotected computer systems present to Federal agencies and Federal programs. I have participated in three congressional hearings on computer security and am convinced that the potential for fraud, vandalism and sabotage is great and growing, as Government programs move toward greater computerization.

The Office of Inspector General of the Department of Agriculture has just completed an audit evaluating the security of State computer systems which process food stamp and other Food and Nutrition Service Program payments. The objective of the survey was to determine if security controls were sufficient to prevent unauthorized access to or use of automated data processing systems to fraudulently create or maintain cases receiving food stamp benefits.

Although the Inspector General's final report is not yet completed, preliminary reports of the OIG's review of 13 computer systems disclose a number of significant security weaknesses. These weaknesses range from inadequate controls over physical security, thereby permitting unrestricted access to computer hardware, to inadequate software controls, enabling persons to improperly manipulate or change data bases.

An earlier audit by the Inspector General of the Department of Health and Human Services of computer-related fraud in Government agencies concluded that existing controls in the victimized systems were weak and easily bypassed, and it recommended implementation of additional controls to strengthen the integrity of automated systems and prevent the perception that "no one is watching." About half of the perpetrators interviewed for this audit worked for State, local, or private agencies which were administering Federal programs, including the Food Stamp Program.

Noting that "Federal agencies have a substantial investment in State, local, and private computer systems, both because the Federal Government finances most of the development and maintenance costs of such systems, and because those systems control the allocation of Federal funds," the audit also recommended that Federal agencies reevaluate their guidance to State, local, and private administering agencies regarding computer security and controls, and that vulnerabilities in these computer systems be addressed with the same energy and diligence as those in Federal systems.

My amendments take a small step toward addressing these concerns. They do not force any new requirements on the States, nor do they dictate to the Secretary how he should attack this problem. I urge my colleagues to adopt them.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from California.

Mr. PANETTA. Mr. Chairman, we have had an opportunity to look at the amendments that the gentleman has offered. It makes good sense in terms of improving computerization of the program.

I would have no objection to accepting the amendments.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Kansas [Mr. GLICKMAN].

The amendments were agreed to.

The CHAIRMAN. Are there further amendments to title XV?

□ 2020

AMENDMENT OFFERED BY MR. BEDELL

Mr. BEDELL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Chair will inquire of the gentleman whether his amendment has been printed in the RECORD as of September 24?

Mr. BEDELL. Yes, it was, Mr. Chairman.

The Clerk read as follows:

Amendment offered by Mr. BEDELL: Page 385, after line 23, insert the following new section (and redesignate references and succeeding sections accordingly):

INCOME FROM SELF-EMPLOYMENT

SEC. 1508. Section 5(f)(1)(A) of the Food Stamp Act of 1977 (7 U.S.C. 2014(f)(1)(A)) is amended by adding at the end thereof the following: "Notwithstanding the preceding sentence, if the averaged amount does not accurately reflect the household's actual monthly circumstances because the household has experienced a substantial increase or decrease in business, the State agency shall calculate the self-employment income based on anticipated earnings.".

Mr. BEDELL [during the reading]. Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. BEDELL. Mr. Chairman, as I understand, this amendment has also been approved by both the minority and the majority.

This is a very simple, straightforward amendment. It is, however, an important amendment which will allow farmers to be treated more fairly in their efforts to qualify for food stamps.

My amendment simply clarifies in the law current USDA regulations which provide that a self-employed household, such as a farmer household, shall not have eligibility and benefits for the Food Stamp Program determined on the basis of income received in the past year if there has been a substantial change in business earnings in the current year.

While this is an existing regulation, there seems to be a number of States which continue to use prior year tax returns to make eligibility and benefit determinations in farm families who have experienced substantial decreases in income in the current year. This amendment simply states that in these cases, the States shall anticipate income for food stamp purposes based on a household's current income rather than last year's income tax form. As this is already a regulation, there is no cost involved in this amendment.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. BEDELL. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

Mr. Chairman, this also is an amendment which we have had an opportunity to review. It deals with counting countable income for self-employed persons.

We think it makes a great deal of sense and restates basically the current regulations. Therefore, I would have no objection to accepting it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. BEDELL].

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title XV?

AMENDMENT OFFERED BY MR. EMERSON

Mr. EMERSON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Chair will inquire whether the gentleman's amendment was printed in the RECORD as of September 24?

Mr. EMERSON. It was, Mr. Chairman.

The Clerk read as follows:

Amendment offered by Mr. EMERSON: Page 381, strike out line 25 and all that follows through line 25 on page 382, and insert in lieu thereof the following:

SEC. 1503. The first sentence of section 3(o) of the Food Stamp Act of 1977 (7 U.S.C. 2012(o)) is amended by striking out "fifty-four and inserting in lieu thereof "fifty".

Page 388, strike out line 1 and all that follows through line 22 on page 389, and insert in lieu thereof the following:

(2) effective October 1, 1985, inserting in clause (2) of the fourth sentence "excluding expenses paid on behalf of the household under the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8621 et seq.)," after "by a household for shelter";

Page 389, line 23, strike out "(4)" and insert in lieu thereof "(3)".

Page 390, strike out lines 9 through 20, and insert in lieu thereof the following:

(4) effective October 1, 1985, inserting in clause (c) of the last sentence ", excluding expenses paid on behalf of the household under the Low-Income Home Energy Assistance Act of 1981 (7 U.S.C. 8621 et seq.)," after "by a household for shelter".

Page 393, strike out line 2 and all that follows through line 4 on page 394, and insert in lieu thereof the following:

SEC. 1511. The first sentence of section 5(g) of the Food Stamp Act of 1977 (7 U.S.C. 2014(g)) is amended by inserting "and any other property, real or personal, to the extent that it is directly related to the maintenance or use of such vehicle" after "physically disabled household member".

Page 406, strike out lines 12 through 25.

Page 417, strike out lines 4 through 11.

Page 417, line 12, strike out "(2)" and insert in lieu thereof "(1)".

Page 417, line 14, strike out "(3)" and insert in lieu thereof "(2)".

Page 417, line 17, strike out "(4)" and insert in lieu thereof "(3)".

Page 417, line 21, strike out "(5)" and insert in lieu thereof "(4)".

Mr. EMERSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. EMERSON. Mr. Chairman, within these three titles of the food stamp provisions of the farm bill there are many positive measures. The Food Stamp Program, the temporary Emergency Food Assistance Program and the Commodity Supplemental Food Program are reauthorized. A Mandatory Work and Employment Program designed by States is included. Monthly reporting and retrospective budgeting is better targeted. A Nutrition Education Program which strengthens the expanded Food and Education Program is authorized, and the USDA nutrition monitoring is expanded.

All of these are worthy of support and I do support them.

The Food Stamp Program itself serves on the average over 22 million people per month. In 1984 it is estimated that 38 million people were helped by the Food Stamp Program, up from a 35.3 million figure in 1980. Some of these same people, and more, are helped by the other USDA food assistance programs.

These are basically good programs. In fact, I believe the food stamp program is significantly improved. Ultimately, and I am going to get to the point here, this is an amendment designed to save $2 billion over the course of the bill, and I would hope that Members would give it some attention.

In fact, I think the Food Stamp Program is significantly improved by one provision in H.R. 2100. That is the mandatory employment and training program. However, there are several provisions within title XV with which I do not agree.

I offered an amendment in committee which failed on a 22 to 21 vote to delete additional spending in the Food Stamp Program. My amendment would have reduced the cost of H.R. 2100 by over $1 billion by 1988, and by 1990 it would have reduced the cost by over $2 billion. Bear in mind that that is a reduction in cost in the bill and it is not a cut in the program.

My amendment deletes much of the additional spending contained in the committee bill for food stamps. It does not—and I repeat for emphasis—it does not cut benefits. I urge my colleagues to look at this amendment very carefully. It takes out the add-ons, but it does allow all cost-of-living adjustments for benefits and deductions.

Under my amendment, the thrifty food plan for a family of 4 will increase from the present level of $268 a month to $295 a month by 1988. The standard deduction will increase from $98 to $107. The sheltered dependent care deduction will increase from $139 a month to $152 a month.

All increases are provided for in the act, and my amendment does not change that. This is not a freeze amendment. For those who think that we ought simply to freeze, this is not even a freeze amendment. Growth is allowed in this amendment and is accommodated.

My amendment removes the add-ons. The committee bill increases benefits and deductions over and above the cost-of-living adjustments. The committee bill expands the food stamp program, adopts methods of adjusting benefits and deductions that were repudiated as long ago as the Carter administration, and reinstates reforms of 1981 and 1982.

In addition, the amount of money to be provided for food assistance in Puerto Rico is increased by $370 million by 1990, and yet somehow, the way the budget is calculated, this $370 million increase in spending to occur by 1990 is described as a savings of $208 million.

My amendment deletes the add-ons in the committee bill. The additional increases above the cost-of-living adjustment for the thrifty food plan and the sheltered dependent care deduction are deleted. The expansion of earned income deduction and the separation of the sheltered dependent care deduction are eliminated.

I have agreed, and we will have a colloquy with the gentlewoman from New Jersey [Mrs. ROUKEMA] in a few moments, to add back the medical deductions.

Resource limits are retained at the current levels. Outreach is eliminated, and the Puerto Rico nutrition assistance grant is retained, retained at a level of $825 million a year. That is a higher level than any State receives except New York.

The CHAIRMAN. The time of the gentleman from Missouri [Mr. EMERSON] has expired.

(By unanimous consent, Mr. EMERSON was allowed to proceed for 30 additional seconds.)

Mr. EMERSON. Mr. Chairman, I urge support of this amendment. We will be giving cost-of-living adjustments to food stamp participants. Benefits will go up and deductions will increase.

I remind this House that the debate over Social Security in the course of the budget debate was not whether or not there would be a COLA increase and an expansion of Social Security. The question was: Will there be a COLA or will there not be a COLA?

This amendment says that there will be a COLA in food stamps, but not an expansion of the program.

Mr. Chairman, I urge support for my amendment.

Mrs. ROUKEMA. Mr. Chairman, I would like to commend my colleague, the gentleman from Missouri, for his presentation here, and I want to express my support for his amendment in consideration or with the understanding that we can come to an agreement as to an amendment to the gentleman's amendment.

Mr. EMERSON. Mr. Chairman, if the gentlewoman will yield, the gentle-

woman and I have discussed this, and I am perfectly happy to accept her amendment relating to a medical deduction.

Mrs. ROUKEMA. I would like to take a few moments, Mr. Chairman, please, to describe the amendment.

AMENDMENT OFFERED BY MRS. ROUKEMA TO THE AMENDMENT OFFERED BY MR. EMERSON

The CHAIRMAN. Does the gentlewoman wish to offer her amendment at this point?

Mrs. ROUKEMA. Yes, I do, Mr. Chairman. I offer an amendment to the amendment.

The CHAIRMAN. For what reason does the gentleman from Texas [Mr. DE LA GARZA] rise?

Mr. DE LA GARZA. Mr. Chairman, may I ask, has the gentleman from Missouri concluded his time?

The CHAIRMAN. The gentleman from Missouri has concluded, and the Chair recognized the gentlewoman from New Jersey [Mrs. ROUKEMA] who was the only Member on her feet. She was speaking and now has requested that an amendment be read by the Clerk.

Mr. DE LA GARZA. I would defer to the gentlewoman from New Jersey. It was my intention to rise at this time, but I will defer to her at this point.

Mrs. ROUKEMA. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mrs. ROUKEMA to the amendment offered by Mr. EMERSON: Page 1, strike out the amendment proposed to be made to page 390 of the bill, and insert in lieu thereof the following:

Page 390, line 9, strike out "(5)" and insert in lieu thereof "(4)".

Mrs. ROUKEMA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New Jersey?

There was no objection.

Mrs. ROUKEMA. Mr. Chairman, I will yield back to the chairman of the Committee on Agriculture for his consideration as long as my rights, as I understand it, can be reserved.

The CHAIRMAN. The gentlewoman has the time. She has 5 minutes in support of her amendment.

Mrs. ROUKEMA. I yield back to the distinguished chairman.

Mr. DE LA GARZA. I thank the gracious gentlewoman. If she does not wish to take her time at this time, the Chair would see that her time is protected when we next continue with the legislation.

Mr. HAYES. Mr. Chairman, I rise to make a few comments on the Food Security Act.

We all realize that American farmers are undergoing one of the most difficult periods in the history of our country. For years now we have been warned about their economic crisis and the dire consequences they face as a result of mounting debts and overdue credit obligations.

For years now the policy of our Government has been to pay farmers not to produce crops in an effort to keep commodity prices at profitable levels.

On the other hand, we are faced with another serious and growing problem in our Nation, and indeed, in the world. That is the problem of hunger. Several studies released in the past year indicate that hunger has increased even as the economy has improved and unemployment has dipped to its prerecession levels.

According to "Bitter Harvest," a survey of emergency food providers conducted by the Food Research and Action Center, there was an average increase of over 20 percent nationally in the number of households served by emergency food providers between 1983 and 1984.

For some 35 million Americans with below-poverty incomes, the thought that farmers are paid not to grow food is one that probably boggles their minds.

In my congressional district, I have far too many hungry constituents who would gladly take the excess food that our farmers could produce. And as evidenced when the Government released stored butter and cheese to the needy, many of my constituents would also fight to receive those products.

In the face of rising consumer prices and growing domestic and world hunger I ask this question—should we be in the business of paying farmers not to grow food? I believe the answer is self-evident.

It appears to me that what is needed is a reassessment and a rethinking of the guiding principals on which we base our farm policies. If there is a problem with storing excess commodities—let's correct it. If there is a problem with marketing excess commodities—let's correct it. If there is a problem with giving food to hungry people, by all means—let's correct it.

I am by no means an expert on food production. However, I do know that there are an increasing number of people who are hungry. I do know that where there is a will, there is a way.

We can cure the problem of hunger if we so desire. While it may be too late to make that commitment in H.R. 2100, it is not too late to get started on addressing the plight of the hungry of this Nation. You, my colleagues, owe it to your constituents. I know I owe it to mine.

Mr. DORGAN of North Dakota. Mr. Chairman, farm prices are continuing to drop, farmers are going broke in record numbers, and the Federal budget expenditures for agriculture, while increasing substantially in past years, have done nothing to stop the hemorrhaging.

We have a farm program that gives the biggest producers the biggest checks, and they're the ones who need it least. So we desperately need to change the farm program. But we face a roadblock here in the House, even in my own political party, from those who want to cling to what we've been doing for years—an approach that simply doesn't work.

But despite my frustration with members of my own party in the House of Representatives, the major stumbling block that we've faced in writing a new farm bill in 1985 has been President Reagan. He sent a farm bill to Congress that we described as "dead on arrival" by both Republicans and Democrats who view it as a ridiculous proposal, totally out of touch with reality. The President, in the middle of a farm crisis, suggested it's time to get back to the old Herbert Hoover approach and get rid of all farm programs. Then the President promptly vetoed an emergency farm credit relief bill passed by the House. Now he is threatening to veto either version of the farm bill reported out by the House or the Senate Agriculture Committees.

I call on this President to stop the political sloganeering on agriculture and give us some help. Let's design a policy that tries to save the network of family farms in America. There is money enough to do it. In fact, what we're spending today would do it if we spent the money the right way.

The inattention to family farms in the administration can probably be attributed to their preoccupation with the military. We have seen this administration spending itself silly for military weapons, both at home and abroad. The Defense Department has been showered with so much money that they apparently have to buy $800 toilet seats and $7,600 coffeemakers in order to spend it all.

The administration's requests for overseas military spending have been just as lavish—while it was proposing cuts of 38 percent for agriculture and a 25-percent reduction for higher education, it was asking for a giant increase in foreign aid, primarily for military and related security aid—an incredible 100 percent increase for security aid in the past 5 years. Much of this military assistance goes to the Third World, which has been encouraged to go on a weapons buying spree over the past several years, lured by easy credit terms. This is truly a sad state of affairs, when these nations have so many other more pressing needs, including simply feeding their citizens.

A farm wife who visited my office the other day was wearing a button which summed it all up neatly. It read, "Farms, not arms."

That is exactly what we need to remember here in Congress. We can have adequate military security without overspending on fraud and waste. We can far better contribute to the security of the world by sharing our farm abundance and technical knowledge through the Food for Peace and other assistance programs, than we can by arming every nation to the teeth. And our farms themselves, as Chairman DE LA GARZA has recognized in naming the House farm bill the Food Security Act of 1985, are, in a very real sense, a basic building block of our national security.

I have said many times that we ought to compete with the Soviet Union not in arms sales to other countries—where they can match us weapon for weapon—but in agricultural exports, where there is no contest. We all know that the Soviet Union must buy a significant amount of grain even to meet its own needs, much of it from the United States.

But it is not enough just to point out the faults of this administration on farm policy. Responsible criticism must be accompanied by ideas for change. That is why, over the past months here in Congress, I have worked in three different areas for change in our farm and foreign policy:

First, I firmly believe that we can do a better job of spending those Federal resources we have for agriculture by targeting farm program benefits to family-size farms. I introduced such a bill early in this session, and I supported the amendment sponsored by Congressmen GLICKMAN, SLATTERY, and others, which incorporated targeting as a major component. I was disappointed when that amendment lost by a narrow margin in the House yesterday. I would hope, since the Senate Agriculture Committee's farm bill does have a targeting feature, that perhaps we could achieve this in the conference committee on the farm bill.

Second, we need to explore new ways to boost our slumping agricultural exports. I believe that barter presents us with such an opportunity. Since this administration has not agreed, I am introducing an amendment which requires the Secretary of Agriculture to conduct a barter pilot program to test the workability of this idea.

Third, I have worked to freeze foreign aid at current levels, preserving needed humanitarian aid and stopping the runaway growth in security and military aid.

I urge my colleagues to keep these principles in mind as we debate the 1985 farm bill. Our family farms are truly our first line of defense. I urge President Reagan to start caring about family farms.

Mr. BRUCE. Mr. Chairman, I rise in opposition to the attempt to reduce target prices.

The Agriculture Committee went through a painful process to get a farm bill which was within the budget limits. We had to cut several important programs, but the one thing we all agreed on was that the basic farm income supports must remain in place.

Farmers are being stretched to the limit trying to cover the gap between their rising costs of production and the falling farm prices. We can't promise them that this farm bill will solve their problems. But we can give them a bill that says, "Hang in there and we'll see you through." Now some Members want to take away even that assurance. Having seen the situation of farmers from Champaign County clear down to White County at the other end of my district. I cannot go along with the attempt to lower target prices.

The economic arguments we get here in the House sometimes overlook the human picture. Last spring the University of Illinois Extension Service opened a hotline for farmers in trouble. In the first 5 days the hotline handled 200 calls. Today they continue to field calls from farmers all over Illinois. The callers ask for financial counseling, they ask for help finding jobs off the farm, they ask how they can deal with the stress they are under. The farm crisis is real, and we cannot turn our backs on farmers.

A 5-percent drop in target prices each year may not sound like much, but over 4 years that means corn farmers would lose 60 cents on each bushel of corn they produce. I can tell you right now that corn is not going to be 60 cents cheaper to produce in 1990.

The farm bill the Agriculture Committee brought to the floor provides that if the cost of production does drop, the Secretary of Agriculture may lower target prices correspondingly. I believe that this approach makes sense. We have a farm budget Congress can live with—let's pass a farm bill farmers can live with. I urge you to defeat this amendment.

Mr. ALEXANDER. Mr. Chairman, in order to facilitate debate on H.R. 2100 and accommodate Members of this body, I offer to incorporate all previous actions heretofore taken in the Committee of the Whole House on the State of the Union during the consideration of H.R. 2100, excepting only title VA as printed in the RECORD as an amendment in the nature of a substitute under provisions of House Resolution 267.

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Food Security Act of 1985".

TABLE OF CONTENTS

SEC. 2. The following is the table of contents for this Act:

TABLE OF CONTENTS

TITLE I—SUGAR

Sec. 1. Sugar price support.

Division A—Commodity Programs

TITLE II—DAIRY

Sec. 201. Short title.

Subtitle A—Milk Price Support and Producer-Supported Dairy Diversion and Research

Sec. 211. Level of milk price support for fiscal years 1986 through 1990; reductions in the price of milk.
Sec. 212. Extension of milk diversion program.
Sec. 213. Application of amendments.
Sec. 214. Avoidance of adverse effect of dairy diversion program on beef, pork, and lamb producers.
Sec. 215. Study relating to casein.
Sec. 216. Congressional evaluation of the cost of production schedule.

Subtitle B—Dairy Research and Promotion

Sec. 221. National Dairy Research Endowment Institute.
Sec. 222. Dairy promotion program.

Subtitle C—Milk Marketing Orders

Sec. 231. Minimum adjustments to prices for fluid milk under marketing orders.
Sec. 232. Adjustments for seasonal production; hearings on amendments; determination of milk prices.
Sec. 233. Cooperative association representation.
Sec. 234. Marketwide service payments.
Sec. 235. Status of producer handlers.

Subtitle D—National Commission on Dairy Policy

Sec. 241. Findings and declaration of policy.
Sec. 242. Establishment of Commission.
Sec. 243. Study and recommendations.
Sec. 244. Administration.
Sec. 245. Financial support.
Sec. 246. Termination of Commission.

Subtitle E—Miscellaneous

Sec. 251. Transfer of dairy products to the military and veterans hospitals.
Sec. 252. Extension of the dairy indemnity program.

TITLE III—WOOL AND MOHAIR

Sec. 301. Extension of Price Support Program.
Sec. 302. Foreign promotion programs.

TITLE IV—WHEAT

Sec. 401. Loan rates, target prices, disaster payments, acreage limitation and set-aside programs, and land diversion for the 1986 through 1989 crops of wheat.
Sec. 402. Nonapplicability of section 107 of the Agricultural Act of 1949.

TITLE V—FEED GRAINS

Sec. 501. Loan rates, target prices, disaster payments, acreage limitation and set-aside programs, and land diversion payments for the 1986 through 1989 crops of feed grains.
Sec. 502. Nonapplicability of section 105 of the Agricultural Act of 1949.

TITLE V-A—AGRICULTURAL COMMODITY SUPPLY MANAGEMENT

Sec. 501. Agricultural commodity supply management.
Sec. 502. Suspension of permanent program.

TITLE VI—COTTON

Sec. 601. Loan rates, target prices, and acreage limitation and land diversion programs for the 1986 through 1989 crops of upland cotton.
Sec. 602. Commodity Credit Corporation sales price restrictions.
Sec. 603. Miscellaneous cotton provisions.
Sec. 604. Skiprow practices.
Sec. 605. Marketing certificates.

TITLE VII—RICE

Sec. 701. Loan rates, target prices, and acreage limitation and land diversion programs for the 1986 through 1989 crops of rice.
Sec. 702. Nonapplicability of section 101 of the Agricultural Act of 1949.
Sec. 703. Export marketing certificates.

TITLE VIII—PEANUTS

Sec. 801. Suspension of marketing quotas and acreage allotments.
Sec. 802. Poundage quotas.
Sec. 803. Sale, lease, or transfer of farm poundage quota.
Sec. 804. Marketing penalties; disposition of additional peanuts.
Sec. 805. Price support program.
Sec. 806. Reports and records.
Sec. 807. Suspension of certain price support provisions.

TITLE IX—SOYBEANS

Sec. 901. Soybean price support.

TITLE X—GENERAL COMMODITY PROVISIONS

Subtitle A—The Agricultural Efficiency and Equity Act of 1985

Sec. 1001. Short title.
Sec. 1002. Acreage base and program yield system for the wheat, feed grains, upland cotton, and rice programs.
Sec. 1003. Repeal of outdated program provisions.
Sec. 1004. Price support levels for cooperators under permanent law.
Sec. 1005. Conforming changes.

Subtitle B—Miscellaneous Commodity Provisions

Sec. 1011. Payment limitations for wheat, feed grains, cotton, and rice.
Sec. 1012. Nonrecourse loan limit.
Sec. 1013. Extension of the National Agricultural Cost of Production Standards Review Board.
Sec. 1014. Commodity Credit Corporation sales price restrictions for wheat and feed grains.
Sec. 1015. Application of terms in the Agricultural Act of 1949.
Sec. 1016. Normally planted acreage and target prices.
Sec. 1017. Haying and grazing.
Sec. 1018. Supplemental set-aside and acreage limitation authority.
Sec. 1019. Normal supply.
Sec. 1020. Multiyear set-asides.
Sec. 1021. Cost reduction options.
Sec. 1022. Producer Reserve Program for wheat and feed grains.
Sec. 1023. Advance deficiency payments.
Sec. 1024. Discretionary wheat and feed grain export certificate programs.
Sec. 1025. Required disposition of surplus commodities.
Sec. 1026. Noncompliance based on excess idled acres.
Sec. 1027. Advance recourse commodity loans.
Sec. 1028. Liquid fuels.

Division B—Trade, Conservation, and Credit

TITLE XI—TRADE

Subtitle A—Public Law 480 and Use of Surplus Commodities in International Programs

Sec. 1101. Title II of Public Law 480—Funding levels.
Sec. 1102. Title II of Public Law 480—Minimum for fortified or processed food and nonprofit agency proposals.
Sec. 1103. Extension of the Public Law 480 authorities.
Sec. 1104. Facilitation of exports.
Sec. 1105. Farmer-to-farmer program under Public Law 480.
Sec. 1106. Use of surplus commodities in international programs.

Subtitle B—Food Security Wheat Reserve

Sec. 1111. Extension of the reserve.

Subtitle C—Maintenance and Development of Export Markets

Sec. 1121. Trade policy declaration.
Sec. 1122. Agricultural trade consultations.
Sec. 1123. Department of Agriculture export development programs.
Sec. 1124. Cooperator market development program.
Sec. 1125. Development and expansion of markets for United States agricultural commodities.
Sec. 1126. Export Advisory Council.
Sec. 1127. Agricultural export credit revolving fund.
Sec. 1128. Intermediate credit for agricultural exports.
Sec. 1129. Market expansion research.
Sec. 1130. Export subsidy reports.
Sec. 1131. Contract sanctity.

Subtitle D—Transportation Charges for Waterborne Cargoes of Donated Commodities

Sec. 1141. Limitation on requirements.

Subtitle E—Agricultural Imports

Sec. 1151. Consultations on import restrictions.
Sec. 1152. Study.
Sec. 1153. Findings.
Sec. 1154. Special Assistant for Agricultural Exports and Food Aid.

TITLE XII—RESOURCE CONSERVATION

Subtitle A—Conservation of Highly Erodible Land and Wetlands

Sec. 1201. Definitions.
Sec. 1202. Program ineligibility for production on highly erodible land or converted wetland.
Sec. 1203. Exemptions.
Sec. 1204. Completion of soil surveys.
Sec. 1205. Conservation Reserve Program.
Sec. 1206. Administrative provisions.

Subtitle B—Water Resource Conservation

Sec. 1211. Technical assistance for water resources; reports.

Subtitle C—Soil and Water Resources Conservation Act of 1977

Sec. 1221. Short title.
Sec. 1222. Extension of the Act.

TITLE XIII—CREDIT

Sec. 1301. Joint operations.
Sec. 1302. Water and waste disposal facilities.
Sec. 1303. Interest rates—water and waste disposal facility and community facility loans.
Sec. 1304. Effective date of sections 1302 and 1303.
Sec. 1305. Mineral rights as collateral.
Sec. 1306. Rural industrial assistance.
Sec. 1307. Eligibility for emergency loans.
Sec. 1308. County committees.
Sec. 1309. Use of proceeds from mineral sales or leases.
Sec. 1310. Administration of farm real estate acquired by the Secretary.
Sec. 1311. Farm debt restructure and conservation set-aside.
Sec. 1312. Reauthorization.
Sec. 1313. Administration of guaranteed farm loan programs; use of talents of older Americans.
Sec. 1314. Protection for purchasers of farm products.
Sec. 1315. Prohibiting coordinated financial statement.
Sec. 1316. Regulatory restraint.
Sec. 1317. Loan moratorium.
Sec. 1318. Exemption of certain property.

Division C—Research, Extension, and Teaching

TITLE XIV—NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT AMENDMENTS OF 1985

Sec. 1401. Short title.
Sec. 1402. Findings.
Sec. 1403. Definitions.
Sec. 1404. Coordination of efforts for effective transfer of new technologies.
Sec. 1405. Joint Council on Food and Agricultural Sciences.
Sec. 1406. National Agricultural Research and Extension Users Advisory Board.
Sec. 1407. Project termination.
Sec. 1408. Federal-State partnership and coordination.
Sec. 1409. Secretary's report.
Sec. 1410. Competitive, special, and facilities research grants.
Sec. 1411. Research Facilities Act.
Sec. 1412. Grants and fellowships for food and agricultural sciences education.
Sec. 1413. Study.
Sec. 1414. Human nutrition research and information management system.
Sec. 1415. Animal Health Science Research Advisory Board.
Sec. 1416. Appropriations for continuing animal heath and disease research programs.
Sec. 1417. Appropriations for research on national or regional problems.
Sec. 1418. Extension at 1890 land-grant colleges, including Tuskegee Institute.
Sec. 1419. Authority to award grants to upgrade 1890 land-grant college extension facilities.
Sec. 1420. Agricultural research at 1890 land-grant colleges, including Tuskegee Institute.
Sec. 1421. International agricultural research and extension.
Sec. 1422. International trade development centers.
Sec. 1423. Agricultural information exchange with Ireland.
Sec. 1424. Evaluation of the Extension Service and the Cooperative Extension Services.
Sec. 1425. Weather and water allocation study.
Sec. 1426. Organic farming study.
Sec. 1427. Agricultural research facilities study.
Sec. 1428. Authorization of appropriations for agricultural research programs.
Sec. 1429. Authorization of appropriations for extension education.
Sec. 1430. General authority to enter into contracts, grants, and cooperative agreements.
Sec. 1431. Restriction on treatment of indirect costs and tuition remission.
Sec. 1432. Direction of technology development.
Sec. 1433. Supplemental and alternative crops.
Sec. 1434. Aquaculture assistance programs.
Sec. 1435. Aquaculture Advisory Board.
Sec. 1436. Authorization of appropriations—aquaculture research.
Sec. 1437. Rangeland Research Advisory Board.
Sec. 1438. Authorization of appropriations—rangeland research.
Sec. 1439. Authorization of appropriations for Federal agricultural research facilities.
Sec. 1440. Agricultural research at 1890 land-grant colleges, including Tuskegee Institute.
Sec. 1441. Authority to award grants to upgrade 1890 land-grant college research facilities, including Tuskegee Institute.
Sec. 1442. Soybean Research Advisory Institute.
Sec. 1443. Smith-Lever Act.
Sec. 1444. Pesticide resistance study.

Sec. 1445. Dietary assessment and studies.
Sec. 1446. Nutrition research.
Sec. 1447. Special grants for financially stressed farmers and dislocated farmers.
Sec. 1448. Annual report on family farms.

Division D—Food Assistance Programs

TITLE XV—FOOD STAMP AND RELATED PROVISIONS

Sec. 1501. Eligibility of the homeless.
Sec. 1502. Determination of food sales volume.
Sec. 1503. Thrifty food plan.
Sec. 1504. Definitions of the disabled.
Sec. 1505. State and local taxes.
Sec. 1506. Relation of food stamps and commodity distribution programs.
Sec. 1507. Categorical eligibility.
Sec. 1508. Excluded income.
Sec. 1509. Deductions from income.
Sec. 1510. Retrospective budgeting and monthly reporting simplification.
Sec. 1511. Resources limitation.
Sec. 1512. Disaster task force.
Sec. 1513. Eligibility disqualifications.
Sec. 1514. Employment and training programs.
Sec. 1515. Staggering of coupon issuance.
Sec. 1516. Disclosure of information submitted by retail stores.
Sec. 1517. Credit unions.
Sec. 1518. Charges for redemption of coupons.
Sec. 1519. Public information.
Sec. 1520. Office hours.
Sec. 1521. Expanded food and nutrition education program.
Sec. 1522. Food stamp program information and simplified application at Social Security Administration offices.
Sec. 1523. Retail food stores and wholesale food concerns.
Sec. 1524. State agency liability, quality control, and automatic data processing.
Sec. 1525. Pilot projects.
Sec. 1526. Authorization ceiling; authority to reduce benefits.
Sec. 1527. Puerto Rico block grant.
Sec. 1528. Feasibility study.
Sec. 1529. Commodity distribution programs.

TITLE XVI—AMENDMENTS TO THE TEMPORARY EMERGENCY FOOD ASSISTANCE ACT OF 1983 AND OTHER COMMODITY DISTRIBUTION PROVISIONS

Subtitle A—Amendments to the Temporary Emergency Food Assistance Act of 1983

Sec. 1601. Emergency feeding organizations—definitions.
Sec. 1602. Repeal of provisions relating to the food security wheat reserve.
Sec. 1603. Repeal of provisions relating to processing agreements.
Sec. 1604. State cooperation.
Sec. 1605. Report of commodity displacement.
Sec. 1606. Authorization for funding and related provisions.
Sec. 1607. Reauthorization.
Sec. 1608. Program termination.
Sec. 1609. Report.

Subtitle B—Commodity Distribution Amendments

Sec. 1611. Distribution of surplus commodities; processing agreements.

TITLE XVII—NUTRITION PROGRAMS

Subtitle A—Food, Nutrition, and Consumer Education

Sec. 1701. Findings.
Sec. 1702. Purpose.
Sec. 1703. Program.
Sec. 1704. Administration.
Sec. 1705. Authorization of appropriations.

Subtitle B—Nutrition Monitoring

Sec. 1711. Survey by the Department of Agriculture.

Division E—Miscellaneous

TITLE XVIII—MISCELLANEOUS

Subtitle A—Processing, Inspection, and Labeling

Sec. 1801. Egg processing.
Sec. 1802. Inspection and other standards for imported poultry products.
Sec. 1803. Inspection and other standards for imported meat and meat food products.
Sec. 1804. Examination and report of labeling and sanitation standards for importation of agricultural commodities.

Subtitle B—Beef Promotion and Research Act of 1985

Sec. 1811. Amendment to Beef Research and Information Act.

Subtitle C—Pork Promotion, Research, and Consumer Information Act of 1985

Sec. 1821. Short title.
Sec. 1822. Findings and declaration of purpose.
Sec. 1823. Definitions.
Sec. 1824. Pork and pork products order.
Sec. 1825. Notice and hearing.
Sec. 1826. Findings and issuance of an order.
Sec. 1827. Required terms and conditions in orders.
Sec. 1828. Permissive provisions.
Sec. 1829. Requirement of referendum.
Sec. 1830. Suspension and termination of order; additional referenda.
Sec. 1831. Petition and review.
Sec. 1832. Enforcement.
Sec. 1833. Investigations; power to subpoena and take oaths and affirmations; aid of courts.
Sec. 1834. Administrative provision.
Sec. 1835. Authorization of appropriations.
Sec. 1836. Preemption.

Subtitle D—Watermelon Research and Promotion Act

Sec. 1841. Short title.
Sec. 1842. Findings and declaration of policy.
Sec. 1843. Definitions.
Sec. 1844. Issuance of plans.
Sec. 1845. Notice and hearings.
Sec. 1846. Regulations.
Sec. 1847. Required terms in plans.
Sec. 1848. Permissive terms in plans.
Sec. 1849. Assessment procedures.
Sec. 1850. Petition and review.
Sec. 1851. Enforcement.
Sec. 1852. Investigation and power to subpoena.
Sec. 1853. Requirement of referendum.
Sec. 1854. Suspension or termination of plans.
Sec. 1855. Amendment procedure.
Sec. 1856. Separability.
Sec. 1857. Authorization of appropriations.

Subtitle E—Marketing Orders

Sec. 1861. Maximum penalty for order violations.
Sec. 1862. Limitation on authority to terminate marketing orders.
Sec. 1863. Confidentiality of information.

Subtitle F—Grain Inspection

Sec. 1871. Grain standards.
Sec. 1872. Improved quality standards for exported grain.

Subtitle G—Agricultural Stabilization and Conservation Committees

Sec. 1881. ASC committee reform.

Subtitle H—Miscellaneous

Sec. 1891. Commodity Credit Corporation storage contracts.
Sec. 1892. Weather and climate information in agriculture.
Sec. 1893. Emergency feed program.
Sec. 1894. Illegal activities.
Sec. 1895. Department of Defense land.

TITLE XIX—NATIONAL AGRICULTURAL POLICY COMMISSION ACT OF 1985

Sec. 1901. Short title.
Sec. 1902. Definitions.
Sec. 1903. Establishment of Commission.
Sec. 1904. Conduct of study.
Sec. 1905. Reports.
Sec. 1906. Administration.
Sec. 1907. Authorization of appropriations.
Sec. 1908. Termination.

TITLE I—SUGAR

SUGAR PRICE SUPPORT

SECTION 1. Effective only for the 1986 through 1990 crops of sugar beets and sugarcane, section 201 of the Agricultural Act of 1949 is amended by—

(1) striking out in the first sentence "honey, and milk" and inserting in lieu thereof "honey, milk, sugar beets, and sugarcane"; and

(2) adding at the end thereof the following:

"(i) The price of each of the 1986 through 1990 crops of sugar beets and sugarcane, respectively, shall be supported in the manner specified in this subsection. Effective October 1, 1986, the Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at such level as the Secretary determines appropriate but not less than 18 cents per pound for raw cane sugar for the 1986 through 1990 crops. Effective October 1, 1986, the Secretary shall support the price of domestically grown sugar beets through nonrecourse loans at such level as the Secretary determines to be fair and reasonable in relation to the level of loans for sugarcane. Notwithstanding the foregoing provisions of this subsection, the Secretary shall consider making annual adjustments in the loan rate for each of the 1986 through 1990 crops of domestically grown sugarcane and sugar beets, based upon changes, during the period in which the two crops immediately preceding the crop for which the determination is made were produced, in such factors as inflation, costs of production as reasonably determined by the Secretary, and other circumstances that may adversely affect domestic sugar production. If the Secretary determines not to make any such adjustment in the loan rate, the Secretary's findings, decision, and supporting data shall be submitted to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate prior to any public announcement of the loan rate for the crop involved. The Secretary shall announce the loan rate to be applicable during any fiscal year as far in advance of the beginning of that fiscal year as practicable consistent with the purposes of this subsection. Loans during any fiscal year shall be made available not earlier than the beginning of the fiscal year and shall mature before the end of that fiscal year.".

Division A—Commodity Programs

TITLE II—DAIRY

SHORT TITLE

SEC. 201. This title may be cited as the "Dairy Unity Act of 1985".

Subtitle A—Milk Price Support and Producer-Supported Dairy Diversion

LEVEL OF MILK PRICE SUPPORT FOR FISCAL YEARS 1986 THROUGH 1990; REDUCTIONS IN THE PRICE OF MILK

SEC. 211. Effective October 1, 1985, section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1446(d)) is amended by—

(1) redesignating paragraphs (3), (4), (5), and (6) as paragraphs (7), (8), (9), and (10), respectively; and

(2) striking out paragraphs (1) and (2) and inserting in lieu thereof the following:

"(1) During the fiscal years 1986 through 1990, the price of milk shall be supported as provided in this subsection.

"(2)(A) On October 1 of each of such fiscal years, the Secretary shall establish the level of price support per hundredweight of milk having 3.67 per centum of milkfat, which level of price support shall be in effect throughout the fiscal year.

"(B) Such level of price support for a fiscal year shall be an amount equal to the product of (i) the preliminary support price for the fiscal year determined in accordance with paragraph (3) and (ii) the percentage determined in accordance with paragraph (4).

"(3)(A) For the fiscal year for which the level of price support is being determined, the preliminary support price per hundredweight of milk having 3.67 per centum milkfat shall be equal to the product of—

"(i) $8.83 per hundredweight; and

"(ii) the adjusted cost of production index.

"(B)(i) For purposes of subparagraph (A)(ii), the adjusted cost of production index for the fiscal year shall be equal to—

"(I) the cost of production index; less

"(II) the product of the cost of production index and the milk productivity factor.

"(ii) For purposes of subclauses (I) and (II) of clause (i), the cost of production index for the fiscal year shall be equal to the ratio of (I) the cost of production (determined in accordance with subparagraph (C)) for the one-year period ending June 30 preceding the fiscal year for which the preliminary support price is being determined to (II) the cost of production (determined in accordance with subparagraph (C)) for the three-year base period consisting of calendar years 1976, 1977, and 1978.

"(iii) For purposes of clause (i)(II), the milk productivity factor for the fiscal year shall be equal to the product of 0.2 per centum per hundredweight of milk having 3.67 per centum milkfat and the difference between—

"(I) the average quantity (measured in pounds) of milk produced annually per cow during the one-year period ending June 30 preceding the fiscal year for which the preliminary support price is being determined; and

"(II) 11,101 pounds.

"(C) For purposes of subparagraph (B)(ii), the cost of production for milk shall be determined by the Secretary in the same manner as the cost of production for milk is determined under section 808 of the Agricultural Act of 1970, except that the cost of production for purposes of such subparagraph shall be computed on the basis of the prices for the items (other than the Consumer Price Index for All Urban Consumers), and of the proportional value of each of the items, specified in the following schedule:

"Item	*Contribution to Costs of Production*
Consumer Price Index for All Urban Consumers, determined by the Bureau of Labor Statistics	*10 per centum*
Prices received by farmers for meat animals	*10 per centum*
Feed (consisting of: corn, 6.5 per centum; 16 per centum dairy concentrate, 25 per centum hay, 1.5 per centum)	*33 per centum*
Interest (consisting of: production credit association rate, 3 per centum; Federal land bank rate, 5 per centum)	*8 per centum*
Taxes	*2.5 per centum*
Fuel and energy	*4 per centum*
Milk hauling (consisting of: automobiles and trucks, 2 per centum; bulk gasoline, 0.5 per centum; diesel fuel, 0.5 per centum)	*3 per centum*
Machinery and building repair (consisting of: non-farm wage rate, 2 per centum; farm and motor supplies, 1.5 per centum; building and fencing, 0.5 per centum)	*4 per centum*
Hired labor	*7 per centum*
Farm services and cash rent	*8.5 per centum*
Seed	*1.5 per centum*
Fertilizer	*3 per centum*
Agricultural chemicals	*0.5 per centum*
Tractor and self-propelled machinery	*3 per centum*
Other farm machinery	*2 per centum*

"(4) For the fiscal year for which the level of price support is being determined, the Secretary shall estimate the level of purchases of milk and the products of milk (measured in billions of pounds milk equivalent), less sales under section 407 for unrestricted use, that the Secretary would acquire under this subsection if the level of price support were equal to the preliminary support price determined under paragraph (3) for the fiscal year. For purposes of paragraph (2)(B), the level of price support for the fiscal year shall be calculated in accordance with the following schedule:

"If the Secretary estimates that the amount of such purchases (in billions of pounds milk equivalent) for the fiscal year at such preliminary support price would be—.	*Not less than*	*Not more than*
Less than 1	*107.8*	*A percentage determined by the Secretary to be appropriate*
Not less than 1 but less than 2	*105.2*	*107.8*
Not less than 2 but less than 3	*102.6*	*105.2*
Not less than 3 but less than 4	*100.0*	*102.6*
Not less than 4 but less than 5	*97.4*	*100.0*
Not less than 5 but less than 6	*94.8*	*97.4*
Not less than 6 but less than 7	*92.2*	*94.8*
Not less than 7	*92.2*	*92.2*

then for the fiscal year the level of price support shall be equal to the following percentage of such preliminary support price:

"(5) The price of milk shall be supported through the purchase of milk and the products of milk.

"(6)(A) During any of the fiscal years 1986 through 1990 for which a milk diversion program is in effect under paragraph (7), the Secretary shall provide for a reduction (subject only to downward adjustment by the Secretary during the fiscal year) to be made in the price received by producers for all milk produced in the United States and marketed by producers for commercial use.

"(B) The amount of such reduction for a fiscal year shall be the amount per hundredweight that when multiplied by the quantity of milk so marketed is equal to the sum of—

"(i) the cost in the fiscal year, as estimated by the Secretary, of the quantity of milk and the products of milk in excess of five billion pounds (milk equivalent), less sales under section 407 for unrestricted use, required to be purchased under this subsection;

"(ii) the cost, as estimated by the Secretary, of making payments to producers who reduce marketings in the fiscal year under the milk diversion program under paragraph (7); and

"(iii) $50,000,000 in each of the fiscal years 1986 and 1987, to be deducted by the Secretary from the funds remitted under subparagraph (C) and deposited in the Dairy Research Trust Fund established by section 135 of the Dairy Production Stabilization Act of 1983.

"(C) The funds represented by the reduction in the price required under subparagraph (A) to be applied to the marketings of milk by a producer shall be collected and remitted to the Commodity Credit Corporation, at such time and in such manner as prescribed by the Secretary, by each person making payment to a producer for milk purchased from such producer, except that in the case of a producer who markets milk of the producer's own production directly to consumers, such funds shall be remitted directly to the Corporation by such producer.

"(D)(i) If the funds remitted under subparagraph (C) for any fiscal year exceed the amount of funds necessary to satisfy the requirements of subparagraph (B) for the fiscal year, the Secretary shall refund the excess funds (together with interest determined in accordance with clause (iii)), on a pro rata basis, to producers who marketed in the fiscal year milk for commercial use.

"(ii) If for any fiscal year for which a milk diversion program is in effect under paragraph (7), the level of purchases of milk or the products of milk under this subsection does not exceed 5 billion pounds (milk equivalent on a milkfat basis), less sales under section 407 for unrestricted use, the Secretary shall refund, on a pro rata basis, to producers who marketed milk in the fiscal year for commercial use an amount equal to the difference between—

"(I) the cost, as estimated by the Secretary, of purchasing 5 billion pounds (milk equivalent on a milkfat basis); and

"(II) the sum of the actual cost of purchases by the Commodity Credit Corporation under this subsection for the fiscal year, and the amount, if any, deposited in

the Dairy Research Trust Fund under subparagraph (B)(iii);

together with interest as determined in accordance with clause (iii).

"(iii) For purposes of clauses (i) and (ii), interest shall be paid at an annual rate established under section 6621 of the Internal Revenue Code of 1954 for the period beginning forty-five days after the end of the fiscal year involved and ending on a date (to be determined by the Secretary) preceding the date of the refund check by not more than thirty days, whether or not the refund check is accepted by the producer after tender of the refund check to the producer. The acceptance of a refund check shall be without prejudice to any right of the producer to claim any additional refund or interest thereon.

"(E) The funds remitted to the Corporation under this paragraph with respect to a producer, including any funds refunded under subparagraph (D) other than interest paid, shall be considered as included in the payments to the producer for purposes of the minimum price provisions of the Agricultural Adjustment Act, reenacted with amendments by the Agricultural Marketing Agreement Act of 1937.".

EXTENSION OF MILK DIVERSION PROGRAM

SEC. 212. (a) Effective October 1, 1985, paragraph (7) of section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1446(d)(3)), as redesignated by section 211(1), is amended by—

(1) amending subparagraph (A) to read as follows:

"(7)(A)(i)(I) If for any of the fiscal years 1986 through 1990 the level of purchases of milk and the products of milk under this subsection (less sales under section 407 for unrestricted use), as estimated by the Secretary and adjusted in accordance with subclause (III), will exceed five billion pounds (milk equivalent) but will not exceed seven billion pounds (milk equivalent), the Secretary may establish and carry out under this paragraph a milk diversion program for such fiscal year.

"(II) If for any of the fiscal years 1986 through 1990 the level of purchases of milk and the products of milk under this subsection (less sales under section 407 for unrestricted use), as estimated by the Secretary and adjusted in accordance with subclause (III), will exceed seven billion pounds (milk equivalent), the Secretary shall establish and carry out under this paragraph a milk diversion program for such fiscal year.

"(III) For purposes of adjusting under this clause the estimated level of purchases of milk and the products of milk for a fiscal year, the Secretary shall deduct from such level the net amount (measured in milk equivalent) of all reductions occurring during the period beginning on June 15, 1985, and ending on the first day of such fiscal year, in the quantitative limitations in effect on June 15, 1985, under section 22 of the Agricultural Adjustment Act, reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, with respect to milk and the products of milk imported into the United States. For purposes of determining the amount of such reductions, milk equivalent shall be determined on either a solids-not-fat or milkfat milk equivalent basis, whichever produces a higher milk equivalent.

"(IV) Notwithstanding any other provision of this clause, if the Secretary establishes a milk diversion program for fiscal year 1986 under this paragraph, the program so established shall be carried out for fiscal years 1986 and 1987. Any contract entered into with a producer under the reduced production program formulated under clause (iii) for fiscal years 1986 through 1987 shall require the producer to make an equal reduction in the marketings of milk by the producer in each of such fiscal years.

"(ii) Not later than August 1 preceding any fiscal year for which a milk diversion program may or shall be so established under this paragraph (or August 1, 1985, in the case of a program carried out for fiscal years 1986 and 1987 under clause (i)(IV)) the Secretary shall publish in the Federal Register—

"(I) the estimated level of purchases of milk and products of milk under this subsection (less sales under section 407 for unrestricted use) in such fiscal year if no program is carried out during the year under this paragraph (or in each of fiscal years 1986 and 1987 in the case of a program carried out for fiscal years 1986 and 1987 under clause (i)(IV)); and

"(II) if a milk diversion program is to be established under this paragraph for such fiscal year (or for fiscal years 1986 and 1987 in the case of a program carried out for fiscal years 1986 and 1987 under clause (i)(IV)), notice of the establishment of the program and a detailed description of the nature of the program.

Any milk diversion program so established shall consist of the reduced production program formulated under clause (iii) and the production termination program formulated under clause (iv). The aggregate amount of the reduction, under the milk diversion program so established, in marketings of milk in each fiscal year for which such program is in effect shall be not less than the difference between the level of purchases so estimated and 4 billion pounds (milk equivalent), unless producers decline to enter into contracts to effect such aggregate amount of reduction.

"(iii) For each of the fiscal years 1986 through 1990 for which a milk diversion program will be in effect under this paragraph, the Secretary shall formulate, not later than August 1 preceding such fiscal year, a reduced production program under which the Secretary shall offer to enter into a contract, at any time before the beginning of such fiscal year, with any producer of milk in the United States for the purpose of reducing the quantity of milk marketed by such producer for commercial use during the contract period. Such contract shall be in effect throughout such fiscal year unless such contract is terminated under subparagraph (E). Each producer of milk in the United States seeking to enter into a contract for diversion payments under this clause shall, before entering into such contract, provide the Secretary with a plan that describes the manner in which the producer intends to achieve the reduction in milk marketings that would be required under such contract, and includes an estimate by the producer of the amount of such reduction that the producer intends to achieve through increased slaughter of dairy cattle (including the approximate number of dairy cattle that will be sold for slaughter during each month of the contract). In setting the terms and conditions of such contracts, the Secretary shall take into account any adverse effect of the reductions in milk production on beef, pork, and poultry producers in the United States and shall take all feasible steps to minimize such effect.

"(iv) For each of the fiscal years 1986 through 1990 for which a milk diversion program will be in effect under this paragraph, the Secretary also shall formulate, not later than August 1 preceding such fiscal year, a production termination program under which the Secretary may offer, at the request of a producer of milk in the United States who submits to the Secretary a bid, to enter into a contract, at any time before November 1 of such fiscal year, with the producer for the purpose of terminating the production of milk by the producer in return for a payment to be made by the Secretary. In setting the terms and conditions of each contract made under this clause, the Secretary shall take into account any adverse effect of such contract, and of all contracts made under this clause, on beef, pork, and poultry producers in the United States and shall take all feasible steps to minimize such effect.

"(v) For any fiscal year for which a milk diversion program under this paragraph is in effect, the Secretary shall determine, before the beginning of such fiscal year, the total number of dairy cattle the Secretary estimates will be marketed for slaughter as a result of such program and shall by regulation specify marketing procedures to ensure that not more than 40 per centum of the number of such dairy cattle that the Secretary estimates will be marketed for slaughter by the producers participating in the program, in excess of the number of dairy cattle such producers would market for slaughter (based on the historical dairy cow herd culling rate) during such fiscal year in the absence of such program, will be so marketed in such fiscal year in the months of October, November, December, January, February, and September. Such procedures also shall ensure that such sales of dairy cattle for slaughter shall occur on a basis estimated by the Secretary that maintains historical marketing patterns. During such fiscal year, the Secretary shall limit the total number of dairy cattle marketed for slaughter under the program in excess of the historical dairy cow herd culling rate to no more than 7 per centum of the national dairy cow herd.".

(2) in subparagraph (B)—

(A) striking out "(B) Each such contract" and inserting in lieu thereof "(B)(i) Each contract made under the program formulated under subparagraph (A)(iii)";

(B) redesignating clauses (i), (ii), (iii), and (iv) as subclauses (I), (II), (III), and (IV), respectively; and

(C) in subclause (III), as so redesignated—

(i) striking out "after November 8, 1983" and all that follows through "unless such cattle are sold", and inserting in lieu thereof "during the period beginning August 1 immediately preceding the fiscal year for which such contract is in effect and ending on the last day of such fiscal year (or during the period beginning on August 1, 1985, and ending on September 30, 1987, in the case of a program carried out for fiscal years 1986 and 1987 under subparagraph (A)(i)(IV)), unless, as established by evidence satisfactory to the Secretary (including any sales contract), such cattle are sold in good faith"; and

(ii) striking out "this subsection" and inserting in lieu thereof "the program for such fiscal year";

(D) in subclause (IV), as so redesignated, striking out "this paragraph" each place it appears and inserting in lieu thereof "the contract"; and

(E) adding at the end thereof the following:

"(ii) Each contract made under this program formulated under subparagraph (A)(iv) shall provide that—

"(I) the producer shall sell for slaughter or for export all the dairy cattle in which such producer owns an interest;

"(II) during a period of three, four, or five years specified by the Secretary and beginning on the day the producer completes compliance with subclause (I), the producer shall neither acquire any interest in the production of milk nor acquire, or make available to any person, any milk production capacity of a facility that becomes available because of compliance by any producer with such subclause; and

"(III) if the producer fails to comply with such contract, the producer shall repay to the Secretary the entire payment received under the contract, including simple interest payable at a rate prescribed by the Secretary, which shall, to the extent practicable, reflect the cost to the Corporation of its borrowings from the Treasury of the United States, commencing on the date payment is first received under such contract.";

(3) striking out "this paragraph" in subparagraph (C) and inserting in lieu thereof "under the program formulated under subparagraph (A)(iii)";

(4) in subparagraph (D)—

(A) in clause (i)—

(i) inserting "under a contract made under the program formulated under subparagraph (A)(iii) for a fiscal year" after "any reduction";

(ii) inserting "in such fiscal year;" after "marketed" the first place it appears; and

(iii) striking out "the producer has entered into under this paragraph" in subclause (I);

(B) in clause (ii)—

(i) inserting "under a contract made under the program formulated under subparagraph (A)(iii) for a fiscal year" after "any reduction"; and

(ii) striking out "the producer has entered into under this paragraph" in subclause (I); and

(C) in clause (iii), striking out "as of the date of enactment of the Dairy Production Stabilization Act of 1983" and inserting in lieu thereof "throughout the fifteen-month period ending on October 1 of the fiscal year for which such contract is in effect (or ending on October 1, 1985, in the case of a program carried out under subparagraph (A)(i)(IV) for fiscal years 1986 and 1987)";

(5) in subparagraph (E)—

(A) in the first sentence—

(i) inserting "before November 1 of a fiscal year (or November 1, 1985, in the case of a program carried out for fiscal years 1986 and 1987 under subparagraph (A)(i)(IV)) and" after "The Secretary may,";

(ii) inserting "for such fiscal year (or for fiscal years 1986 and 1987 in the case of a program carried out for fiscal years 1986 and 1987 under subparagraph (A)(i)(IV))" after "this paragraph" the first place it appears;

(iii) in clause (i), striking out "there would be an excessive reduction in the level of milk production in the United States" and inserting in lieu thereof "the level of milk marketings in the United States would be reduced in excess of the aggregate amount of the reduction required by subparagraph (A)(ii)";

(iv) striking out "under this paragraph" each place it appears and inserting in lieu thereof "under the program formulated under subparagraph (A)(iii)";

(v) striking out "dairy cattle,"; and

(B) striking out "reduce" in the third sentence and inserting in lieu thereof "lessen"; and

(C) adding at the end thereof the following:

"In acting to lessen the required reduction in milk marketings among all contracts made under the program formulated under subparagraph (A)(iii), the Secretary may apportion changes in the reduction among contracts so as to give preference to any small- or medium-sized producer who requests that the producer's reduction not be lessened. A producer who enters into a contract under subparagraph (A)(iii) may terminate such contract if the Secretary modifies such contract under this subparagraph and if such producer gives written notice of such termination, and returns any payment received under such contract, to the Secretary not later than December 1 of the fiscal year for which such contract is made (or December 1, 1985, in the case of a program carried out for fiscal years 1986 and 1987 under subparagraph (A)(i)(IV)).";

(6) striking out the second sentence in subparagraph (F) and inserting in lieu thereof the following:

"The marketing history, as established by the Secretary, of such producer shall be as follows:

"(i) Except as provided in clause (ii) and clause (iii), the marketing history of the producer shall be the marketings of milk by the producer for commercial use during the one-year period ending on June 30 immediately preceding the fiscal year for which the contract is sought.

"(ii) Except as provided in clause (iii), if the producer participated in a reduced production milk diversion program under this paragraph in effect for the fiscal year preceding the fiscal year for which the marketing history of the producer is being determined, the marketing history shall be the marketing history of the producer for the diversion program for the preceding fiscal year.

"(iii) If a reduced production milk diversion program is in effect under this paragraph for fiscal years 1986 and 1987, and if the producer participated in the milk diversion program carried out under paragraph (3) of this subsection as in effect on September 30, 1985, the marketing history of the producer for each of fiscal years 1986 and 1987 shall be, at the option of the producer—

"(I) the marketings of milk by the producer for commercial use during calendar year 1982, increased by 2.2 per centum; or

"(II) the average annual marketings of milk by the producer during calendar years 1981 and 1982, increased by 2.2 per centum.";

(7) in subparagraph (G), striking out "after December 31, 1982" and inserting in lieu thereof "in the fifteen-month period ending on October 1 of the fiscal year (or October 1, 1985, in the case of a program carried out for fiscal years 1986 and 1987 under subparagraph (A)(i)(IV)) for which the producer is seeking to enter into a contract for diversion payments under this paragraph";

(8) inserting "payable under a contract made under the program formulated under subparagraph (A)(iii)" in subparagraph (I) after "diversion payments";

(9) in subparagraph (J)—

(A) in clause (i), inserting "payable under a contract made under the program formulated under subparagraph (A)(iii)" after "diversion payments" the first place it appears; and

(B) in clause (ii), striking out "under this paragraph" and inserting in lieu thereof "under the program formulated under subparagraph (A)(iii)";

(10) in subparagraph (L), striking out "under this paragraph" and inserting in lieu thereof "under the program formulated under subparagraph (A)(iii)"; and

(11) striking out "paragraph (2)" in subparagraph (N) and inserting in lieu thereof "paragraph (6)".

(b) Effective October 1, 1985, paragraph (9)(B) of section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1446(d)(5)(B)), as so redesignated by section 212(1), is amended by—

(1) striking out "paragraph (2)" and inserting in lieu thereof "paragraph (6)";

(2) striking out "paragraph (2)(B)" and inserting in lieu thereof "paragraph (6)(C)";

(3) striking out "paragraph (3)" and inserting in lieu thereof "paragraph (7)";

(4) inserting "(i)" after "(B)"; and

(5) adding at the end thereof the following:

"(ii) Each person who buys, from a producer with respect to whom there is in effect at the time of such sale a contract entered into under paragraph (7), one or more dairy cattle sold for slaughter, who knows that such cattle are sold for slaughter, and who fails to cause the slaughter of such cattle within a reasonable time after receiving such cattle shall be liable for a civil penalty of not more than $5,000 with respect to each of such cattle.".

(c) Paragraph (10) of section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1446(d)(6)), as so redesignated by section 212(1), is amended by striking out "paragraphs (2) and (3)" and inserting in lieu thereof "paragraphs (6) and (7)".

(d) Section 201(c) of the Agricultural Act of 1949 (7 U.S.C. 1446(c)) is amended by striking out "The price" and inserting in lieu thereof "Except as provided in subsection (d), the price".

(e) Section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1446(d)) is amended by adding at the end thereof the following:

"(11) The Secretary shall carry out this subsection through the Commodity Credit Corporation.".

(f) Notwithstanding section 201(d)(7) of the Agricultural Act of 1949, as added by this title, the Secretary of Agriculture—

(1) shall establish a milk diversion program, and publish the information required by such section, not later than 30 days after the date of the enactment of this Act; and

(2) shall offer to enter into contracts under such program with producers until 60 days after the date of the enactment of this Act;

if a milk diversion program is to be in effect for fiscal year 1986 and if this Act is enacted after August 1, 1985.

APPLICATION OF AMENDMENTS

SEC. 213. The amendments made by this subtitle shall not affect any liability of any person under section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) as in effect before October 1, 1985.

AVOIDANCE OF ADVERSE EFFECT OF DAIRY DIVERSION PROGRAM ON BEEF, PORK, AND LAMB PRODUCERS

SEC. 214. To minimize the adverse effect of the milk diversion program on beef, pork, and lamb producers in the United States during any fiscal year for which a milk diversion program is in effect under section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1446(d)), in such fiscal year—

(1) the Secretary of Agriculture shall use funds available for the purposes of clause (2)

of section 32 of the Act entitled "An Act to amend the Agricultural Adjustment Act, and for other purposes" (7 U.S.C. 612c), approved August 14, 1935, including the contingency funds appropriated under such section 32, and other funds available to the Secretary under the commodity distribution and other nutrition programs of the Department of Agriculture, and including funds available through the Commodity Credit Corporation, to purchase and distribute two hundred million pounds of red meat in addition to those quantities normally purchased and distributed by the Secretary;

(2) the Secretary of Defense and other Federal agencies, to the maximum extent practicable, shall use increased quantities of red meat to meet the food needs of the programs that they administer, and State agencies are encouraged to cooperate in such effort; and

(3) the Secretary of Agriculture shall encourage the consumption of red meat by the public.

STUDY RELATING TO CASEIN

SEC. 215. The Secretary of Agriculture shall conduct a study to determine whether imports of casein tend to interfere with or render ineffective the milk price support program of the Department of Agriculture. Not later than 60 days after the date of the enactment of this Act, the Secretary shall report the results of such study to the Committee on Agriculture of the House of Representatives and to the Committee on Agriculture, Nutrition, and Forestry of the Senate.

CONGRESSIONAL EVALUATION OF THE COST OF PRODUCTION SCHEDULE

SEC. 216. It is the sense of Congress that two years after the date of the enactment of this Act the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate should—

(1) determine the value of each of the items specified in the schedule established in section 201(d)(3)(C) of the Agricultural Act of 1949, and the contribution of each of such items to the cost of production referred to in such section, in order to assess the effect of each of such items on the cost of production index and the level of price support for milk determined under section 201(d) of such Act; and

(2) assess the effect of such index on the operation of the milk diversion program provided for in section 201(d)(7) of such Act.

Subtitle B—Dairy Research and Promotion

NATIONAL DAIRY RESEARCH ENDOWMENT INSTITUTE

SEC. 221. Effective October 1, 1985, the Dairy Production Stabilization Act of 1983 (7 U.S.C. 1421 note, et seq.) is amended by adding at the end thereof the following:

"Subtitle C—Dairy Research Program

"DEFINITIONS

"SEC. 130. For purposes of this subtitle—

"(1) the term 'board' means the board of trustees of the Institute;

"(2) the term 'Department' means the Department of Agriculture;

"(3) the term 'dairy products' means manufactured products that are derived from the processing of milk, and includes fluid milk products;

"(4) the term 'fluid milk products' means those milk products normally consumed in liquid form as a beverage;

"(5) the term 'Fund' means the Dairy Research Trust Fund established by section 135;

"(6) the term 'imported' means entered, or withdrawn from warehouse for consumption, in the customs territory of the United States;

"(7) the term 'importer' means a person who imports any dairy product into the United States for commercial use;

"(8) the term 'Institute' means the National Dairy Research Endowment Institute established by section 131;

"(9) the term 'milk' means any class of cow's milk marketed in the United States;

"(10) the term 'person' means any individual, group of individuals, partnership, corporation, association, cooperative, or any other entity;

"(11) the term 'producer' means any person engaged in the production of milk for commercial use;

"(12) the term 'research' means studies testing the effectiveness of market development and promotion efforts, studies relating to the nutritional value of milk and dairy products, and other related efforts to expand demand for milk and dairy products;

"(13) the term 'Secretary' means the Secretary of Agriculture unless the context specifies otherwise; and

"(14) the term 'United States' means the several States and the territories and possessions of the United States, except that for purposes of sections 131, 133(a), and 136, and paragraphs (6), (7), and (9) of this section, such term means the forty-eight contiguous States in the continental United States.

"ESTABLISHMENT OF NATIONAL DAIRY RESEARCH ENDOWMENT INSTITUTE

"SEC. 131. There is hereby established in the Department of Agriculture a National Dairy Research Endowment Institute whose function shall be to aid the dairy industry through the implementation of the dairy products research order, which its board of trustees shall administer, and the use of monies made available to its board of trustees from the Dairy Research Trust Fund to implement the order. In implementing the order, the Institute shall provide a permanent system for funding scientific research activities designed to facilitate the expansion of markets for milk and dairy products marketed in the United States. The Institute shall be headed by a board of trustees composed of the members of the National Dairy Promotion and Research Board. The board may appoint from among its members an executive committee whose membership, other than importers, shall reflect equally each of the different regions in the United States in which milk is produced. The executive committee shall have such duties and powers as are delegated to it by the board. The members of the board shall serve without compensation. While away from their homes or regular places of business in the performance of services for the board, members of the board shall be allowed reasonable travel expenses, including a per diem allowance in lieu of subsistence, as recommended by the board and approved by the Secretary, except that there shall be no duplication of payment for such expenses.

"ISSUANCE OF ORDER

"SEC. 132. (a) After the effective date of this subtitle and not later than thirty days after receipt of a proposed dairy products research order, the Secretary shall publish such proposed order in the Federal Register and shall give notice and reasonable opportunity for public comment on such proposed order. Such proposed order may be submitted by an organization certified under section 114 or by any interested person affected by the provisions of subtitle B.

"(b) After the Secretary complies with the requirements of subsection (a), the Secretary shall issue a dairy products research order. The order shall become effective not later than ninety days after publication in the Federal Register of the proposed order.

"(c) The Secretary may amend, from time to time, the dairy products research order issued under subsection (b).

"REQUIRED TERMS OF ORDER; AGREEMENTS UNDER ORDER; RECORDS

"SEC. 133. (a) The dairy products research order issued under section 132(b) shall—

"(1) provide for the establishment and administration, by the Institute, of appropriate scientific research activities designed to facilitate the expansion of markets for dairy products marketed in the United States;

"(2) specify the powers of the board, including the powers to—

"(A) receive and evaluate, or on its own initiative develop and budget for, research plans or projects designed to—

"(i) increase the knowledge of human nutritional needs and the relationship of milk and dairy products to these needs;

"(ii) improve dairy processing technologies, particularly those appropriate to small- and medium-sized family farms;

"(iii) develop new dairy products; and

"(iv) appraise the effect of such research on the marketing of dairy products;

"(B) make recommendations to the Secretary regarding such plans and projects;

"(C) administer the order in accordance with its terms and provisions;

"(D) make rules and regulations to effectuate the terms and provisions of the order;

"(E) receive, investigate, and report to the Secretary complaints of violations of the order;

"(F) recommend to the Secretary amendments to the order;

"(G) enter into agreements, with the approval of the Secretary, for the conduct of activities authorized under the order and for payment of the cost of such activities with any monies in the Fund other than monies deposited in the Fund by the Secretary;

"(H) with the approval of the Secretary, establish advisory committees composed of individuals other than members of the board, and pay the necessary and reasonable expenses and fees of the members of such committees; and

"(I) with the approval of the Secretary, appoint or employ such persons, other than members of the board, as the board deems necessary and define the duties and determine the compensation of each;

"(3) specify the duties of the board, including the duties to—

"(A) develop, and submit to the Secretary for approval before implementation, any research plan or project to be carried out under this subtitle;

"(B) submit to the Secretary for approval budgets, on a fiscal year basis, of the board's anticipated expenses and disbursements in the administration of the order, including projected costs of carrying out dairy products research plans and projects;

"(C) prepare and make public, at least annually, a report of the board's activities and an accounting for funds received and expended by the board;

"(D) maintain such books and records (which shall be available to the Secretary for inspection and audit) as the Secretary may prescribe;

"(E) prepare and submit to the Secretary, from time to time, such reports as the Secretary may prescribe; and

"(F) account for the receipt and disbursement of all funds entrusted to the board;

"(4) prohibit any monies received under this subtitle by the board to be used in any manner for the purpose of influencing governmental policy or actions, except as provided in paragraph (2)(F);

"(5) during fiscal years 1986 and 1987, require each importer to pay, in the manner prescribed by the order, an assessment to the Secretary, at a rate determined by the Secretary from time to time under subsection (d) and based on the number of hundredweights of milk having 3.67 percent milkfat contained in the quantity of dairy products imported into the United States in such fiscal years for commercial use by such importer; and

"(6) require that each person receiving milk from producers for commercial use, any person marketing milk of that person's own production directly to consumers, and each importer maintain and make available for inspection by the Secretary such books and records as may be required by the order and file with the Secretary reports at the time, in the manner, and having the content prescribed by the order.

"(b) Any agreement made under subsection (a)(2)(G) shall provide that—

"(1) the person with whom such agreement is made shall develop and submit to the board a research plan or project together with a budget that shows estimated costs to be incurred to carry out such plan or project;

"(2) such plan or project shall become effective on the approval of the Secretary; and

"(3) such person shall keep accurate records of all of its transactions, account for funds received and expended, make periodic reports to the board of activities conducted to carry out such plan or project, and submit such other reports as the Secretary or the board may require.

"(c)(1) Information, books, and records made available to, and reports filed with, the Secretary under subsection (a)(6) shall be kept confidential by all officers and employees of the Department, except that such information, books, records, and reports as the Secretary deems relevant may be disclosed by such officers and employees in any suit or administrative proceeding that is brought at the request of the Secretary or to which the Secretary or any officer of the United States is a party, and that involves the order issued under section 132(b).

"(2) Paragraph (1) shall not be construed to prohibit—

"(A) the issuance of general statements, based on such information, books, records, and reports, of the number of persons subject to the order or of statistical data collected from such persons if such statements do not specifically identify the data furnished by any one of such persons; or

"(B) the publication, at the direction of the Secretary, of the name of any person violating the order, together with a statement of the particular provisions of the order violated by the person.

"(3) No information obtained under the authority of this section may be made available to any agency, officer, or employee of the United States for any purpose other than the implementation of this subtitle and any investigatory or enforcement action necessary to implement this subtitle. Any person who violates this paragraph, on conviction, shall be subject to a fine of not more than $1,000, or to imprisonment for not more than one year, or both, and, if such person is employed by the board or the Department, shall be terminated from such employment.

"(d) The rate of the assessment per hundredweight of milk required to be paid under an order issued under section 132(b) by importers shall be equal to that part of the amount of any reduction in the price per hundredweight received by producers for milk, in effect under section 201(d)(6)(B) of the Agricultural Act of 1949, that is attributable to satisfying the requirement of clause (iii) of section 201(d)(6)(B).

"PETITION AND REVIEW; ENFORCEMENT; INVESTIGATIONS

"SEC. 134. The provisions of sections 118, 119, and 120 shall apply, except when inconsistent with this subtitle, to the Institute, the board, the persons subject to the order issued under section 132(b), the jurisdiction of district courts of the United States, and the authority of the Secretary under this subtitle in the same manner as such sections apply with respect to subtitle B.

"DAIRY RESEARCH TRUST FUND

"SEC. 135. (a) There is hereby established in the Treasury of the United States a trust fund to be known as the 'Dairy Research Trust Fund'.

"(b)(1) Monies shall be deposited in the Fund by the Secretary in accordance with section 201(d)(6)(B)(iii) of the Agricultural Act of 1949. The Secretary shall also deposit in the Fund monies received under section 133(a)(5) from importers.

"(2) If no monies are so deposited for a fiscal year in accordance with section 201(d)(6)(B)(iii), then the Secretary shall transfer from monies available to the Commodity Credit Corporation, and deposit in the Fund, $50,000,000 for such fiscal year.

"(3) Monies deposited in the Fund under paragraph (1) or (2) shall be invested by the Secretary of the Treasury in obligations of the United States or any agency thereof, in general obligations of any State or any political subdivision thereof, in any interest-bearing account or certificate of deposit of a bank that is a member of the Federal Reserve System, or in obligations fully guaranteed as to principal and interest by the United States. Interest, dividends, and other payments that accrue from such investments shall be deposited in the Fund and also shall be so invested, subject to subsection (c).

"(c) Monies in the Fund, other than monies deposited or transferred under paragraph (1) or (2) of subsection (b), shall be available to the board, in such amounts, and for such activities authorized by this subtitle, as the Secretary may approve.

"TERMINATION OF ORDER, INSTITUTE, AND FUND

"SEC. 136. (a) After September 30, 1991, the Secretary, whenever the Secretary finds that the order issued under this subtitle or any provision of such order obstructs or does not tend to facilitate the expansion of markets for milk and dairy products marketed in the United States, shall terminate or suspend the operation of the order or such provision.

"(b) If the Secretary terminates the order, the Institute shall be dissolved 180 days after the termination of the order.

"(c) If the Institute is dissolved for any reason, the monies remaining in the Fund shall be disposed of as shall be agreed to by the board and the Secretary.

"ADDITIONAL AUTHORITY

"SEC. 137. (a) No provision of this subtitle shall be construed to preempt or supersede any other program relating to milk or dairy products research organized and operated under the laws of the United States or any State.

"(b) The provisions of this subtitle applicable to the order issued under section 132(b) shall be applicable to any amendment to the order.".

DAIRY PROMOTION PROGRAM

SEC. 222. (a) Section 110(b) of the Dairy Production Stabilization Act of 1983 (7 U.S.C. 4501(b)) is amended by inserting "and dairy products imported into" after "produced in" each place it appears.

(b) Section 111 of the Dairy Production Stabilization Act of 1983 (7 U.S.C. 4502) is amended by—

(1) redesignating paragraphs (a) through (f) as paragraphs (1) through (6), respectively,

(2) redesignating paragraphs (g) through (l) as paragraphs (9) through (14), respectively; and

(3) inserting after paragraph (6), as so redesignated, the following new paragraphs:

"(7) the term 'imported' means entered, or withdrawn from warehouse for consumption, in the customs territory of the United States;

"(8) the term 'importer' means a person who imports any dairy product into the United States for commercial use;".

(c) Section 113 of the Dairy Production Stabilization Act of 1983 (7 U.S.C. 4504) is amended by—

(1) in subsection (b)—

(A) in the first sentence, striking out "thirty-six" and inserting in lieu thereof "thirty-seven";

(B) in the second sentence, striking out "Members" and inserting in lieu thereof "Except as provided in the following sentence, members";

(C) in the third sentence, striking out "such" and inserting in lieu thereof "producer"; and

(D) inserting after the second sentence the following:

"One or more members of the Board shall be importers appointed by the Secretary from nominations submitted by importers in the manner authorized by the Secretary. The number of importers to be appointed to the Board shall be determined by the Secretary on a proportional basis, taking into account the number of hundredweights of milk contained in the quantity of dairy products imported into the United States for commercial use during a representative period, except that not fewer than one importer shall be appointed to the Board.";

(2) in subsection (g)—

(A) inserting after the first sentence the following:

"The order shall also provide that each importer shall remit to the Board, in the manner prescribed by the Board, an assessment based on the number of hundredweights of milk contained in the quantity of dairy products imported into the United States for commercial use by such importer."; and

(B) in the third sentence, inserting ", in the case of dairy products other than milk," after "or"; and

(3) in the first sentence of subsection (k), striking out "farmers for commercial use" and inserting in lieu thereof "producers for commercial use, each importer".

(d) Section 116(b) of the Dairy Production Stabilization Act of 1983 (7 U.S.C. 4507(b)) is amended by—

(1) inserting "and importers" after "producers" each place it appears; and

(2) in the last sentence, inserting ", or the importation of dairy products into the United States," after "the production of milk".

(e) The amendments made by this section shall take effect on October 1, 1985.

Subtitle C—Milk Marketing Orders

MINIMUM ADJUSTMENTS TO PRICES FOR FLUID MILK UNDER MARKETING ORDERS

SEC. 231. (a) Section 8c(5)(A) of the Agricultural Adjustment Act (7 U.S.C. 608c(5)(A)), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, is amended by adding at the end the following: "Throughout the 2-year period beginning on the effective date of this sentence (and subsequent to such 2-year period unless modified by amendment to the order involved), the minimum aggregate amount of the adjustments, under clauses (1) and (2) of the preceding sentence, to prices for milk of the highest use classification under orders that are in effect under this section on the date of the enactment of the Dairy Unity Act of 1985 shall be as follows:

	Minimum Aggregate Amount of Such Adjustments Per Hundredweight of Milk Having 3.5 Per Centum Milkfat
"Marketing Area Subject to Order	
New England	*3.24*
New York-New Jersey	*3.14*

Effective at the beginning of such two-year period, the minimum prices for milk of the highest use classification shall be adjusted for the locations at which delivery of such milk is made to such handlers.".

(b) The amendment made by this section shall take effect on the first day of the first month beginning more than 120 days after the date of the enactment of this Act.

ADJUSTMENTS FOR SEASONAL PRODUCTION; HEARINGS ON AMENDMENTS; DETERMINATION OF MILK PRICES

SEC. 232. Effective October 1, 1985, section 101(b) of the Agriculture and Food Act of 1981 (7 U.S.C. 608c note) is amended by striking out "1985" and inserting in lieu thereof "1990".

COOPERATIVE ASSOCIATION REPRESENTATION

SEC. 233. Effective October 1, 1985, the second sentence of section 8c(17) of the Agricultural Adjustment Act (7 U.S.C. 608c(17)), as added by section 101 of the Agriculture and Food Act of 1981 and made effective for the period beginning January 1, 1986, and ending December 31, 1990 under section 132, is amended by striking out "not".

MARKETWIDE SERVICE PAYMENTS

SEC. 234. Effective October 1, 1985, section 8c(5) of the Agricultural Adjustment Act (7 U.S.C. 608c(5)), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, is amended by adding at the end thereof the following:

"(J) Providing for the payment, from the total sums payable by all handlers for milk (irrespective of the use classification of such milk) and before computing uniform prices under paragraph (A) and making adjustments in payments under paragraph (C), to handlers that are cooperative marketing associations described in paragraph (F) and to handlers with respect to which adjustments in payments are made under paragraph (C), for services of marketwide benefit, including but not limited to—

"(i) providing facilities to furnish additional supplies of milk needed by handlers and to handle and dispose of milk supplies in excess of quantities needed by handlers;

"(ii) handling on specific days quantities of milk that exceed the quantities needed by handlers; and

"(iii) transporting milk from one location to another for the purpose of fulfilling requirements for milk of a higher use classification or for providing a market outlet for milk of any use classification.".

STATUS OF PRODUCER HANDLERS

SEC. 235. The legal status of producer handlers of milk under the provisions of the Agricultural Adjustment Act, reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, shall be the same after the amendments made by this title take effect as it was before the effective date of such amendments.

Subtitle D—National Commission on Dairy Policy

FINDINGS AND DECLARATION OF POLICY

SEC. 241. (a) Congress finds that—

(1) the Federal program established to support the price of milk marketed by producers in the United States was created to provide price and income protection for milk producers as well as to assure consumers of an adequate supply of milk and dairy products at reasonable prices;

(2) the milk production industry in the United States is composed primarily of small- and medium-sized family farm operations;

(3) consumers in the United States benefit financially from a milk price support program that prohibits large fluctuations in the price and supply of milk and dairy products;

(4) consumers in the United States also benefit financially from the current structure of the domestic milk production industry; and

(5) the Office of Technology Assessment, in its report entitled "Technology, Public Policy, and the Changing Structure of American Agriculture", found that larger milk production operations already enjoy a major advantage in the production of milk and that, under current Federal policy, the development and use of new technologies will permit a continued trend toward fewer and larger milk production operations throughout the country.

(b) It is hereby declared to be the policy of Congress to respond to the development of new technologies in the domestic milk production industry by reviewing the present milk price support program and its alternatives, and by adopting such policies as are needed to prevent significant surplus production in the future while ensuring that the current small- and medium-sized family farm structure of such industry will be preserved for new generations of producers and consumers alike.

ESTABLISHMENT OF COMMISSION

SEC. 242. (a) There is hereby established in the executive branch a National Commission on Dairy Policy, which shall study and make recommendations concerning the future operation of the Federal program established to support the price of milk marketed by producers in the United States.

(b) The Commission shall be composed of eighteen members who are engaged in the commercial production of milk in the United States, to be appointed by the Secretary of Agriculture. Not fewer than twelve members shall be appointed from nominations submitted to the Secretary by the following Members of Congress, after consultation with the other Members of Congress who sit on the specified committee of the respective House of Congress:

(1) The Chairman of the Committee on Agriculture of the House of Representatives.

(2) The ranking minority member of the Committee on Agriculture of the House of Representatives.

(3) The Chairman of the Committee on Agriculture, Nutrition, and Forestry of the Senate.

(4) The ranking minority member of the Committee on Agriculture, Nutrition, and Forestry of the Senate.

Each such Member of Congress shall make not fewer than eighteen such nominations for appointment to the Commission, but not more than two such nominations for any particular vacancy on the Commission. The Secretary shall appoint not fewer than three individuals from among the nominations submitted by each such Member of Congress. Each member of the Commission shall represent a milk-producing region of the United States. A region may be made up of more than one State and may be represented by more than one member of the Commission. In making such appointments, the Secretary shall take into account, to the extent practicable, the geographical distribution of milk production volume throughout the United States. In determining geographical representation, whole States shall be considered as a unit.

(c) A vacancy on the Commission shall be filled in the manner in which the original appointment was made.

(d) The Commission shall elect a chairman from among the members of the Commission.

(e) The Commission shall meet at the call of the chairman or a majority of the members of the Commission.

STUDY AND RECOMMENDATIONS

SEC. 243. (a) The National Commission on Dairy Policy shall study—

(1) the current Federal price support program for milk;

(2) alternatives to such program;

(3) the future functioning of such program;

(4) new technologies that will become a part of the milk production industry before the end of this century;

(5) the effect that developing technologies will have on surplus milk production; and

(6) the future structure of the milk production industry.

In conducting such study, the Commission shall consider, among other things, how effective the current Federal price support program for milk will be in preventing significant surpluses of dairy products in the future, how well such program will respond to the challenges to the family farm structure of the milk production industry created by developing technologies, and whether or not a better response to those challenges could be achieved through modifications or revisions of current Federal policy.

(b) On the basis of its study, the Commission shall make findings and develop recommendations for consideration by the Secretary of Agriculture and Congress with respect to the future operation of the Federal price support program for milk.

(c) The Commission shall submit to the Secretary of Agriculture and Congress, not later than March 31, 1987, a report containing the results of its study and recommendations based on such results.

ADMINISTRATION

SEC. 244. (a) The heads of executive agencies, the General Accounting Office, the Office of Technology Assessment, and the Congressional Budget Office, to the extent permitted by law, shall provide to the National Commission on Dairy Policy such information as the Commission may require to carry out its duties and functions.

(b) Members of the Commission shall serve without compensation for work on the Commission. While away from their homes or regular places of business in the performance of duties of the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, as authorized by law for persons serving intermittently in the Government service under section 5703 of title 5 of the United States Code.

(c) To the extent there are sufficient funds available to the Commission in advance under section 245, and subject to such rules as may be adopted by the Commission, the Commission, without regard to the provisions of title 5 of the United States Code governing appointments in the competitive service and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to the classification and General Schedule pay rates, may—

(1) appoint and fix the compensation of a director; and

(2) appoint and fix the compensation of such additional personnel as the Commission determines necessary to assist it to carry out its duties and functions.

(d) On the request of the Commission, the heads of executive agencies, the General Accounting Office, and the Office of Technology Assessment may furnish the Commission with such personnel and support services as the head of the agency or office, and the chairman of the Commission agree are necessary to assist the Commission to carry out its duties and functions. The Commission shall not be required to pay or reimburse any agency or office for personnel and support services provided under this subsection.

(e) The Commission shall be exempt from sections 7(d), 10(e), 10(f), and 14 of the Federal Advisory Committee Act (5 U.S.C. App.).

(f) The Commission shall be exempt from the requirements of sections 4301 through 4305 of title 5 of the United States Code.

FINANCIAL SUPPORT

SEC. 245. (a) Following the appointment or designation of the members of the National Commission on Export Policy, notwithstanding the provisions of section 1342 of title 31 of the United States Code, the Secretary of Agriculture may receive on behalf of the Commission, from persons, groups, and entities within the United States, contributions of money and services to assist the Commission to carry out its duties and functions. Any money contributed under this section shall be made available to the Commission to carry out this subtitle. In no event may the Secretary accept an aggregate amount of contributions from any one person, group, or entity exceeding 10 percent of the budget of the Commission.

(b) If the contributions under subsection (a) are insufficient to carry out this subtitle, the Secretary of Agriculture may transfer to the Commission, from funds available to the Commodity Credit Corporation, an amount not to exceed $1,000,000 to carry out this subtitle.

TERMINATION OF COMMISSION

SEC. 246. The National Commission on Dairy Policy shall cease to exist thirty days following the submission of its report to the Secretary of Agriculture and Congress.

Subtitle E—Miscellaneous

TRANSFER OF DAIRY PRODUCTS TO THE MILITARY AND VETERANS HOSPITALS

SEC. 251. Subsections (a) and (b) of section 202 of the Agricultural Act of 1949 (7 U.S.C. 1446a) are each amended by striking out "1985" and inserting in lieu thereof "1990".

EXTENSION OF THE DAIRY INDEMNITY PROGRAM

SEC. 252. Section 3 of the Act entitled "An Act to provide indemnity payments to dairy farmers" (7 U.S.C. 4501), approved August 13, 1968, is amended by striking out "1985" and inserting in lieu thereof "1990".

TITLE III—WOOL AND MOHAIR

EXTENSION OF PRICE SUPPORT PROGRAM

SEC. 301. Section 703 of the National Wool Act of 1954 (7 U.S.C. 1782) is amended by—

(1) striking out "1985" in subsection (a) and inserting in lieu thereof "1990"; and

(2) striking out "1985" in subsection (b) and inserting in lieu thereof "1990".

FOREIGN PROMOTION PROGRAMS

SEC. 302. The second sentence of section 708 of the National Wool Act of 1954 (7 U.S.C. 1787) is amended by striking out "mohair or goats" and inserting in lieu thereof "wool, mohair, sheep, or goats".

TITLE IV—WHEAT

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, ACREAGE LIMITATION AND SET-ASIDE PROGRAMS, AND LAND DIVERSION FOR THE 1986 THROUGH 1990 CROPS OF WHEAT

SEC. 401. Effective only for the 1986 through 1990 crops of wheat, the Agricultural Act of 1949 is amended by inserting after section 107C (7 U.S.C. 1445b-2) the following:

"SEC. 107D. Notwithstanding any other provision of law—

"(a)(1) For any crop of wheat for which a national marketing certificate program is not in effect under title V, loans and purchases shall be made available to producers of wheat as provided in this subsection.

"(2) Unless the Secretary, at the Secretary's discretion, makes available loans to producers under paragraph (3) for a crop of wheat, the Secretary shall make available to producers on each farm loans and purchases for each of the 1986 through 1990 crops of wheat for an amount of wheat of such crop produced on the farm equal to the acreage on the farm planted to wheat for harvest times the farm's program yield for the crop. Loans and purchases under this paragraph shall be made available during each of the five marketing years for such crops of wheat, beginning with the marketing year for the 1986 crop, at such level per bushel—not less than 75 per centum nor more than 85 per centum of the simple average price per bushel received by farmers (as determined by the Secretary) during the immediately preceding five marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period—as the Secretary determines will maintain the competitive relationship of wheat to other grains in domestic and export markets after taking into consideration the cost of producing wheat, supply and demand conditions, and world prices for wheat. The level of wheat loans and purchases for a marketing year, including the marketing year for the 1986 crop of wheat, may not be established under the foregoing formula at a level that is less than 95 per centum of the level of loans and purchases for the preceding marketing year (as determined prior to any reduction in the level of loans and purchases made under the following sentence). Notwithstanding the foregoing provisions of this paragraph, if the Secretary determines (A) that the average price of wheat received by producers in the previous marketing year (including the marketing year for the 1985 crop of wheat) was not more than 105 per centum of the level of loans and purchases for wheat for such marketing year, or (B) that the loan level computed under the foregoing provisions would discourage the exportation of wheat and cause excessive stocks of wheat in the United States, the Secretary may reduce the level of loans and purchases for wheat for the marketing year by the amount the Secretary determines necessary to maintain domestic and export markets for grain, except that the level of loans and purchases shall not be so reduced in any year to a level less than 80 per centum of the level of loans and purchases as determined under the preceding sentence. The simple average price received by farmers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.

"(3)(A) The Secretary may make available recourse loans to producers during each of the five marketing years for wheat, beginning with the marketing year for the 1986 crop, at such level per bushel—not less than 75 per centum nor more than 85 per centum of the simple average price per bushel received by farmers (as determined by the Secretary) during the immediately preceding five marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period—as the Secretary determines will maintain the competitive relationship of wheat to other grains in domestic and export markets after taking into consideration the cost of producing wheat, supply and demand conditions, and world prices for wheat. The level of wheat loans and purchases for a marketing year, including the marketing year for the 1986 crop of wheat, may not be established under the

foregoing formula at a level that is less than 95 per centum of the level of loans and purchases for the preceding marketing year. The simple average price received by farmers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination. The maximum term for any loan under this paragraph shall be 270 days.

"(B) A producer may repay a loan made under subparagraph (A) at a level, per bushel, that is the lesser of—

"(i) the original loan level; or

"(ii) at any time through the maturity date of the loan that the producer redeems the wheat under loan—

"(I) the then current State monthly weighted average market price (per bushel) for wheat, as adjusted for each county in the State, received by farmers, as determined by the Secretary; or

"(II) the then current State weekly or daily weighted average market price (per bushel) for wheat, as adjusted for each county in the State, received by farmers, as determined by the Secretary, if the Secretary determines that it is administratively feasible and reduces the fluctuation in the repayment market price for producers.

"(b)(1)(A)(i) The Secretary shall make available to producers payments for each of the 1986 through 1990 crops of wheat for which a national marketing certificate program is not in effect under title V in an amount computed as provided in this paragraph. Payments for any crop of wheat shall be computed by multiplying (I) the payment rate, by (II) the farm program acreage for the crop, by (III) the farm's program yield for the crop.

"(ii) Whenever an acreage limitation program is in effect for a crop of wheat, if producers on a farm devote a portion of the farm's permitted wheat acreage (as determined under subsection (e)(2)) equal to more than 5 per centum of the farm's wheat crop acreage base for the crop to conservation uses or nonprogram crops, such portion of the wheat permitted acreage in excess of 5 per centum of the base devoted to conservation uses or nonprogram crops shall be considered as part of the farm's wheat program acreage and the producers shall be eligible for payments under this paragraph on such acreage, subject to the producers' compliance with the next sentence. To be eligible for payments under the preceding sentence, the producers on the farm must actually plant wheat for harvest on at least 50 per centum of the farm's wheat crop acreage base. The farm's wheat crop acreage base and wheat program yield shall not be reduced due to the fact that such portion of the farm's permitted acreage was devoted to conserving uses or nonprogram crops.

"(iii) Other than as provided in clause (ii), payments may not be made under this paragraph for any crop on a greater acreage than the acreage actually planted to wheat.

"(B) The payment rate for a crop of wheat shall be the amount by which the established price for the crop of wheat (less 13 cents per bushel if the Secretary establishes a wheat export certificate program for the crop under section 107F(a)) exceeds the higher of—

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under subsection (a), prior to any adjustment made under the fourth sentence in subsection (a)(2) for the marketing year for such crop of wheat.

"(C) The established price for the 1986 and 1987 crops of wheat shall be $4.38 per bushel, and for each of the 1988, 1989, and 1990 crops of wheat shall be a price determined by the Secretary that is not less than 110 per centum nor more than 125 per centum of the simple average price per bushel received by farmers (as determined by the Secretary) during the marketing years for the immediately preceding five crops, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period. The established price for a crop of wheat may not be established under the foregoing formula at a level that is less than 95 per centum of the established price for the preceding crop of wheat, nor may the Secretary set the established price for the 1988, 1989, and 1990 crop of wheat at a level less than the level for the preceding crop of wheat unless the Secretary certifies to Congress at the time the Secretary announces the program for the crop that the costs of production for such crop of wheat for all producers, as estimated by the Economic Research Service of the Department of Agriculture in consultation with the National Agricultural Cost of Production Standards Review Board, will be 5 per centum below the cost of production for the preceding crop of wheat for all producers. The simple average market price received by farmers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.

"(D)(i) Notwithstanding the foregoing provisions of this section, if the Secretary adjusts the level of loans and purchases for wheat in accordance with the fourth sentence of subsection (a)(2), the Secretary shall provide emergency compensation by increasing the established price payments for wheat by such amount as the Secretary determines necessary to provide the same total return to producers as if the adjustment in the level of loans and purchases had not been made.

"(ii) In determining the payment rate, per bushel, for established price payments for a crop of wheat under this subparagraph, the Secretary shall use the national weighted average market price, per bushel of wheat, received by farmers during the marketing year for such crop, as determined by the Secretary.

"(iii) Any payments under this subparagraph shall not be included in the payments subject to limitations under the provisions of section 1011 of the Food Security Act of 1985.

"(E) The total quantity of wheat on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2).

"(2)(A) Except as otherwise provided in subparagraph (C), if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for wheat to wheat or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to wheat for harvest (including any acreage that the producers were prevented from planting to wheat or other nonconserving crop in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm's program yield for wheat established by the Secretary for such crop times a payment rate equal to 33⅓ per centum of the established price for the crop. Payments made by the Secretary under this subparagraph may be made in the form of cash or from stocks of wheat held by the Commodity Credit Corporation.

"(B) Except as otherwise provided in subparagraph (C), if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of wheat that the producers are able to harvest on any farm is less than the result of multiplying 60 per centum of the farm's program yield for wheat established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 per centum of the established price for the crop for the deficiency in production below 60 per centum for the crop.

"(C) Producers on a farm shall not be eligible for prevented planting disaster payments under subparagraph (A) if prevented planting crop insurance is available to them under the Federal Crop Insurance Act with respect to their wheat acreage. Producers on a farm shall not be eligible for reduced yield disaster payments under subparagraph (B) if crop insurance on the growing crop is available to them under the Federal Crop Insurance Act with respect to their wheat acreage.

"(D) Notwithstanding the provisions of subparagraph (C), the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as a result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting wheat or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) crop insurance indemnity payments under the Federal Crop Insurance Act and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to ensure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(c)(1) The Secretary shall proclaim a national program acreage for each of the 1986 through 1990 crops of wheat. The proclamation shall be made not later than July 1 of each calendar year for the crop harvested in the next succeeding calendar year, except that for the 1986 crop, the proclamation shall be made as soon as practicable after the date of the enactment of the Food Security Act of 1985. The Secretary may revise the national program acreage first proclaimed for any crop for the purpose of determining the allocation factor under paragraph (2) if

the Secretary determines it necessary based on the latest information, and the Secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for wheat shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the wheat program yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be used domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of wheat are excessive or an increase in stocks is needed to ensure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of wheat. The allocation factor for wheat shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event may the allocation factor for any crop of wheat be more than 100 per centum nor less than 80 per centum.

"(C) Except as provided in subsection (e)(2), the individual farm program acreage for each crop of wheat shall be determined by multiplying the allocation factor by the acreage of wheat planted for harvest on the farms for which individual farm program acreages are required to be determined. The farm program acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage on the farm planted to wheat for harvest from the wheat crop acreage base established for the farm for the crop under title VI by at least the percentage recommended by the Secretary in the proclamation of the national program acreage. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage planted to wheat for harvest is less than the wheat crop acreage base established for the farm for the crop under title VI, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for wheat, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(d) The program yields for farms for each crop of wheat shall be determined under title VI.

"(e)(1) Notwithstanding any other provision of law—

"(A) Except as otherwise provided in subparagraph (B), the Secretary may provide for any crop of wheat, either a program under which the acreage planted to wheat would be limited as described in paragraph (2) or a set-aside program as described in paragraph (3) if the Secretary determines that the total supply of wheat, in the absence of such a program, will be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. The Secretary shall announce any wheat acreage limitation program or set-aside program under this subsection not later than July 1 prior to the calendar year in which the crop is harvested, and the Secretary may make appropriate adjustments in such announcement for the wheat acreage limitation program or the set-aside program not later than July 31 prior to the calendar year in which the crop is harvested, if the Secretary determines that there has been a significant change in the total supply of wheat since the earlier announcement. Notwithstanding the preceding sentence, the Secretary shall announce the wheat acreage limitation program for the 1986 crop under subparagraph (B) as soon as practicable after the date of the enactment of the Food Security Act of 1985.

"(B)(i) For the 1986 crop of wheat the Secretary shall provide for an acreage limitation program, as described in paragraph (2), under which the acreage on the farm planted to wheat for harvest will be limited to the wheat crop acreage base for the farm for the crop reduced by a total of 30 per centum, except that, for producers who plant the 1986 crop of wheat before the announcement by the Secretary of the wheat acreage limitation program for that crop, the Secretary shall provide for a combination of (I) an acreage limitation program, and (II) a paid diversion program, as described in paragraph (5), under which the acreage on the farm planted to wheat for harvest will be limited to the wheat crop acreage base for the farm for the crop reduced by 20 per centum under the acreage limitation program and by an additional 10 per centum under the paid diversion program.

"(ii) With respect to any of the 1987 through 1990 crops of wheat, if the Secretary estimates, not later than July 1 of the year prior to the calendar year in which the crop is harvested, that the quantity of wheat on hand in the United States on the first day of the marketing year for that crop (not including any quantity of wheat of that crop) will exceed 800,000,000 bushels, the Secretary (I) shall provide for an acreage limitation program, as described in paragraph (2), under which the acreage planted to wheat for harvest on a farm would be limited to the wheat crop acreage base for the farm for the crop reduced by not less than 20 per centum, and (II) may provide for a paid diversion program, as described in paragraph (5), or an additional acreage limitation for any desired reduction in planted acreage in excess of 20 per centum of the wheat crop acreage base for the farm.

"(iii) As a condition of eligibility for loans, purchases, and payments for any such crop of wheat, the producers on a farm must comply with the terms and conditions of the acreage limitation program and, if applicable, the paid diversion program.

"(2) If a wheat acreage limitation program is announced under paragraph (1), such limitation shall be achieved by applying a uniform percentage reduction to the wheat crop acreage base for the crop for each wheat-producing farm. Producers who knowingly produce wheat in excess of the permitted wheat acreage for the farm shall be ineligible for wheat loans, purchases, and payments with respect to that farm. Wheat crop acreage bases for each crop of wheat shall be determined under title VI. A number of acres on the farm determined by dividing (A) the product obtained by multiplying the number of acres required to be withdrawn from the production of wheat times the number of acres actually planted to wheat by (B) the number of acres authorized to be planted to wheat under the limitation established by the Secretary shall be devoted to conservation uses, in accordance with regulations issued by the Secretary. The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'. If an acreage limitation program is announced under paragraph (1) for a crop of wheat, subsection (c) shall not be applicable to such crop, including any prior announcement that may have been made under such subsection with respect to such crop. Except as otherwise provided in subsection (b)(1)(A)(ii), the individual farm program acreage shall be the acreage on the farm planted to wheat for harvest within the permitted wheat acreage for the farm as established under this paragraph.

"(3) If a set-aside program is announced under paragraph (1), as a condition of eligibility for loans, purchases, and payments for wheat authorized by this Act, the producers on a farm must set aside and devote to conservation uses an acreage of cropland equal to a specified percentage, as determined by the Secretary, of the acreage of wheat planted for harvest for the crop for which the set-aside is in effect. The set-aside acreage shall be devoted to conservation uses, in accordance with regulations issued by the Secretary. If a set-aside program is established, the Secretary may limit the acreage planted to wheat. Such limitation shall be applied on a uniform basis to all wheat-producing farms. The Secretary may make such adjustments in individual set-aside acreages under this paragraph as the Secretary determines necessary to correct for abnormal factors affecting production, and to give due consideration to tillable acreage, crop-rotation practices, types of soil, soil and water conservation measures, topography, and such other factors as the Secretary deems necessary.

"(4) The regulations issued by the Secretary under paragraphs (2) and (3) with respect to acreage required to be devoted to conservation uses shall ensure protection of such acreage from weeds and wind and water erosion. The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely. In determining the amount of land to be devoted to conservation uses under an acreage limitation or set-aside program with respect to land that has been farmed under summer fallow practices, as defined by the Secretary, the Secretary shall consider the effects of soil erosion and such other factors as the Secretary considers appropriate.

"(5)(A) The Secretary may make land diversion payments to producers of wheat, whether or not an acreage limitation or set-aside program for wheat is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of wheat to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers. The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers,

the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(B) Notwithstanding the foregoing provisions of this paragraph, the Secretary shall implement a land diversion program for the 1986 crop of wheat as provided in subsection (e)(1)(B)(i) (for producers who plant the 1986 crop of wheat before the announcement by the Secretary of the wheat acreage limitation program for that crop) under which the Secretary shall make crop retirement and conservation payments to any such producer of the 1986 crop of wheat whose acreage on the farm planted to wheat for harvest is reduced so that it does not exceed the wheat acreage base for the farm less an amount equivalent to 10 per centum of the wheat acreage base in addition to the reduction required under paragraph (2), and the producer devotes to approved conservation uses an acreage of cropland equivalent to the reduction required from the wheat acreage base under this paragraph. Payments under the preceding sentence shall be made in an amount computed by multiplying (i) the diversion payment rate by (ii) the acreage diverted under this paragraph by (iii) the farm program yield for the crop. The diversion payment rate shall be $2.00 per bushel.

"(6) Any reduced acreage, set-aside acreage, and additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may also pay an appropriate share of the cost of approved soil and water conservation practices (including practices that may be effective for a number of years) established by the producer on reduced acreage, set-aside acreage, or additional diverted acreage. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit of the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(7) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe. The Secretary, by mutual agreement with producers on the farm, may terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(8) Notwithstanding the foregoing provisions of this subsection, in carrying out the program conducted under this subsection, the Secretary may prescribe production targets for participating farms expressed in bushels of production so that all participating farms achieve the same pro rata reduction in production as prescribed by the national production targets.

"(f) If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary, nevertheless, may make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(g) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(h) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) The provision of section 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this section.

"(j) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section if an acreage limitation program is established under subsection (e)(2), but may be required if a set-aside program is established under subsection (e)(3).".

NONAPPLICABILITY OF SECTION 107 OF THE AGRICULTURAL ACT OF 1949

SEC. 402. Section 107 of the Agricultural Act of 1949 (7 U.S.C. 1445a) shall not be applicable to the 1986 through 1990 crops of wheat.

TITLE V—FEED GRAINS

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, ACREAGE LIMITATION AND SET-ASIDE PROGRAMS, AND LAND DIVERSION PAYMENTS FOR THE 1986 THROUGH 1990 CROPS OF FEED GRAINS

SEC. 501. Effective only for the 1986 through 1990 crops of feed grains, the Agricultural Act of 1949 is amended by adding after section 105B (7 U.S.C. 1444d) the following:

"SEC. 105C. Notwithstanding any other provision of law—

"(a)(1) For any crop of feed grains for which a national marketing certificate program is not in effect under title V, loans and purchases shall be made available to producers as provided in this subsection.

"(2)(A) Unless the Secretary, at the Secretary's discretion, makes available loans to producers under paragraph (3) for a crop of corn, the Secretary shall make available to producers on each farm loans and purchases for each of the 1986 through 1990 crops of corn for an amount of corn of such crop produced on the farm equal to the acreage on the farm planted to corn for harvest times the farm's program yield for the crop. Loans and purchases under this paragraph shall be made available during each of the five marketing years for such crops of corn, beginning with the marketing year for the 1986 crop, at such level per bushel—not less than 75 per centum nor more than 85 per centum of the simple average price per bushel received by farmers (as determined by the Secretary) during the immediately preceding five marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period—as the Secretary determines will encourage the exportation of feed grains and not result in excessive stocks of feed grains after taking into consideration the cost of producing corn, supply and demand conditions, and world prices for corn, except that the level of corn loans and purchases for a marketing year, including the marketing year for the 1986 crop of corn, may not be established under the foregoing formula at a level that is less than 95 per centum of the level of loans and purchases for the preceding marketing year (as determined before any reduction in the level of loans and purchases made under the following sentence). Notwithstanding the foregoing provisions of this subparagraph, if the Secretary determines (i) that the average price of corn received by producers in the previous marketing year (including the marketing year for the 1985 crop of corn) was not more than 105 per centum of the level of loans and purchases for corn for such marketing year, or (ii) that the loan level computed under the foregoing provisions would discourage the exportation of corn and cause excessive stocks of corn in the United States, the Secretary may reduce the level of loans and purchases for corn for the marketing year by the amount the Secretary determines necessary to maintain domestic and export markets for grain, except that the level of loans and purchases shall not be so reduced in any year to a level less than 80 per centum of the level of loans and purchases as determined under the preceding sentence. The simple average price received by farmers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.

"(B) Unless the Secretary, at the Secretary's discretion, makes available loans to producers under paragraph (3) for a crop of grain sorghums, barley, oats, or rye, the Secretary shall make available to producers under this paragraph loans and purchases for each of the 1986 through 1989 crops of grain sorghums, barley, oats, and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn under this paragraph, taking into consideration the feeding value of such commodity in relation to corn and other factors specified in section 401(b) of this Act.

"(3)(A) The Secretary may make available recourse loans to producers during each of the five marketing years for corn, beginning with the marketing year for the 1986 crop, at such level per bushel—not less than 75 per centum nor more than 85 per centum of the simple average price per bushel received by farmers (as determined by the Secretary) during the immediately preceding five marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period—as the Secretary determines will encourage the exportation of feed grains and not result in excessive stocks of feed grains after taking into consideration the cost of producing corn, supply and demand conditions, and world prices for corn. The level of corn loans and purchases for a marketing year, including the marketing year for the 1986 crop of corn, may not be established under the foregoing formula at a level that is less than 95 per centum of the level of loans and purchases for the preceding marketing year. The simple average price received by farmers for the immediately pre-

ceding marketing year shall be based on the latest information available to the Secretary at the time of the determination. The maximum term for any loan under this paragraph shall be 270 days.

"(B) The Secretary may make available to producers under this paragraph recourse loans for each of the 1986 through 1990 crops of grain sorghums, barley, oats, and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that recourse loans are made available under this paragraph for corn, taking into consideration the feeding value of such commodity in relation to corn and other factors specified in section 401(b) of this Act.

"(D) A producer may repay a loan made under subparagraph (A) or (B) at a level (per bushel) that is the lesser of—

"(i) the original loan level; or

"(ii) at any time through the date of maturity of the loan that the producer redeems the feed grain under loan—

"(I) the then current State monthly weighted average market price (per bushel) for the feed grain, as adjusted for each county in the State, received by farmers, as determined by the Secretary; or

"(II) the then current State weekly or daily weighted average market price (per bushel) for the feed grain, as adjusted for each county in the State, received by farmers, as determined by the Secretary, if the Secretary determines that it is administratively feasible and reduces the fluctuation in the repayment market price for producers.

"(b)(1)(A)(i) The Secretary shall make available to producers payments for each of the 1986 through 1990 crops of corn, grain sorghums, oats, and, if designated by the Secretary, barley for which a national marketing certificate program is not in effect under title V in an amount computed as provided in this paragraph. Payments for any crop of feed grains shall be computed by multiplying (I) the payment rate, by (II) the farm program acreage for the crop, by (III) the farm's program yield for the crop.

"(ii) Whenever an acreage limitation program is in effect for a crop of feed grains, if producers on a farm devote a portion of the farm's permitted feed grain acreage (as determined under subsection (e)(2)) equal to more than 5 per centum of the farm's feed grain crop acreage base for the crop to conservation uses or nonprogram crops, such portion of the feed grain permitted acreage in excess of 5 per centum of the base devoted to conservation uses or nonprogram crops shall be considered as part of the farm's feed grain program acreage and the producers shall be eligible for payments under this paragraph on such acreage, subject to the producers' compliance with the next sentence. To be eligible for payments under the preceding sentence, the producers on the farm must actually plant feed grains for harvest on at least 50 per centum of the farm's feed grain crop acreage base. The farm's feed grain crop acreage base and feed grain program yield shall not be reduced due to the fact that such portion of the farm's permitted acreage was devoted to conserving uses or nonprogram crops.

"(iii) Other than as provided in clause (ii), payments may not be made under this paragraph for any crop on a greater acreage than the acreage actually planted to feed grains.

"(B) The payment rate for a crop of corn shall be the amount by which the established price for the crop of corn (less 6 cents per bushel if the Secretary establishes a feed grain export certificate program for the crop under section 107F(a)) exceeds the higher of—

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under subsection (a), before any adjustment made under the third sentence in subsection (a)(2)(A) for the marketing year for such crop of corn.

"(C) The established price for the 1986 and 1987 crops of corn shall be $3.03 per bushel, and for each of the 1988, 1989, and 1990 crops of corn shall be a price determined by the Secretary that is not less than 110 per centum nor more than 125 per centum of the simple average price per bushel received by farmers (as determined by the Secretary) during the marketing years for the immediately preceding five crops, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period. The established price for a crop of corn may not be established under the foregoing formula at a level that is less than 95 per centum of the established price for the preceding crop of corn, nor may the Secretary set the established price for the 1988, 1989, or 1990 crop of corn at a level less than the level for the preceding crop of corn unless the Secretary certifies to Congress at the time the Secretary announces the program for the crop that the costs of production for such crop of corn for all producers, as estimated by the Economic Research Service of the Department of Agriculture in consultation with the National Agricultural Cost of Production Standards Review Board, will be 5 per centum below the cost of production for the previous crop of corn for all producers. The simple average price received by farmers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.

"(D)(i) Notwithstanding the foregoing provisions of this section, if the Secretary adjusts the level of loans and purchases for corn in accordance with the third sentence in subsection (a)(2)(A), the Secretary shall provide emergency compensation by increasing the established price payments for corn by such amount as the Secretary determines necessary to provide the same total return to producers as if the adjustment in the level of loans and purchases had not been made.

"(ii) In determining the payment rate, per bushel, for established price payments for a crop of corn under this subparagraph, the Secretary shall use the national weighted average market price, per bushel of corn, received by farmers during the marketing year for such crop, as determined by the Secretary.

"(iii) Any payments under this subparagraph shall not be included in the payments subject to limitations under the provisions of section 1011 of the Food Security Act of 1985.

"(E) The payment rate for grain sorghums, oats, and, if designated by the Secretary, barley shall be such rate as the Secretary determines fair and reasonable in relation to the rate at which payments are made available for corn.

"(F) The total quantity of feed grains on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2).

"(2)(A) Except as otherwise provided in subparagraph (C), if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for feed grains to feed grains or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to feed grains for harvest (including any acreage that the producers were prevented from planting to feed grains or other nonconserving crop in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm's program yield for feed grains established by the Secretary for such crop times a payment rate equal to 33⅓ per centum of the established price for the crop. Payments made by the Secretary under this subparagraph may be made in the form of cash or from stocks of feed grains held by the Commodity Credit Corporation.

"(B) Except as otherwise provided in subparagraph (C), if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of feed grains that the producers are able to harvest on any farm is less than the result of multiplying 60 per centum of the farm's program yield for feed grains established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 per centum of the established price for the crop for the deficiency in production below 60 per centum for the crop.

"(C) Producers on a farm shall not be eligible for prevented planting disaster payments under subparagraph (A) if prevented planting crop insurance is available to them under the Federal Crop Insurance Act with respect to their feed grain acreage. Producers on a farm shall not be eligible for reduced yield disaster payments under subparagraph (B) if crop insurance on the growing crop is available to them under the Federal Crop Insurance Act with respect to their feed grain acreage.

"(D) Notwithstanding the provisions of subparagraph (C), the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting feed grains or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) crop insurance indemnity payments under the Federal Crop Insurance Act and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available

under this subparagraph with respect to individual farms so as to ensure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(c)(1) The Secretary shall proclaim a national program acreage for each of the 1986 through 1990 crops of feed grains. The proclamation shall be made not later than September 30 of each calendar year for the crop harvested in the next succeeding calendar year, except that for the 1986 crop the proclamation shall be made as soon as practicable after the date of the enactment of the Food Security Act of 1985. The Secretary may revise the national program acreage first proclaimed for any crop for the purpose of determining the allocation factor under paragraph (2) if the Secretary determines it necessary based on the latest information, and the Secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for feed grains shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the feed grain program yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be used domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of feed grains are excessive or an increase in stocks is needed to ensure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of feed grains. The allocation factor for feed grains shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event may the allocation factor for any crop of feed grains be more than 100 per centum nor less than 80 per centum.

"(3) Except as provided in subsection (e)(2), the individual farm program acreage for each crop of feed grains shall be determined by multiplying the allocation factor by the acreage of feed grains planted for harvest on the farms for which individual farm program acreages are required to be determined. The farm program acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage on the farm planted to feed grains for harvest from the feed grain crop acreage base established for the farm for the crop under title VI by at least the percentage recommended by the Secretary in the proclamation of the national program acreage. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage planted to feed grains for harvest is less than the feed grain crop acreage base established for the farm for the crop under title VI, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for feed grains, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(d) The program yields for farms for each crop of feed grains shall be determined under title VI.

"(e)(1) Notwithstanding any other provision of law—

"(A) Except as otherwise provided in subparagraph (B), the Secretary may provide for any crop of feed grains either a program under which the acreage planted to feed grains would be limited as described in paragraph (2) or a set-aside program as described in paragraph (3) if the Secretary determines that the total supply of feed grains, in the absence of such a program, will be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. The Secretary shall announce any feed grain acreage limitation program or set-aside program under this subsection not later than September 30 prior to the calendar year in which the crop is harvested, and the Secretary may make appropriate adjustments in such announcement for the feed grain acreage limitation program or the set-aside program not later than October 30 before the calendar year in which the crop is harvested, if the Secretary determines that there has been a significant change in the total supply of feed grains since the earlier announcement. Notwithstanding the preceding sentence, the Secretary shall announce the feed grain acreage limitation program for the 1986 crop under subparagraph (B) as soon as practicable after the date of the enactment of the Food Security Act of 1985.

"(B)(i) For the 1986 crop of feed grains, the Secretary shall provide for an acreage limitation program, as described in paragraph (2), under which the acreage on the farm planted to feed grains for harvest will be limited to the feed grain acreage base for the farm for the crop reduced by a total of 20 per centum, except that, for producers who plant the 1986 crop of feed grains before the announcement by the Secretary of the feed grain acreage limitation program for that crop, the Secretary shall provide for a combination of (I) an acreage limitation program, and (II) a paid diversion program, as described in paragraph (5), under which the acreage on the farm planted to feed grains for harvest will be limited to the feed grain crop acreage base for the farm for the crop reduced by 10 per centum under the acreage limitation program and by an additional 10 per centum under the paid diversion program.

"(ii) With respect to any of the 1987 through 1990 crops of feed grains, if the Secretary estimates, not later than September 30 of the year prior to the calendar year in which the crop is harvested, that the quantity of feed grains on hand in the United States on the first day of the marketing year for that crop (not including any quantity of feed grains of that crop) will exceed 1,100,000,000 bushels, the Secretary (I) shall provide for an acreage limitation program, as described in paragraph (2), under which the acreage planted to feed grains for harvest on a farm would be limited to the feed grain crop acreage base for the farm for the crop reduced by not less than 10 per centum, and (II) may provide for a paid diversion program, as described in paragraph (5), or an additional acreage limitation for any desired reduction in planted acreage in excess of 10 per centum of the feed grain crop acreage base for the farm.

"(iii) As a condition of eligibility for loans, purchases, and payments for any such crop of feed grains, the producers on a farm must comply with the terms and conditions of the acreage limitation program and, if applicable, the paid diversion program.

"(2) If the feed grain acreage limitation program is announced under paragraph (1), such limitation shall be achieved by applying a uniform percentage reduction to the feed grain crop acreage base for the crop for each feed grain-producing farm. Producers who knowingly produce feed grains in excess of the permitted feed grain acreage for the farm shall be ineligible for feed grain loans, purchases, and payments with respect to that farm. The Secretary may provide that no producer of malting barley shall be required as a condition of eligibility for feed grain loans, purchases, and payments to comply with any acreage limitation under this paragraph if such producer has previously produced a malting variety of barley for harvest, plants barley only of an acceptable malting variety for harvest, and meets such other conditions as the Secretary may prescribe. Feed grain acreage bases for each crop of feed grains shall be determined under title VI. A number of acres on the farm determined by dividing (A) the product obtained by multiplying the number of acres required to be withdrawn from the production of feed grains times the number of acres actually planted to feed grains by (B) the number of acres authorized to be planted to feed grains under the limitation established by the Secretary shall be devoted to conservation uses, in accordance with regulations issued by the Secretary. The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'. If an acreage limitation program is announced under paragraph (1) for a crop of feed grains, subsection (c) shall not be applicable to such crop, including any prior announcement that may have been made under such subsection with respect to such crop. Except as otherwise provided in subsection (b)(1)(A)(ii), the individual farm program acreage shall be the acreage on the farm planted to feed grains for harvest within the permitted feed grain acreage for the farm as established under this paragraph.

"(3) If a set-aside program is announced under paragraph (1), then as a condition of eligibility for loans, purchases, and payments authorized by this section, the producers on a farm must set aside and devote to conservation uses an acreage of cropland equal to a specified percentage, as determined by the Secretary, of the acreage of feed grains planted for harvest for the crop for which the set-aside is in effect. The set-aside acreage shall be devoted to conservation uses, in accordance with regulations issued by the Secretary. If a set-aside program is established, the Secretary may limit the acreage planted to feed grains. Such limitation shall be applied on a uniform basis to all feed grain-producing farms. The Secretary may make such adjustments in individual set-aside acreages under this paragraph as the Secretary determines necessary to correct for abnormal factors affecting production, and to give due consideration to tillable acreage, crop-rotation practices, types of soil, soil and water conservation measures, topography, and such other factors as the Secretary deems necessary.

"(4) The regulations issued by the Secretary under paragraphs (2) and (3) with respect to acreage required to be devoted to conservation uses shall ensure protection of such acreage from weeds and wind and water erosion. The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if

the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(5) The Secretary may make land diversion payments to producers of feed grains, whether or not an acreage limitation or set-aside program for feed grains is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of feed grains to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into the Secretary with such producers. The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(6) Any reduced acreage, set-aside acreage, and additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may also pay an appropriate share of the cost of approved soil and water conservation practices (including practices that may be effective for a number of years) established by the producer on reduced acreage, set-aside acreage, or additional diverted acreage. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(7) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe. The Secretary, by mutual agreement with producers on the farm, may terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(8) In carrying out the program conducted under this subsection, the Secretary may prescribe production targets for participating farms expressed in bushels of production so that all participating farms achieve the same pro rata reduction in production as prescribed by the national production targets.

"(f) If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary, nevertheless, may make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(g) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(h) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this section.

"(j) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section if an acreage limitation program is established under subsection (e)(2), but may be required if a set-aside program is established under subsection (e)(3).".

NONAPPLICABILITY OF SECTION 105 OF THE AGRICULTURAL ACT OF 1949

SEC. 502. Section 105 of the Agricultural Act of 1949 (7 U.S.C. 1444b) shall not be applicable to the 1986 through 1989 crops of feed grains.

TITLE VA—PRODUCER-APPROVED WHEAT AND FEED GRAIN PROGRAMS

REFERENDA AND PRODUCTION ACREAGES, MARKETING CERTIFICATES, AND MINIMUM LOAN RATES FOR THE 1986 THROUGH 1990 CROPS OF WHEAT AND FEED GRAINS

SEC. 551. Effective only for the 1986 through 1990 crops, the Agricultural Act of 1949 (7 U.S.C. 1461 et seq.) is amended by adding at the end thereof a new title V as follows:

"TITLE V—REFERENDA AND PRODUCTION ACREAGES, MARKETING CERTIFICATES, AND MINIMUM LOAN RATES FOR THE 1986 THROUGH 1990 CROPS OF WHEAT AND FEED GRAINS

"FINDINGS AND POLICY

"SEC. 501. (a) Congress finds that—

"(1) wheat and feed grains are essential agricultural commodities for the Nation, are produced throughout the United States by hundreds of thousands of farmers, and along with their products flow in substantial amounts through instrumentalities of interstate and foreign commerce from producers to consumers;

"(2) abnormally excessive and abnormally deficient supplies of wheat and feed grains on the country-wide market acutely and directly affect, burden, and obstruct interstate and foreign commerce; and

"(3) interstate and foreign commerce in wheat and feed grains, and their products, should be protected from burdensome surpluses and disruptive shortages, a supply of the commodities should be maintained to meet domestic consumption needs and export demand, and soil and water resources of the Nation should not be squandered in the production of surplus burdensome supplies of the commodities.

"(b) It hereby is declared to be the policy of Congress that it is in the interest of the general welfare to assist in the marketing of wheat and feed grains for domestic consumption and export; to regulate interstate and foreign commerce in the commodities to the extent necessary to provide an orderly, adequate, and balanced flow of the commodities in interstate and foreign commerce; and to provide loans and other means to maintain farm income for producers of the commodities, reduce excess production, and enable consumers to obtain an adequate and steady supply of such commodities at fair prices.

"CONSUMER SAFEGUARDS

"SEC. 502. The powers conferred under this title shall not be used to discourage the production of supplies of food and animal feed sufficient to meet normal domestic and export needs, as determined by the Secretary. In carrying out the purposes of this title, the Secretary shall give due regard to the maintenance of a continuous and stable supply of agricultural commodities from domestic production adequate to meet consumer demand at prices fair both to producers and consumers.

"WHEAT AND FEED GRAIN REFERENDA

"SEC. 503. (a) The Secretary shall conduct a referendum by secret ballot of wheat and feed grain producers every two years to determine whether they favor or oppose the national marketing certificate program under this title. In the case of the 1986 and 1987 crops, the referendum shall be conducted as soon as practicable after enactment of the Food Security Act of 1985, but not later than February 1, 1986. For the 1988 and 1989 crops, the referendum shall be conducted not later than July 1, 1987, and for the 1990 crop, year not later than July 1, 1989.

"(b) Any producer on a farm with a wheat or feed grain crop acreage base of fifteen or more acres for the then current crop, as determined under title VI, shall be eligible to vote in a referendum. For the purposes of this section, the term 'producer' shall include any person who is entitled to share in a crop of the commodity, or the proceeds thereof, because the person shares in the risks of production of the crop as an owner, landlord, tenant, or sharecropper. A landlord whose return from the crop is fixed regardless of the amount of the crop produced shall not be considered a producer.

"(c) The Secretary shall proclaim the results of any referendum held hereunder within fifteen days after the date of such referendum, and if the Secretary determines that 60 per centum or more of the producers of wheat and feed grains (including 50 per centum or more of the producers of wheat and 50 per centum or more of the producers of feed grains) voting in the referendum in favor of the implementation of a national marketing certificate program, the Secretary shall proclaim that a national marketing certificate program will be in effect for the crops of wheat and feed grains produced for harvest in—

"(1) with respect to the referendum held not later than February 1, 1986, the 1986 and 1987 crops of wheat and feed grains;

"(2) with respect to the referendum held not later than July 1, 1987, the 1988 and 1989 crops of wheat and feed grains; and

"(3) with respect to the referendum held not later than July 1, 1989, the 1990 crops of wheat and feed grains.

"(d) In the event that a national marketing certificate program is approved for the 1986 crops of wheat and feed grains, the Secretary shall provide fair and equitable compensation to producers who planted a crop in excess of their farm program acreage prior to the proclamation by the Secretary that marketing certificates will be in effect with respect to that crop. Such compensation shall cover, at a minimum, the costs incurred by the producer for planting such crop, as determined by the Secretary.

"(e) If marketing certificates are not approved by producers in a referendum conducted under this section with respect to any crop of wheat or feed grains, in lieu of a national marketing certificate program for that crop, the Secretary shall provide such loans, purchases, payments, and other assistance to producers of wheat and feed grains as provided for elsewhere in this Act.

"NATIONAL MARKETING CERTIFICATE PROGRAM—WHEAT

"SEC. 504. (a) Notwithstanding any other provision of law, if a national marketing certificate program for a crop of wheat is approved under section 503, the Secretary shall make available to producers on each farm loans and purchases for such crop of wheat for an amount of wheat produced on the farm equal to the acreage on the farm that may be planted to wheat for harvest, as determined under subsection (c) or (e) of section 107D, times the farm program yield for the crop, as determined under title VI. Loans and purchases shall be made available during the marketing year for any such crop of wheat at such level as the Secretary determines will maintain the competitive relationship of wheat to other grains in domestic and export markets after taking into consideration the cost of producing wheat, supply and demand conditions, and world prices for wheat, except that the level of wheat loans and purchases for any such marketing year may not be established at less than $4.50 per bushel of wheat.

"(b)(1) The Secretary shall make available to producers marketing certificates for any of the 1986 through 1990 crops of wheat for which a national marketing certificate program is in effect. The amount of such marketing certificates made available to the producers on a farm shall equal an amount of wheat produced on the farm equal to the acreage on the farm that may be planted to wheat for harvest as determined under subsection (c) or (e) of section 107D, times the farm program payment yield for the crop, as determined under title VI.

"(2) A marketing certificate applicable to a marketing year issued to a producer of wheat shall authorize such producer to market, barter, or donate, without restriction, during such marketing year an amount of wheat equal to the amount of such marketing certificate. Wheat may not be marketed, bartered, or donated domestically without a marketing certificate, except that wheat not accompanied by a marketing certificate may be used for feed, human consumption, or other purposes on the farm of the producer, or may be sold for export.

"(3) Wheat accompanied by a marketing certificate that is sold for export shall be eligible for an export incentive payment on such wheat, as provided in section 1125 of the Food Security Act of 1985.

"(4) If for any crop, wheat that the producer harvests exceeds the amount of the commodity that may be marketed, bartered, or donated under a marketing certificate, the excess may be carried over by the producer from one marketing year to the succeeding marketing year and marketed under a certificate in the succeeding marketing year to the extent that (A) the total amount of such wheat available for marketing under a certificate from the farm in the marketing year from which such commodity is carried over does not exceed the amount of the marketing certificate made available to the producers for that crop, and (B) the total amount of wheat available for marketing under a certificate in the succeeding marketing year (that is, the sum of the amount of such wheat carried over and the amount of such wheat produced on the farm eligible for marketing certificates in the succeeding year) does not exceed the amount of marketing certificates made available to the producers for the succeeding marketing year.

"(5) Marketing certificates made available to a producer of wheat shall not be transferable, except to the extent that such certificates accompany wheat that is marketed, bartered, or donated under paragraph (2).

"(6) Wheat harvested in a calendar year in which marketing certificates are made available to producers for the marketing year beginning therein may not be marketed, except as provided in paragraph (2), prior to the date on which such marketing year begins.

"(7) A person may not purchase or otherwise acquire an amount of wheat from a producer in excess of the amount of wheat that may be marketed, bartered, or donated by such producer under a marketing certificate, except that wheat that must be exported may be acquired as provided under paragraph (2).

"(8) If marketing certificates for wheat are not made available to producers for any marketing year, all previous marketing certificates applicable to wheat shall be terminated, effective as of the first day of such marketing year.

"PENALTIES WITH RESPECT TO WHEAT

"SEC. 505. (a)(1) Except as provided in subsection (b), if a producer fails to comply with any term or condition of a wheat program conducted under this title, the producer shall be ineligible for any loan, purchase, or payment under this Act for the crop of wheat involved.

"(2) Except as provided in subsection (c), if anyone markets, barters, or donates wheat other than for export without a marketing certificate required under section 504 or markets, barters, or donates an amount of wheat for use in excess of the amount of wheat the person or entity is permitted to market, barter, or donate under such certificate, the Secretary shall—

"(A) assess a civil penalty against such person or entity in an amount equal to three times the current minimum loan rate for the wheat so marketed, bartered, or donated, or

"(B) with respect to a producer, decrease the number of acres of the farm's wheat crop acreage base such producer may devote to production for the succeeding crop of wheat by a number of acres that, if planted, would result in the production of a quantity sufficient to satisfy the penalty referred to in subparagraph (A).

"(3) If a person knowingly purchases or otherwise acquires an amount of wheat in excess of the amount of wheat that may be marketed, bartered, or donated under a marketing certificate issued under this title, the Secretary shall assess a civil penalty against such person in an amount equal to three times the current minimum loan rate for the wheat so purchased or acquired.

"(b) If a producer fails to comply fully with the terms and conditions of a wheat program conducted under this title and the Secretary believes the failure should not preclude the making of loans, purchases, or payments to the producer, the Secretary may make loans, purchases, or payments in such amounts as the Secretary determines to be equitable in relation to the severity of the program violation.

"(c) If the Secretary determines that the penalties provided for in subsection (a) are not warranted by the severity of the program violation, the Secretary may reduce or waive such penalties.

"(d) Penalties collected under this section shall be deposited into the account of the Commodity Credit Corporation.

"NATIONAL MARKETING CERTIFICATE PROGRAM—FEED GRAINS

"SEC. 506. (a) Notwithstanding any other provision of law, if a national marketing certificate program for a crop of feed grains is approved under section 503, the Secretary shall make available to producers on each farm loans and purchases for such crop of feed grains for an amount of feed grains produced on the farm equal to the acreage on the farm that may be planted to feed grains for harvest, as determined under subsection (c) or (e) of section 105C times the farm program yield for the crop, as determined under title VI. Loans and purchases shall be made available during the marketing year for any such crop of feed grains at such level as the Secretary determines will maintain the competitive relationship of feed grains to other grains in domestic and export markets after taking into consideration the cost of producing feed grains, supply and demand conditions, and world prices for feed grains, except that the level of feed grain loans and purchases for the 1986 through 1990 marketing years may not be established at less than $3.25 per bushel of corn.

"(b)(1) The Secretary shall make available to producers marketing certificates for any of the 1986 through 1990 crops of feed grains for which a national marketing certificate program is in effect. The amount of such marketing certificates made available to the producers on a farm shall equal an amount of feed grains produced on the farm equal to the acreage on the farm that may be planted to feed grains for harvest, as determined under subsection (c) or (e) of section 105C, times the farm program yield for the crop, as determined under title VI.

"(2) A marketing certificate applicable to a marketing year issued to a producer of feed grains shall authorize such producer to market, barter, or donate, without restriction, during such marketing year an amount of such feed grains equal to the amount of such marketing certificate. Feed grains may not be marketed, bartered, or donated domestically without a marketing certificate, except that feed grains not accompanied by a marketing certificate may be used for feed, human consumption, or other purposes on the farm of the producer, or may be sold for export.

"(3) Feed grains accompanied by a marketing certificate that is sold for export shall be eligible for an export incentive payment on such feed grains, as provided in section 1125 of the Food Security Act of 1985.

"(4) If for any crop, feed grains that the producer harvests exceed the amount of the commodity that may be marketed, bartered, or donated under a marketing certificate, the excess may be carried over by the producer from one marketing year to the succeeding marketing year and marketed under

a certificate in the succeeding marketing year to the extent that (A) the total amount of such feed grains available for marketing under a certificate from the farm in the marketing year from which such commodity is carried over does not exceed the amount of the marketing certificate made available to the producers for that crop, and (B) the total amount of feed grains available for marketing under a certificate in the succeeding marketing year (that is, the sum of the amount of such feed grains carried over and the amount of such feed grains produced on the farm eligible for marketing certificates in the succeeding year) does not exceed the amount of marketing certificates made available to the producers for the succeeding marketing year.

"(5) Marketing certificates made available to a producer of feed grains shall not be transferable, except to the extent that such certificates accompany feed grains that are marketed, bartered, or donated under paragraph (2).

"(6) Feed grains harvested in a calendar year in which marketing certificates are made available to producers for the marketing year beginning therein may not be marketed, except as provided in paragraph (2), prior to the date on which such marketing year begins.

"(7) A person may not purchase or otherwise acquire an amount of feed grains from a producer in excess of the amount of feed grains that may be marketed, bartered, or donated by such producer under a marketing certificate, except that feed grains that must be exported may be acquired as provided under paragraph (2).

"(8) If marketing certificates for feed grains are not made available to producers for any marketing year, all previous marketing certificates applicable to feed grains shall be terminated, effective as of the first day of such marketing year.

"PENALTIES WITH RESPECT TO FEED GRAINS

"SEC. 507. (a)(1) Except as provided in subsection (b), if a producer fails to comply with any term or condition of a feed grain program conducted under this title, the producer shall be ineligible for any loan, purchase, or payment under this Act for the crop of feed grains involved.

"(2) Except as provided in subsection (c), if anyone markets, barters, or donates feed grains other than for export without a marketing certificate required under section 506 or markets, barters, or donates an amount of feed grains for use in excess of the amount of the commodity the person or entity is permitted to market, barter, or donate under such certificate, the Secretary shall—

"(A) assess a civil penalty against such person or entity in an amount equal to three times the current minimum loan rate for the feed grains so marketed, bartered, or donated, or

"(B) with respect to a producer, decrease the number of acres of the farm's feed grain crop acreage base such producer may devote to production for the succeeding crop of feed grains by a number of acres that, if planted, would result in the production of a quantity sufficient to satisfy the penalty referred to in subparagraph (A).

"(3) If a person knowingly purchases or otherwise acquires an amount of feed grains in excess of the amount of feed grains that may be marketed, bartered, or donated under a marketing certificate issued under this title, the Secretary shall assess a civil penalty against such person in an amount equal to three times the current minimum loan rate for the feed grains so purchased or acquired.

"(b) If a producer fails to comply fully with the terms and conditions of a feed grain program conducted under this title and the Secretary believes the failure should not preclude the making of loans, purchases, or payments to the producer, the Secretary may make loans, purchases, or payments in such amounts as the Secretary determines to be equitable in relation to the severity of the program violation.

"(c) If the Secretary determines that the penalties provided for in subsection (a) are not warranted by the severity of the program violation, the Secretary may reduce or waive such penalties.

"(d) Penalties collected under this section shall be deposited into the account of the Commodity Credit Corporation.

"REGULATIONS

"SEC. 508. The Secretary may issue such regulations as the Secretary determines necessary to carry out this title.".

TITLE V-A—AGRICULTURAL COMMODITY SUPPLY MANAGEMENT

AGRICULTURAL COMMODITY SUPPLY MANAGEMENT

SEC. 501. Effective only for the 1986 through 1990 crops, title V of the Agricultural Act of 1949 (7 U.S.C. 1461 et seq.) is amended to read as follows:

"TITLE V—AGRICULTURAL COMMODITY SUPPLY MANAGEMENT

"DEFINITIONS

"SEC. 501. As used in this title:

"(1) The term 'acreage allotment percentage' means a percentage obtained by dividing $200,000 by the projected aggregate annual income of a producer from the sale of commodities during a calender year in which a commodity will be harvested, except that such percentage may not exceed 100 per centum.

"(2) The term 'commodity' means wheat, corn, grain sorghums, barley, oats, rye, upland cotton, rice, and soybeans.

"(3) The term 'eligible crop acres' means the number of acres a producer may cultivate for the production of a commodity during a crop year determined under section 506(b)(2).

"(4) The term 'normal crop acres' means the number of acres cultivated for the production of a commodity, or reduced, set-aside, or diverted under a program administered by the Secretary, during any of the four preceding crop years.

"(5) The term 'program period' means the—

"(A) 1986 through 1987 crop years; and

"(B) 1988 through 1990 crop years.

"(6) The term 'reserve' means the farmers disaster reserve established under section 510.

"REFERENDUM

"SEC. 502. (a) No later than February 1, 1986, and August 1, 1988, in order to determine whether the program established by this title shall be implemented during the succeeding program period, the Secretary shall conduct a referendum among producers who, during a representative period (as determined by the Secretary), have been engaged in the production of a commodity for commercial use.

"(b) If the program established by this title is approved by at least one-half of the eligible producers voting in a referendum, the Secretary shall implement such program during the succeeding program period.

"(c) If such program is not approved by at least one-half of the eligible producers voting in a referendum, during the succeeding program period, in lieu of such program, the Secretary shall provide such loans, purchases, payments, and other assistance to producers of commodities as the Secretary considers appropriate.

"LOAN RATES

"SEC. 503. (a) The Secretary shall make available to producers loans and purchases for each crop of a commodity produced during a program period at such level, not less than the minimum support level for a commodity established under subsection (b), as the Secretary determines taking into consideration the actual cost of production of the commodity throughout the United States.

"(b) The minimum support level for a commodity during a crop year established under this subsection shall equal a specified per centum of the parity price of the commodity as provided in the following table:

"The minimum support level for a commodity during the:.	Shall equal the following per centum of the parity price of the commodity:
1986 crop year.....	70 per centum
1987 crop year.....	72 per centum
1988 crop year.....	74 per centum
1989 crop year.....	76 per centum
1990 crop year.....	78 per centum

"(c) The term of a loan made under this section shall be thirty-six months.

"NATIONAL MARKETING QUOTAS

"SEC. 504. (a) The Secretary shall proclaim a national marketing quota for each commodity for each marketing year of the 1986 through 1990 crops of commodities. The proclamation shall be made as soon as practicable during each calendar year preceding the year in which the marketing year for the crop begins.

"(b) The amount of the national marketing quota for a commodity for a marketing year shall be an amount of the commodity (less imports) that the Secretary estimates will be utilized during the marketing year to meet (1) domestic demand, (2) export demand, (3) food aid requirements, and (4) carryover requirements.

"(c) The Secretary may revise the national marketing quota first proclaimed for any marketing year for the purpose of determining national acreage allotments under section 505 if the Secretary determines it necessary based on the latest information. The Secretary shall proclaim such revised national production requirement as soon as it is made.

"(d) If the Secretary determines that domestic carryover stocks of a commodity are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national marketing quota by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"NATIONAL ACREAGE ALLOTMENTS

"SEC. 505. (a) The Secretary shall proclaim a national acreage allotment for each commodity for each of the 1986 through 1990 crop years.

"(b) The amount of the national acreage allotment for any crop of a commodity shall be the number of acres which the Secretary determines on the basis of the projected national yield and expected underplantings (acreage other than acreage not harvested because of program incentives) of farm acreage allotments will produce an amount of the commodity equal to the national marketing quota for the commodity for the marketing year for such crop.

"FARM ACREAGE ALLOTMENTS

"SEC. 506. (a) The national acreage allotment for a commodity shall be apportioned by the Secretary among farms, through local committees, in accordance with this section.

"(b)(1) To be eligible to receive a farm acreage allotment for a commodity for any crop year, a producer must complete and submit to the Secretary an application which contains—

"(A) the eligible crop acres of the producer, as determined under paragraph (2);

"(B) the objected annual income of the producer during the calendar year in which such commodity will be harvested, as determined under paragraph (3); and

"(C) the number of any bonus acres the producer requests to be awarded under subsection (f) for the production of each commodity during the crop year.

"(2)(A) Except as provided in subparagraphs (B), (C), and (D), the eligible crop acres of a producer shall equal the number of acres a producer requests to cultivate for the production of commodities during a crop year.

"(B) The total number of eligible crop acres of a producer during a crop year may not exceed the product obtained by multiplying—

"(i) the normal crop acres of the producer; by

"(ii) 80 per centum.

"(C) For purposes of subparagraph (B)(i), if a producer places acreage in the conservation reserve program estalished under section 16B of the Soil Conservation and Domestic Allotment Act, such acreages shall be added to the normal crop acres of the producer.

"(3) For purposes of this title, income shall—

"(A) include all farm and nonfarm income from whatever source;

"(B) be determined jointly for married couples; and

"(C) be determined separately for unmarried individuals living on a farm who—

"(i) are related by blood or marriage;

"(ii) are actively involved in the farming operation; and

"(iii) earn more than 50 per centum of their taxable income from farming operations.

"(c) The total farm acreage allotment of a producer for all commodities produced during a crop year under this section shall consist of the sum of—

"(1) the base acreage allotment for each commodity determined under subsection (d);

"(2) any supplemental acreage allotment for each commodity determined under subsection (e); and

"(3) any bonus acres for each commodity awarded under subsection (f).

"(d) The base acreage allotment of a producer for a comodity for a crop year shall equal the number of acres obtained by multiplying—

"(1) eligible crop acres of the producer; by

"(2) acreage allotment percentage of the producer.

"(e) Subject to the provisions of section 535(b) of this title, whenever a base acreage allotment for a crop is established for a farm, other than for a commodity which the producers on the farm use for on-farm feeding purposes and which the producers on the farm certify in writing will be used exclusively for on-farm feeding purposes during the period for which a national acreage allotment is in effect under this title, the producers on the farm may not plant an acreage on the farm to the commodities involved in excess of the base acreage of the producers for the farm for the respective commodities; and with respect to farms with base acreage allotments for such commodities and crop involved of less than fifteen acres, producer on such farms may not plan an acreage on such farms to the commodity for harvest for the crop in excess of fifteen acres.

"(f)(1) The Secretary shall determine the amount of any national supplemental acreage allotment for each commodity for each of the 1986 through 1990 crop years.

"(2) The amount of the national supplemental acreage allotment for a commodity for each crop year shall equal the difference between—

"(A) the amount of the national acreage allotment for such commodity for the crop year determined under section 505; less

"(B) the sum of the base acreage allotments of all producers for such commodity determined under subsection (d).

"(3) The supplemental acreage allotment of a producer for a commodity produced during a crop year shall equal the number of acres obtained by multiplying—

"(A) the difference between the eligible crop acres of the producer for such commodity and the base acreage allotment of the producer for such commodity; and

"(B) the percentage obtained by dividing—

"(i) the amount of the national supplemental acreage allotment for such commodity determined under paragraph (2); by

"(ii) the total of all supplemental acreage requests for such commodity determined under clause (A).

"(g) If the Secretary determines that the total amount of base and supplemental acreage allotments for a commodity for a crop year determined under subsections (d) and (f) would not produce an amound of the commodity equal to the national marketing quota for the commodity for the crop year determined under section 505, the Secretary shall award to each producer who requested bonus acres under subsection (b)(1)(C), in equal amounts, bonus acres for the production of such commodity which, in the aggregate and in conjunction with such allotments, would result in the production of an amount of such commodity equal to such national marketing quota.

"(h)(1) Except as provided in paragraph (2), a producer may plant one or more commodities (in the producer's discretion) on acreage permitted to be cultivated under a farm acreage allotment issued under this section for a crop year.

"(2) A producer may not increase the amount of acreage used for the production of a commodity during a crop year by more than 20 per centum over the amount of acreage used for the production of such commodity during the preceding crop year.

"(3) In order to permit the Secretary to issue marketing certificates under section 507, a producer shall inform the Secretary of the number of acres the producer will use for the production of each commodity during each crop year.

"(i) If the normal crop acres of a producer becomes available for any reason, such normal crop acres shall revert to the Secretary and be reapportioned by the Secretary to the next operator of the farm.

"MARKETING CERTIFICATES

"SEC. 507. (a) At the time a producer is assigned a farm acreage allotment under section 506 for any crop year, the Secretary shall issue marketing certificates to such producer for each commodity to be produced during such crop year.

"(b) Except as provided in subsections (c) and (d), a marketing certificate issued to a producer for any commodity for any crop year shall authorize such producer to market, barter, or donate an amount of such commodity determined by multiplying—

"(1) the number of acres the producer informed the Secretary the producer will use for the production of such commodity during such crop year under section 506(g)(3); by

"(2) the higher of—

"(A) the county average yield per acre for such commodity; or

"(B) the farm program yield of the producer for such commodity (as provided in section 508).

"(c) The Secretary may adjust the amount of a commodity which may be marketed, bartered, or donated under a marketing certificate to reflect the amount of such commodity which may be used for feed, human consumption, or other purposes on the farm of the producer.

"(d) If the amount of a commodity produced in a crop year exceeds the amount of the commodity which may be marketed, bartered, or donated under a marketing certificate, the surplus amount of such commodity may be—

"(1) used for feed, human consumption, or other purposes on the farm of the producer;

"(2) stored during the current marketing year and marketed under a marketing certificate issued for the subsequent marketing year;

"(3) donated to the Commodity Credit Corporation in order to be made available to provide famine relief and assistance to other foreign countries under title II of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721 et seq.); or

"(4) sold to the Commodity Credit Corporation, at no more than 50 per centum of the loan level for such commodity determined under section 503, in order to be made available to provide such famine relief and assistance.

"(e) A person may not purchase or otherwise acquire an amount of a commodity from a producer in excess of the amount of the commodity which may be marketed, bartered, or donated by such producer under a marketing certificate.

"FARM PROGRAM YIELDS

"SEC. 508. (a)(1) The farm program yield for each crop of a commodity shall be equal to the sum of the average yield established for the farm for the five most recent crop years, excluding the year in which the yield was the highest and the year in which the yield was the lowest, adjusted by the Secretary to provide a fair and equitable yield.

"(2) If no payment yield for such commodity was established for the farm in the five most recent crop years, the Secretary may determine such yield as the Secretary determines fair and reasonable.

"(b) Notwithstanding subsection (a):

"(1) In the determination of yields, the Secretary shall take into account the actual yields demonstrated by the producer to the satisfaction of the Secretary.

"(2) Neither such yields established for a commodity nor the farm program yield established on the basis of such yields shall be reduced under other provisions of this section.

"(c) If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of—

"(A) historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the base period, or

"(B) if such data are not available, the Secretary's estimate of actual yields for the crop year concerned.

"(d) If national, State, or county program payment yields are established, the total farm program yields shall balance to the national, State or county program payment yields, respectively.

"CONSERVATION OF SET-ASIDE ACREAGE

"SEC. 509. (a) A producer of a commodity shall devote to approved conservation uses all acreage of the producer which the producer is required to set-aside under section 506.

"(b) The Secretary may make such adjustments in the amount of acreage the producer is required to set-aside under section 506 as the Secretary determines necessary to correct for abnormal factors affecting production and to give due consideration to tillable acreage, crop-rotation practices, types of soil, soil and water conservation measures, topography, and such other factors as the Secretary determines appropriate.

"(c)(1) Regulations issued by the Secretary under this section with respect to acreage required to be devoted to conservation uses shall require appropriate measures to protect such acreage against noxious weeds and wind and water erosion.

"(2) The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to hay and grazing if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(d)(1) Any set-aside acreage may be devoted to wildlife food plots or wildlife habitats in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(2) The Secretary may pay such amount as the Secretary considers appropriate of the cost of practices designed to carry out the purposes of paragraph (1).

"(3) The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(e)(1) A producer of a commodity shall execute an agreement with the Secretary which describes the means the producer will use to comply with this section not later than such date as the Secretary may prescribe.

"(2) The Secretary may, by mutual agreeement with such producer, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"SOIL CONSERVATION

"SEC. 510. (a) Notwithstanding any other provision of law, the Secretary shall require that producers on a farm in any area follow the conservation practices prescribed by the appropriate local soil conservation district for the area.

"(b) In areas in which no soil conservation district exists, the county committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) determine appropriate conservation practices.

"PENALTIES

"SEC. 511. (a)(1) Except as provided in subsection (b), if a producer fails to comply with any term or condition of the program conducted under this title, the producer shall be ineligible for any farm acreage allotment, loan, purchase, or payment authorized under this title.

"(2) Except as provided in subsection (c), if a producer markets, barters, or donates a commodity without a marketing certificate required under section 507 or markets, barters, or donates an amount of a commodity for commercial use in excess of the amount of the commodity the producer is permitted to market, barter, or donate under such certificate, the Secretary shall—

"(A) assess a fine against such producer in an amount equal to three times the value of the commodities so marketed; or

"(B) increase the number of acres such producer is required to set-aside under section 506 during the succeeding crop year by a number of acres which, if planted, would result in the production of a quantity sufficient to satisfy the fine referred to in clause (A).

"(3) If a person purchases or otherwise acquires an amount of a commodity from a producer in excess of the amount of the commodity which may be marketed, bartered, or donated by such producer under a marketing certificate issued under section 507, the Secretary shall assess a fine against such person in an amount equal to three times the value of the commodities so purchased or acquired.

"(b)(1) If a producer fails to comply fully with the terms and conditions of the program conducted under this section and the Secretary believes the failure should not preclude the making of a farm acreage allotment, or loans, purchases, or payments to the producer, the Secretary may make an allotment or loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure of producer.

"(2) The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"REGULATIONS

"SEC. 512. The Secretary may issue such regulations as the Secretary determines necessary to carry out this title.

"COMMODITY CREDIT CORPORATION

"SEC. 513. The Secretary shall carry out the program authorized by this title through the Commodity Credit Corporation.

"PAYMENTS

"SEC. 514. (a) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to assignment of payments) shall apply to payments under this title.

"(b) The Secretary shall provide for the sharing of payments made under this title for any farm among the producers on the farm on a fair and equitable basis.

"COMPLIANCE USING HIGHLY ERODIBLE LAND

"SEC. 515. If any land is required to be set aside, diverted, or otherwise not cultivated under the provisions of a program under this title, the producer shall satisfy such requirement to the extent possible with highly erodible cropland (as defined in section 1201 of the Food Security Act of 1985). Any such highly erodible land so set aside, diverted, or not cultivated, during a period of four succeeding crop years shall be excluded from any crop acreage base for any program crop.

"APPLICABILITY OF THIS TITLE

"SEC. 516. If marketing certificates are not approved for a program period by producers in a referendum conducted under this title, with respect to commodities, in lieu of a marketing certificate program for that program period, the Secretary shall provide such loans, purchases, payments, and other assistance to producers of commodities as provided for elsewhere in this Act.".

SUSPENSION OF PERMANENT PROGRAM

SEC. 502. (a)(1) Sections 379d, 379e, 379f, 379g, 379h, 379i, and 379j of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1379d–1379j) (which deal with marketing certificate requirements for processors and exporters) shall not be applicable to wheat processors or exporters during the period June 1, 1986, through May 31, 1991.

(2) Sections 331, 332, 333, 334, 335, 336, 338, 339, 379b, and 379c of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1331–1336, 1338, 1339, 1379b, and 1379c) shall not be applicable to the 1986 through 1990 crops of wheat.

(3) The joint resolution entitled "A joint resolution relating to corn and wheat marketing quotas under the Agricultural Adjustment Act of 1938, as amended", approved May 26, 1941 (7 U.S.C. 1330 and 1340), shall not be applicable to the crops of wheat planted for harvest in the calendar years 1986 through 1990.

(4) Section 107 of the Agricultural Act of 1949 (7 U.S.C. 1445a) shall not be applicable to the 1986 through 1990 crops of wheat.

(b) Section 105 of the Agricultural Act of 1949 (7 U.S.C. 1444b) shall not be applicable to the 1986 through 1990 crops of feed grains.

(c)(1) Sections 342, 343, 344, 345, 346, and 377 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1342–1346 and 1377) shall not be applicable to upland cotton of the 1986 through 1990 crops.

(2) Effective only with respect to the period beginning August 1, 1987, and ending July 31, 1991, the tenth sentence of section 407 of the Agricultural Act of 1949 (7 U.S.C. 1427) is amended by striking out all through "110 per centum of the loan rate, and (2)" and inserting in lieu thereof the following: "Notwithstanding any other provision of law, (1) the Commodity Credit Corporation shall sell upland cotton for unrestricted use at the same prices as it sells upland cotton for export, in no event, however, at less than 115 per centum of the loan rate for Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) adjusted for such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate plus reasonable carrying charges, and (2)".

(3) Sections 103(a) and 203 of the Agricultural Act of 1949 (7 U.S.C. 1444(a) and 1446d) shall not be applicable to the 1986 through 1990 crops.

(4) Notwithstanding any other provision of law, the permanent State, county, and farm base acreage allotments for the 1977 crop of upland cotton, adjusted for any underplantings in 1977 and reconstituted as

provided in section 379 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1379) shall be the preliminary allotments for the 1991 crop.

(c) If marketing certificates are not approved for a program period by producers in a referendum conducted under title V of the Agricultural Act of 1949, with respect to commodities, the amendments made by this section shall not take effect.

TITLE VI—COTTON

LOAN RATES, TARGET PRICES, AND ACREAGE LIMITATION AND LAND DIVERSION PROGRAMS FOR THE 1986 THROUGH 1990 CROPS OF UPLAND COTTON

SEC. 601. Effective only for the 1986 through 1990 crops of upland cotton, section 103 of the Agricultural Act of 1949 (7 U.S.C. 1444) is amended by adding at the end thereof the following:

"(i) Notwithstanding any other provision of law for any crop of cotton for which a national marketing certificate program is not in effect under title V, loans and purchases shall be made available to producers of cotton as provided in this subsection.

"LOANS

"(1) The Secretary, on presentation of warehouse receipts reflecting accrued storage charges of not more than sixty days, shall make available for each of the 1986 through 1989 crops of upland cotton to producers nonrecourse loans for a term of ten months from the first day of the month in which the loan is made at such level, per pound, as will reflect for Strict Low Middling one-and-one-sixteenth-inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States the smaller of (A) 85 per centum of the average price (weighted by market and month) of such quality of cotton as quoted in the designated United States spot markets during three years of the five-year period ending July 31 in the year in which the loan level is announced, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, or (B) 90 per centum of the average, for the fifteen-week period beginning July 1 of the year in which the loan level is announced, of the five lowest-priced growths of the growths quoted for Middling one-and-three-thirty-seconds-inch cotton C.I.F. northern Europe (adjusted downward by the average difference during the period April 15 through October 15 of the year in which the loan is announced between such average northern European price quotation of such quality of cotton and the market quotations in the designated United States spot markets for Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9)). If for any crop the average northern European price determined under clause (B) of the first sentence of this paragraph is less than the average United States spot market price determined under clause (A) of the first sentence of this paragraph, notwithstanding the foregoing provisions of this paragraph, the Secretary may increase the loan level to such level as the Secretary may deem appropriate, not in excess of the average United States spot market price determined under clause (A) of the first sentence of this paragraph. In no event (other than as provided in the next sentence) shall the loan level for a crop of upland cotton be less than 95 per centum of the loan level for the preceding crop of upland cotton as computed without regard to any adjustment made under the next sentence. If the Secretary determines that the world price of upland cotton is below the loan level computed under the foregoing provisions, the Secretary shall reduce the loan level so computed to a level the Secretary determines necessary for upland cotton to be competitive in domestic and export markets, except that the amount of the reduction shall not exceed 20 per centum of the loan level that would have been in effect but for this sentence. The loan level for any crop of upland cotton shall be determined and announced by the Secretary not later than November 1 of the calendar year preceding the marketing year for which such loan is to be effective, and such level shall not thereafter be changed. Nonrecourse loans provided for in this subsection, on request of the producer during the tenth month of the loan period for the cotton, shall be made available for an additional term of eight months, except that such request to extend the loan period shall not be approved in a month when the average price of Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for the preceding month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six-month period.

"LIMITED GLOBAL IMPORT QUOTA

"(2) Whenever the Secretary determines that the average price of Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for a month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six months, notwithstanding any other provision of law, the President shall immediately establish and proclaim a special limited global import quota for upland cotton subject to the following conditions:

"(A) The amount of the special quota shall be equal to twenty-one days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent three months for which data are available.

"(B) If a special quota has been established under this paragraph during the preceding twelve months, the amount of the quota next established hereunder shall be the smaller of twenty-one days of domestic mill consumption calculated as set forth in subparagraph (A) or the amount required to increase the supply to 130 per centum of the demand.

"(C) As used in subparagraph (B), the term 'supply' means, using the latest official data of the Bureau of the Census, the Department of Agriculture, and the Department of the Treasury, the carryover of upland cotton at the beginning of the marketing year (adjusted to four-hundred-and-eighty-pound bales) in which the special quota is established, plus production of the current crop, plus imports to the latest date available during the marketing year, and the term 'demand' means the average seasonally adjusted annual rate of domestic mill consumption in the most recent three months for which data are available, plus the larger of average exports of upland cotton during the preceding six marketing years or cumulative exports of upland cotton, plus outstanding export sales, for the marketing year in which the special quota is established.

"(D) When a special quota is established under the provisions of this paragraph, a ninety-day period from the effective date of the proclamation shall be allowed for entering cotton under such quota.

Notwithstanding the foregoing provisions of this paragraph, a special quota period shall not be established that overlaps an existing quota period.

"TARGET PRICES

"(3)(A) The Secretary shall make payments available for each of the 1986 through 1990 crops of upland cotton to the producers on each farm at a rate equal to the amount by which the higher of—

"(i) the average market price per pound received by farmers for upland cotton during the calendar year that includes the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under paragraph (1) for such crop,

is less than the established price per pound times in each case the farm program acreage for upland cotton (determined in accordance with paragraph (5) or (8)(C), but in no event on a greater acreage than the acreage actually planted to upland cotton for harvest), multiplied by the program yield for the farm for upland cotton (determined in accordance with paragraph (7)).

"(B)(i) The established price for the 1986 and 1987 crops of upland cotton shall be 81 cents per pound. Subject to the provisions of clause (ii), the established price per pound for upland cotton for each of the 1988, 1989, and 1990 crops shall be not less than 90 per centum of the United States average cost of production per pound for the three crop years immediately preceding the crop year before the crop year, based upon then current total economic cost calculations of the Economic Research Service of the Department of Agriculture.

"(ii) In no event shall the established price for a crop of upland cotton be less than 95 per centum of the established price for the preceding crop, nor may the Secretary set the established price for the 1988, 1989, or 1990 crop of upland cotton at a level less than the level for the preceding crop of upland cotton unless the Secretary certifies to Congress at the time the Secretary announces the program for the crop that the cost of production for such crop of upland cotton for all producers, as estimated by the Economic Research Service of the Department of Agriculture in consultation with the National Agricultural Cost of Production Standards Review Board, will be 5 per centum below the cost of production for the preceding crop of upland cotton for all producers.

"(C) Notwithstanding the foregoing provisions of this subsection, if the Secretary adjusts the loan level for a crop of upland cotton in accordance with the fourth sentence of paragraph (1) or the loan level for the crop before such adjustment is established at a level below $0.55 per pound, the Secretary shall provide emergency compensation by increasing the established price payments for upland cotton by such amount as the Secretary determines necessary to provide the same total return to producers as if the adjustment in the loan level had not been made or as if the reduction in the loan level before such adjustment to a level below $0.55 had not occurred, and any payments under this subparagraph shall not be included in the payments subject to limitations under the provisions of section 1011 of the Food Security Act of 1985.

"INVENTORY CONTROL AND ACREAGE REDUCTION

"(4)(A)(i) With respect to a crop of upland cotton, if the Secretary estimates (not later than November 1 of the year before the calendar year in which the crop is to be harvested) that, in the absence of an acreage reduction program, the quantity of upland

cotton on hand in the United States on the last day of the marketing year for the crop will exceed one-third of the quantity of upland cotton that the Secretary estimates will be used domestically and for export during the marketing year for such crop, then, in order to reasonably ensure making progress toward achievement of the goal set forth in clause (ii), the Secretary shall establish—

"(I) a limitation on acreage planted to upland cotton in accordance with subparagraph (B); and

"(II) if the Secretary determines that such acreage limitation program will not achieve such goal, a payment-in-kind land diversion program in accordance with subparagraph (C).

"(ii) The goal referred to in clause (i) is that the quantity of upland cotton on hand on the last day of the marketing year for such crop will not exceed one-third of the amount of the crop that the Secretary estimates will be used domestically and for export during that marketing year.

"(iii) In no event may—

"(I) the acreage limitation for a crop with respect to any farm exceed 25 per centum of the upland cotton crop acreage base for that farm for that crop; nor

"(II) acreage diverted from production for a crop under the payment-in-kind land diversion program with respect to any farm exceed 25 per centum of the upland cotton crop acreage base for that farm for that crop.

"(B)(i) If an upland cotton acreage limitation is announced under subparagraph (A), such limitation shall be achieved by applying a uniform percentage reduction to the upland cotton crop acreage base for the crop for each cotton-producing farm.

"(ii) A number of acres on the farm determined by dividing (I) the product obtained by multiplying the number of acres required to be withdrawn from the production of upland cotton times the number of acres actually planted to upland cotton, by (II) the number of acres authorized to be planted to upland cotton under the limitation established by the Secretary shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, that will ensure protection of such acreage from weeds and wind and water erosion. The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'.

"(iii) The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(C) If a payment-in-kind land diversion program is in effect under subparagraph (A), the acreage planted to upland cotton for harvest on a farm shall be limited to the upland cotton crop acreage base for the farm for the crop reduced by a percentage uniformly applied to each farm, in addition to the reduction required under subparagraph (B), and land diversion payments in kind shall be made to producers who devote to approved conservation uses an acreage of cropland on the farm equivalent to the reduction required from the upland cotton crop acreage base for the farm in accordance with land diversion contracts entered into by the Secretary with such producers. Such payments shall be made from the stocks of upland cotton owned by the Commodity Credit Corporation. If such stocks are insufficient for such purpose, the Secretary shall substitute cash payments as necessary. Such substitution shall be applied on a uniform basis to each producer. The amounts payable to producers under land diversion contracts may be determined through such means as the Secretary determines appropriate. Any payments in kind (including any cash substitutes) made under this paragraph shall not be included in the payments subject to limitations under the provisions of section 1011 of the Food Security Act of 1985. The total of such payments in kind (including any cash substitutes) that any person may receive for any crop of upland cotton may not exceed $50,000.

"(D) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"COMPLIANCE

"(5) Producers who knowingly produce upland cotton in excess of the permitted upland cotton acreage for the farm, as established under paragraph (4), shall be ineligible for upland cotton loans and payments for the crop involved with respect to that farm. If an acreage limitation or a payment-in-kind land diversion program is announced under paragraph (4) for a crop of upland cotton, paragraph (8) shall not be applicable to such crop, including any prior announcement that may have been made under paragraph (8) with respect to such crop. The individual farm program acreage shall be the acreage on the farm planted to upland cotton for harvest within the permitted upland cotton acreage for the farm as established under paragraph (4).

"ACREAGE BASES

"(6) Upland cotton crop acreage bases for each crop of upland cotton shall be determined under title VI.

"YIELDS

"(7) The program yields for farms for each crop of upland cotton shall be determined under title VI.

"NATIONAL PROGRAM ACREAGE, PROGRAM ALLOCATION FACTOR, AND INDIVIDUAL FARM PROGRAM ACREAGES

"(8)(A) Except for crops for which there is an acreage limitation program under paragraph (4), the Secretary shall establish a national program acreage for each of the 1986 through 1990 crops of upland cotton. Such national program acreage shall be announced by the Secretary not later than November 1 of the calendar year preceding the year for which such acreage is established. The Secretary may revise the national program acreage first announced for any crop for the purpose of determining the allocation factor under subparagraph (B) if the Secretary determines it necessary based on the latest information, and the Secretary shall announce such revised national program acreage as soon as it is made. The national program acreage shall be the number of harvested acres the Secretary determines (on the basis of the estimated weighted national average of the upland cotton program yields for the crop for which the determination is made) will produce the quantity of upland cotton (less imports) that the Secretary estimates will be used domestically and for export during the marketing year for such crop. The national program acreage shall be subject to such adjustment as the Secretary determines necessary, taking into consideration the estimated carryover supply, so as to provide for an adequate but not excessive total supply of upland cotton for the marketing year for the crop for which such national program acreage is established. In no event shall the national program acreage be less than ten million acres.

"(B) The Secretary shall determine a program allocation factor for each crop of upland cotton. The allocation factor (not to exceed 100 per centum) shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop.

"(C) The individual farm program acreage for each crop of upland cotton shall be determined by multiplying the allocation factor by the acreage of upland cotton planted for harvest on the farms for which individual farm program acreages are required to be determined. The farm program acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage on the farm planted to upland cotton for harvest from the upland cotton crop acreage base established for the farm under title VI by at least the percentage recommended by the Secretary in the announcement of the national program acreage. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage planted to upland cotton for harvest is less than the upland cotton crop acreage base established for the farm under title VI, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for upland cotton, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"ADMINISTRATIVE PROVISIONS

"(9)(A) An operator of a farm desiring to participate in the program conducted under paragraph (4) shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe. The Secretary, by mutual agreement with the producers on the farm, may terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(B) The Secretary shall provide for the sharing of payments made under this subsection for any farm among the producers on the farm on a fair and equitable basis.

"(C) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(D) If the failure of a producer to comply fully with the terms and conditions of the program formulated under this subsection precludes the making of loans and payments, the Secretary nevertheless may make such loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(E) The Secretary may issue such regulations as the Secretary determines necessary to carry out this subsection.

"(F) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(G) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.

"CROSS-COMPLIANCE AND OFFSETTING COMPLIANCE

"(10) Notwithstanding any other provision of law—

"(A) compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans or payments under this subsection; and

"(B) the Secretary may not require producers on a farm, as a condition of eligibility for loans or payments under this subsection for such farm, to comply with the terms and conditions of the upland cotton program with respect to any other farm operated by such producers.

"RECOURSE LOANS FOR SEED COTTON

"(11) To encourage and assist producers in the orderly ginning and marketing of their cotton production, the Secretary shall make recourse loans available to such producers on seed cotton in accordance with the authority vested in the Secretary under the Commodity Credit Corporation Charter Act.".

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS

SEC. 602. Effective only with respect to the period beginning August 1, 1978, and ending July 31, 1991, the tenth sentence of section 407 of the Agricultural Act of 1949 (7 U.S.C. 1427) is amended by striking out all of that sentence through the words "110 per centum of the loan rate, and (2)" and inserting in lieu thereof the following: "Notwithstanding any other provision of law, (1) the Commodity Credit Corporation shall sell upland cotton for unrestricted use at the same prices as it sells cotton for export, in no event, however, at less than 115 per centum of the loan rate for Strict Low Middling one-and-one-sixteenth-inch upland cotton (micronaire 3.5 through 4.9) adjusted for such current market differentials reflecting grade, quality, location and other value factors as the Secretary determines appropriate plus reasonable carrying charges, and (2)".

MISCELLANEOUS COTTON PROVISIONS

SEC. 603. Sections 103(a) and 203 of the Agricultural Act of 1949 (7 U.S.C. 1444(a) and 1446d) shall not be applicable to the 1986 through 1990 crops.

SKIPROW PRACTICES

SEC. 604. Section 374(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1374(a)) is amended by striking out "1985" and inserting in lieu thereof "1990".

MARKETING CERTIFICATES

SEC. 605. (a) Notwithstanding any other provision of law, whenever, during the period beginning August 1, 1986, and ending July 31, 1991, the world price of upland cotton (adjusted to United States qualities and location), as determined by the Secretary of Agriculture, is below the current loan rate for upland cotton determined under section 103(i) of the Agricultural Act of 1949, to make United States upland cotton competitive in world markets and to maintain and expand domestic consumption and exports of upland cotton produced in the United States, the Commodity Credit Corporation, under such regulations as the Secretary may prescribe, shall make payments, through the issuance of payment-in-kind certificates, to first handlers of cotton (persons regularly engaged in buying or selling upland cotton) who have entered into an agreement with the Commodity Credit Corporation to participate in the program in such monetary amounts and subject to such terms and conditions as the Secretary determines will make upland cotton produced in the United States available for domestic consumption or for export at competitive prices, including such payments as may be necessary to make raw cotton in inventory on August 1, 1986, available on the same basis.

(b) The value of each certificate issued under subsection (a) shall be based on the difference between the loan rate for upland cotton as determined under section 103(i) of the Agricultural Act of 1949, and the prevailing world market price of upland cotton, as determined by the Secretary of Agriculture under a published formula submitted for public comment before its adoption.

(c) The Commodity Credit Corporation, under regulations prescribed by the Secretary of Agriculture, may assist any person receiving payment-in-kind certificates under this section in the redemption of certificates for cash, or marketing or exchange of such certificates for (1) upland cotton owned by the Commodity Credit Corporation or (2) (if the Secretary and the person agree) other agricultural commodities or products owned by the Commodity Credit Corporation, at such times, in such manner, and at such price levels as the Secretary determines will best effectuate the purposes of the program established under this section.

(d) Insofar as practicable, the Secretary of Agriculture shall permit owners of certificates to designate the commodities and products, including storage sites thereof, they would prefer to receive in exchange for certificates. In the case of any certificate not presented for redemption, marketing, or exchange within a reasonable number of days after its issuance to be established by the Secretary, reasonable costs of storage and other carrying charges, as determined by the Secretary, shall be deducted from the value of the certificate for the period beginning after such reasonable number of days and ending with the date of its presentation to the Commodity Credit Corporation.

(e) The Secretary of Agriculture shall take such measures as may be necessary to prevent the marketing or exchange of agricultural commodities and products for certificates under this section from adversely affecting the income of producers of such commodities or products.

(f) Under regulations prescribed by the Secretary of Agriculture, certificates issued to cotton handlers under this section may be transferred to other handlers and persons approved by the Secretary.

(g) For any year or other period for which a payment-in-kind program is in effect under this section, the Secretary of Agriculture, for the purposes of calculating loan levels under section 103(i) of the Agricultural Act of 1949, shall consider the average market prices for such year or period to be increased by the average rate of payment under the program for such year or period if such average market prices are below the loan level for such year or period.

TITLE VII—RICE

LOAN RATES, TARGET PRICES, AND ACREAGE LIMITATION AND LAND DIVERSION PROGRAMS FOR THE 1986 THROUGH 1990 CROPS OF RICE

SEC. 701. Effective only for the 1986 through 1990 crops of rice, section 101 of the Agricultural Act of 1949 (7 U.S.C. 1441) is amended by adding at the end thereof the following:

"(j) Notwithstanding any other provision of law, for any crop of rice for which a national marketing certificate program is not in effect under title V, loans and purchase shall be made available to producers of rice as provided in this subsection.

"LOANS

"(1) The Secretary shall make available to producers in the several States of the United States loans and purchases for each of the 1986 through 1990 crops of rice at a level, per hundredweight, not less than 85 per centum of the average price per hundredweight for rice received by farmers during the marketing years for the three preceding crops of rice, as determined by the Secretary. In no event (other than as provided in the next sentence) shall the level of loans and purchases for a crop of rice be less than 95 per centum of the level for the preceding crop of rice as computed without regard to any adjustment made under the next sentence. If the Secretary determines that the world price of rice is below the loan level computed under the foregoing provisions, the Secretary shall reduce the loan level so computed to a level the Secretary determines necessary to make rice competitive in domestic and export markets, except that the amount of the reduction shall not exceed 20 per centum of the loan level that would have been in effect but for this sentence. The loan and purchase level and the established price for each of the 1986 through 1990 crops of rice shall be announced not later than January 31 of the calendar year for the crop harvested in that calendar year. Any loan made under this paragraph shall have a term of ten months beginning on the first day of the month in which the loan is made.

"TARGET PRICES

"(2)(A) The Secretary shall make payments available to producers for each of the 1986 through 1990 crops of rice grown in the several States of the United States in amounts computed as provided in this paragraph. Payments for each such crop of rice shall be computed by multiplying (i) the payment rate, by (ii) the farm program acreage for the crop, by (iii) the program yield established for the crop for the farm. In no event shall payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to rice.

"(B) The payment rate for a crop of rice shall be the amount by which the established price for the crop of rice exceeds the higher of—

"(i) the national average market price per hundredweight received by farmers during the calendar year that includes the first five

months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under paragraph (1) for such crop.

"(C)(i) The established price per hundredweight for rice for the 1986 and 1987 crops shall be $11.90 per hundredweight. Subject to the provisions of clause (ii) the established price per hundredweight for rice for each of the 1988, 1989, and 1990 crops shall be not less than 90 per centum of the United States average cost of production per hundredweight for the three crop years immediately preceding the year before the crop year, based upon then current total economic cost calculations of the Economic Research Service of the Department of Agriculture.

"(ii) In no event shall the established price for a crop of rice be less than 95 per centum of the established price for the preceding crop, nor may the Secretary set the established price for the 1988, 1989, or 1990 crop of rice at a level less than the level for the preceding crop of rice unless the Secretary certifies to Congress at the time the Secretary announces the program for the crop that the cost of production for such crop of rice for all producers, as estimated by the Economic Research Service of the Department of Agriculture in consultation with the National Agricultural Cost of Production Standards Review Board, will be 5 per centum below the cost of production for the preceding crop of rice for all producers.

"(D) Notwithstanding the foregoing provisions of this subsection, if the Secretary adjusts the level of loans and purchases for a crop of rice in accordance with the third sentence of paragraph (1), the Secretary shall provide emergency compensation by increasing the established price payments for rice by such amount as the Secretary determines necessary to provide the same total return to producers as if the adjustment in the level of loans and purchases had not been made, and any payments under this subparagraph shall not be included in the payments subject to limitations under the provisions of section 1011 of the Food Security Act of 1985.

"INVENTORY CONTROL AND ACREAGE REDUCTIONS

"(3)(A)(i) With respect to a crop of rice, if the Secretary estimates (not later than January 31 of the calendar year in which the crop is to be harvested) that, in the absence of an acreage reduction program, the quantity of rice on hand in the United States on the last day of the marketing year for the crop will exceed one-fifth of the quantity of rice that the Secretary estimates will be used domestically and for export during the marketing year for such crop, then, in order to reasonably ensure making progress toward achievement of the goal set forth in clause (ii), the Secretary shall establish—

"(I) a limitation on the acreage planted to rice in accordance with subparagraph (B); and

"(II) if the Secretary determines that such acreage limitation program will not achieve such goal, a payment-in-kind land diversion program in accordance with subparagraph (C).

"(ii) The goal referred to in clause (i) is that the quantity of rice on hand at the last day of the marketing year for such crop will not exceed one-fifth of the amount of the crop that the Secretary estimates will be used domestically and for export during that marketing year.

"(iii) In no event may—

"(I) the acreage limitation for a crop with respect to any farm exceed 25 per centum of the rice crop acreage base for that farm for that crop; nor

"(II) the acreage diverted from production for a crop under the payment-in-kind land diversion program with respect to any farm exceed 25 per centum of the rice crop acreage base for that farm for that crop.

"(B)(i) If a rice acreage limitation is announced under subparagraph (A), such limitation shall be achieved by applying a uniform percentage reduction to the rice crop acreage base for the crop for each rice-producing farm.

"(ii) A number of acres on the farm determined by dividing (I) the product obtained by multiplying the number of acres required to be withdrawn from the production of rice times the number of acres actually planted to rice, by (II) the number of acres authorized to be planted to rice under the limitation established by the Secretary shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, that will ensure protection of such acreage from weeds and wind and water erosion. The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'.

"(iii) The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(C) If a payment-in-kind land diversion program is in effect under subparagraph (A), the acreage planted to rice for harvest on a farm shall be limited to the rice crop acreage base for the farm for the crop reduced by a percentage uniformly applied to each farm, in addition to the reduction under subparagraph (B), and land diversion payments in kind shall be made to producers who devote, to the extent prescribed by the Secretary, to approved conservation uses an acreage of cropland on the farm equivalent to the reduction required from the rice crop acreage base for the farm in accordance with land diversion contracts entered into by the Secretary with such producers. Such payments shall be made from stocks of rice owned by the Commodity Credit Corporation. If such stocks are insufficient for such purpose, the Secretary shall substitute cash payments as necessary. Such substitution shall be applied on a uniform basis to each producer. The amounts payable to producers under land diversion contracts may be determined through such means as the Secretary determines appropriate. Any payments in kind (including any cash substitutes) made under this paragraph shall not be included in the payments subject to limitations under the provisions of section 1011 of the Food Security Act of 1985. The total of such payments in kind (including any cash substitutes) that any person may receive for any crop of rice may not exceed $50,000.

"(D) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"COMPLIANCE

"(4) Producers who knowingly produce rice in excess of the permitted rice acreage for the farm, as established under paragraph (3), shall be ineligible for rice loans and payments for the crop involved with respect to that farm. If an acreage limitation or a payment-in-kind land diversion program is announced under paragraph (3) for a crop of rice, paragraph (7) shall not be applicable to such crop, including any prior announcement that may have been made under paragraph (7) with respect to such crop. The individual farm program acreage shall be the acreage on the farm planted to rice for harvest within the permitted rice acreage for the farm as established under paragraph (3).

"ACREAGE BASES

"(5) Rice crop acreage bases for each crop of rice shall be determined under title VI.

"YIELDS

"(6) The program yields for farms for each crop of rice shall be determined under title VI.

"NATIONAL PROGRAM ACREAGE, PROGRAM ALLOCATION FACTOR, AND INDIVIDUAL FARM PROGRAM ACREAGES

"(7)(A) Except for crops in which there is an acreage limitation program under paragraph (3), the Secretary shall proclaim a national program acreage for each of the 1986 through 1990 crops of rice. The proclamation shall be made not later than January 31 of the calendar year for the crop harvested in that calendar year. The Secretary may revise the national program acreage first proclaimed for any crop for the purpose of determining the allocation factor under subparagraph (B) if the Secretary determines a revision necessary based on the latest information, and the Secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for rice shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the rice program yields for the crop for which the determination is made) will produce the quantity of rice (less imports) that the Secretary estimates will be used domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of rice are excessive or an increase in stocks is needed to ensure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(B) The Secretary shall determine a program allocation factor for each crop of rice. The allocation factor for rice shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop. In no event may the allocation factor for any crop of rice be more than 100 per centum nor less than 80 per centum.

"(C) The individual farm program acreage for each crop of rice shall be determined by multiplying the allocation factor by the acreage of rice planted for harvest on the farms for which individual farm program

acreages are required to be determined. The farm program acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage on the farm planted to rice for harvest from the rice crop acreage base established for the farm under title VI by at least the percentage recommended by the Secretary in the proclamation of the national program acreage. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage planted to rice for harvest is less than the rice acreage base established for the farm under title VI, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for rice, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"ADMINISTRATIVE PROVISIONS

"(8)(A) An operator of a farm desiring to participate in the program conducted under paragraph (3) shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe. The Secretary, by mutual agreement with the producers on the farm, may terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(B) The Secretary shall provide for the sharing of payments made under this subsection for any farm among the producers on the farm on a fair and equitable basis.

"(C) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(D) If the failure of a producer to comply fully with the terms and conditions of the program formulated under this subsection precludes the making of loans, purchases, and payments, the Secretary, nevertheless, may make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(E) The Secretary may issue such regulations as the Secretary determines necessary to carry out this subsection.

"(F) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(G) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.

"CROSS-COMPLIANCE AND OFFSETTING COMPLIANCE

"(9) Notwithstanding any other provision of law—

"(A) compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this subsection; and

"(B) the Secretary may not require producers on a farm, as a condition of eligibility for loans or payments under this subsection for such farm, to comply with the terms and conditions of the rice program with respect to any other farm operated by such producers.".

NONAPPLICABILITY OF SECTION 101 OF THE AGRICULTURAL ACT OF 1949

SEC. 602. That portion of section 101 of the Agricultural Act of 1949 (7 U.S.C. 1441) preceding subsection (a) shall not be applicable to the 1986 through 1990 crops of rice.

EXPORT MARKETING CERTIFICATES

SEC. 703. (a) Notwithstanding any other provision of law, whenever, during the period beginning August 1, 1986, and ending July 31, 1991, the world price for rice (adjusted to United States qualities and location), as determined by the Secretary of Agriculture, is below the current loan rate for rice determined under section 101(j) of the Agricultural Act of 1949, to make United States rice competitive in world markets and to maintain and expand exports of rice produced in the United States, the Commodity Credit Corporation, under such regulations as the Secretary may prescribe, may make payments, through the issuance of payment-in-kind certificates, to exporters of rice who have entered into an agreement with the Commodity Credit Corporation to participate in the program in such monetary amounts and subject to such terms and conditions as the Secretary determines will make rice produced in the United States available for export at competitive prices consistent with the purposes of this section, including such payments as may be necessary to make rice in inventory on August 1, 1986, available on the same basis.

(b) The value of each certificate issued under subsection (a) shall be based on the difference between the loan rate for rice, as determined under section 101(j) of the Agricultural Act of 1949, and the prevailing world market price for rice, as determined by the Secretary of Agriculture under a published formula submitted for public comment before its adoption.

(c) The Commodity Credit Corporation, under regulations prescribed by the Secretary of Agriculture, may assist any person receiving payment-in-kind certificates under this section in the redemption of certificates for cash, or marketing or exchange of such certificates for (1) rice owned by the Commodity Credit Corporation or (2) (if the Secretary and the person agree) other agricultural commodities or products owned by the Commodity Credit Corporation, at such times, in such manner, and at such price levels as the Secretary determines will best effectuate the purposes of the program established under this section.

(d) Insofar as practicable, the Secretary shall permit owners of certificates to designate the commodities and products, including storage sites thereof, they would prefer to receive in exchange for certificates. In the case of any certificate not presented for redemption, marketing, or exchange within a reasonable number of days after its issuance to be established by the Secretary, reasonable costs of storage and other carrying charges, as determined by the Secretary, shall be deducted from the value of the certificate for the period beginning after such reasonable number of days and ending with the date of its presentation to the Commodity Credit Corporation.

(e) The Secretary of Agriculture shall take such measures as may be necessary to prevent the marketing or exchange of agricultural commodities and products for certificates under this section from adversely affecting the income of producers of such commodities or products.

(f) Under regulations prescribed by the Secretary of Agriculture, certificates issued to rice exporters under this section may be transferred to other exporters and persons approved by the Secretary.

(g) For any year or other period for which a payment-in-kind program is in effect under this section, the Secretary of Agriculture, for the purposes of calculating loan levels under section 101(i) of the Agricultural Act of 1949, shall consider the average market prices for such year or period to be increased by the average rate of payment under the program for such year or period if such average market prices are below the loan level for such year or period.

TITLE VIII—PEANUTS

SUSPENSION OF MARKETING QUOTAS AND ACREAGE ALLOTMENTS

SEC. 801. The following provisions of the Agricultural Adjustment Act of 1938 shall not be applicable to the 1986 through 1990 crops of peanuts:

(1) subsections (a) through (j) of section 358;

(2) subsections (a) through (h) of section 358a;

(3) subsections (a), (b), (d), and (e) of section 359;

(4) part I of subtitle C of title III; and

(5) section 371.

POUNDAGE QUOTAS

SEC. 802. Effective only for the 1986 through 1990 crops of peanuts, section 358 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1358) is amended by adding at the end thereof the following:

"(q) The national poundage quota for peanuts for each of the 1986 through 1990 marketing years shall be established by the Secretary at a level that is equal to the quantity of peanuts (in tons) that the Secretary estimates will be devoted in each such marketing year to domestic edible, seed, and related uses, except that the national poundage quota for any such marketing year shall not be less than one million one hundred thousand tons. The national poundage quota for a marketing year shall be announced by the Secretary not later than December 15 preceding such marketing year.

"(r) The national poundage quota established under subsection (q) of this section shall be apportioned among the States so that the poundage quota allocated to each State shall be equal to the percentage of the national poundage quota allocated to farms in the State for 1985.

"(s)(1) A farm poundage quota for each of the 1986 through 1990 marketing years shall be established—

"(A) for each farm that had a farm poundage quota for the 1985 marketing year; and

"(B) if the poundage quota apportioned to a State under subsection (r) of this section for any such marketing year is larger than such quota for the immediately preceding marketing year, for each other farm on which peanuts were produced for marketing in at least two of the three immediately preceding crop years, as determined by the Secretary.

The farm poundage quota for each of the 1986 through 1990 marketing years for each farm described in subparagraph (A) of the preceding sentence shall be the same as the farm poundage quota for such farm for the immediately preceding marketing year, as adjusted under paragraph (2) of this subsection, but not including any increases for undermarketings from previous years or any increases resulting from the allocation of

quotas voluntarily released for one year under paragraph (7) of this subsection. The farm poundage quota, if any, for each of the 1986 through 1990 marketing years for each farm described in subparagraph (B) of the first sentence of this paragraph shall be equal to the quantity of peanuts allocated to such farm for such year under paragraph (2) of this subsection. For the purposes of this paragraph, if the farm poundage quota, or any part thereof, is permanently transferred in accordance with section 358a of this Act, the receiving farm shall be considered as possessing the farm poundage quotas (or portion thereof) of the transferring farm for all subsequent marketing years.

"(2) If the poundage quota apportioned to a State under subsection (r) of this section for any of the 1986 through 1990 marketing years is increased over the poundage quota apportioned to the State for the immediately preceding marketing year, such increase shall be allocated equally to—

"(A) each farm in the State for which a farm poundage quota was established for the marketing year immediately preceding the marketing year for which the allocation is being made; and

"(B) each other farm in the State on which peanuts were produced in at least two of the three immediately preceding crop years, as determined by the Secretary.

If the poundage quota apportioned to a State under subsection (r) of this section for any of the 1987 through 1990 marketing years is decreased from the poundage quota apportioned to the State under such subsection for the immediately preceding marketing year, such decrease shall be allocated equally to each farm in the State for which a farm poundage quota was established for the marketing year immediately preceding the marketing year for which the allocation is being made.

"(3) The farm poundage quota established for a farm for any of the 1986 through 1990 marketing years shall be reduced, insofar as practicable and on such fair and equitable basis as the Secretary may by regulation prescribe, to the extent that the Secretary determines that the farm poundage quota established for the farm for any two of the three marketing years preceding the marketing year for which the determination is being made was not produced, or considered produced, on the farm. For the purposes of this paragraph, the farm poundage quota for any such preceding marketing year shall not include any increases for undermarketing of quota peanuts from previous years or any increase resulting from the allocation of quotas voluntarily released for one year under paragraph (7) of this subsection.

"(4) For purposes of this subsection, the farm poundage quota shall be considered produced on a farm if—

"(A) the farm poundage quota was not produced on the farm because of drought, flood, or any other natural disaster, or any other condition beyond the control of the producer, as determined by the Secretary; or

"(B) the farm poundage quota for the farm was released voluntarily under paragraph (7) of this subsection for only one of the three marketing years immediately preceding the marketing year for which the determination is being made.

"(5) Notwithstanding any other provision of law, the farm poundage quota established for a farm under this subsection, or any part of such quota, may be permanently released by the owner of the farm, or the operator with the permission of the owner, and the poundage quota for the farm for which such quota is released shall be adjusted downward to reflect the quota that is so released.

"(6) The total amount of the farm poundage quotas reduced or voluntarily released from farms in a State for any marketing year under paragraphs (3) and (5) of this subsection shall be allocated, as the Secretary may by regulation prescribe, to other farms in the State on which peanuts were produced in at least two of the three crop years immediately preceding the year for which such allocation is being made, except that not less than 25 per centum of such total amount of farm poundage quota in the State shall be allocated to farms for which no farm poundage quota was established for the immediately preceding year's crop.

"(7) The farm poundage quota, or any portion thereof, established for a farm for a marketing year may be voluntarily released to the Secretary to the extent that such quota, or any part thereof, will not be produced on the farm for the marketing year. Any farm poundage quota so released in a State shall be allocated to other farms in the State on such basis as the Secretary may by regulation prescribe. Any adjustment in the farm poundage quota for a farm under this paragraph shall be effective only for the marketing year for which it is made and shall not be taken into consideration in establishing a farm poundage quota for the farm from which such quota was released for any subsequent marketing year.

"(8) The farm poundage quota for a farm for any marketing year shall be increased by the number of pounds by which the total marketings of quota peanuts from the farm during previous marketing years (excluding any marketing year before the marketing year for the 1984 crop) were less than the total amount of applicable farm poundage quotas (disregarding adjustments for undermarketings from prior marketing years) for such marketing years, except that no increase for undermarketings in previous marketing years shall be made to the poundage quota for any farm to the extent that the quota on such farm for the marketing year was reduced under paragraph (3) of this subsection for failure to produce. Any increases in farm poundage quotas under this paragraph shall not be counted against the national poundage quota for the marketing year involved. Any increase in the farm poundage quota for a farm for a marketing year under this paragraph may be used during the marketing year by the transfer of additional peanuts produced on the farm to the quota loan pool for pricing purposes on such basis as the Secretary shall by regulation prescribe.

"(9) Notwithstanding the foregoing provisions of this subsection, if the total of all increases in individual farm poundage quotas under paragraph (8) of this subsection exceeds 10 per centum of the national poundage quota for the marketing year in which such increases shall be applicable, the Secretary shall adjust such increases so that the total of all such increases does not exceed 10 per centum of the national poundage quota.

"(t) For each farm for which a farm poundage quota is established under subsection (s) of this section, and when necessary for purposes of this Act, a farm yield of peanuts shall be determined for each such farm. Such yield shall be equal to the average of the actual yield per acre on the farm for each of the three crop years in which yields were highest on the farm out of the five crop years 1973 through 1977. If peanuts were not produced on the farm in at least three years during such five-year period or there was a substantial change in the operation of the farm during such period (including, but not limited to, a change in operator, lessee who is an operator, or irrigation practices), the Secretary shall have a yield appraised for the farm. The appraised yield shall be that amount determined to be fair and reasonable on the basis of yields established for similar farms that are located in the area of the farm and on which peanuts were produced, taking into consideration land, labor, and equipment available for the production of peanuts, crop rotation practices, soil and water, and other relevant factors.

"(u) Not later than December 15 of each calendar year, the Secretary shall conduct a referendum of farmers engaged in the production of quota peanuts in the calendar year in which the referendum is held to determine whether such farmers are in favor of or opposed to poundage quotas with respect to the crops of peanuts produced in the five calendar years immediately following the year in which the referendum is held, except that, if as many as two-thirds of the farmers voting in any referendum vote in favor of poundage quotas, no referendum shall be held with respect to quotas for the second, third, fourth, and fifth years of the period. The Secretary shall proclaim the result of the referendum within thirty days after the date on which it is held, and if more than one-third of the farmers voting in the referendum vote against quotas, the Secretary also shall proclaim that poundage quotas will not be in effect with respect to the crop of peanuts produced in the calendar year immediately following the calendar year in which the referendum is held.

"(v) For the purposes of this part and title I of the Agricultural Act of 1949—

"(1) 'quota peanuts' means, for any marketing year, any peanuts produced on a farm having a farm poundage quota, as determined in subsection (s) of this section, that are eligible for domestic edible use as determined by the Secretary, that are marketed or considered marketed from a farm, and that do not exceed the farm poundage quota of such farm for such year;

"(2) 'additional peanuts' means, for any marketing year (A) any peanuts that are marketed from a farm for which a farm poundage quota has been established and that are in excess of the marketings of quota peanuts from such farm for such year, and (B) all peanuts marketed from a farm for which no farm poundage quota has been established in accordance with subsection (s) of this section;

"(3) 'crushing' means the processing of peanuts to extract oil for food uses and meal for feed uses, or the processing of peanuts by crushing or otherwise when authorized by the Secretary; and

"(4) 'domestic edible use' means use for milling to produce domestic food peanuts (other than those described in paragraph (3) of this subsection) and seed and use on a farm, except that the Secretary may exempt from this definition seeds of peanuts that are used to produce peanuts excluded under section 359(c) of this Act, are unique strains, and are not commercially available.".

SALE, LEASE, OR TRANSFER OF FARM POUNDAGE QUOTA

SEC. 803. Effective only for the 1986 through 1990 crops of peanuts, section 358a of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1358a) is amended by adding at the end thereof the following:

"(k) The owner, or the operator with permission of the owner, of any farm for which

a farm poundage quota has been established under this Act may, subject to such terms, conditions, or limitations as the Secretary may prescribe, sell or lease all or any part of such poundage quota to any other owner or operator of a farm within the same county for transfer to such farm, except that any such lease of poundage quota may be entered into in the fall only if the quota has been planted on the farm from which the quota is to be leased and only under such terms and conditions as the Secretary may by regulation prescribe. The owner or operator of a farm may transfer all or any part of such farm's farm poundage quota to any other farm owned or controlled by such owner or operator that is in the same county or in a county contiguous to such county in the same State and that had a farm poundage quota for the preceding year's crop. Notwithstanding the foregoing provisions of this subsection, in the case of any State for which the poundage quota allocated to the State was less than ten thousand tons for the preceding year's crop, all or any part of a farm poundage quota may be transferred by sale or lease or otherwise from a farm in one county to a farm in another county in the same State.

"(l) Transfers (including transfer by sale or lease) of farm poundage quotas under this section shall be subject to the following conditions:

"(1) no transfer of the farm poundage quota from a farm subject to a mortgage or other lien shall be permitted unless the transfer is agreed to by the lienholders;

"(2) no transfer of the farm poundage quota shall be permitted if the county committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act determines that the receiving farm does not have adequate tillable cropland to produce the farm poundage quota;

"(3) no transfer of the farm poundage quota shall be effective until a record thereof is filed with the county committee of the county to which such transfer is made and such committee determines that the transfer complies with the provisions of this section; and

"(4) such other terms and conditions that the Secretary may by regulation prescribe.".

MARKETING PENALTIES; DISPOSITION OF ADDITIONAL PEANUTS

SEC. 804. Effective only for the 1986 through 1990 crops of peanuts, section 359 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1359) is amended by adding at the end thereof the following:

"(m)(1) The marketing of any peanuts for domestic edible use in excess of the farm poundage quota for the farm on which such peanuts are produced shall be subject to penalty at a rate equal to 140 per centum of the support price for quota peanuts for the marketing year (August 1 through July 31) in which such marketing occurs. The marketing of any additional peanuts from a farm shall be subject to the same penalty unless such peanuts, in accordance with regulations established by the Secretary, are—

"(A) placed under loan at the additional loan rate in effect for such peanuts under section 108B of the Agricultural Act of 1949 and not redeemed by the producers;

"(B) marketed through an area marketing association designated pursuant to section 108B(3)(A) of the Agricultural Act of 1949; or

"(C) marketed under contracts between handlers and producers pursuant to the provisions of subsection (q) of this section.

Such penalty shall be paid by the person who buys or otherwise acquires the peanuts from the producer, or if the peanuts are marketed by the producer through an agent, the penalty shall be paid by such agent, and such person or agent may deduct an amount equivalent to the penalty from the price paid to the producer. If the person required to collect the penalty fails to collect such penalty, such person and all persons entitled to share in the peanuts marketed from the farm or the proceeds thereof shall be jointly and severally liable for the amount of the penalty. Peanuts produced in a calendar year in which farm poundage quotas are in effect for the marketing year beginning therein shall be subject to such quotas even though the peanuts are marketed prior to the date on which such marketing year begins. If any producer falsely identifies or fails to certify planted acres or fails to account for the disposition of any peanuts produced on such planted acres, an amount of peanuts equal to the farm's average yield, as determined under section 358(t) of this Act, times the planted acres, shall be deemed to have been marketed in violation of permissible uses of quota and additional peanuts, and the penalty in respect thereof shall be paid and remitted by the producer.

"(2) The Secretary shall authorize, under such regulations as the Secretary shall prescribe, the county committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or reduce marketing penalties provided for under this subsection in cases in which such committees determine that the violations that were the basis of the penalties were unintentional or without knowledge on the part of the parties concerned. Errors in weight that do not exceed one-tenth of 1 per centum in the case of any one marketing document shall not be considered to be marketing violations except in cases of fraud or conspiracy.

"(n) Only quota peanuts may be retained for use as seed or for other uses on a farm and when so retained shall be considered as marketings of quota peanuts, except that the Secretary may exempt from consideration as marketings of quota peanuts seeds of peanuts that are used to produce peanuts excluded under subsection (c) of this section, are unique strains, and are not commercially available. Additional peanuts shall not be retained for use on a farm and shall not be marketed for domestic edible use, except as provided in subsection (r) of this section. Seed for planting of any peanut acreage in the United States shall be obtained solely from quota peanuts marketed or considered marketed for domestic edible use.

"(o) Upon a finding by the Secretary that the peanuts marketed from any crop for domestic edible use by a handler are larger in quantity or higher in grade or quality than the peanuts that could reasonably be produced from the quantity of peanuts having the grade, kernel content, and quality of the quota peanuts acquired by such handler from such crop for such marketing, such handler shall be subject to a penalty equal to 140 per centum of the loan level for quota peanuts on the quantity of peanuts that the Secretary determines are in excess of the quantity, grade, or quality of the peanuts that could reasonably have been produced from the peanuts so acquired.

"(p)(1) Except as otherwise provided in paragraph (2) of this subsection, the Secretary shall require that the handling and disposal of additional peanuts be supervised by agents of the Secretary or by area marketing associations designated pursuant to section 108B(3)(A) of the Agricultural Act of 1949.

"(2)(A) Supervision of the handling and disposal of additional peanuts by a handler shall not be required under paragraph (1) of this subsection if the handler agrees in writing, prior to any handling or disposal of such peanuts, to comply with provisions that the Secretary shall by regulation prescribe.

"(B) The regulations issued by the Secretary under subparagraph (A) of this paragraph shall include, but need not be limited to, the following provisions:

"(i) A handler of shelled peanuts may export peanuts classified by type in the following quantities (less such reasonable allowance for shrinkage as the Secretary may prescribe):

"(I) sound split kernel peanuts in an amount equal to twice the poundage of such peanuts purchased by the handler as additional peanuts;

"(II) sound mature kernel peanuts in an amount equal to the poundage of such peanuts purchased by the handler as additional peanuts less the amount of sound split kernel peanuts purchased by the handler as additional peanuts; and

"(III) the remaining quantity of total kernel content of peanuts purchased by the handler as additional peanuts and not crushed domestically.

"(ii) A handler shall ensure that any additional peanuts exported are evidenced by onboard bills of lading, or other appropriate documentation as may be required by the Secretary, or both.

"(iii) If a handler suffers a loss of peanuts as a result of fire, flood, or any other condition beyond the control of the handler, the portion of such loss allocated to contracted additional peanuts shall not be greater than the portion of the handler's total peanut purchases for the year attributable to contracted additional peanuts purchased for export by the handler during such year.

"(3) A handler shall submit to the Secretary adequate financial guarantees, as well as evidence of adequate facilities and assets, to ensure the handler's compliance with the obligation to export peanuts.

"(4) Quota and additional peanuts of like type and segregation or quality may, under regulations issued by the Secretary, be commingled and exchanged on a dollar value basis to facilitate warehousing, handling, and marketing.

"(5) The failure by a handler to comply with regulations issued by the Secretary governing the disposition and handling of additional peanuts shall subject the handler to a penalty at a rate equal to 140 per centum of the loan level for quota peanuts on the quantity of peanuts involved in the violation. A handler shall not be subject to a penalty for failure to export additional peanuts if such peanuts were not delivered to the handler.

"(6) If any additional peanuts exported by a handler are reentered into the United States in commercial quantities as determined by the Secretary, the importer thereof shall be subject to a penalty at a rate equal to 140 per centum of the loan level for quota peanuts on the quantity of peanuts reentered.

"(q) A handler may, under such regulations as the Secretary may issue, contract with producers for the purchase of additional peanuts for crushing or export or both. Any such contract shall be completed and submitted to the Secretary (or if designated by the Secretary, the area marketing association) for approval before August 1 of the year in which the crop is produced. Each such contract shall contain the final price to

be paid by the handler for the peanuts involved and a specific prohibition against the disposition of such peanuts for domestic edible or seed use.

"(r) Subject to the provisions of section 407 of the Agricultural Act of 1949, any peanuts owned or controlled by the Commodity Credit Corporation may be made available for domestic edible use in accordance with regulations established by the Secretary. Additional peanuts received under loan shall be offered for sale for domestic edible use at prices not less than those required to cover all costs incurred with respect to such peanuts for such items as inspection, warehousing, shrinkage, and other expenses, plus—

"(1) not less than 100 per centum of the loan value of quota peanuts if the additional peanuts are sold and paid for during the harvest season upon delivery by and with the written consent of the producer;

"(2) not less than 105 per centum of the loan value of quota peanuts if the additional peanuts are sold after delivery by the producer but not later than December 31 of the marketing year; or

"(3) not less than 107 per centum of the loan value of quota peanuts if the additional peanuts are sold later than December 31 of the marketing year.

For the period from the date additional peanuts are delivered for loan to March 1 of the calendar year following the year in which such additional peanuts were harvested, the area marketing association designated pursuant to section 108B(3)(A) of the Agricultural Act of 1949 shall have sole authority to accept or reject lot list bids when the sales price, as determined under this subsection, equals or exceeds the minimum price at which the Commodity Credit Corporation may sell its stocks of additional peanuts, except that the area marketing association and the Commodity Credit Corporation may agree to modify the authority granted by this sentence to facilitate the orderly marketing of additional peanuts.

"(s)(1) The person liable for payment or collection of any penalty provided for in this section shall be liable also for interest thereon at a rate per annum equal to the rate per annum of interest that was charged the Commodity Credit Corporation by the Treasury of the United States on the date such penalty became due.

"(2) The provisions of this section shall not apply to peanuts produced on any farm on which the acreage harvested for nuts is one acre or less if the producers who share in the peanuts produced on such farm do not share in the peanuts produced on any other farm.

"(3) Until the amount of the penalty provided by this section, other than a penalty on an importer under subsection (p)(6), is paid, a lien on the crop of peanuts with respect to which such penalty is incurred, and on any subsequent crop of peanuts subject to farm poundage quotas in which the person liable for payment of the penalty has an interest, shall be in effect in favor of the United States.

"(4) Notwithstanding any other provision of law, the liability for and the amount of any penalty assessed under this section shall be determined in accordance with such procedures as the Secretary by regulation may prescribe. The facts constituting the basis for determining the liability for or amount of any penalty assessed under this section, when officially determined in conformity with the applicable regulations prescribed by the Secretary, shall be final and conclusive and shall not be reviewable by any other officer or agency of the Government. Nothing in this section shall be construed as prohibiting any court of competent jurisdiction from reviewing any determination made by the Secretary with respect to whether such determination was made in conformity with the applicable law and regulations. All penalties imposed under this section shall for all purposes be considered civil penalties.

"(5) Notwithstanding any other provision of law, the Secretary may reduce the amount of any penalty assessed against handlers under this section if the Secretary finds that the violation upon which the penalty is based was minor or inadvertent, and that the reduction of the penalty will not impair the operation of the peanut program, except that the amount of any penalty imposed on a handler under this section that resulted from the failure to export contracted additional peanuts shall not be reduced by the Secretary.".

PRICE SUPPORT PROGRAM

SEC. 805. Effective only for the 1986 through 1990 crops of peanuts, the Agricultural Act of 1949 is amended by adding after section 108A the following:

"PRICE SUPPORT FOR 1986 THROUGH 1989 CROPS OF PEANUTS

"SEC. 108B. Notwithstanding any other provision of law—

"(1) the Secretary shall make price support available to producers through loans, purchases, and other operations on quota peanuts for each of the 1986 through 1990 crops. The national average quota support rate for the 1986 crop of quota peanuts shall be equal to the national average support rate established for the 1985 crop of quota peanuts, adjusted by the Secretary by a percentage equal to the percentage of any increase in the prices paid by farmers for commodities and services, interest, taxes, and wage rates during the period beginning with calendar year 1981 and ending with calendar year 1985, as determined by the Secretary. The national average quota support rate for each of the 1987 through 1990 crops of quota peanuts shall be the national average quota support rate for the immediately preceding crop, adjusted to reflect any increase, during the calendar year immediately preceding the marketing year for the crop for which a level of support is being determined, in the national average cost of peanut production, excluding any change in the cost of land, except that in no event shall the national average quota support rate for any such crop exceed by more than 6 per centum the national average quota support rate for the preceding crop. The levels of support so announced shall not be reduced by any deductions for inspection, handling, or storage. The Secretary may make adjustments for location of peanuts and such other factors as are authorized by section 403 of this Act. The Secretary shall announce the level of support for quota peanuts of each crop not later than February 15 preceding the marketing year for the crop for which the level of support is being determined;

"(2) the Secretary shall make price support available to producers through loans, purchases, or other operations on additional peanuts for each of the 1986 through 1990 crops at such levels as the Secretary finds appropriate, taking into consideration the demand for peanut oil and peanut meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets, except that the Secretary shall set the support rate on additional peanuts at a level estimated by the Secretary to ensure that there are no losses to the Commodity Credit Corporation on the sale or disposal of such peanuts. The Secretary shall announce the level of support for additional peanuts of each crop not later than February 15 preceding the marketing year for the crop for which the level of support is being determined;

"(3)(A) in carrying out paragraphs (1) and (2) of this section, the Secretary shall make warehouse storage loans available in each of the three producing areas (described in section 1446.60 of title 7 of the Code of Federal Regulations (January 1, 1985)) to a designated area marketing association of peanut producers that is selected and approved by the Secretary and that is operated primarily for the purpose of conducting such loan activities. The Secretary may not make warehouse storage loans available to any cooperative that is engaged in operations or activities concerning peanuts other than those operations and activities specified in this section and section 359 of the Agricultural Adjustment Act of 1938. Such area marketing associations shall be used in administrative and supervisory activities relating to price support and marketing activities under this section and section 359 of the Agricultural Adjustment Act of 1938. Loans made under this subparagraph shall include, in addition to the price support value of the peanuts, such costs as the area marketing association reasonably may incur in carrying out its responsibilities, operations, and activities under this section and section 359 of the Agricultural Adjustment Act of 1938;

"(B) the Secretary shall require that each area marketing association establish pools and maintain complete and accurate records by area and segregation for quota peanuts handled under loan and for additional peanuts placed under loan, except that separate pools shall be established for Valencia peanuts produced in New Mexico, and bright hull and dark hull Valencia peanuts shall be considered as separate types for the purpose of establishing such pools. Net gains on peanuts in each pool, unless otherwise approved by the Secretary, shall be distributed only to producers who placed peanuts in the pool and shall be distributed in proportion to the value of the peanuts placed in the pool by each producer. Net gains for peanuts in each pool shall consist of—

"(i) for quota peanuts, the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in such pool plus an amount from the pool for additional peanuts, to the extent of the net gains from the sale for domestic food and related uses of additional peanuts in the pool for additional peanuts equal to any loss on disposition of all peanuts in the pool for quota peanuts; and

"(ii) for additional peanuts, the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in the pool for additional peanuts less any amount allocated to offset any loss on the pool for quota peanuts as provided in clause (i).

"(4) notwithstanding any other provision of this section—

"(A) any distribution of net gains on additional peanuts shall be first reduced to the extent of any loss by the Commodity Credit Corporation on quota peanuts placed under loan; and

"(B)(i) the proceeds due any producer from any pool shall be reduced by the amount of any loss that is incurred with respect to peanuts transferred from an addi-

tional loan pool to a quota loan pool under the provisions of section 358(s)(8) of the Agricultural Adjustment Act of 1938; and

"(ii) losses in area quota pools other than losses incurred as a result of transfers from additional loan pools to quota loan pools under section 358(s)(8) of the Agricultural Adjustment Act of 1938, shall be offset by any gains or profits from pools in other production areas (other than separate type pools established under the first sentence of paragraph (3)(B) in such manner as the Secretary shall by regulation prescribe;

"(5) notwithstanding the foregoing provisions of this section or any other provision of law, no price support shall be made available by the Secretary for any crop of peanuts with respect to which poundage quotas have been disapproved by producers, as provided for in section 358(u) of the Agricultural Adjustment Act of 1938.".

REPORTS AND RECORDS

SEC. 806. Effective only for the 1986 through 1990 crops of peanuts, the first sentence of section 373(a) of the Agricultural Adjustment Act of 1938 is amended by inserting before "all brokers and dealers in peanuts" the following: "all farmers engaged in the production of peanuts,".

SUSPENSION OF CERTAIN PRICE SUPPORT PROVISIONS

SEC. 807. Section 101 of the Agricultural Act of 1949 (7 U.S.C. 1441) shall not be applicable to the 1986 through 1990 crops of peanuts.

TITLE IX—SOYBEANS

SOYBEAN PRICE SUPPORT

SEC. 901. Effective only for the 1986 through 1990 crops of soybeans, section 201 of the Agricultural Act of 1949 is amended by—

(1) inserting in the first sentence "soybeans," after "tung nuts,"; and

(2) adding at the end thereof the following:

"(g)(1) The price of soybeans shall be supported through loans and purchases during each of the five marketing years beginning with the 1986 marketing year at a level equal to 75 per centum of the simple average price received by farmers for soybeans for each of the preceding five marketing years, excluding the high and low valued years, except that in no event shall the Secretary establish a support price of less than $5.02 per bushel. Notwithstanding the foregoing provisions of this paragraph, if the Secretary determines (A) that the average price of soybeans received by producers in the previous marketing year (including the marketing year for the 1985 crop of soybeans) was not more than 105 per centum of the level of loans and purchases for soybeans for such marketing year, or (B) with respect to the 1986 crop only, that the level of loans or purchases computed under the foregoing provisions would discourage the exportation of soybeans and cause excessive stocks of soybeans in the United States, the Secretary may reduce the level of loans and purchases for soybeans for the marketing year by the amount the Secretary determines necessary to maintain domestic and export markets for soybeans, except that (subject to the following sentence) the level of loans and purchases may not be reduced by more than 10 per centum in any year nor below $4.50 per bushel. If the Secretary exercises the authority provided in the preceding sentence with respect to the level of loans and purchases for the 1986 crop of soybeans based on a determination that the level of loans and purchases computed under the first sentence of this paragraph would discourage the exportation of soybeans and cause excessive stocks of soybeans in the United States, the level of loans and purchases for such crop may not be reduced by more than 5 per centum. For the purposes of this subsection, the soybean marketing year shall be the twelve-month period beginning on September 1 and ending August 31. The Secretary shall make a preliminary announcement of the level of price support not earlier than thirty days in advance of the beginning of the market year based upon the latest information and statistics available when such level of price support is announced, and shall make a final announcement of such level as soon as full information and statistics are available on prices for the five years preceding the beginning of the marketing year. In no event shall such final level of support be announced later than October 1 of the marketing year for which the announcement applies; nor shall the final level of support be less than the level of support set forth in the preliminary announcement.

"(2) Notwithstanding any other provision of law, the Secretary shall not require participation in any production adjustment control program for soybeans or any other commodity as a condition of eligibility for price support for soybeans or allow the planting of soybeans for harvest on acreage set aside or diverted from production under any other Government program.".

"(3) For any crop of soybeans for which a national marketing certificate program is not in effect under title V, loans and purchases shall be made available to producers of soybeans as provided in this section.".

TITLE X—GENERAL COMMODITY PROVISIONS

Subtitle A—The Agricultural Efficiency and Equity Act of 1985

SHORT TITLE

SEC. 1001. This subtitle may be cited as the "Agricultural Efficiency and Equity Act of 1985".

ACREAGE BASE AND PROGRAM YIELD SYSTEM FOR THE WHEAT, FEED GRAIN, UPLAND COTTON, AND RICE PROGRAMS

SEC. 1002. The Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) is amended by inserting, after title V, as added by section 551 of this Act, the following:

"TITLE VI—ACREAGE BASE AND PROGRAM YIELD SYSTEM FOR THE WHEAT, FEED GRAIN, UPLAND COTTON, AND RICE PROGRAMS

"SEC. 601. The purpose of this title is to prescribe a system for establishing farm and crop acreage bases and program yields for the wheat, feed grain, upland cotton, and rice programs under this Act that is efficient, equitable, flexible, and predictable.

"DEFINITIONS

"SEC. 602. For purposes of this title—

"(1) the term 'program' means the farm and crop acreage base and program yield system established under this title;

"(2) the term 'program crop' means any crop of wheat, feed grains, upland cotton, or rice;

"(3) the term 'crop year' means the calendar year in which a crop is normally harvested, except that, in the case of a crop that is normally harvested in January, February, or March of any calendar year, the term 'crop year' with respect to such crop means the calendar year in which such crop is planted and during which substantially all growth occurs;

"(4) the term 'county committee' means the county committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act for the county in which the farm is located; and

"(5) the term 'cooperator' means any producer of any program crop who is considered a cooperator under the provisions of section 101(e).

"FARM ACREAGE BASES

"SEC. 603. (a) The Secretary shall provide, for each farm on which at least one program crop was produced during at least one of the five crop years immediately preceding the 1986 crop year, for the establishment and maintenance of farm acreage bases.

"(b)(1) The county committee shall determine the farm acreage base for any crop year beginning after the 1985 crop year for any farm referred to in subsection (a), which, except as otherwise provided in paragraph (2), shall be the number of acres equal to the total of—

"(A) the average of the total acres on the farm planted to wheat and feed grains for harvest (or considered as so planted under section 609) in each of the five crop years immediately preceding such crop year;

"(B) the average of the total acres on the farm planted to upland cotton and rice for harvest (or considered as so planted under section 609)—

"(i) (for each of the 1986 through 1988 crop years for which such base is being determined) in each of the preceding crop years beginning with the 1984 crop year; and

"(ii) (for each of the 1989 and succeeding crop years for which such base is being determined) in each of the five crop years immediately preceding such crop year; and

"(C) the average of the total acres on the farm otherwise considered, under section 609, as planted to program crops for harvest in each of the five crop years immediately preceding such crop year,

except that for each of the 1986 through 1988 crop years for which such base is being determined, such number of acres may not exceed the average acreage on the farm planted to program crops (or considered as so planted under section 609) for harvest during the two preceding crop years.

"(2) For the purpose of determining the farm acreage base for the 1986 crop year for any farm referred to in subsection (a), the county committee may construct a planting history for such farm if—

"(A) planting records for such farm for any of the five crop years preceding the 1986 crop year are incomplete or unavailable; or

"(B) during at least one but not more than four of the five crop years preceding the 1986 crop year of such crop, no program crop was produced on such farm.

Such planting history shall be established in a fair and equitable manner in accordance with regulations that the Secretary shall publish no later than sixty days after the date of enactment of the Food Security Act of 1985.

"CROP ACREAGE BASES

"SEC. 604. (a)(1) The Secretary shall provide for the establishment and maintenance of crop acreage bases for each program crop (including any program crop produced under an established practice of double cropping) produced on each farm referred to in section 603(a).

"(2) The sum of the crop acreage bases for all program crops produced on any farm for any crop year shall not exceed the farm acreage base for such farm for such crop year, except to the extent that the excess is due to an established practice of double cropping, as determined by the county committee and subject to such regulations as the Secretary

may prescribe. To the extent that, because of the different procedures for calculating crop acreage bases for wheat and feed grains and for upland cotton and rice provided for in subsection (b), the sum of crop acreage bases for the farm for a crop year would exceed the farm acreage base for the crop year but for the operation of the preceding sentence, the crop acreage bases for the farm shall be adjusted by the county committee, in consultation with the farm operator, so that the sum of the crop acreage bases does not exceed the farm acreage base.

"(b)(1) The county committee shall determine the crop acreage base for any program crop for any crop year beginning after the 1985 crop year for any farm referred to in section 603(a). Except as otherwise provided in subsection (a)(2), the crop acreage base for any program crop for any crop year beginning after the 1985 crop year for any farm referred to in section 603(a) shall be—

"(A) if the program crop is wheat or feed grains, the number of acres that is equal to the average of the number of acres on the farm planted to such crop for harvest (or considered as so planted under section 609) in each of the five crop years preceding such crop year; and

"(B) if the program crop is upland cotton or rice—

"(i) for each of the 1986 through 1988 crop years, the number of acres that is equal to the average of the number of acres on the farm planted to such crop for harvest (or considered as so planted under section 609) in each of the preceding crop years beginning with the 1984 crop year; and

"(ii) for each of the 1989 and succeeding crop years, the number of acres that is equal to the average of the number of acres on the farm planted to such crop for harvest (or considered as so planted under section 609) in each of the five crop years preceding such crop year.

"(2) For the purpose of determining the crop acreage base for any program crop for the 1986 crop year for any farm referred to in section 603(a), the county committee may construct a planting history for such crop if—

"(A) planting records for such crop for any of the five crop years preceding the 1986 crop year are incomplete or unavailable; or

"(B) during at least one but not more than four of the five crop years preceding the 1986 crop year, the program crop was not produced on the farm.

Such planting history shall be established in a fair and equitable manner in accordance with regulations that the Secretary shall publish no later than sixty days after the date of enactment of the Food Security Act of 1985.

"ADJUSTMENT OF CROP ACREAGE BASES BY PRODUCERS

"SEC. 605. (a) Any producer, by submitting notice to the county committee before the time specified in subsection (c) with respect to any crop year, may increase or decrease the crop acreage base for any program crop for the producer's farm for such crop year to the extent provided in subsection (b).

"(b)(1) An adjustment of any crop acreage base for any farm under subsection (a) (or, in the case of an adjustment in the crop acreage bases for two or more program crops, the sum of the number of acres by which each such crop acreage base is increased or decreased) may not exceed the number of acres that is equal to 10 per centum of the farm acreage base for such farm for such crop year, except that such adjustment (or the sum of the number of acres by which crop acreage bases are increased or decreased when bases for two or more program crops are adjusted) for the 1986 crop year may not exceed the number of acres that is equal to 20 per centum of the farm acreage base for such farm for such crop year. No such adjustment shall be construed to increase the farm acreage base for such farm for such crop year.

"(2) The Secretary may suspend, on a nationwide basis, any limitation contained in paragraph (1) with respect to the crop acreage base for any program crop if the Secretary determines that—

"(A) a short supply or other similar emergency situation exists with respect to the program crop; or

"(B) market factors exist that require the suspension of the limitation to achieve the purposes of the program.

"(c) Any notice under subsection (a) shall be submitted by the producer to the county committee before the first day of the sixty-day period ending on—

"(1) the final date required by law for the announcement by the Secretary of any acreage or supply control program with respect to the program crop for the crop year involved; or

"(2) in the case of—

"(A) wheat, July 1 of the year preceding such crop year;

"(B) feed grains, September 30 of the year preceding such crop year;

"(C) upland cotton, November 1 of the year preceding such crop year; and

"(D) rice, January 1 of such crop year,

whichever date occurs first with respect to the program crop.

"PROGRAM YIELDS

"SEC. 606. (a) The Secretary shall provide for establishing a program yield for each program crop for each crop year for any farm.

"(b)(1) The county committee shall determine the program yield for any program crop for any crop year beginning with the 1986 crop for any farm. Subject to paragraphs (2) and (3), and except as otherwise provided in subsection (d), the program yield for any program crop for any crop year for any farm shall be the average of the actual yield per harvested acre for the crop for such farm for each of the five crop years immediately preceding such crop year, excluding the crop year with the highest yield per harvested acre, the crop year with the lowest yield per harvested acre, and any crop year in which such crop was not planted on the farm.

"(2) The program yield for any program crop for any crop year for any farm shall not be more than 150 per centum nor, except as provided in paragraph (3), less than 90 per centum of the program yield for the crop for the immediately preceding crop year for the farm.

"(3) The program yield for any program crop for the 1986 crop year shall not be less than the yield established for the crop for the 1985 crop year under this Act.

"(c) Under such regulations as the Secretary may prescribe, the county committee for any county may adjust any program yield for any program crop for any farm within the county to the extent that the committee determines that—

"(1) a significant change in any farming practice on the farm will materially and permanently affect the yield for the crop on the farm, or

"(2) because of the occurrence of a natural disaster or other similar condition beyond the control of the producer, the program yield for the crop on the farm does not accurately reflect the productive potential of the farm.

"(d) In the case of any farm for which the actual yield per harvested acre for any program crop referred to in subsection (b)(1) for any crop year is not available, the county committee may assign the farm a yield for the crop for such crop year on the basis of actual yields for the crop for such crop year on farms that the committee determines are similar to such farm with respect to size, location, and farming practices.

"RESPONSIBILITIES OF COUNTY COMMITTEES

"SEC. 607. (a)(1) Effective for each of the 1986 and subsequent crop years, each county committee, at such time and in such manner as the Secretary may by regulation prescribe, shall request any producer who seeks to be considered a cooperator, or otherwise participate in the commodity programs under this Act, with respect to a farm for a crop year to specify the total number of acres on the farm planted to program crops for harvest in each of the five crop years immediately preceding such crop year, and the total number of acres on the farm planted to each program crop in each such crop year for harvest. Before the beginning of the crop year, the county committee shall—

"(A) establish or adjust the farm acreage base and each crop acreage base for the crop year for each such farm on the basis of such information; and

"(B) notify each such producer of the farm acreage base and each crop acreage base that shall apply to such farm for such crop year.

"(2) For each of the 1986 and subsequent crop years, each county committee in accordance with such regulations as the Secretary may prescribe, shall maintain records of the farm acreage base for each farm operated by a producer within the county and the crop acreage base for each program crop produced on each such farm.

"(3) The records of the farm acreage base and crop acreage base for a farm for the 1986 crop year shall reflect the determinations made under sections 603(b) and 604(b) and shall include—

"(A) any crop planting history for the farm, as submitted to the county committee by a producer who seeks to be considered a cooperator or otherwise participate in the commodity programs under this Act; and

"(B) any construction of planting history for the farm made by the county committee to the extent provided in sections 603(b)(2) and 604(b)(2).

"(b)(1) Effective for each of the 1986 and subsequent crop years, each county committee, at such time and in such manner as the Secretary may by regulation prescribe, shall request any producer who seeks to be considered a cooperator, or otherwise participate in the commodity programs under this Act, with respect to a farm for a crop year to supply such information as may be necessary for determining the program yield as provided in section 606 for any program crop produced on any farm within such county by the producer for the crop year. The county committee shall notify each producer of such determination for each crop year.

"(2) For each of the 1986 and subsequent crop years, each county committee in accordance with such regulations as the Secretary may prescribe, shall maintain records of the program yield for any program crop for any crop year for any farm operated by a producer within the county.

"(3) The records of program yield for any program crop for any crop year for a farm shall reflect the determinations made under section 606 and shall include—

"(A) any crop history for the five crop years immediately preceding the 1986 crop year, as submitted to the county committee by a producer who seeks to be considered a cooperator or otherwise participate in the commodity programs under this Act;

"(B) any construction of crop yield history for the farm made by the county committee to the extent provided in section 606(d);

"(C) the actual yield per harvested acre for the crop for the farm for the 1986 and each subsequent crop year; and

"(D) any adjustment in the program yield for the crop for the farm made by the county committee under section 606(c).

"NEW PRODUCERS AND SIMILAR SITUATIONS

"SEC. 608. Each county committee may provide for the establishment of a farm acreage base and crop acreage bases with respect to any farm located within the county if such farm acreage base and crop acreage bases cannot be established under sections 603 and 604. Such bases shall be established in a fair and equitable manner in accordance with regulations that the Secretary shall publish no later than sixty days after the date of enactment of the Food Security Act of 1985, except that no such bases shall be established for a farm if the producer on such farm is subject to sanctions under any provision of Federal law for cultivating highly erodible land or converted wetland.

"SPECIAL RULES

"SEC. 609. (a) For purposes of determining any farm acreage base or any crop acreage base under this title, the number of acres planted to any program crop in a crop year includes any acreage that, under any other provision of law, is reserved from production of a program crop for such crop year because of the participation of the producer in an acreage or crop limitation program under such provision of law (except to the extent that such acreage is planted to soybeans), including any acreage devoted to conserving uses, or planted to program crops not for harvest or to nonprogram crops (except soybeans), by a person participating in the program in excess of the acreage required to be reserved from production of the program crop for such crop year.

"(b) For purposes of determining any farm acreage base under this title, the number of acres planted to a program crop in a crop year also includes any acreage that—

"(1) is devoted by the producer to a conserving use during such crop year in the normal course of farming operations, as determined by the county committee under regulations that the Secretary shall publish no later than sixty days after the date of enactment of the Food Security Act of 1985;

"(2) the producer is unable to plant to such crop (or, if planted to such crop, is unable to harvest) during such crop year because of the occurrence of a natural disaster or other similar condition beyond the control of the producer, as determined by the county committee; or

"(3) except as provided in subsection (c), is planted to soybeans.

"(c) In any crop year that acreage planted and considered planted under the provisions of subsections (a) and (b) to all program crops on a farm, before the application of the rules under this subsection, would be determined to exceed the farm acreage base for the farm for such crop year, and such determination would not occur but for the planting of soybeans, a number of acres equal to the difference between (1) the total of (A) the acreage planted (and considered planted under the provisions of subsections (a) and (b)) to wheat, feed grains, upland cotton, and rice for the farm for such crop year and (B) the total acreage planted to soybeans, and (2) the farm acreage base for such farm for such crop year, shall not be considered planted under subsection (b)(3).

"(d) If a county committee determines that the occurrence of a natural disaster or other similar condition beyond the control of the producer prevented the planting of a program crop on any farm within the county (or substantially destroyed any such program crop after it had been planted but before it had been harvested), under such regulations as the Secretary may prescribe, the producer may plant any other crop, including any other program crop, on the acreage of such farm that, but for the occurrence of such disaster or other condition, would have been devoted to the production of such program crop. For purposes of determining the farm acreage base, the crop acreage base, or the eligibility of such producer to be considered a cooperator or otherwise participate in a commodity program under this Act, any acreage on the farm on which a substitute crop, including any program crop, is planted under this subsection shall be taken into account as if such acreage had been planted to the program crop for which the other crop was substituted.

"APPEAL PROCEDURE

"SEC. 610. The Secretary shall establish, by regulation, an appeal procedure under which a person who is adversely affected by any determination made under this title may seek administrative review of such determination.".

REPEAL OF OUTDATED PROGRAM PROVISIONS

SEC. 1003. (a) Effective beginning with the 1986 crop of wheat, feed grains, upland cotton, and rice, the Agricultural Adjustment Act of 1938 is amended by—

(1) striking out sections 326, 327, 328, 329, 330, 332, 333, 334, 334a, 335, 336, 338, 339, 342, 342a, 343, 344, 344a, 345, 346, 372(a), 379b, 379c, 379d, 379e, 379f, 379g, 379h, 379i, and 379j (7 U.S.C. 1326, 1327, 1328, 1329, 1441 note, 1332, 1333, 1334, 1334b, 1335, 1336, 1338, 1339, 1342, 1342a, 1343, 1344, 1344b, 1345, 1346, 1372a, 1379b, 1379c, 1379d, 1379e, 1379f, 1379g, 1379h, 1379i, and 1379j, respectively)

(2) in section 361 (7 U.S.C. 1361), striking out "corn, wheat, cotton, peanuts, and rice" and inserting in lieu thereof "and peanuts";

(3) in section 371(a) (7 U.S.C. 1371(a)), striking out "cotton, rice,", and striking out the comma after "peanuts";

(4) in section 371(b) (7 U.S.C. 1371(b)), striking out "cotton, rice,";

(5) in section 373 (7 U.S.C. 1373), striking out "corn, wheat, cotton, rice, peanuts," in subsection (b) and both places it appears in subsection (a), and inserting in lieu thereof "peanuts";

(6) section 374(b) (7 U.S.C. 1374(b)), striking out the phrase "farm acreage allotment" each time it appears and inserting in lieu thereof the phrase "crop acreage base";

(7) in the last sentence of section 374(c) (7 U.S.C. 1374(c)), inserting "or permitted acreage" after "allotment";

(8) in section 375(a) (7 U.S.C. 1375(a)), striking out "corn, wheat, cotton, rice, peanuts," and inserting in lieu thereof "peanuts";

(9) in section 377 (7 U.S.C. 1377)—

(A) striking out "(excluding any allotment released from the farm or reapportioned to the farm and any allotment provided for the farm pursuant to subsection (f)(7)(A) of section 344)"; and

(B) in the first proviso, striking out "or, in the case of upland cotton on a farm which qualified for price support on the crop produced in any such year under section 103(b) of the Agricultural Act of 1949, as amended, 75 per centum of the farm domestic allotment established under section 350 for any such year"; and

(10) in section 378 (7 U.S.C. 1378), adding at the end thereof the following:

"(g) In applying the provisions of this section to a farm for which a farm acreage base has been determined under the provisions of the Agricultural Efficiency and Equity Act of 1985, the word 'allotment', wherever it appears, shall be construed to mean 'farm acreage base and any crop acreage base comprised therein'.".

(b) Effective beginning with the 1986 crop of wheat, Public Law 74, 77th Congress, is repealed.

PRICE SUPPORT LEVELS FOR COOPERATORS UNDER PERMANENT LAW

SEC. 1004. (a) Effective beginning with the 1986 crops, the Agricultural Act of 1949 is amended by—

(1) in section 101 (7 U.S.C. 1441)—

(A) in the introductory paragraph, inserting "(with respect only to tobacco and peanuts)" before "producers have not disapproved marketing quotas for such crop"; and

(B) amending subsection (d)(3) to read as follows:

"(3) the level of price support to cooperators for any crop of peanuts for which marketing quotas have been disapproved by producers shall be 50 per centum of the parity price therefor; and no price support shall be made available for any crop of tobacco for which marketing quotas have been disapproved by producers;"; and

(C) in paragraph (5) of subsection (d), inserting "except with respect to wheat, corn, upland cotton, and rice," before "price support may be made";

(2) in section 103(a) (7 U.S.C. 1444(a))—

(A) in the first sentence, striking out "for which producers have not disapproved marketing quotas"; and

(B) in the third sentence, striking out "and in case marketing quotas are disapproved";

(3) in section 105 (7 U.S.C. 1444) striking out "producers" both places it appears and inserting in lieu thereof "cooperators";

(4) in section 107 (7 U.S.C. 1445a)—

(A) in paragraph (1), striking out "accompanied by domestic certificates" and inserting in lieu thereof "produced by a cooperator";

(B) striking out paragraphs (2), (3), (5), and (6); and

(C) redesignating paragraph (4) as paragraph (2); and

(5) amending section 408(b) (7 U.S.C. 1428(b)) to read as follows:

"(b) A 'cooperator' (1) with respect to wheat, feed grains, upland cotton, and rice, shall be a 'cooperator' as that term is defined in section 101(e) of this Act, and (2) with respect to any other basic agricultural commodity, shall be a producer on whose farm the acreage planted to the commodity does not exceed the farm acreage allotment for the commodity under title III of the Agricultural Adjustment Act of 1938.".

(b) Section 101 of the Agricultural Act of 1949 (7 U.S.C. 1441) is amended by adding after subsection (d) the following:

"(e)(1) Only a producer who is a cooperator for a crop shall be eligible for price support under any program carried out by the Secretary for rice, upland cotton, feed grains, or wheat for such crop under this section, or section 103(a), 105, or 107 of this Act, respectively.

"(2) A producer of wheat, feed grains, upland cotton, or rice shall be considered a cooperator for a crop of such commodity with respect to a farm if the producer has a farm acreage base for the crop year involved for the farm, and a crop acreage base for the crop year involved for each program crop (as defined in section 602(2) of this Act) produced on such farm, under title VI of this Act, and—

"(A) the number of acres on the farm planted to all program crops (as defined in section 602(2) of this Act) for harvest by such producer for such crop does not exceed the farm acreage base for such farm for the crop year involved, except to the extent that such excess is due to an established practice of double cropping, and

"(B) the number of acres on the farm planted to each program crop (as defined in section 602(2) of this Act) for harvest by such producer for the crop year involved does not exceed the crop acreage base for such program crop for such farm for such crop year.

"(3) The Secretary may suspend, on a nationwide basis, any farm acreage base limitation or any crop acreage base limitation with respect to a crop of a commodity under this subsection, if the Secretary determines that—

"(A) a short supply or other similar emergency situation exists with respect to any such commodity; or

"(B) market factors exist that require the suspension of any such limitation to achieve the purposes of the farm and crop acreage base and program yield system established under title VI of this Act.

"(4) Notwithstanding any other provision of this subsection, the Secretary may, on a nationwide basis, consider a producer a cooperator for any crop of rice, upland cotton, feed grains, or wheat produced on a farm by such producer if—

"(A) such producer has established and maintained a farm acreage base and a crop acreage base applicable to such commodity for such crop year on such farm, and

"(B) the number of acres on such farm planted to such commodity for harvest by such producer in such crop year does not exceed the crop acreage base for such commodity on such farm for such crop year.".

CONFORMING CHANGES

SEC. 1005. (a) Effective beginning with the 1986 crop of wheat, section 327 of the Food and Agriculture Act of 1962 (7 U.S.C. 1339b) is repealed.

(b) Effective beginning with the 1986 crops, the first sentence of section 706 of the Food and Agriculture Act of 1965 (7 U.S.C. 1305) is amended by striking out "feed grain" and inserting in lieu thereof the word "acreage".

(c) Effective beginning with the 1986 crop of upland cotton, section 506 of the Agriculture and Food Act of 1981 (7 U.S.C. 1342 note) is repealed.

Subtitle B—Miscellaneous Commodity Provisions

PAYMENT LIMITATIONS FOR WHEAT, FEED GRAINS, COTTON, AND RICE

SEC. 1011. Notwithstanding any other provision of law—

(1) The total amount of payments (excluding disaster payments) that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, extra long staple cotton, and rice shall not exceed $50,000 for each of the 1986 through 1990 crops.

(2) The total amount of disaster payments that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat and feed grains shall not exceed $100,000 for each of the 1986 through 1990 crops.

(3) The term "payments" as used in this section shall not include loans or purchases, nor any part of any payment that is determined by the Secretary of Agriculture to represent compensation for resource adjustment (excluding land diversion payments other than those diversion payments in kind made under section 103(i) or 101(j) of the Agricultural Act of 1949, as added by this Act, or section 1021 of this Act) or public access for recreation.

(4) If the Secretary of Agriculture determines that the total amount of payments that will be earned by any person under the program in effect for any crop will be reduced under this section, any acreage requirement established under a set-aside or acreage limitation program for the farm or farms on which such person will be sharing in payments earned under such program shall be adjusted to such extent and in such manner as the Secretary determines will be fair and reasonable in relation to the amount of the payment reduction.

(5) The Secretary of Agriculture shall issue regulations defining the term "person" and prescribing such rules as the Secretary determines necessary to ensure a fair and reasonable application of such limitation: Provided, That the provisions of this section that limit payments to any person shall not be applicable to lands owned by States, political subdivisions, or agencies thereof, so long as such lands are farmed primarily in the direct furtherance of a public function, as determined by the Secretary. The rules for determining whether corporations and their stockholders may be considered as separate persons shall be in accordance with the regulations issued by the Secretary on December 18, 1970, under section 101 of the Agricultural Act of 1970.

NONRECOURSE LOAN LIMIT

SEC. 1012. Effective with respect to the 1986 through 1990 crops of wheat, feed grains, soybeans, peanuts, and tobacco, section 405 of the Agricultural Act of 1949 (7 U.S.C. 1425) is amended by—

(1) designating the existing text thereof as subsection (a);

(2) striking out "No producer" in the first sentence and inserting in lieu thereof "Except as otherwise provided in subsection (b) of this section, no producer"; and

(3) adding at the end thereof the following:

"(b) For each of the 1986 through 1990 crops, the total amount of nonrecourse loans that a person may receive for wheat, feed grains, soybeans, peanuts, or tobacco under one or more of the annual programs established under this Act for such crop shall not exceed an amount that causes the total outstanding principal balance for the person for such nonrecourse loans for all such commodities of the crop to exceed $250,000. Any such loan to the person whenever the outstanding principal balance for the person for nonrecourse loans for such commodities is $250,000 shall be recourse in nature. The regulations defining the term 'person' and prescribing rules applicable to limitations issued under section 1011(5) of the Food Security Act of 1985 shall apply to the term 'person' as used in this subsection and the limitation established under this subsection, except that the term 'person', as used in this subsection, shall not include any association to which loans are made under sections 106A(b) and 108B(3) of this Act.".

EXTENSION OF THE NATIONAL AGRICULTURAL COST OF PRODUCTION STANDARDS REVIEW BOARD

SEC. 1013. (a) Subsection (c) of section 1006 of the Agriculture and Food Act of 1981 (7 U.S.C. 4102(c)) is amended to read as follows:

"(c) A person may serve as a member of the Board for one or more terms.".

(b) Section 1014 of the Agriculture and Food Act of 1981 (7 U.S.C. 4110) is amended by striking out "1985" and inserting in lieu thereof "1990".

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS FOR WHEAT AND FEED GRAINS

SEC. 1014. Effective only for the marketing years for the 1986 through 1990 crops, section 407 of the Agricultural Act of 1949 (7 U.S.C. 1427) is amended by—

(1) striking out in the third sentence the matter following the third colon and inserting in lieu thereof the following: "Provided, That the Corporation shall not sell any of its stocks of wheat, corn, grain sorghum, barley, oats, and rye, respectively, at less than 115 per centum of the current national average loan rate for the commodity, adjusted for such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate plus reasonable carrying charges.";

(2) striking out in the fifth sentence "current basic county support rate including the value of any applicable price-support payment in kind (or a comparable price if there is no current basic county support rate)" and inserting in lieu thereof the following: "current basic county loan rate (or a comparable price if there is no current basic county loan rate)"; and

(3) striking out in the seventh sentence ", but in no event shall the purchase price exceed the then current support price for such commodities" and inserting in lieu thereof the following: "or unduly affecting market prices, but in no event shall the purchase price exceed the Corporation's minimum sales price for such commodities for unrestricted use".

APPLICATION OF TERMS IN THE AGRICULTURAL ACT OF 1949

SEC. 1015. Effective only for the 1986 through 1990 crops of wheat, feed grains, upland cotton, and rice, section 408(k) of the Agricultural Act of 1949 (7 U.S.C. 1428(k)) is amended to read as follows:

"REFERENCES TO TERMS MADE APPLICABLE TO WHEAT, FEED GRAINS, UPLAND COTTON, AND RICE

"(k) References made in sections 402, 403, 406, 407, and 416 to the terms 'support price', 'level of support', and 'level of price support' shall be considered to apply as well to the level of loans and purchases for wheat, feed grains, upland cotton, and rice under this Act; and references made to the terms 'price support', 'price support operations', and 'price support program' in such sections and in section 401(a) shall be considered as applying as well to the loan and purchase operations for wheat, feed grains, upland cotton, and rice under this Act.".

NORMALLY PLANTED ACREAGE AND TARGET PRICES

SEC. 1016. Section 1001 of the Food and Agriculture Act of 1977 (7 U.S.C. 1309) is

amended by striking out "1985" in each place that it appears in subsections (a) and (b) and inserting in lieu thereof "1990".

HAYING AND GRAZING

SEC. 1017. (a) Section 109 of the Agricultural Act of 1949 (7 U.S.C. 1445d) is amended by—

(1) striking out "1985" in the first sentence of subsection (a) and inserting in lieu thereof "1990"; and

(2) effective beginning with the 1986 crops, striking out "farm program payment yield" in the first sentence of subsection (c) and inserting in lieu thereof "program yield".

(b) Effective beginning with the 1986 crops, the Agricultural Act of 1949 is amended by adding at the end thereof the following new section:

"SEC. 424. Notwithstanding any other provisions of this Act, in carrying out any acreage limitation, set-aside, or land diversion program under this Act for wheat, feed grains, upland cotton, or rice, the Secretary shall permit participating producers in any State to devote all or any part of the acreage diverted from production under the program to haying and grazing during the eight months of each year selected by the State committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act for such State: Provided, That a producer may not sell any hay or other crop harvested from the acreage devoted to haying and grazing under this section.".

SUPPLEMENTAL SET-ASIDE AND ACREAGE LIMITATION AUTHORITY

SEC. 1018. Effective for the 1986 through 1990 crops of wheat and feed grains, section 113 of the Agricultural Act of 1949 (7 U.S.C. 1445h) is amended to read as follows:

"SUPPLEMENTAL SET-ASIDE AND ACREAGE LIMITATION AUTHORITY

"SEC. 113. Notwithstanding any other provision of law or prior announcement made by the Secretary to the contrary, the Secretary may announce and provide for a set-aside or acreage limitation program under section 105C or 107D of this title for one or more of the 1986 through 1990 crops of wheat and feed grains if the Secretary determines that such action is in the public interest as a result of the imposition of restrictions on the export of any such commodity by the President or other member of the executive branch of Government. To carry out effectively a set-aside or acreage limitation program authorized under this section, the Secretary may make such modifications and adjustments in such program as the Secretary determines necessary because of any delay in instituting such program.".

NORMAL SUPPLY

SEC. 1019. Notwithstanding any other provision of law, if the Secretary of Agriculture determines that the supply of wheat, corn, upland cotton, or rice for the marketing year for any of the 1986 through 1990 crops of such commodity is not likely to be excessive and that program measures to reduce or control the planted acreage of the crop are not necessary, such a decision shall constitute a determination that the total supply of the commodity does not exceed the normal supply and no determination to the contrary shall be made by the Secretary with respect to such commodity for such marketing year.

MULTIYEAR SET-ASIDES

SEC. 1020. Notwithstanding any other provision of law—

(a) The Secretary of Agriculture may enter into multiyear set-aside contracts for a period not to extend beyond the 1990 crops. Such contracts may be entered into only as a part of the programs in effect for the 1986 through 1990 crops of wheat, feed grains, upland cotton, and rice, and only producers participating in one or more of such programs shall be eligible to contract with the Secretary under this section. Producers agreeing to a multiyear set-aside agreement shall be required to devote the set-aside acreage to vegetative cover capable of maintaining itself through such period to provide soil protection, water quality enhancement, wildlife production, and natural beauty. Grazing of livestock under this section shall be prohibited, except in areas of a major disaster, as determined by the President, if the Secretary finds there is a need for such grazing as a result of such disaster. Producers entering into agreements under this section shall also agree to comply with all applicable State and local laws and regulations governing noxious weed control.

(b) The Secretary of Agriculture shall provide cost-sharing incentives to farm operators for the establishment of vegetative cover, whenever a multiyear set-aside contract is entered into under this section.

(c) The Secretary of Agriculture may issue such regulations as the Secretary determines necessary to carry out this section.

(d) The Secretary of Agriculture shall carry out the program authorized by this section through the Commodity Credit Corporation.

COST REDUCTION OPTIONS

SEC. 1021. (a) Notwithstanding any other provision of law, whenever the Secretary of Agriculture determines that an action authorized under subsection (c), (d), or (e) of this section will reduce the total of the direct and indirect costs to the Government of a commodity program administered by the Secretary without adversely affecting income to small- and medium-sized producers participating in such program, the Secretary shall take such action with respect to the commodity program involved.

(b) In the announcement of the specific provisions of any commodity program administered by the Secretary of Agriculture, the Secretary shall include a statement setting forth which, if any, of the actions are to be initially included in the program, and a statement that the Secretary reserves the right to initiate at a later date any action not previously included but authorized by this section, including the right to reopen and change a contract entered into by a producer under the program if the producer voluntarily agrees to the change.

(c) When a nonrecourse loan program is in effect for a crop of a commodity, the Secretary of Agriculture may enter the commercial market to purchase such commodity if the Secretary determines that the cost of such purchases plus appropriate carrying charges will probably be less than the comparable cost of later acquiring the commodity through defaults on nonrecourse loans under the program.

(d) When the domestic market price of a commodity for which a nonrecourse loan program is in effect is insufficient to cover the principal and accumulated interest on a loan made under such program, thereby encouraging default by a producer, the Secretary of Agriculture may provide for settlement of such loan and redemption by the producer of the commodity securing such loan for less than the total of the principal and all interest accumulated thereon if the Secretary determines that such reduction in the settlement price will yield savings to the Government due to—

(1) receipt by the Government of a portion rather than none of the accumulated interest;

(2) avoidance of default; or

(3) elimination of storage, handling, and carrying charges on the forfeited commodity:

but the Secretary may not reduce the settlement price to less than the principal due on the loan.

(e) When a production control or loan program is in effect for a crop of a major agricultural commodity, the Secretary of Agriculture may at any time prior to harvest reopen the program to participating producers for the purpose of accepting bids from producers for the conversion of acreage planted to such crop to diverted acres in return for payment in kind from Commodity Credit Corporation surplus stocks of the commodity to which the acreage was planted, if the Secretary determines that (1) changes in domestic or world supply or demand conditions have substantially changed after announcement of the program for that crop, and (2) without action to further adjust production, the Government and producers will be faced with a burdensome and costly surplus. Such payments in kind shall not be included within the payment limitation of $50,000 per person established under section 1011 of this Act, but shall be limited to a total of $20,000 per year per producer for any one commodity.

(f) The authority provided in this section shall be in addition to, and not in place of, any authority granted to the Secretary of Agriculture under any other provision of law.

PRODUCER RESERVE PROGRAM FOR WHEAT AND FEED GRAINS

SEC. 1022. (a) Except as provided by subsection (b) of this section, effective beginning with the 1986 crops, section 110 of the Agricultural Act of 1949 (7 U.S.C. 1445e) is amended by—

(1) in the first sentence of subsection (a), striking out "and" after "supply" and inserting in lieu thereof a comma, and inserting before the period at the end thereof the following: ", and provide for adequate, but not excessive, carryover stocks to ensure a reliable supply of the commodities";

(2) in the third sentence of subsection (b)—

(A) in clause (1), striking out "nor more than five years" and inserting in lieu thereof ", with extensions as warranted by market conditions";

(B) in clause (4), striking out "before the market price for wheat or feed grains has reached" and inserting in lieu thereof "when the total amount of wheat or feed grains in storage under programs under this section is below the upper limits for such storage as set forth in clauses (A) and (B) of subsection (e)(2) and the market price for wheat or feed grains is below";

(C) in clause (5), striking out "a specified level, as determined by the Secretary" and inserting in lieu thereof "the higher of 140 per centum of the nonrecourse loan rate for the commodity or the established price for such commodity, as determined under title I of this Act";

(3) adding at the end of subsection (b) the following:

"Whenever—

"(A)(i) the total amount of wheat stored under storage programs established under this section is less than 17 per centum of the estimated total domestic and export usage of wheat during the then current marketing

year for wheat, as determined by the Secretary, or

"(ii) the total amount of feed grains stored under storage programs established under this section is less than 7 per centum of the estimated total domestic and export usage of feed grains during the then current marketing year for feed grains, as determined by the Secretary; and

"(B) the market price of the commodity, as determined by the Secretary, does not exceed 140 per centum of the nonrecourse loan rate for the commodity,

the Secretary shall encourage participation in the programs under this section by offering producers increased storage payments and loan levels, interest waivers, or such other incentives as the Secretary determines necessary to maintain the total amount of storage under the programs at the levels specified in clauses (A) and (B). The Secretary shall ensure that producers are afforded a fair and equitable opportunity to participate in each producer storage program, taking into account regional differences in the time of harvest."; and

(4) in subsection (e)—

(A) inserting "(1)" after "(e)";

(B) inserting before the period at the end of the second sentence the following: ", subject to the upper limits on the total amount of wheat and feed grains that may be stored under storage programs established under this section set out in paragraph (2)";

(C) striking out the third sentence; and

(D) adding at the end thereof the following:

"(2) Prior to the harvest of each crop of wheat and feed grains, the Secretary shall determine and establish upper limits on the total amount of wheat and feed grains that may be stored under storage programs established under this section to be effective during the marketing year for such crop, as follows:

"(A) The upper limit on the total amount of wheat that may be stored under such programs shall not exceed 30 per centum of the estimated total domestic and export usage of wheat during the marketing year for the crop of wheat, as determined by the Secretary;

"(B) the upper limit on the total amount of feed grains that may be stored under such programs shall not exceed 15 per centum of the estimated total domestic and export usage of feed grains during the marketing year for the crop, as determined by the Secretary; and

"(C) notwithstanding clauses (A) and (B), the Secretary may establish the upper limits at higher levels—not in excess of 110 per centum of the levels determined under clauses (A) and (B)—if the Secretary determines that the higher limits are necessary to achieve the purposes of this section.".

(b) The amendment made by subsection (a)(2)(B) of this section shall take effect with respect to any loan made under section 110 of the Agricultural Act of 1949 the date for repayment of which occurs after the date of enactment of this Act.

ADVANCE DEFICIENCY PAYMENTS

SEC. 1023. Effective for the 1986 through 1990 crops of wheat, feed grains, upland cotton, and rice, the Agricultural Act of 1949 is amended by inserting before section 108 the following:

"SEC. 107E. (a) Effective for each of the 1986 through 1990 crops of wheat, feed grains, upland cotton, and rice, if the Secretary establishes an acreage limitation or set-aside program for a crop of wheat, feed grains, upland cotton, and rice, under this title and determines that deficiency payments will likely be made for such commodity for such crop, the Secretary shall make available advance deficiency payments to producers who agree to participate in such program.

"(b) Advance deficiency payments under this section shall be made to producers under the following terms and conditions:

"(1) Payments shall be made available to producers with respect to any such crop as soon as practicable after October 1 of the calendar year in which the crop is harvested; but the Secretary, at the Secretary's discretion, may make payments available to any producer prior to such date at any time after the producer files notice of intention to participate in the program for the crop.

"(2) Payments shall be made available to producers in such amounts as the Secretary determines appropriate to encourage adequate participation in the program, except that the amount may not exceed an amount determined by multiplying (A) the estimated farm program acreage for the crop, by (B) the program yield for the crop, by (C) 50 per centum of the projected payment rate, as determined by the Secretary.

"(3) In any case in which the deficiency payment payable to a producer for a crop, as finally determined by the Secretary under this title is less than the amount paid to the producer as an advance deficiency payment for the crop under this section, the producer shall refund an amount equal to the difference between the amount advanced and the amount finally determined by the Secretary to be payable to the producer as a deficiency payment for the crop concerned.

"(4) If the Secretary determines under this title that deficiency payments will not be made available on a crop with respect to which advance deficiency payments have already been made under this section, the producers who received such advance payments shall refund such payments.

"(5) Any refund required under paragraph (3) or (4) shall be due at the end of the marketing year for the crop with respect to which such payments were made.

"(6) If a producer fails to comply with the requirements under the acreage limitation or set-aside program involved after obtaining an advance deficiency payment under this section, the producer shall repay, immediately, the amount of the advance, plus interest thereon in such amount as the Secretary shall prescribe by regulations.

"(c) The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(d) The Secretary shall carry out the program provided for in this section through the Commodity Credit Corporation.

"(e) The program provided for in this section shall be in addition to, and not in place of, any authority granted to the Secretary or the Commodity Credit Corporation under any other provision of law.".

DISCRETIONARY WHEAT AND FEED GRAIN EXPORT CERTIFICATE PROGRAMS

SEC. 1024. Effective for the 1986 through 1990 crops of wheat and feed grains, the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) is amended by inserting after section 107E, as added by section 1024 of this Act, the following:

"SEC. 107F. (a)(1) The Secretary may establish a program, applicable to any of the 1986 through 1990 crops of wheat or feed grains, to provide incentives for the export of any of such crops of wheat and feed grains from private stocks. The program for any such crop established under this subsection by the Secretary shall include the following terms:

"(A) The Secretary shall issue wheat or feed grain export certificates to producers to whom the Secretary makes loans and payments under section 107D or 105C, respectively, for a crop if such producers comply with the terms and conditions of the program for such crop.

"(B) Each such certificate shall bear a monetary denomination and a designation specifying a quantity of the crop of the commodity involved, selected by the Secretary.

"(C) The aggregate quantity of wheat or feed grains specified in all export certificates distributable to eligible producers of the crop involved shall be equal to—

"(i) the aggregate amount of wheat or feed grains produced by producers participating in the program for the crop under section 107D or 105C, as determined by multiplying the acreage planted by each such producer for harvest times the producer's program yield for the commodity; times

"(ii) an export production factor.

For purposes of this subparagraph, the export production factor for a crop shall be determined by the Secretary by dividing the quantity of such crop harvested domestically that the Secretary estimates will not be used domestically and will be available for export (excluding the portion of the crop expected to be added to carryover stocks) during the marketing year for such crop by the quantity of such crop that the Secretary estimates will be harvested domestically.

"(D) Wheat or feed grain export certificates shall be distributed among eligible producers in a manner that will ensure that each eligible producer receives certificates having an aggregate face value that represents an equal rate of return per unit of wheat or feed grains produced by such producer for such crop. For purposes of determining such rate of return, the Secretary shall take into consideration regional variations in the costs incurred by producers to market the commodity (including transportation costs).

"(E) An export certificate issued under this subsection shall be redeemed by the Secretary for a cash amount equal to the monetary denomination on such certificate (or, at the option of the Secretary, a quantity of the commodity involved having a current fair market value equal to such amount) only on presentation by a holder who exports a quantity of the crop involved (including processed wheat or feed grains) equal to the quantity designated in the certificate and only if the Secretary has not redeemed previously an export certificate issued under this subsection presented in connection with the particular wheat or feed grains so exported.

"(2) The Secretary shall carry out this subsection through the Commodity Credit Corporation. If sufficient funds are available to the Corporation, there shall be expended to carry out this subsection with respect to the export of the crop of wheat or feed grains involved an amount not less than the product of—

"(A) 21 cents for wheat, 11 cents for corn, and such amounts for grain sorghums, oats, and, if designated by the Secretary, barley as the Secretary determines fair and reasonable in relation to the amount specified for corn; times

"(B) the aggregate of the wheat or feed grain acreage planted to the commodity for harvest by producers participating in the program for the crop with respect to which

deficiency payments are available under section 107D or 105C of this Act; times

"(C) the average of the program yields for the crop.

"(3) Funds expended to carry out export certificate programs established under this subsection shall be in addition to, and not in place of, funds authorized by any other law to be expended to finance or encourage the export of wheat or feed grains.

"(4) For the purposes of facilitating the transfer of export certificates under this subsection, the Commodity Credit Corporation may buy and sell certificates in accordance with regulations prescribed by the Secretary.

"(b)(1) Effective for each of the 1986 through 1990 crops of wheat or feed grains, the Secretary may issue to eligible producers (who, for the purposes of this subsection, are producers of wheat or feed grains participating in the program under this Act for such crop who meet the requirements of paragraph (2)) export marketing certificates, denominated in bushels of wheat or feed grains, as applicable, for the crop, which shall be used, under such terms and conditions as the Secretary may prescribe consistent with the provisions of this subsection, as follows:

"(A) Not later than three months before the beginning of the marketing year for a crop of wheat or feed grains, the Secretary may issue to eligible producers that plant at least 50 per centum of the farm's wheat or feed grain crop acreage base for such crop, export marketing certificates to be applicable to such marketing year that, in the aggregate, shall equal the quantity of the commodity the Secretary estimates will be exported during the marketing year. Each such eligible producer shall receive certificates for a quantity of the commodity that bears the same ratio to the quantity of estimated exports as the producer's crop acreage base for that crop of the commodity bears to the aggregate total of all such eligible producers' crop acreage bases for that crop, rounded upward to the nearest full bushel.

"(B) The denomination of export marketing certificates shall be one bushel (with no accompanying cash face value), except that the Secretary may issue certificates in multiples of such denomination, and any certificate in the multiple of such denomination, may be exchanged by the producer, at the county Agricultural Stabilization and Conservation Service office, for certificates representing an equivalent quantity of the commodity in different multiples, to facilitate the operation of the program under this subsection. Each export marketing certificate shall designate the producer by name and the crop involved.

"(C) If seven months after the beginning of the marketing year for the crop, the Secretary determines that the amount of the commodity that will be exported during the marketing year for that crop will exceed the aggregate quantity of the commodity represented by ali the export marketing certificates so issued, the Secretary may issue additional export marketing certificates to producers that initially received certificates for the crop sufficient to cover the additional exports, such certificates to be apportioned among such producers so that each producer receives the same portion of the additional certificates issued that the producer received of the export certificates initially issued for the crop, as provided in subparagraph (A), rounded upward to the nearest full bushel.

"(D) Producers may convey export marketing certificates issued under this subsection to purchasers of the commodity involved sold by the producers at any time prior to the end of the marketing year for the crop described in the certificate. If a producer has less wheat or feed grains to sell than the quantity represented by the export marketing certificates issued to the producer, because of reduced production or other reason or because, in the case of additional certificates issued under subparagraph (C), the producer had disposed of the producer's wheat or feed grains prior to the issuance of such additional certificates, the producer, at any time prior to the end of the marketing year for the crop involved, may sell the extra export marketing certificates to any person for such price as agreed on by the producer and purchaser. Any certificate may be reconveyed without restriction.

"(2) To be eligible to receive export certificates under this subsection for a crop of wheat or feed grains, a producer of such commodity must participate in the program under this title for such crop, and—

"(A) if there is no acreage limitation or set-aside in effect for the crop, limit the acreage on the farm planted to the crop for harvest to the farm's wheat or feed grain crop acreage base, as applicable; or

"(B) if an acreage limitation is in effect for the crop, limit the acreage on the farm planted to the crop for harvest to the farm's wheat or feed grain crop acreage base, as applicable, reduced to the extent required under the acreage limitation program, and comply with any other terms of the acreage limitation program established by the Secretary; or

"(C) if a set-aside program is in effect for the crop, comply with the set-aside and other terms of the set-aside program established by the Secretary.

"(3) Whenever the Secretary issues certificates under this subsection for a crop of wheat or feed grains, no person may export wheat or wheat products, or feed grains or feed grain products, from the United States during the marketing year for the crop without surrendering to the Secretary, at the time of export, export marketing certificates for such crop representing the quantity of the commodity being exported or, in the case of wheat or feed grain products, the equivalent quantity of the commodity contained in the products being exported. Persons that fail to comply with the requirements of the preceding sentence shall be guilty of a misdemeanor and shall be subject, on conviction for each violation thereof, to a fine of not more than $25,000 or imprisonment for not to exceed one year, or both such fine and imprisonment. This paragraph shall not apply to exports of commodities or products owned by the Government of the United States or agencies and instrumentalities thereof, nor to commodities or products provided to the exporter by the Commodity Credit Corporation under an export development program.

"(4) Any person who falsely makes, issues, alters, forges, or counterfeits any export marketing certificate, or with fraudulent intent possesses, transfers, or uses any such falsely made, issued, altered, forged, or counterfeited export marketing certificate, shall be deemed guilty of a felony and on conviction thereof shall be subject to a fine of not more than $10,000 or imprisonment of not more than ten years, or both such fine and imprisonment.

"(5) For the purposes of facilitating the transfer of export certificates under this subsection, the Commodity Credit Corporation may buy and sell certificates in accordance with regulations prescribed by the Secretary.".

REQUIRED DISPOSITION OF SURPLUS COMMODITIES

SEC. 1025. If the Secretary of Agriculture determines that Government-owned food and feed stocks acquired by the Commodity Credit Corporation through nonrecourse loan programs under the Agricultural Adjustment Act of 1938 or the Agricultural Act of 1949 cannot be disposed of in normal domestic trade channels without impairment of the price support programs under such Acts or sold abroad at competitive world prices, the Commodity Credit Corporation, under regulations issued by the Secretary, shall dispose of such commodities for the purposes of emergency domestic food assistance, emergency humanitarian food needs in developing countries, market development, export enhancement, or other such appropriate uses.

NONCOMPLIANCE BASED ON EXCESS IDLED ACRES

SEC. 1026. Title IV of the Agricultural Act of 1949 is amended by adding, after section 424, as added by section 1017 of this Act, the following:

"SEC. 425. A producer who removes land from production under an acreage limitation or set-aside program for a crop of wheat, feed grains, cotton, or rice under this Act and who idles more land than is required by the provisions of the program shall not have such producer's payments under this Act for such crop reduced, nor be subject to any other monetary fine or penalty, for failure to plant the program crop on acres so idled or to accurately report planted and idled acres unless the Secretary finds by the preponderance of the evidence that the producer's acts were committed to obtain funds from the Government of the United States to which such producer was not entitled by law.".

ADVANCE RECOURSE COMMODITY LOANS

SEC. 1027. Effective for the 1986 through 1990 crops, the Agricultural Act of 1949 is amended by adding at the end thereof the following:

"SEC. 426. Notwithstanding any other provision of this Act, the Secretary may make advance recourse loans available to producers of the commodities of the 1986 through 1990 crops for which nonrecourse loans are made available under this Act if the Secretary finds that such action is necessary to ensure that adequate operating credit is available to producers. These recourse loans may be made available under such reasonable terms and conditions as the Secretary may prescribe, except that the Secretary shall require that a producer obtain crop insurance for the crop as a condition of eligibility for a loan.".

LIQUID FUELS

SEC. 1028. Section 423(a) of the Agricultural Act of 1949 (7 U.S.C. 1433b) is amended by striking out all after "the Commodity Credit Corporation", and inserting in lieu thereof the following: "the Corporation may, under terms and conditions established by the Secretary, make its accumulated stocks of agricultural commodities available, at no cost or reduced cost, to encourage the purchase of such commodities for the production of liquid fuels and agricultural commodity byproducts. In carrying out the program established by this section, the Secretary shall ensure, insofar as possible, that any use of agricultural commodities made available be made in such manner as to encourage increased use and avoid displacing usual marketings of agricultural commodities.".

Division B—Trade, Conservation, and Credit

TITLE XI—TRADE

Subtitle A—Public Law 480 and Use of Surplus Commodities in International Programs

TITLE II OF PUBLIC LAW 480—FUNDING LEVELS

SEC. 1101. Effective October 1, 1985, section 204 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1724) is amended by—

(1) striking out "$1,000,000,000" in the first sentence and inserting in lieu thereof "$1,200,000,000";

(2) striking out "calendar" both places it appears in the first sentence and inserting in lieu thereof "fiscal"; and

(3) inserting after the first sentence the following: "The President may waive the limitation in the preceding sentence if the President determines that such waiver is necessary to undertake programs of assistance to meet urgent humanitarian needs.".

TITLE II OF PUBLIC LAW 480—MINIMUM FOR FORTIFIED OR PROCESSED FOOD AND NONPROFIT AGENCY PROPOSALS

SEC. 1102. Effective October 1, 1985, title II of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721-1726) is amended by adding at the end thereof the following:

"SEC. 207. Not less than 75 per centum of the agricultural commodities made available for distribution in each fiscal year under this title for nonemergency programs shall be fortified or processed food. The President may waive the requirement under the preceding sentence, or make available a smaller percentage of fortified or processed food than required under the preceding sentence, during any fiscal year in which the President determines that the requirements of the programs established under this title will not be best served by the distribution of fortified or processed food in the amounts required under the preceding sentence. In making agricultural commodities available for distribution as provided in this section, the President shall consider the nutritional assistance to the recipients and benefits to the United States that would result from distributing such commodities in the form of processed milk and plant protein products, as well as fruit, nut, and vegetable products.

"SEC. 208. Any request by a nonprofit or voluntary agency for agricultural commodities for a nonemergency food program under this title shall include—

"(1) a statement of the intended use of any foreign currency proceeds generated by such agency through the use of commodities made available under this title for such program; and

"(2) a statement of any possible detrimental disruption of traditional cultural food consumption habits that might arise from the distribution of commodities under such program.".

EXTENSION OF THE PUBLIC LAW 480 AUTHORITIES

SEC. 1103. Section 409 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1736c) is amended by—

(1) striking out "1985" in the first sentence and inserting in lieu thereof "1990"; and

(2) in the second sentence—

(A) striking out "amendment" and inserting in lieu thereof "amendments"; and

(B) inserting "and the Food Security Act of 1985" after "Agriculture and Food Act of 1981".

FACILITATION OF EXPORTS

SEC. 1104. It is the sense of Congress that—

(1) the President should work with the People's Republic of China to facilitate the export of commodities, including dairy products and white wheat (in quantities sufficient to establish the quality of United States white wheat), to that country under the Agricultural Trade Development and Assistance Act of 1954 and section 416 of the Agricultural Act of 1949 with a view to increasing markets for those commodities in the People's Republic of China; and

(2) the President, to the extent practicable, should respond favorably to any request of the People's Republic of China seeking such receipt of commodities.

FARMER-TO-FARMER PROGRAM UNDER PUBLIC LAW 480

SEC. 1105. (a) Notwithstanding any other provision of law, not less than one-tenth of 1 percent of the funds available for each of the fiscal years ending September 30, 1986, and September 30, 1987, to carry out the Agricultural Trade Development and Assistance Act of 1954 shall be used to carry out paragraphs (1) and (2) of section 406(a) of that Act. Any such funds used to carry out paragraph (2) of section 406(a) shall not constitute more than one-fourth of the funds used as provided by the first sentence of this subsection, shall be used for activities in direct support of the farmer-to-farmer program under paragraph (1) of section 406(a), and shall be administered whenever possible in conjunction with programs under sections 296 through 300 of the Foreign Assistance Act of 1961.

(b) Not later than 120 days after the date of enactment of this Act, the Administrator of the Agency for International Development, in conjunction with the Secretary of Agriculture, shall submit to Congress a report indicating the manner in which the Agency intends to implement the provisions of paragraphs (1) and (2) of section 406(a) of the Agricultural Trade Development and Assistance Act of 1954 with the funds made available under subsection (a).

USE OF SURPLUS COMMODITIES IN INTERNATIONAL PROGRAMS

SEC. 1106. Effective October 1, 1985, section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) is amended by—

(1) striking out the last two sentences of subsection (a); and

(2) amending subsection (b) to read as follows:

"(b)(1) The Secretary, subject to the requirements of paragraph (10), may furnish eligible commodities for carrying out programs of assistance in developing countries and friendly countries under title II of the Agricultural Trade Development and Assistance Act of 1954, as approved by the Secretary, and for such purposes as are approved by the Secretary. To ensure that the furnishing of commodities under this subsection is coordinated with and complements other United States foreign assistance, assistance under this subsection shall be coordinated through the mechanism designated by the President to coordinate assistance under the Agricultural Trade Development and Assistance Act of 1954.

"(2) As used in this subsection, the term 'eligible commodities' means—

"(A) dairy products, grains, and oilseeds acquired by the Commodity Credit Corporation through price support operations that the Secretary determines meet the criteria specified in subsection (a); and

"(B) such other edible agricultural commodities as may be acquired by the Secretary of Agriculture or the Commodity Credit Corporation in the normal course of operations and that are available for disposition under this subsection, except that no such commodities may be acquired for the purpose of their use under this subsection.

"(3)(A) Commodities may not be made available for disposition under this subsection in amounts that (i) will, in any way, reduce the amounts of commodities that traditionally are made available through donations to domestic feeding programs or agencies, or (ii) will prevent the Secretary from fulfilling any agreement entered into by the Secretary under a payment-in-kind program under this Act or other Acts administered by the Secretary.

"(B) The requirements of section 401(b) of the Agricultural Trade Development and Assistance Act of 1954 shall apply with respect to commodities furnished under this subsection. Commodities may not be furnished for disposition to any country under this subsection except on determinations by the Secretary that (i) the receiving country has the absorptive capacity to use the commodities efficiently and effectively; and (ii) such disposition of the commodities will not interfere with usual marketings of the United States, nor disrupt world prices of agricultural commodities and normal patterns of commercial trade with developing countries.

"(C) The Secretary shall take reasonable precautions to ensure that—

"(i) commodities furnished under this subsection will not displace or interfere with sales that otherwise might be made; and

"(ii) sales or barter under paragraph (7) will not unduly disrupt world prices of agricultural commodities nor normal patterns of commercial trade with friendly countries.

"(4) Agreements may be entered into under this subsection to provide eligible commodities in installments over an extended period of time.

"(5)(A) Section 203 of the Agricultural Trade Development and Assistance Act of 1954 shall apply to the commodities furnished under this subsection.

"(B) The Commodity Credit Corporation may pay the processing and domestic handling costs incurred, as authorized under this subsection, in the form of eligible commodities, as defined in paragraph (2)(A), if the Secretary determines that such in-kind payment will not disrupt domestic markets.

"(6) The cost of commodities furnished under this subsection, and expenses incurred under section 203 of the Agricultural Trade Development and Assistance Act of 1954 in connection with those commodities, shall be in addition to the level of assistance programmed under that Act and shall not be considered expenditures for international affairs and finance.

"(7) Eligible commodities, and products thereof, furnished under this subsection may be sold or bartered only with the approval of the Secretary and solely as follows:

"(A) Sales and barter that are incidental to the donation of the commodities or products.

"(B) Sales and barter to finance the distribution, handling, and processing costs of the donated commodities or products in the importing country or in a country through which such commodities or products must be transshipped, or other activities in the importing country that are consistent with providing food assistance to needy people.

"(C) Sales and barter of commodities and products furnished to intergovernmental agencies or organizations, insofar as they are consistent with normal programming procedures in the distribution of commodities by those agencies or organizations.

"(D)(i) Sales of commodities and products furnished to nonprofit and voluntary agencies, or cooperatives, for food assistance under agreements that provide for the use, by the agency or cooperative, of foreign currency proceeds generated from such sale of commodities or products for the purposes established in clause (ii) of this subparagraph.

"(ii) Foreign currency proceeds generated from the sales of commodities and products under this subparagraph shall be used by nonprofit and voluntary agencies, or cooperatives, for activities carried out by the agency or cooperative that will directly supplement the transportation, distribution, and use of commodities and products donated under this subsection.

"(iii) Except as otherwise provided in clause (v), such agreements, taken together for each fiscal year, shall provide for sales of commodities and products for foreign currency proceeds in amounts that are, in the aggregate, not less than 5 per centum of the quantity of all commodities and products furnished for carrying out programs of assistance under this subsection in such fiscal year.

"(iv) Foreign currency proceeds generated from the sale of commodities or products under this subparagraph shall be expended within the country of origin within one year of acquisition of such currency, except that the Secretary may permit the use of such proceeds (I) in countries other than the country of origin as necessary to expedite the transportation of commodities and products furnished under this subsection and (II) after one year of acquisition as appropriate to achieve the purposes of clause (i).

"(v) The provisions of clause (iii) of this subparagraph establishing minimum annual allocations for sales and use of proceeds shall not apply to the extent that there have not been sufficient requests for such sales and use of proceeds nor to the extent required under paragraph (3).

"(E) Sales and barter to cover expenses incurred under paragraph (5)(a).

Except as otherwise provided in subparagraph (C), no portion of the proceeds or services realized from sales or barter under paragraph (7) may be used to meet operating and overhead expenses.

"(8)(A) To the maximum extent practicable, expedited procedures shall be used in the implementation of this subsection.

"(B) The Secretary shall issue regulations governing sales and barter, and the use of foreign currency proceeds, under paragraph (7) of this subsection that will provide reasonable safeguards to prevent the occurrence of abuses in the conduct of activities provided for in paragraph (7).

"(9) Not later than April 1, 1987, and annually thereafter, the Secretary shall report to Congress on sales and barters, and use of foreign currency proceeds, under paragraph (7) during the preceding fiscal year. Such report shall include information on—

"(A) the quantity of commodities furnished for such sale or barter;

"(B) the amount of funds (including dollar equivalents for foreign currencies) and value of services generated from such sales and barters in such fiscal year;

"(C) how such funds and services were used;

"(D) the amount of foreign currency proceeds that were used under agreements under subparagraph (D) of paragraph (7) in such fiscal year, and the percentage of the quantity of all commodities and products furnished under this subsection in such fiscal year such use represented;

"(E) the Secretary's best estimate of the amount of foreign currency proceeds that will be used, under agreements under subparagraph (D) of paragraph (7), in the then current fiscal year and the next following fiscal year (if all requests for such use are agreed to), and the percentage of the quantity of all commodities and products that the Secretary estimates will be furnished under this subsection in each such fiscal year that such estimated use represents;

"(F) the effectiveness of such sales, barter, and use during such fiscal year in facilitating the distribution of commodities and products under this subsection;

"(G) the extent to which sales, barter, or use displaces or interferes with commercial sales of United States agricultural commodities and products that otherwise would be made, or affects usual marketings of the United States, or disrupts world prices of agricultural commodities or normal patterns of trade with friendly countries, or discourages local production and marketing of agricultural commodities in the countries in which commodities and products are distributed under this subsection; and

"(H) the Secretary's recommendations, if any, for changes to improve the conduct of sales, barter, or use activities under paragraph (7).

"(10)(A) Subject to the limitations established under paragraph (3), the Secretary shall make available for disposition under this subsection in each of the fiscal years ending September 30, 1986, and September 30, 1987, not less than the minimum quantities of eligible commodities specified in subparagraph (B).

"(B) The minimum quantity of eligible commodities that shall be made available for disposition under this subsection in each fiscal year shall be (i) 1,000,000 metric tons in fiscal year 1986, and 600,000 metric tons in fiscal year 1987, of grains and oilseeds from the Corporation's uncommitted stocks, or an amount equal to 10 per centum of the Corporation's uncommitted stocks of grains and oilseeds as of the end of such fiscal year (as estimated by the Secretary), whichever is less, and (ii) 10 per centum of the Corporation's uncommitted stocks of dairy products, but not less than 150,000 metric tons of such products to the extent that uncommitted stocks are available. The Secretary shall make such estimation of expected year-end levels of the Corporation's uncommitted stocks prior to the beginning of the fiscal year. The Secretary's determination as to the amount of the Corporation's stocks that shall be made available for disposition under this subsection for such fiscal year shall be published in the Federal Register, along with a breakdown by kind of commodity and the quantity of each kind of commodity that shall be made available, before the beginning of such fiscal year.

"(C)(i) The Secretary may waive the minimum quantity requirements of subparagraphs (A) and (B) for a fiscal year—

"(I) to the extent that the Secretary determines and reports to Congress that there are not sufficient requests for eligible commodities under this subsection for such fiscal year; or

"(II) if the Secretary determines that the restrictions on the furnishing of commodities under paragraph (3) prevent the making available of commodities in such minimum quantities.

"(ii) For any fiscal year in which the minimum levels of uncommitted Commodity Credit Corporation stocks specified in subparagraph (B) are not made available and during which any requests for commodities under this subsection are rejected, the Secretary shall provide a detailed, written explanation to Congress, at the end of such fiscal year, of the reasons for the rejections of such requests.".

Subtitle B—Food Security Wheat Reserve

EXTENSION OF THE RESERVE

SEC. 1111. Section 302(i) of the Food Security Wheat Reserve Act of 1980 (7 U.S.C. 1637f–1(i)) is amended by striking out "1985" both places it appears and inserting in lieu thereof "1990".

Subtitle C—Maintenance and Development of Export Markets

TRADE POLICY DECLARATION

SEC. 1121. (a) Congress finds that—

(1) the volume and value of United States agricultural exports have significantly declined in recent years as a result of unfair foreign competition and the high value of the dollar;

(2) this decline has been exacerbated by the lack of uniform and coherent objectives in United States agricultural trade policy and the absence of direction and coordination in trade policy formulation;

(3) agricultural interests have been underrepresented in councils of government responsible for determining economic policy that has contributed to a strengthening of the United States dollar;

(4) foreign policy objectives of the United States have been introduced into the trade policy process in a manner injurious to the goal of maximizing United States economic interests through trade; and

(5) the achievement of that goal is in the best interests of the United States.

(b) It is hereby declared to be the agricultural trade policy of the United States to—

(1) provide through all means possible agricultural commodities and their products for export at competitive prices, with full assurance of quality and reliability of supply;

(2) support the principle of free trade and the promotion of fairer trade in agricultural commodities and their products;

(3) cooperate fully in all efforts to negotiate with foreign countries reductions in current barriers to fair trade;

(4) counter aggressively unfair foreign trade practices using all available means, including export restitution, export bonus programs, and, if necessary, restrictions on United States imports of foreign agricultural commodities and their products, as a means to encourage fairer trade;

(5) remove foreign policy constraints to maximize United States economic interests through agricultural trade; and

(6) provide for consideration of United States agricultural trade interests in the design of national fiscal and monetary policy that may foster continued strength in the value of the dollar.

AGRICULTURAL TRADE CONSULTATIONS

SEC. 1122. (a) To improve the orderly marketing of United States agricultural commodities, to achieve higher income for United States producers of agricultural commodities, and to reduce the likelihood of an agricultural commodity price war and the need for export subsidy programs, the Secretary of Agriculture shall, in coordination with the United States Trade Representative, confer with representatives of other major agricultural producing countries and, at the earliest possible date, initiate and pursue multilateral agricultural trade consultations among major agricultural producing countries.

(b) It is the sense of Congress that the objectives of the consultations called for in subsection (a) should be to—

(1) increase the exchange of information on worldwide agricultural production, demand, and commodity supply levels;

(2) determine a more equitable sharing of responsibility for maintaining agricultural commodity reserves and managing supplies of agricultural commodities; and

(3) attain increased cooperation in restraining export subsidy programs.

(c) The Secretary of Agriculture shall report to Congress by July 1, 1986, and annually thereafter, on the progress of efforts to initiate and pursue the consultations called for in subsection (a), including any agreements reached with respect to the objectives set forth in subsection (b).

DEPARTMENT OF AGRICULTURE EXPORT DEVELOPMENT PROGRAMS

SEC. 1123. (a) Effective for the fiscal year ending September 30, 1986, the Secretary of Agriculture may use $325,000,000 of funds of the Commodity Credit Corporation for direct export credit under the blended credit export sales program of the Department of Agriculture.

(b) Effective for the fiscal year ending September 30, 1986, the Secretary of Agriculture shall make available under the Export Credit Guarantee Program (GSM-102) carried out by the Commodity Credit Corporation credit guarantees for not less than $5,000,000,000 in short-term credit extended to finance export sales of United States agricultural commodities.

(c) Notwithstanding any other provision of law, the Secretary of Agriculture may not charge an origination fee with respect to any credit guarantee transaction under the Export Credit Guarantee Program (GSM-102) in excess of an amount equal to one-third of one percent of the credit extended under the transaction.

COOPERATOR MARKET DEVELOPMENT PROGRAM

SEC. 1124. (a) It is the sense of Congress that the cooperator market development program of the Foreign Agricultural Service should be continued to help develop new markets and expand and maintain existing markets for United States agricultural commodities, using nonprofit agricultural trade organizations to the maximum extent practicable.

(b) The cooperator market development program shall be exempt from the requirements of Circular A 110 issued by the Office of Management and Budget.

DEVELOPMENT AND EXPANSION OF MARKETS FOR UNITED STATES AGRICULTURAL COMMODITIES

SEC. 1125. (a)(1) Notwithstanding any other provision of law, effective for the period provided in subsection (h), the Secretary of Agriculture shall formulate and carry out a program under which agricultural commodities acquired by the Commodity Credit Corporation are provided to United States exporters, processors, or foreign purchasers, at no cost or reduced cost, to encourage the development and expansion of export markets for United States agricultural commodities.

(2)(A) The term "agricultural commodities", as used in this section in referring to United States agricultural commodities, includes, but is not limited to—

(i) wheat, feed grains, upland cotton, rice, soybeans, and dairy products produced in the United States;

(ii) any other agricultural commodity produced in the United States that is determined by the Secretary of Agriculture to be in surplus supply and that can be purchased with funds available under section 32 of the Act entitled "An Act to amend the Agricultural Adjustment Act, and for other purposes", approved August 24, 1935; and

(iii) products of the commodities and products described in clauses (i) and (ii) that are processed in the United States.

(B) United States agricultural commodities, as described in clause (ii) of subparagraph (A), may not be purchased with funds available under section 32 of the Act entitled "An Act to amend the Agricultural Adjustment Act, and for other purposes", approved August 24, 1935, for the sole purpose of use under the program under this section; and such commodities, or products thereof, may not be furnished to United States exporters, processors, or foreign purchasers under the program under this section except by mutual agreement of such exporter, processors, or purchaser and the Secretary.

(3) The Secretary of Agriculture—

"(A) shall provide agricultural commodities or cash, or both, under the program to the extent necessary, as determined by the Secretary,

(i) to counter or offset the adverse effect on United States exports of an agricultural commodity of export subsidies used by other countries to promote sales of that agricultural commodity, and

(ii) to reduce to world price levels, as determined by the Secretary, the cost to exporters (including the cost of acquisition, handling, and an amount that reflects a fair return to such exporters) of grain purchased for export by such exporters and accompanied by a marketing certificate as provided under title V of the Agricultural Act of 1949, and

(B) may provide agricultural commodities under the program—

(i) to compensate, in whole or in part, for the high value of the United States dollar relative to other currencies, to increase the competitiveness of United States agricultural commodities in world markets;

(ii) to compensate, in whole or in part, overseas purchasers that buy United States agricultural commodities on credit for any increases in the value of the United States dollar while such credit is outstanding;

(iii) to offset, in whole or in part, interest charges that accrue on credit purchases of United States agricultural commodities by export customers;

(iv) to offset, in whole or in part, transportation charges involved in the export of United States agricultural commodities;

(v) in barter or countertrade transactions in which United States agricultural commodities are exported in exchange for other commodities or products;

(vi) for overseas sale to obtain foreign currencies to finance overseas trade offices for the use and benefit of United States exporters and commodity groups working to expand exports of United States agricultural commodities; and

(vii) for any other comparable purpose that the Secretary determines appropriate to expand United States agricultural exports and ensure competitiveness in world markets for United States agricultural commodities.

(b) In carrying out the program established by this section, the Secretary of Agriculture—

(1) shall take such action as may be necessary to ensure that the program provides equal treatment to domestic and foreign purchasers and users of United States agricultural commodities in any case in which the importation into the United States of a manufactured product made, in whole or in part, from an agricultural commodity provided for export under the program would place domestic users of the agricultural commodity at a competitive disadvantage;

(2) may provide to a United States exporter, processor, or foreign purchaser, under the program, agricultural commodities of a kind different than the agricultural commodity involved in the transaction for which assistance under this section is being provided;

(3) may purchase, through the Commodity Credit Corporation, agricultural commodities for use under the program if Commodity Credit Corporation stocks are insufficient or not available for use under the program;

(4) shall consider for participation in the program all interested foreign purchasers, including those who have traditionally purchased United States agricultural commodities and who continue to purchase such commodities on an annual basis in quantities greater than the level of purchases in a previous representative period;

(5) shall ensure, insofar as possible, that any use of agricultural commodities made available under this section be made in such manner as to encourage increased use and avoid displacing usual marketings of United States agricultural commodities; and

(6) shall take reasonable precautions to prevent the resale or transshipment to other countries, or use for other than domestic use in the importing country, of agricultural commodities provided under this section.

(c) The Secretary of Agriculture shall carry out the program established by this section through the Commodity Credit Corporation.

(d) Any price restrictions that otherwise may be applicable to dispositions of agricultural commodities owned by the Commodity Credit Corporation shall not apply to agricultural commodities provided under this section.

(e)(1) In carrying out barter and countertrade transactions, as authorized under subsection (a)(3), the Secretary of Agriculture may acquire and hold strategic or other materials that the United States does not domestically produce in amounts sufficient for its requirements and for which national stockpile or reserve goals established by law are unmet, giving priority to materials that entail less risk of loss through deterioration and have lower storage costs than the agricultural commodities they replace. Each agency of the United States Government that procures strategic or other materials acquired under any such transaction shall reimburse the Commodity Credit Corporation for such procurement and otherwise cooperate with the Secretary in the conduct of the transaction.

(2) In addition to holding strategic and other materials to which title is acquired under such barter or countertrade transactions, the Secretary may (A) hold in storage strategic and other materials of the sort to which title may be so acquired even though it has not been (and impose a charge for costs incurred in storing such materials), and (B) issue negotiable warehouse receipts for such materials so stored to permit the use of such materials as collateral to secure loans to finance the export of United States agricultural commodities.

(f)(1) Except as otherwise expressly provided in this section, the Secretary of Agriculture shall aggressively administer the program under this section solely to develop and expand exports of United States agricultural commodities and maximize the total dollar return on such exports.

(2) The program under this section shall not be used to expand exports (A) to any country with which the United States does not have full diplomatic relations, except that the foregoing shall not be construed as preventing the Secretary from carrying out the program with the people of Taiwan under the provisions of the Taiwan Relations Act or (B) to any country against which an embargo on the export of United States agricultural commodities has been imposed by the President under law.

(3) The program under this section shall not be used to promote any goal of foreign policy of the United States other than those goals set forth in paragraph (1).

(g) Not later than March 1 of the second calendar year beginning after the date of the enactment of this Act, the Secretary of Agriculture shall report to Congress on the exports from the United States of agricultural commodities to each foreign country during the calendar years 1979 through 1982 and to each foreign country during the immediately preceding calendar year, and on the exports to each such country during the immediately preceding calendar year of agricultural commodities made available under the program under this section. The report shall also include, for the same time periods, information on exports to each such country of agricultural commodities produced outside the United States that are used for the same or similar purposes as exports of agricultural commodities to such country from the United States. For the purpose of the report, exports shall be listed by kind, value, and quantity, and for exports of agricultural commodities produced outside the United States, the country of origin shall be provided.

(h) The program under this section shall be in operation only during the marketing years for the 1985 through 1990 crops of agricultural commodities produced in the United States.

(i) The Secretary of Agriculture shall issue such regulations as are necessary to implement the provisions of this section, after consultation with the United States Trade Representative, not later than 60 days after the date of enactment of this Act.

(j) The program established under this section shall be in addition to, and not in place of, any authority granted to the Secretary of Agriculture or the Commodity Credit Corporation under any other provision of law.

EXPORT ADVISORY COUNCIL

SEC. 1126. (a) There is established an Export Advisory Council to advise the Secretary of Agriculture and the United States Trade Representative on how best to use the agricultural export development and expansion program established under section 1125.

(b) The Export Advisory Council shall be composed of the Secretary of Agriculture, the United States Trade Representative, and 12 other persons selected and appointed as follows:

(1) The Chairman and the ranking minority member of the Committee on Agriculture of the House of Representatives each shall appoint three members to the Council; and the Chairman and the ranking minority member of the Committee on Agriculture, Nutrition, and Forestry of the Senate each shall appoint three members to the Council; and

(2) The 12 members so appointed shall be selected from among persons with experience and skills in world trade in agricultural commodities and products thereof.

(c) The members of the Export Advisory Council shall be appointed not later than 60 days after the date of enactment of this Act. A vacancy in the membership of the Council shall be filled in the same manner as the original appointment.

(d)(1) Each member of the Export Advisory Council who is not otherwise a fulltime employee of the Federal Government shall receive for each day such member is engaged in the performance of the functions of the Council the daily equivalent of the annual rate of basic pay payable for level V of the Executive Schedule under section 5316 of title 5 of the United States Code.

(2) Each member of the Council shall be reimbursed for actual and necessary travel expenses incurred while away from such member's home or regular place of business and engaged in the performance of the functions of the Council in the same manner and to the same extent as provided under section 5703 of title 5 of the United States Code.

(e) The Secretary of Agriculture shall chair the Export Advisory Council, except that, in the Secretary's absence, the United States Trade Representative shall chair the Council.

(f) The Export Advisory Council shall meet not less frequently than once every two months. The Council shall review in detail the functioning of the agricultural export development and expansion program under section 1123, including any proposal (whether or not acted on) for use of the program that has been submitted to the Secretary, and make such recommendations for improvements in the operations of the program as the Council deems appropriate.

(g) The Export Advisory Council shall report semiannually to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives on the state of the program under section 1123 and its operations. Each member of the Council shall have the opportunity to review each such report before its submission to the Committees and to have appended to the report, as an addendum, any comments such member may make on the report or on the operations of the program.

(h) On request of the Export Advisory Council, the Secretary of Agriculture shall furnish the Council with such personnel and support services as are necessary to assist the Council in carrying out its duties and functions.

(i) The term of the Export Advisory Council shall expire at the time that the agricultural export development and expansion program under section 1125 ceases operation.

AGRICULTURAL EXPORT CREDIT REVOLVING FUND

SEC. 1127. Section 4(d) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(d)) is amended by—

(1) in paragraph (1)(A), striking out "three" and inserting in lieu thereof "ten";

(2) in paragraph (2), striking out all that follows "fund" and inserting in lieu thereof the following: "to extend credit for purposes of market development and expansion and to meet credit competition for export sales.";

(3) striking out the second sentence of paragraph (4), and inserting in lieu thereof the following: "All funds received by the Corporation in payment for direct credit extended by the Corporation after September 30, 1985, including interest or other receipts on investments and credit obligations, in financing export sales shall be added to and become a part of such revolving fund.";

(4) striking out "1985" both places it appears in paragraph (6) and inserting in lieu thereof "1990"; and

(5) striking out paragraph (8).

INTERMEDIATE CREDIT FOR AGRICULTURAL EXPORTS

SEC. 1128. Section 4(b) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(b)) is amended by—

(1) adding at the end of paragraph (1) the following: "Such financing may consist of the provision of direct credit or guaranteeing the repayment of loans made by entities other than the Corporation to finance such sales.";

(2) in paragraph (2)—

(A) striking out "or" at the end of clause (A);

(B) striking out the period at the end and inserting in lieu thereof "; or"; and

(C) adding at the end thereof the following:

"(C) otherwise promote the export of United States agricultural commodities.";

(3) in paragraph (3)—

(A) striking out "and" at the end of clause (C);

(B) striking out "credit" in clause (D);

(C) striking out the period at the end and inserting in lieu thereof "; and"; and

(D) adding at the end thereof the following:

"(E) otherwise to promote the export of United States agricultural commodities.";

(4) in paragraph (4), striking out "to encourage credit competition, or";

(5) in paragraph (5)—

(A) inserting "through the provision of direct credit" after "subsection"; and

(B) amending paragraph (A) to read as follows:

"(A) Repayment shall be in dollars with interest at a rate determined by the Secretary, except that the Secretary may permit a purchaser to make repayment in other currencies of a portion—not to exceed 10 per centum—of the principal and interest payments under any financing arrangement entered into under paragraph (3)(C), and the Secretary may use such portion of the principal and interest payments for the purpose of developing markets for agricultural products of the United States in the purchaser's country, in cooperation with the private sector."; and

(6) inserting at the end thereof the following:

"(10) The Secretary shall make available for the financing of transactions under this subsection not less than $500,000,000 for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990, of which not less than $150,000,000 shall be available, for each such fiscal year, for financing arrangements entered into under paragraph (3)(C). Not less than 25 per centum of the funds provided in any fiscal year for the financing of transactions under this subsection shall be made available for financing that consists of the provision of direct credit.".

MARKET EXPANSION RESEARCH

SEC. 1129. The Secretary of Agriculture, using available funds, shall increase and intensify research programs conducted by or for the Department of Agriculture that are directed at developing technology to overcome barriers to expanded sales of United States agricultural commodities and the products of such commodities in foreign markets, including research programs for the development of procedures to meet plant quarantine requirements and improvement in the transportation and handling of perishable agricultural commodities.

EXPORT SUBSIDY REPORTS

SEC. 1130. (a) Congress finds that—

(1) aggressive trading practices on the part of foreign competitors are eroding the sales of United States agricultural commodities and the products of such commodities in traditional foreign markets of the United States and are inhibiting the expansion of sales of such commodities and products in other foreign markets;

(2) export subsidies by foreign governments have severely undercut the sale of United States agricultural commodities and products in Third World country markets; and

(3) accurate, adequate, and current data on the nature and extent of such subsidies have not been readily available to appropriate United States officials or to agricultural sectors in the United States affected by such subsidies.

(b) The Secretary of Agriculture shall require appropriate officers and employees of the Department of Agriculture stationed in foreign countries to prepare and submit annually, directly to the Secretary, detailed information documenting the nature and extent of programs in such countries that provide direct government support for the export of agricultural commodities and the products of such commodities. The Secretary shall also require such reports to identify opportunities for the export of United States agricultural commodities and the products of such commodities to the foreign countries in which the officers and employees are stationed.

(c) The Secretary of Agriculture shall compile the information contained in the reports each year and make such information available to Congress and to other interested parties.

CONTRACT SANCTITY

SEC. 1131. It is hereby declared to be the policy of the United States—

(1) to foster and encourage the export of agricultural commodities and the products of such commodities;

(2) not to restrict or limit the export of such commodities and products except under the most compelling circumstances;

(3) that any prohibition or limitation on the export of such commodities or products should be imposed only in time of a national emergency declared by the President under the Export Administration Act; and

(4) that contracts for the export of such commodities or products entered into before the imposition of any prohibition or limitation on the export of such commodities or products should not be abrogated.

Subtitle D—Transportation Charges For Waterborne Cargoes of Donated Commodities

LIMITATION ON REQUIREMENTS

SEC. 1141. Section 5 of the Commodity Credit Corporation Charter Act (15 U.S.C. 714c) is amended by adding at the end thereof the following: "Export activities of the Corporation under this Act and activities of the Corporation or the Department of Agriculture to promote the export of agricultural commodities under any other Act shall not be subject to cargo preference requirements, except to the extent otherwise required for exports under the Agricultural Trade Development and Assistance Act of 1954.".

Subtitle E—Agricultural Imports

CONSULTATIONS ON IMPORT RESTRICTIONS

SEC. 1151. Before relaxing or removing a restriction on the importation of an agricultural commodity into the United States, the authority within the Department of Agriculture proposing that relaxation or removal shall consult with all other appropriate authorities within the Department of Agriculture, including the Foreign Agricultural Service and the Animal and Plant Health Inspection Service.

STUDY

SEC. 1152. (a) The Secretary of Agriculture, in conjunction with the United States Trade Representative, not later than 120 days after the date of enactment of this Act, shall complete a study to determine—

(1) the effect of apricot imports into the United States on the domestic apricot industry; and

(2) the extent and nature of apricot subsidies existing in the countries from which such apricot imports are derived.

(b) The Secretary shall report the results of the study conducted under subsection (a), as soon as the study is completed, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

FINDINGS

SEC. 1153. Congress finds that—

(1) world trade in agricultural commodities has stagnated in recent years, and at the same time the United States has lost a considerable portion of its market share of such trade;

(2) since 1981 the decline in exports of United States agricultural commodities has amounted to a reduction of $10,000,000,000 and twenty-five million tons, a reduction of some 25 per centum in the export contribution to farm income;

(3) in part as a result of the loss of export markets, the farm economy in the United States has been in serious economic distress that has reached beyond the farmer and affected the businesses that serve the farmer and the entire economy of rural America as well;

(4) an increase in world trade in agricultural commodities and in the United States' share of such trade is essential to a healthy farm economy, since exports have accounted for over one-third of the demand for agricultural commodities;

(5) the reduction in exports is attributable to a number of factors, including, among others, the high value of the dollar, unfair trading practices used by other countries to the detriment of the United States, and severe financial problems in many developing countries that have restricted the purchasing power in those countries;

(6) there are many legislative authorities available to the United States that, if used creatively, could reverse this trend in exports and make a major long-term contribution toward increasing exports of agricultural commodities—authorities in existing law and new authorities provided under this Act;

(7) these authorities include programs to make commercial exports more competitive in world markets with exports of other countries, to develop new commercial markets, and to offset unfair trading practices of third countries, as well as programs to provide food assistance to developing countries to help their economies grow so that they may become larger markets for United States exports of agricultural commodities;

(8) the countries with the greatest potential for long-term growth in United States agricultural exports are the developing nations where three-fourths of the world's people live, many of them chronically hungry and subject to food emergencies. These are also countries where increased incomes readily translate into increased food and fiber consumption;

(9) the crisis in rural America calls for new initiatives on the part of the United States to apply long-range sustained planning in the use of its exports and food aid authorities that would enable this Nation to make maximum use of its agricultural and related resources;

(10) to accomplish these objectives, it is essential to identify those countries that have the greatest long-term economic growth potential, to treat each country as a unique market, and to coordinate and integrate the legislative authorities available to the United States in a manner that addresses the specific need of each country; and

(11) it is necessary for the President to appoint a Special Assistant for Agricultural Exports and Food Aid to provide improved long-term coordination and planning of efforts among United States Government agencies administering the commercial and foreign assistance programs and to provide integrated direction for these programs.

SPECIAL ASSISTANT FOR AGRICULTURAL EXPORTS AND FOOD AID

SEC. 1154. (a) In order to implement the findings set forth in section 1153, the President shall appoint, with the advice and consent of the Senate, a Special Assistant for Agricultural Exports and Food Aid, who shall hold office at the pleasure of the President, and shall have the rank of Ambassador. The Special Assistant for Agricultural Exports and Food Aid shall report directly to the President and the Congress.

(b) The Special Assistant for Agricultural Exports and Food Aid shall have overall responsibility for developing and coordinating a long-term international agricultural policy for utilizing the agricutural and related resources of the United States and its export and food aid programs in maximizing exports of agricultural commodities and products thereof consistent with economic and humanitarian objectives, and preparing reports as provided in subsection (c). The Special Assistant shall coordinate activities as provided under this section in consultation with the Secretary of Agriculture, the Secretary of State, the United States Trade Representative, and the Administrator of the Agency for International Development.

(c) Not later than one year after the date of enactment of this Act, the Special Assistant for Agricultural Exports and Food Aid shall submit to the President and the Congress a report that—

(1) contains a global analysis that evaluates future production and food needs in the world, with special attention to the developing countries;

(2) identifies a minimum of fifteen target countries that are most likely to emerge as growth markets for agricultural commodities and products thereof in the next five to ten years; and

(3) contains a detailed plan for using available export and food aid authorities to increase United States exports of agricultural commodities and products thereof to each of such target countries, and specifies the particular export and food aid authorities to be used in each such country and the manner in which such authorities are to be used. Each year thereafter the Special Assistant shall submit a revised report to the President and the Congress that evaluates the progress made in implementing the plan, contains any changes that need to be made in the plan based on changed conditions, and recommends any changes in legislative authorities that are needed to accomplish the objectives of this section.

(d) The Special Assistant for Agricultural Exports and Food Aid may for the purpose of carrying out functions under this section—

(1) subject to the civil service and classification laws, appoint, employ, and fix the compensation of such officers and employees as are necessary, but not to exceed fifteen full-time employees, and prescribe their authority and duties;

(2) employ experts and consultants in accordance with section 3109 of title 5, United States Code, and compensate individuals so employed for each day (including travel time) at rates not in excess of the maximum rate of pay for grade GS-18 as provided in section 5332 of title 5, United States Code, and while such experts and consultants are so serving away from their homes or regular places of business, to pay such employees travel expenses and per diem in lieu of subsistence at rates authorized by section 5703 of title 5, United States Code, for persons in Government service intermittently employed;

(3) utilize, with their consent, the services, personnel and facilities of other Federal agencies;

(4) enter into and perform such contracts, leases, cooperative agreements, or other transactions as may be necessary in the conduct of the work under this section and on such terms as the Special Assistant may deem appropriate, with any agency or instrumentality of the United States, or with any public or private person, firm, association, corporation, or institution;

(5) accept voluntary and uncompensated services, notwithstanding the provisions of section 1342 of title 31, United States Code; and

(6) promulgate such rules and regulations as may be necessary to carry out the functions, powers, and duties vested in the Special Assistant.

(e) Effective October 1, 1985, there are authorized to be appropriated to the Office of the Special Assistant for Agricultural Exports and Food Aid for each fiscal year such sums as are necessary to carry out the provisions of this section.

TITLE XII—RESOURCE CONSERVATION

Subtitle A—Conservation of Highly Erodible Land and Wetlands

DEFINITIONS

SEC. 1201. As used in this subtitle—

(1) the term "agricultural commodity" means any agricultural commodity planted and produced by annual tilling of the soil, or on an annual basis by one-trip planters;

(2) the term "conservation district" means any district or unit of State or local government formed under State or territorial law for the express purpose of developing and carrying out a local soil and water conservation program, whether referred to as a conservation district, soil conservation district, soil and water conservation district, resource conservation district, natural resource district, land conservation committee, or by any similar name;

(3) the term "wetland", except when such term is part of the term "converted wetland", means land that has a predominance of hydric soils and that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions;

(4) the term "converted wetland"—

(A) means wetland that has been drained, dredged, filled, leveled, or otherwise manipulated (including any activity that results in impairing or reducing the flow, circulation, or reach of water) for the purpose or to have the effect of making the production of agricultural commodities possible if—

(i) such production would not have been possible but for such action; and

(ii) before such action—

(I) such land was wetland; and

(II) such land was neither highly erodible land nor highly erodible cropland, as defined in this section; but

(B) does not include—

(i) artificial lakes, ponds, or wetland created by excavating or diking non-wetland to collect and retain water for purposes such as water for livestock, fish production, irrigation, settling basins, cooling, rice production, or flood control;

(ii) wet areas created by water delivery systems or the application of water for irrigation;

(iii) wetland on which production of agricultural commodities is possible as a result of natural conditions, such as drought, and without actions by the producer that destroy natural wetland characteristics; or

(iv) wetland on which such production is possible as a result of actions by the producer whose cumulative and individual effect on the hydrological and biological values of the wetlands is minimal, as determined by the Secretary under regulations prescribed by the Secretary in consultation with the Secretary of the Interior;

(5) the term "field" means that term as defined in section 718.2 of title 7 of the Code of Federal Regulations, except that—

(A) any highly erodible land and any converted wetland on which an agricultural commodity is produced after the date of the enactment of this Act and that is not exempt under section 1203 shall be considered as part of the field in which such land was included on that date of enactment; and

(B) the Secretary shall provide for modification of the boundaries of fields to effectuate the purposes and facilitate the practical administration of this subtitle;

(6) the term "highly erodible land" means land—

(A) that is classified by the Soil Conservation Service of the Department of Agriculture as class IVe, VI, VII, or VIII land under the land capability classification system in effect on the date of the enactment of this Act; or

(B) that, if used to produce an agricultural commodity, would have an excessive average annual rate of erosion in relation to the soil loss tolerance level, as established by the Secretary, and as determined by the Secretary through application of factors from the universal soil loss equation and the wind erosion equation, including factors for climate, soil erodibility, and field slope; and, for the purposes of this paragraph, the land capability class or rate of erosion for a field shall be that determined by the Secretary to be the predominant class or rate of erosion under regulations issued by the Secretary;

(7) the term "highly erodible cropland" means highly erodible land that is in cropland uses, as determined by the Secretary; and

(8) the term "Secretary" means the Secretary of Agriculture.

PROGRAM INELIGIBILITY FOR PRODUCTION ON HIGHLY ERODIBLE LAND OR CONVERTED WETLAND

SEC. 1202. (a) Except as provided in section 1203 and notwithstanding any other provision of law, following the date of the enactment of this Act any person who in any crop year produces an agricultural commodity on highly erodible land or on converted wetland shall be ineligible, as to any commodity produced during that crop year by such person, for—

(1) any type of price support or payments made available under the Agricultural Act of 1949, the Commodity Credit Corporation Charter Act, or any other Act;

(2) a farm storage facility loan under section 4(h) of the Commodity Credit Corporation Charter Act;

(3) crop insurance under the Federal Crop Insurance Act;

(4) a disaster payment under the Agricultural Act of 1949; or

(5) a loan made, insured, or guaranteed under the Consolidated Farm and Rural Development Act or any other provision of law administered by the Farmers Home Administration, if the Secretary determines that such loan will be used for a purpose that will contribute to excessive erosion of highly erodible land, or conversion of wetlands (other than as provided in this section) to produce agricultural commodities.

(b) The Secretary shall issue regulations defining the term "person" and prescribing rules to govern determinations of persons who shall be ineligible for program benefits under this section so as to ensure fair and reasonable determination of ineligibility, including regulations that protect the interests of landlords, tenants, and sharecroppers. The ineligibility under subsection (a) of a tenant or sharecropper for benefits shall not cause a landlord to be ineligible for benefits for which the landlord would otherwise be eligible with respect to commodities produced on wetlands other than those operated by the tenant or sharecropper.

EXEMPTIONS

SEC. 1203. (a) No person shall become ineligible for program loans, payments, and benefits, as provided under section 1202, as the result of the production of a crop of an agricultural commodity—

(1) except as otherwise provided in section 1205(m), on any land that was cultivated to produce any of the 1981 through 1985 crops of agricultural commodities or that was set aside, diverted, or otherwise not cultivated under provisions of a Department of Agriculture program for any such crops to reduce production of an agricultural commodity;

(2) planted before the date of the enactment of this Act;

(3) planted during any crop year beginning before the date of the enactment of this Act;

(4) on highly erodible land in an area—

(A) within a conservation district, under a conservation system that has been approved by the conservation district after it has been determined that the conservation system is in conformity with technical standards set forth in the Soil Conservation Service technical guide for that conservation district; or

(B) not within a conservation district, under a conservation system determined by the Secretary to be adequate for the production of an agricultural commodity on highly erodible land;

(5) on highly erodible land that is planted in reliance on the determination by the Soil Conservation Service that the land is not highly erodible land, but the exemption under this paragraph shall not apply to any crop that was planted on any land after the Soil Conservation Service determines that the land is highly erodible land;

(6) on converted wetland if the land became converted wetland before the date of the enactment of this Act; or

(7) on wetland that became converted wetland—

(A) within a conservation district, in accordance with a wetland conservation plan that has been approved by the conservation district under regulations prescribed by the Secretary in consultation with the Secretary of the Interior acting through the United States Fish and Wildlife Service; or

(B) not within a conservation district, in accordance with a wetland conservation plan that has been approved by the Secretary under regulations prescribed by the Secretary in consultation with the Secretary of the Interior acting through the United States Fish and Wildlife Service.

(b) Section 1202 shall not apply to any loan made before the date of the enactment of this Act.

COMPLETION OF SOIL SURVEYS

SEC. 1204. The Secretary shall, as soon as practicable, complete soil surveys on those private lands that do not have a soil survey suitable for use in determining the land capability class for purposes of this subtitle, and, insofar as possible, concentrate on those localities where significant amounts of highly erodible land are being converted to the production of agricultural commodities.

CONSERVATION RESERVE PROGRAM

SEC. 1205. (a) Notwithstanding any other provision of law, the Secretary shall formulate and carry out a program, in accordance with this section, of contracts with owners and operators of highly erodible cropland to assist them in conserving and improving the soil and water resources of their farms or ranches. Under the program, the Secretary shall not place under contract more than 25 percent of the cropland in any one county.

(b)(1) To carry out this section, except as otherwise provided in paragraph (2), during the period beginning October 1, 1985, and ending September 30, 1990, the Secretary shall enter into conservation reserve contracts, covering in the aggregate not in excess of 20 million acres of highly erodible cropland, with owners and operators of highly erodible cropland. Each such contract under this subsection shall be not less than ten years in duration; and in each such contract, the owner and operator shall agree to—

(A) effectuate during the contract period a plan approved by the local conservation district (or, in an area not within a conservation district, a plan approved by the Secretary) or, if the plan involves conversion to trees, a plan approved by the appropriate State forestry agency, for converting highly erodible cropland normally devoted to the production of an agricultural commodity on the farm or ranch into a less intensive use, such as pasture, permanent grass or legumes, forbs, shrubs, or trees, substantially in accordance with the schedule outlined therein, except to the extent that any requirements thereof are waived or modified by the Secretary;

(B) forfeit all rights to further payments under the contract and refund to the United States all payments, with interest, received thereunder on the violation of the contract at any stage during the time the owner or operator has control of the land if the Secretary, after considering the recommendations of the soil conservation district and the Soil Conservation Service, determines that the violation is of such a nature as to warrant termination of the contract, or make refunds or accept such payment adjustments as the Secretary may deem appropriate if the Secretary determines that the violation by the owner or operator does not warrant termination of the contract;

(C) on transfer of the owner's or operator's right and interest in the farm or ranch during the contract period, forfeit all rights to further payments under the contract and refund to the United States all payments received thereunder, or accept such payment adjustments or make such refunds as the Secretary may deem appropriate and consistent with the objectives of this section, unless the transferee agrees with the Secretary to assume all obligations under the contract;

(D) not conduct, during the term of the contract, any harvesting or grazing nor otherwise make commercial use of the forage on land that is subject to the contract, nor adopt any similar practice specified in the contract by the Secretary as a practice that would tend to defeat the purposes of the contract, except that the Secretary may permit harvesting or grazing or other commercial use of the forage on land that is subject to the contract in response to a drought or other similar emergency;

(E) not conduct, during the term of the contract, any planting of trees on land that is subject to the contract unless the contract specifies that the harvesting and commercial sale of such trees as Christmas trees is prohibited, nor otherwise make commercial use of trees on land that is subject to the contract unless it is expressly permitted in the contract, nor adopt any similar practice specified in the contract by the Secretary as a practice that would tend to defeat the purposes of the contract. No contract shall prohibit activities consistent with customary forestry practice, such as pruning, thinning (including, but not limited to, thinning that results in commercial pulpwood and fence post harvesting), or stand improvement of trees, on lands converted to forestry use; and

(F) such additional provisions as the Secretary determines are desirable and are included in the contract to effectuate the purposes of the program or to facilitate the practical administration thereof.

(2) Notwithstanding any provision of paragraph (1) that is inconsistent with this paragraph, as a part of the program, in addition to the conservation reserve contracts provided for under paragraph (1), the Secretary shall remove up to 5 million additional acres of highly erodible cropland from production through long-term conservation reserve contracts, of up to 10 years in duration, with the owners and operators of such cropland. Contract payments made to the owners and operators of highly erodible cropland under this paragraph shall be made in surplus agricultural commodities held by the Commodity Credit Corporation, except that, if the Secretary determines that sufficient stocks of commodities will not be available or that payment in commodities under this paragraph will have a depressing effect on the market price of such commodities, the Secretary may make such payments in cash.

(c) The plan, as described in subsection (b)(1)(A), for converting highly erodible cropland normally devoted to the production of agricultural commodities on a farm or ranch to a less intensive use shall set forth the conservation measures and practices to be installed by the owner or operator during the contract period and the commercial use, if any, to be made of the land during such period and may provide for the permanent retirement of any existing cropland base and allotment history for the land.

(d)(1)(A) In return for such agreement by the owner and operator, the Secretary shall agree to—

(i) provide technical assistance;

(ii) share the cost of carrying out the conservation measures and practices set forth in the contract for which the Secretary determines that cost-sharing is appropriate and in the public interest; and

(iii) pay an annual land rental fee, for a period of years not in excess of the duration of the contract, necessary for converting highly erodible cropland normally devoted to the production of an agricultural commodity on the farm or ranch to a less intensive use and necessary for obtaining the retirement of any cropland base and allotment history that the owner and operator agree to retire permanently.

(B) The Secretary shall provide payment to each contracting party—

(i) with respect to any cost-share payment obligation incurred by the Secretary under the contract, as soon as possible after the obligation is incurred; and

(ii) with respect to any annual land rental fee obligation incurred by the Secretary under the contract, as soon as practicable after October 1 of each calendar year, except that the Secretary, at the Secretary's discretion, may pay any such fee prior to such date at any time during the year that the obligation is incurred.

(2) A reduction, based on a ratio between the total cropland acreage on the farm and the acreage placed in the conservation reserve, as determined by the Secretary, shall be made during the period of the contract in crop bases, quotas, and allotments with respect to crops for which there is a production adjustment program.

(3) No persons who enter into a contract under this section for a farm or ranch may receive annual rental fees applicable to the farm or ranch under the contract in excess of $50,000 per year. The Secretary shall issue regulations defining the term "persons", as used in this paragraph, and prescribing such rules as the Secretary determines necessary to ensure a fair and reasonable application of the limitation contained in this paragraph; and the rules for determining whether corporations and their stockholders may be considered as separate persons shall be in accordance with the regulations issued by the Secretary on December 18, 1970, under section 101 of the Agricultural Act of 1970.

(e) The Secretary shall pay 50 per centum of the cost of installing, and maintaining for the normally expected lifespan, conservation measures and practices set forth in contracts under this section for which the Secretary determines that cost-sharing is appropriate and in the public interest.

(f)(1) In determining the amount of annual land rental to be paid for converting highly erodible cropland normally devoted to the production of an agricultural commodity to less intensive use, the Secretary may consider, among other things, the amount necessary to encourage owners and operators of highly erodible cropland to participate in the program under this section. The total amount payable to owners and operators in the form of annual land rental fees under contracts entered into under this section may be determined through the submission of bids in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate.

(2) In determining the acceptability of contract offers, the Secretary may take into consideration the extent of erosion on the land that is the subject of the contract and the productivity of the acreage diverted and may, where appropriate, accept contract offers that provide for the establishment of—

(A) shelterbelts and windbreaks; or

(B) permanently vegetated stream borders, filter strips of permanent grass, forbs, shrubs, and trees that will reduce sedimentation substantially.

(g) Except as otherwise provided in this section, payments under this section—

(1) shall be made in cash or in commodities in such amount and on such time schedule as agreed on and specified in the contract; and

(2) may be made in advance of determination of performance.

(h) If a person who is entitled to any payment or compensation under this section dies, becomes incompetent, or disappears before receiving the payment or compensation, or is succeeded by another who renders or completes the required performance, the Secretary shall make or provide the payment or compensation, in accordance with appropriate regulations and without regard to any other provisions of law, in such manner as the Secretary determines to be fair and reasonable in light of all the circumstances.

(i)(1) No contract shall be entered into under this section concerning land with respect to which the ownership has changed in the three-year period preceding the first year of the contract period unless—

(A) the new ownership was acquired by will or succession as a result of the death of the previous owner;

(B) the new ownership was acquired before January 1, 1985; or

(C) the Secretary determines that the land was acquired under circumstances that give adequate assurance that such land was not acquired for the purpose of placing it in the program.

(2) Paragraph (1) shall not prohibit the continuation of an agreement by a new owner after an agreement has been entered into under this section, nor require a person to own the land as a condition of eligibility for entering into the contract if the person has operated the land to be covered by a contract under this section for at least three years preceding the date of the contract or since January 1, 1985, whichever is later, and controls the land for the contract period.

(j) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers, including provision for sharing, on a fair and equitable basis, in payments under the program.

(k) The Secretary may terminate any contract under this section by mutual agreement with the owner and operator if the Secretary determines that termination would be in the public interest, or may agree to any modification of contracts as the Secretary may determine to be desirable to carry out the purposes of this section or facilitate its administration, or to be in the public interest.

(l) Notwithstanding section 1202, the Secretary, by appropriate regulation, may provide for preservation of cropland base and allotment history applicable to acreage converted from the production of agricultural commodities under this section, for the purpose of any Federal program under which the history is used as a basis for participation in the program or for an allotment or other limitation in the program, unless the owner and operator agree under the contract to retire permanently that cropland base and allotment history.

(m) In the event of the termination of a contract under subsection (b)(1)(B) or (k) and on expiration of the term of any contract entered into under subsection (b), the highly erodible cropland that was the subject of such contract shall be considered highly erodible cropland for the purposes of section 1202.

(n) The Secretary may carry out the program under this section through the Commodity Credit Corporation. There are authorized to be appropriated, without fiscal year limitation, such sums as may be necessary to reimburse the Commodity Credit Corporation for any amounts expended by it in accordance with this section and not previously reimbursed.

(o) The Secretary shall consider for inclusion in the program under this section those lands that are not highly erodible lands but that pose an off-farm environmental threat or, if permitted to remain in production, pose a threat of continued degradation of productivity due to soil salinity.

ADMINISTRATIVE PROVISIONS

SEC. 1206. (a) In addition to the appropriations authorized under section 1205(n), there are hereby authorized to be appropriated such other sums as may be necessary to carry out this subtitle.

(b) In carrying out this subtitle, the Secretary shall use the services of local, county, and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act, and the technical services of the Soil Conservation Service, the Forest Service, State foresters or equivalent State officials, and conservation districts.

(c) The Secretary shall establish, by regulation, an appeal procedure under which a person who is adversely affected by any determination made under this subtitle may seek review of such determination.

(d) The Secretary shall, within 180 days after the enactment of this subtitle publish in the Federal Register such regulations as the Secretary determines desirable to implement this subtitle.

(e) The authority provided by this subtitle shall be in addition to and not in place of other authorities available to the Secretary and the Commodity Credit Corporation for carrying out soil and water conservation programs.

Subtitle B—Water Resource Conservation

TECHNICAL ASSISTANCE FOR WATER RESOURCES; REPORTS

SEC. 1211. (a) Notwithstanding any other provision of law, the Secretary of Agriculture may formulate plans and provide technical assistance to property owners and agencies of State and local governments and interstate river basin commissions, at their request, to—

(1) protect the quality and quantity of subsurface water including water in the Nation's aquifers,

(2) enable property owners to reduce their vulnerability to flood hazards that also may affect water resources, and

(3) control the salinity in the Nation's agricultural water resources.

(b) The Secretary shall submit by February 15, 1987, and the fifteenth day of February each year thereafter, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate reports evaluating the plans and technical assistance authorized in subsection (a). Each such report shall include any recommendations as to whether the plan and assistance should be extended, and, if so, how they could be improved, and any other relevant information and data relating to costs and other elements of the plan or assistance that would be helpful to such Committees.

Subtitle C—Soil and Water Resources Conservation Act of 1977

SHORT TITLE

SEC. 1221. This subtitle may be cited as the "Soil and Water Resources Conservation Act Amendments of 1985".

EXTENSION OF THE ACT

SEC. 1222. The Soil and Water Resources Conservation Act of 1977 (16 U.S.C. 2001 et seq.) is amended by—

(1) amending section 5(d) to read as follows:

"(d) The Secretary shall conduct four comprehensive appraisals under this section, to be completed by December 31, 1979, December 31, 1985, December 31, 1995, and December 31, 2005, respectively. The Secretary may make such additional interim appraisals as the Secretary deems appropriate.";

(2) amending section 6(b) to read as follows:

"(b) The initial program shall be completed not later than December 31, 1979, and program updates shall be completed by December 31, 1987, December 31, 1997, and December 31, 2007, respectively.";

(3) amending section 7(a) to read as follows:

"SEC. 7. (a) At the time Congress convenes in 1980, 1986, 1996, and 2006, the President shall transmit to the Speaker of the House of Representatives and the President of the Senate the appraisal developed under section 5 of this Act and completed prior to the end of the previous year. At the time Congress convenes in 1980, 1988, 1998, and 2008, the President shall transmit to the Speaker of the House of Representatives and the President of the Senate the initial program or updated program developed under section 6 of this Act and completed prior to the end of the previous year, together with a detailed statement of policy regarding soil and water conservation activities of the United States Department of Agriculture.";

(4) striking out section 7(b) and redesignating section 7(c) as section 7(b); and

(5) amending section 10 to read as follows:

"SEC. 10. The provisions of this Act shall terminate on December 31, 2008.".

TITLE XIII—CREDIT

JOINT OPERATIONS

SEC. 1301. (a) Sections 302 and 311(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1922 and 1941(a), respectively) are each amended by—

(1) striking out "and partnerships" each place it appears after "corporations" and inserting ", partnerships, and joint operations" in lieu thereof;

(2) striking out ", and partnerships" each place it appears after "corporations" and inserting ", partnerships, and joint operations" in lieu thereof; and

(3) striking out "members, stockholders, or partners, as applicable," each place it appears and inserting "individuals" in lieu thereof.

(b) Section 343 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1991) is amended by—

(1) striking out "and" before "(6)"; and

(2) inserting before the period at the end thereof the following: ", and (7) the term 'joint operation' means a joint farming operation in which two or more farmers work

together sharing equally or unequally land, labor, equipment, expenses, and income".

WATER AND WASTE DISPOSAL FACILITIES

SEC. 1302. Section 306(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)) is amended by—

(1) adding at the end of paragraph (2) the following:

"The Secretary shall fix the grant rate for each project in conformity with regulations issued by the Secretary that shall provide for a graduated scale of grant rates establishing higher rates for projects in communities that have lower community population and income levels, except that the grant rate shall be the maximum rate permitted under this paragraph for any project in a community that has—

"(A) a population of 1,500 or fewer inhabitants; and

"(B) a median household income level that does not exceed the higher of—

"(i) the poverty line established by the Office of Management and Budget, as revised under section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2)); or

"(ii) 80 per centum of the statewide nonmetropolitan median household income."; and

(2) adding at the end thereof the following:

"(16)(A) In providing financial assistance for water and waste disposal facilities under this section, the Secretary shall use a project selection system to determine which of the applicants for assistance meeting the basic requirements of this section shall be selected to receive assistance. The project selection system shall provide for the objective and uniform comparison of requests for assistance (in the form of preapplications) on the basis of relative need as reflected by factors to be determined by the Secretary.

"(B) The factors referred to in subparagraph (A) shall include—

"(i) low community median income;

"(ii) low population; and

"(iii) severity of health hazards resulting from inadequate provision for the reliable supply of potable water or from inadequate means of disposing of waste.

"(C) The three factors set forth in subparagraph (B) shall—

"(i) be weighted equally; and

"(ii) account for not less than 75 per centum of the total rating points in the project selection system.

"(17)(A) The Secretary may make grants to private nonprofit organizations for the purpose of enabling them to provide to associations described in paragraph (1) of this subsection technical assistance and training to—

"(i) identify, and evaluate alternative solutions to, problems relating to the obtaining, storage, treatment, purification, or distribution of water or the collection, treatment, or disposal of waste in rural areas;

"(ii) prepare applications to receive financial assistance for any purpose specified in paragraph (2) of this subsection from any public or private source; and

"(iii) improve the operation and maintenance practices at any existing works for the storage, treatment, purification, or distribution of water or the collection, treatment, or disposal of waste in rural areas.

"(B) In selecting recipients of grants to be made under subparagraph (A), the Secretary shall give priority to private nonprofit organizations that have experience in providing the technical assistance and training described in subparagraph (A) to associations serving rural areas in which residents have low income and in which water supply systems or waste facilities are unhealthful.

"(C) Not less than 2 per centum of any funds provided in appropriations acts to carry out paragraph (2) of this subsection for any fiscal year shall be reserved for grants under subparagraph (A) unless the applications, qualifying for grants, received by the Secretary from eligible nonprofit organizations for the fiscal year total less than 2 per centum of those funds.

"(18) In the case of water and waste disposal facility projects serving more than one separate rural community, the Secretary shall use the median population level and the community income level of all the separate communities to be served in applying the standards specified in paragraphs (2) and (16) of this subsection and section 307(a)(3)(A).

"(19) The Secretary may make grants, aggregating not to exceed $10,000,000 in any fiscal year, to associations described in paragraph (1) of this subsection to test cost-effective methods of meeting the basic needs of rural residents who do not have and cannot afford safe drinking water services. Such grants may include, but are not limited to, financing for—

"(A) costs associated with the development or improvement of individual or small, multiuser drinking water facilities;

"(B) costs associated with enabling such rural residents to connect to community water supply systems, such as the payment of connection fees;

"(C) costs associated with improving the operation, maintenance, or management of small community water systems that are currently unable to provide safe drinking water at affordable rates to such rural residents; or

"(D) costs associated with implementing other alternatives to meeting the basic drinking water needs of such rural residents.

"(20) Notwithstanding any other provision of law, grants under paragraph (2) of this subsection may be used to pay the local share requirements of another Federal grant-in-aid program.".

INTEREST RATES—WATER AND WASTE DISPOSAL FACILITY AND COMMUNITY FACILITY LOANS

SEC. 1303. Section 307(a)(3)(A) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1927(a)(3)(A)) is amended by—

(1) striking out "where the median family income of the persons to be served by such facility is below the poverty line prescribed by the Office of Management and Budget, as adjusted under section 624 of the Economic Opportunity Act of 1964 (42 U.S.C. 2971d)" and inserting in lieu thereof "where the median household income of the persons to be served by such facility is below the higher of 80 per centum of the statewide nonmetropolitan median household income or the poverty line established by the Office of Management and Budget, as revised under section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2))";

(2) inserting before the period at the end thereof the following: "; and not in excess of 7 per centum per annum on loans for such facilities that do not qualify for the 5 per centum per annum interest rate but are located in areas where the median household income of the persons to be served by the facility does not exceed 100 per centum of the statewide nonmetropolitan median household income"; and

(3) adding at the end thereof the following: "The interest rate on loans for water and waste disposal facilities and loans for essential community facilities shall be the lower of (i) the rate in effect at the time of the loan approval, or (ii) the rate in effect at the time of the loan closing.".

EFFECTIVE DATE OF SECTIONS 1302 AND 1303

SEC. 1304. The amendments made by sections 1302 and 1303 shall become effective on October 1, 1985, and shall apply to any association described in section 306(a)(1) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(1)) without regard to whether the application for the loan or grant involved was made by the association before that date.

MINERAL RIGHTS AS COLLATERAL

SEC. 1305. Section 307 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1927) is amended by adding at the end thereof the following:

"(d) With respect to a farm ownership loan made after the date of the enactment of this subsection, unless appraised values of the rights to oil, gas, or other minerals are specifically included as part of the appraised value of collateral securing the loan, the rights to oil, gas, or other minerals located under the property shall not be considered part of the collateral securing the loan. Nothing in this subsection shall preclude including, as part of the collateral securing the loan, any payment or other compensation the borrower may receive for damages to the surface of the collateral real estate resulting from the exploration for or recovery of minerals.".

RURAL INDUSTRIAL ASSISTANCE

SEC. 1306. Section 310B of the Consolidated Farm and Rural Development Act (7 U.S.C. 1932) is amended by—

(1) adding at the end of subsection (a) the following: "No loan may be made, insured, or guaranteed under this subsection that exceeds $25,000,000 in principal amount."; and

(2) effective on October 1, 1986, adding at the end thereof the following:

"(f)(1) The Secretary may make grants under this subsection to public and nonprofit private institutions for the purpose of enabling them to establish and operate centers of rural technology development that have, as a primary objective, the improvement of the economic condition of rural areas by promoting the development (through technological innovation and adaptation of existing technology) and commercialization of (A) new products that can be produced in rural areas, and (B) new processes that can be used in such production.

"(2) Grants under this subsection shall be made on a competitive basis. In making grants, the Secretary shall give preference to applicants that will establish centers for rural technology in areas that have (A) few industries and agribusinesses, (B) high levels of unemployment, (C) high rates of out-migration of people, business, and industries, and (D) low levels of per capita income.

"(3) The Secretary shall issue regulations implementing this subsection that shall include provisions for the monitoring and evaluation of the rural technology development activities carried out by institutions that receive grants under this subsection.".

ELIGIBILITY FOR EMERGENCY LOANS

SEC. 1307. (a) Section 321(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1961(a)) is amended by—

(1) inserting after "United States" in clause (1) of the first sentence "and who are owner-operators (in the case of loans for a purpose under subtitle A) or operators (in

the case of loans for a purpose under subtitle B) of not larger than family farms";

(2) in clause (2) of the first sentence, striking out "farm cooperatives or private domestic corporations or partnerships in which a majority interest is held by members, stockholders, or partners who are citizens of the United States if the cooperative, corporation, or partnership is engaged primarily in farming, ranching, or aquaculture," and inserting in lieu thereof the following: "farm cooperatives, private domestic corporations, partnerships, or joint operations (A) that are engaged primarily in farming, ranching, or aquaculture, and (B) in which a majority interest is held by individuals who are citizens of the United States and who are owner-operators (in the case of loans for a purpose under subtitle A) or operators (in the case of loans for a purpose under subtitle B) of not larger than family farms (or in the case of such cooperatives, corporations, partnerships, or joint operations in which a majority interest is held by individuals who are related by blood or marriage, as defined by the Secretary, such individuals must be either owners or operators of not larger than a family farm and at least one such individual must be an operator of not larger than a family farm),"; and

(3) inserting after the first sentence the following: "In addition to the foregoing requirements of this subsection, in the case of farm cooperatives, private domestic corporations, partnerships, and joint operations, the family farm requirement of the preceding sentence shall apply as well to all farms in which the entity has an ownership and operator interest (in the case of loans for a purpose under subtitle A) or an operator interest (in the case of loans for a purpose under subtitle B).".

(b) Effective with respect to disasters occurring after September 30, 1985, section 329 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1970) is amended by adding at the end thereof the following: "Notwithstanding the third sentence of section 321(a) of this subtitle, eligibility of an applicant for assistance under this subtitle based on production losses shall be determined solely on the basis of the factors designated in this section without regard to the Secretary's failure to designate a county or counties for emergency loan purposes.".

COUNTY COMMITTEES

SEC. 1308. Section 332(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1982(a)) is amended to read as follows:

"(a) In each county or area in which activities are carried out under this title, there shall be a county committee composed of three members. Two members shall be elected, from among their number, by farmers deriving the principal part of their income from farming who reside within the county or area, and one member, who shall reside within the county or area, shall be appointed by the Secretary for a term of three years. At the first election of county committee members under this subsection, one member shall be elected for a term of one year and one member shall be elected for a term of two years. Thereafter, elected members of the county committee shall be elected for a term of three years. The Secretary, in selecting the appointed member of the county committee, shall ensure that, to the greatest extent practicable, the committee is fairly representative of the farmers in the county or area. The Secretary may appoint an alternate for each member of the county committee. Appointed and alternate members of the county committee shall be removable by the Secretary for cause. The Secretary shall issue such regulations as are necessary relating to the election and appointment of members and alternate members of the county committees.".

USE OF PROCEEDS FROM MINERAL SALES OR LEASES

SEC. 1309. Section 333 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1983) is amended by—

(1) in subsection (d), striking out "and" following the semicolon;

(2) in subsection (e), striking out the period and inserting in lieu thereof "; and"; and

(3) adding at the end thereof the following:

"(f) with respect to loans made after the date of enactment of this subsection, unless the appraised value of rights to oil, gas, and other minerals is specifically included as part of the appraised value of collateral securing a loan, that a borrower having an outstanding loan made, insured, or held by the Secretary for farm ownership purposes under subtitle A, farm operating purposes under subtitle B, disaster emergency purposes under subtitle C, or economic emergency purposes under the Emergency Agricultural Credit Adjustment Act of 1978, be permitted to use the royalties generated from and any other proceeds under the sale or lease of rights to oil, gas, or other minerals located under the property securing the loan to make prospective scheduled payments on the loan.".

ADMINISTRATION OF FARM REAL ESTATE ACQUIRED BY THE SECRETARY

SEC. 1310. Section 335 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1985) is amended by adding at the end thereof the following:

"(e)(1) Notwithstanding any other provision of this title, the Secretary shall administer any real property that is farmland and that is acquired under this title or under the Emergency Agricultural Credit Adjustment Act of 1978 in conformity with the following provisions:

"(A) The Secretary shall not offer for sale or sell any such real property—

"(i) if placing the property on the market will have a detrimental effect on the value of farmland in the area; or

"(ii) in any State or portion of a State identified by the Secretary as having suffered substantial reduction in the average value of farmland since 1980, until such time as such State or portion of the State experiences a period of 12 consecutive months for which the average farmland value therein, at the end of the 12 month period, equals or exceeds the value of the farmland at the beginning of such period.

"(B) The Secretary shall, with respect to any such real property that is offered for sale, make the property available, to the maximum extent practicable, in tracts not larger than those that can be operated efficiently as a family farm, and offer the property on a priority basis to the previous owner and to beginning farmers.

"(C) The Secretary shall, with respect to leasing and operating such real property—

"(i) not lease or operate the real property for the production of agricultural commodities that the Secretary has determined to be in surplus supply and shall devote such real estate to conserving uses; and

"(ii) if the real property is highly erodible cropland, devote that property to conserving uses;

"(D) To the extent the Secretary may lease or operate real property under this subsection, the Secretary shall—

"(i) offer to lease such real property on a competitive bid basis, giving priority in making awards to the previous owner, family farmers, and beginning farmers; and

"(ii) if the Secretary determines to administer such property through management contracts, offer the contracts on a competitive bid basis, giving preference to persons who will live in, and own and operate qualified small businesses in, the area where the property is located.

"(E) The Secretary may lease the property to the previous operator regardless of the restrictions in this paragraph (1), and priority in leasing shall be to the previous owner.

"(2) Notwithstanding any other provisions of law, compliance by the Secretary with this subsection shall not cause any acreage allotment, marketing quota, or acreage base assigned to such property to lapse, terminate, be reduced, or otherwise be adversely affected.".

FARM DEBT RESTRUCTURE AND CONSERVATION SET-ASIDE

SEC. 1311. (a) The last sentence of section 335(c) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1985(c)) is amended by striking out "all of the interest of the United States, including mineral rights" and inserting in lieu thereof "all the interests of the United States (including mineral rights) other than easements acquired under subsection (f)".

(b) Section 335 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1985) is amended by adding after the subsection added by section 1310 of this Act the following:

"(f)(1) The Secretary may acquire and retain easements for conservation, recreational, and wildlife purposes for a term of not less than 50 years, in real property that is wetlands, upland, highly erodible land, or any other land determined by the Secretary to be marginal for use as cropland if such real property—

"(A) is determined by the Secretary to be suitable for the purpose involved; and

"(B)(i) is administered under this title by the Secretary; or

"(ii)(I) secures any loan made under any law administered by the Farmers Home Administration and held by the Secretary, and the borrower involved is unable, as determined by the Secretary, to repay such loan in a timely manner; and

"(II) was row cropped in each year of the 3-year period ending on the effective date of this subsection.

"(2) The terms and conditions specified in the easement shall—

"(A) specify the uses to which the real property will be put by the owner of the real property (including such borrower and any successor in interest of such borrower);

"(B) identify the conservation measures to be taken, and the recreational and wildlife uses to be allowed, with respect to the real property; and

"(C) require the owner to allow the Secretary, and any person or governmental entity designated by the Secretary, to have access to the real property for the purpose of monitoring compliance with the easement.

"(3) Any easement acquired by the Secretary under this subsection shall be purchased from the borrower involved by cancelling that part of the aggregate amount of the borrower's outstanding loans held by the Secretary under laws administered by the

Farmers Home Administration that bears the same ratio to the aggregate amount of the borrower's outstanding loans held by the Secretary under all such laws as the number of acres of the borrower's real property that are subject to the easement bears to the aggregate number of acres securing such loans.

"(4) The Secretary shall consult with the Director of the Fish and Wildlife Service of the Department of the Interior for purposes of—

"(A) selecting real property in which the Secretary shall acquire easements under this subsection;

"(B) formulating the terms and conditions of those easements; and

"(C) enforcing those easements.

"(5) The Secretary, and any governmental entity or person designated by the Secretary, may enforce an easement acquired under this subsection by the Secretary.

"(6) For purposes of this subsection—

"(A) the term 'governmental entity' means any agency of the United States, of a State, or of a unit of local government of a State;

"(B) the term 'highly erodible land' means land classified by the Soil Conservation Service of the Department of Agriculture as class IVe, VI, VII, or VIII land under the land capability classification system in effect on the effective date of this subsection;

"(C) the term 'recreational uses' includes hunting;

"(D) the term 'wetlands' has the meaning given it in section 3 of the Water Bank Act; and

"(E) the term 'wildlife' means fish or wildlife as defined in section 2(a) of the Lacey Act Amendments of 1981.

"(7) This subsection shall not apply with respect to the cancellation of any part of any loan made after the date of enactment of this subsection.".

(c) The second sentence of section 1001 of the Agricultural Act of 1970 (16 U.S.C. 1501) is amended by—

(1) striking out "perpetual"; and

(2) inserting "for a term of not less than 50 years" after "easements".

(d) Any part of a loan cancelled under section 335(f) of the Consolidated Farm and Rural Development Act shall not be included in income, and shall not have any effect on any tax attribute with respect to any taxpayer or property, for purposes of the Internal Revenue Code of 1954.

REAUTHORIZATION

SEC. 1312. Section 346 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1994) is amended by adding at the end thereof the following:

"(f) Notwithstanding the provisions of subsection (a)—

"(1) loans for each of the fiscal years 1986, 1987, and 1988 are authorized to be insured, or made to be sold and insured, or guaranteed under the Agricultural Credit Insurance Fund as follows:

"(A)(i) for fiscal year 1986, real estate loans, $700,000,000, of which $650,000,000 shall be for insured loans and $50,000,000 for guaranteed loans, with authority to transfer 25 per centum of such amounts between categories;

"(ii) for each of the fiscal years 1987 and 1988, real estate loans, $700,000,000, of which not more than $650,000,000 shall be for insured loans (to the extent so provided in advance in appropriation Acts) and not less than $50,000,000 for guaranteed loans (as so provided in such Acts);

"(B) operating loans, $3,150,000,000, of which $2,500,000,000 shall be for insured loans and $650,000,000 for guaranteed loans, with authority to transfer 25 per centum of such amounts between categories; and

"(C) insured or guaranteed emergency loans, $1,300,000,000 for fiscal year 1986, $700,000,000 for fiscal year 1987, and $600,000,000 for fiscal year 1988.

Not less than 25 per centum of the funds that may be used for insured loans for farm ownership purposes and not less than 25 per centum of the funds that may be used for insured loans for farm operating purposes shall be made available for loans to low-income, limited-resource applicants to the extent needed to meet applications filed by such farmers who are eligible for such loans. The Secretary shall inform in writing all applicants for loans for farm ownership and farm operating purposes of the availability of the loan program for low-income, limited-resource borrowers and the general nature of the program; and

"(2) loans for each of the fiscal years 1986, 1987, and 1988 are authorized to be insured, or made to be sold and insured, or guaranteed under the Rural Development Insurance Fund as follows:

"(A) Insured water and waste disposal facility loans, $340,000,000.

"(B) Industrial development loans, $250,000,000.

"(C) Insured community facility loans, $115,000,000.".

ADMINISTRATION OF GUARANTEED FARM LOAN PROGRAMS; USE OF TALENTS OF OLDER AMERICANS

SEC. 1313. The Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) is amended by adding at the end thereof the following:

"SEC. 349. Notwithstanding any other provision of this title, the Secretary shall ensure that farm loan guarantee programs carried out under this title are designed so as to be responsive to borrower and lender needs and to include provision under reasonable terms and conditions for advances, before completion of the liquidation process, of guarantee proceeds on loans in default.

"SEC. 350. (a) Notwithstanding any other provision of law, the Secretary may make grants to, or enter into cooperative agreements with, private nonprofit organizations designated by the Secretary of Labor under title V of the Older Americans Act of 1965 to use the talents of older Americans in programs authorized by other provisions of this title. Funding for such grants or agreements may be made available from such programs.

"(b) Before awarding any grant or entering into any agreement under subsection (a) of this section, the Secretary shall certify that the grant or agreement will not—

"(1) result in the displacement of individuals currently employed by the agency concerned, including partial displacement through reduction of nonovertime hours, wages, or employment benefits;

"(2) result in the employment of any individual when any other individual is in a layoff status from the same or substantially equivalent job within the jurisdiction of the agency concerned; or

"(3) affect existing contracts for services.

"(c) The Secretary may not award a grant or enter into an agreement under this section unless funding for that grant or agreement is provided in advance in an appropriations Act.".

PROTECTION FOR PURCHASERS OF FARM PRODUCTS

SEC. 1314. (a) Congress finds that—

(1) certain State laws permit a secured lender to enforce liens against a purchaser of farm products even if the purchaser does not know that the sale of the products violates the lender's security interest in the product, lacks any practical method for discovering the existence of the security interest, and has no reasonable means to ensure that the seller uses the sales proceeds to repay the lender;

(2) these laws subject the purchaser of farm products to double payment for the products, once at the time of purchase, and again when the seller fails to repay the lender;

(3) the exposure of purchasers of farm products to double payment inhibits free competition in the market for farm products; and

(4) this exposure constitutes a burden on and an obstruction to interstate commerce in farm products.

(b) The purpose of this section is to remove such burden on and obstruction to interstate commerce in farm products.

(c) For the purposes of this section—

(1) the term "buyer in the ordinary course of business" means a person who—

(A) in the ordinary course of business, buys farm products from a person engaged in farming operations who is in the business of selling farm products; and

(B) buys the products in good faith and without knowledge that the sale is in violation of the ownership rights or security interest of a third party in the products;

(2) the term "farm products" means crops or livestock used or produced in farming operations or products of crops or livestock in their unmanufactured states (such as ginned cotton, wool-clip, maple syrup, milk, and eggs) that are in the possession of a person engaged in farming operations;

(3) the term "security interest" means an interest in farm products that secures payment or performance of an obligation; and

(4) the term "knows" or "knowledge" means actually knows or actual knowledge.

(d) Notwithstanding any other provision of Federal, State, or local law, a buyer in the ordinary course of business who buys farm products from a seller engaged in farming operations shall take free of a security interest created by the seller even though the security interest is perfected and even though the buyer knows of its existence, except that a buyer of farm products takes subject to a security interest created by the seller if—

(1) within one year before the sale of the farm products the buyer has received from the secured party or the seller written notice of—

(A) the security interest including, but not limited to, the name and address of the secured party and of the seller, and a reasonable description of the property, including the jurisdiction where the property is located; and

(B) any payment obligations imposed on the buyer by the secured party as conditions for waiver and release of the security interest; and

(2) the buyer has failed to perform those obligations.

(e) Notwithstanding any other provisions of Federal, State, or local law, a commission merchant or selling agent who sells farm products for others shall not be subject to a security interest created by the seller in such farm products even though the security interest is perfected and even though the commission merchant or selling agent knows of its existence, if the sale is made in the ordinary course of business, except that a commission merchant or selling agent who sells farm products for others shall be subject to a

security interest created by the seller in such farm products if—

(1) within one year before the sale of the farm products the commission merchant or selling agent has received from the secured party or the seller written notice of—

(A) the security interest including, but not limited to, the name and address of the secured party and of the seller, and a reasonable description of the property, including the jurisdiction where the property is located; and

(B) any payment obligations imposed on the commission merchant or selling agent by the secured party as conditions for waiver or release of the security interest; and

(2) the commission merchant or selling agent has failed to perform those obligations.

(f) A security agreement in which a seller of farm products creates a security interest in another may provide that the seller is obligated to furnish the secured party a list of the persons to whom the seller will sell the products. If a security agreement contains such a provision, the seller shall be subject to the provisions of subsection (g) if the seller sells the farm products collateral to a buyer not included on such a list unless the seller has—

(1) notified the secured party (in writing) of the identity of the buyer at least 7 days before the sale; or

(2) has accounted to the secured party for the proceeds of that sale within 10 days after the sale.

(g) A person violating subsection (f) shall be fined not more than $5,000.

(h) This section shall become effective 30 days after enactment, except that security interests created before the effective date shall be exempt for a period of one year from the provisions of this section.

PROHIBITING COORDINATED FINANCIAL STATEMENT

SEC. 1315. The Secretary of Agriculture shall not use or require the submission of, in connection with an application submitted on or after the date of the enactment of this Act for any initial or subsequent farmer-type loan under any program of the Department of Agriculture carried out by the Farmers Home Administration, the coordinated financial statement referred to in the proposed regulations of the Farmers Home Administration published in the Federal Register of November 8, 1983 (48 F.R. 51312-51317), or any other form or document in a format substantially similar to the coordinated financial statement.

REGULATORY RESTRAINT

SEC. 1316. (a) Congress finds and declares that—

(1) high production costs and low commodity prices have combined to reduce farm income to the lowest levels since the depths of the Depression in the 1930's, to subject many agricultural producers, through no fault of their own, to severe economic hardship, and in many cases temporarily but seriously to impair producers' ability to meet loan repayment schedules in a timely fashion; and

(2) a policy of adverse classification of agricultural loans by bank examiners under these circumstances will trigger a wave of foreclosures and similar actions on the part of banks, thereby depressing land values and prices for agricultural facilities and equipment and having a devastating effect on farmers and the banking industry, and upon rural areas of the United States in general.

(b) It is therefore the sense of Congress that the Federal bank regulatory agencies should ensure, in their examination procedures, that examiners exercise caution and restraint and give due consideration not only to the current cash flow of agricultural borrowers under financial stress, but to factors such as their loan collateral and ultimate ability to repay as well, for so long as the adverse economic effects of the cost-price squeeze of recent years continue to impair the ability of these borrowers to meet scheduled repayments on their loans.

LOAN MORATORIUM

SEC. 1317. (a) Effective only for the 1986 through 1990 crops, section 331A of the Consolidated Farm and Rural Development Act (7 U.S.C. 1981a) is amended to read as follows:

"SEC. 331A. (a) For purposes of this section, the term 'circumstances beyond the control of the borrower' includes, but is not limited to—

"(1) a reduction of the income of a borrower occurring after August 4, 1978, as a result of—

"(A) the unemployment, illness, or injury of the borrower;

"(B) the death of a member of the family of the borrower; or

"(C) the occurrence of a natural disaster, crop or livestock disease, insect damage, or adverse conditions in the farm economy (such as high interest rates, declining farm equity, or high cost of production relative to the market price for farm products); and

"(2) the occurrence of unplanned, essential farm and home operating expenses as a result of—

"(A) the illness or injury of the borrower;

"(B) the death of a member of the family of the borrower; or

"(C) the cost of repair, or uninsured loss, of property used to secure a loan made under this title.".

"(b) In addition to any other authority that the Secretary may have to defer principal and forego foreclosure, the Secretary shall, at the request of an eligible borrower described in subsection (c), defer principal and interest (in an amount determined under subsection (d)) on any outstanding loan made, insured, or held by the Secretary under this Act, or under any other law administered by the Farmers Home Administration, and shall forego foreclosure of any such loan, for the period described in subsection (e).

"(c) To be eligible to receive assistance under this section, a borrower of a loan must demonstrate that—

"(1) due to circumstances beyond the control of the borrower, the borrower is temporarily unable to continue making payments of principal and interest due on such loan without unduly impairing the standard of living of the borrower; and

"(2) the borrower is able to project a positive cash flow in accordance with the loan rate schedule established under section 503(b) of the Agricultural Act of 1949 within the five year period beginning on the date of deferral.

"(d) The Secretary shall defer principal and interest on a loan under this section in an amount which the Secretary determines will permit the borrower of the loan to maintain an adequate minimum standard of living for the area of the borrower.

"(e) The Secretary shall continue to defer principal and interest, and forego foreclosure, in accordance with subsection (b) on a loan made to a borrower until the date on which a positive cash flow can be projected for the borrower in accordance with the loan rate schedule established under section 503(b) of the Agriculture Act of 1949.

"(f) The Secretary may permit interest that accrues during the deferral period on any loan deferred under this section to bear no interest during or after such period, except that if the security instrument securing such loan is foreclosed such interest as is included in the purchase price at such foreclosure shall become part of the principal and draw interest from the date of foreclosure at the rate prescribed by law.

"(g) If a borrower conveys property to the Secretary in connection with a loan made under this title, the Secretary shall permit the borrower to redeem the rights of the borrower in the property at any time during the five year period beginning on the date of such conveyance.".

(b) To the extent practicable, the Secretary of Agriculture shall implement the amendment made by subsection (a) of this section no later than sixty days after the date of enactment of this Act.

EXEMPTION OF CERTAIN PROPERTY

SEC. 1318. (a) The Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et. seq.) is amended by inserting after section 331B the following new sections:

"SEC. 331C. (a) Except as provided in this section, with respect to any interest of the United States in or to the security for any loan made, guaranteed, or insured under this title, the Secretary shall exempt the following property from foreclosure:

"(1) the principal residence of any obligor on such loan (together with sufficient acreage to make such residence eligible for purchase under this title), and

"(2) home furnishings, vehicles, equipment, jewelry, and clothing, to the extent that the aggregate appraised value of any interest in such property of all obligors on such loan does not exceed $7,500.

For the purpose of paragraph (2), such obligors shall select such property at such time and in such manner as the Secretary by regulations shall prescribe.

"(b)(1) Subsection (a) shall not apply in the case of a loan which—

"(A) was obtained for the purpose of acquiring, constructing, or improving a principal residence;

"(B) the Secretary subordinates to any other lien; or

"(C) an individual elects to waive.

"(2)(A) An individual may elect to waive subsection (a) only after receipt of notice of intent by the Secretary to take adverse action.

"(B) A waiver shall be revocable—

"(i) by such individual until the close of business on the second business day following the election to make such waiver, and

"(ii) after such day, upon consent of all parties to such loan.

"(c)(1) In lieu of the exemption in subsection (a)(1), the Secretary may exempt the first $50,000 of the proceeds from the sale of the principal residence if such residence may be sold under paragraph (2).

"(2) A principal residence may be sold if—

"(A) such residence is, and has been for less than 5 years, the principal residence of an obligor on such loan (determined as of the date the Secretary sends a notice of intent to take adverse action),

"(B) the appraised value of such residence is greater than $60,000, and

"(C) the highest acceptable bid for such residence is at least $60,000

"(d)(1) Any appraisal required by this section shall be by appraisers chosen by the Secretary.

"(2) The amounts in subsection (a)(2), (c)(2)(B), and (c)(2)(C) shall be adjusted as provided in section 331D.

"SEC. 331D. (a) The amounts referred to in section 331C(d)(2) shall be adjusted to reflect the change in the Index of Prices Paid by Farmers.

"(b) For purposes of subsection (a), the change in the Index of Prices Paid by Farmers is the percentage (if any) by which—

"(1) the most recently published Index of Prices Paid by Farmers, bears to

"(2) the Index of Prices Paid by Farmers as of the date of the enactment of this Act.

"(c) For purposes of subsection (b), the "Index of Prices Paid by Farmers" is the Index of Prices Paid by Farmers published by the Statistical Reporting Service, Department of Agriculture.".

(b) The amendment made by subsection (a) shall apply to any foreclosure after the date of the enactment of this Act.

Division C—Research, Extension, and Teaching

TITLE XIV—NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT AMENDMENTS OF 1985

SHORT TITLE

SEC. 1401. This title may be cited as the "National Agricultural Research, Extension, and Teaching Policy Act Amendments of 1985".

FINDINGS

SEC. 1402. Section 1402 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101) is amended by—

(1) in paragraph (8)—

(A) striking out "and" at the end of subparagraph (N);

(B) inserting "and" at the end of subparagraph (O); and

(C) adding, at the end thereof, the following:

"(P) research on new or improved food processing (such as food irradiation) or value-added food technologies;";

(2) in paragraph (10)—

(A) striking out "The research" and all that follows through the colon in the matter preceding the subparagraphs, and inserting in lieu thereof the following: "The research, extension, and teaching programs must be maintained and constantly adjusted to meet ever-changing challenges. National support of cooperative research, extension, and teaching efforts must be reaffirmed and strengthened to meet major needs and challenges in the following areas:";

(B) redesignating subparagraphs (B), (C), (D), (E), (F), and (G) as subparagraphs (C), (D), (F), (G), (H), and (I), respectively;

(C) inserting after subparagraph (A) the following:

"(B) AGRICULTURAL POLICY.—The effects of technological, economic, sociological, and environmental developments on our agricultural structure are strong and continuous. It is critical that emerging agricultural-related technologies, economic changes, and sociological and environmental developments, both national and international, be analyzed on a continuing basis in an interdisciplinary fashion to determine the effect of those forces on the structure of agriculture and to improve agricultural policy decisionmaking.";

(D) inserting after subparagraph (D), as redesignated by subparagraph (B) of this paragraph, the following:

"(E) COORDINATION OF THE REGULATORY RESPONSIBILITIES OF THE FEDERAL GOVERNMENT RELATING TO BIOTECHNOLOGY.—Biotechnology guidelines and regulations must be made consistent throughout the Federal Government so they may promote scientific development and protect the public. The biotechnology risk assessment processes used by various Federal agencies must be standardized.";

(E) amending subparagraph (F), as redesignated by subparagraph (B) of this paragraph, to read as follows:

"(F) NATURAL RESOURCES.—Improved management of soil, water, forest, and range resources is vital to maintain the resource base for food, fiber, and wood production. An expanded research program in the areas of soil and water conservation and forest and range production practices is needed to develop more economical and effective management systems. Key objectives of this research are—

"(i) incorporating water and soil-saving technologies into current and evolving production practices;

"(ii) developing more cost-effective and practical conservation technologies;

"(iii) managing water in stressed environments;

"(iv) protecting the quality of the Nation's surface water and groundwater resources;

"(v) establishing integrated multidisciplinary organic farming research projects, including research on alternative farming systems, that will identify options from which individual farmers may select the production components that are most appropriate for their individual situations;

"(vi) developing better targeted pest management systems; and

"(vii) improving forest and range management technologies that meet demands more efficiently, better protect multi-resource options, and enhance quality of output.";

(F) in subparagraph (G), as redesignated by subparagraph (B) of this paragraph, striking out "to" before "the economy" and striking out "owner-operated" before "family farms"; and

(G) amending subparagraph (I), as redesignated by subparagraph (B) of this paragraph, to read as follows:

"(I) INTERNATIONAL FOOD AND AGRICULTURE.—United States agricultural production has proven its ability to produce abundant quantities of food for an expanding world population. Despite rising expectation for improved diets in the world today, there are instances of drought, civil unrest, economic crisis, or other conditions that preclude the local production or distribution of food. There are instances where localized problems impede the ability of farmers to produce needed food products. It is also recognized that many nations have progressive and effective agricultural research programs that produce results of interest and applicability to United States agriculture. The exchange of knowledge and information between nations is essential to the well-being of all nations. A dedicated effort involving the Federal Government, the State cooperative institutions, and other colleges and universities is needed to expand international food and agricultural research, extension, and teaching programs. Improved cooperation and communication by the Department of Agriculture and the cooperators with international agricultural research centers, counterpart agencies, and universities in other nations are necessary to improve food and agricultural progress throughout the world.";

(3) striking out the period at the end of paragraph (11) and inserting in lieu thereof "; and"; and

(4) adding at the end thereof the following:

"(12) the Nation's agricultural system is increasingly dependent on science and technology to maintain and improve productivity levels, manage the resource base, provide high quality products, and protect the environment. A constant source of food and agricultural scientific expertise is imperative to maintain this dynamic system.".

DEFINITIONS

SEC. 1403. Section 1404(8) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3103(8)) is amended by—

(1) striking out "and" at the end of subparagraph (H);

(2) adding "and" at the end of subparagraph (I); and

(3) adding at the end thereof the following:

"(J) international food and agricultural issues such as agricultural development, institution development, germ plasm collection and preservation, information exchange and storage, and scientific exchanges;".

COORDINATION OF EFFORTS FOR EFFECTIVE TRANSFER OF NEW TECHNOLOGIES

SEC. 1404. Section 1405 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3121) is amended by—

(1) striking out "and" at the end of paragraph (10);

(2) striking out the period at the end of paragraph (11) and inserting in lieu thereof "; and"; and

(3) adding at the end thereof the following:

"(12) coordinate the efforts of States, State cooperative institutions, State extension services, the Joint Council, the Advisory Board, and other appropriate institutions in assessing the current status of, and developing a plan for, the effective transfer of new technologies, including biotechnology, to the farming community, with particular emphasis on addressing the unique problems of small- and medium-sized farms in gaining information about those technologies.".

JOINT COUNCIL ON FOOD AND AGRICULTURAL SCIENCES

SEC. 1405. (a) Section 1407(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(a)) is amended by striking out "1985" and inserting in lieu thereof "1990".

(b) Section 1407(d)(2) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(d)(2)) is amended by—

(1) striking out "and" at the end of subparagraph (F);

(2) striking out the period at the end of subparagraph (F) and inserting in lieu thereof "; and"; and

(3) adding at the end thereof the following:

"(H) coordinate with the Secretary in assessing the current status of, and developing a plan for, the effective transfer of new technologies to the farming community.".

NATIONAL AGRICULTURAL RESEARCH AND EXTENSION USERS ADVISORY BOARD

SEC. 1406. (a) Section 1408(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3123(a)) is amended by striking out "1985" and inserting in lieu thereof "1990".

(b) Section 1408(f)(2) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3123(f)(2)) is amended by—

(1) striking out "and" at the end of subparagraph (E);

(2) striking out the period at the end of subparagraph (F) and inserting in lieu thereof "; and"; and

(3) adding at the end thereof the following:

"(G) coordinating with the Secretary in assessing the current status of, and developing a plan for, the effective transfer of new technologies to the farming community.".

PROJECT TERMINATION

SEC. 1407. Section 1409 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3124) is amended by—

(1) inserting "(a)" after "SEC. 1409."; and

(2) adding at the end thereof the following:

"(b) In the event that a research project being conducted by the Agricultural Research Service is proposed to be terminated, notice in writing of such intended action shall be given to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate at least fifteen days prior to the date of the proposed termination of the project.".

FEDERAL-STATE PARTNERSHIP AND COORDINATION

SEC. 1408. Section 1409A of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3124a) is amended by—

(1) in the first sentence of subsection (a)—

(A) striking out "and" at the end of paragraph (2);

(B) striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and"; and

(C) adding at the end thereof the following:

"(4) international agricultural programs under sections 296 through 300 of the Foreign Assistance Act of 1961 (22 U.S.C. 2220a-2220e).";and

(2) adding at the end thereof the following:

"(d) To promote research for purposes of developing agricultural policy alternatives, the Secretary shall designate at least one State cooperative institution to conduct research in an interdisciplinary fashion and to report on a regular basis with respect to the effect of emerging technological, economic, sociological, and environmental developments on the structure of agriculture. Support for this effort should include grants to examine the role of various food production, processing, and distribution systems that may primarily benefit small- and medium-sized family farms, such as diversified farm plans, energy, water, and soil conservation technologies, direct and cooperative marketing, production and processing cooperatives, and rural community resource management.

"(e) To address more effectively the critical need for reducing farm input costs, improving soil, water, and energy conservation on farms and in rural areas, using sustainable agricultural methods, adopting alternative processing and marketing systems, and encouraging rural resources management, the Secretary shall designate at least one State agricultural experiment station and one Agricultural Research Service facility to examine these issues in an integrated and comprehensive manner, while conducting ongoing pilot projects contributing additional research through the Federal-State partnership.".

SECRETARY'S REPORT

SEC. 1409. Section 1410 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3125) is amended by—

(1) adding "and" after the semicolon at the end of paragraph (2);

(2) striking out the semicolon and "and" at the end of paragraph (3) and inserting in lieu thereof a period; and

(3) striking out paragraph (4).

COMPETITIVE, SPECIAL, AND FACILITIES RESEARCH GRANTS

SEC. 1410. (a) Section 2 of the Act entitled "An Act to facilitate the work of the Department of Agriculture, and for other purposes", approved August 4, 1965 (7 U.S.C. 450i), is amended by—

(1) in the third sentence of subsection (b)—

(A) in paragraph (2), inserting ", with emphasis on biotechnology," after "(2) research";

(B) striking out "and" at the end of paragraph (5);

(C) striking out the period at the end of paragraph (6) and inserting in lieu thereof a semicolon; and

(D) adding at the end thereof the following:

"(7) interdisciplinary agricultural policy research on the effect of emerging technologies, economic changes, and sociological and environmental developments on the structure of agriculture; and

"(8) research to reduce farm input costs through the collection of national and international data and the transfer of appropriate technology relating to sustainable agricultural systems, soil, energy, and water conservation technologies, rural and farm resource management, and the diversification of farm product processing and marketing systems.";

(2) effective on the later of the date of the enactment of this Act or October 1, 1985, after the fourth sentence of subsection (b), inserting the following:

"No grant may be made under this subsection for any purpose for which a grant may be made under subsection (d) or for the planning, repair, rehabilitation, acquisition, or construction of a building or a facility.";

(3) effective October 1, 1985, striking out the last sentence in subsection (b) and inserting in lieu thereof the following:

"There are hereby authorized to be appropriated annually, for the purpose of carrying out the provisions of this subsection, such sums as may be necessary for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990. Four per centum of the amount appropriated for each of such fiscal years to carry out this subsection shall be retained by the Secretary to pay administrative costs incurred by the Secretary to carry out this subsection.";

(4) effective on the later of the date of the enactment of this Act or October 1, 1985, in subsection (c) by adding after the first sentence the following:

"No grant may be made under this subsection for any purpose for which a grant may be made under subsection (d) or for the planning, repair, rehabilitation, acquisition, or construction of a building or facility.";

(5) effective October 1, 1985, adding at the end of subsection (c) the following:

"Four per centum of the amount appropriated for any fiscal year to carry out this subsection shall be retained by the Secretary to pay administrative costs incurred by the Secretary to carry out this subsection."; and

(6) adding at the end thereof the following:

"(i) The Federal Advisory Committee Act (5 U.S.C. App.) and title XVIII of the Food and Agriculture Act of 1977 (7 U.S.C. 2281-2289) shall not apply to panels or boards created for the purpose of reviewing applications or proposals submitted under the provisions of this section.".

RESEARCH FACILITIES ACT

SEC. 1411. (a) Section 1 of the Act entitled "An Act to assist the States to provide additional facilities for research at the State agricultural experiment stations", approved July 22, 1963 (hereinafter in this section referred to as the "Act of July 22, 1963) (7 U.S.C. 390), is amended by—

(1) inserting "and equipment" after "finance physical facilities"; and

(2) striking out "an adequate research program" and inserting in lieu thereof "agricultural research and related academic programs".

(b) Section 2 of the Act of July 22, 1963 (7 U.S.C. 390a), is amended by striking out "which are to become a part of such buildings".

(c) Section 3 of the Act of July 22, 1963 (7 U.S.C. 390b), is amended by—

(1) amending paragraph (1) to read as follows:

"(1) the term 'State' means any one of the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and the Virgin Islands of the United States;"; and

(2) inserting ", forestry, or veterinary medicine" after "to conduct agricultural" in paragraph (2).

(d) Section 4 of the Act of July 22, 1963 (7 U.S.C. 390c), is amended by—

(1) effective October 1, 1985, amending subsection (a) to read as follows:

"(a) There are hereby authorized to be appropriated, for grants to eligible institutions under this Act to be used for the purpose set out in section 2 of this Act, $20,000,000 for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990."; and

(2) amending subsection (b) to read as follows:

"(b) No grant may be made under section 2 of this Act for an amount exceeding 50 per centum of the cost of the project for which such grant is made. The remaining cost of such project shall be paid with funds from non-Federal sources.".

(e) Section 5 of the Act of July 22, 1963 (7 U.S.C. 390d), is amended by—

(1) striking out "apportioned" and inserting in lieu thereof "appropriated"; and

(2) striking out ", which are to become part of such buildings".

(f) Section 6 of the Act of July 22, 1963 (7 U.S.C. 390e), is repealed.

(g) Section 7 of the Act of July 22, 1963 (7 U.S.C. 390f), is amended by—

(1) inserting "equipment and" after "multiple-purpose"; and

(2) inserting "and related programs, including forestry and veterinary medicine," after "food and agricultural research".

(h) Section 8 of the Act of July 22, 1963 (7 U.S.C. 390g), is repealed.

(i)(1) Section 9(a) of the Act of July 22, 1963 (7 U.S.C. 390h(a)), is amended by—

(A) striking out "authorized to receive" and inserting in lieu thereof "that receives";

(B) striking out "section 4" and inserting in lieu thereof "section 2"; and

(C) striking out "section 4(b)" and inserting in lieu thereof "section 3(2)".

(2) Section 9(b) of the Act of July 22, 1963 (7 U.S.C. 390h(b)), is amended by—

(A) striking out "allotted funds received" and inserting in lieu thereof "funds received under this Act"; and

(B) striking out "allocated or".

(j) Clause (3) of section 10 of the Act of July 22, 1963 (7 U.S.C. 390i), is amended to read as follows: "(3) those eligible institutions, if any, that were prevented, because of failure to repay funds as required by section 7(b) of this Act, from receiving any grant under this Act".

(k) Sections 7, 9, 10, and 11 of the Act of July 22, 1963 (7 U.S.C. 390f, 390h, 390i, 390j), are redesignated as sections 6, 7, 8, and 9, respectively.

(l) The Act of July 22, 1963 (7 U.S.C. 390 et seq.), is amended by adding at the end thereof the following:

"SEC. 10. This Act may be cited as the 'Research Facilities Act'.".

GRANTS AND FELLOWSHIPS FOR FOOD AND AGRICULTURAL SCIENCES EDUCATION

SEC. 1412. (a) Section 1417(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3152(a)) is amended by—

(1) striking out "Such grants shall be made without regard to matching funds, but each" in the last sentence of paragraph (2) and inserting in lieu thereof "Each"; and

(2) striking out the last sentence in paragraph (3) and inserting in lieu thereof: "Each recipient institution shall have a significant ongoing commitment to the food and agricultural sciences generally and to the specific subject area for which such a grant is to be used.".

(b) Effective October 1, 1985, section 1417(d) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3152(d)) is amended by striking out all after "provisions of this section" and inserting in lieu thereof "such sums as may be necessary for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990.".

(c) Section 1417 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3152) is amended by adding at the end thereof the following new subsection:

"(e) The Federal Advisory Committee Act (5 U.S.C. App.) and title XVIII of the Food and Agriculture Act of 1977 (7 U.S.C. 2281-2289) shall not apply to panels or boards created for the purpose of reviewing applications or proposals submitted under the provisions of this section.".

STUDY

SEC. 1413. (a) Section 1424 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3174) is repealed.

(b) The table of contents of the Food and Agriculture Act of 1977 is amended by striking out

"Sec. 1424. Study."

and inserting in lieu thereof

"Sec. 1424. Repealed.".

HUMAN NUTRITION RESEARCH AND INFORMATION MANAGEMENT SYSTEM

SEC. 1414. (a) Section 1427 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3177) is repealed.

(b) The table of contents of the Food and Agriculture Act of 1977 is amended by striking out

"Sec. 1427. Report to Congress."

and inserting in lieu thereof

"Sec. 1427. Repealed.".

ANIMAL HEALTH SCIENCE RESEARCH ADVISORY BOARD

SEC. 1415. The first sentence of section 1432(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3194(a)) is amended by striking out "1985" and inserting in lieu thereof "1990".

APPROPRIATIONS FOR CONTINUING ANIMAL HEALTH AND DISEASE RESEARCH PROGRAMS

SEC. 1416. The first sentence of section 1433(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3195(a)) is amended by striking out "1985" and all that follows through the end of the sentence and inserting in lieu thereof "1990.".

APPROPRIATIONS FOR RESEARCH ON NATIONAL OR REGIONAL PROBLEMS

SEC. 1417. Subsection (a) of section 1434 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3196(a)) is amended by striking out "1985" and all that follows through the end of the subsection and inserting in lieu thereof "1990.".

EXTENSION AT 1890 LAND-GRANT COLLEGES, INCLUDING TUSKEGEE INSTITUTE

SEC. 1418. The third sentence of section 1444(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3221(a)) is amended by—

(1) striking out ", through the fiscal year ending September 30, 1985,"; and

(2) inserting before the period at the end thereof the following: ", and related acts pertaining to cooperative extension work at the land-grant institutions identified in the Act of May 8, 1914".

AUTHORITY TO AWARD GRANTS TO UPGRADE 1890 LAND-GRANT COLLEGE EXTENSION FACILITIES

SEC. 1419. (a) It is hereby declared to be the intent of Congress to assist the institutions eligible to receive funds under the Act of August 30, 1890 (7 U.S.C. 321 et seq.), including Tuskegee Institute (hereinafter referred to in this section as "eligible institutions"), in the acquisition and improvement of extension facilities and equipment so that eligible institutions may participate fully with the State cooperative extension services in a balanced way in meeting the extension needs of the people of their respective States.

(b) There are authorized to be appropriated for the purpose of carrying out this section $10,000,000 for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990, such sums to remain available until expended.

(c) Four per centum of the sums appropriated under this section shall be available to the Secretary of Agriculture for administration of the grants program under this section. The remaining funds shall be made available for grants to the eligible institutions for the purpose of assisting them in the purchase of equipment and land, and the planning, construction, alteration, or renovation of buildings, to provide adequate facilities to conduct extension work in their respective States.

(d) Grants awarded under this section shall be made in such amounts and under such terms and conditions as the Secretary of Agriculture shall determine necessary for carrying out the purposes of this section.

(e) Federal funds provided under this section may not be used for the payment of any overhead costs of the eligible institutions.

(f) The Secretary of Agriculture may promulgate such rules and regulations as the Secretary deems necessary to carry out the provisions of this section.

AGRICULTURAL RESEARCH AT 1890 LAND-GRANT COLLEGES, INCLUDING TUSKEGEE INSTITUTE

SEC. 1420. Section 1445 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3222) is amended by—

(1) adding at the end of subsection (a) the following: "No more than 5 per centum of the funds received by an institution in any fiscal year, under this section, may be carried forward to the succeeding fiscal year."; and

(2) amending subsection (g)(2) to read as follows:

"(2) Whenever it shall appear to the Secretary from the annual statement of receipts and expenditures of funds by any eligible institution that an amount in excess of 5 per centum of the preceding annual appropriation allotted to that institution under this section remains unexpended, such amount in excess of 5 per centum of the preceding annual appropriation allotted to that institution shall be deducted from the next succeeding annual allotment to the institution.".

INTERNATIONAL AGRICULTURAL RESEARCH AND EXTENSION

SEC. 1421. Section 1458(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3291(a)) is amended by—

(1) striking out "the training" in paragraph (3) and inserting in lieu thereof "technical assistance and the training and advising"; and

(2) inserting "through the development of highly qualified scientists with specialization in international development" in paragraph (4) after "countries".

INTERNATIONAL TRADE DEVELOPMENT CENTERS

SEC. 1422. (a) Effective October 1, 1985, the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101 et seq.) is amended by inserting, after section 1458, the following:

"GRANTS TO STATES FOR INTERNATIONAL TRADE DEVELOPMENT CENTERS

"SEC. 1458A. (a) The Secretary shall establish and carry out a program to make grants to States for the establishment and operation of international trade development centers, or the expansion of existing international trade development centers, in the United States to enhance the exportation of agricultural products and related products. Such grants shall be based on a matching formula of 50 per centum Federal and 50 per centum State funding (including funds received by the State from private sources and from units of local government).

"(b) In making grants under subsection (a), the Secretary shall give preference to States that intend to use, as sites for international trade development centers, land-grant colleges and universities (as defined in section 1404(10) of this Act) that—

"(1) operate agricultural programs;

"(2) have existing international trade programs that use an interdisciplinary approach and are operated jointly with State and Federal agencies to address international trade problems; and

"(3) have an effective and progressive communications system that might be linked on an international basis to conduct conferences or trade negotiations.

"(c) Such centers may—

"(1) through research, establish a permanent data base to address the problems faced by potential exporters, including language

barriers, interaction with representatives of foreign governments, transportation of goods and products, insurance and financing within foreign countries, and collecting international marketing data;

"(2) be used to house permanent or temporary exhibits that will stimulate and educate trade delegations from foreign nations with respect to agricultural products and related products produced in the United States and be made available for use by State and regional entities for exhibits, trade seminars, and negotiations involving such products; and

"(3) carry out such other activities relating to the exportation of agricultural products and related products as the Secretary may approve.

"(d) There are hereby authorized to be appropriated such sums as are necessary to carry out the provisions of this section.".

(b) Effective October 1, 1985, the table of contents of the Food and Agriculture Act of 1977 is amended by inserting a new item:

"Sec. 1458A. Grants to States for international trade development centers."

after the item

"Sec. 1458. International agricultural research and extension.".

AGRICULTURAL INFORMATION EXCHANGE WITH IRELAND

SEC. 1423. The Secretary of Agriculture shall undertake discussions with representatives of the Government of Ireland that may lead to an agreement that will provide for the development of a program between the United States and Ireland whereby there will be a greater exchange of agricultural scientific and educational information, techniques, and data; agricultural marketing information, techniques, and data; and agricultural producer, student, teacher, agribusiness (private and cooperative) personnel; and the fostering of joint investment ventures, cooperative research, and the expansion of United States trade with Ireland. The Secretary shall periodically report to the Chairman of the Committee on Agriculture of the House of Representatives and the Chairman of the Committee on Agriculture, Nutrition, and Forestry of the Senate to keep such committees apprised of the progress and accomplishments, and such other information as the Secretary deems appropriate, with regard to the development of such program.

EVALUATION OF THE EXTENSION SERVICE AND THE COOPERATIVE EXTENSION SERVICES

SEC. 1424. (a) Section 1459 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3301) is repealed.

(b) The table of contents of the Food and Agriculture Act of 1977 is amended by striking out

"Sec. 1459. Evaluation of the Extension Service and the Cooperative Extension Services."

and inserting in lieu thereof

"Sec. 1459. Repealed.".

WEATHER AND WATER ALLOCATION STUDY

SEC. 1425. (a) Section 1460 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3302) is repealed.

(b) The table of contents of the Food and Agriculture Act of 1977 is amended by striking out

"Sec. 1460. Weather and water allocation study."

and inserting in lieu thereof

"Sec. 1460. Repealed.".

ORGANIC FARMING STUDY

SEC. 1426. (a) Section 1461 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3303) is repealed.

(b) The table of contents of the Food and Agriculture Act of 1977 is amended by striking out

"Sec. 1461. Organic farming study."

and inserting in lieu thereof

"Sec. 1461. Repealed.".

AGRICULTURAL RESEARCH FACILITIES STUDY

SEC. 1427. (a) Section 1462 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3304) is repealed.

(b) The table of contents of the Food and Agriculture Act of 1977 is amended by striking out

"Sec. 1462. Agricultural research facilities study."

and inserting in lieu thereof

"Sec. 1462. Repealed.".

AUTHORIZATION OF APPROPRIATIONS FOR AGRICULTURAL RESEARCH PROGRAMS

SEC. 1428. (a) Effective October 1, 1985, section 1463(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311(a)) is amended by striking out "$505,000,000" and all that follows through "subsequent fiscal year", and inserting in lieu thereof "$600,000,000 for the fiscal year ending September 30, 1986, $610,000,000 for the fiscal year ending September 30, 1987, $620,000,000 for the fiscal year ending September 30, 1988, $630,000,000 for the fiscal year ending September 30, 1989, and $640,000,000 for the fiscal year ending September 30, 1990".

(b) Effective October 1, 1985, section 1463(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311(b)) is amended by striking out "$120,000,000" and all that follows through "subsequent fiscal year", and inserting in lieu thereof "$270,000,000 for the fiscal year ending September 30, 1986, $280,000,000 for the fiscal year ending September 30, 1987, $290,000,000 for the fiscal year ending September 30, 1988, $300,000,000 for the fiscal year ending September 30, 1989, and $310,000,000 for the fiscal year ending September 30, 1990".

AUTHORIZATION OF APPROPRIATIONS FOR EXTENSION EDUCATION

SEC. 1429. Effective October 1, 1985, section 1464 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3312) is amended by striking out "$260,000,000" and all that follows through "subsequent fiscal year", and inserting in lieu thereof "$350,000,000 for the fiscal year ending September 30, 1986, $360,000,000 for the fiscal year ending September 30, 1987, $380,000,000 for the fiscal year ending September 30, 1988, $400,000,000 for the fiscal year ending September 30, 1989, and $420,000,000 for the fiscal year ending September 30, 1990".

GENERAL AUTHORITY TO ENTER INTO CONTRACTS, GRANTS, AND COOPERATIVE AGREEMENTS

SEC. 1430. Section 1472 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3318) is amended by—

(1) redesignating subsections (b), (c), and (d) as subsections (c), (d), and (e), respectively; and

(2) inserting after subsection (a) the following:

"(b) Notwithstanding the provisions of chapter 63 of title 31 of the United States Code, the Secretary may use a cooperative agreement as the legal instrument reflecting a relationship between the Department of Agriculture and State cooperative institutions, as defined in section 1404(16) of this Act, State departments of agriculture, colleges and universities, other research or educational institutions and organizations, Federal and private agencies and organizations, individuals, or any other party, when the Secretary determines that the objectives of the agreement will serve a mutual interest of the parties to the agreement in agricultural research, extension, and teaching activities, including statistical reporting, and that all parties will contribute resources to the accomplishment of those objectives. Notwithstanding any other provision of law, any Federal agency may participate in any such cooperative agreement by contributing funds through the appropriate agency of the Department of Agriculture or otherwise when it is mutually agreed that the objectives of the agreement will further the authorized programs of the contributing agency.".

RESTRICTION ON TREATMENT OF INDIRECT COSTS AND TUITION REMISSION

SEC. 1431. Section 1473 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3319) is amended by inserting at the end thereof the following: "The prohibition on the use of funds for the reimbursement of indirect costs shall not apply to funds transferred, advanced, or reimbursed to the Department of Agriculture under the provisions of the Foreign Assistance Act of 1961 (22 U.S.C. 2151 et seq.). For agreements involving the use of such funds, the amount of indirect costs to be reimbursed shall be negotiated on a case-by-case basis.".

DIRECTION OF TECHNOLOGY DEVELOPMENT

SEC. 1432. (a) The National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101 et seq.) is amended by inserting after section 1473 the following new sections 1473A and 1473B:

"TECHNOLOGY DEVELOPMENT FOR SMALL- AND MEDIUM-SIZED FARMING OPERATIONS

"SEC. 1473A. It is the sense of Congress that the agricultural research, extension, and teaching activities conducted by the Department of Agriculture relating to the development, application, transfer, or delivery of agricultural technology, and, to the greatest extent practicable, any funding that is received by the Department of Agriculture for such activities, should be directed to technology that can be used effectively by small- and medium-sized farming operations.

"SPECIAL TECHNOLOGY DEVELOPMENT RESEARCH PROGRAM

"SEC. 1473B. (a) Notwithstanding the provisions of chapter 63 of title 31 of the United States Code, the Secretary may enter into cooperative agreements with private agencies, organizations, and individuals to share the cost of research projects, or to allow the use of Federal facilities and services on a cost-sharing or cost-reimbursable basis, to develop new agricultural technology to further the research programs of the Department of Agriculture.

"(b) Any funds received by the Secretary under cooperative agreements made under subsection (a) shall be deposited in a separate account or accounts, to be available until expended. Such funds may be used to pay directly the cost of such research projects or to supplement appropriations of

funds that do or will bear all or part of such cost.".

(b) The table of contents of the Food and Agriculture Act of 1977 is amended by inserting new items:

"Sec. 1473A. Technology development for small- and medium-sized farming operations.

"Sec. 1473B. Special technology development research program."

after the item

"Sec. 1473. Restriction on treatment of indirect costs and tuition remission.".

SUPPLEMENTAL AND ALTERNATIVE CROPS

SEC. 1433. (a) The National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101 et seq.), as amended by section 1432 of this Act, is amended by inserting after section 1473B the following new section:

"PILOT PROGRAM AND TECHNICAL ASSISTANCE TO ESTABLISH SUPPLEMENTAL AND ALTERNATIVE CROPS

"SEC. 1473C. Notwithstanding any other provision of law, during the period beginning October 1, 1986, and ending September 30, 1989, the Secretary shall develop and implement a research and pilot project program for the development of supplemental and alternative crops, using such funds as are appropriated to the Secretary each fiscal year under this title. The development of supplemental and alternative crops is of critical importance to producers of agricultural commodities whose livelihood is threatened by the decline in demand experienced with respect to certain of their crops due to changes in consumption patterns or other related causes. The Secretary shall use such research funding, special or competitive grants, or other means, as the Secretary determines, to further the purposes of this section in the implementation of a comprehensive and integrated program. The program developed and implemented by the Secretary shall include—

"(1) an examination of the adaptation of supplemental and alternative crops;

"(2) the establishment and extension of various methods of planting, cultivating, harvesting, and processing supplemental and alternative crops at pilot sites in areas adversely affected by declining demand for crops grown in the area;

"(3) the transfer of such applied research from pilot sites to on-farm practice as soon as practicable;

"(4) the establishment through grants, cooperative agreements, or other means of such processing, storage, and transportation facilities near such pilot sites for supplemental and alternative crops as the Secretary determines will facilitate the achievement of a successful pilot program; and

"(5) the application of such other resources and expertise as the Secretary deems appropriate to support the program.

The pilot program may include, but shall not be limited to, agreements, grants, and other arrangements to conduct comprehensive resource and infrastructure assessments, to develop and introduce supplemental and alternative income-producing crops, to develop and expand domestic and export markets for such crops, and to provide technical assistance to farm owners and operators, marketing cooperatives, and others. The Secretary shall use the expertise and resources of the Agricultural Research Service, the Cooperative State Research Service, the Extension Service, and the land-grant colleges and universities for the purpose of carrying out this section.".

(b) The table of contents of the Food and Agriculture Act of 1977, as amended by section 1432 of this Act, is amended by inserting after the item relating to section 1473B the following new item:

"Sec. 1473C. Pilot program and technical assistance to establish supplemental and alternate crops.".

AQUACULTURE ASSISTANCE PROGRAMS

SEC. 1434. Section 1475 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3322) is amended by—

(1) in the first sentence of subsection (b)—

(A) striking out "and" at the end of paragraph (2);

(B) inserting "and" at the end of paragraph (3); and

(C) inserting after paragraph (3) the following:

"(4) nonprofit private research institutions;";

(2) in the last sentence of subsection (b), inserting "(of which amount an in-kind contribution may not exceed 50 percent)" after "matching grant";

(3) in the first sentence of subsection (d), striking out "State agencies" and all that follows through "universities,", and inserting in lieu thereof "any of the non-Federal entities specified in subsection (b)"; and

(4) amending the last sentence of subsection (d) to read as follows:

"Funds made available for the operation of such regional centers may be used for the acquisition or rehabilitation of existing buildings or facilities, or the construction of new buildings or facilities, to house such centers, except that not more than $250,000 may be used for the acquisition, rehabilitation, or construction of any single building or facility.".

AQUACULTURE ADVISORY BOARD

SEC. 1435. The first sentence of section 1476(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3323(a)) is amended by striking out "1985" and inserting in lieu thereof "1990".

AUTHORIZATION OF APPROPRIATIONS—AQUACULTURE RESEARCH

SEC. 1436. (a) Section 1477(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3324(a)) is amended by striking out "1985" and all that follows down through "subsequent fiscal year", and inserting in lieu thereof "1990".

(b) Section 1477(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3324(b)) is amended by—

(1) striking out the first sentence; and

(2) in the second sentence, striking out "these funds" and inserting in lieu thereof "funds appropriated under subsection (a)".

RANGELAND RESEARCH ADVISORY BOARD

SEC. 1437. The first sentence of section 1482(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3335(a)) is amended by striking out "1985" and inserting in lieu thereof "1990".

AUTHORIZATION OF APPROPRIATIONS—RANGELAND RESEARCH

SEC. 1438. Section 1483(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3336(a)) is amended by striking out "1985" and all that follows down through "subsequent fiscal year", and inserting in lieu thereof "1990".

AUTHORIZATION OF APPROPRIATIONS FOR FEDERAL AGRICULTURAL RESEARCH FACILITIES

SEC. 1439. (a) There are authorized to be appropriated for fiscal year 1988 and for each succeeding fiscal year such sums as may be necessary for the planning, construction, acquisition, alteration, and repair of buildings and other public improvements, including the cost of acquiring or obtaining rights to use land, of or used by the Agricultural Research Service, except that the cost of planning any one facility shall not exceed $500,000, and the total cost of any one facility shall not exceed $5,000,000.

(b) Not later than 60 days after the end of each of the fiscal years 1986 through 1990, the Secretary of Agriculture shall submit to the Committee on Agriculture of the House of Representatives and to the Committee on Agriculture, Nutrition, and Forestry of the Senate a report specifying—

(1) the location of each building, laboratory, research facility, and other public improvement of or to be used by the Agricultural Research Service that is planned, constructed, acquired, repaired, or remodeled, with funds appropriated under subsection (a), in the fiscal year involved; and

(2) with respect to each such building, laboratory, research facility, and improvement—

(A) the amount of such funds obligated in the fiscal year; and

(B) the amount of such funds expended in the fiscal year for such item.

AGRICULTURAL RESEARCH AT 1890 LAND-GRANT COLLEGES, INCLUDING TUSKEGEE INSTITUTE

SEC. 1440. Effective October 1, 1985, section 1432(b)(5) of the National Agricultural Research, Extension, and Teaching Policy Act Amendments of 1981 (7 U.S.C. 3222 note) is amended by striking out "September" the first place it appears and all that follows through "1985", and inserting in lieu thereof "September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990".

AUTHORITY TO AWARD GRANTS TO UPGRADE 1890 LAND-GRANT COLLEGE RESEARCH FACILITIES, INCLUDING TUSKEGEE INSTITUTE

SEC. 1441. (a) Section 1433(a) of the National Agricultural Research, Extension, and Teaching Policy Act Amendments of 1981 (7 U.S.C. 3223(a)) is amended by inserting ", including agricultural libraries," after "research facilities and equipment".

(b) Section 1433(b) of the National Agricultural Research, Extension, and Teaching Policy Act Amendments of 1981 (7 U.S.C. 3223(b)) is amended by—

(1) striking out "and" before "September 30, 1986"; and

(2) inserting "and September 30, 1987," after "1986,".

SOYBEAN RESEARCH ADVISORY INSTITUTE

SEC. 1442. (a) Section 1446 of the National Agricultural Research, Extension, and Teaching Policy Act Amendments of 1981 (7 U.S.C. 2281 note) is repealed.

(b) The table of contents of the Agriculture and Food Act of 1981 is amended by striking out

"Sec. 1446. Soybean Research Advisory Institute."

and inserting in lieu thereof

"Sec. 1446. Repealed.".

SMITH-LEVER ACT

SEC. 1443. (a) Section 2 of the Act entitled "An Act to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an Act of Congress approved July

second, eighteen hundred and sixty-two, and Acts supplementary thereto, and the United States Department of Agriculture", approved May 8, 1914 (hereinafter in this section referred to as the Smith-Lever Act) (7 U.S.C. 342) is amended by—

(1) inserting "development of practical applications of research knowledge and" after "consist of the"; and

(2) inserting "of existing or improved practices or technologies" after "practical demonstrations".

(b) Section 3 of the Smith-Lever Act (7 U.S.C. 343) is amended by adding at the end thereof the following:

"(f)(1) The Secretary of Agriculture may conduct educational, instructional, demonstration, and publication distribution programs through the Federal Extension Service and may enter into cooperative agreements with private nonprofit and profit organizations and individuals to share the cost of such programs through contributions from private sources as provided in this subsection.

"(2) The Secretary may receive contributions under this subsection from private sources for the purposes described in paragraph (1) and may provide matching funds in an amount not greater than 50 per centum of such contributions.

"(3) Notwithstanding any other provision of law, beginning with the fiscal year ending September 30, 1986, and for each fiscal year thereafter through the fiscal year ending September 30, 1991, not more than one-half of one per centum of the funds appropriated to the Federal Extension Service for such fiscal year may be used to provide matching funds in accordance with paragraph (2).

"(4) Not later than one year after the date of the enactment of the Food Security Act of 1985, the Secretary shall submit a report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on the progress of such programs and shall make recommendations to the committees regarding how other similar private sector initiatives could be used by the Federal Extension Service.".

(c) The Secretary of Agriculture shall conduct a study to determine whether any funds that are—

(1) appropriated after the date of the enactment of this Act to carry out the Smith-Lever Act (7 U.S.C. 341 et seq.), other than section 8 of such Act; and

(2) in excess of the aggregate amount appropriated to carry out the Smith-Lever Act (other than section 8 of such Act) in fiscal year 1985;

can be allocated more effectively among the States. Not later than one year after the date of the enactment of this Act, the Secretary shall submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate a report summarizing the results of such study and containing the recommendations of the Secretary regarding the allocation of such funds.

(d) This section and the amendments made by this section shall take effect on October 1, 1985.

PESTICIDE RESISTANCE STUDY

SEC. 1444. The Secretary of Agriculture shall conduct a study on the detection and management of pesticide resistance and, within one year after the date of enactment of this Act, submit to the President and Congress a report on this study. The study shall include—

(1) a review of existing efforts to examine and identify the mechanisms, genetics, and ecological dynamics of target populations of insect and plant pests developing resistance to pesticides;

(2) a review of existing efforts to monitor current and historical patterns of pesticide resistance; and

(3) a strategy for the establishment of a national pesticide resistance monitoring program, involving Federal, State, and local agencies, as well as the private sector.

DIETARY ASSESSMENT AND STUDIES

SEC. 1445. (a)(1) The Secretary of Agriculture shall conduct an assessment of existing scientific literature regarding the relationship, if any, between dietary cholesterol and blood cholesterol. The Secretary shall consult with all agencies of the Federal Government that are involved in research relating to dietary and blood cholesterol in conducting the assessment. The assessment, to the extent practicable, shall summarize and evaluate all existing literature on this subject.

(2) The Secretary shall develop a protocol and conduct a feasibility assessment for a definitive study by the Department of Agriculture on the relationship between dietary and serum cholesterol. Such study shall be conducted under the supervision and coordination of the Department of Agriculture with such assistance from other agencies of government as the Secretary may deem appropriate.

(3) The Secretary shall submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate a report on the results of the findings under paragraphs (1) and (2) not later than one year after date of the enactment of this Act. Such report shall contain a final report on the assessment of existing research and literature required under paragraph (1) and a detailed protocol and plan for implementation of the study mandated under paragraph (2). The report shall contain a budget estimate and timetable for conduct and completion of the study provided for in paragraph (2).

(b)(1) The Secretary of Agriculture shall conduct an assessment of existing research and literature with regard to dietary calcium and its importance as a nutrient. The Secretary shall consult with all agencies of the Federal Government that are involved in research relating to calcium in conducting the assessment. The assessment, to the extent practicable, shall summarize and evaluate all existing literature on this subject.

(2) The Secretary shall develop a protocol for a study to determine the importance of dietary calcium in human development and health promotion. The study shall include, at a minimum, a comprehensive investigation of the role of calcium in bone health and maintenance of skeletal integrity as well as in the regulation of hypertension. The study shall be conducted under the supervision and coordination of the Department of Agriculture, with such assistance from other agencies of government and private sector organizations as the Secretary may deem appropriate.

(3) The Secretary shall submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate a report on the results of the Secretary's findings under paragraphs (1) and (2) not later than one year after the date of the enactment of this Act. Such report shall contain an assessment of existing research and literature required by paragraph (1) and a detailed protocol and plan for implementation of the study required by paragraph (2). The report shall contain a budget estimate and timetable for conducting and completing the study required by paragraph (2).

NUTRITION RESEARCH

SEC. 1446. (a) Congress, by the National Agricultural Research, Extension, and Teaching Policy Act of 1977, (1) in section 1421 of such Act, found that nutrition and health considerations are important factors in the agricultural policy of the United States; (2) in section 1405 of such Act, designated the Department of Agriculture as the lead agency of the Federal Government for human nutrition research, except with respect to the biomedical aspects of nutrition research concerned with diagnosis for treatment of disease; and (3) in section 1423 of such Act, required the Secretary of Agriculture to establish research in food and human nutrition as a separate and distinct mission of the Department of Agriculture.

(b) Congress acknowledges that the Secretary of Agriculture has established a nutrition education program and reaffirms its belief that nutrition research continues to have a vital role in agricultural production.

(c) Not later than one year after the date of the enactment of this Act, the Secretary of Agriculture shall submit to the appropriate committees of Congress a comprehensive plan for implementing a national food and human nutrition research program. The plan shall include, but not be limited to, recommendations relating to research directions, educational activities, and funding levels necessary to carry out such plan. The Secretary shall thereafter submit an annual report to the Congress on the human nutrition research activities of the Department of Agriculture.

SPECIAL GRANTS FOR FINANCIALLY STRESSED FARMERS AND DISLOCATED FARMERS

SEC. 1447. (a) Section 502 of the Rural Development Act of 1972 (7 U.S.C. 2662) is amended by inserting at the end thereof the following:

"(f) SPECIAL GRANTS FOR FINANCIALLY STRESSED FARMERS AND DISLOCATED FARMERS.—(1) The Secretary shall provide special grants for programs to develop income alternatives for farmers who have been adversely affected by the current farm and rural economic crisis and those displaced from farming. Such programs shall consist of educational and counseling services to farmers to assess human and nonhuman resources, assess income earning alternatives, identify resources and opportunities available to the farmer in the local community, county, and State, implement financial planning and management strategies, and provide linkages to specific resources and opportunities that are available to the farmer, such as reentering agriculture, new business opportunities, other off-farm jobs, job search programs, and retraining skills. The Secretary also may provide support to mental health officials in developing outreach programs in rural areas.

"(2) Grants may be made under paragraph (1) during the period beginning on the date of enactment of the Food Security Act of 1985 and ending three years thereafter.".

(b) Section 503(c) of the Rural Development Act of 1972 (7 U.S.C. 2663(c)) is amended by inserting "and section 502(f)" after "section 502(e)" both times it appears therein.

ANNUAL REPORT ON FAMILY FARMS

SEC. 1448. Section 102(b) of the Food and Agriculture Act of 1977 (7 U.S.C. 2266) is amended by—

(1) redesignating clause (3) as clause (5); and

(2) in clause (2), striking out "Federal" and all that follows through the end of the clause, and inserting in lieu thereof the following: "current Federal income, excise, estate, and other tax laws, and proposed changes in such laws, may affect the structure and organization of, returns to, and investment opportunities by family and nonfamily farm owners and operators, both foreign and domestic, (3) identification and analysis of new food and agricultural production and processing technological developments, especially in the area of biotechnology, and evaluation of the potential effect of such developments on (A) the economic structure of the family farm system, (B) the competitive status of domestically-produced agricultural commodities and foods in foreign markets, and (C) the achievement of Federal agricultural program objectives, (4) an assessment of the credit needs of family farms and the extent to which those needs are being met, and an analysis of the effects of the farm credit situation on the economic structure of the family farm system, and".

Division D—Food Assistance Programs

TITLE XV—FOOD STAMP AND RELATED PROVISIONS

ELIGIBILITY OF THE HOMELESS

SEC. 1501. (a) The first sentence of section 3(i) of the Food Stamp Act of 1977 (7 U.S.C. 2012(i)) is amended by—

(1) in clause (1), after "consumption", inserting "(or in the case of an individual who does not reside in a permanent dwelling or who has no fixed address, for such individual's consumption)"; and

(2) in clause (2), after "consumption" both places it appears, inserting "(or in the case of individuals who do not reside in permanent dwellings or who have no fixed addresses, for such individuals' consumption)".

(b) Section 11(e)(2) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(2)) is amended by—

(1) striking out the semicolon at the end and inserting a period in lieu thereof; and

(2) adding at the end thereof the following: "The State agency shall provide a method of certifying and issuing coupons to eligible households who do not reside in permanent dwellings or who have no fixed addresses, and shall take steps to ensure that such method limits participation in the food stamp program to eligible households.".

DETERMINATION OF FOOD SALES VOLUME

SEC. 1502. Section 3(k) of the Food Stamp Act of 1977 (7 U.S.C. 2012(k)) is amended by inserting after "food sales volume" in clause (1) the following: ", as determined by visual inspection, sales records, purchase records, or other inventory or accounting record-keeping methods that are customary or reasonable in the retail food industry,".

THRIFTY FOOD PLAN

SEC. 1503. Section 3(o) of the Food Stamp Act of 1977 (7 U.S.C. 2012(o)) is amended by—

(1) striking out "fifty-four" in the first sentence and inserting in lieu thereof "fifty";

(2) striking out "and" at the end of clause (7) of the second sentence;

(3) in clause (8) of the second sentence—

(A) striking out "and each October 1 thereafter,"; and

(B) inserting after "June 30" the following: "and, on February 1, 1986, further adjust the cost of such diet to reflect the Secretary's best estimate of the changes in the cost of the thrifty food plan occurring during the three-month period following June 30,"; and

(4) inserting before the proviso at the end of the second sentence the following: ", and (9) on October 1, 1986, and each October 1 thereafter, using the actual cost of the thrifty food plan as of September 30 of the previous calendar year as the base, adjust the cost of such diet to reflect changes in the cost of the thrifty food plan for the nine months ending the preceding June 30 and the Secretary's best estimate as to further changes in such cost occurring during the three-month period following June 30, and round the result to the nearest lower dollar increment for each household size".

DEFINITIONS OF THE DISABLED

SEC. 1504. Section 3(r) of the Food Stamp Act of 1977 (7 U.S.C. 2012(r)) is amended by—

(1) inserting before the semicolon at the end of paragraph (2) the following: ", federally or State administered supplemental benefits of the type described in section 1616(a) of the Social Security Act if the Secretary determines that such benefits are conditioned on meeting the disability or blindness criteria used under title XVI of the Social Security Act, or federally or State administered supplemental benefits of the type described in section 212(a) of Public Law 93-66 (42 U.S.C. 1382 note)";

(2) inserting before the semicolon at the end of paragraph (3) the following: "or receives disability retirement benefits from a governmental agency because of a disability considered permanent under section 221(i) of the Social Security Act (42 U.S.C. 421(i))";

(3) inserting "or non-service-connected" after "service-connected" in paragraph (4)(A);

(4) striking out "or" at the end of paragraph (5);

(5) striking out the period at the end of paragraph (6) and inserting in lieu thereof "; or"; and

(6) adding at the end thereof the following:

"(7) is an individual receiving an annuity under section 2(a)(1)(iv) or 2(a)(1)(v) of the Railroad Retirement Act of 1974 (45 U.S.C. 231a(a)(1)(iv) or 231a(a)(1)(v)), if the individual's service as an employee under the Railroad Retirement Act of 1974, after December 31, 1936, had been included in the term 'employment' as defined in the Social Security Act, and if an application for disability benefits had been filed.".

STATE AND LOCAL SALES TAXES

SEC. 1505. Effective October 1, 1987, section 4(a) of the Food Stamp Act of 1977 (7 U.S.C. 2013(a)) is amended by inserting before the period at the end of the first sentence the following: ", except that a State may not participate in the food stamp program if the Secretary determines that State or local sales taxes are collected within that State on purchases of food made with coupons issued under this Act".

RELATION OF FOOD STAMP AND COMMODITY DISTRIBUTION PROGRAMS

SEC. 1506. Section 4(b) of the Food Stamp Act of 1977 (7 U.S.C. 2013(b)) is amended by—

(1) striking out the first sentence; and

(2) striking out "also" in the second sentence.

CATEGORICAL ELIGIBILITY

SEC. 1507. (a) Section 5 of the Food Stamp Act of 1977 (7 U.S.C. 2014) is amended by—

(1) inserting after the first sentence in subsection (a) the following: "Notwithstanding any other provisions of this Act, except sections 6(b), 6(d)(2), and 6(g) and the third sentence of section 3(i), households in which each member receives benefits under a State plan approved under part A of title IV of the Social Security Act, supplemental security income benefits under title XVI of the Social Security Act, or aid to the aged, blind, or disabled under title I, X, XIV, or XVI of the Social Security Act, shall be eligible to participate in the food stamp program."; and

(2) striking out subsection (j).

(b) Section 11(i) of the Food Stamp Act of 1977 (7 U.S.C. 2020(i)) is amended by adding at the end thereof the following: "No household shall have its application to participate in the food stamp program denied nor its benefits under the food stamp program terminated solely on the basis that its application to participate has been denied or its benefits have been terminated under any of the programs carried out under the statutes specified in the second sentence of section 5(a) and without a separate determination by the State agency that the household fails to satisfy the eligibility requirements for participation in the food stamp program.".

EXCLUDED INCOME

SEC. 1508. (a) Effective February 1, 1986, section 5(d) of the Food Stamp Act of 1977 (7 U.S.C. 2014(d)) is amended by—

(1) inserting "except as provided in subsection (j)," after the comma at the end of clause (1);

(2) in clause (3)—

(A) striking out "higher education" and inserting in lieu thereof "post-secondary education"; and

(B) adding at the end thereof "and to the extent loans include any origination fees and insurance premiums,";

(3) inserting "and no portion of any Federal educational grant, to the extent it provides income assistance beyond that used for tuition and mandatory school fees," before "shall be considered such reimbursement" in the proviso of clause (5);

(4) inserting ", but household income that otherwise is included under this subsection shall be reduced by the extent that the cost of producing self-employment income exceeds the income derived from self-employment" before the comma in clause (9);

(5) inserting "except as otherwise provided in subsection (k) of this section" after "food stamp program" in clause (10).

(b) Effective October 1, 1985, section 5 of the Food Stamp Act of 1977 (7 U.S.C. 2014) is amended by adding at the end thereof the following:

"(j) Assistance provided to a third party on behalf of a household for living expenses by a State or local government in place of a regular benefit payable directly to the household under title IV of the Social Security Act or a State or local general assistance program (but excluding medical, child care, energy, and emergency or special assistance) shall be treated as money payable directly to the household.

"(k) Notwithstanding the provisions of section 142(b) of the Job Training Partnership Act (29 U.S.C. 1552(b)), earnings to individuals participating in on-the-job training programs under section 205(5) of the Job Training Partnership Act shall be considered earned income for purposes of the food stamp program.".

DEDUCTIONS FROM INCOME

SEC. 1509. (a) Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by—

(1) in the second sentence, striking out "homeownership component" and inserting in lieu thereof "homeowners' costs and maintenance and repair component";

(2) effective February 1, 1986, in the third sentence, striking out "18" and inserting in lieu thereof "20";

(3) amending the fourth sentence by—

(A) effective February 1, 1986—

(i) inserting ", excluding expenses paid on behalf of the household under the Low Income Home Energy Assistance Act (42 U.S.C. 8621 et seq.)," after "by a household for shelter" in clause (2);

(ii) amending the proviso to clause (2) to read as follows: ": Provided, That the amount of such excess shelter expense deduction shall not exceed $155 a month in the forty-eight contiguous States and the District of Columbia, and shall not exceed, in Alaska, Hawaii, Guam, and the Virgin Islands of the United States, $260, $215, $180, and $110 a month, respectively, adjusted on October 1, 1986, and on each October 1 thereafter, to the nearest lower dollar increment to reflect changes in the shelter (exclusive of homeowners' costs and maintenance and repair component), fuel, and utilities components of housing costs in the Consumer Price Index for All Urban Consumers published by the Bureau of Labor Statistics, as appropriately adjusted by the Bureau of Labor Statistics after consultation with the Secretary, for the twelve months ending the preceding June 30,"; and

(iii) amending clause (3) to read as follows:

"(3) a deduction combining the dependent care and excess shelter expense deductions under clauses (1) and (2), the maximum allowable level of which shall not exceed the maximum allowable deduction under clause (2)";

(B) effective October 1, 1986—

(i) in clause (1), striking out "the same as" and all that follows through "clause (2) of this subsection", and inserting in lieu thereof "$160";

(ii) striking out ", or (2)" and inserting in lieu thereof "and (2)"; and

(iii) striking out ", or (3)" and all that follows down to the period at the end thereof; and

(4) after the seventh sentence, inserting the following: "A State agency may use one or more standard utility allowances for households on behalf of which a payment is made under the Low Income Home Energy Assistance Act (42 U.S.C. 8621, et seq.) but who also incur out-of-pocket heating or cooling expenses. A State agency shall allow a household to switch between any standard utility allowance and a deduction based on its actual utility costs at the end of any certification period and up to two additional times during each twelve-month period."; and

(5) effective February 1, 1986, in the last sentence—

(A) striking out "$35 a month" in clause (A) and inserting in lieu thereof "the lesser of $35 a month or 5 per centum of monthly household income after any exclusions and before any deductions provided for in this section"; and

(B) inserting ", excluding expenses paid on behalf of the household under the Low Income Home Energy Assistance Act (42 U.S.C. 8621 et seq.)," after "by a household for shelter" in clause (C).

RETROSPECTIVE BUDGETING AND MONTHLY REPORTING SIMPLIFICATION

SEC. 1510. (a) Section 5(f)(2) of the Food Stamp Act of 1977 (7 U.S.C. 2014(f)(2)) is amended by—

(1) amending subparagraph (A) to read as follows:

"(A) Household income for—

"(i) migrant farmworker households, and

"(ii) households—

"(I) that have no earned income, and

"(II) in which all adult members are elderly or disabled members,

shall be calculated on a prospective basis, as provided in paragraph (3)(A).";

(2) in subparagraph (B)—

(A) striking out "(i)";

(B) inserting "the first sentence of" after "under" the first place it appears; and

(C) striking out "(ii)" and all that follows through "this Act,"; and

(3) striking out subparagraph (C) and inserting in lieu thereof the following:

"(C) Except as provided in subparagraphs (A) and (B), household income for households that have earned income and for households that include any member who has recent work history shall be calculated on a retrospective basis as provided in paragraph (3)(B).

"(D) Household income for all other households may be calculated, at the option of the State agency, on a prospective basis as provided in paragraph (3)(A) or on a retrospective basis as provided in paragraph (3)(B).".

(b) Section 6(c)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2015(c)(1)) is amended by—

(1) amending the first sentence to read as follows: "State agencies shall require households with respect to which household income is determined on a retrospective basis under section 5(f)(2)(C) of this Act to file periodic reports of household circumstances in accordance with standards prescribed by the Secretary, except that a State agency may, with the prior approval of the Secretary, select categories of households (including all such households) that may report at specified less frequent intervals on a showing by the State agency, which is satisfactory to the Secretary, that to require households in such categories to report monthly would result in unwarranted expenditures for administration of this subsection."; and

(2) inserting after the second sentence the following: "State agencies may require households, other than households with respect to which household income is required by section 5(f)(2)(A) to be calculated on a prospective basis, to file periodic reports of household circumstances in accordance with the standards prescribed by the Secretary under the preceding provisions of this paragraph.".

RESOURCES LIMITATION

SEC. 1511. Section 5(g) of the Food Stamp Act of 1977 (7 U.S.C. 2014(g)) is amended by—

(1) effective October 1, 1986, in the first sentence, striking out "$1,500, or, in the case of a household consisting of two or more persons, one of whom is age 60 or over, if its resources exceed $3,000" and inserting in lieu thereof "$2,250, or, in the case of a household which consists of or includes a member who is 60 years of age or older, if its resources exceed $3,500"; and

(2) in the second sentence—

(A) inserting "and inaccessible resources" after "relating to licensed vehicles";

(B) after "physically disabled household member" inserting "and any other property, real or personal, to the extent that it is directly related to the maintenance or use of such vehicle"; and

(C) inserting after "$4,500," the following: "except that the Secretary shall, on October 1, 1986, and on each October 1 thereafter, adjust such amount to reflect changes in the Consumer Price Index for All Urban Consumers, United States city average, for used cars (base year 1967=100), published by the Bureau of Labor Statistics, for the twelve months ending the preceding June 30, and round the result to the nearest $100 increment, but such amount, as adjusted, may not exceed $5,500,".

DISASTER TASK FORCE

SEC. 1512. Section 5(h)(2) of the Food Stamp Act of 1977 (7 U.S.C. 2014(h)(2)) is amended to read as follows:

"(2) The Secretary shall—

"(A) establish a Food Stamp Disaster Task Force to assist States in implementing and operating the disaster program and the regular food stamp program in the disaster area; and

"(B) send members of the Task Force to the disaster area as soon as possible after the disaster occurs to provide direct assistance to State and local officials.".

ELIGIBILITY DISQUALIFICATIONS

SEC. 1513. Section 6 of the Food Stamp Act of 1977 (7 U.S.C. 2015) is amended by—

(1) in the first sentence of subsection (d)(1)—

(A) striking out "no household shall be eligible for assistance under this Act if it includes a" and inserting in lieu thereof "(A) no person shall be eligible to participate in the food stamp program who is";

(B) striking out all that follows "(iii)" through "days; or (iv)"; and

(C) inserting before the period at the end thereof the following: "; and (B) no household shall be eligible to participate in the food stamp program (i) if the head of the household is a physically and mentally fit person between the ages of eighteen and sixty and such individual refuses to do any of those acts described in clause (A) of this sentence, or (ii) if the head of the household voluntarily quits any job without good cause, but, in such case, the period of ineligibility shall be ninety days";

(2) adding at the end of subsection (d)(1) the following: "Any period of ineligibility for violations under this paragraph shall end when the household member who committed the violation complies with the requirement that has been violated. If the household member who committed the violation leaves the household during the period of ineligibility, such household shall no longer be subject to sanction for such violation and, if it is otherwise eligible, may resume participation in the food stamp program, but any other household of which such person thereafter becomes the head of the household shall be ineligible for the balance of the period of ineligibility.";

(3) inserting at the end of clause (2) of subsection (e) the following: "except for individuals who are assigned to or placed in an institution of higher learning through a program under the Job Training Partnership Act,";

(4) striking out subclause (C) of clause (3) of subsection (e) and redesignating subclauses (D) and (E) thereof as subclauses (C) and (D), respectively; and

(5) in clause (2) of subsection (f)—

(A) striking out "section 203(a)(7)" and "(8 U.S.C. 1153(a)(7))" in subclause (D) and inserting in lieu thereof "sections 207 and 208" and "(8 U.S.C. 1157 and 1158)", respectively;

(B) striking out "because of persecution" and all that follows through "natural calamity" in subclause (D); and

(C) striking out "because of the judgment of the Attorney General" and all that follows in subclause (F) through "political opinion".

EMPLOYMENT AND TRAINING PROGRAM

SEC. 1514. (a) Section 6(d) of the Food Stamp Act of 1977 (7 U.S.C. 2015(d)), as amended by section 1513(1) of this Act, is amended by—

(1) amending clause (A)(ii) of paragraph (1) to read as follows:

"(ii) refuses without good cause to participate in an employment and training program under paragraph (4), to the extent required under paragraph (4), including any reasonable employment requirements as are prescribed by the State agency in accordance with paragraph (4), and the period of ineligibility shall be two months;"; and

(2) adding at the end thereof the following:

"(4)(A) Each State agency shall implement an employment and training program designed by the State agency for the purpose of assisting members of households participating in the food stamp program in gaining skills, training, or experience that will increase their ability to obtain regular employment. For purposes of this Act, an 'employment and training program' means a program that contains, at the option of the State agency, one or more of the following components:

"(i) Job search programs with terms and conditions comparable to those prescribed in subparagraphs (A) and (B) of section 402(a)(35) of part A of title IV of the Social Security Act, except that a State agency shall have no obligation to incur costs exceeding $25 per participant per month, as provided in subparagraph (B)(vi), and the State agency shall retain the option to apply employment requirements prescribed under this clause to program applicants at the time of application.

"(ii) Job search training programs that include, to the extent determined appropriate by the State agency, reasonable job search training and support activities that may consist of jobs skills assessments, job finding clubs, training in techniques for employability, job placement services, or other direct training or support activities, including educational programs, determined by the State agency to expand the job search abilities or employability of those subject to the program.

"(iii) Programs designed to improve the employability of household members through actual work experience or training, or both, and to enable individuals employed under such programs to move promptly into regular public or private employment. The facilities of the State public employment offices and agencies operating programs under the Job Training Partnership Act may be used to find employment and training opportunities for household members under the programs. Employment or training experience assignments shall be limited to projects that serve a useful public purpose in fields such as health, social services, environmental protection, education, urban and rural development and redevelopment, welfare, recreation, public facilities, public safety, and day care. To the extent possible, the prior training, experience, and skills of the participating member shall be used in making appropriate employment experience assignments. An employment or training experience program established under this clause shall—

"(I) not provide any work that has the effect of replacing the employment of an individual not participating in the employment or training experience program;

"(II) provide the same benefits and working conditions that are provided at the job site to employees performing comparable work for comparable hours; and

"(III) reimburse participants for actual costs of transportation and other actual costs that are reasonably necessary and directly related to participation in the program, but not to exceed $25 in the aggregate per month.

"(iv) As approved by the Secretary, other programs, projects, and experiments, such as a supported work program, aimed at accomplishing the purpose of the employment and training program.

"(B)(i) The State agency may provide that participation in an employment and training program may supplement or supplant other requirements imposed on those subject to the program.

"(ii) Each State agency shall exempt from any requirement for participation in any program under this paragraph categories of household members to which the State agency determines that the application of such participation requirement is impracticable as applied to such categories due to factors such as, but not limited to, the availability of work opportunities and the cost-effectiveness of the employment requirements. In making such a determination, the State agency may designate a category consisting of all such household members residing in a specified area of the State. The State agency shall also exempt or suspend from such participation requirement individual household members not included in any such category but with respect to whom it determines that such participation is impracticable because of personal circumstances such as, but not limited to, lack of job readiness and employability, the remote location of work opportunities, and unavailability of dependent care. The State agency shall determine the extent to which any individual must fulfill the requirements of this paragraph.

"(iii) The total hours of work in an employment and training program carried out under this paragraph required of members of a household, together with the hours of work of such members in any other program carried out under section 20, in any month collectively may not exceed a number of hours equal to the household's allotment for such month divided by the higher of the applicable State minimum wage or Federal minimum hourly rate under the Fair Labor Standards Act of 1938. The total hours of participation in such program required of any member of a household, individually, in any month, together with any hours worked in another program carried out under section 20 and any hours worked for compensation (in cash or in kind) in any other capacity, shall not exceed one hundred and twenty hours per month.

"(iv) Each State agency shall establish requirements, determined by the State agency to be appropriate, for participation by individuals not exempt under clause (ii) in one or more employment and training programs under this paragraph (which requirements may vary among participants), but may operate programs under this paragraph in which individuals elect to participate. The State agency shall permit individuals not subject to the requirements described in the preceding sentence or who have complied, or are in the process of complying, with such requirements to participate in any progam under this paragraph.

"(v) The Secretary shall promulgate guidelines that, to the maximum extent practicable, enable a State agency to design and operate an employment and training program under this paragraph that is compatible and consistent with similar programs operated within the State.

"(vi) A State agency shall reimburse participants for transportation costs and other expenses incurred by participants in the employment and training program, except that the State agency may limit such reimbursement to each participant to $25 per month.".

(b) Section 11(e) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)) is amended by—

(1) striking out "and" at the end of paragraph (20);

(2) striking out the period at the end of paragraph (21) and inserting in lieu thereof "; and"; and

(3) adding at the end thereof the following:

"(22) the manner in which the State agency will carry out the employment and training program under section 6(d)(4).".

(c) Section 16 of the Food Stamp Act of 1977 (7 U.S.C. 2025) is amended by adding at the end thereof the following:

"(h)(1) The Secretary shall allocate among the State agencies in each fiscal year, from funds appropriated for such fiscal year under section 18(a)(1), the amount of $40,000,000 for the fiscal year ending September 30, 1986, $50,000,000 for the fiscal year ending September 30, 1987, $60,000,000 for the fiscal year ending September 30, 1988, and $75,000,000 for each of the fiscal years ending September 30, 1989, and September 30, 1990, to carry out the employment and training program under section 6(d)(4), except as provided in paragraph (3), during such fiscal year.

"(2) If, in carrying out such program during such fiscal year, a State agency incurs costs that exceed the amount allocated to the State agency under paragraph (1), the Secretary shall pay such State agency an amount equal to 50 per centum of such additional costs, subject to the limitation in paragraph (3).

"(3) The Secretary shall reimburse each State agency in an amount equal to 50 per centum of the total amount of payments made or costs incurred by the State agency in connection with transportation costs and other expenses reasonably incurred by participants in the employment and training program, except that such total amount shall not exceed an amount representing $25 per participant per month.

"(4) The Secretary shall monitor the employment and training programs carried out by State agencies under section 6(d)(4) to measure their effectiveness in terms of the increase in the numbers of household members who obtain employment and the numbers of such members who retain such employment as a result of their participation in such employment and training programs. The Secretary shall, not later than January 1, 1989, report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on the effectiveness of such employment and training programs.".

STAGGERING OF COUPON ISSUANCE

SEC. 1515. Section 7 of the Food Stamp Act of 1977 (7 U.S.C. 2016) is amended by adding at the end thereof the following:

"(h)(1) The State agency may implement a procedure for staggering the issuance of coupons to eligible households throughout the entire month: Provided, That the procedure ensures that, in the transition period from other issuance procedures, no eligible house-

hold experiences an interval between coupon issuances of more than thirty-five days, either through regular issuances by the State agency or through supplemental issuances.

"(2) For any eligible household that applies for participation in the food stamp program during the last fifteen days of a month and is issued benefits within that period, coupons shall be issued for the first full month of participation by the later of five working days after the beginning of the following month or five working days after verification procedures are completed.".

DISCLOSURE OF INFORMATION SUBMITTED BY RETAIL STORES

SEC. 1516. Section 9(c) of the Food Stamp Act of 1977 (7 U.S.C. 2018(c)) is amended by inserting before the period at the end of the second sentence the following: ", except that such information may be disclosed to and used by State agencies that administer the special supplemental food program for women, infants and children, authorized under section 17 of the Child Nutrition Act of 1966, for purposes of administering the provisions of that Act and the regulations issued under that Act".

CREDIT UNIONS

SEC. 1517. Section 10 of the Food Stamp Act of 1977 (7 U.S.C. 2019) is amended by—

(1) inserting ", or which are insured under the Federal Credit Union Act and have retail food stores or wholesale food concerns in their field of membership" after "Federal Savings and Loan Insurance Corporation" the first place it appears; and

(2) inserting "or the Federal Credit Union Act" after "Federal Savings and Loan Insurance Corporation" the second place it appears.

CHARGES FOR REDEMPTION OF COUPONS

SEC. 1518. (a) Section 10 of the Food Stamp Act of 1977 (7 U.S.C. 2019), as amended by section 1517 of this Act, is amended by adding at the end thereof the following: "No financial institution may impose on or collect from a retail food store a fee or other charge for the redemption of coupons that are submitted to the financial institution in a manner consistent with the requirements, other than any requirements relating to cancellation of coupons, for the presentation of coupons by financial institutions to the Federal Reserve banks.".

(b) The Secretary of Agriculture, in consultation with the Board of Governors of the Federal Reserve System, shall issue regulations implementing the amendment made by subsection (a).

PUBLIC INFORMATION

SEC. 1519. (a) Section 11(e)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(1)) is amended by inserting, after "funds provided under this Act", the following: "except for activities, implemented at the discretion of the State agency, that provide program information (including program eligibility and benefit guidelines) to unemployed, disabled, or elderly persons who apply, or may be eligible, for participation in the program".

(b) The first sentence of section 16(a) of the Food Stamp Act of 1977 (7 U.S.C. 2025(a)) is amended by striking out "and (4) fair hearings" and inserting in lieu thereof "(4) fair hearings, and (5) activities providing program information to unemployed, disabled, or elderly persons".

OFFICE HOURS

SEC. 1520. Section 11(e)(2) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(2)), as amended by section 1501(c) of this Act, is amended by adding at the end thereof the following: "The State agency shall assess, from time to time, the need for operating food stamp offices within the State during evening and weekend hours;".

EXPANDED FOOD AND NUTRITION EDUCATION PROGRAM

SEC. 1521. Section 11(f) of the Food Stamp Act of 1977 (7 U.S.C. 2020(f)) is amended by adding at the end thereof the following: "State agencies shall encourage food stamp program participants to participate in the expanded food and nutrition education program conducted under section 3(d) of the Act of May 8, 1914 (7 U.S.C. 343(d)), commonly known as the Smith-Lever Act. At the request of personnel of such education program, State agencies, wherever practicable, shall allow personnel and information materials of such education program to be placed in food stamp offices.".

FOOD STAMP PROGRAM INFORMATION AND SIMPLIFIED APPLICATION AT SOCIAL SECURITY ADMINISTRATION OFFICES

SEC. 1522. (a) Clause (2) of the first sentence of section 11(i) of the Food Stamp Act of 1977 (7 U.S.C. 2020(i)) is amended by—

(1) inserting "applicants for or" after "members are";

(2) striking out "permitted" and all that follows through "office", and inserting in lieu thereof "informed of the availability of benefits under the food stamp program and be assisted in making a simple application to participate in such program at the social security office".

(b) Section 11(j) of the Food Stamp Act of 1977 (7 U.S.C. 2020(j)) is amended to read as follows:

"(j)(1) Any individual who is an applicant for or recipient of social security benefits (under regulations prescribed by the Secretary in conjunction with the Secretary of Health and Human Services) shall be informed of the availability of benefits under the food stamp program and shall be provided with a simple application to participate in such program at the social security office.

"(2) The Secretary and the Secretary of Health and Human Services shall revise the memorandum of understanding in effect on the date of enactment of the Food Security Act of 1985, regarding services to be provided in social security offices under this subsection and subsection (i), in a manner to ensure that—

"(A) applicants for and recipients of social security benefits are adequately notified in social security offices that assistance may be available to them under this Act;

"(B) applications for assistance under this Act from households in which all members are applicants for or recipients of supplemental security income will be forwarded immediately to the State agency in an efficient and timely manner; and

"(C) the Secretary of Health and Human Services receives from the Secretary reimbursement for costs incurred to provide such services.".

(c) Not later than 180 days after the date of the enactment of this Act, the Secretary of Agriculture shall submit a report, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, describing the nature and extent of the costs being incurred by the Secretary of Health and Human Services to comply with subsections (i) and (j) of section 11 of the Food Stamp Act of 1977, as amended by subsections (a) and (b).

RETAIL FOOD STORES AND WHOLESALE FOOD CONCERNS

SEC. 1523. Section 12 of the Food Stamp Act of 1977 (7 U.S.C. 2021) is amended by adding at the end thereof the following:

"(e)(1) In the event any retail food store or wholesale food concern that has been disqualified under subsection (a) is sold or the ownership thereof is otherwise transferred to a bona fide purchaser or transferee, the person or persons who sell or otherwise transfer ownership of the retail food store or wholesale food concern shall be subjected to a civil money penalty in an amount established by the Secretary through regulations to reflect that portion of the disqualification period that has not yet expired. If the retail food store or wholesale food concern has been disqualified permanently, the civil money penalty shall be double the penalty for a ten-year disqualification period, as calculated under regulations issued by the Secretary. The disqualification period imposed under subsection (b) shall continue in effect as to the person or persons who sell or otherwise transfer ownership of the retail food store or wholesale food concern notwithstanding the imposition of a civil money penalty under this subsection.

"(2) At any time after a civil money penalty imposed under paragraph (1) has become final under the provisions of section 14(a), the Secretary may request the Attorney General to institute a civil action against the person or persons subject to the penalty in a district court of the United States for any district in which such person or persons are found, reside, or transact business to collect the penalty and such court shall have jurisdiction to hear and decide such action. In such action, the validity and amount of such penalty shall not be subject to review.".

STATE AGENCY LIABILITY, QUALITY CONTROL, AND AUTOMATIC DATA PROCESSING

SEC. 1524. (a) Effective with respect to the fiscal year beginning October 1, 1985, and each fiscal year thereafter, section 16 of the Food Stamp Act of 1977 (7 U.S.C. 2025) is amended by—

(1) in paragraph (2)(A) of subsection (d), inserting before the period at the end thereof the following: "less any amount the payment of which is waived under paragraph (6) and less any amount payable as a result of the use by the State agency of correctly processed information received from an automatic information exchange system made available by any Federal department or agency"; and

(2) adding, at the end of subsection (d), the following:

"(6)(A) The Secretary, at the request of a State agency, shall waive the payment of a portion—not more than 15 per centum—of a claim, asserted against the State for a fiscal year under paragraphs (2) and (3), equal to the amount that the State agency shows it will devote to the planning, design, development, installation, or expansion of automatic data processing, computerized information, or related systems, or to other administrative efforts, designed to reduce payment error rates and approved by the Secretary. To obtain such waiver, the State agency must show, to the satisfaction of the Secretary, that (i) the systems or administrative efforts on which the request for a waiver is based are in addition to systems or administrative efforts that are already in place or part of an existing plan for the State agency, and (ii) such systems or administrative efforts can reasonably be expected to improve the management, integrity, or efficiency of

the food stamp program operated by the State agency.

"(B) Amounts used for systems or administrative efforts as a result of a waiver of a claim under this paragraph may not be credited by the State agency as its share of the costs incurred for data and information systems under the cost-sharing programs provided for in subsections (a) and (g).

"(C) If a proposed system or administrative effort on which a waiver of a claim under this paragraph is based is not implemented within six months after a target date for implementation agreed on by the Secretary and the State agency, the Secretary shall terminate the waiver unless the Secretary determines that there is good cause for the State agency's failure to implement the system or administrative effort (including good faith efforts to implement the system or administrative effort) in a timely manner, and, on such termination, the State agency shall again become liable for full payment of the claim under paragraphs (2) and (3).

"(7) To facilitate the implementation of paragraphs (2) and (3), each State agency shall submit to the Secretary expeditiously data regarding its operations in each fiscal year sufficient for the Secretary to establish the payment error rate for the State agency for such fiscal year and determine the amount for which the State agency will be liable for such fiscal year under paragraphs (2) and (3). The Secretary shall make a determination for a fiscal year, and notify the State agency of such determination, within nine months following the end of each fiscal year. The Secretary shall initiate efforts to collect the amount owed by the State agency as a claim established under paragraphs (2) and (3) for a fiscal year, except with respect to the portion of such payment that is waived under paragraph (6), and, as applicable, subject to the conclusion of any formal or informal appeal procedure and administrative or judicial review under section 14 (as provided for in paragraph (5)), before the end of the fiscal year following such fiscal year."; and

(3) in subsection (g), inserting "(or in the case of State agencies that submit plans that satisfy the elements of the model automation and computerization plan under section 11(o), as determined by the Secretary, 90 per centum)" after "75 per centum".

(b) Section 11 of the Food Stamp Act of 1977 (7 U.S.C. 2020) is amended by adding at the end thereof the following:

"(o)(1) The Secretary shall develop, after consultation with and with the assistance of an advisory group of State agencies appointed by the Secretary without regard to the provisions of the Federal Advisory Committee Act, a model plan for the comprehensive automation of data processing and computerization of information systems under the food stamp program. The plan shall be developed and made available for public comment through publication of the proposed plan in the Federal Register not later than October 1, 1986. The Secretary shall complete the plan, taking into consideration public comments received, not later than December 1, 1986. The elements of the plan shall include, but not be limited to, intake procedures, eligibility determinations and calculation of benefits, verification procedures, coordination with related Federal and State programs, the issuance of benefits, reconciliation procedures, the generation of notices, and program reporting.

"(2) Not later than April 1, 1987, the Secretary shall prepare and submit to Congress an evaluation of the degree and sufficiency of each State's automated data processing and computerized information systems for the administration of the food stamp program. Such report shall include, for each State, an analysis of additional steps needed for the State to achieve effective and cost-efficient data processing and information systems. The Secretary, thereafter, shall periodically update such report.

"(3) Based on the Secretary's findings in any of the reports submitted under paragraph (2), the Secretary may require a State agency, as necessary to rectify identified shortcomings in the administration of the food stamp program in the State, to take specified steps to automate data processing systems or computerize information systems for the administration of the food stamp program in the State if the Secretary finds that, in the absence of such systems, there will be program accountability or integrity problems that will substantially affect the administration of the food stamp program in the State.".

(c) The first sentence of section 11(g) of the Food Stamp Act of 1977 (7 U.S.C. 2020(g)) is amended by inserting "the automation or computerization requirements imposed on the State agency under subsection (o)(3) of this section," after "pursuant to subsection (d) of this section,".

PILOT PROJECTS

SEC. 1525. (a) Section 17(b)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2026(b)(1)) is amended by striking out "October 1, 1985" the last place it appears and inserting in lieu thereof "October 1, 1990".

(b) Section 17(d) of the Food Stamp Act of 1977 (7 U.S.C. 2026(d)) is amended by adding at the end thereof the following: "On the request of a State or political subdivision in which a pilot project is conducted under this subsection, the Secretary shall continue the project beyond any initial term established by the Secretary if the Secretary finds that the project has a beneficial effect on program administrative costs and error rates and the continuation of the project will not result in undue added program costs.".

AUTHORIZATION CEILING; AUTHORITY TO REDUCE BENEFITS

SEC. 1526. Section 18 of the Food Stamp Act of 1977 (7 U.S.C. 2027) is amended by—

(1) inserting, after the first sentence of subsection (a)(1), the following:

"To carry out the provisions of this Act, there are hereby authorized to be appropriated not in excess of $13,584,000,000 for the fiscal year ending September 30, 1986; not in excess of $14,369,000,000 for the fiscal year ending September 30, 1987; not in excess of $15,276,000,000 for the fiscal year ending September 30, 1988; not in excess of $16,142,000,000 for the fiscal year ending September 30, 1989; and not in excess of $16,985,000,000 for the fiscal year ending September 30, 1990."; and

(2) in the second sentence of subsection (b), striking out "the limitation set herein," and inserting in lieu thereof "the appropriation amount authorized in subsection (a)(1),".

PUERTO RICO BLOCK GRANT

SEC. 1527. Effective October 1, 1985, section 19 of the Food Stamp Act of 1977 (7 U.S.C. 2028) is amended by—

(1) striking out "for each fiscal year" in subsection (a)(1)(A) and inserting in lieu thereof "for the fiscal year ending September 30, 1986, $862,000,000 for the fiscal year ending September 30, 1987, $898,000,000 for the fiscal year ending September 30, 1988, $936,000,000 for the fiscal year ending September 30, 1989, and $974,000,000 for the fiscal year ending September 30, 1990,";

(2) striking out "noncash" in subsection (a)(1)(A);

(3) striking out the comma after "needy persons" and all that follows in subsection (a)(1)(A), and inserting in lieu thereof a period;

(4) striking out "and 50 per centum of the related administrative expenses" in subsection (a)(1)(B) and inserting in lieu thereof "and related administrative expenses"; and

(5) striking out "a single agency which shall be" in clause (i) of subsection (b)(1)(A) and inserting in lieu thereof "the agency or agencies directly."

FEASIBILITY STUDY

SEC. 1528. The Secretary of Agriculture shall conduct a study to determine the feasibility of extending the food stamp program under the Food Stamp Act of 1977 to American Samoa. The Secretary shall complete the study and submit a report of the study to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives not later than April 1, 1986. In conducting the study, the Secretary shall—

(1) determine the various demographic and economic circumstances of the people of American Samoa; and

(2) analyze the features of the food stamp program under the Food Stamp Act of 1977, and the regulations issued thereunder, including benefit, eligibility, and administrative rules, that would have to be revised, with respect to American Samoa, to ensure that the program would operate efficiently and effectively in light of circumstances peculiar to American Samoa.

COMMODITY DISTRIBUTION PROGRAMS

SEC. 1529. (a) Effective October 1, 1985, section 4 of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c note) is amended by—

(1) striking out "1982, 1983, 1984, and 1985" in the first sentence of subsection (a) and inserting in lieu thereof "1986, 1987, 1988, 1989, and 1990"; and

(2) in subsection (b), striking out "under 18 years of age" and inserting in lieu thereof "18 years of age and under".

(b) Effective October 1, 1985, section 5(a) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c note) is amended by—

(1) striking out ", which projects shall operate no longer than two years, and" in clause (1) and inserting in lieu thereof a semicolon;

(2) striking out "1982 through 1985" in clause (2) and inserting in lieu thereof "1986 through 1990";

(3) redesignating clause (2) as clause (5); and

(4) inserting after clause (1) the following: "(2) shall permit local agencies administering the commodity supplemental food program, at their option, to provide supplemental commodities, furnished under the program, to low-income elderly persons under terms and conditions that the Secretary by regulation shall prescribe to ensure that (A) the provision of assistance under this clause does not serve to restrict the provision of assistance under the program to women, infants, and children eligible for such assistance, and (B) local agencies do not terminate or reduce commodity assistance to women, infants, and children to provide assistance to the elderly; (3) shall, in any fiscal

year, approve applications of additional sites for the program in areas in which the program currently does not operate to the full extent that this can be done within the appropriations available for the program for that fiscal year and without reducing actual participation levels (including participation of elderly persons under clause (2)) in areas in which the program is in effect; (4) shall provide information on the program and its application procedures to agencies that could operate the program and that are located in areas covered neither by the program nor by the special supplemental food program for women, infants, and children authorized under section 17 of the Child Nutrition Act of 1966;".

(c) Notwithstanding any other provision of law, in implementing the commodity supplemental food program under section 4 of the Agriculture and Consumer Protection Act of 1973, the Secretary of Agriculture shall allow agencies distributing agricultural commodities to low-income elderly people under such programs on the date of enactment of this Act to continue such distribution at levels no lower than existing caseloads.

(d) Effective October 1, 1985—

(1) section 209 of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is repealed; and

(2) clause (5) of section 5(a) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c note), as so redesignated by subsection (b)(3), is amended by striking out "amount appropriated for the provision of commodities to State agencies" and inserting in lieu thereof "sum of (A) the amount appropriated for the commodity supplemental food program and (B) the value of all additional commodities donated by the Secretary to State and local agencies that are provided without charge or credit for distribution to program participants".

TITLE XVI—AMENDMENTS TO THE TEMPORARY EMERGENCY FOOD ASSISTANCE ACT OF 1983 AND OTHER COMMODITY DISTRIBUTION PROVISIONS

Subtitle A—Amendments to the Temporary Emergency Food Assistance Act of 1983

EMERGENCY FEEDING ORGANIZATIONS—DEFINITIONS

SEC. 1601. Section 201A of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is amended by inserting, before the semicolon at the end of paragraph (1), the following: "(including the activities and projects of charitable institutions, food banks, hunger centers, soup kitchens, and similar public or private nonprofit eligible recipient agencies) hereinafter in this title referred to as 'emergency feeding organizations' ".

REPEAL OF PROVISIONS RELATING TO THE FOOD SECURITY WHEAT RESERVE

SEC. 1602. (a) Section 202 of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is amended by—

(1) striking out the subsection designation for subsection (a); and

(2) striking out subsection (b).

(b) The second sentence of section 203A of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is amended by striking out ", except that wheat from the Food Security Wheat Reserve may not be used to pay such costs".

REPEAL OF PROVISIONS RELATING TO PROCESSING AGREEMENTS

SEC. 1603. (a) Section 203 of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note), is repealed.

(b) Section 203B(a) of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is amended by striking out "and to private companies that process such commodities for eligible recipient agencies under sections 203 and 203A of this Act".

STATE COOPERATION

SEC. 1604. Section 203B of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is amended by adding at the end thereof the following:

"(d) Each State agency receiving commodities under this title may—

"(1) enter into cooperative agreements with State agencies of other States for joint provision of such commodities to an emergency feeding organization that serves needy persons in a single geographical area part of which is situated in each of such States; or

"(2) transfer such commodities to any such emergency feeding organization in the other State under such agreement.".

REPORT ON COMMODITY DISPLACEMENT

SEC. 1605. Section 203C(a) of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is amended by adding at the end thereof the following: "The Secretary shall submit to Congress each year a report as to whether and to what extent such displacements or substitutions are occurring.".

AUTHORIZATION FOR FUNDING AND RELATED PROVISIONS

SEC. 1606. Section 204 of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is amended by—

(1) redesignating subsection (c) as subsection (d); and

(2) after subsection (b), inserting the following:

"(c)(1) There are authorized to be appropriated $50,000,000 for each of the fiscal years ending September 30, 1986, and September 30, 1987, for the Secretary to make available to the States for State and local payments for costs associated with the distribution of commodities by emergency feeding organizations under this title. Funds appropriated under this paragraph for any fiscal year shall be allocated to the States on an advance basis, dividing such funds among the States in the same proportions as the commodities distributed under this title for such fiscal year are divided among the States. If a State agency is unable to use all of the funds so allocated to it, the Secretary shall reallocate such unused funds among the other States in the same manner as the original allocations were made.

"(2) Each State shall make available to emergency feeding organizations in the State not less than 20 per centum of the funds provided as authorized in paragraph (1) that it has been allocated for a fiscal year, as necessary to pay for, or provide advance payments to cover, the direct expenses of the emergency feeding organizations for distributing commodities to needy persons. As used in this paragraph, the term 'direct expenses' includes costs of transporting, storing, handling, and distributing commodities incurred after they are received by the organization; costs associated with determinations of eligibility, verification, and documentation; costs involved in publishing announcements of times and locations of distribution; and costs of recordkeeping, auditing, and other administrative procedures required for participation in the program under this title. If a State makes a payment, using State funds, to cover direct expenses of emergency feeding organizations, the amount of such payment shall be counted toward the amount a State must make available for direct expenses of emergency feeding organizations under this paragraph.

"(3) States to which funds are allocated for a fiscal year under this subsection shall submit financial reports to the Secretary, on a regular basis, as to the use of such funds. No such funds may be used by States or emergency feeding organizations for costs other than those involved in covering the expenses related to the distribution of commodities by emergency feeding organizations.".

REAUTHORIZATIONS

SEC. 1607. Section 210 of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is amended by—

(1) in subsection (c)—

(A) striking out "the fiscal years ending September 30, 1984, and September 30, 1985" and inserting in lieu thereof "the period beginning October 1, 1983, and ending September 30, 1987";

(B) striking out "prior to the beginning of the fiscal year ending September 30, 1985" and inserting in lieu thereof "as early as feasible but not later than the beginning of each of the fiscal years ending September 30, 1985, September 30, 1986, and September 30, 1987"; and

(C) striking out "second twelve months" and inserting in lieu thereof "such fiscal year"; and

(2) adding at the end thereof the following:

"(d) The regulations issued by the Secretary under this section shall include provisions that set standards with respect to liability for commodity losses under the program under this title in situations in which there is no evidence of negligence or fraud, and conditions for payment to cover such losses. Such provisions shall take into consideration the special needs and circumstances of emergency feeding organizations, including use of volunteers, limited financial resources, and the effect that sanctions could have on the ability of such organizations to meet the food needs of low-income populations.".

PROGRAM TERMINATION

SEC. 1608. Section 212 of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is amended by striking out "September 30, 1985" and inserting in lieu thereof "September 30, 1987".

REPORT

SEC. 1609. Not later than April 1, 1987, the Secretary of Agriculture shall report to Congress on the activities of the program conducted under the Temporary Emergency Food Assistance Act of 1983. Such report shall include information on—

(1) the volume and types of commodities distributed under the program;

(2) the types of State and local agencies receiving commodities for distribution under the program;

(3) the populations served under the program and their characteristics;

(4) the Federal, State, and local costs of commodity distribution operations under the program (including transportation, storage, refrigeration, handling, distribution, and administrative costs); and

(5) the amount of Federal funds provided to cover State and local costs under the program.

Subtitle B—Commodity Distribution Amendments

DISTRIBUTION OF SURPLUS COMMODITIES; PROCESSING AGREEMENTS

SEC. 1611. Effective October 1, 1985, section 1114(a) of the Agriculture and Food Act of 1981 (7 U.S.C. 1431e) is amended by—

(1) inserting "(1)" after "(a)";

(2) in the first sentence, inserting "(including, but not limited to, cheese, nonfat dry milk, and wheat)" after "commodities" the first place it appears; and

(3) adding, at the end thereof, the following:

"(2)(A) Effective through September 30, 1987, whenever a commodity is made available without charge or credit under any nutrition program administered by the Secretary of Agriculture, the Secretary shall encourage consumption of such commodity through agreements with private companies under which the commodity is reprocessed into end-food products for use by eligible recipient agencies. The expense of reprocessing shall be paid by such eligible recipient agencies.

"(B) To maintain eligibility to enter into, and to continue, any agreement with the Secretary of Agriculture under subparagraph (A), a private company shall annually settle all accounts with the Secretary and any appropriate State agency regarding commodities processed under such agreements.".

TITLE XVII—NUTRITION PROGRAMS

Subtitle A—Food, Nutrition, and Consumer Education

FINDINGS

SEC. 1701. Congress finds that individuals in households eligible to participate in programs under the Food Stamp Act of 1977 and other low-income individuals, including those residing in rural areas, should have greater access to nutrition and consumer education to enable them to use their food budgets, including food assistance, effectively and to select and prepare foods that satisfy their nutritional needs and improve their diets.

PURPOSE

SEC. 1702. The purpose of the program provided for under section 1703 is to expand effective food, nutrition, and consumer education services to the greatest practicable number of low-income individuals, including those participating in or eligible to participate in the programs under the Food Stamp Act of 1977, to assist them to—

(1) increase their ability to manage their food budgets, including food stamps and other food assistance;

(2) increase their ability to buy food that satisfies nutritional needs and promotes good health; and

(3) improve their food preparation, storage, safety, preservation, and sanitation practices.

PROGRAM

SEC. 1703. The cooperative extension services of the States shall, with funds made available under this subtitle, carry out an expanded program of food, nutrition, and consumer education for low-income individuals in a manner designed to achieve the purpose set forth in section 1702. In operating the program, the cooperative extension services may use the expanded food and nutrition education program, and other food, nutrition, and consumer education activities of the cooperative extension services or similar activities carried out by them in collaboration with other public or private nonprofit agencies or organizations. In carrying out their responsibilities under the program, the cooperative extension services are encouraged to—

(1) provide effective and meaningful food, nutrition, and consumer education services to as many low-income individuals as possible;

(2) employ educational methodologies, including innovative approaches, that accomplish the purpose set forth in section 1702; and

(3) to the extent practicable, coordinate activities carried out under the program with the delivery to low-income individuals of benefits under food assistance programs.

ADMINISTRATION

SEC. 1704. (a) The program provided for under section 1703 shall be administered by the Secretary of Agriculture through the Extension Service, in consultation with the Food and Nutrition Service and the Human Nutrition Information Service. The Secretary shall ensure that the Extension Service coordinates activities carried out under this subtitle with the ongoing food, nutrition, and consumer education activities of other agencies of the Department of Agriculture.

(b) The Secretary of Agriculture, not later than April 1, 1989, shall submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate a report evaluating the effectiveness of the program provided for under section 1703.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1705. (a) There are hereby authorized to be appropriated to to carry out this subtitle $5,000,000 for the fiscal year ending September 30, 1986; $6,000,000 for the fiscal year ending September 30, 1987; and $8,000,000 for each of the fiscal years ending September 30, 1988, September 30, 1989, and September 30, 1990.

(b) Any funds appropriated under this section for a fiscal year shall be allocated in the manner specified in subparagraphs (A) and (B) of section 1425(c)(2) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977.

(c) Any funds appropriated to carry out this subtitle shall supplement any other funds appropriated to the Department of Agriculture for use by the Department and the cooperative extension services of the States for food, nutrition, and consumer education for low-income households.

Subtitle B—Nutrition Monitoring

SURVEY BY THE DEPARTMENT OF AGRICULTURE

SEC. 1711. The Secretary of Agriculture shall—

(1) in conducting the Department of Agriculture's continuing survey of food intakes of individuals and any nationwide food consumption survey, include a sample that is representative of low-income individuals and, to the extent practicable, the collection of information on food purchases and other household expenditures by such individuals;

(2) to the extent practicable, continue to maintain the nutrient data base established by the Department of Agriculture; and

(3) encourage research by public and private entities relating to effective standards, methodologies, and technologies for accurate assessment of the nutritional and dietary status of individuals.

TITLE XVII—NUTRITION PROGRAMS

Subtitle A—Food, Nutrition, and Consumer Education

FINDINGS

SEC. 1701. Congress finds that individuals in households eligible to participate in programs under the Food Stamp Act of 1977 and other low-income individuals, including those residing in rural areas, should have greater access to nutrition and consumer education to enable them to use their food budgets, including food assistance, effectively and to select and prepare foods that satisfy their nutritional needs and improve their diets.

PURPOSE

SEC. 1702. The purpose of the program provided for under section 1703 is to expand effective food, nutrition, and consumer education services to the greatest practicable number of low-income individuals, including those participating in or eligible to participate in the programs under the Food Stamp Act of 1977, to assist them to—

(1) increase their ability to manage their food budgets, including food stamps and other food assistance;

(2) increase their ability to buy food that satisfies nutritional needs and promotes good health; and

(3) improve their food preparation, storage, safety, preservation, and sanitation practices.

PROGRAM

SEC. 1703. The cooperative extension services of the States shall, with funds made available under this subtitle, carry out an expanded program of food, nutrition, and consumer education for low-income individuals in a manner designed to achieve the purpose set forth in section 1702. In operating the program, the cooperative extension services may use the expanded food and nutrition education program, and other food, nutrition, and consumer education activities of the cooperative extension services or similar activities carried out by them in collaboration with other public or private nonprofit agencies or organizations. In carrying out their responsibilities under the program, the cooperative extension services are encouraged to—

(1) provide effective and meaningful food, nutrition, and consumer education services to as many low-income individuals as possible;

(2) employ educational methodologies, including innovative approaches, that accomplish the purpose set forth in section 1702; and

(3) to the extent practicable, coordinate activities carried out under the program with the delivery to low-income individuals of benefits under food assistance programs.

ADMINISTRATION

SEC. 1704. (a) The program provided for under section 1703 shall be administered by the Secretary of Agriculture through the Extension Service, in consultation with the Food and Nutrition Service and the Human Nutrition Information Service. The Secretary shall ensure that the Extension Service coordinates activities carried out under this subtitle with the ongoing food, nutrition, and consumer education activities of other agencies of the Department of Agriculture.

(b) The Secretary of Agriculture, not later than April 1, 1989, shall submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate a report evaluating the effectiveness of the program provided for under section 1703.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1705. (a) There are hereby authorized to be appropriated to carry out this subtitle $5,000,000 for the fiscal year ending September 30, 1986; $6,000,000 for the fiscal year

ending September 30, 1987; and $8,000,000 for each of the fiscal years ending September 30, 1988, September 30, 1989, and September 30, 1990.

(b) Any funds appropriated under this section for a fiscal year shall be allocated in the manner specified in subparagraphs (A) and (B) of section 1425(c)(2) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977.

(c) Any funds appropriated to carry out this subtitle shall supplement any other funds appropriated to the Department of Agriculture for use by the Department and the cooperative extension services of the States for food, nutrition, and consumer education for low-income households.

Subtitle B—Nutrition Monitoring

SURVEY BY THE DEPARTMENT OF AGRICULTURE

SEC. 1711. The Secretary of Agriculture shall—

(1) in conducting the Department of Agriculture's continuing survey of food intakes of individuals and any nationwide food consumption survey, include a sample that is representative of low-income individuals and, to the extent practicable, the collection of information on food purchases and other household expenditures by such individuals;

(2) to the extent practicable, continue to maintain the nutrient data base established by the Department of Agriculture; and

(3) encourage research by public and private entities relating to effective standards, methodologies, and technologies for accurate assessment of the nutritional and dietary status of individuals.

TITLE XIX—NATIONAL AGRICULTURAL POLICY COMMISSION ACT OF 1985

SHORT TITLE

SEC. 1901. This title may be cited as the "National Agricultural Policy Commission Act of 1985".

DEFINITIONS

SEC. 1902. As used in this title—

(1) the term "Commission" means the National Commission on Agricultural Policy established under section 1903;

(2) the term "Governor" means the chief executive officer of a State; and

(3) the term "State" means the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, or the Trust Territory of the Pacific Islands.

ESTABLISHMENT OF COMMISSION

SEC. 1903. (a) There is established a National Commission on Agricultural Policy to conduct a study of the structure, procedures, and methods of formulating and administering agricultural policies, programs, and practices of the United States.

(b) In addition to the members specified in subsecton (c), the Commission shall be composed of fifteen members appointed or designated by the President and selected as follows:

(1) The President shall request Governors of States to nominate members representing individuals and industries directly affected by agricultural policies, including—

(A) producers of major agricultural commodities in the United States;

(B) processors or refiners of United States agricultural commodities;

(C) exporters, transporters, or shippers of United States agricultural commodities;

(D) suppliers of production equipment or materials to United States farmers;

(E) providers of financing or credit for agricultural purposes; and

(F) consumers of United States agricultural commodites.

(2) The Governor of a State may submit to the President a list of not less than two, nor more than four, nominees to serve on the Commission who represent individuals and industries referred to in paragraph (1).

(3)(A) Except as provided in subparagraphs (B) and (C) the president shall appoint 15 individuals from a total of, to the extent practicable, not less than sixty individuals nominated by States under paragraph (2) to serve on the Commission.

(B) The President may appoint to the Commission not more than—

(i) one individual nominated by a particular State; and

(ii) eight individuals of the same political party.

(C) If the President determines that the individuals nominated by States under paragraph (2) are not broadly representative of the individuals and industries referred to in paragraph (1), the President may substitute no more than three other individuals to serve on the Commission who represent such individuals and industries.

(c)(1) The chairmen and ranking minority members of the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate shall—

(A) serve as ex officio members of the Commission; and

(B) have the same voting rights as the members of the Commission selected and appointed under subsection (b).

(2) The chairmen and ranking minority members may designate other members of the respective committees to serve in their stead as members of the Commission.

(d) A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(e) The Commission shall elect a chairman from among the members of the Commission who are selected and appointed under the provisions of subsection (b).

(f) The Commission shall meet at the call of the Chairman or a majority of the Commission.

CONDUCT OF STUDY

SEC. 1904. The Commission shall study the structure, procedures, and methods of formulating and administering agricultural policies, programs, and practices of the United States, including—

(1) the effectiveness of existing agricultural programs in improving farm income;

(2) the manner in which the programs may be improved to retain a family-farm system of agricultural production;

(3) the effect of legislative and administrative changes in agricultural policy on planning and long-term profitability of farmers;

(4) the effect on farmers of the existing system and structure of formulating and implementing agriculture policy;

(5) the effect of national and international economic trends on United States agricultural production;

(6) the means of adjusting the agricultural policies, programs, and practices of the United States to meet changing economic conditions;

(7) potential areas of conflict and compatibility between the structure of making agricultural policy and long-term stability in policy and practices;

(8) changing demographic trends and the way they affect agriculture and agricultural policy consistency; and

(9) the role of State and local governments in future agricultural policy.

REPORTS

SEC. 1905. Not later than twelve months after the date of the enactment of this Act, and each twelve months thereafter during the existence of the Commission, the Commission shall submit an annual report to the President and Congress containing the findings and recommendations of the Commission with respect to the matters referred to in section 1904. The Commission shall not comment on legislation pending before Congress unless specifically requested to do so by the Chairman of an appropriate committee.

ADMINISTRATION

SEC. 1906. (a) The heads of executive agencies, the General Accounting Office, the International Trade Commission, and the Congressional Budget Office, to the extent permitted by law, shall provide the Commission with such information as the Commission may require in carrying out duties and functions of the Commission.

(b)(1) Except as provided in paragraph (2), members of the Commission shall serve without any additional compensation for work performed on the Commission.

(2) Members who are private citizens of the United States may be allowed travel expenses, including a per diem in lieu of a subsistence expense, as authorized by law for persons serving intermittently in the Government service under sections 5701 through 5707 of title 5 of the United States Code.

(c) Subject to the availability of funds appropriated in advance and such rules as may be adopted by the Commission and without regard to the provisions of title 5 of United States Code governing appointments in the competitive service or the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to the classification and General Schedule pay rates, the Chairman of the Commission may appoint and fix the compensation of a director and such additional staff personnel as the Commission determines are necessary to carry out duties and functions of the Commission.

(d)(1) On the request of the Commission, the Secretary of Agriculture shall furnish the Commission with such personnel and support services as are necessary to assist the Commission in carrying out duties and functions of the Commission.

(2) On the request of the Commission, the heads of other executive agencies and the General Accounting Office may furnish the Commission with such personnel and support services as the head of the agency or Office and the Chairman of the Commission agree are necessary to assist the Commission in carrying out duties and functions of the Commission.

(3) The Commission shall not be required to pay or reimburse an agency or the Office for personnel and support services provided under this section.

(e)(1) In accordance with section 12 of the Federal Advisory Committee Act, the Secretary of Agriculture shall maintain records of—

(A) the disposition of any funds that may be at the disposal of the Commission; and

(B) the nature and extent of activities of the Commission.

(2) The Comptroller General of the United States shall have access to such records for the purpose of audit and examination.

(f) The Commission shall be exempt from sections 7(d), 10(e), 10(f), and 14 of the Federal Advisory Committees Act and sections 4301 through 4308 of title 5 of the United States Code.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1907. (a) There are authorized to be appropriated such sums as are necessary to carry out this title.

(b) To the maximum extent practicable, expenses of the Commission shall be carried out using funds available to the Secretary of Agriculture.

TERMINATION

SEC. 1908. This title and the Commission shall terminate five years after the date of enactment of this Act.

Mr. DE LA GARZA. Mr. Chairman, I move that the Committee do now rise.

The CHAIRMAN. The question is on the motion offered by the gentleman from Texas [Mr. DE LA GARZA].

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. WALKER. Mr. Chairman, on that I demand a recorded vote, and pending that I make the point of order that a quorum is not present.

Mr. CHAIRMAN. The Chair will count for a recorded vote.

Mr. WALKER. Mr. Chairman, I made a point of order that a quorum is not present.

□ 2030

The CHAIRMAN. The Chair would state to the gentleman that a quorum is not necessary on a motion to rise. It is only required on a negative vote, so if the gentleman requests a recorded vote, he will have to have Members rise.

The Chair will count all those standing.

An insufficient number; a recorded vote is rejected.

So the motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. FOLEY] having assumed the chair, Mr. BONIOR of Michigan, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2100), to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to continue food assistance to low-income persons, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes, had come to no resolution thereon.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on consideration today of the bill, H.R. 2100.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. WALKER. Mr. Speaker, reserving the right to object, it was my understanding that the debate to which the gentleman has referred to in his request was going to go on until 10 o'clock tonight with the idea that maybe we had a chance of finishing this bill, and in hopes that we could get something concrete this week for farmers out across the country who are in great suffering.

Now it is my understanding that we are going to fold up, and we fold up for the week, and we come back on this bill on Monday. I understand we could conceivably be several hours into Monday.

I think having been assured that the House would go to at least 10 o'clock tonight that it is something less than within the procedures that we understood to rise at 8:30, and I am wondering if anybody could offer an explanation here as to why we do not proceed on and finish this bill tonight, since most Members have now committed to staying in town this evening?

The SPEAKER pro tempore. The Chair will advise the gentleman that undertakings were made that the House would rise by 10 o'clock tonight in the hopes of finishing the bill. It is clear, I think, to both sides of the aisle that the bill cannot be concluded tonight, even remaining until 10 o'clock, and therefore, it was the decision of the Chairman of the Committee, the gentleman from Texas [Mr. DE LA GARZA] to move that the Committee rise, to accommodate, among other things, Members that still have an opportunity for departure this evening.

Mr. WALKER. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Kentucky [Mr. HOPKINS].

Mr. HOPKINS. I thank my colleague for yielding.

Let me ask of the Chair on the time constraints that were put on this bill prior to rising this evening, will those time constraints carry over into next week? As an example, the 1-hour time allotment for tobacco?

The SPEAKER pro tempore. The Chair assumes that the time limit, being without reference to any particular time of the day in which they were made, would continue to apply to any day on which the bill was considered. That, however, is a matter on which the Chairman of the Committee of the Whole House will have to rule if an appropriate question is presented.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas.

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1562, TEXTILE AND APPAREL TRADE ENFORCEMENT ACT OF 1985

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. 99-301) on the resolution (H. Res. 286) providing for the consideration of the bill (H.R. 1562) to achieve the objectives of the multifiber arrangement and to promote the economic recovery of the U.S. textile and apparel industry and its workers, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2237, HEALTH SERVICE CORPS AMENDMENTS OF 1985

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. 99-302), on the resolution (H. Res. 287) providing for the consideration of the bill (H.R. 2237) to amend the Public Health Service Act to revise and extend the program for the National Health Service Corps, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2095, DAYLIGHT SAVING EXTENSION ACT OF 1985

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. 99-303) on the resolution (H. Res. 288) providing for the consideration of the bill (H.R. 2095) to provide for daylight saving time on an expanded basis, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2418, HEALTH SERVICE AMENDMENTS ACT OF 1985

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. 99-304) on the resolution (H. Res. 289) providing for the consideration of the bill (H.R. 2418) to amend the Public Health Service Act to revise and extend the programs of assistance for primary health care, which was referred to the House Calendar and ordered to be printed.

REQUEST FOR ADJOURNMENT TO MONDAY, OCTOBER 7, 1985

Mr. MURTHA. Mr. Speaker, I ask unanimous-consent that the House meet at noon on Monday next.

The SPEAKER pro tempore. The Chair will state to the gentleman from

Pennsylvania that that unanimous consent request has already been obtained.

When the House adjourns tonight, it will meet at noon on Monday next.

HEALTH CARE SAVINGS ACCOUNTS

(Mr. SLAUGHTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SLAUGHTER. Mr. Speaker, for the past several months I have been working with three of my able colleagues—Mr. CRANE, Mr. DREIER, and Mr. SILJANDER—on legislation designed to deal with the impending financial difficulties of the Medicare Program.

Today we are introducing the Health Care Savings Account Act of 1985 as the potential solution to both the short- and long-term financing problems of Medicare's hospital insurance and supplemental medical insurance programs without tax increases, freezes on health care providers, or benefit cuts. We believe this legislation will improve the financial prospects for Medicare while encouraging workers to use a privately financed option for health care in retirement. At the same time, this bill would enhance the financial soundness of Medicare.

In a nutshell, the bill would permit workers to contribute funds to a health care savings account [HCSA], for which credits against income taxes would be allowed. These funds would accumulate interest over the working years in order to pay for health care costs after retirement. Payroll taxes from these workers would continue to flow into the Medicare trust fund, while future retirees would decrease their reliance on Medicare through the increased reliance on their accumulated HCSA funds for health care costs.

We are convinced that this legislation is workable and is an important first step in solving the impending Medicare financial crisis. Mr. Speaker, I insert a brief analysis of this proposal in the RECORD, and I would also like to invite and encourage my colleagues to participate in a special order we are taking out next Tuesday, October 8, to further explain this legislation.

THE HEALTH CARE SAVINGS ACCOUNT ACT OF 1985

SECTION-BY-SECTION ANALYSIS

Section 1. Short Title: "Health Care Savings Account Act of 1985".

Section 2. Credit for Contributions to HCSA.

Adds a new section to the Internal Revenue Code to allow individuals and their employers to contribute to Health Care Savings Accounts an amount each year no greater than the combined employee and employer Hospital Insurance (Medicare) payroll tax in that year. (This amount is currently equal to 2.7% of wages up to the Social Security wage base [now $39,600], scheduled to increase to 2.9% next year). The employee and the employer will each receive a 60% tax credit for their respective portions of these contributions. The employee and employer may divide HCSA contributions in any manner they see fit each year.

Basically, this account is modeled after Individual Retirement Accounts (IRAs), in that HCSA funds earn interest that is deferred from taxation. A chief difference, however, is that funds distributed from an HCSA are not included as gross income (as are IRA distributions) provided that these funds are used for eligible medical expenses while the individual is eligible for Medicare (these funds do not count towards the income tax medical expense deduction). "Eligible medical expenses" refers to expenditures for health care and/or health insurance (including long-term [non-custodial] care insurance). Funds distributed from this account before the individual is eligible for Medicare are subject to the following tax penalties: 40% of the funds are subject to IRA early distribution penalties—that is, this amount to be included in gross income is increased by an additional 10% for tax purposes; 60% of the funds (that amount equal to the credits) may not be withdrawn early or else they will be subject to 100% confiscatory tax.

When an individual with a HCSA dies and leaves a surviving spouse, 50 percent of the HCSA funds not left to the surviving spouse will go to the government in the form of an excise tax. (This is a strong incentive to leave these health care funds to the surviving spouse). When an individual dies without a surviving spouse, HCSA funds become part of the individual's estates, as with a normal IRA.

When an individual with an HCSA becomes eligible for Medicare, HHS will calculate an annuity for that individual (and spouse, if applicable) based on the total assumed value of the HCSA credits, which equals the total credits for HCSA contributions plus an assumed rate of return equal to the average rates of interest for short-, medium-, and long-term debts of the Federal government over the course of these contributions.

Excess contributions to HCSA are treated like excess contributions to IRAs: no favorable tax treatment on contributions and interest earned on these excess contributions is taxable.

Subject prohibited transactions involving HCSA funds (pledging it for security, for example) to the same penalties as IRAs.

Trustees for HCSAs must file reports similar to those filed by IRA trustrees or be subject to the same penalties.

Effective Date: individuals would be able to begin contributing to HCSAs in 1986.

Section 3. Adjustment of Medicare Benefits for Individuals With HCSAs.

Upon becoming eligible for Medicare, an individual with an HCSA will have an HCSA-related deductible for each year before Medicare (part A [HI] or B [SMI]) will cover his or her medical expenses. Any Medicare expenditures below this HCSA-related deductible amount will be the financial responsibility of the HCSA owner, through either HCSA funds (i.e., self-insurance) or insurance purchased through HCSA funds; normal Medicare coverage will resume above this amount. This HCSA-related deductible will be calculated by the HHS Secretary and will be equal to 60% of the amount of medical-related expenditures that could reasonably be underwritten (by an insurance company) for the average Medicare beneficiary assuming that the annual premium equals the HCSA annuity (defined above). [The 60% figure is used to take into account administrative and other nonmedical-related costs incurred by insurance companies in the course of a policy.]

Those individuals who cannot obtain insurance to cover their added deductible at the standard premium (determined by the HHS Secretary) are given special treatment as "high-cost insurance beneficiaries": their added deductible is reduced by a proportion reflecting 80 percent of the excess premium required above the standard rate, although the deductible may not drop below a value equal to 120% of the annuity.

Individuals who have spouses dependent on them for Medicare coverage or who have spouses who choose to combine HCSA assets into one joint HCSA for both spouses may have their annuity and HCSA-related deductible recalculated upon the qualification of the younger spouse for Medicare.

For individuals who have contributed to an HCSA: at least one-third of the maximum amount possible over the course of their careers, and at least $100 (indexed) or 50 percent of the maximum (whichever is greater) in 10 individual years; these individuals will qualify for Medicare protection against catastrophic health care expenses. That is, above the HCSA-related deductible amount, Medicare will pay for all health care costs covered by Medicare. This catastrophic coverage, therefore, does away with limits on the number of inpatient hospital services or post-hospital extended care services and coinsurance and deductible amounts (for part A [HI]), as well as copayments for part B [SMI] (so long as the individual is enrolled in part B and has exceeded $1000 [indexed] in SMI-covered costs in that calendar year) for qualified HCSA owners.

Surviving spouses without a separate HCSA of "their own shall only be eligible for this catastrophic coverage if: the deceased spouse was formerly eligible, and the surviving spouse rolls 100% of remaining HCSA funds of the deceased spouse into an HCSA. [This is a further powerful incentive for a spouse to leave all HCSA funds to surviving spouse's HCSA].

Spouses who decide to pool HCSA funds into one joint HCSA shall be eligible for catastrophic benefits provided that one of the spouses was eligible for these benefits individually.

FOREIGN MEDICAL SCHOOL GRADUATES: A FEDERAL RESPONSE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. PEPPER] is recognized for 5 minutes.

Mr. PEPPER. Mr. Speaker, last December the Subcommittee on Health and Long-Term Care of the House Select Committee on Aging, which I have the privilege to chair, conducted a hearing on fraudulent medical credentials. The subcommittee found that over 10,000 individuals were practicing medicine in this country with fraudulent credentials, many of them American citizens who have obtained de-

grees from so-called medical schools in foreign countries.

Following the hearing, I called upon the U.S. General Accounting Office to conduct a thorough review of Federal, State, and private activities to address problems created by U.S. citizens studying medicine abroad and returning to this country to practice medicine. The results of their study, which I will release this week, indicate that this is a growing problem and that Government actions taken to deal with it have been inadequate.

I am introducing legislation today which I believe will offer a long-term solution to this problem. My bill would require the Federal Government to provide for a system of assuring that graduates of foreign medical schools coming to practice in the United States have completed courses of study at those schools which are of the same or comparable standards as those of accredited U.S. medical schools. This would be accomplished by the Secretary of the Department of Health and Human Services contracting with an appropriate body within this country—such as the Liaison Committee on Medical Education which accredits U.S. medical schools—to review and accredit those standards used by the medical school accrediting bodies of foreign nations. Thus, if it is determined that a foreign country uses the same or comparable standards to those used in the United States in accrediting its medical schools, all schools accredited by that nation would be considered accredited for the purposes of the Federal Government. Medical schools in foreign countries without accrediting systems could apply for accreditation with the accrediting body here in the United States or with a body in another foreign nation which has been approved under this system. Students graduating from schools which have not met these accreditation standards would not be considered physicians under Federal law. Thus, no payments under any Federal programs, including Medicare and Medicaid, would be made for services provided or ordered to be provided by graduates of unaccredited foreign medical schools.

This legislation would send a clear message to American students that in order to practice medicine in these United States, they will need to graduate from a school which does meet standards similar to those of accredited American schools. Before American students and their families spend $1 on a medical education outside of this country they will know that graduation from certain schools will not allow them to practice in the United States.

In its report, the General Accounting Office lists the many advantages of implementing this legislation including: Diminishing the current concern over the adequacy and appropriateness of the training provided by foreign medical schools; reducing the amount of verification of credentials—of graduates of foreign medical schools wishing to practice in the United States—required and thus conserving State and private resources now devoted to this effort; eliminating the need for the Department of Education and the Veterans' Administration to develop criteria for assuring comparability of education between foreign medical schools and those in this country; and, discouraging U.S. citizens from attending unaccredited foreign medical schools if they plan to practice in the United States.

Representatives of Federal, State, and private organizations including the American Medical Association, the Department of State, the National Institutes of Health, the Liaison Committee on Medical Education, the Educational Commission for Foreign Medical Graduates, and the Federation of State Medical Boards of the United States have agreed that this legislation would alleviate many of the problems currently encountered in the licensure and credentialing of foreign medical school graduates and detailed in the General Accounting Office report.

An article in the September 26, 1985 issue of the New England Journal of Medicine details the history relevant to the need for this reform. I commend this article to you and urge your support for this timely and important legislation. A full text of the legislation follows:

H.R. 3485

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ACCREDITATION OF FOREIGN MEDICAL SCHOOLS.

(a) ESTABLISHMENT OF ACCREDITATION SYSTEM.—The Secretary of Health and Human Services shall provide for a system for the accreditation of courses of study in medicine offered by medical schools located outside the United States.

(b) DESIGN OF SYSTEM.—In establishing such system and to the maximum extent feasible—

(1) the Secretary shall provide for operation of the system through an appropriate arrangement with an appropriate private organization that provides for the accreditation of courses of study in medicine in medical schools located in the United States;

(2) the standards to be used in determining accreditation shall be the same as, or comparable to, those used in determining accreditation of courses of study in medicine in medical schools located in the United States; and

(3) the Secretary shall provide that—

(A) if there is an appropriate accrediting body in the foreign country in which a medical school is located, the accreditation determinations of the body with respect to courses of study in medicine offered at the school will be recognized, and

(B) if there is not such an appropriate accrediting body, the accreditation determinations of another appropriate accrediting body described in subparagraph (A) may be recognized.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such amounts as may be necessary to carry out this subsection.

(d) UNITED STATES DEFINED.—In this section, the term "United States" means the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, and Guam.

SEC. 2. PROHIBITING FEDERAL PAYMENTS FOR SERVICES OF GRADUATES OF UNACCREDITED COURSES OF STUDY.

(a) GENERAL RULE.—Notwithstanding any other provision of law, subject to subsection (b), no payment may be made under any Federal law (including under title XVIII of the Social Security Act and under section 1903(a) of such Act for medical assistance) for a service that is required to be furnished (or to be ordered to be furnished) by or under the supervision of a physician and is furnished (or ordered to be furnished) by or under the supervision of an individual whose qualification as a physician is based on the graduation from a medical school located outside the United States upon completion of a course of study that is not accredited under section 1 of this Act.

(b) EXCEPTIONS.—

(1) SERVICES FURNISHED OUTSIDE THE UNITED STATES.—Subsection (a) shall not apply to services furnished outside the United States, except for such services as are furnished by an individual in the individual's capacity as a member of the Armed Forces or as an employee of the Department of Defense.

(2) INDIVIDUALS MATRICULATING BEFORE MAY 1, 1987.—Subsection (a) shall not apply to individuals who have matriculated in a course of study at a medical school outside the United States before May 1, 1987.

(c) UNITED STATES DEFINED.—In this section, the term "United States" means the 50 States and the District of Columbia, Puerto Rico, the Virgin Islands, and Guam.

THE ARMENIAN GENOCIDE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois, [Mr. ANNUNZIO] is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, a congressional resolution passed in 1896 entitled "Armenian Outrages" demonstrates for Members that as far back as 89 years ago our Senators and Representatives were extremely concerned about the fate of the Armenians in Ottoman Turkey. While reviewing the discussion that surrounded the resolution, I took particular note of the remarks made by Senator Shelby Moore Cullom of Illinois in the U.S. Senate on January 24, 1896. Senator Cullom, who also served as Governor of Illinois prior to his election to the U.S. Senate in 1882, reflected the concern of Members of Congress at that time, as follows:

The concurrent and accumulated testimony of hundreds and thousands of intelligent, humane, honest, and courageous Christians and Jews alike, Catholics and Protestants, Europeans and Americans, makes it absolutely certain as a dreadful truth that a massacre of innocence unparalleled for ages has been perpetrated in the Armenian provinces of Turkey.

The Senator stresses the point that these events took place at a time of peace:

Destruction and rapine have been and now are the orders obeyed in the beautiful valleys and on the rugged hills of Armenia. There has been no war, no confict between two contending powers, but a merciless, pitiless tornado of bloody ruin.

He also emphasizes that the Congress and the American people were agitated over reports of the massacres:

. . . a condition of affairs has for some time past existed in the Armenian portion of Turkey so appalling to the human heart that it is scarcely fit to be told. The Com-

mittee on Foreign Relations are not disposed to sit idly by and take no notice of such condition . . . The people of the United States are intensely excited over the condtion of affairs reported to exist in that country.

The House still has pending before it a resolution—House Joint Resolution 192—to designate a day of remembrance for those who perished in the tragic events that took place under Ottoman rule. I cosponsored that resolution and voted in favor of it during an earlier suspension vote in June. The purpose of my affirmative vote was not to embarrass a present-day NATO ally. My purpose was, and continues to be, to remember the tragedies of history in order to avoid their recurrence.

I now have a second purpose—to reaffirm the record of our predecessors in Congress. A vote against House Joint Resolution 192 now means a vote against the integrity of our own congressional history. We must pass House Joint Resolution 192 when it returns to the floor this fall.

ARMS TALKS: SEIZE THE INITIATIVE, MR. PRESIDENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. STARK] is recognized for 5 minutes.

Mr. STARK. Mr. Speaker, the Soviets have apparently put an arms reduction offer on the table to cut missile charges 50 percent.

Administration officials respond that they are studying it, there are problems, what about this, what about that, mumble, mumble, mumble.

Of course, these details have to be worked out. Of course, we need to know more.

But now—now Mr. President—is the time to seize the initiative. When you see Gorbachev face to face, say "I'll see your 50 percent and match it with a further 50 percent reduction. Let's cut the world's store of nuclear weapons by a total of 75 percent."

Mr. President, don't let your detail men bury you in doubts. Now, is the time to stake out great initiatives. The details can be worked out once you set the course.

Literally, the future of all mankind can depend on your initiative this fall.

CURRENT LEVEL OF SPENDING AND REVENUES FOR FISCAL YEAR 1986

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina [Mr. DERRICK] is recognized for 5 minutes.

Mr. DERRICK. Mr. Speaker, on behalf of Chairman WILLIAM H. GRAY III, pursuant to the procedures of the Committee on the Budget and section 311(b) of the Congressional Budget act of 1974, I am submitting the official letter to the Speaker advising him of the current level of spending and revenues for fiscal year 1986.

This will be the first current level filed for fiscal year 1986. This report reflects the budget resolution aggregates and an estimate of current level of spending and revenues consistent with the economic and technical assumptions of Senate Concurrent Resolution 32 adopted by Congress on August 1, 1985. This report incorporates enactment of House Joint Resolution 388, continuing appropriations for fiscal year 1986 and H.R. 3452, Emergency Extension Act of 1985. Because the reconciliation bill has not been enacted the revenue floor and outlay ceiling have been breached.

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON THE BUDGET,
Washington, DC, October 3, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, U.S. House of Representatives, Washington, DC.

DEAR MR. SPEAKER: On January 30, 1976, the Committee on the Budget outlined the procedure which it had adopted in connection with its responsibilities under Section 311 of the Congressional Budget Act of 1974 to provide estimates of the current level of revenues and spending.

Pursuant to Committee Rule 10, I am herewith transmitting the status report under S. Con. Res. 32, the First Concurrent Resolution on the Budget for Fiscal Year 1986. This report reflects the adopted budget resolution of August 1, 1985, and the current CBO estimates of budget authority, outlays and revenues.

As with last year, the procedural situation with regard to the spending ceiling is affected this year by Section 3(b) of S. Con. Res. 32. Enforcement against possible breaches of the spending ceiling under Section 311(a) of the Budget Act will not apply where a measure would not cause a committee to exceed its "appropriate allocation" made pursuant to Section 302(a) of the Budget Act. In the House, the appropriate 302(a) allocation includes "new discretionary budget authority" and "new entitlement authority" only. It should be noted that under this procedure neither the total level of outlays nor a committee's outlay allocation is considered. This exception is only provided because an automatic budget resolution is in effect and will cease to apply if Congress revises the budget resolution for fiscal year 1986.

The intent of the Section 302(a) "discretionary budget authority" and "new entitlement authority" subceiling provided by Section 3(b) of the resolution is to protect a committee that has stayed within its spending allocation—discretionary budget authority and new entitlement authority—from points of order if the total spending ceiling has been breached for reasons outside of its control. The 302(a) allocations to House committees made pursuant to the conference report on S. Con. Res. 32 were printed in the Congressional Record, September 5, 1985, H. 7290.

The enclosed tables compare enacted legislation to each committee's 302(a) allocation of discretionary budget authority and of new entitlement authority.

Sincerely,

WILLIAM H. GRAY III,
Chairman.

Enclosures.

REPORT TO THE SPEAKER OF THE U.S. HOUSE OF REPRESENTATIVES FROM THE COMMITTEE ON THE BUDGET ON THE STATUS OF THE FISCAL YEAR 1986 CONGRESSIONAL BUDGET ADOPTED IN SENATE CONCURRENT RESOLUTION

REFLECTING COMPLETED ACTION AS OF SEPT. 30, 1985

[In millions of dollars]

	Budget authority	Outlays	Revenues
Appropriate Level	1,069,700	967,600	795,700
Current Level	1,066,861	980,115	792,927
Amount Under Ceilings	2,839		
Amount Over Ceilings		12,515	
Amount Under Floor			2,773

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and that exceeds $2,839 million for fiscal year 1986, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in S. Con. Res. 32 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate in outlays for fiscal year 1986, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in S. Con. Res. 32 to be exceeded.

REVENUES

Any measure that would result in a revenue loss for fiscal year 1986, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in S. Con. Res. 32.

FISCAL YEAR 1986 BUDGET AUTHORITY—COMPARISON OF CURRENT LEVEL AND BUDGET RESOLUTION ALLOCATION BY COMMITTEE

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, October 1, 1985.

Hon. WILLIAM H. GRAY III,
Chairman, Committee on the Budget, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to section 308(b) and in aid of section 311(b) of the Congressional Budget Act, this letter and supporting detail provide an up-to-date tabulation of the current levels of new budget authority, estimated outlays and estimated revenues in comparison with the appropriate levels for those items contained in the most recently agreed to concurrent resolution on the 1986 budget (S. Con. Res. 32). This report for fiscal year 1986 is tabulated as of close of business September 30, 1985, and is based on assumptions and estimates consistent with S. Con. Res. 32. A summary of this tabulation is as follows:

[In millions of dollars]

	Budget authority	Outlays	Revenues
Current level	1,066,861	980,115	792,927
1985 budget resolution, S. Con. Res. 32	1,069,700	967,600	795,700
Current level is:			
Over resolution by		12,515	
Under resolution by	2,839		2,773

This is my first report for fiscal year 1986. These amounts include the estimated funding levels of the continuing appropriation resolution, H.J. Res. 388, providing temporary spending authority until the regular 1986 appropriation legislation is completed. Congress has also completed action on H.R. 3452, the Emergency Extension Act of 1985, affecting budget authority, outlays, and revenues. These amounts do not reflect savings related to the pending 1986 budget reconciliation legislation.

With best wishes,
Sincerely,

RUDOLPH G. PENNER.

PARLIAMENTARIAN STATUS REPORT HOUSE SUPPORTING DETAIL, FISCAL YEAR 1986 AS OF CLOSE OF BUSINESS SEPT. 30, 1985

[In millions of dollars]

	Budget authority	Outlays	Revenues
I. Enacted in previous sessions:			
Revenues			792,700
Permanent appropriations and trust funds	708,256	631,009	
Other appropriations		185,348	
Offsetting receipts	−162,006	−162,006	
Total enacted in previous sessions	546,249	654,351	792,700
II. Enacted this session:

ANTIBALLISTIC MISSILE TREATY

(Mr. MOAKLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOAKLEY. Mr. Speaker, today marks the 13th anniversary of the effective date of the Antiballistic Missile Treaty of 1972. Without a doubt, the ABM Treaty is one of the few meaningful and important arms control agreements that currently exists between the United States and the Soviet Union. This treaty, which was signed by President Nixon and Soviet Premier Brezhnev, bans the deployment of nationwide antimissile weaponry and also bans the testing of space-based antimissile components.

The ABM Treaty has served U.S. security interests well. It has prevented a destabilizing arms competition of antimissile weaponry, and it has saved the United States countless billions of dollars that would have been needed to maintain such an extravagant weapons race. I am especially disturbed that today, both the United States and the Soviet Union are moving toward a military policy that threatens the spirit, intent and letter of the ABM Treaty. Specifically, I am disturbed by the rapid pace in which we are moving toward the construction and deployment of space weaponry. There are those who would have us scrap the ABM Treaty in favor of a "star wars" fantasy. To those who believe that all our strategic problems can somehow magically disappear with the deployment of exotic-Hollywood weapons, I would only say; do not fool yourselves or the American people. "Star wars" at best, could offer us only a partial defense—which, in reality, is no defense at all.

I urge my colleagues to stand firm by the ABM Treaty and resist all efforts to undermine this important arms control agreement. And I pray that our negotiators in Geneva will reiterate this country's commitment to the ABM Treaty, or else we will enter a new era of arms competition that will be far more costly and dangerous than anything we have grappled with to date.

□ 2045

IMPROPER POLITICAL SOLICITATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi [Mr. LOTT] is recognized for 60 minutes.

Mr. LOTT. Mr. Speaker, on July 10, 1985 the gentleman from California [Mr. MCCANDLESS] and I filed a complaint with the Committee on Standards of Official Conduct, alleging that three House Members had illegally solicited campaign contributions from congressional staff. On September 19, the committee issued a report on its preliminary inquiry into the complaint, finding that the Members were not aware of the fundraising letter on which their names and signatures were used, and moreover, that the solicitation could not be considered violative of Federal law because it

was not "coercive," was not directed at staff, and was not received by staff.

Mr. Speaker, I have appealed to the Standards Committee to reconsider its "coercion" standard and return to the interpretation contained in the Ethics Committee manual in the 98th Congress that sections 602 and 607 of title 18 make unlawful all knowing solicitations of Federal employees by Members of Congress, and all solicitations in Federal buildings by any person. I fear that if we now open the House doors to so-called noncoercive solicitations, we will be subjecting our employees to all manner of indirect political pressures and intimidation. At this point I insert the text of my letter to the Ethics Committee:

CONGRESS OF THE UNITED STATES,
Washington, DC, September 27, 1985.

Hon. JULIAN C. DIXON,
Chairman, Committee on Standards of Official Conduct, H2-T Capitol Building, Washington, DC.

DEAR MR. CHAIRMAN: Your committee is to be commended on its expeditious disposal of our complaint alleging improper political solicitation of congressional employees. I certainly accept your committee's decision not to proceed further with your investigation based on the apparent unawareness of the respondent Members that their names and signatures had been used on the suspect solicitation letter.

However, I respectfully appeal to your committee to reconsider your finding that only "coercive" political solicitations are prohibited under 18 U.S.C. § 602 and § 607, and that noncoercive solicitations are, by inference, permissible. Though your report makes clear that you do not acquiesce in or condone such noncoercive solicitations, it also makes clear that you will only "aggressively pursue any allegations that a violation of these provisions has taken place," i.e., that a coercive solicitation was made.

While you have indicated that your report was issued to "serve as guidance to all Members or organizations which may seek such contributions," I fear the report may only serve to further confuse matters and even invite additional political abuse. My fear is that your interpretation of the law, albeit one supported by the Justice Department for prosecution purposes, may be interpreted by some as a license to fish for political contributions in the Federal employee pond, so long as the fish are being voluntarily hooked and not coercively netted. I do not think it is your committee's intention to invite such political activity in Federal office buildings, or to subject Federal employees to such targetting. But, I suspect that may be the unintended consequence of your report.

I appeal to your committee not just out of concern for the principle involved of insulating Federal employees from even the hint of political pressure, but because the three principal findings of the committee are inconsistent with the canons of statutory construction and the facts adduced by the committee as contained in the appendices to its report. The committee's three findings with which I take issue are that: (1) only "coercive" solicitations are prohibited by law; (2) the solicitation was not directed at congressional employees; and (3) that the solicitation was not called to the attention of congressional staff.

The facts, in corresponding order, are that: (1) "plain meaning" rule of statutory construction should have been applied to both sections in question since they are not ambiguous as to meaning, and therefore must be literally construed as a flat ban on any knowing solicitation of Federal employees, and any solicitation in a Federal building. Moreover, the legislative history reveals that while the provisions were indeed in response to political shakedowns and designed to eliminate such activities, the complete ban on political solicitations was considered the only way to accomplish that objective given the prevalent belief that any request for money from a superior was inherently coercive. (2) the statements of the author of the solicitation letter and the person who suggested additional language regarding staff involvement confirm that it was their intention to appeal to congressional staff as well as Members, and that some form of circulation to staff was contemplated; and (3) there are four statements in the report by staff members from three congressional offices confirming that the solicitation was circulated and/or posted in their offices.

In view of these facts which are fully elaborated on and discussed in the attached memorandum, I hope the committee will reconsider its findings for future reference and include a clarification in an advisory opinion and in the next edition of the ethics manual for the benefit of Members and organizations which solicit campaign contributions. I look forward to your respose.

With all best wishes, I am,
Sincerely yours,

TRENT LOTT.

PURPOSE

Mr. Speaker, the purpose of this special order is to layout the facts and arguments contained in my memorandum to the Committee on Standards of Official Conduct in which I strongly urged the committee to reconsider its finding that only "coercive" political solicitations are prohibited under 18 U.S.C. 602 and 607. My appeal was made not for the purpose of reversing the committee's decision not to proceed with its investigation of the instant complaint, but rather to clarify matters for the guidance of Members and organizations in the future, either through an advisory opinion and the ethics manual, or an amendment to the Code of Conduct if it is felt necessary.

The basis for this appeal is a belief that three of the committee's principal findings are inconsistent with the canons of statutory construction and the facts adduced by the committee as contained in the appendices to the report.

COMMITTEE FINDINGS

Mr. Speaker, the committee found that: First, the solicitation in question was not unlawful because it was not "coercive" in nature; second, the respondent Members did not "knowingly" solicit because they were unaware of the solicitation letter; third, there is no evidence that the solicitation was directed, or intended or perceived to be directed, at congressional staff; and fourth, there is no evidence that the solicitation was even brought to the attention of congressional staff.

"COERCION" STANDARD

The Committee Findings—The committee concludes that the solicitation letters "are statutorily suspect only if they are to be read as seeking coerced political contributions from Federal employees—that is, congressional staff." (Report, p. 13) The committee goes on to indicate that for "coercion" to be present, a solicitation must have the characteristic of a "shakedown," or involve "intimidation." (Id., p. 15)

The Justice Department Election Manual—The committee relies heavily on a Justice Department publication, "Federal Prosecution for Election Offenses" (4th edition, Oct. 1984), for this interpretation of the statute. The DOJ election manual indicates in regard to 18 U.S.C. 602 that "it was Congress' intention to criminalize only aggravated forms of involuntary political 'shakedowns,' and it is in these terms that the scope of section 602 has been customarily described by the courts that have interpreted it." And, the manual goes on:

It is the Criminal Division's position that this statute does not reach the solicitation of voluntary political contributions between federal employees. * * * However, it does reach any situation where factors are present in a political transaction which indicate that the contribution being solicited was less than voluntary, and that the solicited employee was consciously placed in a position where he felt obliged to make the contribution. (Manual, p. 26)

It should be noted, however, that none of the four court cases cited by the DOJ manual in support of this interpretation specifically held that noncoercive solicitations were permissible under the law.

Mr. Speaker, the four cases cited in the DOJ manual are as follows:

First. *Brehm* v. *United States,* 196 F. 2d 769 (1952), upheld the conviction of a congressman for violating 18 U.S.C. 602 which then prohibited Members of Congress from receiving political contributions from any Federal employee. In that case, the solicitation was mandatory: The congressman had required an employee to hand over a certain amount of her monthly paycheck as a donation to the State party committee. The only issue in the case was whether it mattered if the giver understood the purpose of the contribution. The Court held it was immaterial.

Second. *Ex parte Curtis,* 106 U.S. 371 (1882), concerned the constitutionality of an 1876 statute which prohibited career civil service employees from requesting, giving to, or receiving from any other officer or employee, any money or other thing of value for a political purpose. While the Court indicated that the purpose of the statute was to protect employees "from being compelled to make contributions * * * through fear of dismissal if they refused," and "against unjust exactions," it also recognized that compulsion and exaction were in the eye of the beholder:

If contributions from those in public employment may be solicited by others in official authority, it is easy to see that what begins as a request may end as a demand, and that a failure to meet the demand may te treated by those having the power of removal as a breach of some supposed duty, growing out of the political relations of the parties. Contributions secured under such circumstances will quite as likely be made to avoid the consequences of the personal dis-

pleasure of a superior, as to promote the political views of the contributor—to avoid a discharge from service, not to exercise a political privilege. (at 374)

In other words, the solicitation need not be a mandatory "shakedown" or a direct threat or "intimidation" for it to be unlawful.

Third. *United States* v. *Wurzbach,* 280 U.S. 396 (1930), unheld the conviction of a Congressman for receiving political contributions from Government employees in violation of 18 U.S.C. 208 which prohibited both the solicitation and receipt of such contributions. The Court upheld the constitutionality of the act on grounds that "Congress may provide that its officers and employees neither shall exercise nor be subjected to pressure for money for political purposes, upon or by others of their kind, while they retain their office or employment." (at 399) The decision did not go directly to the question of whether the contributions received were solicited, and, if so, the nature of the solicitation.

Fourth. *United States* v. *Burleson,* 127 F. Supp. 400 (1954), involved the political assessment of the employees of an electric company, which was a subcontractor, by a construction company which was a prime contractor for the Atomic Energy Commission. The Court held that 18 U.S.C. 602, prohibiting the solicition of political funds among Government employees and those deriving their salaries from the Treasury of the United States, does not apply to employees of such private firms which may be involved with Government contract work. The Court said that section 602 had as "its purpose the checking of a political abuse * * * called the shakedown system," and that it was intended "to protect those who are employees or quasi-employees of the Government and in those classes easily exposed to the abuse of coerced political contributions." (at 403, 404).

It should be underscored, however, that nowhere in its opinion does the Court in Burleson, nor in any of the other cases cited in the DOJ manual, indicate that section 602 applies only to "coerced" contributions. It is one thing to say that the statute was designed to check the political abuse of the "shakedown," and to protect employees who are "easily exposed to the abuse of coerced contributions." (emphasis added) It is quite another to say that the statute only applies to coercive shakedowns. None of the cases cited supports the argument that the statute applies exclusively to coercive solicitations; and none implies that noncoercive solicitations are permissible under the law.

Indeed, the author of the Justice Department manual, Mr. Craig C. Donsanto of the Public Integrity Section of the Criminal Division, confirmed in a phone conversation with the staff of this Member on September 23, 1985, that the "coercion" standard is simply a threshold for prosecution, and not an exclusive measure of whether the law has been violated. Mr. Donsanto also confirmed this with respect to 18 U.S.C. 607 prohibiting solicitations in Federal buildings.

The Legislative History—Both the DOJ manual and the committee report purport to rely on the legislative history of the relevant sections in support of their interpretation that they apply only to "aggravated forms of involuntary political shakedowns" and "intimidation."

Mr. Speaker, the committee report selectively cites "the legislative history of the so-called Pendleton Act, the predecessor provision to what is now codified at 18 U.S.C. 602, wherein a House committee" concluded in a 1914 report that it was not unlawful for Members of Congress to solicit campaign contributions from other Members. (Standards Committee Report, pp. 13–14). The ethics committee report, however, ignores those portions of the 1914 committee report which deal with the issue of coercive versus noncoercive solicitations in the context of the debate surrounding the enactment of the Pendleton Act in 1883.

The 1914 report of the House Committee on Election of President, Vice President, and Representatives in Congress, entitled, "Contributions for Political Purposes" (H. Rept. 63–677), contains an excellent legislative history of the Pendleton Act. It is observed that there "is no room for doubt as to what Congress intended to strike down. The exaction of contributions from those holding appointive positions in the Government service to promote the election of Members of Congress had become a national scandal." (Id., p. 6)

The report goes on to quote President Arthur's message to Congress of December 4, 1882, in which he observes that some employees have contributed to official superiors simply out of "fear of what might befall them if they refused." And the President continues: *"It goes without saying that such contributions are not voluntary, and in my judgment their collection should be prohibited by law."* (Id., p. 6, emphasis added)

Mr. Speaker, the following day, Senator Beck introduced a resolution to investigate the evil of congressional committees circularizing officeholders for contributions in definite sums. During the debate on that resolution, Senator Hoar said, "It is an entirely indelicate and improper relation for Senators or Members of the House of Representatives to be asking contributions, *voluntary or involuntary,* of persons in the civil service of the government." (Id., p. 6, emphasis added)

The 1914 House committee report then goes on to cite the Senate debate on S. 133, later enacted as the Pendleton Act, and the amendment of Senator Hawley of Connecticut which includes what are now 18 U.S.C. 602 and 607. The excerpts from the debate on the Hawley amendment include the following statement by Senator Harrison in support of the amendment:

The intention is by this bill to remove not only coercive influences *but the semblance of them;* not only to withhold legal power to exact *but to withhold the use of official place which may be treated as an exaction.* (Id., p. 9, emphasis added)

It should be pointed out that these quotations from the legislative history surrounding the Pendleton Act are included in this Member's floor statement of July 19, 1985, reprinted at appendix A of the Standards Committee report (p. 26) but are nevertheless not referred to or responded to in the body of the report, even though taken from the 1914 House report which the committee cites as an authoritative source of legislative history in regard to the issue of Member-to-Member solicitations.

Mr. Speaker, unfortunately, the only quote from the author of the relevant amendments, Senator Hawley, contained in the 1914 House committee report, is to the effect that his amendment, "only forbids employees collecting from each other and forbids persons going into rooms and offices and there collecting money for political purposes." This is basically a restatement of the amendment itself, and hardly instructive on the issue of coercive versus noncoercive solicitations. For this reason, the actual debate on the Hawley amendment was consulted, with a focus on the statements of the author himself.

There is ample evidence in Senator Hawley's statements to support the contention that it was his intention that the sections prohibiting the solicitation of Federal employees, and solicitations in Federal buildings (S. 133, secs. 8 and 9), should only apply to coercive solicitations:

All we have sought to punish, all that is the real gravamen and essence of the offense, is the unlawful and oppressive exaction of money, which might be applied to a harmless purpose. (14 Congressional Record 629, Dec. 23, 1882.)

And, again:

The offense at which we are aiming is an oppressive exaction, and that is what we have sought, to the best of our ability . . . to reach in the amendment I have proposed. (Id., at 638)

However, there are two other statements which support the view that his intention was to make unlawful all such solicitations between Federal employees and in Federal buildings:

We have a right to say to all officials and employees of the government that they shall not solicit or take from each other any thing for political purposes. * * * *It is clear they are open to corruption the moment we permit such a practice.* We are open to other abuses if we permit employees to levy and collect from each other. That we have a right to prohibit, and beyond that we ought not to go. (Id., at 622, emphasis added)

And again:

Our object was to prevent any and every man who got money from the United States for his work collecting or assessing anything of value whatever from any other man in the United States who got a cent from the United States for his work. *That of itself will remove a vast deal of the evil.* But we went further and said that no human being could, inside of Uncle Sam's buildings or grounds, *solicit in any way* anybody for a single cent. Then we said that no officer should promote or remove or degrade a man because he did or did not give, and he is liable to a heavy fine and heavy imprisonment if he does anything of that sort. (Id., at 638, Dec. 27, 1882, emphasis added)

It should be noted that the latter provision, making it unlawful for any officer or

employee of the Government to change, or "promise or threaten" to change, the employment status or compensation of another Government employee based on their giving or withholding a political contribution, deals directly with actual pressure, threats, shakedowns, and intimidation. (S. 133, sec. 10; now 18 U.S.C. 606.) This may have been what Hawley was referring to in his statements about the "oppressive exaction of money." In any event, that section would render the foregoing two sections (now sections 602 and 607) superfluous if they were only intended to address coercive solicitations if they were only intended to address coercive solicitations.

Mr. Speaker, the best that can be said about the legislative history behind the relevant sections is that it is far from conclusive as to what Congress intended. Even the statements of the author of the amendment are contradictory on the coercion issue (see, e.g., *Chandler* v. *Roudebush*, 425 U.S. 840, 859 (1975), in which the Court dismissed as not probative the statements of the bill's sponsor and floor manager because they were "self-contradictory."). However, there can be no question from the history leading up to the enactment of the Pendleton Act that the relevant provisions were aimed at eliminating the evil of mandatory assessments of Government employees. But there are numerous statements from the President on down that this could only be done by an outright ban on all such solicitations since the lines were blurred between what was voluntary and what was involuntary.

Statutory Construction—In the final analysis, the legislative history would have been rendered irrelevant if the committee had followed the usual canons of statutory construction, the first of which is the so-called plain meaning rule. That first rule is that, "the meaning of the statute must, in the first instance, be sought in the language in which the act is framed, and if that is plain, * * * the sole function of the courts is to enforce it according to its terms." (Sutherland Statutory Construction, section 46.01 (4th ed.).) The only exceptions to this rule are if it is obvious from the act itself that the legislature intended a meaning different from the common meaning, or if the literal interpretation would yield an absurd result.

As a general rule, the courts do not consult the legislative history of a statutory provision unless there is ambiguity in the meaning of the statute, and then the courts place most reliance on committee and conference reports. Statements made in floor debates are not a preferred source of assistance in statutory interpretation. (Sutherland, 48.06, 48.13). As the Supreme Court recently noted in *Regan* v. *Wald* (1984), "To permit what we regard as clear statutory language to be altered by such colloquies, which often take place before the bill has achieved its final form, would open the door to inadvertent, or perhaps even planned, undermining of the language actually voted on by Congress and signed into law by the President." (Slip Opinion, p. 14)

Neither 18 U.S.C. 602 nor 607 present any ambiquity in meaning on their face and therefore are subject to the plain meaning rule of statutory construction. Section 602 makes it unlawful for Members of Congress—and other Federal officers and employees—from knowingly soliciting any political contribution from any other Federal employees, including congressional staff. And section 607(a) makes it unlawful "for any person to solicit or receive any contribution" for campaign purposes "in any room or building" occupied by Federal employees "in the discharge of their official duties." Section 607(b) contains an exception for unsolicited contributions received in Federal buildings which must be forwarded within 7 days to a political committee. There is nothing in either section to imply that only coercive solicitations are unlawful.

KNOWING SOLICITATION

Mr. Speaker, while I do not take issue with the committee's decision not to pursue the complaint further because the respondent Members claimed that they were not aware their names had been used in connection with the solicitation sent to congressional offices, there remain some troubling and unanswered questions. According to the report, the Democratic Campaign Committee [DCC] is not responsible for the actions of one of its employees; that employee is not responsible for the actions of an employee of a subcontractor; the subcontractor is not responsible for the actions of its employee; respondent Members of Congress are not responsible for any of the above, or the suggestion of one of their administrative assistants to include certain additional language in the solicitation letter.

Unfortunately, the report does not indicate whether Members of Congress should be held responsible for permitting their administration assistants to authorize the use of their signatures on such solicitation letters, regardless of whether they had specific knowledge of the contents of the letter or for whom it was intended. Or, if not, would the AA's, who certainly did have knowledge of the contents and intended targets of the letter, be liable for having authorized the letter on their boss's behalf had the letter been found to be an unlawful solicitation? These are questions which should be raised and answered in connection with any future occurrences of this nature which may be found to involve an unlawful solicitation.

SOLICITATION OF STAFF

Mr. Speaker, the committee report finds that the solicitation was not directed at congressional staff, nor intended or perceived to be so directed. (Report, p. 14) It makes this finding on several grounds:

Salutation.—The report argues that the letter "was not addressed to congressional employees," nor "systematically distributed to congressional staff." It was "a 'Dear Colleague' letter, and the matter of staff involvement was left to each recipient member—in other words, a Member to Member communication, not a Member to staff letter." (Id., p. 14)

This argument attempts to equate salutation with solicitation—to argue that a solicitation can only be directed at the person to whom it is addressed. This might be supportable if one were not familiar with Hill practices and assumed the letter would only be opened and read by the addressee. However, such an interpretation ignores what are standard operating procedures in most Hill offices: First, a Congressman's mail is opened by a receptionist and given to the administrative assistant for further distribution to staff; Second, only mail of a most urgent, personal, or confidential nature is brought to the immediate attention of the Member; Third, the rest of the mail is assigned to staff by the AA for a response according to responsibilities; Fourth, general "Dear Colleague" letters are assigned either to the legislative assistant or the appointments secretary, depending on whether they are legislative or invitational in nature; Fifth, "Colleague" letters which invite Members and staff to a function are noted on the Member's schedule and circulated to staff or posted.

Mr. Speaker, in the case of the "Dear Colleague" solicitation letter in question, it would probably be treated as category No. 5. situation. This is not only because the letter strongly urges Members "to involve your staff" in the fundraiser—something which the committee seems to imply is the only potentially offensive passage—but because it asks "each Democratic office," not Member "to sell at least five $10 tickets," and because it closes with the hope of "seeing you and your staff" at the fundraiser. Even without the staff involvement passage this would have been construed by AA's as intended for Members and staff, and they either would have tossed it because of ethical concerns over the propriety of such a solicitation in the office, or they would have circulated it to staff or posted it in a common area.

Intent of Authors.—The report goes on to argue that, "the committee is unaware of any evidence suggesting that either the author of the letter, Howard Pulchin, envisioned the solicitation as directed *at* congressional staff, as opposed to Democratic *Members*, or that recipient *Members* were to implement any particular effort to notify their staffs of the fundraising event." (Report, pp. 14–15, emphasis in original)

And yet, this finding is directly refuted by the statement of the author of the letter, Howard Pulchin, contained at appendix K of the report:

> I wanted to inform Members of Congress *and congressional staffers* of our July 15 event, "Democrats Fight Back." The easiest way to do so, I thought, would be through a letter signed by Ed Feighan and Mike Andrews. (Id., p. 80, emphasis added)

Moreover, this admission that the solicitation was intended for staff as well as Members is buttressed by the statement of George Cody, administrative assistant to Congressman Feighan—and author of the staff involvement passage in the letter—found at appendix O of the committee report:

My intention in making the suggestion was probably *to get the staff involved or to get them to go on their own volition . . .* I was just trying to get the staff involved, *whether the letter was posted or xeroxed and passed out.* (Id., pp. 95-96. emphasis added)

This is the testimony of an AA who knows office operations and how the letter would likely be treated: it was his intention that it would be called to the attention of staff through posting or circulation in the office. It is clear from both Pulchin and Cody's statements that, contrary to the report's finding, the solicitation was "knowingly" directed at and intended for staff, and this is how they expected the letter to be perceived and treated by the recipient offices.

STAFF AWARENESS

Mr. Speaker, the report attempts to prove its claim that the solicitation was not knowingly directed at staff by finding that there is no evidence the letters "were then systematically—or even haphazardly—brought to the attention of congressional staff in Members' offices," not even in the offices "most closely associated with the solicitations—those of the named respondents." (Id., p. 15)

These assertions are again clearly refuted by the statements contained in the appendices to the committee report. These include three statements by staffers in the offices "most closely associated with the solicitations," the respondents, and one by a staffer in another Member's office:

First. George Cody, administrative assistant to Congressman FEIGHAN, is alluded to in the July 23, 1985, statement of the respondents found at appendix J, based on his interview with counsel:

George Cody recalls his receipt, at some point, of *copies of the invitation to the July 15 event which he deposited in employees' mailboxes.* Cody does not recall "posting" the June 24 letter or any other notice to Feighan employees relating to the July 15 event. (Id., p. 64, emphasis added)

Second. Vic Driscoll, administrative assistant to Congressman ANDREWS, in his July 31, 1985, statement to the committee found at appendix N, said the following:

The June 24, 1985, letter and the materials enclosed therein were not passed around my office, nor did I bring the information to the staff's attention—I do recall however, that *there were a number of brochures in the area of the receptionist's desk, which I told her to keep there and not disseminate.* (*Id.*, p. 93, emphasis added)

Third. Jonathan Cedarbaum, a member of Congressman FEIGHAN's staff, in an August 2, 1985, statement to the committee found at appendix V of the committee report, said the following:

I did not receive any of the letters personally, but *I do recall seeing the brochure for the fundraiser.* I cannot recall where I saw the material but I did not see the cover letter with the brochure. I am not a member of the Majority Party. (Id., p. 111, emphasis added)

Fourth. John Edgell, a staffer with Congressman DASCHLE, in his August 1, 1985, statement to the committee found at appendix Z, said the following:

The June 24, 1985, letter came to Congressman Daschle's office and, after it was opened, I saw it on a table in the office and read it. A female in the office is a member of the Majority Party, and we discussed the invitation in general. *The June 24, 1985 letter ended up on the bulletin board.* (Id., p. 117, emphasis added)

Edgell also indicates in his statement that, "one of the July 9, 1985, letters came across my desk because of my duties as a computer operator." He later explains: "As the computer operator, I always get the 'last shot' at the mail." (Id., pp. 116 and 117, emphasis added)

While there is no indication in the report that the staff made any survey of other congressional offices to determine how the solicitation was treated, the fact remains that four of the six congressional staffers who were interviewed, representing three offices, admitted that the solicitations had been brought to their attention in a variety of ways: they were posted, circulated, put in staffers' boxes, and left in the general area of the receptionist's desk. While these statements cover both the letters and the invitation brochures, there can be no question from an examination of them that both qualify as a solicitation as defined by the Federal Election Commission: ". . . asking persons to purchase tickets to fundraisers and providing persons with information about a fundraising activity." (Report, Appendix C. p. 34, quoting FEC Advisory Opinion 1976-40.)

CONCLUSION

Mr. Speaker, it should be evident from the foregoing that the committee's findings do not follow from the facts adduced by the committee and do not comport with the canons of statutory construction or the legislative history surrounding the enactment of the Pendleton Act.

The plain meaning rule of statutory construction requires a literal reading of the relevant provisions of the Criminal Code so long as they are not ambiguous, and so long as such a reading does not yield absurd results or thwart the obvious purpose of the statutes.

The sections in question, 18 U.S.C. 602 and 607, are unambiguous and neither yield absurd results or thwart the intent of the Pendleton Act which was to regulate and improve the civil service. The two sections, quite plainly, ban the knowing solicitation of political contributions by Members of Congress from Federal employees, including congressional staffers, and all solicitations by any person in a Federal building.

The debate on these provisions indicates that they were addressed at eliminating the evil of coercive shakedowns, but that such solicitations, by their very nature, could be considered as intimidating, whether couched in voluntary or involuntary terms. (See Attorney General's opinion at p. 26, Report.) For that reason, Congress made no attempt to distinguish between voluntary and involuntary contributions in such situations, nor did it attempt to limit the scope of the statute to "coercive" solicitations. It was felt that the only way to eliminate the evil was to ban all solicitations which could possibly give rise to even the perception of threat or the fear of reprisal.

Mr. Speaker, the solicitation which was the subject of the complaint presented to the committee involves the kind of gray area situation which Congress intentionally avoided attempting to define by opting instead for a flat ban on solicitations. Who is to say that a staff member might not feel obligated to attend a fundraiser if such a letter to his employer was circulated to him, or posted in his office, regardless of whether neither the letter nor the Member applied any direct pressure or threat? Isn't it likely the staffer would feel more pressure to attend an event called to his attention through a letter to his boss, than he would if he had received a personal solicitation at his home? The answer is yes, and that's why Congress put an outright ban on the former, but not on the latter situation so long as the solicitation is not directed to Federal employees only.

Mr. Speaker, for the above reasons, the Committee on Standards of Official Conduct should clarify its position and uphold the plain meaning of the statute which bans such solicitations of Federal employees, and in Federal buildings. While the Justice Department may have a "coercion" threshold for prosecution, there is no reason why the House cannot maintain a lower threshold, and thus a higher standard, for its disciplinary purposes. To do less and permit so-called "noncoercive" solicitations of Hill staff could open the floodgates for such "voluntary" requests from Members to the staff of other Members and committees. Such a prospect can only harm the image and integrity of the House as an institution. Let's bar the House door now to solicitors.

GOV. DU PONT ON A STRATEGY FOR U.S. INTERNATIONAL COMPETITIVENESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. KEMP] is recognized for 60 minutes.

Mr. KEMP. Mr. Speaker, former Delaware Governor and our former House colleague Pete du Pont is courageously fighting the tide of protectionism engulfing Congress. His Policy Review article "Kamikaze Economics" is one of the finest contributions I have seen to understanding the costs of trade protectionism in lost jobs and economic growth. But he goes much further by putting forth an agenda to improve our industrial competitiveness, generate higher living standards, and expand U.S. exports.

He is to be commended for his leadership and understanding of this whole trade issue. I would only suggest the addition of these monetary reforms to round out the Du Pont strategy for world growth and opportunity:

First, we need to shelve the disastrous experiment with flexible exchange rates. The uncertainty caused by the enormous fluctuations in exchange rates has disrupted

international trade and impeded long term investment. We need a new international monetary system to help stabilize exchange rates and facilitate United States and world trade.

Second, we need to ease domestic monetary policy to allow interest rates to fall and to permit commodity prices to stabilize. The connection between tight money and the rise of protectionist sentiment is not commonly realized. Overly-tight monetary policy, however, exacerbates protectionist sentiment by raising interest rates and causing a deflationary fall in commodity prices.

These conditions have helped cause the farm crisis, bank failures, the decline of manufacturing, and our mining industry troubles—all of which are feeding the protectionist fever. Federal Reserve Board Monetary policy is the source of much of these domestic problems, not foreign trade barriers alone.

I hope that all my colleagues will carefully read Pete du Pont's article and seriously consider his positive agenda as a replacement for destructive protectionism. He truly is a leader in the movement to liberalize the trading climate of the world.

Excerpts of Mr. Du Pont's article follow:

KAMIKAZE ECONOMICS: PROSPERITY AND GROWTH ARE IMPERILED BY PROTECTIONISM

(By Pete du Pont)

It's the fall of 1985 and the American economy is robust and growing. In September, the United States Department of Labor announced that the August unemployment rate fell to a five-year low of 6.9 percent. Inflation remains consistently in the four percent range. Interest rates have fallen. The U.S. economy, fueled by the Reagan tax cuts and record levels of investment—much of it in the form of dollars returning to the United States from their short trip abroad to pay for America's import surplus—created 9 million net new jobs in five years. Now more than twice as dependent on trade as it was in the 1960s, the United States economy is the locomotive of the world recovery.

In the midst of this prosperity, voices of alarm are beginning to sound from several quarters. Speaker Thomas P. O'Neill says America is losing 3,000 jobs a day to imports; more than three million jobs per year according to some estimates. The steel industry says it is losing jobs because it cannot compete against the subsidies of European steel. The computer industry is up in arms because Brazil has declared U.S. computers off limits in their country. Robert Dole, the Senate Majority Leader, is now using mystical buzz words such as "fair trade" and "level playing field." Three hundred pieces of protectionist legislation await action by the returning Congress this fall.

What's going on? Doesn't anyone wonder how we can be losing 3,000 jobs daily while creating a record 9.4 million net new jobs in five years? Doesn't anyone think it's strange that our steel industry cannot compete against the Europeans who, on net, have not created a new job in 20 years? Are subsidies really the problem or does one suspect that our heavily protected industries are reaping the fruits of their shortsighted management policies and wages which are far above the national average? Is Wall Street really worried about IBM's ability to survive the Brazilian computer freeze? Or is it more worried about Brazil's ability to finance its debt load, which will require exports? Why doesn't someone stand up and say that even if the Japanese market were totally open to American goods, the resulting increase in our exports (less than $10 billion) would hardly put a dent in our trade deficit ($120 billion) and would primarily benefit those industries (communications and financial services) that are not losing jobs in the U.S. economy, but gaining them at record rates? Why doesn't someone point out that if the United States were to level its playing field, too (e.g., by repealing the protection on textiles, sugar, steel, etc.), the trade deficit might very well get worse, not better? Hasn't Bob Dole—a Republican leader—learned the Smoot-Hawley lesson, or the Mondale lesson of 1984, that pandering to special interests is a recipe for political disaster?

The driving political forces behind protectionism legislation are understandable. Industries that view their declining profitability or loss of employment as the result of import competition argue that the cure is to curtail or eliminate those imports. Americans who fear that jobs in their industry are endangered call upon their elected representatives to "do something." Exporters who see tariff and non-tariff barriers thrown up by our trading partners, denying them full access to world markets, also look to Congress for action.

WHY INDUSTRIES GROW

But the economic forces at work present a different picture. Overall manufacturing employment in the United States has declined only slightly since 1980. In fact, if the economy continues to grow at its current pace, we will shortly have as many manufacturing jobs in the United States as we did in 1980. And although certain industries have been particularly hard hit, primarily because of falling worldwide demand (not imports), others have grown rapidly.

Interestingly, and not by coincidence, the industries within manufacturing that have had the highest growth rate of employment since 1980 have several factors in common: an increased worldwide demand for their products, little if any protection, lower than average manufacturing wages, and typically increased import penetration into their markets. Electronics and computers are two good examples. Another interesting example is the automotive sector of our economy. Since 1980, largely because of increased efficiencies and expanded worldwide demand, the auto industry has actually gained 100,000 jobs in spite of increased import penetration.

Undoubtedly, there are very real problems. Some industries and firms are losing their ability to compete in the world market, causing great hardship to some working families. Some exporters are facing illegitimate barriers to the export of their goods and services. Congress is right to wish to help change the situation.

But protectionism is not the answer. Indeed, it would worsen the very problems it promises to fix. Its costs in higher prices, reduced trade opportunities, the stifling of innovation, and the threatened return to economic depression are prices too high to pay. But the cry for protectionism will become less shrill only when an alternative set of policies is put forward: policies that will create new jobs while recognizing the special problems of the dislocated worker, increase our competitiveness here and abroad, restore America's leadership in the world economy, and raise the general standard of living.

THE COSTS OF PROTECTIONISM

America today faces the same choice our country faced in 1929 when President Hoover abandoned the tax-cutting policies of Calvin Coolidge that had brought six years of strong economic growth, and instead indorsed the Smoot-Hawley Act, plunging the world into the Great Depression. Just as in 1929, the United States today faces a wave of protectionist sentiment fueled by a healthy dose of misplaced patriotism. And just as in 1929, protectionism threatens to send the United States economy straight down the chute.

We can respond to sectoral shifts in the economy by developing a strategy to improve the competitiveness of American goods and services and to respond with compassion to the special problems of the dislocated worker. The best way to do this is to continue the policies of tax cuts and deregulation that have created more than nine million new jobs in the past five years, and increased our productivity and national wealth, not to return to the path of protectionism and economic isolation, and repeat the disaster of the 1930s.

The costs of protectionist policies do not appear in black and white in the federal budget The cost imposed on consumers is not visible like a sales tax receipt. But the cost is real. It is high. And it is discernible.

Economist Michael Munger has calculated that in 1980 the total cost of existing import restrictions was $58.5 billion. Since then, new barriers have come into being, and today, the cost of protectionism comes to between $1,500 and $2,000 annually for a family of four. This, of course, is more than most families pay in federal income tax.

A NEW GATT ROUND

America must provide the leadership in bringing our trading partners together for another round of General Agreement on Tariffs and Trade (GATT) negotiations. A new GATT round must include agreements on services as well as merchandise trade, for services are becoming a larger segment of international trade. We should bring non-tariff barriers under the GATT, for they have become a loophole. And a new GATT round should include textiles, which are presently dealt with separately in the Multi-Fiber Agreement.

Multilateral and bilateral negotiations should strive to reduce all barriers to goods and services, both tariff and non-tariff. We cannot afford to get sidetracked by the illusion that our opening negotiating gambit should be to threaten or impose tariff barriers against our trading partners in the hope that they would respond with lower barriers of their own. Experience has shown the bankruptcy of this hope. Never in history has the imposition of higher tariffs by one nation led to the reduction of tariffs by one of its trading partners.

SUPPLY-SIDE SUCCESS STORIES

Taxes of all kinds also force the price of American goods up. Massachusetts for example, lost thousands of jobs in the late 1960s and early 1970s. But in 1980, when a citizens' initiative cut the property taxes by half, the exodus of jobs ceased and the high technology firms that had planned to leave the Bay State not only stayed but expanded. Today the unemployment rate in previously high-tax, high-unemployment Massachusetts is just four percent.

My own state of Delaware has had three major income tax reductions totaling 40 percent since 1979. As a result, old jobs have been retained and new ones gained. Delaware's growth of employment and income shifted from being one of the slowest in the late 1970s to one of the most rapid in the mid-1980s.

If we think of Massachusetts and Delaware as independent nations concerned with keeping jobs, we can see how reducing taxes played the central role. Would tariffs and quotas keeping competitive foods and services out of Massachusetts and Delaware have achieved the same results? Certainly not. Fortunately, the framers of our Constitution saw just this danger of protectionism at the state level and forbade state tariff restrictions, insisting on free trade between the states.

A great number of other changes would make us better competitors in the arena of world trade. Repealing the restriction that forbids us from selling Alaskan oil to Japan and allowing the export of timber cut from our federal lands would reduce our trade deficit by $20 billion, according to Murray Weidenbaum, former chairman of the Council of Economic Advisors.

Eliminating the Cargo Preference Act, which forces much of our exports or travel on more expensive ships, would increase our competitiveness as well. Reducing antitrust limitations on combining for research and development or marketing efforts would enhance America's ability to compete. Our antitrust regulations were passed at a time when the U.S. economy was largely self-contained. Today, the American firm faces world competition. Considering an alternative policy to agricultural price supports in order to help farmers export would be a welcome step forward.

Retraining for displaced workers is an important element in reducing the fear some workers and managers have in the constant change that is endemic in a free market. Already, there are a great number of retraining programs run by companies, federal and state governments, and private colleges. Indeed, American companies spent twice as much on education and training as the combined cost of all colleges in America.

Still more can be done. One suggestion is to allow a "retraining IRA," an account where working men and women could save tax-free money that, like regualr IRAs, would accumulate interest without being taxed. Should a worker need or wish retraining to shift from one job to another, he could make with withdrawals from the retraining IRA. Unemployment insurance benefits could be made available for retraining. (A test program in Delaware is quite promising.) Health insurance could also be integrated with the unemployment insurance program as workers are often vitally concerned about their health insurance during transitions.

Another innovation would be to make company pension plans more portable. When an employe. leaves one firm and moves to another, he could carry his accumulated pension benefits with him. Fixed and non-transferrable pensions are a disincentive for workers to move, even when higher wages are available elsewhere.

The long-term answer to the structural adjustment issue has to include a fundamental reform of our education system. No longer is an education system which provides a "one skill per lifetime" worker going to be good enough for the United States to be able to compete in the modern world economy. Education, training, and retraining are going to have to be lifetime processes in our modern economy. The sooner we get on with the challenge of fundamental reforms of our education system the sooner all U.S. workers will have the tools to survive in a rapidly changing economic environment.

The challenge of the future is to create the millions of new jobs that will be necessary to employ young Americans entering the workforce. Protectionism cannot do that. Rather, we need an expanding American economy, an expanding world economy, and a modern education system to create new opportunities for entrepreneurship and innovation.

The protectionist lobby argues imports take away American jobs. It is wrong. In 1985, we have a trade deficit of $120 billion and 9 million more jobs than we had in 1980, when the United States ran a trade surplus. These new jobs could not have been generated without the enormous capital inflow that has fueled the recent expansion of the U.S. economy. And because of balance of payments must even out, capital inflows would not have been possible without a trade deficit.

Imports do not cost jobs; they are a reflection of the relative strength of the American economy. We are growing faster than the rest of the world because we cut taxes in 1981 and because we began to deregulate our economy. Continued job creation requires that we continue on this path.

The President's tax reform package will be a great boost to job creation. Other bills will also help. The Youth Opportunity Wage Act would allow teenagers to work in the summer without being priced out of the market by the minimum wage. This bill would create an estimated 600,000 jobs for teenagers every summer. No present piece of protectionist legislation even claims to come close to creating this many jobs.

The "enterprise zone" legislation would create new jobs and opportunities in depressed urban and rural areas. Real jobs would be created, not uneconomical jobs temporarily protected by tariffs. Eliminating the Davis-Bacon Act would generate new jobs in the construction industry.

We can further improve our competitiveness by unleashing the innovative genius of the American people by removing the remaining obstacles to economic growth and job creation here at home, and by reforming our educational system. Already our free economic system is beginning to adjust. The dollar has fallen nearly 15 percent in recent months on world exchanges. The U.S. economy, after a dull first half, will have a better second half. Now is the time for patience and a careful use of the scalpel, not the meat cleaver.

Those who counsel despair, who would have us retreat behind a wall of high tariffs, have lost faith in America's most enduring qualities: the ability to adapt, innovate, and use challenges as a springboard to greater heights. They have become pessimists in a world where optimists create opportunity for the future.

DEDUCTIBILITY OF STATE AND LOCAL TAXES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Vermont [Mr. JEFFORDS] is recognized for 15 minutes.

Mr. JEFFORDS. Mr. Speaker, under the tax reform option prepared by the staff of the Joint Tax Committee for consideration by the Ways and Means Committee, deductions for sales and personal property taxes will be disallowed. State and local income taxes would be deductible in part. The allowable deduction would be the greater of $1,000—$500 for unmarried taxpayers—or the portion of an individual's liability for income or property taxes in excess of 5 percent of adjusted gross income.

Such a provision will mean that State and local taxes will put a larger hole in taxpayers' pockets. The aftertax cost of services funded with State and local dollars will increase, and increased out-of-pocket tax payments could well translate into pressure for rollbacks in local taxes. Reductions in taxes, in turn, will mean cutbacks in services, including education—the single largest area of expenditure for State and local governments.

This is no time for a weakening of our commitment to education. With an economy moving in the direction of high technology and with ever-increasing foreign competition for unskilled jobs, an educated, skilled work force is more important than ever.

Exactly why sales taxes should be disallowed as a deduction is unclear. It appears to be an attempt by the Federal Government to dictate acceptable methods of revenue raising. In 10 States sales taxes are the major source of funding for education. In a majority of States, sales taxes account for over 20 percent of the funds for education.

In recent years several States have sought to improve their education systems by way of sales tax increases specifically earmarked for education. State lawmakers have voted in favor of such politically unpopular measures because of the importance they attached to improving their educational systems and because they wanted to see their States' educational systems rise above the mediocre level described by the President's Commission on Excellence in Education. Deductibility of such taxes made them more palatable to a resistant public. With the loss of deductibility for sales taxes, however, public resistance will no doubt increase, and such efforts will become even rarer, moving us even closer to becoming "A Nation At Risk."

States that rely heavily on sales taxes, however, are not the only losers. In 1980 the nationwide average of deductible State and local taxes as a percentage of gross income was 7.5 percent. Disallowing the deduction except to the extent that it exceeds 5 percent of adjusted gross income will mean the average itemizing taxpayer will lose two-thirds of his deduction.

Limiting the deduction for State and local taxes is but one of several ways

that the tax reform proposal will adversely affect education. Under the proposal some scholarship awards—or parts thereof—will be taxed. Student loan bonds would no longer be tax free. Employee educational assistance will no longer be excludable from a taxpayer's gross income. Private colleges would be unable to make use of tax-exempt financing and the 5-percent rule would restrict the use of tax-exempt bonds by the public sector. Renewal of the deduction for charitable contributions by nonitemizers may limit donations to colleges and universities.

As the debate on any tax reform measure takes shape, we must not lose sight of the inherent implications for education. In reforming our tax system we must be careful not to deform our educational system.

THE ANNIVERSARY OF THE ABM TREATY

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, today marks the 13th anniversary of the effective date of the Anti-Ballistic Missile Treaty.

The ABM Treaty of 1972 is the cornerstone of all strategic nuclear weapons agreements between the United States and the Soviet Union, helping to ensure deterrence while preventing a defensive weapons race. It is a balanced and verifiable agreement whose merits have twice been reaffirmed by our two countries.

There are disquieting signals that the Reagan administration is pushing to undercut the treaty. Certainly, the President's star wars defense initiative, if deployed, will require abrogation of the ABM Treaty.

By ensuring that neither we nor the Soviets embark on a program of ballistic missile defense, the ABM Treaty acts to avoid adding to our already huge defense budget. The research alone on star wars will cost $30 billion, and deployment of a full-fledged star wars defense could cost as much as $1 trillion. So the ABM Treaty is helping to prevent a defensive weapons race which could well bankrupt us.

Strategically, the ABM Treaty has enhanced nuclear deterrence for 13 years. The treaty's ban on nationwide antimissile defenses deters either superpower from launching a nuclear attack by ensuring effective retaliation. The treaty reflects and strengthens the conviction that nuclear war is unwinnable.

Mr. Speaker, abrogation of the ABM Treaty would plunge the United States into an immediate, dangerous, destabilizing, and prohibitively costly defensive weapons race, on top of our current offensive weapons race. For 13 years, the ABM Treaty has endured as the linchpin which makes reductions in offensive weapons possible, and we should continue to abide by its terms.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. RODINO (at the request of Mr. WRIGHT), on October 3, on account of a death in the family.

Mr. MCEWEN (at the request of Mr. MICHEL), for today until 4 p.m., on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. SCHUETTE) to revise and extend their remarks and include extraneous material:)

Mr. LOTT, for 60 minutes, today.
Mr. KEMP, for 60 minutes, today.
Mr. JEFFORDS, for 15 minutes, today.
Mr. GINGRICH, for 60 minutes, today.
Mr. GINGRICH, for 60 minutes, on October 7.
Mr. DORNAN of California, for 60 minutes, on October 9.
Mr. MCCAIN, for 5 minutes, on October 3.

(The following Members (at the request of Mr. MURTHA) to revise and extend their remarks and include extraneous material:)

Mr. JONES Of Oklahoma, for 5 minutes, today.
Mr. PEPPER, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. STARK, for 5 minutes, today.
Mr. CROCKETT, for 5 minutes, today.
Mr. DERRICK, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. LEWIS of Florida, following rollcall 334 in the Committee of the Whole today.

Mr. BEREUTER, preceding rollcall 337 in the Committee of the Whole today.

(The following Members (at the request of Mr. SCHUETTE) and to include extraneous matter:)

Mr. BROOMFIELD in two instances.
Mr. GINGRICH.
Mr. CONTE.
Mr. DAUB.
Mr. KEMP.
Mr. GILMAN in two instances.
Mr. CRANE.
Mr. DIOGUARDI.
Mr. RITTER.
Mr. DORNAN of California in two instances.
Mr. GREEN in two instances.
Mr. COURTER.
Mr. YOUNG of Alaska.
Mr. WOLF.
Mr. WHITEHURST.
Mr. O'BRIEN.
Mr. KINDNESS.
Mr. SOLOMON in two instances.
Mr. HYDE in three instances.
Mr. CHAPPIE.
Mr. BROYHILL.
Ms. FIEDLER.
Mrs. ROUKEMA.
Mr. SCHUETTE.

The following Members (at the request of Mr. MURTHA) and to include extraneous matter:

Mr. COLEMAN of Texas.
Mr. LANTOS.
Mr. FRANK.
Mr. GARCIA in three instances.
Mr. FLORIO in two instances.
Mr. VENTO.
Mr. BONIOR of Michigan.
Mr. SIKORSKI.
Mr. TORRES.
Mr. KANJORSKI in four instances.
Mr. MANTON.
Mr. MILLER of California.
Mr. FOWLER.
Mr. MINETA.
Mr. ASPIN.
Mr. SOLARZ.
Mr. LEHMAN of Florida.
Mr. TRAXLER.
Mr. APPLEGATE.
Mr. ERDREICH.
Mr. LUKEN.
Mr. CONYERS.
Mr. MATSUI.
Mr. SYNAR.
Mr. STRATTON.
Mr. WAXMAN.
Mr. BOLAND.
Mr. WOLPE.
Mr. PEASE.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 991. An act to provide authorization of appropriations for certain fisheries activities; to the Committee on Merchant Marine and Fisheries.

ENROLLED BILL SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 2475. An act to amend the Internal Revenue Code of 1954 to simplify the imputed interest rules of sections 1274 and 483, and for other purposes.

ADJOURNMENT

Mr. MCCURDY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 51 minutes p.m.) under its previous order the

House adjourned until Monday, October 7, 1985, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2081. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. ACT 6-74, "Real Property Tax Rates for the Tax Year 1986 and Classifications Amendment Act of 1985", and Report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2082. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. ACT 6-75, "Militia Exemption Amendment Act of 1985", and Report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2083. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. ACT 6-76, "The George Washington University Revenue Bond Act of 1985", and Report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2084. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. ACT 6-77, "Motor Vehicle Special Use Certificates and Tags Validity Period Extension Amendment Act of 1985", and Report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2085. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. ACT 6-78, "D.C. Correctional Facility Study Commission Act of 1985", and Report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2086. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. ACT 6-79, "Closing of a Public Alley in Square 277, S.O. 84-10, Act of 1985", and Report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2087. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. ACT 6-80, "Consuming Alcohol During Pregnancy Warning Signs Act of 1985", and Report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2088. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. ACT 6-81, "Extension of Education Financial Assistance Amendment Act of 1985", and Report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2089. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. ACT 6-83, "Cable Television Franchise Agreement Modification Act of 1985", and Report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2090. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. ACT 6-84, "General Obligation Bond Act of 1985", and Report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2091. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. ACT 6-85, "Motor Vehicle Parking Regulation Amendment Act of 1985", and Report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2092. A letter from the Executive Director, American Chemical Society, transmitting the 1984 annual report, pursuant to Public Law 88-504, section 3 (36 U.S.C. 1103); to the Committee on the Judiciary.

2093. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend section 1110 of Title 11, United States Code; to the Committee on the Judiciary.

2094. A letter from the Secretay of Commerce, transmitting a draft of proposed legislation to amend Title 5, United States Code, to change the position of the Director of the Census Bureau to level IV from level V in the executive schedule; to the Committee on Post Office and Civil Service.

2095. A letter from the Acting Secretary of State, transmitting the seventh report on the situation in El Salvador for the period June 1, 1985 to September 30, 1985, pursuant to Public Law 98-332 (98 Stat. 285); jointly, to the Committees on Appropriations and Foreign Affairs.

2096. A letter from the Comptroller General of the United States, transmitting a report entitled, "The Nuclear Waste Policy Act: 1984 Implementation Status, Progress, and Problems", pursuant to Public Law 97-425, section 304(d); jointly, to the Committees on Government Operations, Interior and Insular Affairs, Energy and Commerce, and Science and Technology.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DERRICK: Committee on the Budget. H.R. 3500. A bill to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for the fiscal year 1986 (Rept. 99-300). Referred to the Committee of the Whole House on the State of the Union.

Mr. DERRICK: Committee on Rules. House Resolution 286. Resolution providing for the consideration of H.R. 1562, a bill to achieve the objectives of the Multi-Fiber Arrangement and to promote the economic recovery of the U.S. textile and apparel industry and its workers. (Rept. 99-301). Referred to the House Calendar.

Mr. MOAKLEY: Committee on Rules. House Resolution 287. Resolution providing for the consideration of H.R. 2237, a bill to amend the Public Health Service Act to revise and extend the program for the National Health Service Corps (Rept. 99-302). Referred to the House Calendar.

Mr. HALL of Ohio: Committee on Rules. House Resolution 288. Resolution providing for the consideration of H.R. 2095, a bill to provide for daylight saving time on an expanded basis, and for other purposes (Rept. 99-303). Referred to the House Calendar.

Mr. WHEAT: Committee on Rules. House Resolution 289. Resolution providing for the consideration of H.R. 2418, a bill to amend the Public Health Service Act to revise and extend the programs of assistance for primary health care (Rept. 99-304). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. WAXMAN (for himself, and Mr. BILIRAKIS):

H.R. 3492. A bill to assist the States to establish and operate protection and advocacy systems for mentally ill individuals and to promote family support groups for Alzheimer's disease patients and their families; to the Committee on Energy and Commerce.

By Mr. COUGHLIN:

H.R. 3493. A bill to provide for the safeguarding of tax payer rights, and for other purposes; to the Committee on Ways and Means.

By Mr. GIBBONS:

H.R. 3494. A bill to amend the Internal Revenue Code of 1954 to conform the source rules for certain technical contract services with the source rules for other intangibles; to the Committee on Ways and Means.

H.R. 3495. A bill to amend the Internal Revenue Code of 1954 to relieve international double taxation of overseas construction projects of United States contractors; to the Committee on Ways and Means.

By Mr. KINDNESS (for himself, Mr. WISE, Mr. TOWNS, Mr. LIGHTFOOT, and Mr. DIOGUARDI):

H.R. 3496. A bill to amend the Freedom of Information Act to provide procedures to protect the confidentiality of business information exempted from mandatory disclosure, and for other purposes; to the Committee on Government Operations.

By Mr. LUJAN:

H.R. 3497. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for blood donations of an individual; to the Committee on Ways and Means.

By Mr. LUNDINE:

H.R. 3498. A bill to stabilize international currency markets in support of fair global competition; to the Committee on Banking, Finance and Urban Affairs.

By Mr. DAUB (for himself, Mr. DUNCAN, and Mr. BEREUTER):

H.R. 3499. A bill to amend the Internal Revenue Code of 1954 to provide that interest credited on a deposit or account in a bank or other financial institution shall not be included in income if such interest cannot be withdrawn because of a bankruptcy or other insolvency proceeding, to provide that losses suffered by depositors due to bankruptcy or insolvency shall be treated as ordinary losses, and to provide that such losses shall be treated as a business debt; to the Committee on Ways and Means.

By Mr. McCOLLUM (for himself and Mr. BURTON of Indiana):

H.R. 3501. A bill to unify the export administration functions of the U.S. Government within the Office of Strategic Trade, to improve the efficiency and strategic effectiveness of export regulation while minimizing interference with the ability to engage in commerce, and for other purposes; to the Committee on Foreign Affairs.

By Mr. MOLLOHAN:

H.R. 3502. A bill to amend the Longshore and Harbor Workers' Compensation Act to increase the number of permanent and temporary members of the Benefits Review Board in order to improve the handling of cases under the Black Lung Benefits Act; to the Committee on Education and Labor.

By Mr. MORRISON of Connecticut:

H.R. 3503. A bill to amend title II of the Social Security Act to protect the benefit levels of individuals becoming eligible for benefits in or after 1979 by eliminating the disparity (resulting from changes made in 1977 in the benefit computation formula) between those levels and the benefit levels of persons who become eligible before 1979; and to remove the ceiling on the amount of an individual's income which can be taken into account in computing his or her benefits and in determining his or her liability for Social Security taxes; to the Committee on Ways and Means.

By Mr. PRICE:

H.R. 3504. A bill to provide Federal coordination for continued development and commercialization of food irradiation; jointly, to the Committees on Energy and Commerce, and Science and Technology.

By Mr. SLAUGHTER (for himself, Mr. CRANE, Mr. DREIER of California, and Mr. SILJANDER):

H.R. 3505. A bill to amend the Internal Revenue Code of 1954 to allow individuals a credit against income tax for amounts contributed to a health care savings account and to amend title XVIII of the Social Security Act to provide for a high deductible and protection against catastrophic medical care expenses for individuals who have established such accounts; jointly, to the Committee on Ways and Means, and Energy and Commerce.

By Mr. WOLF:

H.R. 3506. A bill to improve the enforcement of the restrictions against imported pornography; to the Committee on Ways and Means.

By Mr. EMERSON:

H.R. 3507. A bill entitled: the "Anti-Displacement of U.S. Agricultural Exports Act"; to the Committee on Foreign Affairs.

By Mr. LEHMAN of California (for himself, Mr. KLECZKA, Mr. MCKINNEY, Mr. BRYANT, Mr. COELHO, Mr. MURPHY, Mr. FAZIO, Mr. RALPH M. HALL, Mr. FUSTER, Mr. COOPER, Mr. ROE, Mr. LAGOMARSINO, Mr. DOWNEY of New York, Mr. ANDREWS, Mr. SMITH of Florida, Mr. CRAIG, Mr. HEFNER, Mr. JEFFORDS, Mrs. BOXER, Mr. CONYERS, Mr. MATSUI, Mr. OWENS, Mr. COBEY, Mr. PANETTA, Mr. REID, Mr. TOWNS, Mr. SPRATT, Mr. ROGERS, Mrs. COLLINS, Mr. STARK, Mr. MORRISON of Washington, Mr. ROWLAND of Georgia, and Mr. KOLTER):

H.R. 3508. A bill to amend chapter 35 of title 44, United States Code, to reduce the paperwork burden on citizen's by requiring Federal agency correspondence to include the name, official title, telephone number, and address of individuals to whom responses and inquiries may be made; to the Committee on Government Operations.

By Mr. TAYLOR (for himself, Mr. FORD of Michigan, Mr. MYERS of Indiana, Ms. OAKAR, Mr. BURTON of Indiana, Mr. DE LUGO, and Mr. HANSEN):

H.R. 3509. A bill to amend title 5, United States Code, to extend certain benefits to former employees of county committees established pursuant to section 8(b) of the Soil Conservation and Domestic Allotment Act, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. WAXMAN (for himself, Mr. SYNAR, Mrs. COLLINS, Mr. WHITTAKER, Mr. NIELSON of Utah, and Mr. STRATTON):

H.R. 3510. A bill to establish a Federal initiative respecting the dangers of smokeless tobacco, to provide assistance to States for programs respecting such dangers, and to require labeling for all smokeless tobacco products and advertisements; to the Committee on Energy and Commerce.

By Mr. RUSSO:

H.J. Res. 409. Joint resolution to direct the President to issue a proclamation designating February 16, 1986, as "Lithuanian Independence Day"; to the Committee on Post Office and Civil Service.

H.J. Res. 410. Joint resolution to designate October 6, 1986, through October 10, 1986, as "National Social Studies Week"; to the Committee on Post Office and Civil Service.

By Mr. BOLAND (for himself, Mr. CONTE, and Mr. MINETA):

H.J. Res. 411. Joint resolution to provide for the reappointment of Carlisle H. Humelsine as a citizen regent of the Board of Regents of the Smithsonian Institution; to the Committee on House Administration.

H.J. Res. 412. Joint resolution to provide for the reappointment of William G. Bowen as a citizen regent of the Board of Regents of the Smithsonian Institution; to the Committee on House Administration.

By Mr. SIKORSKI (for himself, Mr. NELSON of Florida, Mr. FUSTER, Mr. HOYER, Mr. ANNUNZIO, Mr. TORRICELLI, Mr. STRATTON, Mr. DIOGUARDI, Mr. PANETTA, Mr. PORTER, Mr. KLECZKA, Mr. BATEMAN, Mr. RINALDO, Mr. WORTLEY, Mrs. JOHNSON, Mr. HOWARD, Mr. MAVROULES, Mr. CROCKETT, Mr. ROE, Mr. DYMALLY, Mrs. MEYERS of Kansas, Mr. EDWARDS of California, Mr. KINDNESS, Mr. CONTE, Mr. BOLAND, Mr. HORTON, Mr. DINGELL, Mr. WEISS, Mr. FISH, Mr. BLAZ, Mr. DWYER of New Jersey, Mr. MARTINEZ, Mr. BUSTAMANTE, Mr. HUGHES, Mr. LIVINGSTON, Mr. CHANDLER, Mr. RANGEL, Mr. BORSKI, Mr. BRYANT, Mrs. BOXER, Mr. DASCHLE, Mr. MORRISON of Connecticut, Mr. TALLON, Mr. TRAXLER, Mr. TRAFICANT, Ms. KAPTUR, Mr. SMITH of Florida, Mr. LIPINSKI, Mr. VENTO, Ms. OAKAR, Mr. MATSUI, Mr. WALGREN, and Mrs. KENNELLY):

H.J. Res. 413. Joint resolution designating November 6, 1985, as "Ignacy Jan Paderewski Day"; to the Committee on Post Office and Civil Service.

By Mr. SWINDALL:

H.J. Res. 414. Joint resolution proposing an amendment to the Constitution to require that outlays of the United States in any fiscal year be no more than a certain percentage of the gross national product, and for other purposes; to the Committee on the Judiciary.

By Mr. FOWLER:

H. Con. Res. 204. Concurrent resolution endorsing the recommendations of the Committee on Solar and Space Physics for solar and space physics research through the year 2000; to the Committee on Science and Technology.

H. Con. Res. 205. Concurrent resolution endorsing the recommendations of the Solar System Exploration Committee for the continued exploration of the solar system by the United States; to the Committee on Science and Technology.

H. Con. Res. 206. Concurrent resolution endorsing the recommendations of the Astronomy Survey Committee for astronomical and astrophysical exploration and understanding during the 1980's; to the Committee on Science and Technology.

By Mr. COUGHLIN:

H. Res. 284. Resolution expressing the sense of the House of Representatives on the nature of comprehensive tax reform legislation; to the Committee on Ways and Means.

By Mr. DE LA GARZA:

H. Res. 285. Resolution to urge the House of Representatives to reject any tax reform proposal which would eliminate the Investment Tax Credit; to the Committee on Ways and Means.

By Mr. VOLKMER (for himself, Mr. LOTT, Mr. CRAIG, and Mr. ROBINSON):

H. Res. 290. Resolution providing for the consideration of the bill (H.R. 945) to protect the rights of firearms owners; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

0268. By the SPEAKER: A memorial of the Legislature of the Commonwealth of Massachusetts, relative to postal efficiency; to the Committee on Post Office and Civil Service.

0269. Also, a memorial of the Legislature of the Commonwealth of Massachusetts, relative to extradition and fundamental justice; jointly, to the Committees on Foreign Affairs and the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 97: Mr. BURTON of Indiana.

H.R. 585: Mr. GREGG.

H.R. 864: Mr. GROTBERG, Mr. MAVROULES, Mr. CALLAHAN, and Mr. SAXTON.

H.R. 989: Mr. EMERSON and Mr. YOUNG of Alaska.

H.R. 1059: Mr. BADHAM, Mr. PORTER, and Mr. BENNETT.

H.R. 1072: Mr. TAUKE.

H.R. 1207: Mr. MCKERNAN.

H.R. 1318: Mr. COOPER.

H.R. 1538: Mr. DE LUGO.

H.R. 1566: Mr. BEDELL and Mrs. SMITH of Nebraska.

H.R. 1567: Mr. BEDELL and Mrs. SMITH of Nebraska.

H.R. 1616: Mr. RINALDO, Mr. JACOBS, Mr. SCHEUER, Mr. DE LUGO, and Mr. STAGGERS.

H.R. 1704: Mr. SWINDALL, Mr. PASHAYAN, Mr. SCHAEFER, Mr. LIVINGSTON, Mr. BATEMAN, and Mrs. LLOYD.

H.R. 1759: Mr. LEHMAN of California.

H.R. 1811: Mr. HARTNETT.

H.R. 1875: Mr. HARTNETT, Mr. DARDEN, Mr. MCHUGH, Mr. BILIRAKIS, Mr. GILMAN, Mr. MOAKLEY, Mr. CONTE, Mr. SMITH of Florida, Mr. SCHEUER, Mr. RINALDO, Mr. FAZIO, Mr. HAYES, Mr. PERKINS, Mr. DENNY SMITH, Mr. ECKART of Ohio, Mr. MCCAIN, and Mr. MATSUI.

H.R. 2189: Mr. ROBERT F. SMITH and Mr. SMITH of Florida.

H.R. 2451: Mr. ROSE and Mr. STALLINGS.

H.R. 2489: Mr. FORD of Tennessee.

H.R. 2761: Mr. FORD of Michigan, Mr. KOSTMAYER, and Mr. STOKES.

H.R. 2834: Mr. GINGRICH and Mr. CAMPBELL.

H.R. 2854: Mr. WISE, Mr. RAHALL, Mr. HANSEN, and Mr. HOWARD.

H.R. 2902: Mr. FAUNTROY, Mr. MARKEY, Mr. ST GERMAIN, and Mr. WIRTH.

H.R. 2907: Mr. MORRISON of Connecticut, Mr. ROBINSON, Mr. PEPPER, Mr. BOSCO, Mr. MATSUI, Mr. FAZIO, Mrs. BOXER, Mr. MILLER of California, Mr. STARK, Mr. LANTOS, Mr. MINETA, Mr. COELHO, Mr. PANETTA, Mr. LEHMAN of California, Mr. BEILENSON, Mr. WAXMAN, Mr. BERMAN, Mr. LEVINE of California, Mr. ANDERSON, Mr. BROWN of California, Mr. BATES, and Mrs. SCHROEDER.

H.R. 3043: Mr. DEWINE.

H.R. 3099: Mr. WHITTAKER.

H.R. 3132: Mr. GRAY of Pennsylvania, Mr. FOGLIETTA, Mr. COYNE, and Mr. CONYERS.

H.R. 3190: Mr. BORSKI and Mr. SIKORSKI.

H.R. 3222: Mr. DE LUGO.

H.R. 3237: Mr. BILIRAKIS, Mr. IRELAND, Mr. SENSENBRENNER, Mr. VANDER JAGT, Mr. HILLIS, Mr. KRAMER, Mr. BOULTER, Mr. YOUNG of Alaska and Mr. COBEY.

H.R. 3252: Mr. LUJAN, Mr. LAGOMARSINO, Mr. MONSON, Mrs. BENTLEY, Mr. FRENZEL, Mr. DIOGUARDI, Mr. DAUB, Mr. SENSENBRENNER, Mr. BLILEY, Mr. DEWINE, and Mr. HYDE.

H.R. 3263: Mr. MURPHY, Mr. MATSUI, Mr. SCHUMER, and Mr. FAZIO.

H.R. 3280: Mr. SILJANDER, Mr. SAXTON, Mr. MACK, Mr. HILER, Mr. WALKER, Mr. MONSON, Mr. WEBER, Mr. GINGRICH, Mr. ARMEY, Mr. COBEY, Mr. DIOGUARDI, Mr. MACKAY, Mr. SWINDALL, Mr. COBLE, and Mr. DORNAN of California.

H.R. 3300: Mr. MOODY and Mr. SAXTON.

H.R. 3371: Mr. KINDNESS and Mrs. BENTLEY.

H.R. 3398: Mr. CONYERS.

H.R. 3431: Mr. WEBER.

H.J. Res. 7: Mrs. MARTIN of Illinois, and Mr. BATEMAN.

H.J. Res. 20: Mr. CONYERS, Mr. HATCHER, Mr. BONIOR of Michigan, Mrs. LLOYD, Mr. BUSTAMANTE, Mr. SHAW, Mr. HENDON, Mr. MATSUI, Mr. CROCKETT, Mr. EMERSON, and Mr. KASTENMEIER.

H.J. Res. 172: Mr. MCKERNAN, Mr. LIVINGSTON, Mr. SCHUETTE, Mr. ANDERSON, Mr. SISISKY, Mr. DARDEN, and Mr. TAUZIN.

H.J. Res. 254: Mr. WYLIE, Mr. SMITH of New Jersey, Mr. GEJDENSON, Mr. BLILEY, Mr. GINGRICH, Mr. SMITH of Florida, and Mr. BATEMAN.

H.J. Res. 259: Mr. DARDEN, Mr. ROBERTS, Mrs. JOHNSON, Mr. TALLON, Mr. LEHMAN of California, Mr. LEHMAN of Florida, Mr. TORRICELLI, Mr. STRANG, Mr. SCHEUER, Mr. DANNEMEYER, Mr. PORTER, Mr. DANIEL, Mr. MOLLOHAN, Mr. MARKEY, Ms. OAKAR, Mr. WEAVER, Mr. COUGHLIN, Mr. AKAKA, Mr. CROCKETT, Mr. DYSON, Mr. FEIGHAN, Mr. SUNIA, Mr. ROWLAND of Connecticut, Mr. DURBIN, Mr. SHELBY, Mr. DICKINSON, Mr. FLIPPO, Mr. YOUNG of Alaska, Mr. BROWN of California, Mr. YOUNG of Florida, Mr. VALENTINE, Mr. EDWARDS of California, Mr. BERMAN, Mr. MOORHEAD, Mr. UDALL, Mr. STUMP, Mr. ERDREICH, Mr. MCCAIN, Mr. ROBINSON, Mr. MICA, Mr. BROWN of Colorado, Mr. BENNETT, Mr. KRAMER, Mr. MACKAY, Mr. MCCANDLESS, Mr. PACKARD, Mr. BILIRAKIS, Mr. IRELAND, Mr. MCCOLLUM, Mr. FASCELL, Mr. SHAW, Mr. LEWIS of Florida, Mr. SCHAEFER, Mr. CARPER, Mr. NICHOLS, Mr. ROWLAND of Georgia, Mr. ANTHONY, Mr. WIRTH, Mr. MACK, Mr. SHARP, Mr. JACOBS, Mrs. MEYERS of Kansas, Mr. GINGRICH, Mr. CRANE, Mr. FOWLER, Mr. SMITH of Florida, Mr. HILER, Mr. ANNUNZIO, Mr. COATS, Mr. PRICE, Mr. HILLIS, Mr. HAMILTON, Mr. JENKINS, Mr. GRAY of Illinois, Mr. VISCLOSKY, Mr. LIPINSKI, Mr. MADIGAN, Mr. ALEXANDER, Mr. STENHOLM, Mr. HUTTO, Mr. STALLINGS, Mr. BATEMAN, Mr. BATES, Mr. HUNTER, Ms. FIEDLER, Mr. LEWIS of California, Mr. SHUMWAY, Mr. LEVINE of California, Mr. TORRES, Mr. LOWERY of California, Mr. BEREUTER, Mr. HAMMERSCHMIDT, Mr. BRUCE, Mr. RALPH M. HALL, Mr. LUJAN, Mr. SKEEN, Mrs. LONG, Mr. LUKEN, Mr. OLIN, Mr. WHITLEY, Mr. CRAIG, Mr. THOMAS of California, Mr. CHAPPELL, Mr. MCCLOSKEY, Mr. LEACH of Iowa, Mr. BEDELL, Mr. TAUKE, Mr. HUCKABY, Ms. SNOWE, Mr. HUBBARD, Mr. PERKINS, Mr. SNYDER, Mr. HOYER, Mr. FRANK, Mr. LEVIN of Michigan, Mr. BONIOR of Michigan, Ms. MIKULSKI, Mr. BEVILL, Mr. TAUZIN, Mr. ROEMER, Mr. BOLAND, Mr. WOLPE, Mr. SILJANDER, Mr. HOPKINS, Mr. KILDEE, Mr. DOWDY of Mississippi, Mr. MAVROULES, Mr. RICHARDSON, Mr. WHITTEN, Mr. LOTT, Mr. NEAL, Mr. FOLEY, Mr. ECKART of Ohio, Mr. ROBERT F. SMITH, Mr. TRAFICANT, Mr. SYNAR, Mr. APPLEGATE, Mr. SIKORSKI, Mr. OBERSTAR, Mr. SMITH of Iowa, Mr. MONTGOMERY, Mr. HEFNER, Mr. MCGRATH, Mr. SCHUETTE, Mr. MICHEL, Mr. BROOMFIELD, Mr. HALL of Ohio, Mr. LIVINGSTON, Mr. MILLER of Ohio, Mr. WYLIE, Mr. REGULA, Mr. LIGHTFOOT, Mrs. BOGGS, Mr. BUSTAMANTE, and Mr. MOORE.

H.J. Res. 267: Mr. EDWARDS of Oklahoma.

H.J. Res. 270: Mr. ADDABBO, Mr. BORSKI, Mr. BROOMFIELD, Mr. BURTON of Indiana, Mr. COUGHLIN, Mr. DURBIN, Mr. GRAY of Pennsylvania, Mr. LEVIN of Michigan, and Mr. TORRICELLI.

H.J. Res. 334: Mr. AKAKA, Mr. BARTLETT, Mr. BLILEY, Mr. DOWDY of Mississippi, Mr. RIDGE, Mr. DENNY SMITH, Mr. THOMAS of Georgia, Mr. VISCLOSKY, Mr. WALKER, Mr. YATES, Mr. GEKAS, Mr. GOODLING, Mr. VALENTINE, Mr. RITTER, Mr. SCHUMER, Mr. LELAND, and Mr. DORNAN of California.

H.J. Res. 347: Mr. FISH, Mr. FEIGHAN, Mr. LEHMAN of Florida, Mr. FAZIO, Mr. BEILENSON, Mr. COYNE, Mr. ANTHONY, Mr. LEVIN of Michigan, Mr. LELAND, Mrs. BENTLEY, Mr. GREGG, Ms. OAKAR, Mr. THOMAS of Georgia, Mr. MRAZEK, Mr. HATCHER, Mr. CHANDLER, Mr. RANGEL, Mr. MANTON, Mr. NEAL, Mr. PEPPER, Mr. ERDREICH, Mrs. VUCANOVICH, Mr. LAFALCE, Mrs. BOXER, and Mr. MATSUI.

H.J. Res. 350: Mrs. BOXER and Mr. BROWN of Colorado.

H.J. Res. 377: Mr. FISH, Mr. LIVINGSTON, Mr. SHUMWAY, Mr. PEPPER, Mr. LEWIS of California, Mrs. BENTLEY, Mr. BERMAN, Mr. BADHAM, Mr. LEHMAN of California, and Mr. HANSEN.

H.J. Res. 381: Mr. CROCKETT, Mr. SMITH of Florida, and Mr. BONIOR of Michigan.

H. Con. Res. 50: Mr. GRAY of Pennsylvania.

H. Con. Res. 166: Mr. OBERSTAR.

H. Con. Res. 196: Mr. VALENTINE, Mr. WIRTH, Mr. RANGEL, Mr. LEVIN of Michigan, Mr. BERMAN, and Mr. BARNES.

H. Res. 71: Mr. SAVAGE, Mr. DEWINE, Mr. PURSELL, Mr. FAZIO, Mr. ORTIZ, Mr. DELAY, Mr. STOKES, Mr. MILLER of California, Mr. COATS, Mr. GARCIA, Mr. DIOGUARDI, Mrs. ROUKEMA, Mr. GONZALEZ, Mr. LEVIN of Michigan, Mr. BARTON of Texas, Mr. SOLARZ, Mr. MONSON, Mr. HERTEL of Michigan, Mr. CONTE, Mr. JEFFORDS, Mr. DWYER of New Jersey, Mr. ST GERMAIN, and Mr. TAUZIN.

H. Res. 216: Mr. DARDEN, Mr. SAXTON, Mr. ARMEY, Mrs. HOLT, Mr. MONSON, Mr. COBEY, Mrs. BENTLEY, and Mr. EDWARDS of Oklahoma.

H. Res. 245: Mr. BENNETT, Mr. BEVILL, Mr. FOGLIETTA, Mr. FRENZEL, Mr. FUSTER, Mr. MURTHA, Mr. MYERS of Indiana, Mr. SAXTON, Mr. SKELTON, and Mr. DENNY SMITH.

H. Res. 269: Mr. RODINO and Mr. LEVINE of California.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

0224. By the SPEAKER: Petition of the Commissioners Court of McCulloch County, TX., relative to the Fair Labor Standards Act; to the Committee on Education and Labor.

0225. Also, petition of Jeronimo Esteve-Abril, Hato Rey, Puerto Rico, relative to the Internal Revenue Code; to the Committee on Ways and Means.

0226. Also, petition of the Youngstown City Council, Youngstown, OH, jointly, to the Committees on the Judiciary and Energy and Commerce.

EXTENSIONS OF REMARKS

HOW TO SUPPORT THE DEMOCRATIC REVOLUTION

HON. NEWT GINGRICH
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. GINGRICH. Mr. Speaker, as this body considers the policies toward such nations as Chile and South Africa, this recent advice by Michael Ledeen supplies some very good advice for us. It should be read carefully by every Member:

HOW TO SUPPORT THE DEMOCRATIC REVOLUTION

(By Michael Ledeen)

The streets and campuses of our cities once again resound with the voices of demonstrators calling for the United States to "get tough" with its allies. Whether demanding that we sever all economic ties with the Union of South Africa, or that we pressure Philippine strongman Ferdinand Marcos to share power with his opponents, many Americans are clearly unhappy with the close embrace between their country and such regimes. In short order we can expect similar calls concerning our relationship with General Pinochet's dictatorial regime in Chile.

Such protests are by now a standard feature of public life in this country, but the issues raised by the protestors—which have to do with the nature of our alliances and the objectives of our foreign policy—remain among the most controversial in our national debate. The persistence of confusion about the basic purposes of American foreign policy, above and beyond the latest tactical wrinkle ("Nixon Doctrine," "Reagan Plan," or whatever), suggests that we have yet to come to terms with the requirements for America's proper role in the world. What, then, are those requirements?

In recent years we have seen a remarkable series of transformations from dictatorship to democracy, in countries ranging from Turkey and Spain and Portugal to Argentina and Honduras. There is no question that these examples encourage other countries, especially those with a Spanish or Portuguese tradition, to move in the same direction (Brazil, Uruguay, and El Salvador are instances). In addition, there is the encouraging story of Grenada, where armed American intervention overthrew a Marxist dictatorship and returned the country to democracy, representing the first time that the Brezhnev Doctrine (according to which the Communist takeover of any country is irreversible) has been actively challenged. And, in Eastern Europe, there is the most ambiguous but perhaps ultimately no less hopeful case of Poland, where, despite all efforts to suppress it, Solidarity lives on.

If there is one central theme and organizing principle of our foreign policy, it should be to support this movement—which some observers have called a democratic revolution—around the world. Our task is actively to encourage non-democratic governments to democratize, and to aid democratic movements that challenge totalitarian and authoritarian regimes. Not only should this be our objective, in a sense it must be our objective, for without this organizing principle and central theme, even the most brilliantly conceived *Realpolitik* will fail.

Such is the power of our own traditions and of our commitment to the universal value of democracy that Americans will not, for example, support a long-term friendship with a repressive dictatorship; our basic alliances must be with democratic countries, or with countries that are seen to be moving toward greater democracy. There is an important corollary to this axiom: except in extraordinary circumstances, the American people will not long give their approval to a foreign policy based purely or even primarily on abstract considerations of the balance of power.

Some decry this American characteristic, arguing that it makes it impossible to conduct a (presumably more effective) foreign policy, one based on a traditional conception of the national interest. Such criticism, however, is misguided, for the spread of democracy *is* the most basic of our geostrategic interests. If the democratic revolution should succeed, our security will be greatly enhanced; if the democratic revolution is defeated and rolled back, our security will be diminished.

These principles are often less well understood by ourselves than by our enemies, who recognize only too clearly that the existence of free societies threatens them. The vitality of democracy, its appeal to human creativity, and the unlimited range it gives to human development, strike fear into the hearts of those whose power depends upon shackling free people and insisting upon a single "truth." The most aggressive of our enemies, the Communist totalitarians, aim to remove democracy from the earth, in order that they may finally feel completely secure. This point was driven home by the Central American leaders interviewed by the Kissinger commission. Every head of government testified that so long as the Sandinistas were in power in Nicaragua, all chance for democracy in the area would be mortally jeopardized.

The implication is clear enough: if we are serious about the democratic revolution in Central America, we must challenge Nicaraguan (and Soviet-sponsored Cuban) totalitarianism there; if we are serious about the democratic revolution in general, we must challenge Communist totalitarianism in general. Indeed, our struggle with Communist totalitarianism—like our previous war with fascist totalitarianism, and like our struggle with dictatorships of all stripes—is unavoidable, a matter of political principle which is simultaneously a strategic national interest. It is not the other side of the coin, it is the same coin as our support of the democratic revolution.

Needless to say, however, solid unflinching support for the democratic revolution does not mean the abandonment of good sense. American policy-makers cannot be deprived of such essential tools as the choice of the lesser of two evils, the strategic pause, and the wait-and-see. Although we certainly prefer democratic regimes to antidemocratic ones, we should by now also have learned that many of the world's worst tyrants (Stalin, for one) wrap themselves in the mantle of democracy, while some of those we have viewed as hopelessly repressive have actually paved their countries' way from dictatorship toward democracy (Generalissimo Franco providing perhaps the most interesting example). All too often in the recent past, moreover, we have seen dictators friendly to the United States replaced by hostile totalitarians, to the benefit of our enemies and the detriment of our own interests and those of our allies.

Some American policy-makers and intellectuals have concluded from this circumstance that forthright, universal support for the democratic revolution is in fact a dangerous and counterproductive policy, one that will bring us into conflict with some of our most important allies, in areas vital to our national security. The objection is a serious one. How can we continue to maintain close friendships with foreign leaders when we are simultaneously intruding into their internal affairs, trying to get them to dilute their authority and significantly change their political system? More ominously, if we start demanding that South Africa end apartheid or that Marcos share power with his opponents, are we not inviting a reprise of the North Vietnamese takeover of the South and the replacement of the Shah of Iran by the Ayatollah Khomeini, two cases in which a mildly repressive (and friendly) ally was defeated and a far more evil force (both from the point of view of the people living in those countries and of American interests) soon came to dominate the scene?

Yet our having failed in the past does not mean that we must continue the pattern in the future. Our various errors of judgment and omission should not lead us to abandon a policy essential to our interests and of a piece with our national traditions. In part, the Vietnamese and Iranian disasters occurred precisely because we lacked the courage and wisdom to fight for those traditions. Our failure to support the Shah during the crisis of 1979 was criminal, but we could and should have acted in such a way over the preceding quarter-century as to have made the crisis unnecessary. That would have required years (not just months) of steady pressure on the Shah to undertake a gradual liberalization of his regime, to share power with the emerging new middle class (mostly trained in the United States), and to limit his own authority. In this sense intelligent American "meddling" in the internal affairs of other countries is fully justified, for if we encourage allies to become more democratic, it is in order to make their own governments more stable and our alliances more durable.

That having been said, one must add immediately the qualification that it is exceedingly difficult, if not impossible, to achieve a successful transition from dictatorship to democracy in the midst of a violent crisis. When one of our undemocratic allies is under attack from anti-democratic forces that are also hostile to us, our first obligation is to support the ally, and only then to

address the question of greater democracy. In Vietnam, we often acted as if its leaders (and perhaps even the system of government) could be changed without undermining the high morale necessary to sustain the war effort in the South. In Iran, having failed over the years to nudge the Shah toward liberalization, we then conspicuously failed to come to his side in his time of crisis.

There are of course factors inhibiting the successful prosecution of a long-term policy of critical support for undemocratic allies. One of them has to do with the way the Left and the Right in domestic American politics line up on the issue of repressive governments. The Left condemns out of hand governments ranging from South Africa to Honduras to the Philippines while tending to turn a blind eye to left-wing dictatorships and/or actively to support Marxist-Leninist guerrilla movement like the FMLN in El Salvador or SWAPO in Namibia. Moreover, this support often continues even after the guerrilla movements seize power and establish single-party dictatorships. As for the Right, it denounces Communist regimes while tending to take a benign view of even such extreme dictatorships of the Right as Pinochet's Chile, Stroessner's Paraguay, and Argentina under the generals who preceded Alfonsin.

Both the Right and the Left are wrong. The error of the Right is to confuse alliances of convenience with principled, durable rapport. We may indeed sometimes be forced into close working relations with undemocratic or even anti-democratic countries, but as a practical matter we have to be able to show either that our ally is moving toward greater internal democracy or that there is a crisis so grave as to require our holding firm. If the crisis is of insufficient proportions, or if the democratic credentials of the society fail to pass muster, the American public will not long remain convinced of the necessity of the alliance and it will be broken by the winds of political storms. Marcos and Pinochet, as well as their friends in the United States, should have realized long ago that without movement toward greater democracy, America's support would eventually be called into question.

But if the Right frequently misunderstands the role of the democratic ethos in our foreign policy, the Left all too often performs the more damaging role of rendering that policy impotent, by devising abstractly moralistic standards of democracy that no country can possibly live up to. This extremely dangerous tendency was at work during the fall of the Shah of Iran, when the Carter administration—egged on by elements of the media and the universities—contributed to the paralysis of one of our most important allies. In the opinion of many in the Carter administration, the record of the Shah in human rights justified cutting off support in his hour of need. They held to this opinion even though, in the context of the Middle East, Iran was a remarkably decent place, and even though there was every prospect that a change in regime would make things far worse.

At the same time that the Left holds our allies to impossible standards, it tends to exempt our left-wing opponents altogether, taking their every encouraging word at face value and even urging patience and understanding in the face of barbarisms committed by self-proclaimed "revolutionary" regimes. The cases of Cambodia and Communist Vietnam leap to mind, as does that of the Ayatollah's "revolution," which at the time was mistaken for a movement of the Left and defended as such. During the 1982 war in Lebanon, to cite another example, the systematic terror visited by the PLO upon southern Lebanon over the previous seven years was hardly ever mentioned in the liberal press. (David Shipler did finally write about it in the New York *Times*, but only after the first wave of fighting was over.) It is not as if the Cambodian and Vietnamese Communists, or the Iranian Shi'ites, had neglected to provide detailed descriptions of what they were planning to do once they came to power, or as if the PLO's activities in Lebanon were a secret. The Left simply declined to believe what was there to be seen; it thereby contributed its own decisive share to the American policy fiascos of the recent past.

If our support of the democratic revolution is to have any chance of success, then, the first thing we must learn to do is to assess, realistically, the difference between our friends and our enemies. The second thing we must learn, or relearn, is the difference between authoritarian and totalitarian dictatorships. As it happens, most of our undemocratic allies fall into the former category, most of our enemies into the latter. As it also happens, the prospects for achieving democratization are much brighter in the former than they are in the latter.

The reason is a simple one. In authoritarian dictatorships, the repressive power of the regime generally rests with a single individual or ruling group, and if that individual or group passes from the scene, then meaningful change becomes possible. In authoritarian Spain, once Franco died, the system evolved in a very few years into a full-fledged Western democracy. In totalitarian dictatorships, by contrast, it is the system itself that performs the evil work, generally through the instrumentality of institutionalized terror. Nor does the perpetuation of the system depend upon any single individual: in the Soviet Union, with the death of Lenin, Stalin stepped forward, and after him there have been others, while the system has remained fundamentally unchanged.

The capacity of authoritarian regimes to change does not even depend upon the death or removal of their leaders; in Central America, the military regimes of El Salvador, Honduras, and Guatemala have shown themselves quite able to provide for a smooth transition from dictatorship to democracy. The Salvadoran army has been a driving force behind the successful democratization of the country. In Honduras, the army stepped aside in favor of a freely elected civilian government, while in Guatemala free elections have been promised and a new constitution is being drafted, under the eyes of the current military dictatorship. Farther to the south, Uruguay and Brazil are following suit.

Not only is the democratic revolution more likely to succeed in authoritarian counties than in totalitarian ones, where transitions of this kind are not possible, but our own best chance at helping to bring about the necessary transformation is in countries friendly to us—*provided* that we are perceived by them as steadfast allies who, while calling for change, nonetheless respect and are willing to defend their integrity against our common enemies. That such a strategy can work is demonstrated by the example of Turkey, where we recognized the legitimacy of a military dictatorship that was installed because the country had fallen prey to a violent wave of terrorism, but urged the generals to restore power to the civilian politicians as soon as possible. Once the terrorist threat was quelled, this is exactly what the generals did.

In the Philippines, what the future holds is uncertain. We have, currently, given Ferdinand Marcos two messages: we will support him, but there is a limit to our patience. This tacit threat has real credibility in the Philippines, where we have considerable economic and political leverage, and where we can also contemplate without alarm the possibility that Marcos might be replaced by his most outspoken opponents. Over time, the Philippines will either evolve toward greater democracy or undergo violent internal conflict. The country will not put up with Marcos forever, and neither should we: if Marcos is unwilling to reform, we should seriously contemplate organizing the opposition and supporting it against him, provided the opposition is democratic and its leaders are talented and mature enough to see the country through the difficult transition. If these qualities are lacking, then we will be faced with the unpleasant but unavoidable task of selecting among several poor alternatives.

South Africa is a different matter altogether, because we are morally opposed to the very basis of South African society. No American government can long refrain from outspoken criticism of apartheid, and over the long term, barring a major crisis, if there is no evidence of evolution toward democracy the American people will make it impossible for an administration to work closely with Pretoria. But there is also no gain saying the fact that we are in almost complete agreement with Pretoria in international affairs, and there are good reasons to fear that a drastic change in South Africa might prove so destabilizing that we, and the entire West, would pay an enormous strategic price for it.

Had Robert Mugabe's Zimbabwe turned out to be more democratic and more tolerant of its white and black political opponents, one might be more sanguine about demanding one man/one vote in South Africa; but as things stand today, the United States can hardly urge South Africa to follow the example of what was once Rhodesia. Then again, had we the capacity for real covert action, we might secretly support the democratic element of the South African opposition while openly supporting the Pretoria government; but this strategy is not available to us, because we can no longer keep such actions secret. The problem, in short, is probably the most agonizing one we face in our foreign policy.

Yet with regard to the regime in Pretoria, as well as similar, less hateful regimes elsewhere, it cannot be emphasized too strongly that whatever influence we do have will be frittered away entirely unless our allies can be confident that we will not abandon them. That is why today, the great touchstone of American credibility is Central America. It is there that the democratic revolution has the brightest prospects, and there that our commitment to the democratic revolution is being most severely tested. The challenge is all the more dramatic because it is taking place close enough to our borders to constitute an issue of national security.

We have quite vocally stated in Central America that we will not tolerate any further expansion of Soviet/Cuban/Nicaraguan power. Yet we have not acted in accordance with that declaration. Despite the near-universal recognition that Nicaragua is

heading internally toward Communist totalitarianism, that it represents a major Soviet beachhead in our hemisphere, and that it is indispensable to the guerrilla war conducted by the FMLN in El Salvador and by other like-minded groups in Honduras and Guatemala, Congress has decreed that we may not challenge the Sandinista regime in Managua. Nor has the Reagan administration fought hard enough to retain financial support for the contras.

The net result is that it is now an open question whether the United States will bring any meaningful pressure to bear on our Cuban and Nicaraguan enemies, or whether we will leave them free to set the level of conflict in El Salvador and the timing of their attacks throughout the hemisphere. If the latter should turn out to be the case, then we will have sent another depressing message to those around the world who contemplate taking up the struggle for the democratic revolution and who have looked to us as its ultimate defender. We will have told them that Vietnam and Iran are the enduring models of American policy, and that Grenada was simply a momentary aberration.

If we fail in Central America, regimes from Manila to Pretoria will be the more likely to reject our suggestions for change, reasoning that they have only themselves to depend upon in the face of their enemies. The same goes for southern Asia, where the government of Pakistan must decide how much support to give to the freedom fighters of Afghanistan; after all, if the United States cannot protect a nearby ally against Nicaragua, can it be expected to shelter a distant friend against the Soviet Union itself? And the same goes too for northern Africa where the foes of Libya's Muammar al-Qaddafi may be tempted in desperation to seek an accommodation if Libya should offer it.

The list can be extended, from Solidarity in Poland to the refuseniks in the Soviet Union, from the opposition to Castro in Cuba to the democratic foes of Pinochet in Chile. It is only by remaining true to our principles—which in Central America means supporting the democratic revolution in El Salvador, Honduras, and Guatemala, while exerting our utmost effort to thwart and ultimately reverse the totalitarian advance—that we can confidently expect to find others willing to take their own risks for freedom and democracy.

FATHER MALONEY RETIRES AFTER 51 YEARS OF SERVICE

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursaday, October 3, 1985

Mr. KANJORSKI. Mr. Speaker, it is my great pleasure to inform you and my fellow Members of the House of Representatives of a special dinner that was held on September 29, 1985, to honor the retirement of Father Andrew P. Maloney.

Father Maloney has devoted a lifetime of service to God and to his community through his spiritual guidance and leadership. Born on June 1, 1908, in Archbald, PA, Andrew Maloney was educated in Archbald schools and graduated from St. Thomas High School in Scranton and the University of Scranton. He completed his studies for the priesthood at St. Bernard Seminary in Rochester, NY, and later received an M.S. in education from Marywood College.

Father Maloney was ordained on May 26, 1934, in St. Peter's Cathedral in Scranton by Bishop Thomas C. O'Reilly. He has served at St. Matthew's in Stroudsburg, St. Gabriel's in Hazleton, St. Mary's Help of Christians in Pittston, St. Bernadette's in Canadensis, and St. John the Evangelist in Wilkes-Barre. Father Maloney has served as pastor of St. Francis of Assisi Church in Nanticoke since December 9, 1975.

America became a great nation from the strength of faith of its people. We have all benefited from the selfless devotion of men and women like Father Maloney, who have given the most any individual can give—the service of a lifetime for a higher goal. It is easy to forget the sacrifices that our spiritual guides have endured to bring God's message of love and peace to the world. In our times of trouble we depend upon the strength and wisdom of people like Father Maloney, and it is only fitting that we share a moment of joy in the commemoration of Father Maloney's lifetime of labor and love.

Mr. Speaker, it is a pleasure and a privilege to be able to honor Father Maloney's distinguished service to his God, to his church, and to his community.

IMMIGRATION REFORM VERSUS SPECIAL INTERESTS

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. GARCIA. Mr. Speaker, the September 22 edition of the New York Times contained an editorial on S. 1200, the Senate immigration reform bill. While I do not agree with everything the Times has to say—on immigration reform—they support employer sanctions, I do not—I, nonetheless, believe that they are right on target regarding their opposition to the expansive Guest Worker Program (read: bracero) contained in S. 1200.

In addition, this past week the Washington Post ran an article on the administration's support for such a program. That article also points out that the administration representative offering support for the 'Guest Worker' Program was Deputy Agricultural Secretary John Norton, a grower of perishable crops, whose farming camps have been criticized for their substandard conditions.

I commend both articles to my colleagues, and ask that they carefully consider this aspect of immigration reform.

[From the New York Times, Sept. 22, 1985]

GIVING IMMIGRATION THE BUSINESS

Once, walking through this apricot orchard, a California grower was asked what would happen if congress reformed immigration law, sharply curtailing illegal farm workers. "I'd go out of business the next day," he said. In that case, how much could he sell his land for? "Who said anything about selling the land? I'd cut down the apricot trees and plant walnuts. You don't need to pick walnuts; you can shake them down."

The story, told by a student of immigration law, tells something about how Western growers last week shook down the Senate, in a blazing example of special-interest politics. The Senate finally passed immigration reform, but only after nearly giving away the farm.

The damage need not be mortal. It was contained by a later amendment and can be mitigated in the House. In any case, farm workers account for only about 15 percent of illegal entrants. Controlling the illegal flow remains worthy of support from all those, right and left, who have spoken for it so forcefully. What most needs to be heard now is the voice of the President.

The heart of the reform bill is the correction of a glaring wrong in present law, one that encourages hundreds of thousands of illegal migrants: It is illegal for them to work in this country but it is not illegal to hire them. Under the legislation, sponsored this year by Senator Alan Simpson, Wyoming Republican, and Representative Peter Rodino, New Jersey Democrat, the Government could finally go after the employers, too.

"Hardship!" insist the growers of perishable fruits and vegetables "We need special treatment!" Sometimes, truly, they do. sometimes they cannot find enough domestic workers for the harvest. Without access to experienced foreign workers, crops would rot. Yet at other times, it is easy to believe that the growers are really clamoring for something else, not labor that is experienced but labor that is cheap.

Senator Simpson's bill responds to the plea of hardship. It would make importing foreign workers easier under present law. The bill also offers special treatment. All other businesses would have to stop hiring illegals immediately. Growers would get three years to comply gradually.

What did the growers say to all this? Not good enough. They launched a costly campaign for treatment that is even more special. Last week they got it, in the form of what might be called the Wilson Workers. Senator Pete Wilson, California Republican, persuaded his colleagues to create, just for growers, an astonishingly large army of seasonal farm workers, up to 350,000 at a time. All a worker need do to get a nine-month visa is apply for it. Monitoring all those workers to see that they go home after nine months would not, however, be so simple.

What's a torpedo like that doing in a bill intended to give the nation more control of its borders? The motive was not need, Senator Simpson said, but greed. Such thoughts must have occurred to many senators after they voted to create wave after wave of Wilson Workers. The next day, they limited the program to three years.

The Senate's passage of the whole bill leaves two hurdles. The House passed it with difficulty last year, before it died in conference. With Chairman Rodino's lead, it may pass more easily this year. In the process, the House could insist on sharply reducing the Wilson Workers.

The final hurdle is the President. Attorney General Meese professes strong Administration support for the legislation. But the bill has been attacked by White House guerrillas before. This is a fine time for a strong word from President Reagan, espcially considering that Senator Wilson, the grand

panjandrum of all those Wilson Workers, is from Mr. Reagan's own party and state.

What does the President, such a determined foe of iniquitous "special interests," think of what the California growers have wrought? Does he believe that Wilson Workers will strengthen America's capacity to control its borders? Most of all, does he want immigration reform? If he does, this could finally be the year. But he has to say so.

[From the Washington Post, Oct. 1, 1985]

GUEST WORKER OPTION OFFERED—ADMINISTRATION WOULD LET FOREIGNERS HARVEST PERISHABLE CROPS

(By Mary Thornton)

The Reagan administration, pushing for an overhaul of the nation's immigration laws, yesterday outlined a compromise "guest worker" proposal to allow an unspecified number of foreign workers to enter the United States temporarily to harvest perishable crops.

The administration plan, introduced at a House Judiciary subcommittee hearing would:

Set up a temporary farmworker program for growers of "truly perishable" crops and would allow workers to move from grower to grower during the harvest season.

Require the Justice Department to determine that domestic workers are not available for the jobs.

Give foreign workers legal protections in the areas of housing standards, wages and labor organizing rights.

Create a special commission to decide how many temporary workers should be admitted. The commission would set a cap on admissions after two years and make annual reductions of 5 percent to 20 percent a year afterward.

Under heavy pressure from lobbyists for major growers, the Senate last month passed an amendment to admit 350,000 foreign workers at any one time for periods of up to nine months to harvest perishable crops. Opponents added language to end the program after three years unless Congress reauthorized it.

Until yesterday, the administration had not taken a position on the guest-worker program. "This issue must be dealt with in a pragmatic, reasonable manner . . . to avoid potential efforts to bring this legislation down," said Immigration and Naturalization Service Commissioner Alan C. Nelson, testifying before the subcommittee.

Growers of perishable crops, most of them in the West, say domestic workers do not want the harvesting jobs. Organized labor argues that domestic workers are available, but growers fire them and discourage unionization so they can use cheap foreign labor.

Dolores Huerta, first vice president of the United Farmworkers of America, charged that there are unemployed Americans and legal aliens who would like the jobs but are not willing to work for the wages of as little as $2 per hour that the illegal workers receive.

Meanwhile, the hearing deteriorated into a partisan shouting match after Huerta charged that Deputy Agriculture Secretary John R. Norton III, who had testified earlier on the administration proposal, kept workers in inhumane living conditions and had been found in violation of California's Agricultural Labor Relations Law.

"Knowing that I would be testifying today, Mr. Norton's employes asked that I tell the committee that in the Salinas lettuce labor camp they live in, they are not given mattresses or bedding, the toilets are filthy and stopped up, the showers are broken and the camp has been condemned. Petitions to the manager have had no results. But each worker pays $60 per week for his board at the camp," Huerta said.

Norton, who still has large fruit- and vegetable-growing operations in Arizona and California, had left the room by the time Huerta began her testimony. He was unavailable for comment later in the day. Earlier he said he has not participated in day-to-day management decisions in his farming operations since he joined Agriculture last May.

A spokesman for Norton said that housing and food for the workers at the Salinas lettuce operation are provided by a contractor, not by his company. He said that rent is not charged and that meals cost about $8 per day.

Huerta also brought up violations by Norton's company of California agricultural labor laws, mostly dealing with reprisals against workers involved in union activities. The same issue came up in his nomination hearing and was not considered important enough to threaten his confirmation.

STUDENTS HELPING STUDENTS: A UNITED STATES-LIBERIAN CONNECTION

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. FRANK. Mr. Speaker, we spend a lot of time in this body debating the U.S. foreign assistance program in terms of overall funding levels for each country and program and in the process we often lose sight of the important role played by the many devoted individuals who have given their time and energy to aid the developing nations of the Third World. The Peace Corps is a model of this volunteer spirit, and thousands of people have given years of their lives to this effort. Michael Quinn, a constituent of mine who is serving as a Peace Corps volunteer in Liberia, is coordinating a school construction project which is being partly financed by donations from American high school students. I want to commend Mr. Quinn and the students of Coon Rapids High School for their good work. I ask that a Peace Corps press release discussing this project in greater detail be reprinted here.

WASHINGTON—Students at a Minnesota high school have shown their concern for the well being of their fellow students in a rural community in Liberia, Africa, by raising some of the funds necessary to build a new school there.

The members of the #1 Key Club of Coon Rapids High School, at the suggestion of advisor Lewis Peterson, will donate $500 towards construction of a local elementary school for the rural community of Yila Camp in Liberia. The assistance will be coordinated by the Peace Corps Partnership Program, through Volunteer Michael Quinn of Westport Point, Mass.

Quinn made the request after finding that the village in which he was serving was six miles from the nearest elementary school. "This distance makes it difficult to commute," Quinn observed, "especially in the rainy season, which runs from May to October. The other concern is walking on the path in the dark can be dangerous with the high number of poisonous snakes."

As with all Peace Corps Partnership Program undertakings, the Yila Camp project will utilize as many local resources as possible, renovating with community labor several abandoned buildings as a basis for the new school. Funds donated by the Coon Rapids club will be used for the purchase of zinc roofing, cement and other essential building materials.

Peace Corps Director Loret Miller Ruppe notes that "$500 is about the total yearly income of one Liberian, and will therefore be quite significant."

The Liberians will provide their Minnesota sponsors with periodic updates on the progress of their school and information about day to day life with their community, thereby maintaining the cross-cultural sharing which is one of the goals of the Peace Corps.

In the last 20 years, the Peace Corps Partnership Program has helped the American private sector provide more than $3 million for 2,000 self-help projects in 90 developing nations around the globe. Individuals, school groups, corporations and foundations may make tax deductible contributions. For further information on becoming a partner, write: Peace Corps Partnership Program, 806 Connecticut Ave., N.W., Washington, D.C. 20526. Or call, toll-free: (800) 424-8580, ext. 227.

INTRODUCTION OF THE STRATEGIC CAPITAL RESERVE ACT OF 1985

HON. STAN LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. LUNDINE. Mr. Speaker, last week, for the first time in 5 years, the Reagan administration acknowledged that the value of the U.S. dollar on international currency markets is excessively high and a threat to U.S. economic prosperity. The dramatic meeting and dollar communique issued by the leading five industrialized nations of the world is a major breakthrough in the struggle to moderate and stabilize the value of the dollar on international currency markets. But that communique is only one of the important steps in what must be protracted process to achieve the goal of a lower, fairer, and more stable value for the U.S. dollar. This is clear when we observe that after daily gyrations, the value of the dollar today remains at about the level when the communique action was taken.

Today, I am introducing the first of two bills to provide a sustained short- and long-term program to lower and stabilize at a more competitive rate the value of the dollar on foreign exchange markets. The proposal I am introducing today, the Strategic Capital Reserve Act of 1985, has been introduced in the Senate by BILL BRADLEY. The purpose of this bill is to provide some powerful tools to help achieve short-term progress toward dollar moderation. The purpose of a second bill I will introduce

next week will be to achieve fundamental long-term structural reform of the international monetary system.

The U.S. dollar remains 30 to 40 percent inflated in terms of the underlying competitive position of the United States. This means that U.S. exporters carry a 30- to 40-percent tax when they try to sell their goods abroad, while foreign firms enjoy what amounts to a 30- to 40-percent subsidy on their exports to the United States. Economists estimate that over 50 percent of the $150 billion U.S. trade deficit is owing to the misalignment of the dollar against other major international currencies.

The longer the dollar hovers at such extraordinarily high levels, the more irreparable the damage done to our domestic economy. Because it is cheaper to produce abroad with a dollar valued as it is today, U.S. firms are making irreversible decisions to move production offshore. The movement of U.S. production abroad, the inability of U.S. firms to export, and the handicapping of U.S. firms competing against foreign imports is threatening to deindustrialize our economy.

I am convinced that we need both a short-term and long-term program to lower and stabilize the value of the dollar at an acceptable level. The Strategic Capital Reserve Act, which I am introducing today, would provide important immediate tools to help establish a sustained program to drive down the value of the dollar and stabilize it at an acceptable level.

The bill requires the Federal Reserve to purchase at least $3 billion in foreign exchange during each quarter when the current account deficit has been greater than 1.5 percent of gross national product for at least 1 year and the dollar is 15 percent above the level needed for a balanced current account. This action would be taken in coordination with the central banks of Germany, Japan, the United Kingdom, and France. Under the provisions of this bill, the purchase of these foreign currencies would not be offset domestically through the sale of Government securities. Because this type of currency purchase will increase the availability of dollars in the overall monetary system, it will help drive down the value of the dollar or moderate its rise.

Under the provisions of this bill, the foreign exchange which is purchased by the Federal Reserve would be placed in a strategic capital reserve in the U.S. Treasury. These reserves then would be available to help counteract precipitous falls in the value of the dollar which could prove as destabilizing to our domestic economy as the rises we have experienced since 1980. The strategic capital reserve would thus become an important tool for stabilizing the dollar at an appropriate level over time.

In the final analysis, however, intervention in the international currency markets can only play a very limited role in bringing down the value of the dollar for any protracted period of time. More fundamental adjustments in the economies of the major industrialized countries are necessary to achieve a lasting decline in the value of the dollar at a more acceptable level. Clearly, for example, the U.S. Federal budget deficit remains a major impediment to bringing down interest rates and the value of the dollar. Likewise, the sluggish growth present in the economies of many of our industrialized trading partners is also a major impediment.

Multilateral coordination is going to be necessary to achieve the kind of macroeconomic policy adjustments both here and abroad needed to reassert stability in the international monetary system. The bill I am introducing today makes an important first step in this process. It requires the President to establish a 1-year international commission involving the major industrialized countries to develop a strategy for achieving macroeconomic adjustments in their respective economies. Such a commission could keep the important start which began just 1 week ago moving forward toward productive cooperation between major industrialized countries.

I urge you to join with me to make clear the U.S. intention to act to lower the value of the dollar. The provisions of the Strategic Capital Reserve Act will help sustain a workable short-term program to bring the dollar in line. Legislation I will introduce next week will establish the framework for a longer-term program for reforming the international monetary system which I believe is also necessary to prevent a reoccurrence of the present difficulties with the dollar in future years.

ENTERPRISE ZONES PROVING TO BE SUCCESSFUL

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. KEMP. Mr. Speaker, year after year state and locally sponsored enterprise zones are proving to be a substantial, positive step toward relieving the unemployment and economic stagnation of inner cities and other depressed areas across the country. By encouraging investment and providing jobs for underprivileged zone residents, these programs have begun to rebuild depressed communities and raise the standards of living of their inhabitants.

I would like to share with my colleagues this informative article from the September 23, 1985 edition of Barron's concerning the success of State sponsored enterprise zone programs. As the article points out, the results of these programs provide Congress with a unique opportunity to study the impacts of such programs prior to initiating one at the Federal level. Based upon their widespread success, I urge my colleagues to pass enterprise zone legislation at the Federal level this year.

The article follows:

NOT CRYING UNCLE—STATES ARE TAKING THE INITIATIVE ON ENTERPRISE ZONES

(By Dick Cowden)

Enterprise zones are one of President Reagan's favorite causes. They characterize his approach to the economy, to federal interaction with the states and to tax policy. The familiar Reagan themes of reliance on local initiatives, private-sector solutions to social problems and encouragement from federal tax incentives are as much trademarks of this President as his jellybeans.

Yet enterprise zones have never become federal law. Compared with many of the compromises the Administration has struck with Congress—MX missiles, budget cuts, Contra aid—a zone bill should have been easy. The original congressional sponsors, Republican Rep. Jack Kemp and Democratic Rep. Robert Garcia, both of New York, are still chagrined that their bipartisan intentions became mired in controversy.

"We expected in the beginning that more Democrats like myself who don't buy the whole Reagan agenda would recognize zones as a unique chance for accommodation with Republicans and the White House," says Garcia.

Zones as shibboleth of Reaganism bother some Democrats much more than zones as urban policy. The federal proposal's close association with Kemp also has hampered the bill's progress in the House. It has passed the Senate twice.

To many, the proposal is a symbol of conservatives' determination to cut urban spending. Over the past five years, zones have faced sometimes stiff opposition from representatives of the very districts that would receive federal designations. Rep. Charles Rangel, a Harlem Democrat, has likened the Administration's proposal to giving aspirin to a cancer patient. Yet even he has worked behind the scenes to formulate a compromise bill.

Rangel, along with those who are more critical, object to the leading proposal's emphasis on tax relief to attract business to the inner cities. (The Administration-backed bill would eliminate all capital-gains taxes for businesses in a zone, increase the investment tax credit for them, and offer employers 10% tax credits for all new hires—50% credits for disadvantaged workers. Critics contend that zones wouldn't provide other, more crucial requirements for new business activity such as job training, access to seed capital and technical assistance to fledgling entrepreneurs.

Slightly more charitable critics, such as House Budget Chairman William Gray of Pennsylvania, concede that at least zones would provide "another arrow in the quiver." During the 1984 Presidential campaign debates, even Walter Mondale seemed to be sending a signal to his fellow Democrats when he said, "I don't mind those enterprise zones—let's try them."

Proponents admit that the enterprise-zone approach is a fundamental departure from direct programmatic assistance to business. But they defend the federal incentives as potentially powerful calling cards for companies to locate in older and riskier neighborhoods.

Increasingly, they point to the 19 states that have established zones in more than 450 communities as indicators of results that could be expected from a federal policy. Says Lee Verstandig, Undersecretary of Housing and Urban Development: "While Congress has dragged its feet, the states have continued to move forward with the concept. The states have demonstrated the incentives and the scoreboard reflects new jobs and opportunities. But the question still remains how much more successful and effective could it be with enactment of federal legislation.

HUD lists 26 states as having some form of zone policy (seven have yet to implement the program); at least one state has enacted a zone bill during each year since 1982. At least eight states have worked on new zone legislation this year, and others are holding interim hearings in preparation for action in 1986. New zones are being established virtually every month. Long-run prospects for some level of federal participation may be improving simply because of the growing number of congressmen with zones in their districts.

The way enterprise zones have come into being—first as a federal proposal, then as state initiatives unaided by Washington—has offered Congress a rare opportunity to evaluate a policy before supporting it. Federal housing officials acknowledge that the states have already provided most of the necessary field testing. HUD now has a good idea of how zones with federal incentives would perform and has considered alternatives to its three-year old plan to designate 75 experimental zones.

Rather than waiting for House Ways and Means Chairman Dan Rostenkowski to change his mind and schedule a mark-up for the bill, some proponents in Congress and the Administration are seeking to quietly build upon the states' zones. In June Republican Rep. Steve Bartlett of Texas offered an amendment to the housing appropriations bill that would have directed the HUD and the Farmers Home Administration to give priority to applications for projects in existing zones. The measure failed 20-18, with all but four of 23 Democrats on the Banking Committee's housing panel voting no.

In another recent development, the Banking Committee in July reported out that portion of the enterprise zone bill over which it has jurisdiction. If that proposal wins a floor vote, the Secretary of HUD might actually have the power to begin designating zones, though without federal tax incentives. The move could open the door to adding incentives.

Another approach is a House bill from Democrat William Coyne of Pennsylvania to create 5% set-asides in existing programs such as community-development block grants and urban-development action grants as "carrots" for local efforts to upgrade zone infrastructure and services. Since such provisions wouldn't involve tax incentives, they could win approval without the blessings of Ways and Means.

Even the tax-reform measure now being marked up in the Ways and Means Committee is being studied as a vehicle for federal incentives. Committee members are looking at formulas to protect poor areas from the tax bill's assaults on industrial development bonds, targeted job tax credits and, possibly, investment tax credits. The advantage of this strategy: It would require no new tax incentives, but would still give depressed neighborhoods an edge in attracting business.

Most of the headlines on enterprise zones have been made locally rather than in the national media. But city by city, zones have become a big story, with their very designation often sparking interest and debate. By now most cities and states with zones have evaluated their performance, and so far the news has been good.

A few zones have been so impressively successful, even detractors acknowledge the results but point to other programs contributing to the process. The quickly reviving Washington Street area in Norwalk, Conn., for example, has been the benificiary of federal redevelopment assistance since the late 'Seventies, long before its 1982 zone designation. Local redevelopment officials diplomatically explain that they see no conflict in targeting such funds in ways that complement the zones' tax incentives.

Despite claims that zones wouldn't "work," most zones can at least be said to have helped. HUD's latest estimate identifies about 50,000 jobs created and $2 billion invested in state-designated zones since 1982.

A small minority of zones have recorded little or no improvement, but even failures aren't costly to sponsoring governments because tax abatements apply only if companies invest in new or expanding operations. The states and cities indicate that revenues they forgo to attract businesses aren't missed because they often generate jobs for people drawing on state relief programs. States that have completed cost-benefit studies of the zones report positive ratios of new payroll taxes to uncollected revenues. The reality of the state-designated zones has been that they provide gradual but real improvement in the business climate of inner-city area—not grand transformations, but not boondoggles either.

None of the early dire predictions about the policy have come true in the state zones. For example, critics have warned that deregulation provisions would lead to substandard buildings and food poisonings in uninspected restaurants. In practice, states have specifically avoided tampering with safety standards, while making useful changes in obsolete zoning rules and "fast tracking" permit applications.

Organized labor's charges that zones are an anti-union idea have proven unfounded. A number of local governments have involved unions in monitoring of the program, and in Louisville, City Hall has actually signed a zone-specific, no-strike agreement with the local building-trades council.

As public awareness of the zones improves, proponents are becoming more confident that they're winning the war for a federal policy. Both Kemp and Garcia credit the state's activity with sustaining momentum for the congressional initiative.

"The states are clearly light years ahead of the federal government in making the concept of enterprise zones a reality," says Kemp, "and their successes are reinforcing our case for the enactment of federal legislation."

Referring to a new version of the bill, which he and Kemp introduced at the beginning of September, Garcia states: "We have drafted a new enterprise-zone bill that we hope reflects the realities of other developments in tax and budget policy. We will again appeal to our colleagues to set aside partisan differences for the greater good of helping distressed neighborhoods."

Although Washington still regards enteprise zones as an untried concept, at the local level they are real indeed, and are having an impact on companies' site selections. Following are a few examples of zone initiatives that have clearly influenced companies to locate in areas where disinvestment and loss of jobs had been the pattern.

In Louisville, the Lanham Lumber Co. was the first new business to apply for and receive certification under the city's enterprise-zone policy. Shortly after the zone's designation in 1983, Lanham was looking for a production site. One prospect was outside the area and another was in the Louisville suburbs, but Lanham chose to acquire and rehabilitate a 28-acre abandoned barrel-making facility in the Louisville enterprise zone.

Ron Lewis, the firm's executive vice president, says there's no doubt that the enterprise-zone program tipped the decision in favor of the inner-city property. The company, which has invested about $3 million in the site, saved 5% on its leases and equipment purchases through the zone's sales-tax abatement. Police and fire agencies consulted with the company on increasing security and fire protection.

The state manpower-services office interviewed the hundreds of applicants who applied for Lanham's 40 new jobs. Not only did this screening satisfy the Kentucky law's requirement that at least 25% of the new employees live in the zone or qualify as disadvantaged, it got the lumber company the best workers in the area.

In March Lanham leased part of its site to another woodworking business. The combined payroll of the two firms is about $1.5 million yearly, which Lewis proudly notes has had a tangible effect on the neighborhood. "We see people painting and improving their houses around here. We see people wearing newer clothes. We see new cars in our parking lot. When we started up, there were only two cars parked here. Now about half of our employees drive to work."

Since New Jersey began designating zones late in 1984, companies have made commitments to create more than 6,800 jobs. Each of the first two zones, in Camden and Newark, has received pledges for about 2,500 new jobs. One of the more notable new investments is Krementz & Co., a jewelry manufacturer that had been in Newark since the 1870s. Krementz decided to commit $6 million-$7 million to consolidate and expand its operations on a four-acre site in Newark's zone.

Says Robert S. Jones, Krementz's vice president and general counsel: "the incentives were very definitely a factor in our decision. The exemption from sales taxes for building materials and new equipment had an impact on our construction costs." In addition to this "one shot" incentive are tax abatements on retail sales, which Jones sees as providing continuing relief.

The state also offers a $500 tax credit to a company hiring anyone who lives in the municipality sponsoring the zone and a $1,500 credit if the new employee had been out of work for at least 90 days or was receiving public assistance. Jones says this would affect the company's plans to increase the workforce by 65-100 people.

Evansville, Ind., knew it was in trouble when a major appliance manufacturer decided two years ago to end operations there. Its impending loss figured into the city's successful application to the state for enterprise-zone status.

This winter the zone paid off with an announcement by the Zayre Corp.'s discount-clothing division that it would locate its new regional distributorship in Evansville. The $55 million T.J. Maxx facility will occupy a million square feet on 120 acres in the zone and will employ more than 1,200 workers, with zone residents getting preference in hiring.

Diane Lupke, the Indiana Commerce Department's enterprise-zone director, says that T.J. Maxx will receive credits based on its inventory tax liability and special employee training services over and above those normally available in Indiana. "The enterprise zone was critical in Zayre's selec-

tion of this site for its distribution facility," she states.

MONSIGNOR JOSEPH A. MADDEN TO BE HONORED

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. KANJORSKI. Mr. Speaker, it is my pleasure to bring to your attention and the attention of my colleagues here in the House of Representatives the accomplishments of a great man from Pennsylvania's Wyoming Valley. The Reverend Monsignor Joseph A. Madden, PA., VF. will be honored on October 6 at a special dinner commemorating his enormous contributions to the spiritual and moral guidance of the people of this area.

Monsignor Madden was born in Mahanoy City, PA, the son of John and Rose McGonigle Madden. He was educated in the schools of Hanover Township, attended Saint Thomas College in Scranton—now the University of Scranton—and Saint Bernard's Seminary in Rochester NY. Soon thereafter, he enrolled in the Collegio Brignole, Sale Negroni, Genoa, Italy.

At the completion of his theological studies he was ordained to the priesthood on June 11, 1938 in Genoa, Italy by His Eminence Cardinal Boetto, S.J.

Upon his return to the United States, Monsignor Madden was appointed assistant pastor at Saint Joseph's Parish, Matamoras. Following that appointment, he served as assistant pastor at Saint Rocco's Parish in Dunmore, PA; Saint Lucy's in Scranton; Saint Francis in Nanticoke; and Saint Peter's Cathedral in Scranton. He left Saint Peter's on June 4, 1947 to assume his duties as vice chancellor of the Diocese of Scranton.

In addition to serving as vice chancellor, the Monsignor Madden has served as an instructor at the University of Scranton and has been chaplain to both the Senior Catholic Daughters in Nanticoke, and the Knights of Columbus in Scranton. He was also master of ceremonies to several bishops.

By virtue of his outstanding contribution to the diocese, Monsignor Madden was named chaplain to His Holiness, Pope Pious XII, with the title of reverend monsignor on May 25, 1948. On October 22, 1956, the monsignor was appointed chancellor of the Diocese of Scranton, and in June of 1957 he was named a prelate of honor.

Monsignor Madden is chairman of the building commission and a member of the board of consultors. He was named prothonotary apostolic upon the recommendation of His Excellency the Most Reverend J. Carroll McCormick in May, 1968.

The monsignor was appointed pastor of Saint Mary's of the Immaculate Conception Parish in Wilkes-Barre on December 15, 1971 by Bishop McCormick. And, on October 22, 1973 he was appointed vicar general of the Diocese of Scranton.

Mr. Speaker, it should be clear to anyone who learns of Monsignor Madden's long history of service that he is a man who has devoted not just his life, but his full spirit to the guidance and support of his church and its members. His accomplishments give irrefutable testimony to his dedication to God and community. It is my great pleasure to commend the Reverend Monsignor Joseph A. Madden to you and my colleagues at this time.

RESOLUTION BY THE CITY COUNCIL OF SANTA CLARA, CA

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. MINETA. Mr. Speaker, the city of Santa Clara, CA, lies within the 13th Congressional District, which I represent. The city council of that city has unanimously adopted a resolution, which at the council's request I am inserting into the RECORD for my colleagues' information.

This resolution addresses the important issue of relicensing hydroelectric projects, and I urge my colleagues to consider the city of Santa Clara's views carefully.

The resolution follows:

RESOLUTION NO. 4997—A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF SANTA CLARA

Whereas in the 1970's the existing Mokelumne hydroelectric facility license held by the Pacific Gas and Electric Company (PG&E) was then expiring and the federal government publicly advertised the opportunity to obtain a new 50 year license to the facility; and

Whereas Santa Clara responded with interest to the federal invitation for competitive applications with opportunity to improve upon the public resource; and

Whereas Santa Clara, mindful of costs and its duty of avoiding waste of taxpayer's funds, and only after encouragement from the Federal Energy Regulatory Commission (FERC) staff that a tie breaking public preference applied to Santa Clara in relicensing of existing hydroelectric facilities did Santa Clara file its competitive application; and

Whereas after receiving a confirmation of the preference from the FERC itself Santa Clara subsequently joined in support of that opinion with the FERC in expensive and prolonged litigation with private investor owned utilities so as to ultimately receive further confirmation from the United States Court of Appeals for the Eleventh Circuit in the City of Bountiful case and from the United States Supreme Court; and

Whereas, in reliance thereon, Santa Clara has already spent more than $1.5 million in engineering fees, environmental studies, legal fees and other costs associated with filing its application, has changed its generation planning losing other opportunities because of its serious commitments to its Mokelumne application, and has endured the animosity, hatred and suspicion of many PG&E's customers and others resulting from PG&E's all out no holds attack upon Santa Clara's motives and application in which attack PG&E engendered fears through exaggerations, misrepresentations and threats conducive to such sentiment all in its efforts to frustrate the law and to retain the Mokelumne public resource and similar hydroelectric resources hostage of PG&E forever; and

Whereas, the private investor owned utilities now seek to change the federal law to their favor; and

Whereas, although FERC promised both Santa Clara and the Federal District Court that it would hold hearings required by federal law on Santa Clara's application, the new FERC has repeatedly delayed the hearing process in an obvious attempt to prevent Santa Clara from obtaining the benefits of its application to which it is entitled and has sided with the investor owned utilities in seeking to change the basic federal law; and

Whereas, while the new FERC stays Santa Clara's application the Senate Energy and Natural Resource Committee with FERC encouragement is currently marking up legislation which would not only eliminate the public preference in relicensing but also drastically alter the procedures and criteria which would virtually eliminate competitive applications in relicensing proceedings; and

Whereas, the federal changes in the proposed legislation would virtually guarantee PG&E a new license for the Mokelumne project and a complete loss to Santa Clara of its efforts and expenditures made and opportunities forgone all in reliance on the federal law and federal encouragement to take action in accordance with it, let alone the loss of its entitlement to the project under existing law; and

Whereas, the proposed legislation as presently formulated would allow existing law to govern only one of the pending public/private competitive relicensing proceedings, the *Merwin* case which was a latter application than Santa Clara's but was given a preferential hearing date over Santa Clara by FERC, and would retroactively apply the new standards to all other pending proceedings, depriving Santa Clara of all redress under the present law; and

Whereas, it would not only be unfair and prejudicial but a complete breach of faith and bad government at this late date to change the law retroactively to the public/private competitive proceedings called for by government which are pending at FERC: Now, Therefore, be it

Resolved: That the City of Santa Clara, California, strongly urges Senator Cranston and Senator Wilson and the California Members of the House of Representatives and other fair minded Senators and Congressmen to take the actions necessary to ensure that changes in the Federal Power Act relating to hydroelectric relicensing are not applied retroactively to *any* of the currently pending public/private competitive relicensing proceedings for which applications have been filed in accordance with existing law.

THE WAY WEST: GUAM

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. YOUNG of Alaska. Mr. Speaker, as the sole Representative in this Body from Alaska, which embraces the increasingly important Pacific Rim and as the ranking

Republican on the Interior and Insular Affairs Committee, with jurisdiction over the Pacific U.S. territories, I have long been interested in the strategic and geopolitical significance of one of our most important U.S. family members—Guam, U.S.A.

Guam is centrally located in the Pacific, and its citizens are committed to the shared goals of Americans. The awareness and the patriotism of the people of Guam, U.S.A., are represented by their delegate to the House of Representatives, the Honorable BEN BLAZ, with whom I have the pleasure to sit on the Interior and Insular Affairs Committee. General BLAZ served with distinction in the U.S. Marine Corps, as so many Guamanians have and continue to do so, and his knowledge of Pacific issues is equal only to his continuing interest in the future of the area and the people he represents.

General BLAZ recently coauthored with John C. Scharfen an article in Naval Proceedings magazine entitled "The Way West: Guam," which details the growing strategic significance of Guam to the United States in the face of ongoing developments in the Pacific. I wish to share our colleague BEN BLAZ'S analysis of Guam's unique position with the Members of the House, and request that it be entered into the RECORD in its entirety:

THE WAY WEST: GUAM

Forward deployment in 1985 is most meaningful in terms of the Indian and Pacific oceans. Although strategic priorities do change, these areas are likely to be a principal concern to the United States for an extended period.

The Indian Ocean area is a natural arena for the operation of naval forces. The ocean is a vast complex of tanker routes with critical choke points through the Maldive-Indian Ocean passage, the Mozambique Channel, and the straits of Hormuz, Bab al Mandeb, Malacca, Sunda, and Lombok. More than 90% of Japan's oil is carried over these routes. About 70% of Western Europe's and more than 40% of U.S. imported oil comes from the Persian Gulf. Every day, about 19 million barrels of oil transit the Gulf. Should these sea lines of communication be closed to the United States and its allies, the consequences would be serious.

The Pacific is not only strategically important in its own right, but it is also the most direct approach from the center of U.S. continental power to the Indian Ocean. The projection of U.S. power into this area requires facilities in the Indian Ocean to base land and naval aircraft and for the repair, refueling, and in-port relief for ships of deployed carrier battle groups, Marine amphibious units, the Maritime Pre-positioning Force, and the small Middle East Force. Currently, the prospective bases for ports of call in the Indian Ocean include Manama, Bahrain, the Persian Gulf, three ports in Oman, the Kenyan port of Mombasa, Berbera and Mogadishu in Somalia, Colombo in Sri Lanka, and the British-owned Diego Garcia. There may also be opportunities for the use of facilities at Simonstown, South Africa, and Karachi, Pakistan. Plans have been made to extend existing Indian Ocean facilities and acquire additional ones as political and economic considerations permit.

But no matter how successful the United States is in acquiring access to Indian Ocean facilities, it seems inevitable that the major supporting structure for Indian Ocean naval forces will be in the Pacific.

The Malacca Straits are the front gate to the Indian Ocean. The Pacific is the highway from the heart of our main support base, the continental United States, to that gate. As the number of active ships in the U.S. fleet grows to 600 and as the tempo of operations in the Indian Ocean increases, the burden on the Pacific bases will most likely increase as well. What is required of either a new or expanded naval base is a good, deep water harbor, a modern ship repair facility, a medical facility, a supply complex, ordnance and fuel storage facilities, a hospital, good communication and personnel support facilities, and a naval air station. Historically, the United States has centered its Pacific supporting structure on three indispensable anchors: Hawaii, Guam, and the Philippines. More recently, Japan has figured prominently in the support of Seventh Fleet operations. Each of these Pacific support complexes has advantages and disadvantages.

Of all the areas available for expansion or construction of U.S. naval bases, Guam is the best prepared and has the greatest elasticity to accommodate an increase in the tempo and volume of Pacific operations.

Guam has the best harbor in the Pacific between Manila Bay and Pearl Harbor. It has 80% of the capacity of Pearl Harbor. It is within four days' transit time to Japan, the Philippines, northern Australia, and the Malacca Straits. Units based on the West Coast of the United States are 19 days' steaming time from the same critical areas.

During World War II, Guam's deep waters in Apra Harbor carried more tonnage than any other harbor except Antwerp in Belgium. During the Vietnam War, the naval ship repair facility in Apra Harbor employed 2,500 shipyard workers. Today, it is operating at less than half that capacity. The facility has the necessary equipment to expand rapidly to full capacity. Machinery and facilities are rotated or routinely exercised and are in excellent condition. The core of the experienced work force has been retained. Local officials estimate that there is a readily available work force of about 1,000 men to bring the ship repair facilities up to higher tempos. In a few years, the total work force could be brought to 2,000 workers.

The requirements for a supply complex to support additional home-porting may be met by the Guam naval supply depot, which currently services both the surface and subsurface elements of the fleet and the air components at the naval air station. The depot facilities were originally designed to serve much larger fleet units than they currently support. These facilities provide a good base for rapid, relatively inexpensive expansion. There is a cadre of well-trained, experienced personnel in the depot that could be easily increased from the local manpower base.

The naval magazine on Guam is currently operating under capacity and can provide the additional ordnance storage and handling burden that would be required of a home-ported force up to a carrier battle group.

A new naval ammunition pier in Apra Harbor, which will further enhance Guam's capabilities, is under construction. There are large fuel storage facilities on Guam that, if current plans are observed, will be increased at least five times current capacities. Existing commercial storage and the Air Force system provide a backup to the naval fuel storage reservoir.

There are four U.S. naval communications area master stations in the world, one of which is located on Guam. This station provides complete coverage of the Western Pacific and Indian Ocean areas. The station, with about 1,400 personnel currently assigned, has adequate capacity to handle any increased activity that may be generated from expanded naval force levels.

Agana Naval Air Station has the capacity to host a complete carrier air group while in port. It is the home base for two (plus) Navy patrol squadrons, and it is also used by commercial airlines. Andersen, the largest U.S. Air Force base in the world, lies north of Agana, and the two air facilities are mutually supporting.

Three of the four Pacific Fleet combat stores ships have been recently home-ported in Guam. Maritime Prepositioning Ship Squadron 3, available for deployment in September 1986, will likely be based in Guam.

There is sufficient naval housing on Guam to accommodate the crews of an additional four to five large ships that could be home-ported on the island. There is not, however, sufficient space to house the personnel influx that would be represented by a carrier battle group; this would require about 2,000 new family housing units. The commissary and exchange facilities on Guam are excellent. The exchange is the Navy's fifth largest, while the commissary is the largest outside the continental United States. The school system is properly accredited with a student population of 27,000. The 425-bed naval hospital of the Navy Regional Medical Center is currently operating well under its rated capacity. Recreation facilities are superb with new, modern gymnasiums and other sporting areas ashore augmenting the extraordinary water sports of the Pacific. The same attractions that make Guam a mecca for tourists are available to the Navy residents.

Home-porting additional ships on Guam or merely increasing the tempo of port calls of major units of the Seventh Fleet have both advantages and disadvantages that are based on sound political, economic, and military rationale. The more significant advantages that accrue to an increased use of Guamanian facilities (to include home-porting) include Guam's strategic location and the fact that it is the most Western extension of the United States. One cannot get any closer to the gate of the Indian Ocean and still be on U.S. soil. Expansion of facilities or an increase in personnel and ships' use of existing facilities would not require negotiations with another country. As a U.S. territory, Guam offers political stability and the advantage of operating under U.S. law. (As a number of unfortunate and sensitive incidents in the Philippines and Japan will attest, operating under the laws of another jurisdiction can sometimes be traumatic to base commanders and their subordinates, who are not always guaranteed the same rights they enjoy under U.S. law when operating under status of forces agreements.)

Disadvantages to an increase in the Navy presence on Guam do exist, however. Experience indicates that there are both tolerable and dangerous military-civilian ratios in Navy communities. In situations where towns and cities are clearly Navy-dominated, where a great share of the population depends upon or indirectly relies on the Navy for its economic well-being, there ap-

pears to be a good relationship between military-civilian communities most of the time. Norfolk, Virginia, and Jacksonville, Florida, are examples of this extreme. At the other end of the spectrum is the situation where the naval facilities represent but a small part of the economic and social fabric of the community. The Alameda Naval Air Station in the vast San Francisco Bay area of California is such an example.

In the former, Navy-dominated case, the economic interdependence of the civil-military community is manifest and promotes cooperation. In the latter, civil-dominated case, whatever problems the military contingent may represent, they are relatively small and easily absorbed by the community.

Military-civil community problems arise when there is an ambivalence about the merit contributions the Navy can make relative to other industry. The consequences of the mix in any rapid buildup on Guam must be considered. Since Guam has historically embraced a Navy-supported economy, there should be few problems of recognizing civil-military relations, but they cannot be ignored. A buildup, poorly coordinated with the civil leaders, could pose significant problems and could be seen as a threat to the Guamanian tourist industry.

In the near-term, then, Guam can easly reactivate and expand facilities and recruit work forces to home-port four to five logistic or amphibious ships with a total crew complement of about 2,000 men. No major military construction would be required.

There are other possibilities of ports and bases to support U.S. naval forward deployments in the Indian Ocean. These include those in Japan, the Philippines, and Australia.

The Japanese facilities are indispenable for Northwest Pacific operations. Japan's strategic location dominating the Soviet Pacific Fleet base of Vladivostok and the egress routes from the Sea of Japan is an effective counter to the Soviet Union's freedom of access to the Pacific. In recognition of the significance of Japan's position, there is increased interested in rebuilding the Japanese fleet to provide for control of the Korean Strait to the south and Soya Strait in the north, as well as providing for local air defense.

Expansion of Japanese facilities to accommodate the increased naval activity in the Pacific is a possibility. Yokosuka is a good harbor with excellent repair facilities. It has a competent, large naval supply depot and good deep waterfront accommodations. The naval air facility at Atsugi, used jointly by the United States with Japan, is a plus. In a negative sense, Yokosuka is a busy, crowded port that has little elasticity for expansion.

Sasebo, in the south, is also an excellent port that served the U.S. Navy well in the Korean War. There are no hospital facilities at Sasebo, and no naval air facility is in the vicinity. Expanding Sasebo could be an expensive proposition for the United States, Japan, or both. One of the biggest disadvantages to the expansion of facilities on Japanese soil is that they are not American.

Subic Bay in the Philippines is one of the best naval complexes in the world. Wharfage, ship repair, supply, naval air, and on-base recreation facilities are excellent. Subic Bay is the closest currently operational U.S. base to the gateway to the Indian Ocean. One drawback to the expansion of facilities to accommodate the expected surge of activity in this part of the Pacific is the lack of adequate Navy housing. Another is that one must assume that the Filipinos, having been very hard bargainers, in exacting payments for the use of our military bases in the past, would continue to do so. Although it is not our purpose to speculate on the political stability of the Philippines in these pages, it must be a minus in consideration of long-term commitments to U.S. base expansion.

Australia's West Coast, in the region of Fremantle (Perth), is enticing for its access to the Indian Ocean. There is a small Australian naval base on Garden Island about 30 miles from Perth. The advantage to Fremantle is that ships which sortie from the area are not required to pass through the Malacca Strait choke point. Constructing facilities to accommodate elements of the Seventh Fleet could be expensive, however, for little currently exists to serve as a basic infrastructure for the support of fleet units. Notwithstanding the fact that Perth looks out over the Indian Ocean, it is a long view indeed to that portion of the ocean that is strategically important to the United States. Perth is really as far distant from the Arabian Sea as is Subic and is incapable of supporting Western Pacific operations. Significantly, the logistic lines back to the continental United States into the Arabian Sea via Perth are 2,000 nautical miles longer than from the continental United States through Guam, through the Malacca Straits.

Secretary of the Navy John Lehman has laid the groundwork for a 600-ship navy. The programs he has initiated will have a lasting effect on the maritime strategy of the United States. His concepts are anchored on an increased number of ships committed to operations far forward from the United States. The concepts translate to a greater requirement for advance naval bases for home-porting, resupply, repair, and relief of naval forces. All available bases in the area will undoubtedly require increased readiness to accept larger numbers of ships and increased tempos of activity. Of all the possible bases, however, Guam is particularly suited to serve the new naval strategy.

IN HONOR OF STANLEY KUNITZ

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. CONTE. Mr. Speaker, I rise today to pay tribute to one of America's great poets, Stanley Jasspon Kunitz. On October 13 through 17, the Worcester County Poetry Association will honor this gifted man by holding the Stanley Kunitz Poetry Festival. Many of Mr. Kunitz' friends and colleagues will join him in Worcester to celebrate this very special occasion.

Stanley Kunitz was born on July 29, 1905, in Worcester, MA, and his poetry has been published for 57 of this 80 years. His poetry has covered a wide range of subjects, and is frequently full of intriguing and inspiring observations. Stanley Kunitz has been an active educator, an author of numerous books and from 1974 to 1976 he was the Library of Congress' consultant on poetry. He has received many awards throughout the years, and in 1959, his work received its due recognition when he received the Pulitzer Prize.

When a poet of Stanley Kunitz' talent creates so many valuable works, it is difficult to choose one that is worthy of special recognition. Nevertheless, I would like to read a poem which I feel is especially appropriate given the current season in our Nation's Capital:

END OF SUMMER

An agitation of the air,
A perturbation of the light
Admonished me the unloved year
Would turn on its hinge that night.

I stood in the disenchanted field
Amid the stubble and the stones,
Amazed, while a small worm lisped to me
The song of my marrow-bones.

Blue poured into summer blue,
A hawk broke from his cloudless tower,
The roof of the silo blazed, and I knew
That part of my life was over.

Already the iron door of the north
Clangs open: birds, leaves, snows
Order their populations forth,
And a cruel wind blows.

The Worcester area has a long and special tradition in poetry. It has been the birthplace as well as the home of many of America's great poets: Elizabeth Bishop, Charles Olson, Chris Gilbert, Mary Fell and of course, Stanley Kunitz. The Worcester County Poetry Association has over 500 members, and is now in its 15th year. It sponsors readings and guest lectures by both professional and amateur poets. It is largely through the work of the Worcester County Poetry Association that Worcester County's poetic tradition is fostered and maintained. So it is with great pleasure that today I pay tribute to Stanley Kunitz, the Worcester County Poetry Association and all of the professional and amateur poets of the Worcester area.

PURITAN CONGREGATIONAL CHURCH CELEBRATES CENTENNIAL

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. KANJORSKI. Mr. Speaker, it is once again my pleasure to bring to your attention, and the attention of my colleagues here in the House of Representatives, the 100th anniversary of another house of worship in Pennsylvania's Wyoming Valley. On October 13, the Puritan Congregational Church in Wilkes-Barre will celebrate its centennial.

The 11th Congressional District which I represent has a long tradition of religious observance and service to God. We are a diverse people, represented by the many different churches, temples, and synagogues which dot our countryside. But our common bond is a commitment and belief in the power and glory of a loving God.

The Puritan Congregational Church is a special part of that tradition. It was founded in 1885 by 64 members of the Welsh church. The members wanted to raise their children speaking English—rather than

their native Welsh—in their new home in America, so they decided to form a new church.

To celebrate the 100th anniverary of this founding, the church will hold a special communion service at 10 a.m. on October 13. This will be the fitting conclusion to a celebration that is to begin with an anniversary banquet on Friday, October 11. A time capsule will be filled and sealed at this time, to be opened in 99 years—in time for the church's 200th anniversary celebration.

Mr. Speaker, it is a great honor to call your attention to this milestone in the history of the Puritan Congregational Church. I am sure that you join me in wishing all those involved with this exciting event our sincerest and most heartfelt congratulations.

THE PLIGHT OF SALVADORAN REFUGEES

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. GARCIA. Mr. Speaker, the New York Times ran an op-ed piece today on the plight of Salvadoran refugees in this country. In that article, the author, Francisco Rivera, talks about the Moakley-DeConcini bill that would stop the deportation of Salvadorans until GAO can investigate the refugee's situation.

Mr. Rivera offers a strong argument in support of Moakley-DeConcini, and I ask that my colleague's carefully consider that argument.

REAGAN MISTREATS SALVADORAN REFUGEES

(By Francisco Rivera)

LOS ANGELES.—The Reagan Administration and Congress should stop the cruel treatment of Salvadoran refugees who have fled their strife-torn country only to be harassed, threatened, discriminated against and denied basic human rights when they seek asylum in the United States.

The Administration contends that Salvadoran refugees come to the United States only to seek better economic opportunities. It ignores the fact that Salvadorans are being forced to leave because of a civil war financed in large part by American military and economic aid to the Salvadoran Government. The Administration has said the refugees are welcome here, but statistics show that only about 3 percent of Salvadorans who apply are granted asylum—an abysmally low figure.

Congress should push ahead with bills proposed by Senator Dennis DeConcini, Democrat of Arizona, and Representative Joe Moakley, Democrat of Massachusetts, that would suspend deportation proceedings against Salvadorans until the General Accounting Office can investigate the conditions of the refugees. Although the bills are now before the judiciary committees in both chambers, they are unlikely to reach the floor of the House and Senate until next year.

As a refugee from El Salvador, I believe this is a crucial measure that deserves the urgent attention of the legislators. The proposed legislation would create an excellent opportunity to verify the terrible conditions in which we Salvadorans live in the countries where we are now refugees.

There are roughly half a million displaced persons living in El Salvador. Many others have fled to Mexico, where there are an estimated 100,000 Salvadoran refugees, and to the United States, where some 300,000 to 500,000 Salvadorans have sought refuge. Others have fled to Honduras and Guatemala.

Wherever we are, we suffer from discrimination, persecution, mistreatment at the hands of immigration officials and lack of education. Everywhere we live in subhuman conditions. With the exception of a few countries, we are denied the recognition as political refugees despite the granting of such status in 1980 by the United Nations.

The experience of living in the United States is often traumatic. We are pursued by immigration officials, detained for months in what are virtually concentration camps run by the Immigration and Naturalization Service, force to pay needlessly high bail, denied medical and other social services and reported to immigration officials when we seek help.

The conditions in which Salvadoran refugees are forced to live in the United States are abhorrent. Thousands of Salvadoran women work virtually as slaves. These women work long hours for subminimum wages simply to survive. At such low wages, Salvadorans can earn just enough money to pay the landlord and to buy our food. Usually we can not afford the luxury of getting sick. This is our terrifying plight.

Are we political refugees or, as the Administration asserts, economic refugees? The answer, I believe, lies in the number of deaths from El Salvador's civil war—they now surpass 55,000. It also lies in the level of military aid provided by the United States to enable the Salvadoran Government to maintain and control its so-called democracy. As long as the economic and military aid continues to flow, Salvadoran refugees will flee to the United States.

There is sufficient documentation of the horrors committed in El Salvador. Thousands of refugees who have applied for political asylum have provided detailed accounts of incarceration, torture, persecution and deaths of friends and relatives. It should be clear that the Government of El Salvador has created tremendous suffering for its people. It should not be the same in a country as great as the United States.

The Reagan Administration's actions toward El Salvador have only made conditions there worse. It would be a humane response to allow the Salvadorans who are forced to leave their homeland to be given political asylum. At least permit us to stay without fear of deportation until the General Accounting Office can verify that we are here for political and not economic reasons.

ALEXANDER NEPOTE—ARTIST EMERITUS OF SAN MATEO COUNTY, CA.

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. LANTOS. Mr. Speaker, the French Novelist Marcel Proust said:

Thanks to art, instead of seeing a single world (our own) we see before us as many worlds as there are original artists. . . . Only through art can we get outside of ourselves and know another's view of the universe.

On the San Francisco Peninsula, Mr. Speaker, we are fortunate indeed to have a highly talented, highly original artist who continues to lead us into other new and unique worlds through his art—Alexander Nepote.

For the past 40 years the bay area has been blessed with his artistic genius. He received his education at the California College of Arts and Crafts in Oakland, where he received his B.A. Ed. in 1939. Alex also studied at the University of California, Berkeley, and at the Mills College Graduate School in Oakland, where he received his M.A. in 1942. For the last 25 years, he has lived in Millbrae.

Alexander Nepote's professional career began when, at the age of 20, his works were accepted by the jury for display by the Oakland Museum of Art's Annual Watercolor Exhibition in 1934. Since that time his works have been seen throughout the United States and around the globe.

In addition to his own artistic achievements, Alex also sought to share his gift with others. He and I served together for many years on the faculty of San Francisco State University. While I concentrated on the mundane problems of international economics, he focused on the sublime world of art.

Mr. Speaker, I could list at great length Alex's accomplishments—exhibitions, collections, awards, and honors. The list is almost endless, and it provides only a monocromatic, one-dimensional record of an outstanding multifaceted and colorful career.

I do want to mention a few, however, which give some of the flavor of his outstanding record. A brief sampling of exhibitions in which his work has been seen includes the Third International at Sao Palo, Brazil; Expo 70 in Osaka, Japan; Art of the Pacific Basin in Aukland, New Zealand; Americans 1962 at the Richmond, VA, Museum of Art; and an exhibition of West Coast Watercolorists in London, England. His works are held in a number of public and private collections, including the Metropolitan Museum of Art in New York, and the Museums of Art of San Francisco, Oakland, and Denver.

In describing the philosophy of his work, Alexander said:

My reactions, which are embodied in my paintings, are the result of an intensive search: to see, as best I can, beyond the obvious to the hidden deeper realities. It is not my intention to describe a parcel of landscape which may interest me, but to suggest the inner spirit which is felt and experienced at a particular place.

Mr. Speaker, in recognition of his lifelong artistic achievements Alexander Nepote will receive the Congressional Artists Emeritus Award for the 11th Congressional District of California. It is an honor for me to make this award to a man who through the medium of art has helped us get outside of ourselves, helped us to see many worlds rather than just our own, and—most important—has helped us see

the hidden deeper realities of the world around us. His accomplishments are part of our national heritage. I am delighted to share them with my colleagues in the Congress and to make them a permanent part of our Nation's history by placing them in the CONGRESSIONAL RECORD.

AT THE VIETNAM MEMORIAL

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. BONIOR of Michigan. Mr. Speaker, Mr. William Pollard of Ann Arbor, MI, has brought to my attention a letter which appeared in the Washington Post on September 23, 1985.

The letter is a poignant synopsis of the emotion generated by the people who visit the Vietnam Veterans Memorial. Sybil Hinkle's letter captures the pain and sorrow which we as individuals and as a nation must endure as a result of the Vietnam war.

[From the Washington Post Weekly Edition, Sept. 23, 1985]

AT THE VIETNAM MEMORIAL

A recent special memory I have of Washington, for this westerner who rarely comes East, was the experience of the Vietnam Memorial. It is not the wall itself—a rather gray, unremarkable monument—one remembers. It is the activity surrounding this stark, bleak stone that lingers. It is with the hordes of living, those who come from all corners of the earth to state and mourn, to feel the name and presence of a loved one, to make a statement, to share an emotion—it is this unusual experience that does not go away long after standing in the presence of the wall itself.

The wall, in its somber simplicity, captures the essence of truth about war in general and Vietnam in particular. Like the war, it starts small, with a few names, seemingly confined and manageable. It grows with each step and becomes a looming structure with sea upon sea of names. One blends into another, and all are equal. There is nothing heroic or beautiful about this memorial. It is somber and sad.

And all the while the living who remember the dead pass by—some before you, some with you, many behind. We kneel and read a freshly left note: "My darling, she looks just like you." We stand and choke back tears as a gray-haired man whose eyes are moist fragilely touches a name. We plant our small American flag in the midst of the poem with the red, white and blue carnations a mother before us has left her son. These are the victims of war. It is an experience that does not go away.

SYBIL HINKLE,
Ukiah, CA.

MR. GORBACHEV: A MASTER PROPAGANDIST

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. BROOMFIELD. Mr. Speaker, the Soviet propaganda machine is off and running. After all of their efforts, however, I have one question: Who are they kidding?

Mr. Gorbachev recently appeared on French television. He used scare tactics on the French people. He also denied that there are human rights problems in the Soviet Union. In classical posturing on arms control, he warned the French about arms in space. If that happened, he cautioned, the arms race would go overboard. The Soviets are clearly trying to kill the SDI Program. Regarding the claim that the Soviet Union has political prisoners, Mr. Gorbachev said that the comment "calls to mind Goebbel's propaganda."

What did he say about Sakharov and Shcharansky? They had merely "fallen out with the Soviet form of government." He even claimed that Soviet Jews have more rights than they do in Western countries. He also said that all of the Jews who want to leave the Soviet Union are already gone.

Mr. Gorbachev, let's be honest and stop the public posturing. Let's be serious and get down to business in Geneva. Let's make private progress in putting an end to the arms race.

IN SUPPORT OF DEDUCTIBILITY OF STATE AND LOCAL TAXES

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. GILMAN. Mr. Speaker, as the House Committee on Ways and Means continues to mark up a tax reform bill, I join my colleagues from the Northeast-Midwest Coalition in voicing my strong opposition to any proposal to eliminate—or limit in any way—the deductibility of State and local property, income, and sales taxes from Federal taxes.

I appreciate the difficult task which has been imposed on the House Ways and Means Committee. In writing a tax reform bill, the committee members must, and have, listened to every concerned party. I want, however, to take this opportunity to underscore that the loss of State and local deductibility is not a "special interest" issue of concern to only the "high-tax" States. Indeed, a recent study by the Coalition Against Double Taxation estimates that 51 percent of Americans do itemize on their taxes; figures originally presented by the Treasury had placed that number at less than 40 percent, with Treasury computing couples who filed joint returns as a single taxpayer.

The fact that the repeal of the State and local deduction is the single largest revenue raiser in this tax reform plan, I find especially troublesome. I ask my colleagues, can we build a sound tax policy and invariably this Nation's economic future on a system of double taxation? Along with my colleagues in the Northeast-Midwest Coalition, I urge my colleagues on the Ways and Means Committee to carefully weigh their options and in so doing, we trust that they will maintain the State and local income, property, and sales tax deduction.

CONGRATULATES FACULTY AT JACKSON STATE UNIVERSITY

HON. WAYNE DOWDY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. DOWDY of Mississippi. Mr. Speaker, I am pleased to have this opportunity to congratulate the faculty of Jackson State University. The departments of political science and economics recently received a major research grant from the National Science Foundation.

The department of political science, located in the school of liberal arts, and the department of economics, located in the school of business, will conduct a multidisciplinary study on black voter participation in the American South.

The $267,000, 3-year grant was recently announced by Dr. Roosevelt Calbert, program director of the Research Improvement in Minority Institutions [RIMI] division of the Natural Science Foundation. The grant to Jackson State University economists and political scientists mark the first time that the RIMI award has been given to social scientists. All of the previous awards have been made in the natural and biological sciences.

I would like my colleagues to join me in offering special recognition to Dr. James A. Hefner, president of Jackson State University; Dr. James Curtis, project director/principal investigator, assistant professor of political science; principal investigators Dr. Ally C. Mack, chair of the JSU department of political science; Dr. Tekie Fessehatzion, associate professor of economics and acting director of the JSU bureau of business and economic research; Ms. Mary D. Coleman, assistant professor of political science; and Dr. Leslie Burl McLemore, dean of the graduate school and director of research administration.

ST. CATHERINE'S CENTENNIAL

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. KANJORSKI. Mr. Speaker, it is my pleasure to bring to your attention the celebration of 100 years of continuous religious service of St. Catherine's Church, a charming little country church in Mountaintop, PA.

On September 23, 1884, the Rt. Rev. William O'Hara, bishop of the newly established diocese of Scranton, purchased a plot of ground for the purpose of erecting a church. Father Thomas J. Rea supervised the construction, and in 1885 the men of the parish cleared the land, built the foundation and were present at the laying of the cornerstone. Early the next year the plain rectangular structure was completed, and the first mass in St. Catherine's was offered to God in the late spring of 1886.

Picnics, fairs, suppers, and dances were held to raise funds, and within 10 years the church was paid for. The determination of the members of the parish is inspiring; during the early years of the parish the faithful fulfilled their religious obligations by traveling to the various churches in the Wyoming Valley. Some families walked barefoot down the mountain, stopped at a creek or spring, washed their feet, put on their shoes and attended mass. In order to receive communion with a sodality or other group some people walked to the churches in Wilkes-Barre. The priests who came to Mountaintop had to walk or avail themselves of any passing carriage.

St. Catherine's Church has undergone many changes in 100 years; it has served as a mission church at various times throughout its history for many churches in the Wyoming Valley and is currently a mission of St. Jude's Church in Wright Township. Since September 1984 Msgr. William P. Ward and Rev. John J. Kulavich alternate serving mass with Rev. J. Duane Gavitt, who was placed in charge of all its activities as well as the additional ministry of lectors and cantors.

Religious faith has played an important role in the development of our Nation, and the 100-year history of St. Catherine's Church is testament to the continuing importance religion has in the lives of Americans. Mr. Speaker, I am honored to commemorate the distinguished history of St. Catherine's Church before my colleagues in the House of Representatives.

RELIEF FOR DEPOSITORS IN FAILED FINANCIAL INSTITUTIONS

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. DAUB. Mr. Speaker, each of us has to have been caught unaware by the series of financial institution failures during recent years. How many times has the newspaper run pictures of long lines in front of locked closed doors? How often have we seen television interviews with angry depositors who have their life savings at stake? The scenes are particularly disturbing when I think about the perilous condition of many more smaller financial institutions in farm country, U.S.A.

What is truly a travesty, however, is that our current Tax Code adds salt to the wounds of these depositors. There are no provisions under the Tax Code generally, which permit the taxpayer any income tax relief related to interest income and personal funds which are out of reach in failed institutions. Under the current law, taxable interest can still accrue and losses which are often calculable, may not be deducted.

To add some sense to the tax treatment of the depositors, I have introduced a bill which would provide for the following relief provisions:

First, interest credited on a deposit or account in a failed financial institution will not be included in income during any time in which the interest cannot be withdrawn by the depositor.

Second, losses suffered by depositors on their deposits in a failed financial institution would be treated as ordinary losses not subject to capital loss limitations.

Third, losses suffered by depositors would also be exempted from the nonbusiness bad debt provisions and thus would be deductible when the loss can be reasonably estimated.

I have been joined in introducing this bill by Mr. DUNCAN and Mr. BEREUTER, who have been instrumental in drafting many of the provisions. Their input and insight has been invaluable in this process.

It must be noted that this is not a "bailout" bill for any financial institution or any group of depositors. Rather, this is simply a measure to accord the depositors in these institutions a tax treatment which is consistent with the economic realities of the event. The losses are very real for all concerned and there is little fair about being taxed on income which is not under your control.

Because of the importance of this issue to so many people, I would urge my colleagues to consponsor this measure and to help institute more fairness in our Tax Code.

BINARY WEAPONS CAN BE STOPPED—IF THE HOUSE ACTS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. FLORIO. Mr. Speaker, on June 19 of this year the House of Representatives sent a message to the Pentagon and to the world. By a vote of 229 to 196 the production of binary chemical weapons was approved—with but one important caveat. The weapons would not be produced until the North Atlantic Treaty Organization [NATO] requested that the binary weapons be stored in Europe. Many of our colleagues were swayed by this provision as it was fully realized that a request from NATO for the weapons to be stored in Europe would hardly be forthcoming.

This important provision was dropped in the conference with the Senate. There is now no obstacle to the production of binary chemical weapons. There is in fact a license to produce untested and unneeded chemical weapons. Our current inventory of such weapons has maintained a long and excellent safety record.

Mr. Speaker, we in the House have a chance to salvage this $2.3 billion mistaken situation. The Department of Defense appropriation bill will provide us with an opportunity to strike this dangerous situation out of the Department's funds. It will be a rare second chance for the House to rectify a dangerous and expensive mistake. I urge my colleagues to read the following editorial from the New York Times. Nerve gas and chemical weapons have been called inhumane and uncivilized since their inception. There is no reason to think otherwise today.

The article follows:

[From the New York Times]

HOW TO GET TOUGH WITH NERVE GAS

Nerve gas is a hideous weapon, but as long as Soviet troops are equipped with chemical munitions, American troops cannot be denied an effective response. That's why the Defense Department's plan to build a new generation of chemical arms—so-called "binary" weapons—is so dismaying. Never mind their vast extra cost, their destabilizing effect on NATO or the initiation of a new race in chemical arms; the new binary weapons will be less effective.

Every new weapon has defects, often serious, which field test may remedy. Binary weapons surely have their share, but these as-yet-unknown flaws remain undetected because Congress has restricted field tests. No soldier should be asked to fight with untested weapons. And the Bigeye bomb, one of the proposed binary weapons, is still plagued with manifest design flaws.

Advocates say binary weapons will be safer to handle, since the nerve gas is not generated until two chemicals are mixed, in flight, in the delivery shell. Maybe, but the present shells and bombs have a long and excellent safety record, without a single serious accident. Why fix a non-problem? Advocates of binaries contend the present stockpile has sprung leaks. Yes, there are minute leaks—in 0.0006 percent of artillery shells. All other stockpiled shells are usable.

The only practical reason for moving to binary weapons would be evidence that the present stockpile might later deteriorate beyond use. That's an answerable technical question. A blue-ribbon panel appointed by the Department of Defense is conducting aging tests. Why rush to start making binary weapons, costing $2.3 billin over five years, when these tests may well show the present stockpile has a long life ahead?

What truly needs fixing is not chemical offense but defense. The Pentagon has so far failed to institute advice by the Defense Science Board to remedy gaps in manpower, training and equipment. The Army has no medical products in the field for care of chemical casualties, no proper decontaminants of equipment and no antidote against the standard Soviet nerve gas. Commanders often subvert training requirements, such as showing troops how to eat in a contaminated environment, according to the General Accounting Office.

Maintaining deficit chemical defenses, and replacing effective weapons with unproven ones, is hardly the best way of deterring the Soviet Union from first use of chemical weapons.

For the last three years the House has refused to allow production of binary weap-

ons. This year, under the shadow of the hijacked Americans taken hostage in Lebanon, it mistakenly changed position, but required that production not begin until NATO requests that binary weapons be stored in Europe. Since several NATO countries are highly unlikely to allow present stockpiles to be replaced with binaries, the condition is highly desirable insurance. Yet it was surrendered in conference with the Senate.

The House has a chance to redress its error next month as it writes the Pentagon's appropriations bill. Binary weapons are a bad buy, and there's no good reason for the House to abandon its longstanding distrust of them.

HON. GEORGE MILLER'S SPEECH BEFORE THE NATIONAL WATER RESOURCES ASSOCIATION

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. MILLER of California. Mr. Speaker, on April 22, I addressed the membership of the National Water Resources Association at their annual spring meeting in Washington. As many of my colleagues know, that organization has for many years been a potent and effective force in the shaping of Western water resource development policies. It was a real pleasure for me to have the opportunity to share with that organization my perspectives on water resource development issues, and to set forth my agenda for the subcommittee's work in the 99th Congress.

Since I delivered those remarks almost 6 months ago, the subcommittee has taken action on several of the agenda items outlined in my remarks to the NWRA. The House has passed H.R. 3113, my bill to authorize the coordinated operation of the huge State and Federal water projects in California. Also sent to the Senate is H.R. 1246, which will create a protective floodway on the lower Colorado River.

We are continuing our work on many other pressing water development problems, especially the problem of contaminated and toxic agricultural drainage water from some irrigation projects. We are an active subcommittee, and I look forward to tackling the issues I outlined for the NWRA members last April.

Mr. Speaker, the text of my remarks follows:

HON. GEORGE MILLER'S SPEECH BEFORE THE NATIONAL WATER RESOURCES ASSOCIATION, APRIL 22, 1985

INTRODUCTION

Ladies and gentlemen, I want to thank you for giving me the opportunity to be with you this morning at your annual spring meeting.

Let me begin by saying a few words about the upcoming retirement of Pat O'Meara, who has ably served this organization for almost 10 years. I have thoroughly enjoyed my often turbulent relationship with Pat. He's a strong advocate and he has championed the cause of water resource development without rest. Pat has many good friends on Capitol Hill, and in every State Capitol in the West; I like to count myself among them.

Pat, we wish you all the best in your retirement. It goes without saying that we will miss you.

ACTIVE CHAIRMAN

Ladies and gentlemen, for the decade I have served in Congress, I have had a deep interest in water resource matters especially as they affect my congressional district. Contra Costa County, California—my district—is the heart of the Sacramento-San Joaquin Delta. It is often described as the center of the "hour glass" of water development in California. We are affected by every water resource decision made from the north coast to San Diego and we are indirectly affected by nearly every decision made in the Colorado River Basin as well.

So I look forward with great excitement to chairing the Subcommittee on Water and Power Resources. It provides me with an opportunity to pursue my longstanding interests in water resources reform nationally, and to help meet the water resource needs of my own constituents in Contra Costa County, and throughout California.

Our subcommittee will be very active. There is a long list of problems and projects requiring our attention and I don't intend to duck or delay addressing these problems.

SUBCOMMITTEE AGENDA

I would like to briefly discuss some of the major items on the agenda of the subcommittee.

The members are very interested in a number of California water resources issues. The most complex problem is, of course, the contamination of Kesterson Reservoir as a result of agricultural drainage water. The solution to this problem will be difficult, expensive and it will set a precedent for similar problems in the West.

We're very concerned about insuring the protection of delta water quality through a coordinated operating agreement between the California and the Federal Government. In addition, there are problems with existing California projects, like the San Luis unit, and with new projects like the midvalley canal or Santa Margarita that we will address.

We have held hearings on the Garrison Commission report and a markup is scheduled for April 30 to report a bill to reformulate the project.

The State of Nebraska and the congressional delegation now support a reformulation of the O'Neill Project; we'll also markup an O'Neill bill on April 30.

Several problems have developed at large projects which the subcommittee will have to address. These include: (1) Flood control and storage features for the Central Arizona Project, (2) cost ceiling and repayment issues with the Central Utah Project, and (3) cost ceiling problems with Auburn dam.

The Small Reclamation Loan Project Act authorization ceiling needs to be raised if we are to continue this program. H.R. 2025, introduced by Chairman Udall and supported by this association, will receive hearings before the subcommittee.

We intend to examine several bureau activities that have not previously been examined by a congressional subcommittee. These will include a review of the bureau's construction contracting procedures, as well as a thorough examination of their foreign activities.

Finally, ground water depletion problems are some of the most complex and pressing water issues facing this Nation. Our subcommittee has jurisdiction over the Water Resources Division of the U.S. Geological Survey. Working with the division and the bureau, we intend to hold a series of hearings on ground water problems.

PERSPECTIVES ON ISSUES

This agenda is a full one. However, it represents my personal commitment to actively work at solving complex water problems. In addition to my interest in addressing these problems, I bring several perspectives to the chairmanship of this subcommittee which I would like to share with you:

I have always felt that answers to water problems lie not in concrete, but in creative approaches to water problems.

I have always had a voting record in support of environmental protection. In addition, I have a deep personal interest in environmental issues. I'm proud of my record and I hope to expand on it in the future. Environmental concerns should not obstruct essential projects; nor can they be ignored or minimized by water planners.

I have a long-standing commitment to water pricing reform as demonstrated in my work on the Reclamation Reform Act of 1982. I believe that if water is priced at reasonable levels, it will promote wiser and less wasteful use.

I believe in the strict enforcement of the Reclamation Reform Act. I spent 6 years on that effort. The 1982 law was the result of an agonizing and difficult political struggle. A compromise was reached and agreed to by all parties. The weakening of that landmark law is not on the agenda of this subcommittee. I intend to see that that compromise is implemented, and implemented vigorously.

I believe that those who benefit from water projects must pay their fair share of the costs. Those who assist beneficiaries in repaying—such as power consumers or taxpayers—should clearly understand how much they are repaying over what period of time. If the beneficiaries are not willing or able to pay their fair share, then I do not believe the taxpayers have an obligation to construct that project, regardless of promises made in the past, when economic conditions were much different.

Finally, because I serve on the Budget Committee, I have an interest in the cost of water resource development projects, and how we as a nation will find the money to build these projects.

WATER PROJECT COSTS: NEW CONCERN IN CONGRESS

It is the problem of growing congressional concern for the cost of water resource projects that I want to address more fully this morning.

You've all heard in past meetings from Congressmen and Senators who said that finding funds to insure the timely completion of projects would be a difficult task.

This year, I can assure you things are different. The days of expanding bureau construction budgets are gone.

As you all know, the President has submitted a budget which includes a $200 million reduction in the bureau construction program. This represents a 27-percent reduction over last year.

The President's budget request represents a reality which all of us must face. I would also caution that his request is simply the latest in a series of construction funding reductions over the last 10 years.

The chances of restoring the bureau's budget back to a billion dollar level are near zero and dropping fast.

There is a growing consensus in the House of Representatives that every request for funds will get careful scrutiny, and especially requests for construction of public works projects.

Unless those of us on authorizing committees make changes—and make them quickly—the results are fairly predictable.

The backlog of authorized, but unfunded projects will grow steadily.

The time required to complete projects will lengthen, and in some cases, exceed several decades and cost increases alone will doom many projects.

Moreover, those in the water development community who have legitimate and pressing needs, will see them go unfunded because large projects will take a greater share of a shrinking funding pie.

Consider the following: One-third of the entire bureau construction budget is devoted to one project—the central Arizona project. The central valley, central Utah, and Garrison projects take up another 25 percent.

In other words, over one-half of the budget goes to just four projects.

Let me give you another important example of the situation we find ourselves in. I am sure that nearly everyone here has heard of the peripheral canal in California. Proponents have insisted for decades that the canal was essential to the water development future of my State. Along with many others, I strongly oppose the canal.

For 10 years, the canal's proponents were unwilling to compromise on the issues of environmental impacts or the canal's cost. The result has been a stalemate over water development.

The same thing has occurred at the Federal level. No new authorizations have passed Congress in over a decade. If we are to have water development, we must recognize that environmental and cost factors must be considered.

That is what our subcommittee is now trying to do in the case of the Garrison and O'Neill projects. We are trying to forge compromises between environmentalists and project proponents, while at the same time putting together a package that will receive a majority vote in a cost conscious Congress.

WHAT TO DO?

Given these budgetary realities, what can be done?

First, we must eliminate some projects from the backlog. We must recognize that every authorized bureau project will not be built.

Projects designed to correct problems that existed decades ago and that no longer exist, must be deauthorized.

Projects where there are only a few dozen beneficiaries and where power consumers or taxpayers repay the vast bulk of the costs should also be dropped.

We must insist on requirements designed to weed out uneconomic projects. These requirements should include up-front cost-sharing, relevant interest rates, repayment by project beneficiaries, fewer delays in construction, and construction methods which keep costs to a minimum.

Second, we must insist on a planning process that results in realistic solutions to contemporary water problems at minimal cost. This will mean a more active non-Federal role in planning and efforts to share solutions among local, State and Federal agencies.

This planning process should also search for less capital intensive solutions, such as improved water management, water conservation, water pricing initiatives, water banking and other methods designed to solve today's problems at less cost.

Third, we must insure that we have repayment methods that insure projects are repaid on a timely basis. This is critical if those of us from the west are to convince other Members of the Congress to support water resource development projects.

Finally, we must insure that the solutions we seek to water resource problems are sensitive to environmental concerns. We cannot, and should not, ignore environmental values.

CONCLUSION

I apologize for sounding pessimistic, because I'm not. I didn't become subcommittee chairman in order to exercise jurisdiction over a dying program.

I'm excited about the future. There are critical water resource problems in the West that need an active Federal involvement through the Bureau of Reclamation and U.S. Geological Survey. These agencies, and the Congress, can help you solve these problems.

We share a common goal: Solving water resources problems. I look forward to the task with great excitement.

JOB ACCOMMODATION NETWORK

HON. CHARLES WILSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. WILSON. Mr. Speaker, during debates on Government spending and trimming budgets by cutting unnecessary funding, many of us may lose sight of those programs that more than pull their weight in providing a service to Americans.

One such program could be put on the block soon, because of needed streamlining in other departments of its parent committee.

The Job Accommodation Network [JAN] is a national information and consulting service for employers who want to hire or retain people with disabilities. It brings together information from many sources on practical and cost-effective ways to make workplace accommodations for employees with disabilities.

As a service of the President's Committee on Employment of the Handicapped, JAN is available to any employer—from the largest corporation to the small family business—via a toll-free telephone number. Suggestions for meeting workplace adaptation needs are offered immediately. More detailed information on available equipment and design options at minimum cost is mailed within days. The only fee requested is that the employer add the benefits of his or her experience to the information bank at JAN after completing these workplace accommodations.

Placing the most qualified person in the right job or retaining trained personnel is always the goal of a cost-conscious employer in any size business. Successful placement saves employers time, money, and valuable personnel resources. Participants in the JAN network repeatedly report enhanced efficiency, improved employee morale and favorable recognition in the community.

This system of shared information is becoming the key which unlocks the door to job opportunities for handicapped people. It forces both employers and coworkers to recognize that a disability is not an insurmountable obstacle. As one successful woman with a disability stated recently, "There's nothing I can't do. I just do it differently." Through JAN's information clearinghouse, employers get the return of skilled and highly productive workers for a minimum investment.

I encourage my colleagues to look carefully at the successful growth of the Job Accommodation Network. It is a prime example of money well spent.

HONORING GLORIA VARGAS RECIPENT OF THE 1985 SERVICE AWARD FROM THE LOS ANGELES COUNTY COMMISSION FOR WOMEN

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. TORRES. Mr. Speaker, I ask my colleagues to join me in congratulating Gloria Vargas as a recipient of the 1985 Service Award from the Los Angeles County Commission for Women. Gloria is an active organizer and volunteer in the San Gabriel Valley Area that I represent. She is being honored by the commission on October 9 for her outstanding contributions to the community.

Gloria is currently working for the Bassett Unified School District as a community relations specialist. Because of her experience in education she has been the featured speaker in conferences and seminars on education.

While Gloria is a native of Arizona, she has spent most of her life in California. She is a graduate of Lincoln High School in Los Angeles and in 1974 received her Bachelor of Arts from California State University at Los Angeles. Gloria earned her degree attending classes as a full-time student while working full-time to support her family.

Gloria has participated in programs for the United Way, Red Cross, La Puente Valley Welfare Council and the Commission Femenil. She has also been a volunteer in numerous youth development programs.

Mr. Speaker, I rise today on the floor of the House to commend Gloria Vargas for her tireless efforts in making our community a better place. On behalf of the people of the 34th Congressional District I want to thank her for her dedication to improving the welfare of her fellow citizens.

U.N. ANNIVERSARY CELEBRATION

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. GREEN. Mr. Speaker, I would like to take this opportunity to recognize the Southern New York State Division of the United Nations Association-USA, and its celebration of the 40th anniversary of the United Nations next month.

The goal of the association, established in 1966, is to provide a nonpartisan source of information about the United Nations. Toward this end, the Southern New York State Division has contributed greatly.

Three commemorative events are planned, all to take place at the first site of the United Nations in the United States. On the evening of October 19, the division will present a bronze plaque to Lehman, formerly Hunter, College. the presentation will be followed by a reception.

On the 20th of October, a ceremony will be held at Lake Success in Nassau County, the site of the first temporary headquarters of the United Nations. A community-wide meeting has been organized by the members of the UNA Long Island chapter in conjunction with Sperry Corp. and the township of North Hempstead.

A presentation of a bronze plaque, on October 24, will be the occasion of the final commemorative event, with the division memorializing the International Gardens, in Flushing Meadows, Queens, which was an early temporary site of the general assembly.

I commend the division in its dedication to enhancing our knowledge and understanding of the United Nations.

MAMARONECK, NY OBSERVES 325TH ANNIVERSARY

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. DIOGUARDI. Mr. Speaker, I am pleased to have this opportunity to note the 325th anniversary of the founding of the town of Mamaroneck, in Westchester County, in New York State.

I am honored to represent Mamaroneck town in Congress. On the Sound Shore, this municipality is joined together by the historic Boston Post Road and includes the villages of Larchmont and Mamaroneck Village.

Many people think that the suburban counties of New York City have only been settled in recent years, yet this town has been a busy community even before the founding of New York City in 1664.

From Orienta Point to Saxon Woods Park, this community of 30,000 is noted for its incredible diversity. From the country clubs in the North end and the yacht clubs on the shore to Mamaroneck Village, home of some of the best Italian restaurants in the United States, this town is a microcosm of the values that have made American the greatest Nation on the face of the Earth. These values of family, hard work, and fiscal responsibility have enabled Mamaroneck to survive through its first 325 years and will no doubt allow them to survive in the next 325 years.

The opportunity to deliver this statement of praise and congratulations to my neighbors in Mamaroneck is truly an honor and for that, Mr. Speaker, I thank you.

IGNACY JAN PADEREWSKI DAY

HON. GERRY SIKORSKI

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. SIKORSKI. Mr. Speaker, today, I and over 50 of my colleagues are introducing legislation to commemorate the great Polish musician, statesman and humanitarian, Ignacy Jan Paderewski.

The legislation I offer will officially designate the 125th anniversary of Paderewski's birth on November 6, 1985, as "Ignacy Jan Paderewski Day." Such a day will bring proper recognition to a man who was devoted to the ideal of free people throughout the world, and will bring great pride to the millions of Amercians of polish descent.

Ignacy Jan Paderewski was a unique figure in modern history. He was renowned for his artistry as a concert pianist and composer. He also became a leading spokesman for the cause of a free Poland and the free world.

As Poland's Prime Minister and Foreign Secretary, Paderewski's diplomatic efforts led to the recreation of a geographic Poland after World War I. During the war, Paderewski helped raise an army of over 27,000 Polish citizens living in the United States to fight alongside United States forces in France.

During the Great Depression, Paderewski repeatedly contributed the receipts from his concerts to help veterans groups and the unemployed living in the United States. He was named an honorary member of the American Legion, the only foreign civilian ever to receive that distinction.

I ask my colleagues to please join me in commemorating this champion of liberty who spent his life selflessly dedicated to the enrichment of humankind.

THE CASE FOR A PRESIDENTIAL LINE-ITEM VETO

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. COURTER. Mr. Speaker, The American Spectator recently ran an important column by R. Emmett Tyrrell, Jr., which points out the reasons why we should seriously consider legislation to provide the President with line-item veto authority. Congress is composed of 435 separate interest groups which, as legislative bodies, are simply unable to say no; whereas the President represents a national constituency and is in a far better position to place national priorities above parochial interests.

I would urge my colleagues to read Emmett Tyrrell's words, while keeping in mind the serious economic consequences of an expanding national deficit.

BUDGETARY CHAOS

(By R. Emmett Tyrrell, Jr.)

It was in 1974 that Congress passed the Congressional Budget and Impoundment Control Act, vouchsafing the instrumentalities for finally getting a grip on the budget. Since then, alas, spending has fattened from 1974's $267 billion to 1985's $959 billion. Moreover, approximately one-fourth of that corpulent sum is unfunded. Congress is leaving a tab of some $222 billion for others to pick up, sometime, somehow. Obviously, the Congress Budget and Impoundment Control Act of 1974 failed to get a grip on the budget.

Cognizant as we all are of the occasionally extraordinary strength of our many fine public servants on Capitol Hill, we can rest assured that all of them are duly distressed by this budgetary chaos. But in these slumbrous summer days, as they tour their districts, will any of them take responsibility for it?

Think of it: The present deficit is practically equal to the entire 1974 budget! With deficits like this today and other equally gaudy deficits prophesied for the future those puny tax increases and budget cuts prescribed by our contemporary Jeffersons and Lincolns are true howlers. New tools are needed to cut spending and to render someone responsible to the voters.

The inescapable fact of the matter is that growing spending is the root cause of the budget's blowsiness, and no one in Washington is in a proper position to be held accountable. The budget grows under the reign of liberals and conservatives alike. It grew at an inflation-adjusted rate of 17.5 percent during the reign of the gentle Jimmy Carter, and it grew at the same rate during the first term of the heartless Ronald Reagan.

The budget grows because Congress spends. It underfunds new programs as well as old programs. Then as the year passes and the money runs out, it quietly approves a budget-busting supplemental appropriation. It lumps pork barrel in with the necessities of government and hopes that the President will accept the bad with the good. It solemnly passes low-priority bills early in its session and holds high-priority bills for later when pressure has built to pass them whether or not they are in breach of budgetary resolutions.

Some in Congress charge that deficits are a consequence of Ronald Reagan's 1981 tax cuts. They seem to have forgotten that the following year he welcomed a tax increase with the understanding that he would be getting a two dollar spending cut for every dollar in new taxes. The cuts were not made. Only the taxes became law.

Ronald Reagan's 1981 tax cuts merely brought federal taxes down to the level of a decade ago, 19 percent of the Gross National Product. In those days, federal spending was at approximately 20 percent of GNP. It grew to 23 percent of GNP under Jimmy

Carter and a colossal 25 percent under the arctic Reagan Administration. Clearly spending is the problem, and to get federal spending back to 20 percent of GNP Congress would have to cut more than $120 billion over and above its present promised cuts. Nor is this the spending of good Samaritans with big hearts. Rather it is the spending of incompetents. Over the past five years Congress has outspent its own budget resolutions by an average of $28 billion yearly. Even in this year of lamentation over deficits, federal spending will probably exceed the fiscal 1985 budget resolution by more than $20 billion. What we have here is a Congress abounding with Warren Gamaliel Hardings or worse. We are told that the late Harding could not say no to the dubious schemes of his cronies. Not only can our Hardings not say no, but into their august chambers they often bring their own dubious schemes. No one ever accused Harding of this sort of innovativeness.

In all of Washington, the only elected official eager and competent to oversee the budget is the President. He wants Congress to grant him the line-item veto, allowing him to scotch specific items in bloated appropriations bills rather than accept them, fat and all. Congress did give the President a limited version of the line-item veto in its 1974 Budget Act. I suggest that all the liberals and conservatives on the hill would prosper if the President were granted this simple tool. Liberals could brag of their generosity; conservatives could brag of their frugality. Meanwhile, at 1600 Pennsylvania Avenue someone would be in charge: King Ronald I, the natural consequence of democratic leaders who will not lead.

A FITTING RESPONSE

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. GARCIA. Mr. Speaker, columnist Anthony Lewis has written a poignant article on the World Court hearings concerning the United States, Nicaragua, and the Contras.

It discusses, among other things, the rule of law and its role in the formulation of our foreign policy. I thought my colleagues might enjoy reading it.

The article follows:

[From the New York Times, Thursday, Oct. 3, 1985]

LUST FOR POWER

(By Anthony Lewis)

BOSTON.—Jeane Kirkpatrick has just performed a valuable service for American democracy. She has given us a glimpse of the authoritarian mentality that lies beneath the genial surface of the Reagan Administration: its lust for power without accountability.

In a newspaper column Mrs. Kirkpatrick denounced Prof. Abram Chayes of the Harvard Law School for representing Nicaragua in its World Court suit against the United States. An American lawyer who thus opposes his own Government, Mrs. Kirkpatrick said, violates "a citizen's obligation to support decisions made through normal democratic processes."

By what "normal democratic process" did the American policy approve a war against the Government of Nicaragua? Approve the creation and funding of a "contra" force to fight that war? Approve American direction of the force? Approve the use of terrorist methods? Approve the mining of harbors, the destruction of crops, the shooting of wedding parties?

The American people did not approve those actions, and the Reagan Administration knows they would not. That is why the President and his cohorts have carried out their Nicaragua policy by stealth and lies.

The Administration said the objective of the contra war was to interdict weapons shipments to Salvadoran guerrillas, but Mr. Reagan himself made clear that the purpose was to overthrow the Government of Nicaragua. The Administration pretended that Nicaraguans were running the show when Americans were. A year after Congress barred a C.I.A. role, we learned that a National Security Council staff member was supervising the covert war.

All that is what Jeane Kirkpatrick means by "normal democratic processes." She means a political system in which the Executive does what it wants, unhampered by any duty to account for its actions. It is the model followed in many countries, but it is not what George Washington and James Madison had in mind at our Constitutional Convention.

That the Reagan Administration wants power without accountability is not news. President Reagan has tried to give the United States an Official Secrets Act by executive order, without legislation. He has declared "national emergencies" in order to impose economic sanctions without Congressional approval. He has made recess appointments to avoid the inconvenience of Senate confirmation. He resisted any restraint on his rash use of troops in Lebanon.

But Nicaragua is the most dangerous example of the authoritarian tendency. It is also the most discouraging, for those of us who count on Congress to rein in an overweening Executive.

When Congress last summer approved "humanitarian assistance" to the contras, it appeared to exclude an American military role. But while practically nobody noticed, it opened the back door to just such a role.

A supplemental appropriations bill, now law, allows U.S. authorities to "exchange information" with the contras. And Representative Dave McCurdy, Democrat of Oklahoma, succeeded in writing into the Intelligence Authorization for 1986 language that the report says would permit "provision of intelligence information or advice to the contras."

Edgar Chamorro, a former contra leader, told the World Court in an affidavit what such "information" means. Among other things, he said, the C.I.A. advised the contras of "the precise locations of all Nicaraguan Government military units." That is what the legislation would evidently allow. Mr. McCurdy and his colleagues say they are against U.S. intervention while actually allowing it.

The example of the Chamorro affidavit shows one function of the World Court hearings: to bring out the facts of what the United States is doing in Nicaragua. That is accountability—which the Reagan Administration has tried to duck by running away from the World Court proceeding and smearing the court.

I should say that I am a friend of Professor Chayes. When he was Legal Adviser to the State Department during the Cuban missile crisis, I saw his insistence on respect for law in the Kennedy Administration's responses. I know his devotion to the American principle that power must answer to law.

Mrs. Kirkpatrick does not believe in that principle. She thinks the end of effective executive power justifies the means. She thinks the duty of American lawyers is to cheer what their Government does, however lawlessly. She is ignorant of the part that law has played—law and independent lawyers—in making America strong and free.

INTRODUCTION OF SPACE SCIENCE RESOLUTIONS

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. FOWLER. Mr. Speaker, today, I am introducing three resolutions aimed at insuring a strong, balanced, and affordable American Space Science Program.

The first resolution presents the recommendations of the National Academy of Sciences' Astronomy Survey Committee for the future course of U.S. programs in astronomy and astrophysics.

The second resolution addresses the recommendations of NASA's Solar System Exploration Committee for the continued exploration of the solar system by the United States.

These two resolutions are updated versions of measures I introduced in the last session of Congress.

The final resolution is concerned with the recently issued recommendations of the National Academy of Sciences' Committee on Solar and Space Physics for future American research programs in these fields.

At this time, I would like to insert in the RECORD the text of these three resolutions.

H. CON. RES. 206

Concurrent resolution endorsing the recommendation of the Astronomy Survey Committee for astronomical and astrophysical exploration and understanding during the 1980's

Whereas the United States program for astronomy and astrophysics has made a significant material, cultural, and intellectual contribution to the quality of life in the United States and worldwide;

Whereas the United States has been at the forefront of astronomy and has been the world leader in this field over the past twenty years, during which time important discoveries have been made which radically changed our concepts of the origin and evolution of stars, galaxies, and the Universe itelf;

Whereas in the period since 1960 the United States has played a predominant role in such astronomical discoveries as quasars, the cosmic microwave background radiation, pulsars, neutron star binaries, superluminal expansion of interstellar radio sources, solar coronal holes, anomalous solar neutrino flux, a gravitational lens, and extrasolar planets.

Whereas astronomy and astrophysics make an essential contribution to the scientific and technological vigor of the United States, and maintaining United States lead-

ership in these areas will be an increasing challenge during the next decade as other nations continue to develop their scientific capabilities;

Whereas recent budgetary constraints on Federal support for astronomy and astrophysics have damaged United States space science capabilities, particularly in the fields of ground-based astronomy, university research, and new technology development;

Whereas in 1978 at the request of the National Science Foundation (NSF) and the National Aeronautics and Space Administration (NASA), the National Academy of Sciences (NAS) created the Astronomy Survey Committee to develop priorities for a comprehensive program in astronomy and astrophysics for the next decade;

Whereas the two previous decennial studies of astronomy and astrophysics conducted by the NAS helped to identify the major astronomical programs carried out by the United States in the 1960's and 1970's; and

Whereas in 1982 the Astronomy Survey Committee issued its report, Astronomy and Astrophysics for the 1980's, containing its recommendations for the conduct of the United States astronomy and astrophysics program over the next ten years, and these recommedations have been widely endorsed as representing the consensus viewpoint of the United States astronomical community: Now, therefore be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that—

(1) the members, working groups, panels, and consultants of the Astronomy Survey Committee are to be commended for their contribution toward the development of a coherent and scientifically valuable program for astronomical and astrophysical exploration and understanding during the coming decade; and

(2) the recommendations of the Astronomy Survey Committee represent a responsible guideline for the conduct of the United States program for astronomy and astrophysics for the next ten years.

SEC. 2. The Congress endorses the following research objectives for the astronomy and astrophysics program, as set forth by the Astronomy Survey Committee:

(1) the large scale structure of the Universe;

(2) the evolution of galaxies;

(3) violent cosmic events;

(4) the formation of stars and planets;

(5) solar and stellar activity;

(6) extra-solar planets and extraterrestrial life and intelligence; and

(7) forces of nature and Grand Unified Theories.

SEC. 3. The Congress endorses the following previously approved and continuing programs, as set forth by the Astronomy Survey Committee:

(1) the Space Telescope (to be launched in 1986) and the associated Space Telescope Science Institute;

(2) second-generation Space Telescope instrumentation;

(3) the Gamma Ray Observatory (to be launched in 1988);

(4) NASA level-of-effort observational programs, including research with balloons, aircraft, sounding rockets, Spacelab, and the Explorer Program;

(5) the Solar Optical Telescope (to be launched in 1991);

(6) the Space Infrared Telescope Facility (to be authorized in fiscal year 1988);

(7) facilities for the detection of neutrinos from the solar interior;

(8) Federal grants in support of basic astronomical research at United States universities; and

(9) programs at the National Astronomy Centers.

SEC. 4. The Congress endorses the following prerequisites, as set forth by the Astronomy Survey Committee, which are necessary to support the gathering and analysis of data produced by new research initiatives and which should receive additional total funding of up to approximately $190,000,000 (in constant 1980 dollars) over the next ten years:

(1) instrumentation and detectors;

(2) theory and data analysis;

(3) computational facilities;

(4) laboratory astrophysics; and

(5) technical support at ground-based observatories.

SEC. 5. The Congress endorses the following major new programs in order of priority, as set forth by the Astronomy Survey Committee, which are critically important for the rapid and effective progress of astronomical research and which should receive total funding of up to approximately $950,000,000 (in constant 1980 dollars) over the next ten years:

(1) an Advanced X-Ray Astrophysics Facility (AXAF) (to be authorized in fiscal year 1987);

(2) a Very-Long-Baseline (VLB) Array of radio telescopes;

(3) a New Technology Telescope (NTT) of the 15-meter class operating from the ground at optical and infrared wavelengths; and

(4) a Large Deployable Reflector (LDR) in space.

SEC. 6. The Congress endorses the following moderate cost new programs in rough order of priority, as set forth by the Astronomy Survey Committee, which should receive total funding of up to approximately $750,000,000 (in constant 1980 dollars) over the next ten years:

(1) an augmentation to the NASA Explorer program;

(2) a far-ultraviolet spectrograph in space;

(3) a space VLB interferometry antenna in low-Earth orbit;

(4) the construction of optical/infrared telescopes in the two- to five-meter class;

(5) an Advanced Solar Observatory in space;

(6) a series of cosmic-ray experiments in space; and

(7) an astronomical Search for Extraterrestrial Intelligence (SETI).

SEC. 7. The Congress endorses the following smaller cost new programs, the first of which is of highest priority, as set forth by the Astronomy Survey Committee, which should receive total funding of up to approximately $20,000,000 (in constant 1980 dollars) over the next ten years:

(1) a ground-based antenna of approximately ten-meter diameter for submillimeter-wave observations;

(2) a spatial interferometer for the mid-infrared region of the spectrum;

(3) a program of high-precision optical astrometry; and

(4) a temporary program to maintain scientific expertise at United States universities during the 1980's through a series of competitive awards to young astronomers.

SEC. 8. The Congress endorses the Astronomy Survey Committee's recommendation to begin study and development of programs that appear to have exceptional promise for the 1990's and beyond. Such programs could include the following:

(1) future X-ray observatories in space;

(2) instruments for the detection of gravitational waves from astronomical objects;

(3) long-duration spaceflights of infrared telescopes cooled to cryogenic temperatures;

(4) a very large telescope in space for optical, ultraviolet, and near-infrared observations;

(5) a program of advanced interferometry in the radio, infrared, and optical spectral regions;

(6) advanced gamma-ray experiments; and

(7) astronomical observatories on the Moon.

H. CON. RES. 205

Concurrent resolution endorsing the recommendations of the Solar System Exploration Committee for the continued exploration of the solar system by the United States

Whereas the United States program for solar system exploration has benefited humanity greatly in terms of new knowledge about the Earth and its place in the Universe;

Whereas the United States has been the world leader in solar system exploration, sending the first spacecraft to successfully visit Mercury, Venus, Mars, Jupiter, and Saturn, and this preeminence has rewarded the Nation immeasurably in national pride and prestige;

Whereas in the period between 1961 and 1977 the United States launched the Ranger, Surveyor, and Lunar Orbiter missions to the Moon, the Mariner spacecraft series to Mercury, Venus, and Mars, the Pioneer Venus series, Vikings 1 and 2 to Mars, Pioneers 10 and 11 to Jupter and Saturn, and Voyagers 1 and 2 to Jupiter and Saturn;

Whereas no American solar system exploration spacecraft has been launched since 1977, and only one new mission—the Galileo orbiter and probe of Jupiter—was authorized between 1977 and 1982;

Whereas since the middle 1970's the declining planetary science budget and the demands for more sophisticated and more expensive missions has led to less frequent planetary mission starts, and the smaller number of new missions has reduced program balance, eroded the research base, and increased individual mission costs;

Whereas in 1980, to address the problems in the United States planetary exploration program, NASA formed the Solar System Exploration Committee (SSEC) to devise a new approach to the exploration of the solar system which would recognize the root causes of the problem, build upon the science rationale and strategies of the Space Science Board and NASA working groups, and result in specific, prioritized recommendations to NASA; and

Whereas the SSEC has presented a report to the Congress and the American people that seeks to identify an affordable, long-term balanced mission strategy for the exploration of the solar system: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring) That it is the sense of the Congress that—

(1) the members, working groups, and staff of the Solar System Exploration Committee (SSEC) are to be commended for their contribution toward the development of a coherent, affordable, and scientifically valuable program for the continued exploration of the solar system by the United States; and

(2) the recommendations of the SSEC represent a responsible, and affordable, guideline for the conduct of the United States solar system exploration program between now and the year 2000.

SEC. 2. The Congress endorses the following goals for the solar system exploration program, as set forth in the SSEC report:

(1) determination of the present state, origin, and evolution of the solar system;

(2) understanding of the Earth through comparative planetary studies;

(3) understanding of the relationship between the chemical and physical evolution of the solar system and the appearance of life; and

(4) surveying of the resources available in near-Earth space.

SEC. 3. The Congress endorses the following program recommendations for solar system exploration, as set forth in the SSEC report:

(1) a balanced core program of high priority science missions of low to moderate cost should be implemented, with missions to the three areas of the terrestrial planets, the small bodies (comets and asteroids), and the outer planets;

(2) as part of the cost program, a Planetary Observer program for low-cost modestly scaled inner solar system missions, the Marine Mark II modular spacecraft for missions beyond the inner solar system, and a Common Mission Operations System should be developed;

(3) planetary research and analysis programs should be strengthened by restoring them to the fiscal-year-1981 program levels, adjusted for inflation, by 1986;

(4) vigorous efforts should be made to seek mutually beneficial international cooperation in solar system exploration;

(5) the core program should be augmented with technologically and scientifically challenging missions, as budgetary constraints allow; and

(6) these activities should be funded at a sustained annual level of approximately $300,000,000 per year (in fiscal-year-1984 dollars).

SEC. 4. The Congress endorses the following core program projects, as set forth in the SSEC report:

(1) the Venus Radar Mapper (authorized in fiscal year 1984 for launch in 1988), which would map the global surface topography of Venus;

(2) the Mars Observer (authorized in fiscal year 1985 for a 1990 launch), which would determine the global surface composition of Mars and the role of water in the Martian climate;

(3) a comet rendezvous/asteroid flyby (to be authorized in fiscal year 1987 for a 1990-1992 launch), which would initiate American exploration of the physically and chemically primitive small bodies of the solar system; and

(4) the Titan Probe/Saturn Orbiter (to be authorized for a 1988-1992 launch as a joint NASA-European Space Agency mission), which would determine the chemical composition of Titan's atmosphere and the nature of its surface and would explore the rings, moons, and magnetosphere of Saturn.

SEC. 5. The Congress endorses the SSEC's recommendation that subsequent core missions be identified for further study and development. Such missions could include the following:

(1) the Mars Aeronomy Orbiter;

(2) the Venus Atmospheric Probe;

(3) the Lunar Geoscience Orbiter;

(4) the Mars Surface Probe;

(5) the Comet Atomized Sample Return;

(6) the Multiple Mainbelt Asteroid Orbiter/Flyby;

(7) the Earth-approaching Asteroid Rendezvous;

(8) the Saturn Flyby/Probe;

(9) the Uranus Flyby/Probe;

(10) the Neptune Flyby/Probe; and

(11) the Pluto Flyby.

SEC. 6. The Congress endorses the following augmentation program projects, as set forth in the SSEC report:

(1) the Mars Sample Return/Rover Mission (to be authorized for a launch as early as 1996), which would provide detailed information about the crust, surface, atmosphere, and organic materials of Mars;

(2) the Comet Nucleus Sample Return (detailed mission studies to begin in 1985), to determine the basic mineral and chemical properties of a comet nucleus;

(3) continued evaluation of possible augmentation missions to the outer planets, such as the Titan Buoyant Probe and Penetrators or other on-site studies of solid satellites; and

(4) detailed study and development of critical enabling technologies necessary for the augmentation missions, including aerocapture, aeromaneuvering, orbital rendezvous, sampling mobility, sampling handling, robotics, solar electric propoulsion, nuclear electric propulsion, automated rendezvous, zero-g landing techniques, and advanced thermal and radiation protection.

H. CON. RES. 204

Concurrent resolution endorsing the recommendations of the Committee on Solar and Space Physics for solar and space physics research through the year 2000

Whereas the United States program for solar and space physics research has played a key role in the understanding of the near-Earth space environment, and such understanding has important applications for scientific, commercial, and national security purposes;

Whereas the United States has been the pioneer in space physics, beginning in 1958 with the discovery of the Van Allen radiation belts encircling the Earth;

Whereas since 1960 the United States has played a leading role in solar and space plasma physics, and this research has revolutionized our view of the near-Earth and the near-interplanetary space environment;

Whereas American scientists have been at the forefront of such discoveries as the Van Allen radiation belts, the Earth's magnetic tail, the structure of the solar wind, the collisionless shock on the Earth's sunward side, transient mass ejections from the solar corona, and the production of nitric oxide in the polar thermosphere by solar proton events and aurorae;

Whereas during the early 1970s NASA sought advice from the Space Science Board of the National Academy of Sciences on how, and in what direction, the field of space physics should proceed; and the result was the 1978 National Academy of Sciences' report "Space Plasma Physics: The Study of Solar-System Plasmas", which endorsed a continuation of space and solar physics research and recommended that the Committee on Solar and Space Physics (hereinafter in this resolution referred to as the "CSSP") of the Space Science Board develop a research strategy for this field;

Whereas in 1980 the CSSP issued its report "Solar-System Space Physics in the 1980s: A Research Strategy", which defined a research strategy for implementation of the discipline's science objectives during the 1980s;

Whereas constrained budgets in the early 1980s prevented significant progress in implementing the 1980 CSSP research strategy, and increased attention to solar and space physics research by other nations further eroded the United States leadership position in this field;

Whereas in November 1983 the Space Science Board directed the CSSP to develop a priorities-based study of solar and space physics, using the 1980 research strategy as a basis; and

Whereas in 1985 the CSSP issued its report "An Implementation Plan for Priorities in Solar-System Space Physics" (hereinafter in this resolution referred to as the "CSSP report"), which specifies the scientific objectives of the field and describes the plan for implementing these objectives through the year 2000: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring),

SECTION 1. EXPRESSION OF COMMENDATION TO COMMITTEE ON SOLAR AND SPACE PHYSICS.

It is the sense of the Congress that—

(1) the members, panels, and consultants of the CSSP are to be commended for their contribution to the development of a coherent, affordable, and scientifically valuable program for solar and space physics research by the United States; and

(2) the recommendations of the CSSP represent a responsible and affordable guideline for the conduct of the United States solar and space physics research program through the year 2000.

SEC. 2. ENDORSEMENT OF CSSP RECOMMENDATIONS.

(a) GOALS FOR SOLAR AND SPACE PHYSICS PROGRAM.—The Congress endorses the following goals for the solar and space physics program, as set forth in the CSSP report:

(1) Understanding the physics of the Sun, of the heliosphere, and of the magnetospheres, ionospheres, and upper atmospheres of the Earth, other planets, and comets.

(2) Studying the interactive processes that generate solar variations and linking these to the Earth, because such processes reveal basic physical mechanisms and have useful applications in many areas of human endeavor.

(b) PROGRAM GUIDELINES FOR SPACE AND SOLAR PHYSICS RESEARCH.—The Congress endorses the following program guidelines for space and solar physics research, as set forth in the CSSP report:

(1) A balanced program is necessary to advance understanding in each of the disciplines of solar and space physics (solar and heliospheric physics, magnetospheric plasma physics, and upper atmospheric and ionospheric physics).

(2) The need for (A) major missions for detailed studies on a global scale; (B) moderate missions for specific, detailed problems; (C) quick response techniques and experiments of opportunity (best accommodated by suborbital flights and the shuttle); and (D) facility-class instruments that will evolve toward space platforms.

(3) The need to reestablish a level of flight activity sufficient to address significant scientific issues.

(4) A plan accommodated within a realistic budget level that can remain stable over a period of several years and allow for the planning and analysis essential for a successful research program.

(5) An average annual funding level of approximately $400,000,000 (in fiscal year 1984 dollars), which would be sufficient to achieve the highest objectives in solar and space physics between the year 1988 and the year 2000.

(c) MAJOR MISSIONS.—The Congress endorses the following major missions, as set forth in the CSSP report:

(1) Upper Atmosphere Research Satellite (UARS) (authorized in fiscal year 1985 for launch in 1989), which would analyze the chemistry, dynamics, and energy inputs and losses in the stratosphere and lower mesosphere.

(2) Solar Optical Telescope (SOT) (to be launched in 1990), which will observe levels in the solar atmosphere ranging from the photosphere to the transition region.

(3) International Solar Terrestrial Physics Program (ISTP) (to be launched between the year 1989 and the year 1993) which is the highest priority unfunded mission in the CSSP's report, and which is a multinational, multispacecraft mission to develop a comprehensive, global understanding of the generation and flow of energy from the Sun, through the interplanetary medium, and into the Earth's space environment.

(4) Solar Probe (SP) (to be launched in 1995), which is to study the unexplored region between 4 and 60 solar radii from the Sun.

(5) Solar Polar Orbiter (SPO) (to be launched in 2000), which is intended to study the three-dimensional properties of the heliosphere in greater detail.

(d) MODERATE, EXPLORER-CLASS MISSIONS.—The Congress endorses the recommendations of the CSSP's report for moderate, Explorer-class missions, which provide for an average of approximately one launch opportunity per year to be shared as appropriate by solar/heliospheric, magnetospheric, and upper atmosphere disciplines.

(e) ADDITIONAL PROGRAMS.—The Congress endorses the following additional program recommendations, as set forth in the CSSP report:

(1) Enhance current Shuttle/Spacelab programs in the discipline of solar and space physics research, especially in the field of active experiments/space plasma lab type missions, Spacelab/Sunlab instruments, and Spartans that make optimal use of shuttle capabilities.

(2) Develop facility-class instrumentation for first use on the Shuttle and later evolution into a Solar Terrestial Observatory and an Advanced Solar Observatory on Space Station/Platform and develop mission operations and data analysis plans for such observatories.

(3) Augment the solar terrestrial theory program by the fiscal year 1990.

(4) Support a computer modeling program, including access to supercomputers as recommended by the Physics Survey Committee of the National Academy of Sciences.

(5) Strengthen the research and analysis program.

(6) Maintain a stable suborbital program for flexible, quick-turn-around science objectives in upper atmospheric and space plasma physics.

(7) Continue mission operations and data analysis funding for existing spacecraft, in particular for studies of the heliosphere (IMP-8, Pioneer 10 and 11, Voyager 1 and 2), the terrestrial environment (ISEE 1 and 2, Dynamics Explorer, SME, and AMPTE), and the Sun (SMM).

(8) Develop the following enabling technologies for future major missions: a heat shield for a projected new start date of 1991 for the Solar Probe, and advanced propulsion for a projected new start date of the year 1997 for the Solar Polar Orbiter.

ALAGASCO COMMENDED FOR OPERATION ASSIST

HON. BEN ERDREICH

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. ERDREICH. Mr. Speaker, a major company in Jefferson County, AL, the Alabama Gas Corp., better known as Alagasco, initiated a project this past summer that takes a unique approach to solving two problems in our community—high winter heat bills for low-income residents and high unemployment among teenagers from low-income families.

The new program, called Operation Assist, provided free home weatherization for up to 20,000 low-income families throughout the State of Alabama, and hired and trained over 300 unemployed youths from low-income families to perform the necessary work over the summer. The free energy conservation measures included caulking, weather stripping, plastic window covers, foam sealant and water flow restrictions. Literature describing ways to further reduce winter heating costs was also given to each customer. The Targeted Jobs Tax Credit Program provided a Federal tax incentive for a portion of the $1.3 million program, which was funded by Alagasco.

Operation Assist is a wonderful example of how the public and private sectors, working together, can successfully fill a need within the community; in this case, two needs—increasing job opportunities for unemployed youth, and decreasing heating bills for low-income residents.

This effort by Alagasco to help both needy customers and youth is a continuing effort by the company over the years to provide better service to customers in our community. I would like to command Alagasco for initiating this unique response to community needs, and urge my colleagues in the House to use this outstanding project as a model for action in their districts.

Following is an editorial that appeared in the Birmingham News commending the Alabama Gas Corp. for initiating Operation Assist.

ASSISTING THE COMMUNITY

Alabama Gas Corp. is helping a lot of people this summer through its new "Operation Assist."

First there are the low-income customers of the gas company. Some 20,000 homes across the state will be weatherproofed this year to cut down on gas consumption during the winter. Alabama Gas crews are caulking windows, taping plastic weatherstripping in doorways and putting up plastic frames around windows for storm sheeting.

For some of these people, a $5 to $6 reduction in their heating bills will make a big difference. The whole system will benefit if less gas is wasted because of poor insulation.

Then there are the 350 Alabama teenagers hired to do the work. These 16- and 17-year-olds from poor families are earning minimum wage and getting valuable experience at holding a job. Their summer work will give them a reference they can use in seeking jobs in the future.

Alabama Gas is getting some help from the federal government in that part of the project. The Targeted Jobs Tax Credit Program provides a federal tax write-off of 85 percent of the first $3,000 paid to low-income youngsters hired for the summer.

All of us benefit when young people are started along the path to a productive life. The Alabama Gas program, in addition to helping poor families, is training workers who will be able to contribute to the community.

COMMEMORATION OF 84TH ANNIVERSARY OF ST. JOHN MEDICAL CENTER

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. APPLEGATE. Mr. Speaker, I am privileged today to bring to the attention of my colleagues in the Congress the 84th anniversary of St. John Medical Center in Steubenville, OH. This facility, which began as Gill Memorial Hospital, was the first institution to offer professional hospital services to the sick and injured in Steubenville.

The roots of St. John Medical Center go back to the turn of the century, when Mr. J.J. Gill founded the hospital in May 1901. The Sisters of St. Francis of Sylvania, OH assumed control of the 30-bed hospital in 1931. The new St. John Hospital was built to meet the pressing needs for hospital beds for the community and was opened in September 1960. Since that time, St. John Medical Center has developed into a major community health resource by providing medical, surgical, psychiatric, and pediatric services, through community-centered planning. Today, the hospital, under the direction of Sister Alice Warrick, is committed to ensuring the utmost in quality of care rendered.

The Sisters of St. Francis and the board of trustees are dedicated to the philosophy that: St. John Medical Center, as a Catholic hospital, is an extension of Christ's healing ministry through participation in the mission of the church. Its purpose is to promote Christian community and enhance the dignity of persons by providing optimal health care services which contribute to the physical, psychological, social, intellectual, and spiritual well-being of all people served.

Mr. Speaker, I am particularly pleased to have my colleagues be aware of this outstanding medical facility because I was there to participate in the groundbreaking and later, at the dedication. I hope you will all join me in applauding the dedicated Sisters who attend to the well-being of their fellow citizens in need. I am honored to extend my utmost recognition to St. John Medical Center is Steubenville in com-

memorating the 84th anniversary of its founding.

A TRIBUTE TO THE FIRST WARD COMMUNITY CENTER: 50 YEARS OF EXCELLENT SERVICE TO THE SAGINAW COMMUNITY

HON. BOB TRAXLER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. TRAXLER. Mr. Speaker, I rise today to salute the golden anniversary of the First Ward Community Center—a dynamic community organization which has served the city of Saginaw for the past 50 years. Although the First Ward Community Center has grown and changed over five decades, the mission of the organization has remained the same: To improve and expand the opportunities of the people it serves.

The First Ward Community Center began during the Great Depression when the Service Club of Saginaw founded the community center with the purpose of improving "undesirable conditions in the community." The community center started out with a soup kitchen to serve the needy of the Depression. By the time of the turbulent 1960's, the First Ward Community Center was providing a wide range of services ranging from adult education to acting as a vital communication link between the black and white communities. The community center has also acted as a conduit between Washington and Saginaw as initial studies and surveys were made at the community center to prove the need for subsidized housing.

Today, the First Ward Community Center is a hub of activity providing educational, recreational, and cultural activities. The center fulfills its commitment to education with a satellite campus of Delta College, a branch of the Saginaw Public Library and preschool classes. In addition to the educational functions, the community center has responded to high unemployment in the community by offering job placement and career counseling.

To understand the success of the First Ward Community Center, it is important to look at the people who have made it what it is today. The first executive director of the community center, Edith B. Baille, guided the center for its first three decades from 1935–65. Her successor, Ruben Daniels, has served as executive director for the past 30 years. The community center's growth and expansion from 1965–85 is a tribute to the hard work and dedication of Ruben Daniels, and his ongoing commitment to unity, progress, and opportunity. In addition to celebrating the 50th anniversary of the First Ward Community Center, I would like to take time to honor Ruben Daniels who has seen the community center through changing times and has always met the challenges presented to him.

In its golden year, the First Ward Community Center can look back at a past rich in community service and look forward to a future shining with promise and growth. I take great pride in congratulating the First Ward Community Center here today and ask my colleagues to join with me in saluting the anniversary of this organization which has touched the lives of so many over the past 50 years.

BOB WALKER'S LETTER ON ARMS CONTROL AND THE CHURCH

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. HYDE. Mr. Speaker, a topic of great interest and importance is that of arms control. The various churches and their clergy are speaking out increasingly and exercising their considerable influence on public opinion.

A pointed and well reasoned response to recent statements emanating from the Presbyterian church has been prepared by our colleague, Representative ROBERT WALKER, Republican from Pennsylvania, which I commend to everyone's attention:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, August 2, 1985.

Mr. JAMES E. ANDREWS,
Stated Clerk, Office of the General Assembly, Presbyterian Church, (U.S.A.), Atlanta, GA.

DEAR MR. ANDREWS: It is with the utmost concern and respect that we, the undersigned Presbyterian Members of Congress, write to you to express our observations concerning various statements and proclamations by the General Assembly of the Presbyterian Church (U.S.A.) relative to our nation's defense and foreign policy. Because of our moral obligation to enact policies which promote peace with justice, we look to the guidance of the Church for direction and moral sustenance. However, to be direct, when we feel that statements made by the General Assembly are based on misperceptions which have too often become accepted as truths, we feel compelled to address ourselves to those inaccuracies.

Over the past several years, the General Assembly and various agencies of the Presbyterian Church (U.S.A.) have repeatedly witnessed to the aspects of U.S. policy toward Central America, strategic deterrence, human rights, and U.S.-Soviet relations. These are crucial issues in our time, and they are certainly areas where the Church should address itself. However, we respectfully, but strongly, differ on the conclusions which the General Assembly has reached in many of these areas and with the perceptions on which these conclusions appear to be based. For that reason, we feel compelled to express our dissent in several areas where the Church recently has spoken.

HUMAN RIGHTS AND UNITED STATES-SOVIET RELATIONS

The Assembly called upon governmental officials in both countries: ". . . to refrain from the rhetoric of implacable opposition and enmity through which each casts the other in the role of an unchanging and unchangeable threat to basic existence and security and to abandon the pattern in which each interprets every problem or tension anywhere in the world as a demonically inspired work of the other." (UPC, 1980, p. 292) Church and Society: Social Teachings of the Presbyterian Church, November/December 1984, p. 77.

The 1982 UPC Assembly even addressed these themes in succession when it called first upon Presbyterians to reexamine their 'own perceptions and attitudes regarding the people of the Soviet Union, acknowledging that easy acquiescence in popular rhetoric and sterotyped perceptions can result in the sins of bearing false witness and self-righteousness.' (UPC, 1982, p. 292) Church and Society: Social Teachings of the Presbyterian Church, November/December 1984, p. 77.

The struggle for human rights and individual freedom around the world has been rigorous and is ongoing. Since World War II, U.S. policy relative to human rights in particular has been to promote the development of democratic systems and to oppose the spread of international communism through economic, diplomatic and, as a last resort, military actions. We feel that the daily oppression of human beings under international communism speaks for itself, and the tragic witnesses to this form of human degradation, from Alexander Solzhenitsyn to the boat people of Vietnam and the mass starvation in Ethiopia, serve as sadly eloquent reminders of the millions of persons who have been slaughtered, brutalized, oppressed, displaced and torn by communism. The General Assembly has movingly, at times, spoken for those abused persons. However, the General Assembly also seems to suggest that U.S.-Soviet relations should not be based on the question of human freedom, but rather on an apocalyptic view of the threat of nuclear war and the implied need to smooth over very meaningful differences between our countries to attain an aura of peace, even as the communist nations of the world are at war with their own people.

The focus of the human rights policy of the General Assembly of the Presbyterian Church (U.S.A.) seems to be on Latin America and South Africa, areas where we share grave concerns over human rights, also, although we differ with your perspective. The statements made by the General Assembly suggest that the most urgent human rights concerns are those in nations which are strategically allied with the United States, such as South Africa and El Salvador. However, when the General Assembly speaks on U.S. relations with the Soviet Union, the emphasis is not on human rights but rather on the need for Americans to be "less antagonistic" toward the Soviet Union and to question the morality of our resolve to defend our free, democratic nation. Such a policy is ultimately self-defeating and is based on the inaccurate belief that, as a nation, we can expect perfection of countries which choose to be allies of the western democracies, but that we are self-righteous and hypocritical if we denounce even the most atrocious actions of governments who declare themselves as our enemies.

We also submit that the General Assembly has not shown adequate concern for religious freedom in that it has failed to speak out against the manipulation of the Church by totalitarian governments, particularly by the Soviet Union and Nicaragua. The General Assembly does not seem to be sensitive

to the tactics which totalitarian governments have used, and continue to use, to subvert the Church and then use the Church for that government's political gain. This is a crucial matter, and is a concern which we wish to convey with the strongest emphasis.

STRATEGIC DETERRENCE

Since the use of these (nuclear) weapons constitutes a human action that would result in the destruction of all humanity, the act in itself would be both blasphemous and idolatrous in the ultimate sense, a human abrogation of final judgment that belongs only to God. As their actual use can therefore have no justification we must question whether their very existence is morally acceptable. . . . What deep form of disobedience is it that causes us to express our idolatry of national security in terms that echo the prohibition of the Second Commandment (against graven images)? Church and Society: Social Teachings of the Presbyterian Church, November/December 1984, p. 79.

Our government has an urgent moral imperative to defend this country. There is no conceivable way at this moment to defend the country other than through the existence of a modern strategic nuclear deterrent force. That is an unpleasant reality, at best, but it is a fact which would be grossly irresponsible to ignore. The Strategic Defense Initiative offers us the hope of a non-nuclear defense, but, at this time, all sides agree that such a concept is currently not available for use.

We, as legislators, have a sworn duty to preserve the freedom of the American people and to defend this country against its enemies. One cannot possibly scan the headlines of the morning newspaper and come to the conclusion that our enemies are created or ethereal. We respectfully submit that there is not only a moral case for deterrence, there is a moral imperative. The enemies of the United States establish the level of violence and world conflict; the United States and our allies either respond or we lose. That means that individual people lose freedom and their basic human rights; it does not simply mean that the United States loses prestige or power. A quote from our colleague, Congressman Henry Hyde of Illinois, who authored a similar letter to the American Catholic Bishops with this statement put it very well when he said, "Peace without justice is moral violence." In other words, peace at any price cannot be real peace.

CENTRAL AMERICA

Present U.S. policy in Central America continues to be focused on the perceived threat of an expanding Soviet influence in the region, with the virtual neglect of those fundamental economic and social-political reforms that are preconditions to a peaceful resolution of the civil war that for several decades has torn apart that region; Presbyterian Church, (U.S.A.), "General Assembly Resolution on Central America (Excerpts), June, 1984," Peacemaking II: U.S. Religious Statements on Central America, July 1984, p. 35.

The present administration has called for increasing military aid, thereby increasing the military activity and conflict in the region; Presbyterian Church, (U.S.A.), "General Assembly Resolution on Central America (Excerpts), June, 1984," Peacemaking II: U.S. Religious Statements on Central America, July 1984, p. 35.

Our nation is providing support for the powers of death in Central America. This has occurred because we have often been motivated by concern for national security rather than by concern for justice. (PCUSA, 1983, p. 738) Church and Society: Social Teachings of the Presbyterian Church, November/December 1984, p. 81.

The views of the General Assembly of the Presbyterian Church (U.S.A.) on Central America are not cognizant of the overall progress of democracy in Central America nor of the expanding military nature of the international communist presence in that struggling region. We agree that economic reforms and development are essential in Central America. For that reason we commend the Reagan Administration for its emphasis on economic assistance and its support for land reform in El Salvador. We share the General Assembly's concern for human rights, including the termination of all politically-inspired murders and disappearances, judicial reform, and political enfranchisement, yet the General Assembly does not seem to recognize that, in El Salvador, the progress toward respect for those rights has been dramatic during the years of the Reagan Administration, while in Nicaragua, a democratically-based revolution has been subverted and reversed by Marxist-Leninists engaged in a growing military alliance with the Soviet Union and Cuba and world terrorist organization such as the Red Brigade.

Of parallel importance to us is the growing practice by which agencies of the Church lobby in Washington to defeat policies which provide an effective strategic deterrent and promote democracy in Central America. We have noticed with some dismay that the Presbyterian Advocates on Central America, created at the 1983 general convention of the Presbyterian Church (U.S.A.), has been one of the most visible and active groups on Capitol Hill who are supporters of the Nicaraguan Government and have lobbied against providing any kind of aid to those persons who are struggling against the consolidation of an oppressive, expansionist, communist regime in Nicaragua. We would instead urge the General Assembly to pay heed to the voices of Presbyterians across the country, including those represented by the organization known as Presbyterians for Democracy and Religious Freedom.

We hope that these concerns will be taken seriously by the General Assembly as they are sincerely intentioned and deeply felt. We also wish to reiterate that we offer these views with the greatest respect and with the real hope that we, as Members of Congress, will be able to work with the General Assembly in the future on these issues of profound importance.

Cordially,

Jerry Solomon, Hal Daub, Frank R. Wolf, Marvin Leath, Bill Emerson, John J. Duncan, J. Alex McMillan, Howard Coble, Dick Armey, Elwood Hillis.

Bob Walker, Guy Vander Jagt, Bill Broomfield, Marjorie Holt, Samuel Stratton, Thomas N. Kindness, Richard Shelby, Carlos Moorhead, Jerry Lewis, Dick Schulze.

THE UNITED NATIONS

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. SOLOMON. Mr. Speaker, having been appointed as an American Delegate to the U.N. General Assembly this fall, I have been immersing myself in studying the history and procedures of that organization. It is no secret to anyone in this House that public support for the United Nations has fallen to an all-time low—and not without justification either. If we need to set a date when the United Nations began to lose the public support it had so long enjoyed I would suggest we consider the events of 1975.

Ten years ago this week the self-proclaimed Field Marshal and President of Uganda, Idi Amin, addressed the U.N. General Assembly, in which he called—and I quote—"for the expulsion of Israel from the United Nations and the extinction of Israel as a state * * *." This call for genocide, as well as Idi Amin's description of the United States as having been—quote—"colonized by the Zionists" was answered by a standing ovation in the U.N. General Assembly. And within a matter of several weeks, the U.N. General Assembly was on record as having declared that—quote—"Zionism is a form of racism and racial discrimination * * * a racialist and imperialist ideology." There also followed the ritualistic denunciation of Israel as a threat to world peace.

The events of 10 years ago this week were particularly graphic to be sure, but, unfortunately, they have not proven to be isolated or infrequent. A great many Americans are now asking if American interests and, indeed, the interests of all people who are seeking freedom and justice can be served by our continued participation in what has become a propaganda spectacle of Babylonian dimensions.

The voice of the American people is being heard in Congress. The United Nations has been put on notice that American financial support for that organization will start to diminish in fiscal year 1987 if reforms are not forthcoming. And I pledge to keep my colleagues and the American people informed about the 40th session of the U.N. General Assembly that is presently underway.

American patience is wearing thin—the generosity of the American people has been abused long enough. This is the message that I am taking to New York. And I will keep you posted on how this message is received.

BILL THOMAS: A LIFETIME OF COMMUNITY SERVICE

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. LEHMAN of Florida. Mr. Speaker, every community needs people committed to making it a better place in which to live. Such a man is Bill Thomas of Miami Shores.

Bill has been my friend since we both taught high school at Miami Edison Senior High. We've kept in touch ever since. In those days, Bill was dean of boys. He mastered ways to control behavior in school without resorting to cruel and unusual punishment. Our three children attended Miami Edison and benefited from Bill Thomas' friendship and school administrative ability.

Later, Bill became principal of Miami Norland Senior High, a school with a student body that changed rapidly after North Miami Senior High was opened. Norland represented the pluralistic society that is south Florida, and Bill had to handle all the problems and tensions that go along with this kind of situation. He approached the task with typical skill and commitment.

Now Bill Thomas is retired, but happily not retired from his service to our community. I would like to share with my colleagues an article from the Miami Herald which further explains the activities of my good friend and community servant.

The article follows:

RETIRED TEACHER PATROLS SHORES ARMED WITH A CB, SHARP EYES

(By Fabiola Santiago)

Every Wednesday at noon, Bill Thomas dons a red-and-white cap and sets up a CB radio in his beige Nissan with the "Mr. T" license plate.

Then he sticks three magnetic signs that say "Miami Shores Mobile Crimewatch" on the sides and rear of the car, and he's off to ride around well-groomed streets, narrow shady alleys and busy parking lots.

He watches out for strangers or situations that don't seem quite right. He drives by the houses of neighbors on vacation. Mostly, he just lets everyone know that someone's around keeping an eye on things.

"Just another set of eyes, my little contribution to Miami Shores," he says of his volunteer work in the city's citizens' patrol program, a technique catching on in other Dade communities as well.

A native, Miamian, Thomas, 55, retired two years ago after 32 years as a social studies teacher, school principal and administrator in the Dade County school system.

Now a grandfather of five, he joined the Shores mobile patrol when it was formed by the Village Council in January to help police combat crime. With 96 volunteers, ages 18 to 83, the patrol operates out of the Village Hall's attic, where a "base" operator monitors the CBs and calls the police as needed.

Thomas has already logged more than 140 hours. He pays for his own gas, and for the expense he gets a 12-cents-a-mile deduction in his income tax.

Like the others, he usually goes out on patrol with another volunteer who writes down descriptions of suspicious cars and people. They are not supposed to leave their car. They are told only to "observe and report."

Wednesday, Thomas spotted a young man "suspiciously" walking along a tucked-away alley behind two rows of homes. Thomas passed by him once, then twice, following his trail.

"He's made us out," he says. "We are going to hound him."

The man disappeared after crossing a major intersection, but Thomas' detailed description of him will be kept at the office; he could become a suspect if a crime is committed in the area.

"If people did something about crime instead of just complaining about it, we would see more action," he says. "In some small way, I'm helping. It makes me feel better."

COOL, CA, CELEBRATES 100 YEARS

HON. GENE CHAPPIE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. CHAPPIE. Mr. Speaker, I want to bring to my colleagues' attention an important day in the history of Cool, CA. This Sunday, October 6, 1985, the townspeople will kick up their heels to mark the 100th birthday of the community.

The local merchants association and townspeople have worked hard to plan appropriate festivities. Beginning bright and early on Sunday, there will be a pig raffle, a greased pole climbing contest, dancing in the streets, a drawing for a Remington rifle, and lots of conspicuous consumption of good old-fashioned cooking.

Cool will always have a special place in my heart. My family has lived in the area since 1920. I watched my children grow up there and can remember the one-room schoolhouse they attended. My ranch near Cool is still a favorite retreat from the hectic pace of Washington, DC.

For those of my colleagues who haven't visited Cool, let me tell you something about it. The town is located in the foothills of the Sierras. There isn't much of the original town still standing; all that's left is a portion of the general store that was built in 1883. Cool historians say the first settlers were discouraged gold miners who came to the area to make their fortunes in farming and ranching in the 1850's.

The community got its name from Aaron Cool, a circuit riding minister who preached on Sundays at the local rest stop and watering hole. The town was first called Cave Valley, but when the townspeople applied for a post office, they were informed they couldn't use it because another town already claimed the name. The story goes that a public meeting was held to decide a new name for the town. After hours of heated debate and debauchery, someone got up and said the town should be named "Cool," after the preacher. The name stuck. To my knowledge, no other community in the world has the same name.

Like many small communities in the West, Cool has had its share of prominent citizens, shady characters and hard-working folk. The town's history is rich with stories about people having good old-fashioned fun.

Prohibition was a lively time for Cool. I'm convinced some of the best moonshine in the country was produced there. Floyd Leach's moonshine was especially unforgettable—the kind of home brew that could make the rabbits roost with the turkeys.

Many of the local families had their own stills. The revenuers, that's what we called the law enforcement people, tried their best to make the people stop drinking, but without much success. I still remember the time they came to our ranch with the bad news. It was a sad day when I had to shoot the family still full of holes and bury it.

Some of the most telling stories about Cool are those about the local post office. As my colleagues know, every small town that's anything has a post office.

Back in 1910, the post office was housed in a two-story framed building in the downtown area. On the second floor of the building was a dance hall, and according to at least one old-timer, it rocked and shaked on Saturday nights as patrons danced the night away. Decked out in their best duds, cowboys, miners, and farmers from around the countryside came to town to whet their whistle and have some fun. After a few drinks, insults were exchanged and a bruising fight followed.

All that dancing must have taken its toll on the post office building, because a few years later, it was moved across the street to a new location. I'm sure there were those who missed the old place, but the postmaster made up for it with a stroke a genius. Winning the hearts of many, Mrs. Rose Ashley installed a large chewing tobacco cutter in the building so that when the local residents picked up their mail, they could also get a cut of chew.

The town has changed over the years, but like my famous dago red wine, it gets better with age. The population has grown and new buildings have been constructed. You won't find chewing tobacco in the local post office any longer either, but you can still find the friendship and community spirit that's associated with a small town.

Sunday is a proud day in the town's history, and I want to salute all those who helped make Cool's centennial what surely will be a memorable event. Buon compleanni.

IDEA OF NORFOLK SOUTHERN TAKEOVER GATHERING STEAM WITH CONRAIL WORKERS

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. BROYHILL. Mr. Speaker, there has been a great deal of discussion and pointed debate over the proposed sale of Conrail.

Projections as to Conrail's future viability and assessments of the competitive effect of a sale of Norfolk Southern are as plentiful as they are varied.

In the midst of this ongoing debate, one thing is becoming abundantly clear—there is no certainty as to Conrail's financial viability as a stand alone company in the long term. It would be a precarious gamble to send Conrail off into the private sector, without any assurance that it could survive its own historic declining traffic pattern, let alone any downturn in the economy of the region it serves.

This very basic concern should guide our ultimate decision on how best to sell Conrail. This fact is one which the employees of Conrail, who have sacrificed to keep Conrail afloat, are focusing on as well.

As the following letter authored by the President of the Brotherhood of Locomotive Engineers, John F. Sytsma, and the article from the Newark Star-Ledger indicate, there is strong sentiment that a Norfolk Southern purchase will bring increased freight to the Conrail system, better service options and reduced costs to shippers, job security to Conrail's work force, and assurance to the region that essential rail service would remain.

Simply put, Conrail needs Norfolk Southern to survive and many within the ranks of rail labor prefer this purchase option. I commend the following to my colleagues' reading.

BROTHERHOOD OF LOCOMOTIVE ENGINEERS,
Cleveland, OH, September 10, 1985.

CONRAIL MEMBERS.

DEAR CONRAIL MEMBER: One of the most pressing problems facing the BLE today involves the position we should take on the sale of Conrail. The problem is especially pressing because whatever happens to Conrail could possibly mean job losses, lack of security and dislocations for our Conrail members.

The only Conrail plan that would mean none of the foregoing would be for Conrail to continue to be a ward of the United States government, but this does not appear to be in the cards. Some Pennsylvania congressmen have endorsed such a solution, and I have also tried to support maintaining the status quo, but to no avail. We are greatly outnumbered by those who advocate selling the railroad.

The Norfolk Southern sale, as proposed by the Department of Transportation and endorsed by the Reagan Administration, is stalled in Congress. Norfolk Southern has been very honest about admitting that if they took over the railroad there would be some layoffs and dislocations (sometimes we overlook the fact that current Conrail management is no piker in the field of layoffs and dislocations—employment on Conrail has dropped from over 100,000 to less than 40,000 since Conrail was formed, and thousands of miles of track have been eliminated or downgraded). The good aspect of a sale to Norfolk Southern is that NS is a rich railroad and could maintain the Conrail lines through bad economic times. This could not be guaranteed if the railroad is sold public (the Morgan Stanley proposal).

Under the Morgan Stanley proposal Conrail would operate as an independent railroad, hopefully in the same dimensions as it operates today. This would mean a minimum of layoffs and dislocations for today, but how about tomorrow?

Currently we are on record with the Railway Labor Executives' Association as endorsing the Morgan Stanley proposal. This does not mean, however, that I am wedded to that position. I wish to assure you of our flexibility on the issue. In the final analysis we will place our legislative and economic strength behind the plan that will be most advantageous to you, our Conrail member.

If you have any comments, ideas and suggestions concerning the Conrail sale, please write to me. Your thinking will be very helpful to me in the formulation of future positions in this matter.

Fraternally yours,

JOHN F. SYTSMA,
President.

[From the Star-Ledger, Sept. 26, 1985]

IDEA OF NORFOLK SOUTHERN TAKEOVER GATHERING STEAM WITH CONRAIL WORKERS

(By Guy T. Baehr)

Sentiment among some of Conrail's 30,000 employes appears to be shifting in favor of a takeover of the huge, federally owned Northeast freight railroad by Norfolk Southern, the Virginia/based railroad that has been seeking to buy Conrail for more than a year.

In a group interview earlier this week, 15 rank-and-file Conrail workers from northern New Jersey said they believe a merger of their railroad with Norfolk Southern would produce a stronger company and give them the best chance of keeping their jobs over the long term.

The New Jersey workers, including three local union officials, said such sentiment has been spreading rapidly and that they are planning a petition drive aimed at their unions' national leadership and their representatives in Congress. About 2,000 Conrail employes work in New Jersey, where Conrail provides more than 90 percent of all rail freight service.

Meanwhile, Norfolk Southern officials said yesterday they received more than 500 replies from Conrail workers in New Jersey, Delaware, Pennsylvania, Michigan and Ohio responding to full-page advertisements placed Monday in 71 daily newspapers, including The Star-Ledger, covering most of Conrail's 16-state territory.

The advertisement, addressed to Conrail employes, said, "Many Conrail employes have told us that they have been kept in the dark about Norfolk Southern by Conrail management and some of their union representatives."

It showed a letter from Norfolk Southern's chairman, Robert B. Claytor, and president, Harold H. Hall, seeking their support and included a coupon for more information.

Top officials of unions representing most of Conrail's workers have opposed Norfolk Southern's bid, and most have endorsed a competing plan devised by Conrail's management and the investment banking firm of Morgan Stanley to maintain Conrail's independence by selling the federal government's 85 percent interest in Conrail to the public through a public stock offering.

The union executives have said they fear a merger between Conrail and Norfolk Southern would cost union jobs when overlapping routes and duplicative yards, shops and offices are closed.

But the New Jersey workers said their primary concern is not loss of jobs due to a merger. They say far more jobs, including their own, will be jeopardized if Conrail continues to lose business as it has since it was formed in 1976.

They said about 60,000 Conrail employes have lost their jobs over the last nine years and more will be lost if Conrail's freight business is not expanded through a merger with Norfolk Southern. Such a merger would open north-south routes to complement Conrail's existing east-west routes, they said.

"You're not talking to a bunch of radical, disgruntled employes," said one worker. "We're concerned with our future, and the only way to guarantee our jobs is by increasing the amount of freight we carry. So far Conrail has kept losing business because rail freight in this region is going down. The only way we see to keep our jobs is to merge with Norfolk Southern and develop some new routes and new business."

A rank-and-file revolt on the issue among Conrail union members could be significant in breaking the current congressional stalemate on the sale of Conrail, because many congressmen and local officials have followed labor leadership in opposing Norfolk Southern's bid.

Neither the Norfolk Southern nor the Morgan Stanley plan has generated much enthusiasm in Congress, and Sen. Howard M. Metzenbaum (D-Ohio) said Tuesday that, through a filibuster, he would seek to kill any attempt to sell Conrail to anyone.

Metzenbaum said he regards the $1.2 billion price offered by both bidders as too low and added that Conrail is not costing the federal government money now, so there is no pressing need to sell it.

One of the New Jersey workers, a local official with the International Brotherhood of Electrical Workers (IBEW), said, "What has annoyed many Conrail employes is that the union executives never asked our opinion. They never took a vote or a poll or even held a meeting to ask how we felt."

Congress is under the impression that labor favors the Morgan Stanley proposal 100 percent because that's what the union leadership told them. But it isn't so.

"When I asked my union for information on the two proposals, they just sent me a copy of the Morgan Stanley proposal and blank petitions endorsing it. To my knowledge, those petitions never got any rank-and-file signatures in our region," said the local official, who asked that he and other members of the group not be identified until local organizing efforts are further advanced.

Members of the group identified themselves as members of the IBEW, the International Association of Machinists & Aerospace Workers, the International Brotherhood of Firemen and Oilers, the Brotherhood of Railway Carmen and the Association of Airline and Railroad Supervisors.

Another worker said local sentiment began to shift three or four months ago after one union member called Washington to seek information from the U.S. Department of Transportation (DOT), which is backing Norfolk Southern's bid as part of the Reagan Administration's effort to return control to the private sector.

In addition, he said members of the group contacted Norfolk Southern directly and have received information as well as hats bearing Norfolk Southern's logo. Several of the workers wore the hats during the after-work interview and said they also wear them at work.

TRIBUTE TO SAINT XAVIER COLLEGE SCHOOL OF NURSING

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. RUSSO. Mr. Speaker, today I would like to pay tribute and congratulate the Saint Xavier College School of Nursing on the occasion of its 50th anniversary this month. This outstanding facility in Chicago has for five decades prepared college educated professional nurses. The respected Sisters of Mercy, who have made countless other contributions to Chicago, designed the program, the first nursing program in the State of Illinois to be officially accredited by the National League for Nursing, and to this day both its undergraduate and graduate nursing programs are fully accredited.

When we look back to those early days we can reflect on the success attained by this fine nursing program. In 1935 under the direction of Sister Timothea Hayes, who was the first chairperson of the department of nursing, four women entered the baccalaureate program of Saint Xavier College. These women subsequently were the graduates of the class of 1939: Mary Divine Brown McCormick (Mrs. Bernard); Genevieve Garvey Madherny (Mrs. George); June Grode Wilson (Mrs. Lesley), and Loretta Lang Neufeld (Mrs. Robert). Today this program has graduated over 2,200 professionally prepared nurses.

I know my colleagues join with me today in commending the School of Nursing of Saint Xavier on the occasion of its 50th anniversary and in thanking the skilled personnel and caring people who have contributed so much to the community through their dedication to excellence in education. I extend my own personal best wishes to those who will assemble October 19 and 20 to commemorate this auspicious occasion and to look forward to the continuing success of the Saint Xavier College School of Nursing.

FORTNEY'S COMPLAINT IGNORES STARK REALITY

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. HYDE. Mr. Speaker, permit me to respond to Representative PETE STARK'S recent mischaracterization of my nuclear test ban position—October 1 CONGRESSIONAL RECORD.

If my colleague from California will only read my substitute to House Joint Resolution 3, which in the October 1 CONGRESSIONAL RECORD, he will discover that I am not opposed to a verifiable comprehensive test ban [CTB]. Indeed, I support such a long-term goal, provided certain other arms control objectives are met first.

In listening to the debate on this issue, an old adage leaps to mind: "Don't put the cart before the horse." Unfortunately, that's what advocates of House Joint Resolution 3 are doing when they direct the President to resume posthaste negotiations with the Soviet Union on a CTB. Common sense dictates that we strive for a CTB within the broader context of deep and verifiable arms reductions. The question of nuclear testing must be linked to successful arms reductions efforts in Geneva. In other words, meaningful arms reductions must precede rather than follow restrictions on nuclear testing.

Prematurely prohibiting nuclear testing would seriously jeopardize our nuclear deterrent capability which has given America and its Western European allies 40 years of peace. Informed, expert witnesses have told Congress that without continued testing we have no assurances that our nuclear capability would remain reliable. My substitute recognizes these stark strategic realities and offers the House a viable alternative to House Joint Resolution 3.

I also must take isssue with my California colleague's contention that this administration totally disregards the value of limiting Soviet military programs to enhance our security.

Mr. STARK should remember that it was Jimmy Carter, not Ronald Reagan, who suspended CTB negotiations with the Soviets. President Carter did this for many reasons, among them being the brutal Soviet invasion of Afghanistan. Moreover, I believe that our negotiating team's efforts in Geneva to limit Soviet nuclear force modernization are being conducted with the utmost seriousness and that this administration is carefully weighing the new Soviet proposals to reduce arms and limit nuclear charges.

Mr. STARK and others also argued that the language of House Joint Resolution 3 mimics the legislation passed by the Senate on June 20, 1984. In point of fact, the Senate did not pass exactly the same language as contained in House Joint Resolution 3. Instead, the Senate passed an amendment to the Defense authorization bill—not a separate, free-standing bill on arms control—which expressed the sense of Congress that the President propose the immediate resumption of negotiations toward a CTB. House Joint Resolution 3 contains no sense of Congress language whatsoever. I also remind my colleagues that the Senate amendment never became public law.

Too many responsible and knowledgeable persons have raised serious questions about our ability to verify compliance with any such treaties. In our zeal to get a treaty ratified, ought not ordinary prudence require that verification be clearly available to all sides?

Advocates of a test ban treaty—verifiable or not—fault this administration for what they believe to be excessive cynicism toward Soviet compliance. Our national security depends on a clear-eyed assessment of the realities of arms control, and that requires mutual, verifiable and military significant reductions in nuclear weapons as a condition precedent to any test ban.

THE CZECHOSLOVAKIAN BORDER INCIDENT

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. SOLOMON. Mr. Speaker, last spring this House went on record condemning the Soviet Union for the brutal and unwarranted murder of U.S. Army Maj. Arthur Nicholson, who was on a routine patrol mission in East Germany. As that resolution was considered by the House, myself and other colleagues pointed out that the murder of Major Nicholson was not an isolated or uncommon event—that the murder of Major Nicholson was part and parcel of an ongoing effort by the Soviet Union and its Eastern European puppets to harass and intimidate American servicemen stationed along the Iron Curtain.

Now once again we are provided with evidence concerning the Soviet Union's hostility toward us. Last Saturday a Czechoslovakian jet entered West German airspace and fired at a U.S. Army helicopter on a routine border surveillance mission. This latest incident marked the 17th—let me repeat that, the 17th—border incursion of West German airspace by aircraft from the Warsaw Pact in the 6 months since the murder of Major Nicholson.

Once again we are reminded that behind all of Mr. Gorbachev's smiles and expressions of goodwill there remains a relentless hostility to the United States and to the human, social, and political values that we and our Western European Allies uphold. As the Reagan/Gorbachev summit conference draws closer, one would think that the Soviets and their proxies would at least temper their hostility if for no other reason than to manipulate public opinion. But so ingrained and irrational is their behavior that even a minimal demonstration of civility on their part seems to be impossible.

The timing of this latest episode is also interesting because it came on the eve of the Gorbachev visit to Paris—a diplomatic foray that French newspapers have appropriately christened as "Operation Seduction." It is time that the Soviet leader be put on notice: We and our allies are not impressed with a Soviet leader who smiles and wears well-tailored suits. Nor are we fooled by his soothing words in Time magazine when he rhapsodized about the beauty of the Swiss Alps—at a time when his own forces are raining death and destruction across the mountains of Afghanistan. What we want is concrete evidence that he is any different from the murderous thugs that have preceded him in the Kremlin. So far, not one shred of evidence to that effect has ever been found.

BAN THE STEEL JAW LEGHOLD TRAP

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. VENTO. Mr. Speaker, There was an article recently in the St. Paul Pioneer Press/Dispatch that I would like to call to the attention of my colleagues. This article, which I will submit for the record, gives an account of a 14-year-old Minneapolis boy who was playing in an old railroad yard and stumbled into a leghold animal trap. The boy managed to get free of the trap, but not before his foot was crushed and the skin was peeled off of his bones which resulted in the amputation of his toes.

Accidents such as these should not occur. This very unfortunate occurrence reenforces the need to outlaw these dangerous leg-hold traps. I am an original cosponsor of a bill introduced by my colleague from California, Mr. LANTOS, which would ban the use of the steel leghold trap. Many other nations have already banned this very dangerous trap, without dooming the trapping industry.

This trap painfully imprisons anything, or worse, anybody that triggers it. The power of the trap is devastating and it cannot discern between the front paw of a coyote, the hind leg of a German shepherd, or as in the case in Minnesota, the foot of a 14-year-old boy.

I have repeatedly sought new laws to prevent the use of such traps. The event discribed below simply underscores the importance of such laws.

[From the St. Paul Pioneer Press/Dispatch, Sept. 18, 1985]

BOY BLAMES TRAP IN LOSS OF TOES

(By Bill Gardner)

A 14-year-old Minneapolis boy playing in an old railroad yard stumbled into a leghold animal trap that mangled his foot and required the amputation Tuesday of four of his toes.

Doctors at Hennepin County Medical Center plan to do reconstructive surgery on the foot of August Katzung later this week.

"They hope they can save the foot, but they are telling us there is a very strong chance they will have to amputate more of the foot," said the boy's attorney, Curtis D. Smith.

The accident happened Saturday afternoon as Katzung was playing in the old Burlington Northern yards under U.S. 12 and adjacent to Bryn Mawr Meadows, Smith said.

Katzung was alone at the time and slid down a cement embankment right into the trap, Smith said. The boy managed to get out of it but his foot was crushed and the skin was peeled off the bones.

"He lost a tremendous amount of blood," said Smith. "When he was found, it was bare bones on the front of his foot."

The boy later told his father that a man with long white hair and a long white beard moved him from under a bridge to a spot about 15 yards away where he could be seen by passersby. Then the man left.

August's twin brother, Eric, and another boy were out looking for August and spotted him, according to Smith. They ran home for help, and August's father, Terry, called the paramedics.

Smith said he and the father searched the area Monday but were unable to find the trap. They did find the boy's shoe and sock.

"My suspicion is that somebody has been trapping down there and probably came along either Sunday morning or evening to check his trap and found that it had caught a sneaker, a very bloody sock and perhaps even some flesh," said Smith. "And I suspect he realized what had happened and simply picked up the trap and left." Smith said he has been told there are many raccoons, foxes and other small animals that live in the area. He also noticed a cardboard bed, an old blanket and a paperback novel together under the bridge.

"I suspect it's a transient who has made it his home, but I have no reason to believe he was the one who set the trap," Smith said.

Joggers use the area frequently, and Smith hopes someone may come forward who has seen a trapper. A Minneapolis ordinance outlaws animal traps within the city limits, he said.

Smith said he believes either Burlington Northern or Hennepin County owns the land where the accident took place, and he said he plans to file a lawsuit against the landowner and against whoever set the trap, assuming that person eventually is identified.

MEDICARE ABROAD: DON'T LEAVE HOME WITHOUT IT

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. BIAGGI. Mr. Speaker, today I am introducing legislation to address a major health fear now burdening our Nation's elderly. This legislation would, for the first time, extend Medicare coverage to elderly beneficiaries who live and travel outside of the United States and become seriously ill.

Specifically, my proposal would authorize the President to enter into agreements with foreign countries to establish reciprocal arrangements for health care. Realizing the considerable time it may take to negotiate these matters, this legislation would also authorize the Secretary of Health and Human Services to enter into temporary agreements to aid those elderly who become seriously ill while traveling outside of the United States.

Since 1977, we have entered into agreements with foreign countries in order to provide Social Security benefits to those living abroad, yet we do not extend the same coverage under Medicare. Presently, Medicare will only cover foreign emergency services in instances when travel between the 48 continental United States takes a person into Canada; and, hospital services needed while a person is traveling near a U.S. border, and a foreign hospital is the nearest place for treatment.

Senior citizens are an ever-growing segment of our population. In addition, the number of elderly who travel outside of this country greatly increases each year. Consider for example, that in 1984 an estimated 15 percent of all passports issued by the State Department were to persons 65 and over, involving some 668,000 senior citizens. Clearly, this large and ever-growing segment of our citizenry would greatly benefit from an extension of Medicare coverage.

For the benefit of my colleagues, I am inserting the full text of this bill into the RECORD. I believe it is imperative that we give all Medicare beneficiaries their benefits—at home and abroad.

H.R. —

A BILL To amend title XVIII of the Social Security Act to authorize the President to enter into reciprocal agreements for health care services furnished to medicare beneficiaries outside the United States

Be it enacted by the Senate and House of Repesentatives of the United States of America in Congress assembled, That part C of title XVIII of the Social Security Act is amended by adding at the end the following new section:

"INTERNATIONAL AGREEMENTS

"SEC. 1890. (a) The President is authorized to enter into agreements establishing reciprocal arrangements between the programs established by this title and the program of any foreign country under which similar services are provided directly to entitled individuals or under which insurance is provided to meet all or part of the expenses of entitled individuals for such services.

"(b) Any agreement establishing such a reciprocal arrangement pursuant to this section shall specify—

"(1) the nature and extent of payment to be made to or on behalf of (A) individuals entitled to benefits under this title for services covered under such title when such individuals are present in the foreign country and receive such services from persons who are authorized under the program of that foreign country to furnish them, and (B) individuals entitled to benefits under the program of that foreign country who receive such services in the United States from persons meeting such requirements or conditions as are required under such title;

"(2) such limitations on the nature and duration of services for which payment may be made in one country to individuals entitled to benefits under the program of the other country, as the President deems appropriate, except that no agreement shall authorize any individual to receive benefits in the United States on a reciprocal basis in excess of those provided for individuals entitled to benefits under this title;

"(3) such limitation on entitlement of individuals to benefits on a reciprocal basis under an agreement in the United States and in the foreign country, as the President deems appropriate, except that no agreement shall provide entitlement to benefits under this title in the United States for an individual who does not meet the requirements for entitlement applicable under such title with respect to age or medical condition;

"(4) the methods by which the cost of providing services to persons on a reciprocal basis shall be shared equitably by the persons receiving such services and by the respective programs of the United States and the foreign country; and

"(5) such other provisions, not inconsistent with this section, as the President deems appropriate.

"(c) The Secretary shall make rules and regulations and establish procedures which are reasonable and necessary to implement and administer any agreement which has been entered into in accordance with this section.

"(d) Pending the conclusion of an agreement under this section with a foreign country, the Secretary is authorized to enter into interim arrangements with any hopsital in that country which is accredited by the Joint Commission on Accreditation of Hospitals, or such other hospitals as the Secretary finds meet health and safety standards equivalent to those required under this title for hospitals in the United States and which are accredited in the foreign country concerned, under which payment may be made for inpatient hospital services, as defined in section 1861, to or on behalf of an individual who is entitled to such benefits under part A of this title. For purposes of making payment under such an interim arrangement, the Secretary shall use whichever of the methods provided for in section 1814(f) he finds appropriate, except that any payments made under part A of this title to the individual or to the hospital shall be reduced to the extent that the individual has no legal obligation to pay for any items or services furnished to such individual by reason of the laws of the foreign country in which the hospital is located or such individual's membership in an insurance plan that provides for payment for such items or services.".

THE INTRODUCTION OF AMENDMENTS OF THE FREEDOM OF INFORMATION ACT

HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. KINDNESS. Mr. Speaker, today I am introducing legislation which would amend the Freedom of Information Act (5 U.S.C. 552) to provide separate statutory procedures for the handling of requests for public disclosure of information submitted to Government agencies by business concerns.

This legislation is similar to, but differs in important respects from, bills pending in both Houses which would make a number of other changes in the Freedom of Information Act [FOIA]. I am pleased that several of my colleagues on the Government Operations Subcommittee on Government Information, which has jurisdiction over FOIA, have joined me today as cosponsors of this bill.

One aim of the bill is to discourage the use of the Freedom of Information Act by business concerns who burden the limited resources of Federal agencies by filing FOIA requests for information submitted to those agencies by their competitors. Another aim of the bill is to provide additional safeguards against ill-considered or inadvertant disclosure of information which would cause substantial competitive harm to the business concern which submitted the information. And last, but certainly not least, the bill attempts to achieve these aims without adding unduly to the time needed to process legitimate requests for such information filed by private citizens, the press, and public interest groups.

Truckloads of information are submitted annually to Federal Government agencies by business concerns for regulatory, licensing, procurement, and statistical purposes. Once submitted to the Government, that information becomes agency records and thereby subject to requests for disclosure made pursuant to the Freedom of Information Act.

The Freedom of Information Act is properly weighted toward disclosure of information. The general rule is that agency records must be disclosed unless the information contained therein falls within 1 of 9 exemptions. Records exempted from disclosure include national security information, law enforcement investigatory records, agencies' deliberative documents and information specifically exempted from disclosure by other statutes. One of those exemptions covers confidential business records whose disclosure would cause substantial competitive harm to the business concern which submitted them. Those exemptions authorize—they do not require—agencies to withhold agency records from the public.

If the agency decides to withhold the records, the requester may go to court and get de novo review of the agency's decision, rather than simply a determination of whether the agency's decision was arbitrary, capricious, or an abuse of discretion. In that litigation, the agency bears the burden of proving that the records withheld do fall within the asserted exemption. And, if the requester substantially prevails, the court may award reasonable attorney fees and other litigation costs incurred by the requester.

Placing the burden on the agency to justify withholding pursuant to the act's exemptions is proper as in most cases the justification for asserting a particular exemption is clearly within the knowledge of the agency to assert. However, that is not necessarily so in the case of information submitted by business concerns to the agency. Whether disclosure of that information will cause substantial competitive harm to the business concern which submitted it will require the agency to draw upon the knowledge of the submitter and possibly outside sources as well in order to make a proper determination.

To their credit, a number of Federal agencies have recognized these limitations and have, by agency rule, provided notice to submitters of business information when a request is made for disclosure of that information The submitter is then afforded an opportunity to provide reasons why these records should be withheld, if the submitter believes there is cause for withholding.

Unfortunately, the time limits for agency response under FOIA limit the opportunity for the submitter to prepare and provide a suitable justification to the agency for withholding, and they limit the opportunity for the agency to give careful consideration to the competing claims of submitter and requester. Ofttimes, submitters will race to the courthouse to seek an injunction against disclosure. In such a case, called a "Reverse-FOIA" action, the court is faced with the complicated question of what standard of review to apply to the case since the case does not arise under the FOIA but rather chapter 7 of the Administrative Procedure Act (5 U.S.C. et seq).

A recent U.S. Circuit Court of Appeals decision illustrates the unfortunate state of the law on that question. On May 25, 1984, the District of Columbia circuit issued an opinion in *National Organization of Women* v. *Social Security Administration,* 736 F.2d 727 (CADC, 1984), on the issue of whether the district court erred in granting a preliminary injunction against disclosure of equal employment opportunity reports based upon de novo review of the agency's action. In order to reach the decision, the court had to decide whether the fact-finding procedures of the agency were adequate. In the end, the three circuit judges agreed that the preliminary injunction was proper, but they disagreed over whether the agency's fact-finding procedures were adequate and thus over whether it was proper for the district court to have reviewed the agency's action de novo, citing several other cases in support of their different conclusions on this issue.

The legislation I am introducing today, then, would require agencies to provide timely notice to submitters who designate information claimed to be exempt from disclosure; would give the submitter 10 working days to provide its objections to disclosure to the agency; and would provide for de novo judicial review of the submitter's objections to disclosure.

The bill makes no change in the coverage of the business records exemption nor does it unduly lengthen the agency process for handling requests for business records. And, if the submitter seeks judicial review, the submitter bears the burden of justifying the claim of exemption.

The majority of cases do not go to court. The ones that do confront the court with a garden-variety of agency procedures which lengthens the litigation process while the litigators argue over what process the court should follow in determining whether the agencies process was adequate. Some standard operating procedures at the agency can only improve the processes there where most FOIA disputes are resolved.

This legislation represents a good faith effort to balance the legitimate claims of the business community with the policy of disclosure embodied in the Freedom of Information Act. Unlike most Government information, most business records submitted to Government agencies are generated outside of Government. The submitter thus retains an interest in the information supplied to Government agencies. Likewise, the public has a legitimate interest in whether those agencies are properly fulfilling their responsibilities which require the collection of such information. I believe that this bill strikes the proper balance between these legitimate interests.

Some have argued that this legislation is not necessary because of the dearth of horror stories of improper and damaging disclosures and because some agencies are already, by rule, providing notice and an opportunity for submitters to object to disclosure. Like the busy street with a school crossing which cries out for a traffic signal, I am not one to stand around and wait for a horror story to occur if reasonable means can be taken to make it less likely. I have also never been too comfortable with relying on the good graces of agencies, utilizing ofttimes ambiguous authority to do as much or as little as they think they can get away with.

Furthermore, the state of the law on agency and judicial review of requests for, and objections to, disclosure of business records is chaotic. Congress should step in and resolve the issues by creating separate statutory procedures for the handling of requests for records submitted by business concerns. This bill offers the ways in which to accomplish those ends and I hope that it will receive early and favorable consideration by the Congress.

LEBANON HOSTAGE CRISIS IN 566TH DAY

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. O'BRIEN. Mr. Speaker, today is the 566th day Americans have been held hostage in Lebanon.

William Buckley, a U.S. Foreign Service officer, was kidnaped on the streets of Beirut on March 16, 1985, 566 days ago today.

Father Lawrence Jenco has been held hostage in Lebanon for 269 days.

Terry Anderson, the Associated Press bureau chief, was taken hostage in Lebanon 201 days ago today.

Today marks the 128th day of captivity for David Jacobsen, director of the American University Hospital in Beirut.

Thomas Sutherland, dean of the American University School of Agriculture, was taken hostage in Lebanon 115 days ago.

Today also marks the 303d day since the kidnaping of Peter Kilburn, the American University librarian.

Mr. Speaker, the American hostage crisis in Lebanon is now in its 566th day. It won't be over until all six remaining Americans are returned free from harm.

PEACE IN THE PENTAGON OR PEACE IN THE WORLD

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. ASPIN. Mr. Speaker, the public demands that we wring wasteful spending out of the defense budget. So, we go out after costly coffee pots and overpriced wrenches. I will submit, however, that we may be in danger of missing the forest for the trees. Even if we completely eliminated every last one of the horrific overpricings exposed in recent years, we might still have a wasteful defense budget. For unless we tie our defense budget—regardless of its size—to a rational defense strategy, we are fooling ourselves and the public. Yes; we must demand efficient management of the Pentagon. But efficient management is not a defense policy.

As chairman of the Defense Policy Panel within the House Armed Services Committee, I plan to start next week a series of hearings that will try to step back from the details of the annual budget debates and take a longer view of where we are going in defense.

How can we decide if we need more or less growth in defense spending, or where to modernize our defense forces, or how to make use of developments in emerging technologies, or for that matter, any of the details of our defense policy, until we know clearly to what purpose these weapons will be used. When historians look back and record the mismanagement of American Defense, they may not refer to the $600 wrench, or the $7,000 coffee pot, or the interservice rivalry that plagues our Armed Forces. It may be recorded that we failed to develop a coherent national security policy and instead succumbed to a kind of Maginot line mentality—an irrelevant policy that spelled defeat.

It may also be recorded that the media missed one of the most important stories of our time. There has been no dearth of stories about cost overruns, or poorly managed programs, or weapons that consumed billions of dollars only to be canceled because they did not work. These are stories that should have been written.

There has been no lack of articles about the state of arms control negotiations, and the tensions within the Western Alliance over mutual defense policies. We can hardly be complacent about these issues either, and it was right that the media devote numerous op-ed columns and news stories to them.

But the press is not unlike the Congress. Each tends to deal with issues that are timely and a bit sexy. The hottest issues sell newspapers and win votes.

Perhaps it is for this reason that the press and the Congress have spent so little time examining the fundamental questions of national security policy. None of us wants to play fast and loose with national security. But there comes a time when we must stop being driven by day-to-day events. We must examine the enduring as well as the instant, the obscured as well as the obvious. It should be clear that we ignore the process of policy as well as the underpinnings of our policy at our own peril.

I am concerned that the link between policy and programs is tenuous at best.

It would seem logical that in developing new weapon systems, we would look primarily at the threat posed by Soviet weapons and at our theoretical framework for confronting those threats, that is, our strategy.

But all too often other considerations come to the fore. I will cite just three: interest groups within the services; the desire of engineers to push forward the threshold of technology; and the pressures to maintain defense employment.

There's a popular belief that greedy contractors foist toys upon the services for their own ends. But actually it is the various interest groups or constituencies within the services that commonly mandate new weapon systems. The Navy, for example, has its air warfare, surface warfare, and submarine constituencies, each of which demands its due. It's a bit like local politics; the mayor can't pave all the streets in one neighborhood and ignore the others—he must spread the paving money around all the wards. But the Pentagon shouldn't be run like city wards. The goal is not—or ought not to be—to gratify the submariners and the surface warfare types each year the budget is put together. Instead, we should be positioning our forces to most successfully cope with the Soviet threat. We saw the ward politics approach to Pentagon budgeting just a few weeks ago when a Pentagon directive notified the services to plan for lower funding levels over the next few years—and to assume that proportionate cuts would be taken from each service. Why proportionate? Because that is the easiest way to keep peace in the wards. But it is not the way to set priorities. It is not the way to determine where the threat is greatest. Yes; it keeps peace in the Pentagon. But we ought to be keeping peace in the world.

A second problem is that posed by the desires of engineers to push forward the thresholds of technology. We produce exceedingly sophisticated military gear. That sophistication is costly. The common wisdom is that we need the sophistication to offset the Soviet advantage in numbers—our quality overcomes their quantity. Perhaps. But the engineers who design our equipment have a natural urge to push for sophistication—an urge that has nothing to do with the quality-over-quantity argument. Manufacturers have an interest in quantity production, but weapons designers don't care about the quantity, only about design.

Should our system be geared to satisfying their urges, or our needs? There is an interesting story about an Army field radio in Vietnam that failed repeatedly. The screams from the company grade officers could be heard all the way to the Pentagon, where the Army decreed that the next generation of radio would be judged on its failure rate. As each component was designed, it was tested and the "mean time between failure" improved dramatically, about doubling the time. But the engineers, meanwhile, were adding all sorts of whistles and bells. When the radio finally emerged, it had something like four times as many components. So, while each component survived twice as long, the additional number of components meant the radio as a unit was failing about twice as often as its pred-

ecessor. The entire point of the exercise—getting a more survivable radio into the field—had been lost as a result of the unfettered drive of engineers toward complexity. We satisfied their urges rather than our needs.

A third problem is the desire to keep designer, management, and worker teams together. This means that contracts will at times be steered toward a particular contractor in order to keep that firm alive and its team intact. This isn't a matter of conspiracy or corruption. Nor is it a matter of defense strategy.

There are two problems here.

First, the system just doesn't operate with the right incentives. That is clear from the examples I have outlined. The incentives are to satisfy constituencies; let the engineers operate unfettered, and keep the existing industry teams relatively intact. But it isn't at all clear that there are enough incentives helping us prepare to deter, and if need be, win, the next war.

Second, our defense community can operate this way because too few people take the threat seriously. There isn't much fear out there. I realize this, too, goes against the common wisdom, which talks about the huge proportion of the American public that believes the world will be incinerated before many more generations have been born. But I don't see that fear within the defense community. I detect a widespread belief in the community that there will be no more big wars and that someone else can organize to handle any small wars. I am not alleging any laziness or lack of patriotism. What I am alleging is that we have gotten too laid back. I would like fewer school children to have nightmares about war—and more people in the defense community to have them.

The hearings that I will begin next week will stretch out over the next few months.

The first part will look back at the last 4 years and ask the question, "What have we gotten for a trillion dollars?" We have spent just over $1 trillion on defense since Ronald Reagan took office—what have we got for it? In what ways are we stronger now? The point is to pin down the strategic goals of the past 4 years and see if the goals are clear, and if the budgets have supported those goals.

The second part of the hearings will look forward at the next 4 years—when we all expect the resources available for defense will be more limited than in the Reagan administration's first term. The hearings will ask the question, "Will it fit?—that is, can the administration's defense goals and weapons programs be fit into the more constrained resources base that we are looking at.

The third part, to open in November, will be more philosophical, for I hope then to step away almost entirely from budget numbers. I want to concentrate on some first questions that are too rarely asked in this institution.

In the 1970s, large numbers of younger members arrived in this body and questioned the way we went about dealing with defense issues. This wasn't a liberal-conservative split, or a Democratic-Republican split. It was a generational split. The younger members, spanning the political spectrum, have found wanting the annual arguments over whether to build 45 or 48 F–15 fighters, or three or four mine counter-measures ships. Those debates are narrowly focused and not terribly enlightening. They deal not with defense policy, but with some of the impedimenta that fall out of policy. As critics on both sides of the aisle have said, we are in danger of being overwhelmed by minutiae.

What is our strategy?

How is it formulated?

How are foreign policy considerations integrated with defense programs?

These are just a few of the questions we wish to ask. A point we must keep in mind is that the product is a result of the process. The product is defense policy. If the product is inadequate, we must probe the process. It may be necessary to significantly alter the process in order to improve the product.

I wish also to make clear that the point of the hearings is not to say that the Reagan product is an inadequate one. Our intentions are not partisan. I suspect that many of the inadequacies we uncover today would be traceable to previous administrations. We may even conclude that the Reagan process and product are better than under previous administrations, even while there is much room for improvement.

Certainly, these hearings do begin with one indictment. It is an indictment of all of us, including Congress, for having neglected the policy process and policy product for too long.

What is our national security policy? Part of the answer is philosophical. Rarely has it been articulated in coherent detail. In the early days of the republic, this country believed in little more than the defense of the continental United States. We sought to free ourselves of entangling alliances and those "amoral" balance of power policies of our European neighbors. Isolationism was the watchword. Years later, in the wake of the Holocaust of World War II, the mood of this country was profoundly different. It was booming and internationalist. We rebuilt Europe with NATO and the Marshall plan, established treaty commitments in other areas of the world, and declared that the flag of America—the flag of freedom, as President Woodrow Wilson once put it—be planted wherever possible. The American century has arrived.

It was a bipartisan belief around which Republicans and Democrats—and just about all Americans—rallied.

This consensus was rudely shattered by the Vietnam war. "Come home America" was the slogan of my party's presidential candidate in 1972. And three years later, a President from the other party did just that. The symbol of America in the world was no longer the American flag of freedom, but Americans clinging to helicopter skids, as the U.S. Embassy in Saigon was beseiged. It was not simply a vision of American retreat; gripped by the long twilight struggle of a war many Americans could not understand, our people looked inward. Our role as an internationalist power was scaled down.

Four years later, the pendulum swung back again, this time when United States helicopters lay in ruins in the Iranian desert after the failed rescue of the United States hostages. Ronald Reagan correctly understood that America was again ready to act on the proposition that if we were not the champion of peace and freedom in the world, the ideas and ideals of peace and freedom would not flourish. This is a proposition that I could not agree with more.

So where do we go from here?

Caspar Weinberger had his answer. On the one hand, he declared that the United States had to rebuild its defenses at an emergency rate. He did so without fully articulating a coherent rationale for this buildup. The result of this shopping spree is that the emerging and long-overdue public consensus for a strong defense was undercut.

On the other hand, he sought to define how this defense should fit into our overall national security policy. At the National Press Club on November 24, 1984, he enumerated "six major tests" to be applied when we are weighing the use of combat forces abroad. Taken as a whole, these tests express such reluctance to commit the use of our forces as to suggest they would never be committed at all, unless the military were guaranteed of victory in advance. The world is too complex, our responsibilities too great, to husband our military in this way.

I do not agree with this characterization of what our national security policy is. Nor, as polls reveal, do the American people. We reject the notion of those who would have this country arm itself to the teeth and then retreat behind fortress America, the isolationism of the right—just as we equally reject those who would have America not arm itself at all, the isolationism of the left.

I realize it is always easier to say what you are against than what you are for. It is not enough to say that we should have a two-and-one-half war strategy, or a one-and-one-half war strategy, let alone that we will defend the free world and extend its boundaries where possible. It is not enough to say, as President Kennedy did in his inaugural address, that the United States would "bear any burden, pay any price" to defend freedom.

The country is still groping for a national security policy, both within and between parties. Neither the larger themes nor the smaller details are excluded from this debate. This is not a new phenomenon. Every administration goes through this process, and the present one is no exception. But it is a process that is too often improvised, lacking the detail and vision adequate to meeting the challenges and promise that await this country.

I suggest at this time that we rise to meet this challenge. To do so, we must do more than look solely at the boondoggles of the defense process, important as this may be.

We must undertake the systematic work of deciding what our national security policy is—inadequately formulated as it is—and examine what it ought to be. Only then can we start giving shape to a security establishment that does justice not only to the concerns of an efficient defense in the pursuit of enduring peace, but to a foreign policy suitable to the moral vision of our country.

WHAT AMERICANISM MEANS TO ME

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. PEASE. Mr. Speaker, again this year, I would like to call your attention to the following three essays that were written by students from Ohio who received winning awards in the "What Americanism Means To Me" contest. Students Diane Vettori, Michael Adelman, and Valerie Wax deserve to be commended for the patriotism and heartfelt thought that is evident in their essays.

WHAT AMERICANISM MEANS TO ME

(By Diane S. Vettori)

Imagine a nation where a freedom exists unsurpassed in finite practice. Imagine a country where the most valuable resource, its people, come together from every nation to live and grow together in harmony under the same sky, pursuing the same cause. Imagine a land where the general populus elects the people by which it chooses to be governed and is permitted to remove these same people by vote—not by force or revolution—if it feels these representatives are inept. Finally, imagine the spirit of a people united and loyal to one flag, one nation, and one cause.

But the beauty of these statements lies in the fact that they are not mere fantasy or supposition. The flag is the Stars and Stripes, the nation the United States of America, and the cause is one of mankind's most vital, the cause of democracy. Thus, our nation is the true embodiment of these statements and the source for countless more. The pride which I truly feel for my country, the privilege of my citizenship, and my duty to safeguard actively this democracy, are the true ideals of my definition of Americanism.

One of the greatest enterprises of our nation is the partnership existing between the people and their government striving to uphold the numerous freedoms afforded by our Federal Republic and its democratic form of government. This union can only succeed if all citizens realize that every right has a corresponding duty. Freedom of speech and press is worthless unless honesty and fairness in their use is the norm, without malicious gossip or libelous statements. Our right to freedom of religion is valid only if we grant the same to others. If we utilize the right to an education at public expense, we owe the public a return, the best use of this education. And if we demand a fair trial for ourselves, an obligation becomes evident for us not to condemn others.

The rights which I have stated are available to all American citizens. None of them can ever be experienced by inhabitants of Communist countries. Thus, the most secure method to guarantee these rights for ourselves, is to protect them for our fellow citizens. Theodore Roosevelt once said that, "The first requisite of a good citizen in this republic of ours is that he shall be able and willing to pull his own weight; that he shall not be a mere passenger . . ." This is the most accurate statement of my ideal Americanism. My citizenship is an honor, and my duty to this great privilege can someday hope to secure the goal of unity in our nation.

I am not attempting to state that America, or even American ideals, are an earthly paradise, or the proverbial "Garden of Eden". America does not attempt to perpetrate a false image. Moreover, the imperfections of this nation strengthen my devotion to her. The fact that through our perseverence we continually strive for a more perfect future—one of freedom and of free men. In effect, we shall be striving for, yes, even fighting for, the security and liberty of America's children while eventually hoping to secure the freedom and security of the children of mankind.

WHAT AMERICANISM MEANS TO ME

(By Michael James Adelman)

Americanism, as defined by World Book Dictionary, is the devotion or loyalty to the United States, its customs and traditions. I feel that too often people living in the United States take their citizenship for granted. The meaning of one's rights, responsibilities, and loyalty is overlooked.

As an American I feel that it is my essential duty to uphold the customs and standards of my country. We are free people who should respect our fellow man. Never should we overlook our own social problems because if we do then how can we be expected to help out those in less fortunate nations. We should support methods which intend to help out those who are not as free as we Americans are. An American's freedom is a vast ocean of opportunity. Thanks to our forefathers we enjoy life in a free nation. They spilled their blood in order for their descendents to be free from the wrath of a foreign monarchy. In turn they drew up the Declaration of Independence as well as a Constitution to protect those who would choose to reside in the new nation, the United States.

The U.S. Constitution was set forth to protect the freedoms bestowed upon us. The Bill of Rights mentions just a few of the freedoms which we are fortunate enough to have. Some of the stated freedoms included are those of religion, press, petition, assembly, and speech. How can we be so naive as to take some of these for granted while in nations, such as the Soviet Union, day to day life is dictated to them like a flow chart. Even if such nations were granted only a percentage of our freedoms I would bet that they would be very grateful. Yet we realize that we are free and our freedoms cannot easily be taken away so we expand our own boundaries and often infringe upon the rights of others.

As an aspect of Americanism, our loyalty is vital to the nation's success. To be loyal citizens we can willingly abide to the laws set forth by our elected officials. If we feel that a statute is out of line, then we should look into getting it removed or revised. Never should the public decide to nullify a law because it is not their duty. Nor should they act against the law just because they feel it is wrong.

Just as important, people should respect their responsibility to vote in the elections. It should be a universal concern to get the most knowledgeable as well as responsible person into office. Since these are the people who set forth the laws and represent their constituents, we owe it to ourselves.

Americanism is a vital part in the success of our nation. As a citizen I must join forces with others to uphold that which is set forth by the United States. Citizens should realize that Americans are uniquely privileged with the various freedoms that have been bestowed upon them and realize that not very many nations are so lucky. In order to secure the bonds which hold our nation together we should exercise our Americanism and thank God for allowing us to be so fortunate.

WHAT AMERICANISM MEANS TO ME

(By Valerie Wax)

American is just not a title given to someone living in the United States, it is much more than that. Americanism is a true privilege—one of freedom and opportunity.

Our freedom as an American is the greatest of any freedom enjoyed in the world. Although our country is one of the youngest, we show the best example of freedom. We have freedom to vote on who we choose, pray to the God we want, and travel anywhere without being questioned. We are free to voice our opinion to each other and to our government. America has learned through the course of history that freedom is needed to allow this great type of government to work. Freedom allows a person to be very open. This openness lets fresh ideas and dreams come alive. Without freedom many famous Americans—President Abraham Lincoln, inventor Thomas Edison, and Olympic runner Wilma Rudolph—wouldn't have had the opportunity to not only better themselves, but better this country by their accomplishments and example. Freedom, truly gives opportunity.

Opportunity is the second aspect of Americanism. Opportunity has given so many Americans a chance for a wonderful life. The opportunities here in America range from owning your own home or business to belonging to the Olympic Team to becoming the President of the United States.

I'm quite lucky to have had both freedom and opportunity since the day I was born. I'm sixteen now and am just beginning to see the great advantages offered in my country, America. It is so sad that many people my age take for granted the priviledge of living in America. Not only does America give its priviledges to American born citizens, but allows others all over the world to get these advantages through immigration.

America is a proud country, and I'm proud to be part of this magnificent country. You see America's pride through its outstanding symbols. Our flag stands for our fight and victory of freedom. The beautiful Statue of Liberty, a gift from France, symbolizes both freedom and opportunity to all Americans. America's patriotic poems and songs are filled with the sound of pride. These symbols re-enforce our pride in America.

I will always be proud of being an American—because of its great accomplishments, and for what is ahead in both my country and my future. I will never take the priviledge of Americanism for granted. It is the best advantage I have in this world today. God bless America.

GRENADA: LEARNING FROM HISTORY

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. RITTER. Mr. Speaker, I would like to bring to the attention of my House colleagues the following article by syndicated columnist William F. Buckley that deals with an important initiative being organized by two of my valued friends, NEWT GINGRICH and IKE SKELTON.

[From the Atlanta Journal, Oct. 2, 1985]

REMEMBER GRENADA AS TURNING POINT FOR SOVIETS

(By William F. Buckley)

NEW YORK.—Reps. Newt Gingrich, R-Ga., and Ike Skelton, D-Mo., have come up with a very bright idea, to which end they are foraging for support from their colleagues. It is to ordain the week of Oct. 20-26 "The Lessons of Grenada Week." Already they have close to 200 signatures, and during the next few days they hope to mobilize Congress.

It is disconcerting how ungratefully we deal with the little lodes of vital information we come upon. We are a nation whose tradition called on us to Remember the Alamo, and, as recently as a generation ago, to Remember Pearl Harbor. But although it was only two years ago that it all happended, we haven't until now heard a voice enjoining us to Remember Grenada. Why?

Grenada is infinitely interesting. It is the first country ever substantially controlled by the Soviet Union that has been emancipated. Indeed, if we are at all optimistic about the future, we may indulge ourselves in the thought that future generations will point to Grenada as the highwater mark of Soviet imperialism, even as historians point to Tier as the westernmost point of the Mongol invasion, arrested in the 13th century.

All the more significant if we remind ourselves of the Brezhnev Doctrine. It is the one that reads, idiomatically: What is ours is permanently ours, what is yours is up for grabs. By the rules of the Brezhnev Doctrine, Grenada should not have been allowed to happen.

That much is easy to remember. But the call for a week devoted to a study of "The Lessons of Granada" acknowledges that there is much more to consider than merely the bare historical episode. And the reason for this is that when the Marines landed in Grenada two years ago they discovered documents that give us a most extraordinary, detailed account of how it is that the Soviet Union goes about colonizing a little country, with the aid of indigenous fellow travelers.

Under the sponsorship of the State Department and the USIA, two scholars (Michael Ledeen and Herbert Romerstein) were deputized to try to put together in manageable size a cross section of those documents, their purpose being to tell us, or to remind us, of the kind of things the Soviets do when they are engaged in colonizing. The book that grew out of that effort is called "Grenada Documents: An Overview and Selection," and is available from the Department of State and the Department of Defense for $19.

The pagination is not sequential, so that one can only guess at the number of pages, which I would put at, oh, 1,500. Moveover, the compilers tell you, in their foreword, that they could have given us another document of equal size and of equal significance, so abundant was the documentary quarry that gave us memorandums, treaties, secret plans for expansion, the record of foreign activities: all the paraphernalia that go with the implantation of a communist revolution, and then its extension.

The authors' summary begins with the sentence, "The revolution that overthrew the Gairy regime in Grenada in April 1979 was designed to create a Communist society and to bring Grenada into the Soviet orbit." That is plain language, but no plainer than what the documents established. There is even a comprehensive "Line of March" document that was marked confidential and consecutively numbered by hand.

We come upon details that remind us of the modus operandi of revolutionaries. Here Comrade Bishop (the former prime minister of Grenada) explains how you go about detaining a suspect: "We don't go and call for no votes. You get detained when I sign an order. . . . Once I sign it—like it or don't like it—it's up the hill for them." Special duties are assigned to agents to "monitor" all sermons, with the view to "the controlling of all hirachy (sic)."

And there was the grand sense of engagement in an international effort, as when Marshal N.V. Ogarkov, Soviet chief of staff, informs his Grenadan counterpart, Maj. Einstein Louison, that "over two decades ago, there was only Cuba in Latin America, today there are Nicaragua, Grenada and a serious battle is going on in El Salvador."

The Gingrich-Skelton idea is for a week to be given to debates, speeches, resolutions, high-school lectures, television and radio shows. The purpose? To learn from history. And to remind ourselves that we still control the destiny of the Free World.—(c1985.)

I would urge those members who have not already added their support for this commemorative week to consider contacting Mr. GINGRICH or Mr. SKELTON for further information. Also I suggest that the American people ponder the message so aptly put by columnist Buckley.

U.N. ACTION ON ARMENIAN GENOCIDE QUESTION

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. WHITEHURST. Mr. Speaker, I have read with great interest statements for the RECORD made by several of my colleagues in the House and Senate during the past month which allege that a subcommission of the U.N. Human Rights Commission has endorsed the fact of an Armenian genocide. These gentlemen argue that if the United Nations is satisfied that a genocide took place, the Congress should also endorse the same interpretation of history.

The facts, however, are these:

On August 29, 1985, the U.N. Subcommission on the Prevention of Discrimination and Protection of Minorities voted to take note of a report on ideas for revising the Genocide Convention which was prepared by the subcommissions' special rapporteur.

The subcommission, however, specifically refused to endorse and forward the report to the full Human Rights Commission because the majority of its members would not accept a paragraph in the report containing a list of historical events which the rapporteur had defined as genocide.

The majority argued that, among others, the Armenian example given in the paragraph was unjustified and would further fuel the acrimony that exists on this issue.

In fact, what actually happened was the opposite of that stated by my colleagues. I would ask them to check their facts more carefully in the future. I would also ask them to reflect on the ease with which events barely 1 month old can be misinterpreted and to consider further the likelihood that events 70 years old also might be misinterpreted.

PORNOGRAPHY FORFEITURE PROCEEDINGS VENUE ACT OF 1985

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. WOLF. Mr. Speaker, I am introducing legislation today which I believe reflects the views of concerned Americans who want to see a crackdown on the influx and spread of pornography in our country.

I commend the U.S. Attorney General's Commission on Pornography which is currently holding hearings around the country in an effort to examine the problem and develop an appropriate intergovernmental response.

Legislation I am introducing will help Federal law enforcement agencies enforce existing laws regarding the importation of pornographic and obscene materials. Thanks to the efforts of this body last year, passage of the Child Protection Act of 1984 has significantly altered the nature of child pornography in this country. It is a felony to produce, distribute or possess pornography using children in the United States.

Unfortunately, this domestic prohibition has led to an increase of production by foreign pornographers. The Netherlands leads the way in this exportation with Denmark and Sweden also sending objectionable materials through the mails into the United States under false cover, concealed in magazines, newspapers and other publications. I believe we can effectively deal with this problem through passage of my legislation.

Most foreign mail of pornographic nature now enters the United States through the port of New York where Customs and Postal Service officials are involved in the seizure and forfeiture of materials under the jurisdiction of the U.S. attorney for the eastern district of New York. Under the current process, after seizure, community standards are applied to determine whether the material is obscene and indecent. Within 14 days a complaint must be filed or the material will be either formally seized or forwarded to the addressee.

Objectionable pornography may understandably be a low priority for enforcement and prosecution.

It is with this concern in mind that I am introducing this measure which will allow Customs and Postal Service officials to investigate incoming pornography traffic and hand over for seizure and/or prosecution such items to the U.S. attorney in the region to which such mail is addressed for delivery. I believe this legislation will expedite the process of distributing and delivering mail which may erroneously be brought in for investigation; will give Customs and Postal Service officials greater flexibility in dealing with this imported material, and will ensure that the community standards of each neighborhood, township, and community in the Nation will be observed.

Mr. Speaker, I am including with this statement a copy of the bill for my colleagues' review and a section-by-section analysis. The U.S. Postal Service and the U.S. Customs Service have worked closely with me in developing this measure, and the Justice Department has shown no opposition to a statutory change of this nature.

With passage of this measure, I believe we have an opportunity to crack down on the pornography which now comes in across our borders and assist Federal agencies in the enforcement of current laws on importation of obscene materials. I urge my colleagues to join me in this fight to protect our families and children in America from the threat posed by international pornographers.

SECTION-BY-SECTION ANALYSIS—PORNOGRAPHY FORFEITURE PROCEEDINGS ACT OF 1985

This bill would resolve, at little or no cost to the government, problems of administration which have recently arisen in connection with the enforcement of the prohibitions in existing law (19 U.S.C. 1305) against the importation of pornographic or obscene books and materials.

Currently, existing law requires the forfeiture proceedings which the government institutes against such articles to be brought in the district in which the articles are first identified in a customs border search. Since the conduct of such searches tends to be concentrated in the vicinity of the principal ports of entry for imported articles, an undue administrative burden on proceeding against such articles, wherever they may be addressed for delivery within the United States, is placed on the offices of the United States Attorneys and the federal district courts in a relatively few judicial districts.

The bill would give the government the option of transferring the venue or location of the forfeiture proceeding to the district in which the named addressee resides. The advantages of such a transfer are perceived to be the following:

(1) Work on pornography forfeiture proceedings could be more equitably distributed throughout the nation, so that the courts and prosecutors in each particular part of the country can assume their fair share of the responsibility for enforcing existing pornography laws.

(2) More of the country's resources would accordingly be brought to bear against a serious national problem, because no one court or prosecutor would be expected to do a disproportionate amount of enforcement work.

(3) Forfeiture decisions would be brought more into line with the community standards of the community that would be affected by the proposed importation. Under current law, for example, it is possible for the community standards which prevail in New York to determine what may be imported into North Carolina, or for the community standards which prevail in Atlanta to determine what may be imported into New York.

This bill would also address administrative problems stemming from the Supreme Court's decision, *United States* v. *Thirty-Seven (37) Photographs*, 402 U.S. 363 (1971), which held that forfeiture hearings must be commenced within fourteen days of the seizure of the materials pursuant to 19 U.S.C. 1305. The bill would, for example, by modifying and extending the time limits, permit the government to pursue criminal investigations with regard to child pornography without being bound by the fourteen day referral limitation. Under present circumstances, the government frequently elects to investigate recipients of imported child pornography only to find that criminal prosecution is unwarranted. In that case, the government having no recourse to forfeiture proceedings under 19 U.S.C. 1305 since the fourteen day time limit has passed, is faced with the untenable position of forwarding the obscene materials to the addressee. The bill's provisions would allow the government to initiate forfeiture proceedings within thirty days of the date of discovery, the date that a criminal complaint or indictment is filed, or the date the U.S. Attorney declines prosecution. The thirty day referral period would also be stayed pending the completion of any related criminal matter.

H.R. 3506

A bill to improve the enforcement of the restrictions against imported pornography

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Pornography Forfeiture Proceedings Venue Act of 1985".

SEC. 2. The second paragraph of subsection (a) of section 305 of the Tariff Act of 1930, as amended (19 U.S.C. 1305), is hereby redesignated as a new subsection (b) of said section 305, and encaptioned "Enforcement Procedures".

SEC. 3. The second sentence of subsection (b) of section 305 of the Tariff Act of 1930 (19 U.S.C. 1305), as redesignated and encaptioned by this Act, is revised to read as follows: "Upon the seizure of such book or matter such customs officer shall transmit information thereof to the United States attorney of the district in which is situated either the office at which such seizure has taken place, or the place to which such book or matter is addressed, who shall institute proceedings in the district court for the forfeiture, confiscation, and destruction of the book or matter seized."

SEC. 4. A new subsection (c) of section 305 of the Tariff Act of 1930 (19 U.S.C. 1305), is added to read as follows:

(c) Notwithstanding the provisions in paragraphs (a) and (b) above, whenever a Customs officer discovers any obscene material after such material has been imported or brought into the United States, or attempted to be imported or brought into the United States he may refer the matter to the United States attorney for the institution of forfeiture proceedings under this section within 30 days of

(1) the date of discovery, or

(2) the date that a complaint or indictment is filed in the event the matter is referred to the United States attorney for criminal prosecution, or

(3) the date that the United States attorney declines such prosecution.

SEC. 5. A new subsection (d) of section 305 of the Tariff Act of 1930 (19 U.S.C. 1305), is added to read as follows: "Upon motion of the United States, a court shall stay such civil forfeiture proceedings commenced under this section pending the completion of any related criminal matter."

SEC. 6. This Act shall become effective on the thirtieth day after the date of enactment of this Act.

IN TRIBUTE TO "MR. FHA"—AL NACLARIO

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. BIAGGI. Mr. Speaker, the Federal work force is often criticized and seldom appreciated. For many Americans, the Federal Government is just one big tax collection agency, so this negative perception is somewhat understandable, though undeserved. Clearly, those of us who know better, realize that the only reason the Government collects taxes is so we can provide vital services, in many cases, life-saving services. Yet, while the money that goes into those programs is certainly important, perhaps even more important are the people that run those programs. For those who feel more comfortable thinking of Federal programs in dollars and cents terms, let it be said that an able Administrator is worth millions.

Today, I want to pay tribute to a man who fits that description better than anyone I know. His name is Al Naclario, the Director of Housing for HUD's New York Regional Office. His job—to secure adequate and affordable housing for those who lack it in the New York area. Obviously, meeting the basic housing needs of our Nation's most populated area is no easy task. But, with a special blend of enthusiasm, compassion and vigor Al has more than met the challenge.

It should be noted that I am proud to be among Al's close friends. But, let me emphasize that my view of Al Naclario's work is not distorted by that friendship. It has simply allowed me to see first-hand the tremendous energy and personal pride that Al brings to his job. The final word does not have to come from me. Al Naclario's record of achievement and considerable distinction speaks for itself.

Affectionately known as, "Mr. FHA," Al has distinguished himself as the region II Director for HUD since 1983. Prior to that appointment, he has a long and distinguished record, totaling nearly 40 years, on behalf of Federal housing programs in the New York metropolitan area. As Director of Housing, he has spearheaded all housing programs and activities, including mort-

gage insurance and direct loan programs for single and multifamily dwellings.

With a staff of over 300 individuals, Al Naclario has brought a creative response to the housing needs of middle- and low-income families in the New York City area. His energy and leadership has placed him in a position with responsibilities that include heading a task force designed to develop Battery Park City and Roosevelt Island. He also served as regional representative to the cooperative city and State ventures with the city's Mitchell-Lama housing projects. He finally was designated head of the "Hardnose Team," with full authority from the Assistant Secretary to secure agreement on all troubled projects.

His expertise in housing matters was gathered from the bottom up, starting with his employment with the VA Home Guaranty Authority Program in 1946. It was there that he utilized his experience, as a veteran and prisoner of war of World War II, to address the varied housing needs of veterans returning from the war. To his credit, he assumed roles of increasing authority which allowed him to tackle the twin problems of urban blight and housing shortages. He became directly involved in Federal initiatives designed to address the needs of the underserved and underrepresented in cities—the elderly, the poor, and the handicapped.

The decision by Project Return to honor Al Naclario last June with its Gold Medallion for Distinguished Service, was but one in a long series of honors and achievements that he has garnered throughout his 40-year public career. In addition to earning the distinguished Purple Heart in World War II, he has been given numerous citations during his association with Federal housing programs. He was named "Housing Man of the Year" in 1982 by the National Housing Conference. In 1980, the Real Estate and Construction Industry also cited him as "Man of the Year for B'nai B'rith Youth Services." Former HUD Secretary Moon Landrieu awarded him a certificate of merit for exceptional leadership in the multifamily housing industry for the New York area. In addition to two quality awards as Regional Administrator and the Secretary George Romney Award for Housing Production, Al also received the Commissioner of FHA award, for his outstanding leadership in rental housing programs.

Al Naclario has roots in the New York City area having attended both Manhattan College and Columbia University, where he majored in real estate principles and appraisals. His wife, Nicoletta, and their three children, Alphonse, Linda Marie, and Michael, have made New York their home—and not only the city, but our State and country are the better for it.

Public service is a profession which entails long hours and often little, if any recognition for dedicated individuals such as Al Naclario. He has risen above the level of the ordinary in public life to achieve the extraordinary.

It is clear that in his career with the Federal Government, Al Naclario has distinguished himself in a way that few can hope to imitate. He has set an example for not only other public officials—but also for those dedicated to adequate, affordable housing for all as their advocate. Most importantly, I am pleased that so many have chosen to honor him and recognize his achievements. I want to join with them in paying my own personal tribute to him today. His work is a matter of public pride and accomplishment for those of us who are privileged to also be able to call him friend.

REFUSENIK ALEXANDER YAKIR

HON. HARRY REID

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. REID. Mr. Speaker, as the upcoming summit between President Reagan and General Secretary Gorbachev nears, I wish to take this opportunity to bring attention to Soviet human rights policy and its importance in United States-Soviet relations. The United States and the Soviet Union hope to reach an arms control accord to make this world a more secure one. We Americans, before leaping into agreements with the Soviets, must examine their less-than-sterling record on adhering to their word, before signing any strategic arms treaties.

The Soviet Union signed three international agreements in which it guaranteed religious freedom and the right to emigrate for all Soviet citizens. Nonetheless, Soviet repression of Jews who study Hebrew and Jewish culture has escalated, while Jewish emigration has slowed to less than 2 percent of its 1979 figure.

While Soviet emigration policies repress thousands, allow me to describe one case I am particularly familiar with through my wife's involvement in the Congressional Spouse's Committee of 21. Alexander (Sasha) Yakir is a 29-year-old Soviet Jew who has tried to emigrate for 10 years. His initial emigration application was cynically rejected on "humanitarian grounds." The authorities claimed they could not grant his request because they "do not split families," even though Sasha's parents Evgeny and Rimma Yakir had applied for and been refused exit visas a year earlier. In the face of a seemingly impossible situation, Sasha Yakir claimed Israeli citizenship, as is the right of Jews across the world. Twice, Soviet authorities "lost" the Israeli Government's documents supporting Yakir's claim.

Not only do the Soviets deny emigration rights to their citizens; those who apply to leave face the prospect of harassment which threatens their livelihood inside the U.S.S.R. Sasha Yakir, trained as an engineer, could not find work in his field and had to take a job as an elevator operator. His parents both lost their positions as engineers and only survive by translating and typing English technical material into Russian.

Over a year and a half ago, Sasha was arrested for draft evasion. Allowing himself to be conscripted would have meant 3 years of military service, after which the entire Yakir family could be legally detained in Russia for an additional 5 years. Instead, Sasha Yakir chose to serve 2 years in a labor camp, where he is today. Sasha's father, Evgeny, visited his son at the labor camp in Liepsk in early June. Evgeny was optimistic that the upcoming summit would bring hope for Sasha.

I trust the President will keep refusniks like Sasha Yakir in mind when he meets General Secretary Gorbachev in Geneva. And I hope he makes it clear that Soviet adherence to the Helsinki accords will have a direct bearing in prospects for improving United States-Soviet relations.

SACRAMENTO CELEBRATES ASIAN COMMUNITY NURSING HOME WITH GROUNDBREAKING AND DEDICATION CEREMONIES

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. MATSUI. Mr. Speaker, I rise today to call to the attention of the U.S. House of Representatives a dream that is about to become a reality: The establishment of an Asian community nursing home in Sacramento.

Although Sacramento has a number of fine, high-quality nursing homes, they are not designed to meet the special cultural, dietary and language needs of the Asian population. As a result, Asian seniors who are placed in these facilities may experience cultural misunderstandings and a deep sense of isolation.

I believe the Asian community nursing home will serve an important purpose in Sacramento. It will afford seniors excellent health care and provide them the cultural and social support they need for a healthy life. The home will also be a center for community involvement for those outside the home.

This Sunday, October 6, groundbreaking and dedication ceremonies will take place at the future site of the home, 7801 Rush River Drive. The day will be of special importance to those in the community who shared a dream and acted to build upon that vision.

Among those who have shared the dream is Yasushi "Chewy" Ito. Chewy is the president of the Asian Community Center of Sacramento Valley, Inc., which is the parent corporation of the nursing home. Chewy has spent untiring hours raising funds and rallying support for the home. Without his efforts the project would not be breaking ground Sunday.

I would also like to acknowledge the contribution of Angelo Tsakopoulos. Angelo donated the 3½ acres on which the home will sit. Angelo understands the importance of the home to the Asian community and to

Sacramento. Sacramento is a place where we help each other to improve the quality of life for everyone.

There is still work to be done. The concrete must be poured and more than $400,000 must still be raised. But Sunday is a day to celebrate achievement and to feel good about our accomplishments.

I commend all those whose efforts have made this vital project a reality.

WEEP NO TEARS FOR WESTWAY

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. WOLPE. Mr. Speaker, on September 11 this body voted overwhelmingly to support an amendment to the Transportation appropriations bill offered by my colleagues Mr. COUGHLIN, Mr. WEISS, and Mr. GUARINI. The amendment blocked funds for a landfill in New York's Hudson River for the purpose of constructing a highway project known as Westway.

By adopting the Coughlin-Weiss-Guarini amendment to stop the Westway landfill, the House displayed a commitment to both environmental protection and fiscal responsibility. Not only would this project have constituted a waste of Federal funds, it would have necessitated the creation of the huge landfill endangering a primary habitat of the striped bass, one of the east coast's leading commercial and sports fish.

I am submitting for the record a guest column which appeared in Newsday, written by my colleague from Manhattan, TED WEISS, whose West Side district would have contained the Westway project. The statement highlights the many benefits the citizens of New York can expect now that the State of New York has agreed instead to spend the money authorized for Westway on badly-needed mass transit and highway improvements. I commend the article to my colleagues.

The article follows:

[From the Newsday, Sept. 25, 1985]

WEEP NO TEARS FOR WESTWAY

(By Ted Weiss)

The long struggle to defeat the most extravagant highway ever conceived came to an end last week, when Gov. Mario Cuomo and Mayor Edward Koch agreed to trade in $1.7 billion of Westway funds. The trade-in decision was an important victory for New York City residents whose overwhelming majority use public transportation. The city will now have the opportunity to rebuild a much-needed but more modestly scaled roadway along the West Side from the Battery to 42nd Street, with the bulk of the money available for crucial subway, bus and commuter projects. The general welfare of the city has been better served.

The mass transit system is the lifeline of New York City, 85 percent of those who travel to work use mass transit. Of an estimated 4.1 million daily person trips to Manhattan, only 13 percent are by auto, of which less than half use the West Side corridor, according to the Westway project's environmental impact statement.

It was always unrealistic to assume that the federal government would ever agree to fund this project. It became especially so in this era of unprecedented fiscal constraint.

The most conservative cost estimate for Westway was $2.3 billion, more than twice as expensive, per mile, as any other interstate segment ever funded. Many experts have said Westway would actually cost between $4 billion and $10 billion—an absurd price tag for 4.2-mile highway. With anticipated revenues for the Highway Trust fund, which would have financed Westway, down by $1 billion to $2 billion, leaving the fund bankrupt by 1989, it is unlikely that the federal government could have afforded to finish Westway. The city or the state would have been forced to pick up the bill or leave the project unfinished.

The ill-fated Westway proposal galvanized the opposition of environmental groups not only in New York but also around the country, because it would have seriously damaged one of the primary spawning grounds of the striped bass. In spite of efforts to trivialize this fact by Westway proponents, the bass is one of the East Coast's most important commercial and sports fish. The highway would have harmed a $200 million fishing industry that provides jobs, food and recreation to the region. An 11th-hour attempt by the Army Corps of Engineers to deny this conclusion was overruled by both a U.S. District Court and a Federal Appeals Court which called the arguments of the corps' witnesses "Orwellian-like doublespeak" that was "unworthy of belief."

Even if Westway were completed, it would have done little to relieve New York's transportation problems. Most traffic jams in the city are caused at bridge and tunnel connections. Westway would have attracted more traffic and increased the line of cars and congestion on the streets and at the entrance and exit ramps planned at Canal Street, 15th Street and 30th Street. The reconstructed West Street that has replaced the old elevated highway—with proper upgrading—could amply satisfy vehicular needs without the construction of an expensive major highway.

Much of Westway's funds would have been used to construct over 200 acres of landfill—composed of toxic-laden material dredged from the Hudson River bottom. Half of the highway would have been tunneled through landfill that would have extended almost two blocks into the Hudson River. It would have produced 50 acres or a total of 20 new residential blocks with 7,100 units of new luxury waterfront housing in Chelsea, Greenwich Village and Lower Manhattan. It would have required 10 to 15 years of digging, drilling, construction noise, dirt and traffic.

One of the projected Westway ramps would have cut a swath across the northern perimeter of the Gansevoort Meat Market, threatening a $2-billion business that employs 3,000 to 4,500 workers and an additional several thousand in support jobs for minorities. The construction of Westway would have required the gutting of 47 buildings, 24 piers, 10 public facilities and 110 businesses.

Westway was not needed to promote waterfront development. In fact, we are likely to see accelerated development along the waterfront now that the threat of a huge, 10-year construction project has been removed from the area. Developers have proposed using the abandoned piers for restaurants, tennis courts, marinas and skating rinks, but were discouraged by 60-day cancellation clauses in all leases, requiring them to move if Westway were to go ahead.

Rebuilding our transit system would generate at least as many jobs as the construction of Westway.

Transit construction and repair is generally more labor-intensive than highway construction, and this work is typically provided by local unions, which mean more jobs for New Yorkers and minority workers.

There has been strong opposition to Westway from many New Yorkers. Fifty-seven of the 63 public officials on record with the Corps of Engineers opposed Westway. Seventy-five percent of the constituents responding to my most recent districtwide questionnaire favored the trade-in option over building Westway.

The suggestion that the vote in Congress against Westway was motivated by anti-New York sentiment is a disservice to New York and to Congress. Westway was defeated because it was too rich a project in a fiscally conservative climate. It joined other projects like the $4-billion Clinch River reactor that were defeated when public opinion against extravagant projects with exorbitant price tags caught up with them. Westway was part of a bygone era of grandiose schemes when money seemed cheap and federal budget deficits were modest. History will prove that the decision to scrap Westway was right.

LET'S GIVE FARMERS A CHOICE

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. SCHUETTE. Mr. Speaker, I have long maintained that in this time of great stress and hardships for many farm families, we should allow farmers the opportunity to vote on the kind of farm program they want. That is why I have supported the Bedell amendment, which provides that opportunity for farmers to vote. I do not support mandatory controls; in fact, I have repeatedly voted for agriculture policies that are sensitive to world market forces. But at a time that problems on the farm are worse than they have been in 50 years, I believe we can, at the very least, give farmers a choice.

THE 13TH ANNIVERSARY OF THE ABM TREATY

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. BROWN of California. Mr. Speaker, today marks the 13th anniversary of the effective date of the Anti-Ballistic Missile [ABM] Treaty. The ABM Treaty was signed by the United States and the U.S.S.R. in May 1972, after some 2½ years of negotiations under the Nixon administration, and remains one of our most effective and noteworthy treaties in existence.

The American ABM effort began shortly after the Second World War, but languished for over a decade in the absence of

a perceived threat. In the mid-1950's, Soviet advances in long-range rocketry led to a drastically increased U.S. emphasis on ABM research. The ABM debate of the 1960's achieved momentum only when it impacted on individual citizens on a large scale; specifically, when the process of selecting sites near several of our largest cities brought to millions of people the image of nuclear-tipped missiles in their backyards.

With the completion of the ABM Treaty and the interim agreement on offensive nuclear forces in 1972, the superpowers implicitly acknowleged the overwhelming strategic reality: however seductive in theory, nationwide defense against missile attack was not feasible because the destructiveness of nuclear weapons gave offensive systems an insurmountable advantage.

In addition, the deployment of large-scale missile defenses would lessen the stability of the strategic balance. A competition in building ABM systems would inevitably instigate an uncontrolled buildup in offensive nuclear forces, as each sought to insure its ability to penetrate its opponent's defensive shield.

It was recognized that such an unregulated offensive-defensive arms competition could also have adverse consequences on "crisis stability," and therefore increase the risk of nuclear war. Crisis stability exists when each side is secure in the knowledge that it possesses the capacity to threaten the other side with devastating retaliation even if struck first with nuclear weapons. Both superpowers spend considerable funds and effort to maintain this "second-strike" capability.

The projected cost of an unregulated offensive-defensive competition was also an inducement for controls. It was well understood that the dual pursuit of both nationwide ABM systems and new technologies for offensive systems to penetrate defenses would be prohibitively expensive.

Having participated at considerable length in the "great ABM debate" of the 1960's, I remember it well. In fact, the arguments presented for the deployment of the President's strategic defense initiative are not all that different from the arguments in the 1960's.

The ABM Treaty bans the deployment of nationwide systems to defend against ballistic missile attack. The explicit purpose of the ABM Treaty is to preclude the type of advanced nationwide missile defense system that President Reagan envisions and the less sophisticated one that the Soviet Union is developing. Deployment of such systems would clearly violate the basic objective and explicit terms of the treaty.

For over a decade, the ABM Treaty has enhanced our national security by preventing a costly and dangerous arms race in antimissile weapons. Unlike most arms control agreements which reduce or eliminate outdated, obsolete weapons systems, the ABM Treaty not only limited existing warfare technology, but future ones as well.

On March 23, 1983, President Reagan gave what is now popularly known as his star wars speech, calling on the Nation's scientists and engineers to pursue technologies that would make the United States safe from the threat of nuclear annihilation. He also directed the development of an intensive effort to begin a research and development program aimed at an ultimate goal of eliminating the threat posed by nuclear ballistic missiles.

Since his speech, the President has signed a number of directives aimed at reprogramming previous U.S. missile defense efforts and placing them within his strategic defense initiative [SDI]. Although both the United States and the Soviet Union have long had active research and development programs to examine ballistic missile defense [BMD], the United States effort has been restructured, and additional concepts are being examined at the President's direction. The SDI's main focus will be to develop, test, and possibly build a layered system designed to intercept and destroy ballistic missiles throughout the flight trajectory.

Also of concern are devices or systems that, although ostensibly designed for other purposes, could be used in an ABM role. Chief among these are large phased-array radars, antitactical ballistic missiles, and antisatellite [ASAT] systems. Well before the United States must make a decision whether to deploy a space-based missile defense system, the development and testing of such a system and its components would violate the ABM Treaty, generally regarded as the cornerstone of the present arms control regime.

We must be especially cautious of undermining the treaty before we know whether it is in our interest to proceed with a defensive system. Not only is it unlikely to be in our interest to engage in a defensive weapons race, but research won't tell us much for another 10 years. Caution is mandatory in light of a recent Office of Technology Assessment study which warns:

If we were to allow the ABM Treaty regime to erode, and then find at the end of our BMD research program that the new BMD technologies did not fulfill expectations, we could end up with the worst of both worlds: no arms control to limit BMD, Soviet BMD deployment, no effective U.S. BMD and, quite possibly, augmented Soviet offensive forces intended to overcome an anticipated U.S. BMD.

Despite attempts on both sides to push the ABM Treaty to its limits and beyond, it continues to establish a balanced and, most importantly, verifiable agreement between our two nations. Yesterday, six former Defense Secretaries issued a statement calling on the United States and the Soviet Union to "avoid actions that would undermine" the ABM Treaty. I include the text of the letter by former Secretaries Harold Brown, Clark M. Clifford, Melvin R. Laird, Robert S. McNamara, Elliot L. Richardson, and James R. Schlesinger:

[Statement by former Secretaries of Defense, released by the National Campaign to Save the ABM Treaty on October 3, 1985, the 13th anniversary of the Treaty]

STATEMENT IN SUPPORT OF THE ABM TREATY

On the thirteenth anniversary of the entering into force of the ABM Treaty, we reaffirm our view that this international agreement of unlimited duration makes an important contribution to American security and to reducing the risk of nuclear war. As former Secretaries of Defense, we call upon the American and Soviet governments both to avoid actions that would undermine the ABM Treaty and to bring to an end any prior departures from the terms of the Treaty, such as the Krasnoyarsk radar. We urge President Reagan and General Gorbachev to reach agreement in Geneva to negotiate new measures which would prevent further erosion of the Treaty and assure its continued viability.

HAROLD BROWN,
CLARK M. CLIFFORD,
MELVIN R. LAIRD,
ROBERT S. MCNAMARA,
ELLIOT L. RICHARDSON,
JAMES R. SCHLESINGER.

The November summit between President Reagan and Secretary General Gorbachev provides an excellent opportunity for both the United States and the Soviet Union to reiterate their commitment to the intent and spirit of the ABM Treaty. Such a simple, yet extremely important, step could prevent a needless, expensive, and destabilizing arms race in space. Mr. President, I encourage you to follow the example of your Republican predecessor and do all that possibly can be done to eliminate ABM's not only from the face of the Earth, but from our skies as well.

AN OBSERVER'S IMPRESSION OF THE NEVADA TEST SITE

HON. HARRY REID

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. REID. Mr. Speaker, the Nevada test site, located about an hour's drive north from Las Vegas, has been this country's major testing facility for nuclear weapons for more than three decades.

Below is the impression that one observer had after her tour of the Nevada test site.

POINT ONE TO MINUS NINE

(By Susan Berry Tompkins)

(Written on Saturday morning, June 29, 1984, after having endured a tour of the Nevada Test Site on the day previous.)

Balancing equations; point one to minus nine,
A game involving numbers for scientific mind,
Fevered, furrowed brows, fanatically obsessed,
Our toy against their toy; a race to see who's best.
Bombs blasting on a wallsize screen, fallout well contained,
Post mortem of the test is seen not once in numbers maimed,

A problem's solved—for men like this—but not in human terms,
For them there is not life involved, as they drive back to their homes.
Can men like this sleep well at night, dream dreams of God and love?
While nuclear waste, destruction, violence, pain hover above?
The hands that hold their children, hold also death to all mankind.
Is this our future image, the best that we can find?
To put it on a personal note, am I to be a part
Of making this place I live in a nuclear shopping mart?
Am I to take a share of it, the money and the fame?
Am I able to live with it, the destruction and the shame?
I champion the cause of Beauty, in the name of God and Man,
For the truth in man's noblest achievements, for the truth in the world of Pan.
Beauty does not live in craters on the desert floor,
Truth does not dwell in destruction, violence, hate and war.
History will not judge us as a country brave and free,
If we march the world to doomsday in the name of liberty.
Freedom, God, Beauty, Truth—call it what you must—
Lives in each and every one of us if we live a life that's just.
We ought not need more, bigger bombs to prove our point of view,
For no one can enslave a man with conscience brave and true.
And if we must destroy our foe by sheer power and force
Perhaps we are no better than he, perhaps we're even worse.

ART PFEFFERMAN WINS FERNANDO AWARD

HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Ms. FIEDLER. Mr. Speaker, I rise today to bring to the attention of the House an event of great importance in my community, the annual presentation of the Fernando Award. This award is presented annually to the one individual in the San Fernando Valley who has exemplified the qualities of leadership in our community.

In past years, I have told the House of many of my friends who have received this award. But, this year, I am particularly pleased because the winner is one of my oldest and dearest personal friends.

Art Pfefferman is a true embodiment of the American dream. His rags to riches story is a shining example of what makes America great. He is a small businessman who started with virtually nothing and is now one of the largest franchisers in California.

While he has been working at building his own business, he has been serving his community as well. Art is the past president of the United Chambers of Commerce of the San Fernando Valley. He has also been active in his local Tarzana Chamber of Commerce and Lions Club for many years.

President Reagan has recognized Art as a leader in our business community by appointing him to the Small Business Administration's Region IX Advisory Council.

The list of Art's membership is almost endless and I won't list them for the Members. But, suffice it to say, that if there has been an activity benefiting the people of the San Fernando Valley, Art Pfefferman has been involved in it.

Now, he is being recognized with the highest honor that can be bestowed on a San Fernando Valley resident—the Fernando Award. I know the other Members of the House will want to join with me in saluting Art, his lovely wife Sandy, and his sons, Michael and Craig, on this honor that his fellow citizens are according him.

THE WILSON IMMIGRATION AMENDMENT: A SELLOUT OF U.S. FARMWORKERS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. CONYERS. Mr. Speaker, the Senate recently voted to approve S. 1200, the revised immigration bill. While the bill is flawed in several respects, the Wilson amendment, which permits up to 350,000 guestworkers into the United States at any one time for seasonal farmwork, is perhaps the most damaging provision of the bill. Such a massive guestworker program would inevitably undercut organized labor by depressing farm wages, lowering existing working conditions, and eliminating employment opportunities for American workers.

An insightful letter on the Wilson amendment, written by Prof. Mark J. Miller, of the University of Deleware, was printed recently in the New York Times. Furthermore, in an article entitled "The Institutionalization of the Illegal Alien," New York Times staffwriter Robert Pear describes the lobbying efforts and political maneuvering by the growers of fruits and vegetables in their attempt to force the Wilson amendment on the House as the make-or-break provision in this legislation.

In view of the immigration legislation pending before the House Judiciary's Subcommittee on Immigration, Refugees, and International Law, I am inserting Professor Miller's letter and Mr. Pear's article into the CONGRESSIONAL RECORD. I commend them to my colleagues for their careful consideration.

[From the New York Times, Sept. 29, 1985]

THE INSTITUTIONALIZATION OF THE ILLEGAL ALIEN

(By Robert Pear)

Washington.—When the Senate took up a comprehensive bill to curtail illegal immigration earlier this month, the growers of fruits and vegetables once again demonstrated their considerable political power.

Over the objections of the bill's chief sponsor, Alan K. Simpson, Republican of Wyoming, the Senate accepted a proposal, strongly backed by the growers, for a special program to bring as many as 350,000 aliens into the United States for seasonal farm work.

Opponents of the program said it undermined the purpose of the bill, which was to tighten the borders of the United States. But Senator Pete Wilson, Republican of California, argued that the program would legalize the status of many foreign workers and thereby protect them from exploitation. And without it, he said, crops would rot in the fields because farmers could not hire enough Americans to do the harvesting.

The growers' lobby, which represents such groups as the California Grape and Tree Fruit League, the International Apple Institute, the Raisin Bargaining Association and the Washington Asparagus Growers Association, has excellent connections with the Agriculture Department. Chief among its friends is Patrick H. Quinn, who, as executive vice president of the National Council of Agricultural Employers, used to lobby for some of the growers.

Mr. Quinn is now an aide to Deputy Secretary of Agriculture John R. Norton 3d. In disputes with the Labor Department over immigration policy, the Agriculture Department almost always sides with the farmers. The Wilson proposal, Mr. Quinn said, is "a prudent safety valve" to meet the farmers' expected need for foreign workers if Congress prohibits them from hiring illegal aliens.

Under the Simpson bill, employers would be subject to civil penalties of $100 to $2,000 for each illegal alien they hired. The penalties would start six months after the bill became law. But under a special section of the legislation, farmers would have three years to stop their use of illegal aliens. The growers could use their normal complement of illegal alien workers in the first year, 67 percent the second year and 33 percent the third year.

Advocates of immigration-law changes said the need for new controls was highlighted last week by the disclosure that at least 49 bodies had been found in the Arizona desert since 1982. Law-enforcement officials said the victims were believed to be aliends who had died in the trackless waste while seeking work in the United States. A local union said many of the Mexican workers, driven by economic desperation at home, were hoping to harvest lemons and grapes in this country.

MANY HURDLES AHEAD

The immigration bill faces many hurdles before it can become law. Its passage depends, in part, on questions to which there is no clear answer at this time: Will President Reagan campaign for the bill, as he has stumped for his tax proposals? Mr. Reagan has issued numerous statements of support for a comprehensive immigration bill, but the White House has also raised formidable objections to any measure that deviates from the President's specifications.

Another question is whether representative Peter W. Rodino Jr., Democrat of New Jersey, will push the legislation. Mr. Rodino, the chairman of the Judiciary Committee, is nearing the end of a long career in Congress. He might like to have his name preserved in a major statute of the type that Congress passes once in a generation, but aides say he would fiercely resist any

bill that violates the liberal principles for which he has fought.

Mr. Rodino has said, for example, that he would oppose a measure likely to increase employment discrimination against legal immigrants and refugees.

Mr. Rodino also said he was "deeply disappointed" by the Senate's approval of a new foreign worker program because he believed it could jeopardize the wages, working conditions and job opportunities of American farm workers.

Representative Charles E. Schumer, Democrat of Brooklyn, is trying to work out a compromise on the agricultural provisions of the bill. Those provisions, he said, "will make or break" the legislation. The House Judiciary Committee may approve an immigration bill this year, but it is not expected to reach the floor before next spring.

Representative Leon E. Panetta, a California Democrat who led the fight for the foreign worker program, in floor debate last year, said the bill had a 60 percent chance of becoming law if it reached the House floor this year. But he estimated its chances at only 40 percent if a vote is delayed till 1985. "Once you put it into the election year," he said, "all hell breaks loose."

Many former Government officials, business executives and labor leaders have signed letters endorsing the bill. Christopher J. Matthews, a spokesman for House, Speaker Thomas P. O'Neill Jr., said, however, that the process of organizing coalitions of support had been "too antispetic," too dispassionate. By contrast, Hispanic opponents of the bill denounce it with passionate fury because they believe it would stigmatize them.

[From the New York Times, Sept. 30, 1985]

UNWISE MOVE TO ADMIT FOREIGN FARM WORKERS

To the Editor:

Inclusion of a provision for 350,000 temporary foreign workers in the immigration legislation passed by the United States Senate (news article Sept. 20) represents a serious setback to immigration reform.

In essence, the provision would provide a labor subsidy to a well-heeled special-interest group. A foreign-labor subsidy in addition to massive Federal water subsidies and the Federal subsidy provided to specialty-crop growers by the marketing orders law (news article Aug. 21) masks the declining competitiveness of labor-intensive segments of American agriculture in global markets. Labor-intensive agriculture in the United States is highly profitable to a small number of corporations and family farms, but a heavy price is paid by the public.

The potential costs of the Senate's provision regarding temporary foreign workers also are to be measured in terms of democratic values and our foreign relations.

Obviously, the provision would be detrimental to American labor. Black and Hispanic farm workers would be the most adversely affected. However, most important, such a provision would introduce an element of apartheid into the American body politic.

The restricted status of foreign workers in the Senate bill would vary only in degree from that of black migrant workers in South Africa. As it stands, the status of foreign workers envisioned in the Senate bill—their rights and protections—does not meet international norms and standards set by such organizations as the International Labor Organization.

The Senate cannot expect to inaugurate a temporary-foreign-worker program unilaterally. If there is need for such a program, then bilateral negotiations between the United States and possible labor-supplying states are in order.

We should anticipate that nations such as Mexico and Jamaica will expect fair and equitable treatment of their nationals recruited to work in the United States. The history of the bracero program and Western European foreign-labor policies suggests that such an expectation is unlikely to be completely realized in practice.

The difficulties inherent in administering such programs in democratic, open societies do not bode well for the U.S.

MARK J. MILLER,
Associate Professor of Political Science, University of Delaware, Newark, DE, Sept. 22, 1985.

"YOU'RE A GOOD MAN, CHARLES SCHULZ" "PEANUTS" AT 35

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. BOLAND. Good grief, Mr. Speaker, Charlie Brown was 35 years old yesterday!

It does not seem possible that the "Peanuts" gang has been with us for three and a half decades. How many Americans since 1950 have begun their perusal of their daily newspapers by first turning to the comics section and reading "Peanuts"? How many school days have started with a quote from Lucy or Sunday sermons with the wisdom of Snoopy? I doubt that any comic strip has developed a larger or more devoted following than "Peanuts". It's easy to understand why.

The characters created by Charles M. Schulz over the years; Schroeder, Linus, Peppermint Patty, Marcie, and all the rest, have a wisdom beyond their apparent years which they bring to bear in situations familiar to us all. They provide both a laugh and a lesson; something which provides both immediate enjoyment and food for thought later on. Theirs is a universal appeal, as evidenced by the fact that the popularity of "Peanuts" knows neither the boundary of language nor geography. While no one with children could fail to be aware of Woodstock's latest antics or the consequences of Spike's most recent visit, "Peanuts" is certainly not the sole property of the young. I would suspect that most of my colleagues have wondered, at one time or another, why inflation had never raised the price for a visit to the office of Dr. Lucy, or when Charlie Brown's baseball team would win a game. "Peanuts" is fun and that is clearly the secret to its success.

I want to congratulate Charles Schulz for what he has created over the past 35 years. He is a skilled artist who combines a sharp wit with a keen insight into the human condition.

I hope that he will continue to make us laugh and make us think for many years to come.

Mr. Speaker, Charles Schulz is, indeed, "a good man."

WORLD FOOD DAY

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mrs. ROUKEMA. Mr. Speaker, I am pleased again this year to be a cosponsor of a House joint resolution that would call on the President to declare October 16 "World Food Day." In this special commemoration, our country will be joined by about 150 other countries that will also observe World Food Day.

I commend Hunger Committee member BENJAMIN GILMAN for proposing the World Food Day resolution, the more than 300 American groups and organization members of the National Committee for World Food Day, and the Food and Agriculture Organization [FAO] of the United Nations [U.N], in its 40th anniversary year, for its leading efforts toward food security for all nations.

This past year has seen one of the worst famines in human history. For the third year in a row, half or more of the countries of Africa have faced food emergencies. Tens of millions of persons faced the threat of death by starvation and hunger-related illness.

Last November, as the Ranking Republican member of the Select Committee on Hunger, I traveled to Ethiopia and saw the widescale human suffering in that country. Through the efforts of members of the Hunger Committee and others in the Congress, U.S. resources were mobilized and massive food shipments were sent by our Agency for International Development [AID] to needy African countries. This great outpouring of generosity and the private fundraising of many groups and organizations across our country saved the lives of millions of persons.

We all can be proud of the leading role our country and so many of its private citizens and organizations played in this life-saving mission. Sadly, we cannot rest on this accomplishment and return to our everyday lives satisfied that we did all that we could and more than any others have done.

We cannot because the crisis of food shortages in many countries and in households in all countries persists. The solutions lie in long-term efforts to increase food production in the poorest countries and to improve international and intranational food distribution in virtually every country.

World Food Day is based on the important idea that the people of the world should share in a partnership in the search for solutions to the problems of hunger and malnutrition. I hope that our national commemoration of World Food Day will lead millions of Americans to listen, read, and learn about hunger. More importantly, I hope that it will encourage many to contact

domestic and international organizations that are working to solve the hunger problem, and form ongoing links to alleviate hunger and malnutrition in our time.

BUDGET DEFICIT STILL REMAINS HIGH

HON. FRED J. ECKERT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. ECKERT of New York. Mr. Speaker, at first glance, it might appear to the people of America that Congress is serious about reducing this year's deficit and the national debt. After all, the budget resolution which Congress passed back in August supposedly cuts the deficit for fiscal year 1986 by $55 billion.

However, a closer scrutiny of recent actions of Congress reveals quite another view. Not only is Congress continuing its habit of spending more than it takes in, but it is also creating new budget authority for ways of spending money it does not have.

For example, the President's original budget request had proposed to eliminate the costly and inefficient Job Corps Program which is being subsidized by the taxpayers at an annual rate of over $600 million. Yet the House of Representatives has recently passed the Labor and Health and Human Services appropriation bill for fiscal year 1986 which requires continued funding of the Job Corps at $640 million. Remember, we are talking about a program which charges taxpayers over $15,000 per student per year to give basic job training skills to unemployed youth. This cost is more than double the annual cost for a full year's tuition at most 4-year public universities.

In fiscal year 1985 alone, each one of the Job Corps' 40,500 slots will cost the taxpayer over $15,000. This cost is expected to continue to increase to over $800 million in 1988. Earlier this year the Office of Management and Budget reported that only one-third of Job Corps participants become employed within 1 year after leaving the program. Not only is this program excessive in its costs, but it also duplicates other training programs, such as the Block Grant Training Program under the Job Training Partnership Act [JTPA]. Under the Block Grant Program, the cost per participant is one-third that of the Job Corps.

The overspending of this appropriation bill does not stop there. The bill also adds $100 million to the President's request for summer youth employment funds. This is a program which had already been appropriated over $724 million for 1986. In addition to the summer youth program, the Labor/HHS appropriation bill as passed by the House requires funding of the Work Incentive Program [WIN] which was scheduled for a phaseout. So what you have here is total spending of approximately $2 billion—50 percent more than the President requested—on only three of the Federal Government's many labor employment programs. In fact, the bulk of these funds only go toward serving unemployed youths and do not begin to cover the costs involved with serving those unemployed individuals over the age of 22.

This additional spending comes at a time when Congress must take action on legislation to raise the public debt ceiling. The limit on the public debt presently starts at $1,823.8 billion. The U.S. Department of the Treasury said that this current limit was reached on September 30, 1985. The Secretary of the Treasury, James Baker has said that the cash balance of the U.S. Treasury will be totally exhausted on October 7, 1985. Without Congressional approval to raise the debt limit ceiling—that is what the Government borrows to pay its bills—the U.S. Government would begin to default on its obligations.

Current projections indicate that Congress should raise this debt limit ceiling to over $2,078 billion just to meet the needs of Federal spending through September 30, 1986. With huge budget deficits and the threatening debt ceiling limitations facing Congress, you would think that wasteful and excessive spending that I have highlighted above would be eagerly eliminated. Not so.

All of this spending adds to the national debt. A debt which must be raised under the objection of the American people who are ultimately responsible for picking up the tab for the excessive spending of Congress.

IT'S TIME TO LABEL SMOKELESS TOBACCO

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. SYNAR. Mr. Speaker, I am happy to join the distinguished chairman of the Subcommittee on Health and the Environment, Mr. WAXMAN, in introducing the Smokeless Tobacco Health Risk Act. This bill is the result of work between Mr. WAXMAN, myself, and members of the health community to fashion a bill that will effectively warn the public on the known dangers of smokeless tobacco use.

The warning labels required by this bill are identical to those contained in H.R. 2950, legislation I introduced in July:

Warning: This Product May Cause Mouth Cancer.

Warning: This Product May Cause Gum Disease and Tooth Loss.

Warning: This Product Contains Nicotine and is Addictive.

In addition, the bill includes the same requirements as H.R. 2950 for print advertisements. These advertisements would be required to rotate the labels stated above, and carry them in a distinct circle and arrow format which the Federal Trade Commission has found to aid in message recall. Finally, the bill calls for an annual report by the Secretary of Health and Human Services on the effect of health education efforts on the use of smokeless tobacco, a description of the use by the public of smokeless tobacco, an evaluation of the known health effects of smokeless tobacco, and recommendations for legislation and administrative action. This report is similar to one required by the FTC in H.R. 2950.

Today's legislation incorporates several improvements over H.R. 2950 which were included in bills sponsored by Representative STRATTON and Representative COLLINS. It includes a ban on radio and television advertisements and it contains provisions to promote public education on the health risks associated with smokeless tobacco use.

It also contains provisions that were not included in any previous legislation. First, it allows the Federal Trade Commission to revise the label statements to reflect the current state of scientific knowledge about the health consequences of smokeless tobacco or to assure that the label statements more effectively disseminate information about such consequences to the public.

Second, it requires that smokeless tobacco product packages state the product ingredients, including nicotine, pesticide residues, artificial flavor, color, preservatives, and other chemical additives used in the manufacturing of smokeless tobacco.

I believe these changes are improvements over H.R. 2950, and I wholeheartedly endorse this bill as a significant step toward educating the public on the known health dangers of smokeless tobacco use.

At this point I would like to introduce in the RECORD a partial summary of the medical evidence of smokeless tobacco use:

MEDICAL EVIDENCE ON SMOKELESS TOBACCO USE

Winn, Blot, Shy, et al, "Snuff dipping and oral cancer among women in the southern states," *New England Journal of Medicine*, 1981.—This is the most definitive study on the long-term effects of smokeless tobacco use. The study found that women who had used tobacco snuff for a long period of time were four times more likely to develop oral cancer than non-users. For women who used snuff more than 50 years, the risk of cancer of the cheek and gum increased fifty-fold. The researchers estimated that nearly 90 percent of the tumors which they observed in the study were related to snuff use. Study controlled for age, education, employment, and dietary habits.

Christen, Arden, "The case against smokeless tobacco: Five facts for the health professional to consider," *Journal of the American Dental Association*, 1980.—Christen, chairman of the Department of Preventive Dentistry at the Indiana University Dental School, surveyed published literature between 1915 and 1972 and found 646 cases of oral cancer directly associated with dipping and tobacco chewing.

Shafer, Hine, Levy, and Tomich, *A Textbook of Oral Pathology*.—This is the authoritative textbook on oral pathology. It states that "carcinoma of the buccal mucosa develops in the area against which a person has habitually carried a quid of chewing tobacco for years while the opposite cheek may be normal, the patient having never rested the tobacco there. Although this is only presumptive evidence of a cause-and-effect relation, it has been recognized so frequently that it appears to be more than a coinciden-

tal finding. A special form of neoplasm known as 'verrucuous carcinoma' occurs almost exclusively in elderly patients with a history of tobacco chewing."

Rosenfeld & Callaway, "Snuff dipper's cancer," *American Journal of Surgery,* (1963).—Study found that 90 percent of the women with cancer in the cheek and gums, where tobacco typically was placed, used snuff compared to 22 percent in women with cancer in other parts of the mouth.

Dr. Jan-Michael Hirsch, *Journal of Oral Pathology.*—Hirsch exposed rats to snuff, and, separately and in combination with snuff, to herpes simplex virus type 1 (HSV-1). They found that "the rats exposed to snuff alone or in combination with HSV had a higher incidence of tumors or tumor-like conditions than the control rats or rats exposed to HSV only."

Friedman, Klatsky, and Siegelaub, *Hypertension* (1982), and Squires, Brandon, and Zinkgraf, *Preventive Medicine* (1984).—Both papers found elevated blood pressure levels in groups that used smokeless tobacco.

Dr. K.L. Schroeder in a paper presented before the International Association of Dental Research.—The average blood pressure readings of male smokeless tobacco users aged 18-25 were found to be nearly 15 points higher than those of male smokers and nontobacco users in the same age group. The average use of smokeless tobacco was found to be from two to five years.

Greer and Poulson, (1983).—Researchers found hyperkeratotic or erythroplakic lesions of the oral mucosa, gum inflammation, and cervical erosion of the teeth.

Mehta, Pindborg, Hamner, et al, "Report on investigations of oral cancer and precancerous conditions in Indian rural populations, 1966-1969," (1970).—Researchers followed 50,000 Indians for five years. They concluded that oral cancer and oral precancerous lesions (Leukoplakia) occurred almost solely among those who had tobacco habits of one type or another. Those who chewed tobacco had cancer at rates twice as great as any other group.

Jayant, Balakrishnan and Sanghvi, "Quantification of the role of smoking and chewing tobacco in oral, pharyngeal, and oesophageal cancers," (1977).—The authors calculated the relative risk of developing oral cancer for tobacco users. The Indian data suggest that the relative risk of developing oral cancer is 2.82 for smokers and 5.98 for chewers. This research is similar to American studies which have found tobacco chewers to have a risk of oral cancer twice that of smokers.

Tennekoon and Bartlett, "Effect of betel chewing on the oral mucosa," (1969).—Some researchers have argued that Indian studies are inconclusive because chewing tobacco in India is often mixed with a variety of other substances, primarily the nut of the betel palm, betel leaf, and slaked lime. This study found that none of these additives appear to have a carcinogenic effect.

MEDICAL EXPERTS AND ORGANIZATIONS ON SMOKELESS TOBACCO

Surgeon General Everett Koop: "We've known for years smokeless tobacco has carcinogens that are causative relative to oral, esophageal, and laryngeal cancer."

Dr. William Lijinsky, a world-leading authority on nitrosamines, testified in Massachusetts that ". . . the results of animal experiments in which orally administered nitrosamines have given rise to tumors of the upper gastrointestinal tract and the mouth [of animals] supports the statement that nitrosamines in snuff are responsible, in whole or in part, for the oral cancer that has been reported in habitual users of snuff."

The World Health Organization has reported more than 100,000 new cases of oral cancer in Southeast Asia every year. It estimates that 90 percent of the cancers were caused by chewing tobacco. At the WHO November 1984 conference, the group concluded that enough evidence is available to say that the oral use of the type of snuff used in North America is carcinogenic to humans.

The Centers for Disease Control has stated that "chronic, long-term use of smokeless tobacco is clearly harmful . . . Available evidence shows that chronic, long-term use of smokeless tobacco, in close contact with oral tissues, produces changes in these tissues that could have serious consequences, including oral cancer."

The American Cancer Society estimates that use of smokeless tobacco doubles the risk of oral cancer over that of cigarette smokers (October, 1984).

The National Cancer Institute says that the use of smokeless tobacco is a "dangerous practice that may increase a person's risk of cancers of the mouth, pharynx (back of the throat), and esophagus." Additional health effects include "increased blood pressure and heart rate, bad breath, discolored teeth, gum disease and early tooth loss." (1983)

Jack E. Henningfield, PhD. of the National Institute on Drug Abuse: "Recent studies, using currently accepted methods of evaluating drugs for dependence potential, reveal that nicotine, itself, is a prototypic dependence producing drug. Any form of nicotine should, therefore, be considered to have the potential to produce dependence until proven otherwise."

RESEARCH ON USAGE BY CHILDREN

Study in Oklahoma found that 22 percent of all 11th graders use snuff.

U.S. Public Health Service Professional Association study found that among rural, southern seventh and eighth grade males, 59 percent had tried smokeless tobacco, 37 percent used it regularly, and 63 percent reported adverse physical signs from its use. The last finding was confirmed by a clinical examination of a small random sample. The median age of first use was 9.1 years.

A study in Texas found that 55 percent of young users start before age 13.

Survey of 1,119 Colorado students by the Colorado University School of Dentistry found that 10 percent used snuff. Among users, researchers found abnormal growth of cells in the mouth lining, gum inflammation and tooth erosion.

A study in Eugene, Oregon, found that 9 percent of the seventh graders, 19 percent of the ninth graders, and 23 percent of the 10th graders were daily users of smokeless tobacco.

PASTOR GIVES CINCINNATI 54 YEARS OF THOUGHTFUL DEDICATION

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. LUKEN. Mr. Speaker, in a few days, my hometown of Cincinnati will commemorate Rev. Edward Jones, a pastor who has served the First Baptist Church of West College Hill for a phenomenal 54 years. However, we not only honor the length of Reverend Jones' service to the church, the community, and Greater Cincinnati, but the quality of that service as well. In the many years the reverend has worked and benefited Cincinnati, his contributions of talent, leadership, and responsibility have fostered significant and lasting improvement in the community.

Reverend Jones was coordinator of the West College Hill Association; a member of the Western Union Baptist Association, where he served as moderator for 3 years; a member of the Ohio Baptist General Association; a member of the National Baptist Convention of U.S.A. Inc.; a member of the board of directors of the Better Housing League; chairman of the board of West College Hill; and was dean of the Cincinnati Baptist Bible College.

He was responsible for $4 million that came from the Federal Government for rehabilitation of the West College Hill community. He was able to direct an adult tutoring and recreational program for the community. This is only a portion of his work. Under his leadership, the senior citizens home, First Baptist Terrace, was built.

Reverend Jones has received awards from many organizations including the Urban League and the Office of Economic Opportunity.

This long and significant career began in 1932 when Reverend Jones became pastor of the First Baptish Church, with a congregation of only 60 members. Today, under his leadership, that congregation has grown to almost 500 members.

Reverend Jones' service to our community indicates that we all can make a difference and help improve our world by care, dedication, and hard work. I thank the reverend for years of unselfish time and effort; his contributions have a resounding effect on our community.

THIS IS NO TIME TO UNDERCUT THE PRESIDENT AT THE SUMMIT

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. BROOMFIELD. Mr. Speaker, this is the time for Congress to stand squarely behind the President as he prepares to meet with Soviet leader Gorbachev. Bickering about arms policy and divisiveness on this complex issue can only serve to create the impression of American weakness at the bargaining table. Why would any American do anything to strengthen the Soviet hand in these upcoming talks? Only the President speaks for our country and only he voices our Nation's policy on arms control. We should never make America's security a partisan issue. We must all stand together with him as he prepares for the Geneva meeting.

I am pleased to see that Congress recently postponed action on House Joint Resolu-

tion 3, a bill to prevent nuclear explosive testing. The administration has substantive difficulties with the proposed legislation which clearly undercuts the President. The resolution calls upon our Government to secure the ratification of the Threshold Test Ban Treaty [TTBT], the Peaceful Nuclear Explosions Treaty [PNET], and specifies a resumption of negotiations toward a Comprehensive Test Ban Treaty [CTB].

It is well known that our Government cannot verify Soviet compliance with the TTBT and the PNET as they now stand. Our efforts to negotiate with the U.S.S.R. regarding verification improvements to these two treaties were, unfortunately, rejected by the Soviets.

There are also verification problems with the CTB Treaty which have serious national security implications. Our negotiators have been working with the Soviets to bring about significant reductions in these weapons of mass destruction before a Comprehensive Test Ban Treaty is signed.

I want to share with my colleagues in the Congress a letter from Secretary of State George Shultz and a list of key points in opposition to House Joint Resolution 3. As our Nation approaches these difficult and complex talks, we must project an image of unity and strength, not one of national discord on this vital issue.

THE SECRETARY OF STATE,
Washington, DC, Sept. 28, 1985.

Hon. William S. Broomfield,
House of Representatives.

DEAR BILL: The Administration has substantive problems with both major recommendations of H.J. Res. 3: to secure the ratification of the Threshold Test Ban Treaty (TTBT) and its companion Peaceful Nuclear Explosions Treaty (PNET), and to realize a resumption of negotiations toward a Comprehensive Test Ban (CTB). With respect to the TTBT and PNET, our experience has shown that we cannot effectively verify Soviet compliance with the treaties as they now stand. With respect to a CTB, there are serious verification problems, and national security implications of proceeding now to negotiate a CTB.

As the President stated in his 1985 report to the Congress on Soviet non-compliance with arms control obligations, there are large verification uncertainties and ambiguities with respect to the TTBT and PNET. However, for a number of tests, the totality of evidence indicates likely Soviet violation of the TTBT's 150 kiloton threshold. In addition, on a number of occasions, Soviet underground nuclear tests have vented to the atmosphere, and radioactive debris from these tests has been detected beyond Soviet borders, in violation of the Limited Test Ban Treaty.

In an effort to improve US ability to monitor Soviet compliance with the 150 kiloton threshold of the TTBT, the US has sought on several occasions to engage the USSR in discussions on verification improvements to the TTBT and PNET. Unfortunately, the Soviets rejected all of our approaches. As a demonstration of our seriousness, the President unilaterally and unconditionally invited Soviet experts to measure the yield of a US nuclear test at the Nevada test site. The Soviet experts were invited to bring any instrumentation devices the Soviet Union deems necessary to measure the yield of this test. It is the President's hope that with this first step a way might be opened which could ultimately lead to effective verification of underground nuclear tests. We still hope that the Soviet Union will respond positively to this far-reaching US initiative. As you will readily appreciate, however, the language of H.J. Res. 3 will neither correct existing flaws nor provide any incentive for the Soviet Union to negotiate the necessary improvement to those treaties.

A CTB continues to be a long-term objective, to be achieved in the context of broad, deep, and verifiable arms reductions, substantially improved verification capabilities, expanded confidence-building measures, and the maintenance of an effective deterrent. The first step toward this goal—and the step to which the US has given priority—is the pursuit of equitable and verifiable arms reductions in the current Geneva negotiations on nuclear and space arms with the USSR.

We are now entering a critical period in our diplomacy with the Soviet Union. The third round of the nuclear and space talks in Geneva is just getting underway, the President will meet soon with Soviet Foreign Minister Shevardnadze, and subsequently with General Secretary Gorbachev in Geneva. During this period, it is essential that Congress and the Administration show unity to the maximum extent possible, denying the Soviets any opportunity for exploiting domestic political debate on important arms control issues. In this connection, I want to express the Administration's procedural and substantive concerns about the proposed debate of House Joint Resolution 3, "To Prevent Nuclear Explosive Testing".

Due to our substantive problems with H.J. Res. 3, the Administration cannot support its passage. Moreover, in light of the foregoing considerations, we believe a potentially fractious debate on this resolution at this time would be most counterproductive. It would project an image of internal discord on arms control matters and thereby weaken the President's hand on the eve of his meeting with Gorbachev.

We ask that Congress continue its deliberative process in ways which maintain and strengthen our ability to pursue our common goal—deep and verifiable reductions in nuclear arms and reduction in the risk of nuclear war—in the responsible manner which we now have underway.

Sincerely yours,

GEORGE P. SHULTZ.

NUCLEAR TESTING—H.J. RES. 3

The Administration has substantive problems with both major recommendations of H.J. Res. 3: ratification of the TTBT and resumption of negotiations toward a CTB.

Our priority goal is to enhance the means of verification of the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty. The President's recent invitation to Soviet experts to visit the US test site to measure the yield of a US nuclear test aims to set in motion a process that could increase confidence and cooperation between our nations regarding limitations on nuclear weapons testing.

A comprehensive test ban continues to be a long-term objective of Administration arms control policy, in the context of broad, deep and verifiable nuclear arms reductions, substantially improved verification capabilities, expanded confidence-building measures, and the maintenance of an effective deterrent. The verification of a test ban, however, remains a major problem.

Because of serious concerns about the national security implications of a CTB in current circumstances, including problems related to verification, compliance, and deterrence, the US has not resumed the trilateral CTB talks since they recessed in 1980. In the existing environment, the security of the United States and our allies depends on a credible US nuclear deterrent, and nuclear testing plays an important role in ensuring this deterrent.

The next 60 days will be an extremely critical period in our diplomacy with the Soviet Union. The third round of NST talks has resumed in Geneva. The President will meet soon with Soviet Foreign Minister Shevardnadze and, subsequently, with General Secretary Gorbachev. It is a period when full Congressional support for Administration arms control policy is essential for success in our diplomatic efforts.

H.J. Res. 3 however creates the very situation we wish to avoid. We believe a potentially fractious Congressional debate on this resolution at this time would be most counterproductive. It would project an image of internal discord on arms control matters and provide the Soviets an opportunity for exploiting domestic political debate on important arms control issues.

The Administration appreciates the substantial Congressional support for the US negotiating objectives in Geneva.

House Joint Resolution 272 embodies many of the Administration's long-term policies concerning arms control and national security, including meaningful, verifiable nuclear testing limitations.

Deterrence is at the center of US national security policy. H.J. Res. 272 points out the real necessity of continued nuclear testing in order to ensure the viability of the US deterrent. It further stresses that any test ban must be verifiable and must be made in the context of deep and verifiable arms reductions.

We must examine arms control measures objectively and seek resolution of the three specific questions so critical to their success—verification, compliance and reciprocity—so as to strengthen and encourage confidence and movement in offensive arms reductions. We believe this necessary approach is present in H.J. Res. 272.

LOUIS FARRAKHAN: MERCHANT OF VENGEANCE

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. SOLARZ. Mr. Speaker, in a few days, Rev. Louis Farrakhan will hold a rally at Madison Square Garden in New York City. Once again, a man who has rightly been called the most dangerous anti-Semite in America will have a highly visible forum to set forth his despicable views.

Under our cherished Bill of Rights, not even the most detestable bigot can be denied such a public platform. But if our democratic system offers Louis Farrakhan an opportunity to spread his message of intolerance, it also summons the rest of us to denounce this merchant of vengeance for his vilifications of the Jewish people.

For anyone doubting Louis Farrakhan's evil intent, the revelations this week of his

cooperation with an individual who is the former head of the Ku Klux Klan in California and the current leader of the White People's Political Association should prove particularly instructive. Louis Farrakhan has entered into an astonishing alliance with white supremacists. What has united this self-professed advocate of black self-help with the racist fringe of white America? An abiding belief, indeed an all-consuming passion, for anti-Semitism. His hatred of the Jewish people has driven Louis Farrakhan into the arms of some of the most bitter and implacable enemies of black advancement, individuals who are the spiritual heirs of those who were lynching black people in this country not so many years ago.

His protestations to the contrary, Louis Farrakhan's anti-Semitic ravings have not been wrenched out of context. What possible context can justify mocking the memory of the Holocaust or labeling Judaism a "gutter religion"? Traveling from city to city, Louis Farrakhan seeks to poison the public discourse. But we can find the antidote for his anti-Semitism if all of us take offense and then take the offensive against him.

Louis Farrakhan may fancy himself a one-man wrecking crew of black-Jewish relations. But the ties between our two communities cannot be severed by a single bigot. There are, to be sure, differences between blacks and Jews on a number of issues, just as there are differences within the black and Jewish communities themselves. But from the campaign for social justice in America, to support for the survival and security of Israel, to the actions we have taken against apartheid, black and Jewish leaders have constructed a coalition of conscience for human dignity and freedom. Together we can withstand the assault on decency from Louis Farrakhan. Together we can expose and condemn his racist diatribes for what they are—a diversion from solving the real problems in our country and an invitation to widespread intolerance and racial and religious bigotry. Long after the venomous words of Louis Farrakhan have faded from Madison Square Garden, we can continue working together, refuting his message, reinforcing our mutual respect, reaffirming our support for an enlightened agenda in our pluralist society.

SOVIET ACTIVE MEASURES: A THREAT TO THE FREE WORLD—PART 1

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. HYDE. Mr. Speaker, the Soviets are expert manipulators and wizards in deception. On many occasions, I have been amazed at how well they and their allies have mastered the fine points of the propaganda business. All too often, their aggressive hard sell and manipulation of the news sounds quite convincing. They label the United States as the great evil of the world and call themselves peace-loving people who fight for the downtrodden. In the past few years, massive Soviet involvement in the European peace movement is one example of how effective their propaganda efforts can be. The Soviets and their allies are past masters of clever techniques known as "active measures."

I want to share excerpts from an interesting publication on these techniques which are designed by the Soviets to subvert, deceive, and disinform. Active measures are both overt and covert and can include control of the media, written disinformation, use of front organizations, clandestine radio broadcasting, economic activities, military operations, and terrorism. These active measures are an adjunct to traditional Soviet diplomacy. All in all, they are effective instruments used against the West.

I am certain that many of my colleagues have heard about and read about some of the more classic cases of Soviet active measures which have been directed against our country and our allies. Communist strategy is quite clear about their future plans. They aim at replacing capitalism in the world with communism. In standard Communist ideology, struggle with the Western World is a given, and we in the free world should not be surprised about the goals of the Soviet Union in this regard.

With these thoughts in mind, I recommend that my colleagues read the first part of "Active Measures, Quiet War and Two Socialist Revolutions," by Lawrence B. Sulc. The second and third parts of the Nathan Hale Institute publication will appear in tomorrow's and the following day's RECORD.

ACTIVE MEASURES, QUIET WAR AND TWO SOCIALIST REVOLUTIONS

PREFACE

This is not a product of original research. It was not meant to be. It is a modest compilation of some important points from other more detailed works concerning the nature of the war the Soviet Union is waging against the West (principally the United States), its objectives in that war, and some of the means it is using to achieve its objectives. Among those means is the uniquely Soviet phenomenon, *active measures*, a kind of *quiet war*, if you will. The subject of active measures has only fairly recently begun to be examined in detail in unclassified sources. This study contains a brief summary of active measures contained in certain recent open sources; unfortunately, however, for lack of time and space, much good material could not be dealt with. No offense is intended toward those whose work has not been mentioned.

Soviet objectives in its self-appointed struggle with the West are not new. Like Hitler in *Mein Kampf*, Lenin carefully spelled out his plans for everyone to read well over half a century ago. Non-communists, however, are often amazed when exposed to Lenin's ideas for the first time and even anti-communists are often surprised at Lenin's brazen candor. This candor incidentally, is periodically candidly reaffirmed by ruling Soviet leaders.

It is worthwhile for those opposed to, or merely interested in, totalitarianism to be reminded from time to time of just what it is the West is up against in dealing with the Soviet variety. If now and then someone unfamiliar with the nature of Soviet thought and action acquires an awareness of them by means such as this publication, then so much the better.

I have not dealt here with the serious problem for the West, especially the United States, presented by Soviet espionage. Soviet intelligence collection *per se* is not within the scope of this study. Nonetheless, like most other things the Soviets undertake, intelligence is not an end in itself but contributes to the realization of important Soviet foreign policy goals. For example, the theft of technology by the Soviet Union is a particularly serious problem for the West. Science and technology in the Soviet Union and their maintenance by imports from abroad (legally or illegally) are integral aspects of economic warfare which, in turn, promotes Soviet economic, military and political objectives.

SOVIET ACTIVE MEASURES

"To the danger of espionage is added *active measures*," as President Ronald Reagan has said, "designed to subvert and deceive, to 'disinform' the public opinion upon which our democracies are built."

A number of books and articles have been published recently on Soviet active measures. Active measures are an integral part of Soviet diplomatic, political, economic and military programs in every stage. They are a part of Soviet doctrine, strategy and day-to-day operations as they are a fundamental part of Soviet foreign policy.

An interagency group of the Executive Branch defined active measures as follows:

1. The Soviets use the term active measures (*aktivnyye meropriyatiya*) primarily in an intelligence context. Within that context, the term is used to refer to active operations intended to provide a policy effect, as distinct from espionage and counterintelligence. But the Soviets do not limit the concept of active measures to intelligence alone. Active measures are an unconventional adjunct to traditional diplomacy. They are quintessentially an offensive instrument of Soviet policy. Specifically, they are intended to influence the policies of foreign governments, disrupt relations between other nations, undermine confidence in foreign leaders and institutions, and discredit opponents. Active measures, thus, consist of a wide range of activities, both overt and covert, including:

Manipulation or control of the media.
Written or oral disinformation.
Use of foreign Communist parties and front organizations.
Manipulation of mass organizations.
Clandestine radio broadcasting.
Economic activities.
Military operations.
Other political influence operations.

2. The range of activities included under active measures is broader than that covered by the U.S. term covert action. In American parlance, overt activities, such as officially sponsored propaganda, actions by accredited diplomatic and official representatives, and activities of friendship and cultural societies, are automatically excluded from the range of covert action.

SECRET POLITICAL ACTION

The purpose of secret political action, as in the case with overt propaganda, is to persuade, manipulate, mislead, and deceive.

The two activities are closely related and overt propaganda themes are often promoted by covert means. Both overt and covert active measures are directly related to Soviet foreign policy objectives. While the Soviets engage in a variety of secret operations, to promote their foreign policy objectives, special emphasis is placed on international front organizations, agent-of-influence operations and forgeries. To understand what the United States is dealing with, it is essential to understand how Soviet foreign policy is made, how active measures fit in, and that the same people devise both. It is necessary, also, to understand the International Department.

THE INTERNATIONAL DEPARTMENT

In "A Study of the International Department of the CPSU: Key to Soviet Policy," Leonard Shapiro, professor of political science, London School of Economics and Political Science, said:

"One is, of course, used to these theories of conflicting groups inside the Soviet hierarchy, pulling in different directions. Journalists love them and academics are not always immune from their fatal charm. It is, however, alarming to find so erroneous a notion of how the Soviet Union conducts its foreign policy prevailing at what appears to be the highest government level. At the basis of this misconception, which could have serious consequences if it should become current among those who are responsible for the conduct of United States foreign policy vis-a-vis the Soviet Union, lies the failure to understand the role played by the International Department of the Central Committee of the Communist Party of the Soviet Union (CPSU)."

In his study, Shapiro traces the evolution of the International Department from the Foreign Affairs Department formed in the Central Committee after the demise in 1943 of the Comintern. In 1957, the Foreign Department was divided into three departments, one for Relations with Communist and Workers Parties of Socialist Countries, controlling the bloc; a second for Cadres Abroad, linked to the KGB, and responsible for instructing overseas cells of the CPSU (cells within missions abroad) and maintaining a register of members of the CPSU overseas, the latter being virtually an intelligence function; and, finally, the core of the Foreign Affairs Department, the present International Department. From the beginning to this day, this department has been headed by Boris N. Ponomarev, a former high official of the Comintern.

POWER AND PRESTIGE

The ID is powerful and prestigious and clearly more important than the other more routine, technical departments of the Central Committee. It has considerable resources of its own and can and does draw on those of other departments as well and the research institutes attached to the Soviet Academy. It is responsible for, among other things, publishing Problems of Peace and Socialism, the English language edition of which is called World Marxist Review, official Soviet ideological publication for foreign instruction. It also controls the international Soviet front organizations.

A DECISIVE INFLUENCE

The International Department surpasses in importance and authority the Ministry of Foreign Affairs, which, according to Shapiro, "has no muscle whatever." Shapiro goes on to say:

"It may be added that it is normal Soviet practice to maintain in every branch or sphere of central government a system of dual control: an appropriate department of the Central Committee to co-ordinate intelligence and to brief the Politburo, and in general to exercise tutelage, if not authority, over the relevant ministry or government agency. The emergence in 1943 of the Foreign Affairs Department of the Central Committee was thus fully in accord with the established pattern of Soviet political practice.

"It seems therefore beyond dispute that the International Department is the element in the Soviet decision-making process which gathers information on foreign policy, briefs the Politburo, and thereby exercises, subject to the Politburo, decisive influence on Soviet foreign policy. In fact, Ponomarev stated the position quite accurately when he said: 'All the fundamental problems of foreign policy come under the scrutiny of the Central Committee of the CPSU and its leadership where they are examined and comprehensive decisions are taken—in the mainstream of the Leninist international strategy of the CPSU'."

A UNIFIED FOREIGN POLICY

Shapiro sums up by saying, "that Soviet foreign policy, so far from being torn by party-state rivalry, is a unified, co-ordinated whole in which, after Brezhnev, the leading role belongs to the International Department of the Central Committee of the CPSU, which attempts to bring into line both state foreign policy and the part which foreign communist parties are expected to play in the policy as a whole."

THE CRISIS IN LIABILITY INSURANCE IS WIDESPREAD AND GROWING FAST

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. FLORIO. Mr. Speaker, a dangerous trend has taken hold in the private market for commercial liability insurance. Insurance buyers across the country are finding that liability coverage is either prohibitively expensive or totally unavailable for certain risks.

The trend is growing at an uncontrollable rate, and severely limiting the availability of essential services ranging from child care to hazardous waste cleanup.

On September 19, 1985, the Subcommittee on Commerce, Transportation and Tourism held a hearing, thus marking the beginning of a formal investigation into the high cost and scarcity of liability insurance.

The following article describes the breadth of the problem and the fast pace at which it is growing.

[From the Washington Post, Aug. 8, 1985]

LIABILITY INSURANCE SKYROCKETS—LITIGATION, LOSSES PUT INDUSTRY IN CRUNCH

(By Michael Abramowitz)

William Crawford is the insurance agent for Fisher, Gordon Architects, a district firm that will do about $5 million in work this year and says it has never had any legal problems with a client. So Crawford was more than a little surprised this spring when he was informed by the Insurance Company of North America that it would not renew his client's policy for liability insurance.

About 20 other firms would not even quote Crawford a price for the coverage he sought. Finally, he found two firms willing to provide coverage—but only at sharply higher premiums. Fisher Gordon now pays about $15,000 for $1 million in coverage. A year ago, that coverage was available for $3,500.

Crawford's predicament is far from unique. The medical malpractice "crisis" of escalating judgments and legal costs has spread to most other professions and businesses that need liability insurance. The list runs the spectrum of risk areas: doctors, lawyers, architects, engineers, accountants, stockbrokers, real estate agents, insurance agents, directors of corporations, nurse-midwives, fishermen and fireworks makers, states, municipalities, transit systems and companies that remove toxic wastes.

Not only have premiums risen anywhere from 50 percent to 500 percent in some lines of liability insurance in the last year, but the availability of insurance has shrunk dramatically. A few groups are going without protection, according to insurance executives.

"You've seen tremendous rate increases in the past, but you've always seen markets staying in there," said Stephen Gerstman, president of INAPRO, the professional liability underwriters for the Cigna Corporation. This time, he added, "There's not going to be a market for eveyone to get insurance"

The reason for the crunch is two-fold. Insurance executives primarily blame the explosion of litigation, and the growing tendency of courts to toughen standards of liability in favor of victims of malpractice or malfeasance.

A second factor is the volatile economics of the property and casualty insurance business, which suffered its worst year ever in 1984. Underwriting losses for the industry amounted to $21 million, outpacing investment income for the first time since 1906, the year of the San Francisco fire. David Seifer, who follows the industry for First Boston Corp., said the industry suffered a $2.7 billion loss in all lines of general liability except medical malpractice. In non-medical lines, the industry lost about $1.47 for every dollar received in premiums, and results were even worse in medical malpractice lines, Seifer said.

To stem the red ink, insurance companies have resorted to a host of defensive measures—jacking up rates, cancelling business, refusing to write certain policies and stiffening the terms of their coverage.

The result of these measures has been a significant, across-the-board contraction of the liability insurance market.

INAPRO, one of the largest writers of liability insurance in the country, said the financial beating it suffered forced it to scale back its coverage by about half in the last year. Gerstman said the company no longer will write insurance for obstetricians, gynecologists and accountants, all professions that have been sued in increasing numbers. The company has raised rates so dramatically in other lines, in some cases quadrupling prices, that some professionals have been forced to cancel their policies.

The scene is similar elsewhere:

In the last year, about a dozen companies have dropped out of the market for architect insurance, leaving most architectural firms with the choice of two or three companies, say industry officials. Peter Hawes,

president of the Design Professional Insurance Company, one of the few remaining underwriters that insures architects, said that average rates have doubled in the last two years.

In New York, only one firm now writes liability insurance for accountants, said an official with the state's Society for Certified Public Accountants. A few years ago, there were about a half dozen.

Premiums of the Big Eight accounting firms, which are insured by syndicates at Lloyds of London, have risen an estimated 125 percent, while their maximum limits declined from $200 million to $150 million in the last year, said Donald J. Schneeman, an official with the American Institute of Certified Public Accountants.

Up until a few months ago, policies for large law firms were written by five major carriers. One has since withdrawn from the market, and two have imposed rate increases of up to several hundred percent, according to figures compiled by the Attorneys' Liability Assurance Society Ltd., an underwriter which soon expects to raise its rates by about 50 percent.

Five western states were recently told that they would lose their liability coverage, as were about two-thirds of the nation's 2,500 practicing nurse-midwives. And several operators of local child care facilities told a congressional committee last month that they would close their doors this year because their liability insurance policies were canceled.

It is now virtually impossible for any contractor or engineer to find insurance for hazardous-waste cleanup or asbestos removal. Insurance companies simply are not willing to touch those fields until questions are resolved about the extent of contractor liability and the liabilities imposed by federal Superfund legislation.

The cumulative effect of these cutbacks could have a deleterious effect on social welfare, professionals say. Doctors and lawyers openly speak of turning away patients or clients because of the fear that they might be sued. Architects say that some firms will be less willing to tackle difficult projects under the current litigious climate.

As for citizens who have been harmed by negligence or malpractice, they could have nowhere to turn for recompense if their doctor, lawyer or architect is without insurance, as executives say is increasingly the case.

The problem has even prompted congressional concern. Rep. James J. Florio (D-N.J.), chairman of a House commerce and energy subcommittee with jurisdiction over the industry, said Friday he was planning to hold hearings to investigate. He said he was worried about a "pattern in which insurance companies don't have an interest in insuring anymore."

As the insurance industry sees it, the basic cause for the crunch is the rise of litigation and punitive awards in the courts. The problem, executives say, is that the unpredictability of the courts has made it impossible to maintain a rate structure that is adequate to pay for future losses.

"Because of the out-of-control-tort system, insurance companies have found they cannot price the product," said Gerald Lewinsohn, an industry analyst with Merrill Lynch. Jerry Thompson, an underwriting officer at St. Paul's Fire and Marine Insurance Company, said the insurance problem is a "direct manifestation of the claims being made against the professions."

But some industry analysts say the country's tort system is not so much to blame for the current problem as the insurance industry itself and the tremendously cyclical business of providing property and casualty coverage.

"It is odd that the crisis seems only to last with the cycle," said J. Robert Hunter, the former head of the Federal Insurance Administration. In 1974 and 1975, when the casualty-property industry last hit bottom, he said, there were similar cries of a "crisis" in medical malpractice insurance. But the real problem, Hunter said, lies with the "manic-depressive" nature of insurers.

At the top of the cycle they cut prices. . . . Hunter testified before Congress last week. "At the bottom they cancel everyone, even businesses that never once had a claim, just because of the fear they feel of any possible risk." Hunter now heads the National Insurance Consumer Organization.

Industry officials don't entirely disagree with his assessment. They acknowledge that the market is contracting following an unusually long "soft" period that was ushered in with the high interest rates of the late 1970s.

Sharp competition among companies drove prices down, often to imprudently low prices, according to insurance executives. Insurers were willing to slash prices because they expected to win back any money lost in premiums by investing their money at high interest rates. When rates fell during the past several years, however, companies did not have enough money to pay the claims that started to roll in.

"The business looks lucrative at any point in time," said Frank Patalana, vice president of CNA, a Chicago-based underwriter of liability insurance. But, he added, many of the companies that jumped into the game in the late 1970s didn't reserve enough money for future losses.

The market has also dried up in certain areas of coverage because of the risk ratios that state insurance agencies require companies to maintain to make sure claims can be paid off.

The rule of thumb is that the ratio of premiums written ought not to exceed a company's surplus funds by more than 3 to 1.

With surpluses driven down by losses, however, companies are constrained in the amount of premiums they are allowed to write.

Insurance executives say the ultimate solution is legislative reform of the legal process that produces the costly, often crippling lawsuits.

"Reform has got to come, if for no other reason than the fact that the commercial insurance industry is not going to reduce itself to a social agency," said Albert Salvatico, managing director of the insurance brokerage firm of Marsh & McLellan Inc.

This kind of tough talk worries critics of the industry, who feel that the tort system has provided the last means of defense for citizens against professional malfeasance.

"I don't think policy makers should change tort law under this kind of pressure," said NICO's Hunter.

"The guy in the least position to lobby is the guy who's going to be the victim. Let's not deny the ultimate hammer to the little guy."

Hunter said the first priority of lawmakers ought to be to figure out how to smooth out the economic cycle in the insurance industry.

He suggested that Congress grant power to federal agencies to offer reinsurance, an approach that he said kept insurers in the inner cities during the riots of the late 1960s.

Yet others outside the industry say the problem is more profound. David Austern, director of education at the American Trial Lawyers Association, said the economy simply cannot support the interpretation of liability toward which the courts are heading.

"It is certainly the case that when you add up new individual legal entitlements, you can have a new social effect that was not intended," added William Galston, the former issues director for Walter Mondale, who now heads economics and social programs at the Roosevelt Center for American Policy Studies.

"Not every victim of everything that goes wrong can be compensated one hundred percent," Austern said. "There's not enough money out there."

In a similar vein, Richard K. Willard, acting assistant attorney general in charge of the Justice Department's civil division, recently told the American Chamber of Commerce that the current explosion of tort litigation in the courts threatens to severely damage the economy.

"The use of new theories of liability and 'damage' awards unrelated to any harm the defendant has done to the plaintiff poses a fundamental question," Willard said in a speech delivered June 27. "Will decisions about allocation of resources be made by the market, with legislative corrections where there is a societal consensus? Or will they be made by a largely unelected judiciary imposing its risk preferences on the rest of society."

THE 13TH ANNIVERSARY OF THE ABM TREATY

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. DORNAN of California. Mr. Speaker, today is the 13th anniversary of the ABM Treaty. I feel it is an opportune time to discuss the inadequacies of the SALT process that led to the ABM Treaty, encouraged Soviet noncompliance and current Soviet strategic defense programs.

The ABM Treaty is hailed by the liberal arms control establishment as the "jewel" of the MAD-capped theory of mutually assured destruction. It is this immoral theory that implies "America held hostage" is the best way to defend against Soviet aggression. It is this antiquated treaty of a bygone era that is becoming the greatest obstacle to the development of a comprehensive strategic defense for the United States.

The Soviet Union has never abandoned its effort to defend against ballistic missiles. The Kremlin leaders have used the inter regnum between the signing of the ABM Treaty in May 1972 and the present to continue to research, develop, test, and deploy ABM systems in direct violation of the ratified agreement. In addition, Soviet efforts in antitactical missile defense, surface-to-air missiles, antisatellite lasers and space-based lasers have circumvented the original provisions and intent of the ABM Treaty. The result is that while the United States has scrupulously adhered to its part

of the treaty, the Soviet Union has steadfastly moved forward. Unfortunately, it wasn't until the past few years that the extent of the Soviet programs became known.

For almost two decades the American public has been told an arms race is underway between the United States and the Soviet Union. The MAD-capped arms control establishment first told the American public the rationale behind the Soviet buildup was to catch up to the United States. Then we were told they were only trying to maintain parity with the United States. President Johnson's Secretary of Defense Robert Strange McNamara, the principal designer of MAD, predicted in 1967 that once the Soviet leadership reached a position of parity with the United States both sides would feel secure. He directed that all modernization of our strategic forces be halted at current—1967—projected levels.

The most glaring problem of MAD is that the Soviet Union never subscribed to it. After all, how mutual is a deterrence theory when one side refuses to play along? The United States in November 1969 began serious arms control negotiations with the Soviet Union. The original goal of SALT was to limit offensive nuclear forces and couple defensive arms limitations directly to limits on offensive weapons—especially those offensive weapons with the capability of achieving a disarming first strike.

The agreement was reached in May 1972, ratified by the U.S. Senate on September 30, 1972, and entered into force on October 3, 1972. SALT was hailed as the first step in achieving a meaningful cap on nuclear weapons proliferation between the two superpowers.

Since 1967 the United States has unilaterally dismantled over one-third of its warheads and half of its total megatonnage in its nuclear arsenal. We have unilaterally dismantled over 1,000 medium-range, nuclear capable bombers, over 300 long-range bombers, canceled at least two follow-on bombers and curtailed yet another bomber program—the B–1. The first B–1B was only delivered to the Air Force on June 29, 1985.

We have not deployed a new intercontinental ballistic missile [ICBM] system since the early 1970's and have retired nearly all 54 of our largest land-based missiles, the Titan II. We have removed over 2,000 warheads from Europe. We have only begun to modernize our theater nuclear forces. The process that will take until 1989 to complete and will account only for 572 warheads on 224 launchers as compared to the 1,323 warheads on 441 SS–20 launchers deployed today by the Soviet Union.

We have dismantled all of our Polaris submarines, and have begun to dismantle our Poseidon submarines in compliance with a SALT II agreement that we have yet to ratify. The new Trident submarines are just coming on line, but will not numerically replace the Poseidons that are leaving the fleet.

After 4 years of President Reagan's attempt to modernize our strategic posture, the situation continues to deteriorate. The latest national intelligence estimate [NIE] is an unequivocal judgment indicating a dangerously worsening state of imbalance between the strategic and tactical nuclear forces—offensive and defensive—of the United States and the Soviet Union with or without SALT constraints. The quest for Soviet military supremacy can no longer be in doubt.

We never seriously moved to deploy an active missile defense. We dismantled our only operational ABM site allowed by the ABM Treaty in 1976. Research and development allowed under the treaty was leisurely and without direction. To illustrate this point, at the time the ABM Treaty was signed over 50 percent of our national laboratories budget was devoted to ABM research and development. Less than 1 year later only 1 percent was directed toward ABM. The Soviet Union, however, began to research, develop, test, and deploy in earnest as we moved in the opposite direction.

Soviet emphasis on achieving superiority was evident even while we negotiated SALT I and the ABM Treaty. Secretary of Defense Laird, in his fiscal year 1971 report to Congress, stated.

As we reduce our defense spending and move further into negotiations, we should have no illusions about the current state of world affairs. I am obliged to report to you, for example, that the Soviet Union is not making similar reductions in its defense budget. In fact, the Soviet Union is pulling abreast of us in many areas of military strength and ahead of us in others. The Soviets are continuing the rapid deployment of major strategic offensive weapons systems at a rate that could, by the mid-1970's, place us in a second rate strategic position with regard to future security of the free world.

During the SALT I debate only four Senators and a handful of Representatives came out against the treaty. They were not convinced by the administration's arguments, nor the euphoria of the MAD-capped fear merchants, that the inequality inherent in the agreements was acceptable because the United States maintained qualitative advantages, that it would moderate Soviet programs and lead to better and more equal agreements. They were correct in their pessimism. As we have seen the Soviet programs continued to increase during the so-called era of détente; SALT II was an even worse strategic disaster; and, the qualitative U.S. advantages have been lost. The entire arms control process has contributed to a lessening of American security, increase in U.S. vulnerability, inaction, and a potential for crisis instability. Rather than complement national security, arms control has replaced national security in the minds of many.

The original United States intention and object of the SALT process was to reach long-term agreements which would limit strategic offensive and defensive arms in such a manner that would enhance strategic stability while lessening the need for future arms programs. It was believed strategic arms control would reduce future threats to our deterrent while moderating the arms programs of both sides, particularly those regarded as most destabilizing, especially the huge Soviet SS–9 ICBM's.

In order to achieve these goals the United States was willing to forgo strategic superiority that President Kennedy swore to maintain and averred was necessary to maintain world peace. We became willing to abandon the posture that our strategic planning had rested and accept a position of parity with the Soviet Union.

The Soviet Union has sought and continues to seek military superiority. SALT has done nothing to arrest this process, or even slow down Soviet strategic programs once under way. If anything the opposite is true. While the United States limited, curtailed, and even cut strategic programs to stay within our interpretation of SALT, the Soviet Union relentlessly pressed forward with one new generation of systems after another until they not only surpassed us in total aggregate numbers of deployed—and just as important stockpiled—strategic systems, but in technology as well.

SALT merely codified Soviet programs. There is little empirical evidence to show the Soviets ever intended to go much beyond the ceilings that capped Soviet and U.S. launchers. The projections of unlimited Soviet growth in strategic weapons were—and remain—Western propaganda to sell poor agreements.

The Soviets were fully aware that U.S. offensive forces had been programmed years before and if fact, by 1967, had attained programmed levels. There were no plans to increase strategic forces and, with a recalcitrant Congress, no hope to threaten any increase as a negotiating tool.

By any objective standard SALT has been a failure. The issue of Soviet noncompliance with the ABM Treaty is merely the tip of the iceberg. The Soviet Union has a very poor record in compliance with international agreements and treaties; they have an excellent record with getting away with their breaches, circumventions, and outright violations. President Reagan is not the first U.S. President to take issue with Soviet noncompliance. At least five times since the end of World War II, the U.S. Government has conducted a study of Soviet violations of international agreements. In 1954, 1959, 1961, and again in 1968 congressional studies determined over 50 such violations and over three dozen instances of circumventions. In 1961 and 1963, the Kennedy administration reached similar conclusions.

Even if we disregard the Soviet violations of the first 50 years of communism, the seedy record of Soviet compliance during the SALT era corroborates, not vindicates, the Communist leaders in Moscow. The Soviet leadership negotiate treaties and agreements when the objective circumstances surrounding the negotiations appear to them to be favorable. They do not allow extraneous events to distract them. The tenets set forth by Lenin and Stalin still hold.

In war never tie your hands with considerations of formality. It is ridiculous not to know the history of war, not to know that a

treaty is the means of gaining strength . . . The history of war shows as clearly as clear can be that the signing of a treaty after defeat is a means of gaining strength.—(Lenin, Collected Works)

A diplomat's words must have no relation to action—otherwise what kind of diplomacy is it? Words are one thing, actions another. Good words are a mask for the concealment of bad deeds. Sincere diplomacy is no more possible than dry water or iron wood.—(Stalin, Collected Works)

I could go on at length and quote Khrushchev, Brezhnev, Andropov, and even Gorbachev. The result would be the same. The Soviet leadership does not believe in good faith actions, or unilaterally giving up an advantage. They live by the maxim, "What is mine, stays mine; what is yours is negotiable." The agreements that they have signed bind their opponents to specific wording while allowing them to exploit cleverly worded loopholes which allow them the flexibility to continue their military and political priorities.

SALT has codified, not limited, Soviet programs. The Soviets have continued their strategic modernization programs unfettered by arms control restraints. The United States, on the other hand, has taken no action to undercut existing arms control agreements, including the fatally flawed SALT II agreement. (See the President's June 10, 1985, SALT compliance report to the Congress printed below.) How could we? Even if the President decided it was in our best national security interest to circumvent or violate a treaty, even for a short time, he would be prevented from doing so by his own lawyers at Defense and State. Our form of govenment has too many watchdogs rather than corporate counsels.

The patterns of the past have been exacerbated during the past few years. President Reagan has released three reports outlining the growing number of outright violations of existing treaties, agreements, and unilateral commitments made by our negotiating partner the Soviet Union. Looking back, with 20/20 hindsight, the Soviet Union negotiated with one eye to circumvention or outright break out of agreements. They have constantly and consistantly tested the U.S. reaction to their actions. We have failed to react and respond in each and every case. The Special Consultative Commission, set up in SALT, to handle questions of compliance has been a dismal failure.

U.S. responses are necessary to impress upon the Soviet Union that we will no longer go the extra mile to explain away Soviet actions. If the Soviet Union truly desires arms control agreements with the United States they will clear the air, once and for all, of the stench of noncompliance, or we will take proportionate responses to the violations.

There are a number of response we can take. One such action is to continue to modernize our strategic deterrent. That is why yesterday I introduced, into the House of Representatives, H.R. 3490, a bill that would prohibit the closure of the B–1 production line until the President certifies the Soviets are in compliance with existing strategic arms control treaties, the advanced technical bomber is in production or the original programmed 244 aircraft is reached.

Just prior to the outbreak of World War II, Winston Churchill declared "the worst crime is not to tell the public the truth." I consider full congressional and public understanding of the true state of the strategic imbalance an essential ingredient for the long-term survival of democracy. I agree with my Democratic colleague, the recently deceased, well respected Senator from Washington, Scoop Jackson, when he described U.S. reaction to past Soviet violations. He said,

To counter the dangerous shift in the strategic balance we require first a forthright and unvarnished assessment of some unpalatable military and political facts. Caught in all the current cross fire about hawks and doves to many politicians are acquiring the protection habits of the ostrich.

If we do not avail ourselves of the information provided by our own intelligence sources then we are derelict in our public duty. If we continue to allow the MAD-capped fear merchants to dominate the debate and prevent the modernizaiton of our strategic deterrent and the development of an effective strategic defense, we may forfeit on the peace and security we all seek for our children and our children's children. That is why I initiated a congressional letter to the President's National Security Adviser, Robert McFarlane, to request the Speaker of the House, to allow the administration to brief Congress on Soviet strategic defense programs and laser developments before the summit in November. This briefing on Soviet strategic defense programs will be presented to Congress on October 10, 1985. I believe Congress can better support the President if we have a firm understanding of exactly what the Soviet Union is up to.

The euphoria surrounding the summit is premature. The western press is once again enamored over a Soviet leader and affording him the opportunity to spread Soviet disinformation and sell his agenda to the American and European public. Gorbachev's sole goal is to take the initiative, and the strategic defense initiative, away from the President.

The President must reestablish the initiative, and win the support of the majority of us in Congress as well. I believe that the first item on the summit agenda should be human rights. Jewish immigration should be at the top of that long list. We need to refocus attention on Soviet disregard for the basic rights that we have enshrined in our Constitution.

Although there are those who would prefer the agenda to focus solely on arms control issues, humans rights can set the stage for more meaningful talks on the crucial issue of peace between the superpowers. Compliance, or rather Soviet noncompliance with past treaty obligations should be the very foundation and sine qua non of all future talks with Communists. If arms reductions are to have any meaning and contribute to world peace, it is essential that all parties comply with existing agreements and show a willingness to comply with their treaty obligations. If the Soviet Union truly wants a successful summit and desires to establish better relations with the United States then, there is absolutely nothing more vital to world security than ensuring compliance. Especially on this the eve of the 13th anniversary of the ABM Treaty—the flawed jewel of arms control.

IN SUPPORT OF H.R. 3510, ON THE RISKS OF SMOKELESS TOBACCO

HON. SAMUEL S. STRATTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. STRATTON. Mr. Speaker, I am delighted to go on record today in support of H.R. 3510, the "Comprehensive Smokeless Tobacco Health Risk Education Act," which incorporates my proposal to ban the advertising of smokeless tobacco on television and radio. I also want to thank Mr. WAXMAN for his leadership in holding hearings on the risks of smokeless tobacco, as well as Mr. SYNAR and Mrs. COLLINS whose proposals on labeling and education have also been included in this comprehensive bill.

The need for this legislation is clear. The National Centers for Disease Control has estimated that as many as 22 million Americans use smokeless tobacco. While cigarette smoking is reported to have declined slightly among teenagers, the use of smokeless tobacco products more than doubled between 1970 and 1979, and is increasing almost 10 percent per year since then. This indicates a serious and costly health risk to our population, one that is being aided and abetted by attractive advertising by the tobacco industry.

Unlike cigarette advertising, advertising of smokeless tobacco products has never been prohibited. Consequently, the tobacco industry has turned its considerable talents, resources and moneys into the unregulated areas of smokeless tobacco, and to great advantage. From what I've seen and read, these TV ads are pretty seductive: big, healthy-looking athletes or country western singers, heroes to young people, are extolling the virtues of chewing tobacco and snuff. The names of the products are attractive: Copenhagen, Skoal, Red Man, even "Happy Days," which conjures up images of the Fonz. And they are also given rather benign, even healthful-sounding flavors such as "strawberry" or "mint." One company also used the very misleading slogan, "Take a pouch instead of a puff," implying that smokeless tobacco is less harmful than cigarettes. In addition, free samples of snuff and chewing tobacco are often distributed to young people. This is an easy way to get children "hooked" because the product contains nicotine, which is addictive. Teenagers are very vulnerable to all these appeals, and such powerful pro-

motion of an unhealthful product should be discouraged.

The Congress, in 1970 and 1973, determined that the power of radio and television was too strong to allow cigarettes to be promoted on the airwaves and banned the advertising of cigarettes and little cigars on those media. I believe the same is true for smokeless tobacco. H.R. 3510 would extend the ban to smokeless tobacco products. I believe it is directly in line with the intent of Congress back in 1970 with the "Public Health Cigarette Smoking Act." In fact, it would close the final loophole in that legislation.

Therefore, in view of the alarming trend toward use of smokeless tobacco, which is encouraged by very attractive advertising campaigns on the powerful media of television and radio, I would urge my colleagues to support H.R. 3510.

HEALTH RISKS OF SMOKELESS TOBACCO

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 3, 1985

Mr. WAXMAN. Mr. Speaker, on behalf of Mr. SYNAR, Mrs. COLLINS, Mr. WHITTAKER, Mr. NIELSON, Mr. STRATTON, and myself, I am pleased to announce the introduction of H.R. 3510, the "Comprehensive Smokeless Tobacco Health Risk Education Act." The legislation addresses a growing public health problem presented by a product known to cause oral cancer and a wide range of serious mouth diseases.

Legislation is urgently needed to slow down the number of young people who are becoming addicted to a product that will seriously injure their health. The legislation has the support of the Nation's most prestigious public health organizations, including the American Cancer Society, the American Dental Association, the American Heart Association, and the American Lung Association.

On July 26, 1985, the Subcommittee on Health and the Environment conducted a hearing on the health effects of smokeless tobacco. The hearing documented an alarming increase in the use of this product by young people. Scientists representing the National Cancer Institute, the American Dental Association and the American Cancer Society testified to the fact that these products can cause life-threatening diseases of the mouth and oral cavity.

We also heard chilling testimony from the mother of a young high school track star. Betty Anne Marsee told of her son's courageous struggle against mouth cancer caused by his addiction to smokeless tobacco. Until Sean Marsee's cancer was diagnosed, he, like many young people today, didn't believe smokeless tobacco could be harmful. He believed there could be little harm from a product promoted by athletes, advertised on television and sold without a health warning.

The increased use of this product in our primary and secondary schools is alarming. Surveys conducted in the State of Texas discovered that 88 percent of the users of smokeless tobacco began before the age of 15. In Oklahoma 21.7 percent of fifth graders and 39.3 percent of 11 graders use smokeless tobacco. These figures contrast sharply with the significantly lower incicence of smoking among these same age groups.

Unlike other drugs of abuse, smokeless tobacco is freely available in most convenience stores and supermarkets. Often it is sold right next to chewing gum and candy. It is little surprise that increasingly large numbers of young people are responding to the allure of advertising and putting a pinch of tobacco snuff between their cheek and gum.

The efforts by manufacturers to promote the sale of smokeless tobacco to youth are aggressive and sophisticated. Through the use of television, the tobacco industry has successfully opened up our secondary schools as a major growth market for smokeless tobacco products.

Mr. Speaker, smokeless tobacco is not a safe alternative to cigarettes. It is not another version of bubble gum.

Smokeless tobacco is a dangerous product. If smokeless tobacco were classified as a drug or a food, the FDA would not permit its sale. If it were classified as a consumer product, the Consumer Product Safety Commission could ban its use. If it were a controlled substance, the Drug Enforcement Administration would be bound to place it under controls reserved for the most dangerous drugs of abuse.

Like cigarettes, smokeless tobacco enjoys a unique position in our marketplace. It is currently exempt from the minimum Federal health and safety safeguards to which other food, drug or consumer products must adhere. Unlike fruits and vegetables, it may contain dangerous residues of pesticides used in growing tobacco. Unlike bacon or beer, it may contain unlimited concentrations of nitrosamines, a well established and potent cancer-causing substance.

Smokeless tobacco also contains a toxic and highly addictive drug called nicotine. When marketed as a pharmaceutical product to help smokers quit, nicotine is available only by a doctor's prescription. When sold in the form of smokeless tobacco, it is available at most corner groceries or supermarkets.

A product this dangerous and addictive shouldn't be advertised on television and certainly shouldn't be sold or promoted to our children.

It is no accident that the increased use of smokeless tobacco among young people has closely paralleled unprecedented increases in advertising—particularly on television.

In 1970 the Congress recognized the powerful effect of TV and radio advertising on youth and ordered cigarette advertising through this media banned. In 1973 TV and radio advertising of "little cigars" were also banned. In 1984, the Congress required the display of multiple health warnings on cigarette packages and advertising.

The Congress must take similar action with smokeless tobacco. We cannot afford to be complacent or tolerant of a product which has the potential of such great harm. We cannot wait 20 years and allow smokeless tobacco to establish itself as a deadly rival to cigarette smoking. If the Federal Government is to exercise its responsibility to protect the public health, its action should be decisive and comprehensive.

H.R. 3510 seeks to make the public aware of the adverse health consequences of this product through education. The bill combines the display of three health warning labels on smokeless tobacco packages and advertising with the development of Federal and State educational activities and a prohibition on TV and radio advertising. The warning labels state the following:

First. WARNING: This product may cause mouth cancer.

Second. WARNING: This product may cause gum disease and tooth loss.

Third. WARNING: This product contains nicotine and may be addictive.

The legislation further provides that the label statements may be periodically revised by the Federal Trade Commission to reflect evolution in scientific knowledge and to assure that the label statements effectively disseminate this information to the public.

In addition, the legislation requires ingredients in smokeless tobacco to be disclosed on the package. If they know about ingredients like nicotine, the public could make more informed choices about smokeless tobacco use. Disclosure would foster competition among manufacturers to reduce or eliminate potentially harmful additives or byproducts that may increase the already high health risk of this product.

Finally, the legislation authorizes the Secretary of Health and Human Services to work closely with States in the development of educational programs and public service announcements to complement the new health warnings. These efforts are especially critical at the primary and secondary school levels where the pressure to begin smokeless tobacco use is so strong. The legislation calls upon the Secretary to encourage and assist States in establishing 21 as the minimum age for the purchase of smokeless tobacco.

Mr. Speaker, I ask that a copy of an article entitled "Sean Marsee's Smokeless Death," from the October 1985 issue of Reader's Digest, be printed in the RECORD at this point. I urge Members to read the article carefully and then join in cosponsoring this much needed legislation.

The article follows:

[A Reader's Digest Reprint]

SEAN MARSEE'S SMOKELESS DEATH

(By Jack Fincher)

(The young athlete was in perfect physical shape—so what harm could there be in dipping snuff? He didn't realize—until it was too late—that where there's smokeless there's terrible danger.)

The angry red spot with its hard core was the size of a half-dollar. It belonged, thought Dr. Carl Hook, in the mouth of a 75-year-old who had been dipping snuff

since the age of three, not on the tongue of the high-school boy who sat across from him. "I'm sorry, Sean," said the Ada, Okla., throat specialist. "It doesn't look good. We'll have to do a biopsy."

Sean Marsee was stunned. He didn't smoke or drink. You couldn't and win 28 medals running anchor leg on the 400-meter relay. A tapered five-foot-five, 130 pounds, Sean had always taken excellent care of his body: watching his diet, lifting weights, running five miles a day six months of the year.

Now this. How could it be? True, he was never without a dip. He used up a can of snuff, a type of smokeless tobacco, every day and a half, holding it in his mouth to get a nicotine jolt without smoking. It was popular among high-school athletes who didn't want to break training. "But I didn't know snuff could be that bad for you," Sean said. "No warning label or anything. And all those ads on TV. . . ."

A MIND OF HIS OWN

Eighteen-year-old Sean had been secretly using "smokeless"—chewing tobacco briefly, then snuff—since he was 12. His mother, Betty, a registered nurse, had hit the roof when she found out. Didn't he know tobacco was hazardous, smoke or no smoke?

Sean refused to believe her. Would sports stars sell snuff on TV if it hurt you? Why, even his coach, Jim Brigance, a bear for conditioning, knew boys on his team dipped and didn't make a big thing of it.

Finally, Betty dropped the subject. It had been Sean who pulled his sister Marian out of the lake when she fell through the ice; Sean who was his sister Milissa's model for an ideal husand; Sean who taught his younger brothers Shannon and Jason to hunt, fish and trap; Sean who planned to join the Army Airborne as a career and to get his college education paid for. The oldest of her five children had a mind of his own.

Besides, Betty, a single parent working the hospital night shift in Ada, had enough to think about just raising the children. Then Sean had come to her with his ugly sore. Betty took one look; her heart sank. And now, Dr. Hook was saying, "I'm afraid we'll have to remove that part of your tongue, Sean."

The high-school senior was silent. "Can I still run in the state track meet this weekend?" he finally asked. "And graduate next month?" Dr. Hook nodded.

A NECESSARY MUTILATION

On May 16, 1983, the operation was performed at the Valley View Hospital in Ada. More of Sean's tongue had to be removed than Dr. Hook had anticipated. Worse, the tumor biopsy was positive. Once the swelling in his mouth went down, Sean agreed to see a radiation therapist.

Before therapy could begin, however, a newly swollen lymph node was found in Sean's neck, an ominous sign that the cancer had spread. Radical neck surgery would now be needed. Gently Dr. Hook recommended the severest option: removing the lower jaw on the right side as well as all lymph nodes, muscles and blood vessels except the life-sustaining carotid artery. There might be some sinking, but the chin would support the general planes of the face.

Betty Marsee began to cry. Sean was being asked to approve his own mutilation—Sean who was so fastidious about his appearance that he'd even swallow his dip rather than be caught spitting tobacco juice. They sat in silence for ten minutes. Then, dimly, she heard him say, "Not the jawbone. Don't take the jawbone."

"Okay, Sean," Dr. Hook said softly. "But the rest; that's the least we should do."

On June 20 Sean underwent a second operation, which lasted eight hours. That same month 150 students and teachers at Talihina High assembled to honor their most outstanding athlete. Sean could not be there to receive his award.

Coach Brigance and his assistant came to the Marsee trailer home to present him with the walnut plaque. They tried not to stare at the huge scar that ran like a railroad track from their star performer's earlobe to his breastbone. Smiling crookedly out of the other side of his mouth, Sean thanked them.

LAST LAP

Miraculously, Sean snapped back. When Dr. Hook saw him that August, he showed no trace of his ordeal except the white incision scar. Five weeks of radiation therapy were behind him. Sean greeted his doctor with enthusiasm, plainly happy to be alive.

He really believes his superb physical condition is going to lick it, Carl Hook thought, driving home. Let's hope he's going to win this race too.

But in October Sean started having headaches. A CAT scan showed twin tentacles of fresh malignancy, one snaking down his back, the other curling under the base of his brain.

Sean had his third operation in November 1983. It was the jawbone operation he had feared—and more. After ten hours on the operating table, he had four huge drains coming from a foot-long crescent wound, a breathing tube sticking out of a hole in his throat, a feeding tube through his nose, and two tubes in his arm veins. Sean looked at Betty as if to say, *My God, Mom, I didn't know it was going to hurt like this.*

The Marsees brought Sean home for Christmas. Even then, he remained optimistic, until the day in January when he found lumps in the left side of his neck. Later, Betty answered when the hospital phoned the results of another biopsy. Sean knew the news was bad by her silent tears as she listened. When she hung up, he was in her arms, and for the first time since the awful nightmare started, grit-tough Sean Marsee began to sob.

After several minutes, he straightened and said, "Don't worry. I'm going to be fine." Like the winning runner he was, he still had faith in his finishing kick.

For the last two weeks of Sean's life, his adjustable hospital bed dominated the trailer's living room. Coach Brigance visited often, sometimes with a check from Talihina-area residents, teachers and classmates who knew how hard-pressed the Marsees must be.

Almost to the end Sean insisted on caring for himself, packing his wound and cleaning and reinserting his breathing tube several times a day.

One day Sean confessed to Betty that he still craved snuff. "I catch myself thinking," he said, *"I'll just reach over and have a dip."* Then he added that he wished he could visit the high-school locker room to show the athletes "what you look like when you use it." His appearance, he knew, would be persuasive. A classmate who had come to see him fainted dead away.

One friend who didn't flinch was John O'Dell, then 29, a former football player from the local fellowship of Christian Athletes. John asked Sean, when he became unable to speak, if he'd like to pencil something to share with young athletes "later." Sean wrote two brief messages. One was a simple declaration of Christian faith. The other was a plea: *Don't dip snuff.*

Early on February 25, 1984, Sean smiled a tired smile at his sister Marian and flashed an index finger skyward. An hour later he died.

TIME BOMB IN THE MOUTH

Last February, Betty Marsee was among 54 witnesses who testified at a Massachusetts Public Health Department hearing on whether to label snuff a hazardous substance. The Marsees had determined to tell Sean's story: "If we didn't speak out, nothing was going to get better."

Scientists testified that the connection between snuff and oral cancer, the nation's seventh leading cause of cancer death, cannot be questioned. The culprit: highly potent cancer-causing compounds called nitrosamines, one of which forms in the mouth through the chemical interaction of saliva and tobacco. According to Stephen Hecht, an organic chemist with the American Health Foundation, a dip of snuff delivers roughly the same amount of nicotine as a cigarette and *ten times* the nitrosamines.

There are now 6 million to 10 million consumers of snuff, and sales are rising 8 percent annually. "The more I dipped, the more I liked it," said Paul Hughes, 18, a six-four football co-captain from North Easton, Mass. "Makes you feel—you know, calms you down. When I tried to stop, I couldn't." Alan Lawrence, his co-captain of the football team in Taunton, Mass., said, "In our school about three-quarters of the kids who play sports do it. As an everyday thing." Added Andover dental hygienist Joan Walsh, "Many equate it with gum chewing."

Scientific witnesses for the Smokeless Tobacco Council argued that no undisputed scientific evidence exists proving its product causes any human disease or is clinically addictive. Nitrosamines have produced cancer in some laboratory animals, but have not been shown to cause cancer in any human being, they pointed out.

But representatives of the American Cancer Society, American Heart Association, American Lung Association, American Dental Society, the U.S. Addiction Research Center and the Centers for Disease Control joined researchers from the National Cancer Institute in condemning the practice of dipping. Concluded Assistant Surgeon General Robert Mecklenburg, chief dental officer of the U.S. Public Health Service: "Why should a chemical time bomb be allowed to tick without warning in the mouths of children?"

Health scientist Elbert Glover of East Carolina University recently conducted two quit-smokeless-tobacco clinics in which only one of 41 participants was able to go for more than four hours without the use of smokeless tobacco. "This, to me," Glover says, "means that smokeless can be highly addictive."

Since the Massachusetts hearing, that state now requires warning labels on snuff cans, and eight other states have similar mandatory warnings under consideration.

Both the World Health Organization and U.S. Surgeon General C. Everett Koop have declared that smokeless tobacco does indeed pose a cancer threat, and the Public Citizen Health Research Group has petitioned the Federal Trade Commission to order warning labels. The FTC, in turn, has asked the Surgeon General to conduct a comprehensive review of existing scientific evidence on

health effects before taking action. Last July, Rep. Henry Waxman (D., Calif.), chairman of the House Subcommittee on Health and the Environment, held hearings on whether to ban all smokeless advertising from television.

Dr. Gregory Connolly, director of dental health for the Massachusetts Department of Public Health, concedes that "we don't know how much oral cancer is caused by snuff. But we do know that each year we have about 29,000 new cases of oral cancer and 9,000 deaths in this country. Tobacco of one kind or another is believed to account for about 70 percent of it. According to the National Cancer Institute, if you use snuff regularly you increase your risk fourfold."

Shortly before his death, Sean Marsee told his mother that there must be a reason God decided not to save him. "I think the reason is what we're doing right now," says Betty Marsee. "Keeping other kids from dying—that's Sean's legacy."

SENATE—*Friday, October 4, 1985*

(Legislative day of Monday, September 30, 1985)

The Senate met at 10:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Gracious Heavenly Father, on this Feast of St. Francis Day we pray his prayer which has blessed so many, so often, for so long.

Lord, make me an instrument of Thy peace * * * where there is hatred let me sow love; where there is injury, pardon; where there is doubt, faith; where there is despair, hope; where there is darkness, light; and where there is sadness, joy.

O Divine Master, grant that I may not so much seek to be consoled as to console; to be understood as to understand; to be loved as to love; for it is in giving that we receive; it is in pardoning that we are pardoned; and it is in dying that we are born to eternal life.—St. Francis of Assisi.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order the leaders have 10 minutes each, and I shall reserve the time for the distinguished minority leader, as he is busily engaged in a Democratic caucus, followed by special orders in favor of Senators GOLDWATER, NUNN, and PROXMIRE, not to exceed 15 minutes each; routine morning business not to extend beyond 11:30 a.m., with Senators permitted to speak for not more than 5 minutes each.

It is my hope that at about that time we will go into executive session to consider the nomination of James C. Miller III. That will probably be a rollcall vote which hopefully will come about noon.

It is also my hope that we can complete action then on the debt ceiling, House Joint Resolution 372, today.

We are advised that Monday is a critical day. The Treasury Secretary advises that if we do not complete action on Monday we create real problems for a number of people, in fact anyone who receives Government checks, whether it is Social Security recipients, unemployment, whatever it may be.

Now, I have just been advised that there are some Senators who indicate that they do not want us to have votes today. Either they do not want the joint resolution to pass or they do not want the Gramm-Rudman amendment to pass.

That information just came to my attention. I hope that is not the case. I would hope that we could work an arrangement where the Byrd-Chiles amendment would be considered and voted upon, the Gramm-Rudman-Hollings amendment would be considered and voted upon, and then if there were additional amendments, they could be offered.

But I suggest to any of my colleagues who may have in mind delaying action on the debt limit extension that they seriously consider the consequences of what will happen to hundreds of thousands of recipients of Social Security checks and other Government checks within the next couple of weeks.

So there will be votes today. We hope to complete action today. Again I urge those who may have different views to at least let us visit with them about any problem they may have.

There is a Democratic caucus in process at the present time. It is my hope that they may conclude that there are two to three things that they wish to do with respect to amendments. Then if we can reach some time agreement, we will try to complete our work today at an early hour. But if there is going to be extended debate, it may be a much, much later hour, but hopefully sometime today.

Mr. President, I promised the distinguished Senator from Mississippi that he could have 5 minutes of my time before Senator GOLDWATER is recognized.

I yield 5 minutes of my time to the Senator from Mississippi.

The PRESIDING OFFICER (Mr. EVANS). The Senator from Mississippi is recognized.

Mr. COCHRAN. Mr. President, I appreciate very much the distinguished majority leader yielding to me.

S. 1734—CENSUS ADJUSTMENT TO EXCLUDE ILLEGAL ALIENS

Mr. COCHRAN. Mr. President, I am today introducing legislation to require that future census figures be adjusted to exclude illegal aliens from the population count used to apportion the House of Representatives.

The Subcommittee on Energy, Nuclear Proliferation, and Government Processes, which I chair, has held oversight hearings on the planning now underway by the Bureau of the Census for the 1990 Decennial Census.

Most recently, on September 18, we heard testimony from the Census Bureau, the Immigration and Naturalization Service, and a noted law scholar on the impact of illegal aliens on apportionment, and we reviewed the power of Congress to deal with this problem.

The Bureau of the Census has made special efforts to ensure an accurate and complete accounting of the Nation's population. The policy of the Bureau is to count every inhabitant in the country on Census Day. I expect that the Census Bureau will do an even better job of counting the Nation's population in 1990. However, few people realize that the total will include illegal aliens who are here in violation of the laws of the United States.

Illegal immigration has increased dramatically during the last few decades, as we all know. At our subcommittee hearing, INS and Census Bureau officials testified that an estimated 4 to 6 million illegal aliens are in the country at the present time, and that the number may be growing at a rate of up to 300,000 per year.

At that rate, there could be as many as 7.5 million illegal aliens in our country when the census is taken in 1990. This means that our next congressional reapportionment could include almost twice as many as were counted in 1980, when the Census Bureau counted an estimated 2,057,000 illegal aliens.

This number was only slightly less than the entire population of my State of Mississippi. In fact, the number of illegal aliens counted in 1980 was greater than the populations of 18 States.

Mr. President, if the illegal alien population were distributed among the States proportionately, the impact on apportionment would be negligible. But the fact is that 81 percent of the illegal aliens that were counted in 1980 were located in only five States—50 percent were in one State. Based on testimony before the subcommittee, we can expect the growth of the illegal

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

alien population to occur in these same States.

According to the Census Bureau, the inclusion of illegal aliens in the apportionment following the 1980 census affected the allocation of two House seats. California, with over 1 million illegal aliens, gained an additional seat in the House. New York, with almost a quarter of a million illegal aliens, was able to retain a seat it would have otherwise lost. These seats would have been allocated to Georgia and Indiana, whose combined illegal alien population was only 20,000, if the illegal aliens had not been counted for apportionment purposes.

Mr. President, I am disturbed that seats in the House are being allocated to States because of the presence of illegal aliens, who, if our laws were enforced, would be deported. I am even more disturbed by the possibility that a congressional district could be comprised primarily of illegal aliens, while citizens and legal residents of another State lose representation in Congress. Furthermore, constitutional rights are violated when voters in districts with a disproportionately large number of illegal aliens have a greater voice in choosing a Member of Congress than those in districts where there are only a few.

The Congress is empowered by the Constitution, according to our hearing record, to remedy this inequity by excluding illegal aliens from apportionment. My bill would in no way alter the allocation of Federal program dollars based on total population. It simply requires that the population count used for apportionment includes only those persons who are legally residing in the United States.

Mr. President, this question goes to the heart of representative government. Let me conclude with a statement made by Supreme Court Justice Hugo Black:

> To say that a vote is worth more in one district than another would not only run counter to our fundamental ideas of democratic government, it would cast aside the principle of a House of Representatives elected "by the people," a principle tenaciously fought for and established at the Constitutional Convention.

I urge my colleagues to support this legislation.

Mr. President, I ask unanimous consent to have printed in the RECORD a copy of the bill.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1734

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds that—

(1) in recent years millions of aliens have entered the United States in violation of immigration laws and are now residing in the United States in an illegal status and are subject to deportation;

(2) the established policy of the United States Bureau of the Census is to make a concerted effort to count such aliens during the 1990 census without making a separate computation for such illegal aliens; and

(3) by including the millions of illegal aliens in the reapportionment base for the House of Representatives many States will lose congressional representation which such States would not have otherwise lost, thereby violating the constitutional principle of "one man, one vote".

SEC. 2. Section 141 of title 13, United States Code, is amended by redesignating subsection (g) as subsection (h), and by inserting after subsection (f) the following new subsection:

"(g) The Secretary shall make such adjustments in total population figures as may be necessary, using such methods and procedures as the Secretary determines appropriate, in order that aliens in the United States in violation of the immigration laws shall not be counted in tabulating population for purposes of subsection (b) of this section.".

SEC. 3. Section 22(a) of the Act entitled "An Act to provide for the fifteenth and subsequent decennial censuses and to provide for the apportionment of Representatives in Congress", approved June 18, 1929 (2 U.S.C. 2a(a)), is amended by striking out "as ascertained under the seventeenth and each subsequent decennial census of the population" and inserting in lieu thereof "as ascertained and reported under section 141 of title 13, United States Code, for each decennial census of population".

Mr. COCHRAN. Mr. President, I yield the floor.

RECOGNITION OF SENATOR GOLDWATER

The PRESIDING OFFICER. Under the previous order, the Senator from Arizona is recognized for not to exceed 15 minutes.

Mr. GOLDWATER. Mr. President, a parliamentary inquiry. The time taken by the Senator from Mississippi, was that deducted from my time?

The PRESIDING OFFICER. That was deducted from the majority leader's time.

OFFICE OF THE SECRETARY OF DEFENSE: LACK OF A MISSION FOCUS

Mr. GOLDWATER. Mr. President, today, Senator NUNN and I will make our fourth in a series of six statements on the very serious organizational and procedural problems of the Department of Defense and the Congress. Three days ago, we focused on serious shortcomings in congressional review and oversight of the defense program. On Wednesday, Senator NUNN and I discussed the long-term nature of the problems of the U.S. military establishment, many of which were first evident during the Spanish-American War and, regrettably, have not yet been adequately solved. Yesterday, we addressed the serious deficiencies in the organization of the Joint Chiefs of Staff and the unified commands. Today, we will focus on another major organizational deficiency in the Department of Defense: The failure to integrate defense decisionmaking on a mission basis. This absence of mission emphasis is most severe in the Office of the Secretary of Defense.

HISTORY OF THE OFFICE OF THE SECRETARY OF DEFENSE

Mr. President, in order to understand how we reached this unfortunate situation, we need to examine the history of the Office of the Secretary of Defense. Prior to World War II, there were two, separate, military departments of Cabinet rank, the War and Navy Departments. During World War II, as we have seen in our previous speeches, it became increasingly evident that modern warfare required combined operations by land, sea, and air forces. This, in turn, required not only unified operational command of those forces but also a coordinated process for achieving the most effective force structure and logistical support.

President Truman concluded that the "antiquated defense setup" was in need of a drastic overhaul. He suggested that the only effective solution was "a single authority over everything that pertains to American safety." In his message to the Congress of December 19, 1945, concerning the need for greater military unification, President Truman stated:

> With the coming of peace, it is clear that we must not only continue, but strengthen, our present facilities for integrated planning. We cannot have the sea, land, and air members of our defense team working at what may turn out to be cross-purposes, planning their programs on different assumptions as to the nature of the military establishment we need, and engaging in an open competition for funds.

Well, Mr. President, President Truman was right. In 1945, we needed a military establishment that could conduct integrated planning and resource allocation and, I am sorry to say, we still need it. Moreover, all of the things that President Truman said we do not need, we still have.

Yesterday, Mr. President, I described how the Department of Defense had not listened to President Eisenhower in 1958 when he urged unification of command. Unfortunately, Congress did not listen to President Truman in 1947 when he urged the creation of a department that could conduct integrated planning. The National Security Act of 1947 created the position of the Secretary of Defense but directed him to preside over an entity known as the National Military Establishment, consisting of three executive departments, the Army, Navy and the Air Force, each of which was headed by a Cabinet-level Secretary. The Secretary of Defense was given authority only to establish "general" policies and to exercise "general" direction, authority, and control. Not surprisingly, it did

not work. The 1947 organization was characterized some years later by President Eisenhower as "little more than a weak confederation of sovereign military units."

The first Secretary of Defense, James Forrestal, quickly realized that he had insufficient authority. Congress also realized its mistakes, and, in 1949, amended the National Security Act to create a single Department of Defense and give the Secretary of Defense authority over that Department. The Departments of the Army, Navy, and the Air Force were reduced from Cabinet rank to military departments—with a proviso, however, that they should be separately administered. President Truman's request for additional consolidation of functions in the Secretary of Defense was not enacted by the Congress.

Further changes were made in 1958 to give the Secretary of Defense, and I quote, "the direction, authority and control" over the Department of Defense. That was as strong as the Congress knew how to write it. In addition, the Secretary of Defense was given substantial powers to reorganize the Department of Defense, specifically in the logistics area, and the language from the 1949 amendment that required the military departments to be "separately administered" was relaxed to "separately organized."

No major statutory changes, however, have occurred since 1958.

CURRENT ORGANIZATION OF THE OFFICE OF THE SECRETARY OF DEFENSE

Mr. President, under current law, the Secretary of Defense is "the principal assistant to the President in all matters relating to the Department of Defense." As I noted, since 1958, he has had "authority, direction and control over the Department of Defense." Mr. President, that is very broad language, as it should be. The Secretary must have full authority to direct and control all matters of the Department of Defense.

Mr. President, let me briefly describe the current organization of the Office of the Secretary of Defense. Reporting directly to the Secretary are a Deputy Secretary of Defense, two Under Secretaries, 10 Assistant Secretaries, a general counsel, and a large number of other officials. Indeed, as Senator NUNN will discuss, there are 41 officials of the Department of Defense who report directly to the Secretary of Defense. I know of no man or woman who can adequately control 41 people who must report directly to him or her in a field as complicated as national defense. Nevertheless, that is what we currently have in the Department of Defense.

The Congress is to thank for some of these matters. We have created several positions, and have required that they report directly to the Secretary. Recent examples are the creation of the Uniformed Services University of the Health Sciences, Assistant Secretary of Defense for Health Affairs, Assistant Secretary of Defense for Reserve Affairs, and the Director of Operational Test and Evaluation. The problem with this congressional direction is that the Secretary cannot adequately manage these offices and officials, so they, in essence, report to no one. As we said in our first speech, Congress is part of the problem. We must be part of the solution. As the Armed Services Committee proceeds over the next several months, we will be looking to see whether it is advisable to have so many positions reporting directly to the Secretary of Defense.

In addition to the Office of the Secretary of Defense, there are 15 Defense agencies that report either to the Secretary or to officials in his office. These include such organizations as the National Security Agency, the Defense Intelligence Agency, and a fairly recent organization, the Strategic Defense Initiative Organization.

Mr. President, it is not over yet. In addition to the Defense agencies, there are the so-called Department of Defense field activities. These are of a more limited scope than the Defense agencies. Many of these are performing services that were previously done in the Office of the Secretary of Defense. Mr. President, listen to this. Over 86,000 people work in the Defense agencies and field activities. That is hard to believe.

Mr. President, as you will see, the Office of the Secretary of Defense is organized along functional lines. The offices are established to perform specific functions such as force management and personnel and acquisition and logistics. You will note that no single official, other than the Secretary and his Deputy, is responsible for integrating the functions of the Department of Defense to accomplish the principal missions. Despite all of the organizational changes made since 1947 and the tremendous growth in the central management staff of the Department of Defense, we still have not achieved the basic needs—identified by President Truman in 1945—of integrated planning and resource allocation.

In his remarks. Senator NUNN will discuss how this exclusive functional structure has frustrated effective performance by the Office of the Secretary of Defense.

THE CONCEPT OF MISSION INTEGRATION

Mr. President, since the end of World War II, the central challenge for the Secretary of Defense has been to integrate the separate capabilities of the Army, Navy, Air Force, and Marine Corps to prepare for and conduct effective joint operations in times of crisis or war. I believe that this objective is best described as "mission integration." Both the word "mission" and the word "integration" represent important dimensions of this concept. The focus must be on missions which are, in fact, the central purposes of the Department of Defense. Integration signifies the need to bring together in an effective manner the capabilities of the separate services.

SIX MAJOR MISSIONS

It is appropriate to use mission integration as the basic concept for determining the organizational needs of the Department of Defense. Effective mission integration is critical to U.S. national security because none of the major military missions of the Department of Defense can be executed alone by the forces of any single service. This fact is evident upon examination of the six major missions of the Department of Defense, three of which are worldwide in nature and three of which are regional. As I see it, the major worldwide missions are:

First, the mission of nuclear deterrence for which the goal is maintaining essential equivalence with the strategic and theater nuclear forces of the Soviet Union;

Second, the mission of maritime superiority for which the goal is controlling the seas when and where needed; and

Third, the mission of power projection superiority for which the goal is deploying superior military forces in times of crisis to distant world areas which are primarily outside the traditional system of Western alliances.

The three major regional missions are:

First, defense of NATO Europe, including both the northern and southern flanks;

Second, defense of East Asia, particularly Northeast Asia; and

Third, defense of Southwest Asia, especially the region's oil resources.

Mr. President, no single service can do any of these missions by themselves. Effective integration to prepare for and to execute these six missions is necessary at the policymaking level and the operational level of the Department of Defense. How well is this job done? The answer, Mr. President, is not well.

Today, Senator NUNN and I will focus on the policymaking level where serious deficiencies in mission integration efforts exist. Yesterday, we addressed the operational level of the Department of Defense where inadequate mission integration has also been a major and costly shortcoming.

FUNCTIONAL STRUCTURE AT POLICYMAKING LEVEL

Within the policymaking level of the Department of Defense, there is no sharp focus on missions. As a result, effective mission integration efforts are nearly impossible. As I pointed out earlier, the Office of the Secretary of

Defense is focused exclusively on functional areas, such as manpower, research and development, and installations and logistics. So are the military departments and the organization of the Joint Chiefs of Staff. This functional structure serves to inhibit integration of service capabilities along mission lines, and, thereby, hinders achieving DOD's principal organizational goal of mission integration.

Mr. President, the functional structure of the policymaking level of the Department of Defense leads to a focus on what could be called "functional integration." The policymaking level does integrate across service lines for certain functional activities. For example, planning and programming for the manpower function can be done on a department-wide basis. There are advantages to such efforts because various efficiencies can be realized. But, Mr. President, this is as far as the organizational activity of the Department of Defense goes. The focus is almost entirely on resource inputs, that is, purchase of weapons. There is no real consideration of outputs, that is, what is needed to accomplish our major defense missions. The functional structure may permit us to buy a ship efficiently but it does not assure that that ship meets specific mission needs.

AMERICAN BUSINESS ANALOGY

A functional structure was widely used by American business for much of the first half of this century. As American businesses, however, became larger, diversified, or international enterprises, they found that the functional structure did not serve them well. It caused them to lose a sharp focus on their products—where they had to compete with other domestic and foreign firms. For the most part, they responded by switching to a product line organization. American business found that if they organized around their product lines, they were able to compete more effectively.

Mr. President, the Department of Defense is confronting the same problem today. The functional structure does not produce a sharp focus on missions—the product lines of the Department of Defense—where the United States must compete with the Soviet Union and other potential adversaries. The Department of Defense must begin to provide an organizational focus on missions or the critical ability to effectively compete with potential adversaries will continue to elude us.

UNIFICATION AND CENTRALIZATION

In the past, serious consideration of the mission integration needs of the Department of Defense has unfortunately been lost in emotional arguments over unification and centralization. Unification of the four services—as provided by the National Security Act of 1947 and the 1949 amendment—was only a first step toward providing unified fighting forces. It provided a structural framework in which mission integration could take place. Despite this framework, the necessary degree of integration has not been achieved. Without effective mission integration, unification of the four services means nothing.

Mr. President, some have criticized proposed changes in the Department of Defense on the grounds that these changes would result in more centralization whereas what is needed is more decentralization. That, Mr. President, is an oversimplification and is the wrong question about the wrong problem. The right problem is the integration of our forces to accomplish missions, and the right question is how to do it. The continuing controversy over centralization and decentralization is really an argument over where certain decisions should be made. We should be focusing, instead, on what organizational arrangements are best for effective mission integration. The answer may mean that some activities should be centralized whereas others should be decentralized. But it does no good to thoughtlessly condemn all changes simply because they may result in some increased centralization or decentralization.

Mr. President, the absence of mission integration is like an orchestra that cannot play together. An orchestra is made up of different sections—violins, trumpets, drums, and so on. Each section may be the best in the business, but unless the sound can be integrated, they will sound terrible. The Department of Defense is like an orchestra with 41 sections, and many of them are the best in the business. But, because they're not integrated, they sound like Alexander's Ragtime Band, not the New York Philharmonic.

Mr. President, I have presented the broad outlines of this problem. Senator NUNN will discuss some of the more specific deficiencies that result from the exclusive functional structure of the policymaking level of the Department of Defense.

It is with a great deal of pleasure that I yield the floor to Senator NUNN, of Georgia. He has proven to be such a valuable person, not just a Senator but an American citizen, in his effort to provide for what I think is the first real purpose of the Congress, the defense of our liberties.

I yield the floor.

RECOGNITION OF SENATOR NUNN

The PRESIDING OFFICER (Mr. ARMSTRONG). Under the previous order, the Senator from Georgia [Mr. NUNN] is recognized for not to exceed 15 minutes.

Mr. NUNN. I thank the Chair. I feel somewhat like Alexander's Ragtime Band following the New York Philharmonic. Nevertheless, I shall begin my section of this analysis this morning.

OFFICE OF THE SECRETARY OF DEFENSE

Mr. NUNN. Mr. President, the distinguished chairman of the Committee on Armed Services, Mr. GOLDWATER, has given an excellent overview of the problems in the Office of the Secretary of Defense. He is absolutely correct. The Department of Defense, and in particular OSD, cannot now focus on mission outputs because the entire office is organized around functional inputs. Without an ability to cut across organizational lines, not to mention service lines, so as to focus on their major military missions, the Department of Defense cannot even begin to realize the benefits of effective mission integration. The chairman has made a powerful case about the importance of mission integration and the fact that there is now a major deficiency in this area. There are a number of serious problems that flow from the lack of focus on missions and their integration into a coherent whole.

INPUTS INSTEAD OF OUTPUTS

I believe OSD has primary responsibility for insuring that we have an integrated defense program and that the United States is capable of performing its major military missions in the most effective and efficient manner. OSD should be the primary focus for bringing it all together, but they have failed to do this.

Let me give an example. In 1978, the U.S. Government agreed to the long-term defense plan in NATO. In that plan, we pledged to provide 10 divisions to Europe within 10 days of mobilization. This was a clear policy goal of the Government—a clear national security commitment with allies—a key mission output. How is DOD managing this commitment?

The answer is that we have not met this commitment, and there are no clear indications that we are going to meet it in the near future. Let me say that we have done much more in living up to our NATO commitments than our allies have. But it is important to note that we have not totally met our commitment either. We could have. However, had someone focused on outputs. Let me illustrate this.

In order to deploy 10 divisions to Europe in 10 days we need to store in Europe the equipment for 6 divisions so that the troops only have to fly over and pick up their pre-positioned equipment. We needed to build extensive storage facilities. We need to buy more ammunition and spare parts and store it in Europe. We need to get logistics units located in certain areas in

Germany to facilitate the arrival and assembly of those divisions. We need to buy airlift aircraft and transportation equipment to move equipment and personnel. The list goes on and on.

We are not meeting this national commitment, primarily because no one in DOD has responsibility for the mission as an output, rather they are in charge of a collection of individual inputs. The Supreme Allied Commander in Europe, General Rogers, determines the priority for arriving divisions, but he does not control distribution of their equipment in Europe. The top Army commander in Europe has responsibility for locating equipment in Europe and munition stocks, but the Army headquarters in Washington determines how much is in the budget each year, how much of it will go to Europe and how much to units in the United States. General Rogers determines the priority for arriving combat units, but the Air Force determines whether or not the transport aircraft have sufficient crews and spare parts to meet deployment schedules. And on it goes.

A number of people have responsibility for the thousands upon thousands of individual inputs, but no one has responsibility for the single output. Logically, OSD would have responsibility for this because it involves all of the individual services, foreign governments and other U.S. departments and agencies. Yet, no one in OSD below the Secretary and Deputy Secretary can tie this all together. No one is insuring that all the pieces are brought together to support the mission.

Another case concerns special operations forces.

These are our forces that would be deployed in the next 24 to 48 hours, if we had certain small but nevertheless very important contingencies around the world, including hostage situations and other kinds of scenarios that require less than an all-out American response. Three years ago, the Department of Defense set a policy goal to meet the mobility and equipment requirements of special operations forces by 1990. We have fallen woefully behind an easy goal, which should have been achievable, and there is little chance we will meet it. The main transport programs are hopelessly behind schedule and over cost. The services, and especially the Air Force, have failed to budget the resources required to meet this master plan. In fact, the Air Force has reportedly just terminated a key element of the program—the HH-60 helicopter. The Army and the Air Force are still quibbling over roles and missions and the Marine Corps is now addressing what role they should have in special operations. No one is running the show, yet this is undoubtedly the most likely military requirement we will face in the next 5 years.

Whether it is justified or not, these are the forces by which we will most likely be judged in terms of our military capability, our readiness, and basically whether we meet our national security goals. that judgment will be made not only by the American people but also by large parts of the world.

In terms of certain items of equipment, we are only slightly more prepared to carry out the Iranian hostage rescue mission today than we were 5 years ago when it failed. The problem is no one is managing the mission as an output. The senior OSD civilian monitoring this area has done everything he could to bring this program into focus but his ability as an OSD official to cut across functional and service lines has been severely limited.

Imagine the results we would get if we asked 41 people to make the best cake they could, but told each individual to bring only one ingredient and use his best judgment as to what it is, when to pour it in, mix it, and bake it. Unfortunately, the issue here is not baking cakes but defending the United States and winning wars and minimizing the loss to our soldiers, sailors, airmen, and marines. We owe them far more than the disjointed, uncoordinated effort we have managed to date.

This focus on inputs obscures the missions and strategic goals of the Department of Defense and prevents effective allocation of scarce resources. Peter Drucker summed it up by saying that an organizational design like we have in DOD "tends to direct vision away from results and toward efforts."

He is saying that about business in general, not particularly about the Department of Defense, but I think it is very applicable here.

FORCE IMBALANCES

A second consequence of this failure to develop an integrated defense program is an imbalance in our forces. We have fundamental discontinuities because of lack of integration on the part of OSD. This is particularly the case in the unglamorous parts of the budget, those areas which are not central to the service's own definition of its mission. Mobility forces provides a good example.

We are in the middle of a major program to improve our mobility forces, and I applaud that. To date we have committed over $10 billion for airlift aircraft for the Air Force and have plans to spend another $40 billion. By way of contrast the Navy has been buying surplus commercial ships for modernization purposes. This year we spent the most ever, $200 million. Yet in any future conflict, 95 percent of the cargo will be moved by ship. This is not balanced or in proportion with what we are doing in the airlift area. OSD is merely ratifying the individual decisions of the Navy and the Air Force. You have to ask the question, Who is looking at the overall lift requirements?

In a larger sense we have fundamental imbalances in our plans as an alliance, particularly in NATO. I will mention just three examples.

First, we are busily building our munitions levels to be able to fight over a 2-month period while our allies could well run out of ammunition in 2 weeks.

Second, the 5-year Defense Program submitted to the Congress this year included over $50 billion to build up U.S. munitions stocks in Europe. At a time when we are allocating greater and greater amounts of our defense dollars toward war reserve munitions in Europe, the long-term plans of many of our NATO allies call for only limited, if any, improvement in their own munitions stockage levels. At this rate, the result will be that in a few years U.S. munitions stocks in Europe will be even further out of balance with those of our NATO allies than they are today.

We have to ask the question, What happens when our allies give out of ammunition? What happens is that we have a very small percentage of forces on ground there and when our allies give out on ammunition, the conventional part of the war, in effect, is over. At that stage, of course, we could escalate, and that has its own ramifications.

In the third example, both the United States and the Federal Republic of Germany are providing new generation combat radios to their armed forces. Both are fielding the same radio system manufactured by the same international corporation. Yet the two armies will not be able to talk to each other because of special limitations built into each system. The same radio manufactured by the same corporation will not be able to communicate between two allied armies. To compensate for this, each Army is placing a small liaison unit in their counterpart headquarters to relay messages. This is absolutely crazy. Where is the individual in OSD responsible for the output of "interoperability" of both our own services and our allies? The answer is everybody is responsible and nobody is responsible.

These are examples of fundamental discontinuities in planning for which OSD must take responsibility. The Secretary of Defense has responsibility for integrating defense policy, not just for DOD but for our participation in the alliance. And that is not being done.

OSD MICROMANAGEMENT

A third major problem created by the functional structure of OSD is that it encourages micromanagement of the service programs. Because the Office of the Secretary of Defense fo-

cuses on control of functional activities and not on broader issues of policy and mission integration, it has the tendency to get overinvolved in details that could be better managed by the services.

CURRENT OSD ORGANIZATION

We can better understand this by further addressing the current structure of the Office of the Secretary of Defense and the defense agencies.

The Office of the Secretary of Defense has grown from a small cadre of the Secretary and three special assistants—a total of 350 people in 1949—to almost 2,000 people today. This does not include the more than 86,000 people who work in the defense agencies and field activities referred to a few moments ago by Senator GOLDWATER. Today Secretary Weinberger has 41 officials reporting directly to him. His span of control boggles the imagination—41 officials reporting directly to him, each with wide and varied areas of responsibility.

These excessive spans of control are not just unique to the Secretary of Defense. The Army Chief of Staff has 42 people reporting to him; the Chief of Naval Operations has 48 reporting to him; the Chief of Staff of the Air Force has 35; and the Commandant of the Marine Corps has 41.

Yet each of the individual offices and entities is primarily focused on a narrow piece of the overall defense area—functions such as manpower, logistics, research, procurement, financial management, health affairs, and so forth, and there is essentially nowhere but at the very top of the structure—meaning the Secretary of Defense himself and his one Deputy—where it can all be brought together or integrated by mission and across service lines.

I am sure, as we go along in this study, the staff study is released and we have hearings and decide which parts of it we are going to try to put in the form of legislation, we will hear the charge over and over again that this is a move toward centralization. Well, to those who say that, I say to them, what do we have now when the Secretary of Defense has 41 people reporting to him; the Army Chief of Staff, 42 people; the Chief of Naval Operations, 48; the Chief of Staff of the Air Force, 35; and the Commandant of the Marine Corps, 41? If that is not centralization, what is it? In fact, what we are going to be doing in many cases is recommending decentralization; in other areas we will be recommending centralization, but we will certainly be recommending that we have a span of authority in the top positions in the Department of Defense and the services that is realistic and will work.

Even though, for example, the OSD manpower officials could pull together all of the Service and OSD manpower policies in a coherent fashion—a tall order in and of itself—he has little ability to integrate those policies with other functional areas.

These are clearly areas where it is wise to have department-wide policies. For example, Senator ROTH and I have recently investigated the personnel security practices in the Department of Defense. We discovered massive confusion.

Each service varied in its implementation of Department of Defense policy regarding adjudication procedures for security clearances.

Mr. President, for those who are not familiar with the word "adjudication," what it means is when you have a security clearance, you go out and you have a check made by one agency. They bring back all that information. Other personnel, the people who are actually going to make the hire, whether it is Army, Navy, or Air Force, or some defense agency, then take that material and adjudicate whether the security clearance should be issued. So adjudication, when we are discussing security clearances, is the procedure by which you decide whether a classification should be issued.

The Navy, for example, differed from the Army and Air Force in that its adjudicative process for military personnel was decentralized and remained the responsibility of each individual command. Therefore, the Navy's various 3,000 units, many of which are ships, adjudicated and issued security clearances to its assigned personnel. Each ship had its own procedure. Coordination between these units was poor. The Department of Navy had no way of readily knowing the security clearance status of an individual without asking the specific unit. As a result, Seaman Michael Walker, who was recently charged with espionage, had not received a background check nor did he possess an authorized clearance. Nevertheless, he was assigned to duty which permitted him access to secret information, which he allegedly passed on to the Soviets through his father. In fact, at the time Michael Walker was implicated, the Department of the Navy could not respond to questions regarding his clearance until it received the information from his ship, the *Nimitz*.

Mr. President, I understand that the Secretary of Defense has since directed the Navy to centralize its adjudicative process and that the Secretary of the Navy intends to comply with this directive.

I do not say that centralization is the answer to all of the problems Senator GOLDWATER and I have been discussing today, and we will not be recommending centralization as the answer. In many cases we will be talking about decentralization. But it is clear that the Navy's totally uncoordinated security clearance adjudicative process has been, by their own testimony and actions, disastrous.

CONCLUSION

Mr. President, the failure to strike a balance between functional and mission perspectives in the policymaking level of the Department of Defense is a serious shortcoming. Until a more appropriate balance is realized, the Department will continue to suffer from critical gaps in war-fighting capabilities, wasted resources because of duplication, parallel systems that are not interoperable, inadequate attention to training and readiness, and poor coordination with our major allies. This balance will necessarily include some attention to functions, but must include more emphasis on mission integration.

Mr. President, a change in focus in OSD is required to ensure that our Nation gets the defense it is paying for and needs. OSD must shift its focus from functional inputs toward mission output, away from micromanagement and toward mission integration, and away from program execution toward oversight. It is going to require action on the part of Congress to make this happen.

Mr. President, I yield the floor.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

CONSEQUENCES OF NUCLEAR WAR GET WORSE

Mr. PROXMIRE. Mr. President, on Sunday, September 22, George Lardner reported in the Washington Post on the latest estimates by the National Academy of Science's Institute of Medicine on the consequences of nuclear war. The Academy's conclusions were starting. They dwarfed any previous report in depicting the shocking consequences of nuclear war. Yet, Mr. President, that report, carried in the media throughout the country, had almost no effect. No other Senator has spoken to me about it in the cloak room or in committee meetings. When I went back to my State that weekend, not one of the hundreds of constituents I met volunteered any reaction to it. Mr. President, the National Academy of Science is our most authoritative and prestigious scientific body. The American people have repeatedly shown their great respect for expert scientific opinion.

Why should these newest findings of the consequences of nuclear war have been so earth shaking? Consider what the Academy of Science's Institute of Medicine found. It found that if the

Soviet Union hit American cities with only 1 percent of its nuclear arsenal—just 1 percent—this country would suffer the immediate death of 36 million to 56 million people. One percent of the Soviet arsenal would mean a 1-megaton bomb hitting on or near the 100 largest urban areas in the United States. That million tons of TNT on each American city would wreak massive—and I mean massive—destruction. Mr. President, that vast count of dead bodies is unfortunately only the beginning. That would constitute the immediately dead. The study painted a bleak picture for survivors. In fact, I might say even bleaker.

What is so new in this finding on the consequences of nuclear war for survivors? These medical experts concluded that many would suffer severe damage to their immune system, much as if they had AIDS. The enfeebled immune system would open the door for long-lasting epidemics of tuberculosis, leprosy, pneumonia, Legionnaire's disease, and probably cancer. Why would this happen? Here is what the report tells us:

All of the major injurious effects associated with nuclear warfare—ionizing radiation, ultraviolet radiation, trauma burns, depression and stress—attack the same component of the immune system (the T-cells) as AIDS does.

And that is not all. The medical experts spell out just how pitifully inadequate the Nation's health facilities would be to care for the survivors of such a nuclear attack. First, many of the Nation's hospitals and clinics are located in the cities. These crucial medical facilities would be utterly demolished or burned to a crisp. But even if the hospitals were spared, they would be able to care for only a tiny fraction of the survivors. For instance, the medical experts found that Detroit would produce injuries requiring 42,000 hospital beds in burn treatment centers. Now, listen to this: Only 1,333 such beds exist in the entire United States. Exactly 41 are in Michigan—41 beds, when 42,000 would be required.

Of course, the blasts of nuclear war would immediately kill most doctors, since so many doctors live in urban areas. An American survivor's chances of finding a doctor to heal his illness would be less than 1 in 100.

You may ask: What is so different in these appalling statistics? Didn't we always figure that nuclear war would be this devastating? The answer is that we did not begin to appreciate how terrible it would be. Theodore Postol of the Stanford University Center for International Security and Arms Control explains why we have so grossly underestimated the consequences of nuclear war in the past. Previously, estimates of casualties were based on the blast effects of the World War II attack on Hiroshima. We now know that is not valid today; and with the "improvement" in nuclear bombs, it will be increasingly less valid as time goes on. Modern nuclear weapons are not only much more powerful but they produce much greater fires.

Mr. President, what does the fact that our most prestigious scientific body has found that nuclear war would be so much more devastating than previously believed mean for the military policy of this country? It should have one overwhelmingly clear consequence: It should sound the death knell for the SDI or star wars. Why? Just consider: Supporters and critics of star wars have hotly argued about how effective star wars could become.

Critics contend that star wars could not prevent most Soviet ICBM missiles from penetrating any defensive shield. They point out that by the time the star wars defense will be ready for full deployment 20 or 30 years from now, scientists in both superpowers will have perfected penetration aids, and far ranging, low-flying cruise missiles that will pierce any system of defense. Supporters of SDI contend that star wars would stop half or three quarters or possibly even 90 percent of the offensive missiles.

Ah, but now we are told by the National Academy of Science experts that if just 1 percent of the present Russian nuclear arsenal penetrates the star wars defense, we could lose virtually all of our 100 major American cities and between 36 million and 56 million American citizens immediately. Mr. President, does anyone really believe that the very first time a star wars defense were tried under the actual conditions of an attack by missiles specifically designed for penetration, it would prevent more than 99 percent of the incoming missiles from reaching their target? Of course not.

This is why, Mr. President, we cannot survive by leaning on technology, even a trillion-dollar technology program. Our salvation can only come from arms control, not from the arms race, no matter how skillfully or vigorously or expensively we pursue it.

Mr. President, I ask unanimous consent that the article to which I have referred by George Lardner, Jr., from the September 22 Washington Post, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 22, 1985]

NUCLEAR WAR EFFECTS SAID UNDERESTIMATED

(By George Lardner, Jr.)

A limited nuclear attack on the United States would trigger vast hurricanes of fire and cause millions of more deaths than standard government studies estimate, according to scientific research released yesterday.

Although the devastating effects a nuclear war would have on the Earth's climate have gotten considerable attention and been named "nuclear winter," much less attention has been paid to the medical implications of nuclear war. However, reports made public at a weekend symposium of the National Academy of Sciences' Institute of Medicine conveyed a uniform warning of destruction and suffering on a far wider scale than foreseen by government experts, even if the Soviet Union unleashed only 1 percent of its nuclear arsenal.

Such an attack, consisting of 100 one-megaton bombs on or near the nation's 100 largest urban areas, could result in the immediate deaths of 36 million to 56 million people, Theodore A. Postol of Stanford University's Center for International Security and Arms Control concluded in a 50-page study.

By contrast, he said, standard government estimating procedures for predicting the consequences of nuclear attacks, which are based on blast effects alone, would project 14 million to 15 million dead.

The enormous increase in projected fatalities, Postol said, comes from a "very large expected range of superfires" and the highly toxic environment within the burning region. The huge fires, he said, "could kill everyone within a six- to eight-mile radius of ground zero."

"Winds at the ground could reach hurricane force," Postol said, envisioning a mammoth replay of the firestorms of World War II, "and air temperatures within the zone of fire could exceed that of boiling water."

Three Princeton University researchers—Frank von Hippel, Barbara Levi and William Daugherty—added in a separate study that tens of millions of people would be killed and injured regardless of whether the weapons were aimed at civilian or military targets.

One megaton bombs exploded over the 100 most important U.S. military-industrial targets, they estimated, would cause 38 million deaths and some 15 million injuries because most of those targets are in major urban areas.

Casualties would be lower in an attack on 99 key strategic nuclear targets, but this could still kill 19 million and injure 8 million others, they concluded. Chicago's O'Hare International Airport, for instance, is on this list because it houses tanker planes for refueling strategic nuclear bombers. Staten Island, N.Y., and Long Beach, Calif., are targets because they will soon be home bases for battleships equipped with long-range, nuclear-armed cruise missiles. And Washington, D.C., qualifies thanks to the Pentagon and the White House.

In short, said Princeton physicist Von Hippel, the distinction nuclear strategists often make between attacks on population centers, industrial targets and military targets is not as significant as it has sometimes seemed. It "may be comforting to the targeteers," he said, but "it should not be comforting to the rest of us."

"Our finding of tens of millions of deaths from just 100 warheads," the Princeton study said, "also shows that any strategic defense system would have to reduce an attack to well below this level before the results would be less than catastrophic."

Other studies presented at the symposium, funded by the Carnegie Corp. of New York and the National Research Council, painted a bleak picture for survivors. The immune systems of many would be severely damaged, much as if they had AIDS. (acquired immune deficiency syndrome). The weakened immune systems would open the door for prolonged epidemics of diseases

such as tuberculosis, leprosy, pneumonia, Legionnaire's disease and probably cancer, according to Brown University researchers.

All of the major injurious effects associated with nuclear warfare—ionizing radiation, ultraviolet radiation, trauma, burns, depression and stress—attack the same component of the immune system (the T-cell) as AIDS does, said Dr. David S. Greer, dean of medicine at Brown University, and coauthor Lawrence S. Rifkin. "A striking similarity exists between AIDS and the anticipated immuno-suppressed condition of survivors of a nuclear war," they reported.

The nation's medical resources, meanwhile, would be overwhelmed. According to Dr. Herbert L. Abrams of the Stanford and Harvard departments of radiology, a one-megaton explosion over Detroit would produce injuries requiring 42,000 hospital beds in burn treatment centers. Only 1,333 such beds exist in the United States; 41 are in Michigan.

The survivors in Detroit would also need 134,000 beds in intensive-care units, according to Abrams. There are 61,000 nationwide. There would be 57,286 whole blood units available in the country; Detroit would need 1,280,000.

A massive (6,559-megaton) nuclear attack on the entire nation, Abrams added, would kill most physicians, leaving 48,000 doctors to treat the 32 million people that the Federal Emergency Management Agency has estimated would be injured, Abrams said. There would be only one surgeon for every 410 patients with serious blast injuries and one plastic surgeon for every 15,364 with severe burns, he added.

The standard way government agencies estimate casualties of a nuclear war is to extrapolate from the blast effects of the World War II attack on Hiroshima. Modern nuclear weapons are not only much larger, Postol said, but they can produce much greater fires.

A one-megaton bomb, for instance, has the explosive power of 1 million tons of TNT, capable of producing temperatures of about 100 million degrees at its center—four to five times the temperature at the center of the sun. A one-megaton burst over Baltimore, Postol said, would be seen in Washington "as a ball of fire many times brighter than the noonday sun."

"This intense source of heat and light is capable of setting many simultaneous fires over vast areas of surrounding terrain," he said. Once started, he said, the fires could heat large volumes of air near the Earth's surface. And as that hot air rose, cool air from regions outside the vast burning area would rush in to replace it, producing ground winds of hurricane force and boiling temperatures.

"The ferocious hurricane of fire would also be accompanied by the release of large amounts of potentially lethal toxic smoke and combustion gases, creating an environment of extreme heat, high winds and toxic agents in the target areas," the study added.

Postol said the climatic changes that could result from the smoke has drawn considerable attention, but little heed has been paid to what would happen to the people caught in the fires. He estimated that one-megaton or "near-megaton" air bursts "in *or near* urban areas" would produce two to four times as many deaths as projected by the government. By the same token, there would be fewer injuries.

There is uncertainty about the potential radius and size of the huge fires, but Postol said the government's death projections clearly are seriously understated. He pointed out that saturation incendiary bombing at Hamburg, Germany, in World War II produced one firestorm that covered five to six square miles and had a power of 1 million or 2 million megawatts, killing 50,000 to 60,000 people.

"By comparison," he said, "a mass fire initiated by a one-megaton airburst over a typical urban area in the United States could involve areas considerably larger than 100 square miles and have peak intensities of perhaps 15 to 50 million megawatts."

The Princeton researchers adopted the new "conflagration model" in making estimates on their computers, said to be the first outside of government capable of such calculations.

In addition to a one-megaton attack on 100 varying targets, they studied what they said was a commonly projected "major attack" of 3,000 warheads aimed at the nation's silos, missile launch-control centers and key strategic nuclear installations, a total of 1,215 targets. This, they estimated, would kill 16 million to 35 million people and seriously injure 9 million to 41 million others.

The aftermath of such attacks, Greer said, would include "a very large increase in AIDS in the surviving population."

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, the myth of the day is that the Reagan administration's tax cuts have significantly increased business expenditures for new plant and equipment.

For 5 years we have listened to supply-side wizards berate the Carter administration's tax policy while proudly proclaiming that Mr. Reagan's tax cuts would significantly increase capital spending. Heavy supply-side tax reductions, they argued, would create new jobs, enhance the competitiveness of basic industries, spur production, and stimulate new investment.

Finally, Mr. President, the Department of Commerce sets the record straight, proving again that Reaganomics is more fiction than fact.

According to the Department of Commerce, real growth in annual expenditures for new plant and equipment during the first Reagan administration was a whopping 58 percent lower than during the Carter administration.

When President Carter entered office, real—that is, allowing for inflation—annual expenditures for new plant and equipment totaled $130 billion in 1976. By the time President Carter left the White House in 1980, real annual expenditures had grown to more than $171 billion, an increase of over 31 percent. How did capital spending fare under the first Reagan administration? Not nearly as well. Expenditures grew to just $193 billion in 1984, a paltry 12-percent increase during Reagan's first 4 years.

Ironically, in the 1985 Economic Report of the President, President Reagan bristles with pride because real capital spending rose 15 percent from 1983 to 1984, one of the largest single increases in postwar history. The report thanks President Reagan's tax cuts for the healthy increase. Well, I say, "No, thanks." Real expenditures rose 15 percent in 1984 because businesses resumed investing after the 1982-83 Reagan recession, during which investment actually dropped 4 percent. Mr. Reagan is always saying America is back. In this case, he is right. America's capital spending is back, back to where it started before he took office.

It is a myth, plain and simple, that tax cuts by themselves significantly increased capital spending. It is no myth, however, that tax cuts increased the deficits. Four and one-half years after entering office, the Reagan administration has doubled the national debt, adding nearly $1 trillion in debt.

Mr. President, businesses invest in new plant and equipment when demand for their products increases or when plant and equipment become obsolete, not merely when their taxes are lowered. The only significant increase we get from large tax cuts is large corporate profits and massive Federal deficits. When will the supply-side wizards stop supplying us with this myth?

ANTI-AMERICANISM IN THE THIRD WORLD

Mr. PROXMIRE. Mr. President, Alvin Zubinstein and Donald Smith recently analyzed anti-Americanism in the Third World in the world affairs journal "ORBIS." In the article, they summarized reasons why anti-Americanism exists.

Much of the Third World feels suspicion and resentment toward American Government, policy, culture, and society. Many view U.S. objectives and actions as inconsistent and misguided. Third World leaders, according to Zubinstein and Smith, believe the morality of the United States is inconsistent.

We profess our commitment to peace, human rights, and justice. Many Third World countries fail to believe us, claiming that our commitment is merely an exercise in hypocrisy. Leaders in the Third World countries feel that American foreign policy serves only the interests of corporations and those seeking political domination. They see economic opportunity as the most powerful attraction for the United States, rather than a true commitment to the values expressed by great Americans such as Thomas Jefferson and Abraham Lincoln.

As a result of these feelings of anti-Americanism, we see much violence against the United States. This violence often takes the form of attacks on American Embassies and people. Anti-Americanism must not be allowed to continue.

We need to reassure the people and leaders of all nations that the United States is truly committed to the ideals expressed in our Declaration of Independence, Constitution, and Bill of Rights. We must put an end to the feelings of suspicion and resentment toward our people and our Government. We must act upon the Genocide Treaty now so that the entire world, specifically the Third World countries, will never doubt our full dedication to peace, human rights, and justice.

Zubinstein and Smith write that some Third World countries view the United States from a "pedestal of fake morality." This is a false perception. By publicly taking action and ratifying the Genocide Treaty, we will be taking a giant step toward improving our relations with the Third World.

I urge my colleagues to take this step by ratifying the Genocide Treaty.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business, with statements therein not to exceed 5 minutes each.

THE RETIREMENT OF GEN. JOHN W. VESSEY, JR., CHAIRMAN OF THE JOINT CHIEFS OF STAFF

Mr. THURMOND. Mr. President, on October 1, 1985, Gen. John W. Vessey, Jr., retired as the Chairman of the Joint Chiefs of Staff following 46 years of military service.

General Vessey was born and raised in Minnesota where he enlisted in the Army National Guard in 1939. He received a battlefield commission on May 6, 1944, at Anzio Beachhead and is the only man to rise from the rank of private to our Nation's highest military position, the Chairman of the Joint Chiefs of Staff.

General Vessey's career has been marked by distinction. He was awarded our second highest decoration for bravery, the Distinguished Service Cross, along with numerous other awards and decorations, including the Purple Heart, the Distinguished Service Medal, Bronze Star, and the Legion of Merit.

Additionally, General Vessey has been decorated by the Governments of Belgium, Chile, Colombia, El Salvador, France, Greece, Honduras, Korea, Luxembourg, Norway, Pakistan, Saudi Arabia, Spain, Thailand, Uruguay, and the former Republic of South Vietnam.

He was not only a brave combat soldier, but also a very wise leader. During his tenure as the Vice Chief of Staff of the Army and as the Chairman of the Joint Chiefs, the Senate Armed Services Committee relied very heavily on his counsel and advice in matters regarding our national security.

General Vessey is a man of unquestionable patriotism, loyalty, and devotion to duty. Mr. President, I had the pleasure of attending the retirement ceremony for General Vessey at Andrews Air Force Base. His remarks were as forthright as always and deserve to be brought to the attention of all Members of Congress.

Mr. President, my colleagues and I on the Armed Services Committee will sincerely miss General Vessey and his sage advice. His Nation is grateful to him for nearly a half century of uniformed military service, and we wish him happiness in his much deserved retirement.

Mr. President, I ask unanimous consent that a copy of General Vessey's remarks and a brief biographical sketch of General Vessey be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ADDRESS BY GENERAL VESSEY

Remarks (as given) at the Retirement Ceremony for General John W. Vessey, Jr., USA, Chairman, Joint Chiefs of Staff Andrews Air Force Base, Maryland, 30 September 1985

Mr. President, you and the Vice President do a great honor to the Armed Forces of the United States by participating in this ceremony today.

It is a great time to be in the Armed Forces of the United States. It is a great day to be a soldier. I hope we have the Recruiting NCOs all around the building here and are signing up new recruits after this wonderful ceremony. I want to say thanks to the troops that put it on. It's the first military operation that has taken place in the last three years and four months that I've not been cut in on.

Concerning the ceremony itself, I have often said that I plan to build an anthology of retirement and change of command speeches after I left the Service and publish it as Service humor. I don't really want to contribute to anybody else's anthology; but as I went out this morning and took my jog from Quarters Six down along the edge of Arlington Cemetery, I looked out over the city and I could see that the city was shrouded with a pre-dawn haze. I couldn't help but think of the contrast of that view of Washington last night when the Washington Monument, the Lincoln and Jefferson Memorials, and the Capitol were sparkling in the Harvest Moon.

And I thought as I looked at that morning haze that those symbols of the foundation of our liberty and freedom—the principles upon which this Nation is built, the principles in our Constitution—sometimes get a little bit out of focus as they were this morning in that haze. And we need to reflect on how we let them get out of focus and to reflect on the importance of protecting them.

So I thought, well, maybe I ought to risk being in somebody's anthology and say something here at this ceremony. There is a natural proclivity for the old guys leaving to give one last lecture, and I thought of that. And I thought maybe I should give a lecture to the American people, thanking them for their support for the Armed Forces and for a strong defense—and tell them that their support is needed in the days and years ahead—that their support for a strong defense should not be a one-shot operation.

I thought I might tell them what Winston Churchill said to the British people before World War II, "We can afford what we need for defense. What we can't afford to say is that we can only afford what is convenient to provide." I thought I might remind them that they won't wish away nuclear weapons, that they won't wish away the Soviet threat and that as you go to negotiations with the Soviets, Mr. President, you need a firm defense of the United States as a building block for those negotiations. But I've said all that before. The American people don't need that message, so that shouldn't be the lecture.

Then I thought of talking to those patriots who represent "We the People" in the Congress and thanking them for their support for a strong defense. But I also wanted to tell them that I've listened to a number of their lectures over the last few years when I went over to testify. And I thought I might tell them that they deserve to get maybe a 60-second lecture from me today. And I thought I'd tell them that they dabble too deeply into the Defense Budget. They get too far down into the details and they get lost; so, sometimes they don't get the Appropriations Bills out on time. The combination of those two probably wastes more of the taxpayers' money than they are trying to find in savings by dabbling into the depths of the Defense Budget.

And, I thought about telling them respectfully, of course, that, while they are diddling around with the notion of reorganizing the JCS, their own organization for dealing with Defense sadly needs reform. And I thought I might tell them in the language of the modern-day soldier to "get their act together"—to get on with the two-year authorization bills and multi-year procurements, to clean up the committees and stop dabbling in the details of the Defense Budget, and to judge us by broad objectives and whether we meet those objectives and whether we do it with reasonable Defense Budgets. But, I've said all that before so it didn't seem that that lecture would be appropriate.

I thought of lecturing my fellow members in the Armed Forces about the great responsibilities the people of this Nation have laid on them and about how important their diligence, their alertness, their teamwork, their loyalty and their perseverance are to the security of this Nation today and in the years ahead. I thought of reminding them of the importance of being alert, being ready, and being well-trained and the importance of doing all those things with the knowledge of the taxpayers' dollars—and to take care of the equipment and supplies that have been provided to them. But I've said all that before so there is no need for that lecture.

And I thought of all sorts of other lectures. . . . To my Russian counterpart about the foolishness of attempting to start a war with the Western Allies. Or to our Allies about the importance of providing adequate contributions to the common defense. Or to my fellow members of the JCS about keeping up the good work. Or lectures to defense contractors and to American workers about the importance of quality work in the defense materials upon which the lives of these people here depend. But I've given all those lectures so there is no need to repeat them.

Then I thought of all the people I should thank. . . . Maybe to thank the Lord for His help. But we do that every day. Or to thank everybody in the military chain of command for the help they've given me—from you, Mr. President, on down to the lowest private, even to the ones just recruited or reenlisted today. Or thanking my old comrades like General Bolte, my World War II commander. Or Lux Holbein who is the Chief of Police in Hanau, Germany, who came all the way from Europe for this ceremony and who helped me get five of my stalwarts out of jail 30 years ago.

And I could thank all the security people and the workers in the Pentagon who have made life easier; but, there are far too many people to name and I hope you all know that I'm grateful.

I thought of thanking Avis for successfully packing the household goods for the 29th time and getting them shipped off without any help from me. Or thanking the children for not mutinying for a dozen or so moves during the middle of the school year; but, they are all grown up and they know I'm grateful.

By the time I thought of all those things to say, my run was about over and I was back at the Chairman's house; and the first glimpse of the morning sun silhouetted through the haze the Capitol and those monuments down there. It occurred to me that the principles upon which this Nation rests are firm—that when you look out there at the Capitol, you can't help but be reminded of the Preamble of the Constitution—"We the People." And as I thought about Arlington Cemetery in which all of those gravestones are there for all the other "indispensable" people that preceded me, I was reminded that defending the country over the past 209 years has been steady business—steady work—and will continue to be in the years ahead. I have a very good man replacing me. So, I put the flag out in front of Quarters Six and, as I put it in the bracket, I thought that, in addition to all the JCS problems and all the undone work I was leaving Bill Crowe, I leave him that very good, 20-buck bronze eagle that I bought for the end of that flag pole.

It occurred to me that probably the best thing to do here this morning was to give to my fellow citizens the same charge that Saint Paul gave to the Hebrew Christians when he said, "Let us run with perseverance the race that has been set before us." And then just simply say, "Thanks. Thanks, troops."

Gen. John W. Vessey, Jr.

General John W. Vessey, Jr., was appointed the tenth Chairman of the Joint Chiefs of Staff, Department of Defense, by President Ronald Reagan June 18, 1982. He was reappointed to a second two-year term in 1984. In this capacity, he served as the senior military advisor to the President, the Secretary of Defense and the National Security Council. General Vessey served as Vice Chief of Staff, United States Army, prior to his current appointment.

General Vessey was born and raised in Minnesota. He enlisted in the Minnesota National Guard in May 1939, and was called to active duty in February 1941. He rose to the rank of first sergeant before receiving a battlefield commission as a second lieutenant of Field Artillery at the Anzio Beachhead May 6, 1944.

Much of the first 30 years of General Vessey's military service was with combat divisions. His assignments included duty with the 34th Infantry Division in North Africa and Italy during World War II, the 4th Infantry Division in Germany, two tours with the 3rd Armored Division in Germany, the 25th Infantry Division in Vietnam, and command of the 4th Infantry Division (Mechanized) at Fort Carson, Colorado.

In 1970, General Vessey returned to Southeast Asia for his first assignment as a brigadier general. He served in Thailand, then in Laos, where he was responsible for coordinating U.S. military operations until the cease-fire was signed in Laos in February 1973.

Upon promotion to Lieutenant General in 1975, General Vessey became the U.S. Army's Deputy Chief of Staff for Operations and Plans. He was promoted to general in 1976 and assigned to Korea as Commander-in-Chief, United Nations Command; Commander, U.S. Forces, Korea; and Commanding General, Eighth U.S. Army. In 1978, he also became the first Commander-in-Chief of the Republic of Korea-United States Combined Forces Command. General Vessey returned to Washington in July 1979 to become the Vice Chief of Staff, United States Army.

General Vessey's military schooling includes the Special Basic, Associate Advanced, and Advanced courses of the Field Artillery School; the Command and General Staff College; and Armed Forces Staff College; the Industrial College of the Armed Forces; and the Army Aviation School.

He is the recipient of numerous US military decorations and awards including the Distinguished Service Cross, the Defense Distinguished Service Medal, the Army Distinguished Service Medal, and the Purple Heart. He has also been decorated by the Governments of Belgium, Chile, Colombia, El Salvador, France, Greece, Honduras, Korea, Luxembourg, Norway, Pakistan, Saudi Arabia, Spain, Thailand, and Uruguay.

General Vessey's civilian education includes a Bachelor of Science degree from the University of Maryland, College Park, Maryland, and a Master of Science degree from The George Washington University, Washington, D.C. He also attended the University of Pittsburgh's Management Program for Executives. He is a member of the Phi Kappa Phi Honor Society. General Vessey was awarded an honorary Doctorate of Letters from Concordia College, St. Paul, Minnesota; an honorary Doctor of Laws from the University of Maryland, College Park, Maryland; an honorary Doctor of Laws from Concordia Seminary, St. Louis, Missouri; and an honorary Doctor of Military Science from Norwich University, Northfield, Vermont.

In addition to his military duties, General Vessey serves on the Board of Governors of the American Red Cross; Youth Service, U.S.A., National Flag Day Committee; and is Co-Chairman, Awards Committee, American Academy of Achievement. He is also a member of the Council on Foreign Relations and the Washington Policy Council of the International Management and Development Institute (IMDI). Among his civilian awards honoring his public service are the State of Minnesota Distinguished Service Medal; the Alumni Achievement Award and the Distinguished Public Service Award. The George Washington University; the Distinguished Alumnus Award, University of Maryland, University College; the Golden Plate Award, American Academy of Achievement; the Reserve Officers Association Minuteman Hall of Fame Award; the Admiral John M. Will Award, New York Council of the Navy League; the Maxwell A. Kriendler Award, Air Force Association, Irongate Chapter; the David Sarnoff Award, Armed Forces Communications and Electronics Association; and the National League of Families honorary award recognizing efforts on behalf of prisoners and missing in Southeast Asia.

General Vessey is married to the former Avis Funk of Minneapolis, Minnesota. They have two sons, John III, a Foreign Service Officer, and David, a Warrant Officer with the US Army; and a daughter, Sarah Vessey Krawczyk.

Retirement effective October 1, 1985.

Awards and Decorations

Distinguished Service Cross.
Department of Defense Distinguished Service Medal with one oak leaf cluster.
Army Distinguished Service Medal with two oak leaf clusters.
Navy Distinguished Service Medal.
Air Force Distinguished Service Medal.
Legion of Merit with one oak leaf cluster.
Bronze Star Medal with one oak leaf cluster.
Air Medal with four oak leaf clusters.
Joint Service Commendation Medal.
Army Commendation Medal with "V" Device.
Purple Heart.
Good Conduct Medal.
General Staff Identification Badge.
Army Aviator Badge.
American Defense Service Medal.
American Campaign Medal.
European-African-Middle Eastern Campaign Medal (six campaign stars).
World War II Victory Medal.
National Defense Service medal with one oak leaf cluster.
Army of Occupation Medal (Germany).
Army Service Ribbon.
Overseas Service Ribbon (3).
Republic of Vietnam Campaign Ribbon (two campaign stars).
Republic of Vietnam Campaign Medal with 60 Device.
Republic of Vietnam Cross of Gallantry with palm (individual Award).
Republic of Vietnam Cross of Gallantry with palm (United Citation) (3 awards).
Presidential Unit Citation (Army).
Commander's Badge, Special (Republic of Korea).
Republic of Korea Order of Military Merit (Taegeug).
Chilean Order of Merit, Great Star to Military Merit.
Military Order of Merit, "Lieutenant of Artigal, Grand Cross" Class from Eastern Republic of Uruguay.
The Most Exalted Order of the White Elephant (First Class Knight Grand Cross), Kingdom of Thailand.
Grand Cross, Royal Norwegian Order of Saint Olav.
Cross of the Armed Forces of the Republic of Honduras.
Republic of Korea Order of National Security Merit, Tong-Il Medal.
Grand Officer of the Order of the Oak Crown from Luxembourg.
Kingdom of Thailand Royal Thai Supreme Command Forward Master Badge.
Cross of Military Merit, Order of Honor of the Hellenic Republic of Greece.
French Legion of Honor, Degree of Commander.
Grand Cross of Military Merit with White Badge (Spain).

Cross of Distinction (Pakistan).
King Abdulaziz Award—Second Degree (Saudi Arabia).
Order of Military Merit, "Jose Maria Cordova," Degree of Grand Cross (Columbia).
Gold medal for Distinguished Service (El Salvador).
Belgian Grand Order of the Crown.

ADDITIONAL AWARDS

The Distinguished Alumnus Award, University of Maryland, University College, December 1977.
Honorary Doctorate of Letters degree, Concordia College, St. Paul, Minnesota, May 1978.
The Minuteman Hall of Fame Award, Reserve Officers Association, June 1980.
Golden Plate Award, American Academy of Achievement, July 1982.
State of Minnesota Distinguished Service Medal, July 1982.
The Admiral John M. Will Award, New York Council of the Navy League, November 1982.
Honorary Doctorate of Laws, University of Maryland, College Park, Maryland, January 1983.
The Alumni Achievement Award, The George Washington University, February 1983.
Honorary Doctor of Laws, Concordia Seminary, St. Louis, Missouri, July 1983.
The George Washington University Distinguished Public Service Award, The Public Administration Alumni Council of The George Washington University, April 1984.
The Maxwell A. Kriendler Memorial Award, Irongate Chapter (New York), Air Force Association, March 1985.
Honorary Doctor of Military Science, Norwich University, Northfield, Vermont, May 1985.
The David Sarnoff Award, Armed Forces Communications and Electronics Association, June 1985.
Honorary Award, National League of Families of American Prisoners and Missing in Southeast Asia, July 1985.

THE CENTENNIAL OF DOTHAN, ALABAMA

Mr. HEFLIN. Mr. President, I hope that we are familiar with the Biblical story of Joseph, the son of Israel, and his coat of many colors. Within the verses of the 37th chapter of Genesis which tell that story, there is a passage where Israel sent Joseph to find his brothers, and they were not where he had been told to find them. Joseph then asked directions of a man he found in a field, who answered, "For I heard them say, let us go to Dothan." Today, Mr. President, I say to my colleagues "Let us go to Dothan," at least in mind and in spirit, as I rise to congratulate the citizens of Dothan, AL, on their centennial celebration.

Dothan is located in the southeastern most portion of Alabama, serving as the hub of trade for what is called the Wiregrass region. In the dawning days of what is now Dothan, members of the Creek Confederacy first chiselled out a clearing in the dense poplar grove that covered the area. With a demeanor similar to today's residents, the early settlers lived peacefully and engaged in friendly trade with the bordering Alibamu tribe. Other persons were attracted to the area and, by 1858, nine founding families joined together to build their rustic cabins and petition for a Federal post office.

The settlers chose the name Poplar Head for their community post office due to the many poplar trees that surrounded the glade where fresh spring water rose from within the ground. Discovering that another Alabama community already claimed the same name, the settlers instead selected the name "Dothen"; it was soon changed to "Dothan" to correspond with the biblical quotation from Genesis 37:17: "Let us go to Dothan."

During the first trying years of the settlement, the church lent support and inspiration to those that braved the hardships of "working the land." Many of these same churches have withstood the test of time to provide the same support and inspiration to Dothan residents of the 20th century. Today, several of Selma's churches have weathered more than a century, and today they remain proud of their heritage and eager to serve their people.

As churches and farm houses began absorbing the once empty countryside, settlers saw the need for a governing body and local law enforcement. This need was asserted on the 10th day of November 1885, when, by popular vote, it was decided to incorporate the town with the name of the post office—Dothan. It was this incorporation that provides Dothan her first official centennial.

Staying in step with the quickened pace of the 20th century, Dothan soon realized that nonagricultural industry needed to be developed to maintain their growth. But attracting big industry to an inexperienced town proved to be an arduous task, even for the most determined city officials. In 1937, Dothan Hosiery became the town's first nonagricultural industry, providing a great boost for the economy and morale. This success sparked the enthusiasm of residents like Harry Hall to help his town grow. In 1949, Mr. Hall, along with several others, travelled to Boston to convince a particular manufacturer to locate in Dothan; but no answer was given and only disinterest was expressed. However, Harry Hall sent a telegram back to Boston on his way home that simply stated, "read Genesis 37:17." The manufacturer agreed to build what is now the Brown Shoe Corp. in this beautiful city, probably because of the biblical quotation suggested by Harry Hall: "Let us go to Dothan."

This invincible civic spirit was also held by other towns people as was evidenced when nearby Camp Rucker was scheduled to be closed in 1954. The people of the city quickly banded together to ensure the government realized the vital importance of the installation for Dothan as well as the entire Nation. Once again the influence proved successful and, in one month, the base's name and function elevated from Camp Rucker to Fort Rucker, including a new aviation school. With continued expansion, the base today maintains an important position in Dothan's economy, employing over 2,700 civilians.

By not limiting herself to regional enterprise, Dothan entered the race to attract diversified manufacturers and has subsequently emerged a winner. Michelin, a major tire manufacturer, has been enjoying prosperous production since 1979, allowing hundreds of local residents to be on the company's payroll. A firm known for its techological advancement, Sony, was also drawn to the Dothan area where it located a manufacturing plant which in 1981, after undergoing expansion, claimed 600,000 square feet and 1,700 employees. Dothan has asserted herself as an aggressive competitor for industry that will not be satisfied with "running with the pack" but is determined to move out in front.

Among other distinctions, Dothan is noted for the National Peanut Festival which receives national media attention each year. The first festival took place in 1938 after the local chamber of commerce, in an effort to keep Dothan's name in front of industrialists, proclaimed Dothan as the national peanut capital of the world as well as the home of the National Peanut Festival. The peanut, honored by the event, provides a valuable crop for the farmers of the Wiregrass region largely because of the various uses for the lowly peanut found by Dr. George Washington Carver, the festival's first main speaker. The annual celebration of today fills an eclectic agenda including a parade, beauty contest, regional choral contest, and a speaker of prominent or celebrity status; world renowned Bob Hope is included in the list of past speakers.

The passing of a full century has certainly allowed many changes for the city that originally claimed only 100 residents. Dothan now boasts 87 churches, 5 banks, a vocational school, and a 4-year branch of Troy State University, serving the 51,630 people that comprise the State's sixth largest city.

Mr. President, it is in this year of 1985 that Dothan marks her first centennial. It is this grand celebration that allows all of Dothan's citizens to cherish their legacy of pride and strength while recognizing the challenge of tomorrow.

Mr. President, I am honored to represent the people of Dothan, AL. As can be affirmed by my distinguished colleague from Hawaii, Senator INOUYE, who was stationed there during World War II, Dothan holds

many valuable commodities for my State, but none greater than the Dothan residents that have formed her history and now formulate her progress.

THIS IS GARDENDALE

Mr. HEFLIN. Mr. President, I am proud to rise today in recognition of Pauline Parker Jones and the Retired Adult Club of Gardendale, AL, for their publication of a book, "This is Gardendale," relating the history of their town.

Gardendale, located in the "heart of the heart of Dixie," traces its founding fathers all the way back to the year 1832. Beautifully situated in the northern central part of Alabama, it was originally named Jugtown, because of its small jug factory. Today, Gardendale has grown into a prosperous industrial area.

Settlers began pouring into the area that is now Gardendale after the War of 1812. By the late 19th century, the once small farm community had begun to grow.

Interestingly, it was not until 1906 that Jugtown was renamed Gardendale, at the suggestion of a schoolteacher, Miss Hettie Thompson. Miss Thompson suggested to the school board that there were some drawbacks to the name Jugtown. She, in turn, suggested the town be renamed Gardendale. The other name suggested was Gardenville, but, in a drawing, the choice was Gardendale. It was another 49 years later, on July 27, 1955, that Gardendale was officially incorporated as a city.

Gardendale is a city rich in historic traditions. A memorial park is located in the center of town, and serves as a living memorial. Several war relics are placed there, and 99 crosses stand as a reminder of the deceased veterans of war. In 1966, an "Avenue of Flags" was erected, also to honor those who gave their lives for our country. These flags are flown on Flag Day, the Fourth of July, and Veterans Day.

Like all towns across America, religion has served as a backbone of Gardendale since its founding. The strength necessary for survival in earlier times was largely fostered by religious institutions. Throughout its history, Gardendale has been the recipient of tremendous contributions from churches, established early in the town's development and providing moral and spiritual leadership ever since. The churches that today dot Gardendale's streets each provide a needed service, and help to make it a nice place for families to live.

In 1892, Gardendale's first public school was built. The Milner School, named for the man who donated the lumber for its construction, employed one teacher and housed as many as 110 pupils in its one classroom. This remained the town's only school until 1913, when Snow Rogers School was built. The year 1965 was a milestone for Gardendale, as it opened the doors of its first modern high school building. Since then, the school's outstanding facilities have provided a favorable atmosphere for the education of Gardendale's young people.

Gardendale's government has always been a source of civic pride. From the days of the first mayor, J.I. Pesnell, to those of the current mayor, William Noble, the town's elected officials have been instrumental in shaping Gardendale into the fine place it has become.

Mr. President, it is a great pleasure for me to represent the people of Gardendale in the U.S. Senate. I congratulate this fine city on its growth, prosperity, and beauty, and Pauline Parker Jones and the Retired Adult Club on their outstanding historical project.

DR. SCHLESINGER'S VIEWS ON UNITED STATES/SOVIET RELATIONS

Mr. NUNN. Mr. President, last month I accompanied the delegation led by Senator BYRD and Senator THURMOND on its visit to Moscow. Prior to leaving, I had the opportunity to read an excellent article by former Secretary of Defense James Schlesinger reviewing the past 40 years of superpower relations. The article, entitled "The Eagle and the Bear," presented a number of perceptive insights that helped prepare me for my discussions with Soviet officials. Dr. Schlesinger also assisted in preparations for the trip by providing Senator BYRD with a detailed briefing on the current state of United States/Soviet relations.

In his article, Dr. Schlesinger makes several perceptive observations which are especially relevant as the administration prepares for the November summit. First, he emphasizes the need for consistency and pragmatism in American foreign policy and warns against lecturing the Soviet Union on subjects on which there is likely very little give in their position. As Dr. Schlesinger notes: Instead of "managing the Soviet relationship," we are now more inclined to sermonize the Soviets on various subjects on which they appear unpersuadable—human rights, star wars, even Leninism itself. Sermonizing the Russians is an activity that one earlier President, Dwight Eisenhower, explicitly declared to be unproductive. Moreover, sermonizing provides a most awkward posture from which to work out a modus vivendi.

If the summit is to prove productive, it is essential that the time should not be consumed simply by both sides restating past grievances. Little will be gained if both men spend the entire 2 days saying, "There you go again." I have recommended that the time of the meeting be divided into thirds: One-third for reviewing the past, one-third for discussing the present, and one-third for a dialog on the future.

Second, Dr. Schlesinger criticizes the administration for using such phrases as "immoral" and "flawed" in describing the current U.S. strategy for deterring Soviet nuclear attack. As Dr. Schlesinger observes: "without any preparation, indeed without any realization, it attacked the prior foundation of the basic arms relationship."

This is a matter that has concerned me greatly in recent months. I fully concur with Dr. Schlesinger that such statements "undermine the foundation on which Western security must rest for the foreseeable future." Furthermore, they clearly prejudge the outcome of SDI research when, as he notes, "the normal behavior is to allow the technical uncertainties to be resolved before one reaches conclusions about force structures or strategy. In this case, the results are being announced in advance: a revolutionary change in strategic doctrine and the strategic relationships between the superpowers."

I had hoped that the administration had finally realized the dangers of its ill-advised comments disparaging current U.S. strategic doctrine. In June, I was encouraged by the White House's release of a declassified version of a new Presidential directive on SDI which declares that "U.S. policy supports the basic principle that our existing method of deterrence, and NATO's existing strategy of flexible response, remain fully valid, and must be supported, as long as there is no more effective alternative for preventing war." However, I was very disappointed to read that in a recent press briefing by a "senior administration official," deterrence was again criticized, this time being termed a "surreal" doctrine. Moreover, this official said that "evidence is mounting and undentiable it may not work in the years ahead."

If the administration really believes this rhetoric and is not just falling victim to the temptation to hype and oversell the case for the SDI, then it should recognize that it is pulling the rug out from under its rationale for strategic modernization programs intended to provide the United States with greater accuracy and capabilities against military targets. For over a decade, beginning with Dr. Schlesinger's tenure as Secretary of Defense, our strategic plans have emphasized military and not civilian targets. To those who understand our strategy and our true capabilities, deterrence is a broad term covering many targeting options, of which "assured destruction" is a plan of last resort.

If, as some administration advocates of the SDI infer, our only options are

near-perfect population protection defenses or destroying Soviet cities in a massive retaliatory strike, we do not need the MX or the Trident II missile. Destroying cities can be accomplished with far less accurate, sophisticated or expensive systems.

Mr. President, I ask unanimous consent that Dr. Schlesinger's article be published in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Foreign Affairs, summer 1985]

THE EAGLE AND THE BEAR—RUMINATIONS ON 40 YEARS OF SUPERPOWER RELATIONS

(By James Schlesinger)

The linkup of American and Soviet forces at Torgau on the Elbe in April 1945 may be taken as the event symbolizing a new era in international relations—one largely dominated by the central relationship between two great powers, later known as the superpowers. The meeting at Torgau meant the splitting of Germany, the preeminent European power for three-quarters of a century. Germany's division was to be both a fixture of the postwar era and, additionally, a continuing source of unease. Also, the event dramatically initiated what was to become die Wacht an der Elbe, an American protection against the power of the East of what was to become a democratic Germany—and behind Germany an abiding American commitment to the security of Western Europe. Despite the misjudgments in the immediate aftermath of the war, the lessons of two world wars had been insinuated into American foreign policy. Finally, in the way of symbolism, perhaps the brief exchange of fire between Soviet and American forces on the Elbe provided an early harbinger of the tensions that were ultimately to emerge.

To be sure, the war had not entirely run its course. Yet within a matter of weeks Hitler was dead and Germany had surrendered unconditionally. Roosevelt, too, who through America's immense power had become the dominant leader of the west, was gone. The war against Japan was yet to be completed, but because of the bomb, it turned out to be almost a sideshow. The Soviet motive for joining the war against Japan was more akin to that of Mussolini in 1940—to participate in the spoils as the war was concluded—than it was to the spirit of the grand coalition.

The American desire was to fulfill the promise of Wilsonian idealism, of the Four Freedoms, of collective security and of the peaceful resolution of disputes through new international institutions. Russian goals were to establish a firm communist base in Europe, to create a *cordon sanitaire* against Western power, and unquestionably to obtain a position of authority in postwar deliberations at least equivalent to that of Tsar Alexander in 1815.

II

Yet the tone of the relationship had already changed. Potsdam was quite different from Yalta. Only Stalin continued in power. The new American President was figuratively as well as literally from Missouri. He did not, indeed could not, share Roosevelt's expectation of enticing Stalin and the Soviet Union into a harmonious postwar structure. By the Potsdam meeting in July, America had passed beyond its wartime dream of long-term international collaboration with the Russians to a new and skeptical study of actual Soviet conduct.

Churchill, too, was gone. Perhaps the great symbolic Western leader in the wartime period, he had been replaced by Clement Attlee. And Britain, one of the Big Three, commenced a long-term decline from the prestige of the wartime period, lacking the resources and perhaps the will to maintain its place with its immensely powerful, continent-spanning allies. Britain's long-term decline was symptomatic of the radically altered position of Europe. Europe's Great Power were destined never to recover to the extent then anticipated. They would remain dependent upon the United States for protection. Post World War II Europe would be altogether different from post World War I Europe. Whatever its inclinations, America could not go home again.

Nonetheless, it tried. Therein lies a great irony of the postwar period. In these latter days of discussions of the prospects for mutual disarmament or arms control through negotiations, it is forgotten that in 1945 the United States sought no mutual concessions or guarantees from the Soviet Union. No protests could then be made about the intransigence of the American position. The United States simply and unilaterally disarmed. The country gave way to the impuse to "bring the boys home." The pace of demobilization can only be described as pell-mell. The draft was ended. Military units were heedlessly broken up. By 1947, aside from a handful of atomic weapons, U.S. military power had been largely dismantled. In a reborn quest for "normalcy," President Truman had terminated Lend-Lease within a few days of the war's end. America sought normalcy. Disarmament had occurred—without negotiations.

The irony, of course, is that it was the Soviet Union that brought America's precipitate withdrawal to an end—and thereby forfeited a heaven-sent opportunity. Whether it was Stalin's brooding genius, his innate Georgian suspicion or deep paranoia, it was he who brought the United States back to a sense of its international responsibilities. The gradual elimination of dissent in Eastern Europe, culminating in the defenestration of Masaryk and the Czech coup in 1948, was accompanied by pressures against Greece and Turkey and by the Berlin blockade. Truman rose to the challenge. America reversed course: there was the Greek-Turkish aid program, the Marshall Plan and the Berlin airlift. Moreover, by 1947 the draft was restored and the United States began a modest rebuilding of its military forces, to be greatly augmented after the invasion of Korea in June 1950.

The Russians had committed a colossal blunder. They had failed to understand—and to exploit—the rhythms of the American democracy. Imbued as they were with their own interpretation of America's geopolitical necessities, the Russians failed to grasp that the Americans simply did not think the same way. The Americans had not read Lenin or Clausewitz or Machiavelli. The themes of realpolitik remain contrary to the spirit of the American democracy. But the Russians did not know that. The paradox was that the Soviet understanding of America's geopolitical requirements was closer to the mark than was the American understanding. In a profound sense it was Soviet misreading of the United States that induced America to accept its role in the central strategic relationship of the last 40 years.

The Soviets' extraordinary misinterpretation of the American character and American style poses a question which deserves careful examination and may provide a long-term and perhaps tragic theme for superpower relations. Are the moods of the superpowers, reflecting both longer-term and more recent experiences as well as their internal political dynamics, so out-of-phase with one another that they preclude simultaneity in seeking a modus vivendi? That question has become increasingly pressing, as the visible American willingness to reach a long-term accommodation during the 1970s was aborted as a consequence of the Soviets' deep-seated impulses never to flag in the quest for marginal advantages. By the end of the 1970s, the Soviets had managed to dispel much of the American goodwill (and a fair amount of naiveté as well). The American anger continued, indeed expanded, during the 1980s—at just the point that the Soviets might have been prepared to accept a longer-term accommodation. These contrapuntal fluctuations in mood may turn out to be the most permanent feature of these 40 years of superpower relations.

III

By the end of the 1940s the general outlines of American policy had been set. They reflected a determination to protect the democracies of Western Europe and Japan, but additionally (and somewhat adventitiously) picking up responsibility for other states around the Soviet periphery, such as Greece, Turkey and Iran. Conceptually, policy rested upon a strategy of containment, reflecting the seminal views of George Kennan. But containment came to imply far heavier emphases on military measures and less on political measures than Kennan personally would have liked (a concern that has increasingly come to preoccupy him as these four decades have progressed). Moreover, containment—at base a pragmatic strategy—came within the ordinary exigencies of American life to bear those very features of moralism and legalism that Kennan himself had feared and decried as the characteristics of American foreign policy.

These characteristics certainly came to the fore during what may be called the Dulles phase of the Eisenhower presidency. They were reflected in a certain preachiness and in the crusading rhetoric that Americans tend to find so attractive. But they were also reflected in the U.S. sulkiness at the 1954 Geneva conference on Indochina, in the U.S. refusal to accept the results of that conference, in the unwillingness of Secretary Dulles to accept the proffered hand of Zhou Enlai—and in the frozen diplomatic relations with "Red China," which were to have such baleful effects in Southeast Asia in the 1960s, and which continued until Nixon unfroze them in the early 1970s. The moralistic-legalistic approach to foreign policy was to reach another high point, after that realpolitik of the Nixon-Kissinger years, during the Carter years. Perhaps the most revealing episode in placing legality above geopolitical reality came in late 1979 with the vehement, and in some ways extraordinary, reaction to the movement of Soviet forces across the international boundary into Afghanistan. In reality, the geopolitical damage had been done a year and a half earlier with the overthrow of the Daoud regime and the establishment of Moscow's protégé regime in Kabul.

The emphasis upon the *military* aspect of containment intensified during the 1950s. That emphasis, of course, had been reinforced by Korea and the sudden revelation

that fewer nations could realistically be placed "outside the American defense perimeter." President Truman had seized the opportunity to ease a domestic political problem by establishing a quarantine in the Straits of Formosa during the war itself. But after the armistice the policy actually expanded—into the military containment of "Red China." One result was the immensely high domestic political effect of the militarily inconsequential struggle over the offshore islands of Quemoy and Matsu. Indeed, the tendency to equate military strategy with foreign policy reached its apogee with the doctrine of massive retaliation and its later corollary that we would respond by fighting wars "at times and in places of our own choosing."

America's military advantages were immense during the 1950s. Our dominant position in strategic nuclear capabilities meant quite simply that the United States could essentially flatten the Soviet Union, with only the most limited Soviet ability to retaliate against the continental United States. This dominant position in nuclear forces lured the United States into what was to become an excessive reliance on nuclear weapons. It was enshrined in the doctrine of massive retaliation, which, however great the reservations of intellectuals, remained workable—as long as the United States retained strategic dominance. But it was unsustainable in the long run.

America's inherently transitory advantages in nuclear weapons seduced the United States and its Western allies into almost total dependency on the threat of nuclear retaliation. In 1954 the United States adopted the New Look, emphasizing nuclear forces and reduced spending—and allowed its land and tactical air capabilities to remain weak. The NATO alliance abandoned the Lisbon force goals of 1950 and thereby solidified the habit of leaning on the nuclear crutch. For the short run there might be certitude, but in the longer run it implied for the West an uncertain trumpet, the biblical phrase that Maxwell Taylor used to indicate our eventual vulnerbility. Needless to say, the problem of conventional military weakness has continued to haunt the Western alliance.

Yet the Soviets themselves must have been continuously haunted throughout the 1950s and later by their unquestioned inferiority in terms of intercontinental strike forces. No doubt the shift in alliance strategy to immediate use of nuclear weapons brought pause to the Soviets regarding the advantages that might be wrung from their immense conventional establishment. But that immense conventional establishment in turn caused perplexity and concern in the West. Given the almost disarmed state of Western Europe, what gain could the Soviets derive from maintaining a World War II-sized army of 165 divisions?

Those in the West inclined to provide rationales—or rationalizations—for Soviet behavior hypothesized that thus holding Europe hostage provided the Soviets with *their deterrent* against the Americans. The threat of a massive attack that could overrun Western Europe, so the hypothesis ran, would deter the Americans from exploiting their overwhelming advantages in nuclear forces. But fear of that immense Soviet force, augmented by other Warsaw Pact capabilities, led to a general rearmament by the West and to the further expansion of American nuclear forces.

Whether the rationale attributed to the Soviets by Western analysts did play any serious role in Soviet thinking is still unknown. It was plausible. It fit the circumstances. It may even have been true. It should be noted, nonetheless, that even as the Soviets developed an intercontinental counterdeterrent to offset American capabilities, the Soviet Union maintained and *expanded* its military forces arrayed against Western Europe. In itself that should raise a question in the minds of those inclined to provide rationalizations for the structure of Soviet forces. Even if the old rationale had once played a role in determining the size of Soviet military forces, quite clearly a new explanation was now required.

The military dominance that the United States achieved during the 1950s could not be permanently sustained—and cannot be recovered. As late as 1956, during the Hungarian uprising, the Soviets were obliged carefully to consider possible American military reactions—even within their own satellite empire. By contrast, in 1968 in Czechoslovakia and even more clearly in Poland in the early 1980s, the relative Soviet position had so improved that they needed to give little attention to the possibility of American intervention. In 1956, also, Khrushchev could indulge in his bluster during the Suez incident about raining rockets down on London and Paris—only *after* it had become clear that the United States was separating itself from its allies. Under any other circumstances the Soviets could not risk provoking the United States, given its military edge.

Eisenhower himself was far more inclined than Dulles to practice an open and flexible diplomacy toward the Soviet Union. That ultimately resulted in the atmosphere of détente, enshrined in the spirit of Camp David from the late 1950s, as well as in secondary manifestations such as Khrushchev's heralded journey to Roswell Garst's Iowa farm and his visit to Hollywood. It also resulted in the Atoms for Peace proposal—including, rather farsightedly, the establishment of the International Atomic Energy Agency, in which the United States and the Soviet Union have effectively worked together.

Perhaps most notable, though inevitably abortive, was the "Open Skies" proposal. That proposal was a prelude to the numerous U-2 reconnaissance flights over the Soviet Union and to the shoot-down in 1960 that blew up the Paris summit and dispelled the spirit of détente. Until Gary Powers' flight, the Soviets had been forced to watch helplessly while American planes overflew their territory. Then their SA-2 antiaircraft missile ended that period of frustration and technological envy. But it heightened Soviet respect for and fear of American technology, further reinforced during the 1960s by the speed of the deployment of our Minuteman force and by the clearcut superiority of the U.S. technology embodied in the Safeguard anti-ballistic missile (ABM) system as compared to the Soviet Galosh system. Such Soviet experience has bred a sense of technical inferiority vis-a-via the United States that borders on a psychosis. The succession of the Open Skies proposal by the flight of the U-2 may help explain the apparently excessive Soviet reaction to President Reagan's Star Wars proposal. Given that earlier, humiliating experience, the Soviets will no doubt be wondering: what might these technological wizards now have up their sleeves?

IV

The arrival of the Kennedy Administration, in light of the campaign assertions regarding the missile gap and in the aftermath of the blow-up of the Paris summit, brought significant changes. The ignominious failure of the Bay of Pigs operation, the bullying of the young President by Khrushchev at the Vienna summit, the renewed Berlin crisis and the Cuban missile confrontation all contributed to the grim mood within an Administration dedicated to going anywhere, paying any price, et cetera, to preserve freedom. Late in 1961, new reconnaissance techniques revealed that the missile gap was in fact a myth and that the strategic advantage continued to rest with the United States. But that disclosure alleviated only slightly the tension felt during the Cuban missile crisis the next year.

After the Cuban missile crisis, the mood in the Administration changed. It became both less grim and less wedded to its original missionary zeal. The Administration's interest in arms control was stimulated. The Limited Test Ban Treaty was signed in 1963—with the intention that it be the first fruit of a much lengthier arms control process. Defense Secretary Robert McNamara, who during the early years of the Administration had proposed counterforce strategies, city avoidance, civil defense and damage limitation, turned increasingly away from such concepts after 1963 and began to elaborate the strategy of mutual assured destruction. In the last year of the Kennedy Administration and throughout the Johnson Administration, the U.S. strategic force posture came to be guided by a belief in arms restraint—which it was presumed would be emulated by the Soviets. It became an article of faith that the Soviets would terminate their intercontinental ballistic missile (ICBM) deployment at 1,000 missiles, as we had, if indeed they chose to deploy that many. (They did not, in fact, stop until 1,618.)

From the first, the Kennedy Administration had shared General Taylor's skepticism regarding reliance on the threat of nuclear retaliation. It substantially increased funding for conventional forces—and explicitly repudiated the New Look strategy inherited from the Eisenhower Administration. A new administration, reflecting both the campaign rhetoric regarding "suicide or surrender" and Secretary McNamara's strong convictions, was determined to provide a conventional deterrent in Europe that would by itself preclude Soviet conventional attack. It also sought to establish a firebreak prior to any use of nuclear weapons.

Sound as Secretary McNamara's logic might have been regarding the buildup of conventional forces, it signally failed to recognize the psychology of our allies. The allies were wedded to reliance on nuclear retaliation. The proposed buildup of conventional capabilities was both resented and opposed because it would supposedly weaken deterrence and would thus invite attack by the superior Soviet conventional forces. Given their experiences, the allies had no desire "to refight World War II." They portrayed as the only alternatives either the agony of a conventional war or continuing peace through nuclear deterrence. The Administration failed to help its own case—by its rhetoric about the nuclear firebreak, by its expressed abhorrence of any reliance on a nuclear strategy, and by its emphasis on building up conventional forces *as a substitute* for nuclear response. It thus made very slow headway in its attempt to move away from reliance on immediate nuclear retaliation. Utimately, it required both the departure of France from the integrated military structure and the passage of seven years

before the alliance adopted the strategy of flexible response in 1967.

By 1965, however, the Johnson Administration's attention had begun to shift elsewhere, and at an accelerating pace. The war in Vietnam became the preoccupation of the Administration and the focus of an increasingly rancorous domestic debate. Gradually NATO became a secondary issue. It was increasingly neglected, as the government's attention turned toward Southeast Asia.

Two things should be especially noted about the pre-Nixon Vietnam years. First, the Administration's rationale was primarily directed not at the Soviet Union, but at "Red China." Much, indeed far too much, was made of Lin Biao's rather obscure prose about ultimately seizing the cities by initially controlling the countryside. This was interpreted as a direct threat to encircle the industrial world through control of Third World countries such as Vietnam. President Johnson proceeded around the rim of Asia proclaiming the need to defeat this malevolent strategy before we faced "a billion Chinese armed with nuclear weapons." Indeed, the decision in 1967 to deploy the Sentinel ABM system, featuring a thin area defense of the continental United States, was directed primarily at a prospective Chinese nuclear threat.

However, far-fetched such reasoning may appear in retrospect, in this period the Soviets were increasingly viewed as a restraining influence within the communist world—who shared the American aspiration for some degree of international stability. Compared to Mao, the Soviets were viewed as relatively benign.

In the early years of Vietnam, it was widely believed (a view that I found preposterous) that the Soviets were deeply concerned that Vietnam might get out of hand, and therefore were our partners in seeking a settlement of the issue. The possibility that the Soviets might positively enjoy watching the Americans stewing in their own juice was rejected out of hand. That the Soviets would immensely benefit from the refocusing of American attention on the supposed Chinese threat, and from the diversion of American resources away from Western Europe and the competition in strategic forces, was a reality all too rarely examined in Washington. Surely the Soviets would eagerly help extricate the American bacon from the Vietnamese fire. Given these preoccupations and these beliefs, it is hardly surprising that the conviction took hold that the Soviets also shared American objectives with respect to arms control. It was an article of faith that the Soviets sought only to match American strategic capability; their buildup would cease as they approached American force levels. That the Soviets do not think like American liberals has been a lesson very slowly learned.

The upshot was a growing faith in the inevitability of arms control and in the effectiveness of the arms control process. Collaboration on the Non-Proliferation Treaty (where superpower interests coincided) furthered such hopes. At the Glassboro summit in 1967, the Americans attempted to persuade Soviet Premier Aleksei Kosygin of the legitimacy of these views. Simultaneously they attempted to dissuade the Soviets from deploying strategic defenses—for that would result simply in the accelerated deployment of strategic offensive forces. Though they failed to move Kosygin on that occasion, they continued to believe that the logical force of their arguments would ultimately persuade the Soviets.

All these hopes, however, were suddenly dashed by the Soviet invasion of Czechoslovakia. That invasion, which to less Utopian observers of Soviet conduct appeared inevitable in the circumstances, rather surprisingly caught the Administration by surprise. As in 1960, an external event had interrupted the arms control process. The American reaction to what in Soviet eyes should have been accepted as a fortuitous, if not irrelevant, event—later repeated in Angola and even more markedly in Afghanistan—makes sustained and unvarying participation in bilateral arms negotiations impossible for the American democracy.

Expectations regarding a new and more congenial relationship with the Soviet Union reached a peak during the Nixon years—and then faded. Nixon himself was unusual among American presidents in that he came to office with a consuming interest in, and well-formulated views about, foreign policy. The principal achievements of his Administration lay in that arena. Nor were these achievements preponderantly in relations with the Soviet Union. Perhaps the pinnacle was the new and pragmatic relationship with the People's Republic of China, which only a Republican president could have initiated. By opening the door to triangular diplomacy, it markedly affected superpower relations. Overall it has provided sizable benefits in terms of international stability. The withdrawal of American forces from Vietnam and the Paris Agreements, though they provided something less than "peace with honor," permitted the United States to devote its energies finally to far more significant issues. With Henry Kissinger's careful prodding, a degree of stability and even some progress was achieved in the Middle East.

Nixon's style in foreign affairs was wholly pragmatic. It may even be inquired whether an approach so cold-blooded, and therfore so uncongenial to the American temparament, did not contribute to the various waves of ideology that followed the Nixon years. The central feature of Nixon's approach to the Soviet Union was the quest for "an era of negotiations, not of confrontation." Given Soviet foreign policy objectives and the Soviet style, that would require a degree of emotional detachment on the part of the American people that was not long sustainable. Almost inevitably the Polands and Afghanistans lead to confrontation, even if the Angolas and Nicaraguas do not.

But in 1969 all that lay in the future. Putting Czechoslovakia firmly behind us, the new Administration revived the strategic arms negotiations, which were to become the centerpiece of U.S.-Soviet relations. Nixon was not one to proceed to the bargaining table without the wherewithal for bargaining. The Administration proceeded toward the first-stage deployment of the Safeguard ABM system (which unlike the Sentinel system was intended primarily to defend the missile fields). That decision was to have a highly felicitous impact on the negotiations. The Administration also decided on the rapid MIRVing (equipping with multiple independently targetable warheads) of both the Minuteman and Poseidon forces, with a beneficial effect on the bargaining process in the short term, but with a far less satisfactory long-term result. As soon as the United States initiated ABM deployment, Soviet willingness to bargain rose. The Soviets wanted no limitations on strategic offensive weapons, but they were notably eager to head off a major ABM deployment. Nixon took the position that there would be no ABM treaty—unless there was also limitation on stretegic offensive arms. The Soviets yielded, through the constraints imposed were quite limited. The culmination lay in the Moscow agreements of May 1972.

For those agreements to have achieved the purpose of stabilizing the central U.S.-Soviet relationshhip, the Soviets would have had to accept them in the larger spirit that the Americans intended. As in 1945, Americans were ready for an end to confrontation. But the Soviet craving to press for every advantage not specifically precluded by the agreements once again dissipated the vast goodwill generated among Americans.

For the limitation on offensive forces to have contributed to arms stability, the Soviets would have had to refrain from exploiting through new technolgy the possibilities allowed under the agreement. But starting immediately after the signing of the Moscow agreements in mid-May 1972, there was a veritable explosion of Soviet R&D activity on all of the new generation of missiles. Apparently the Soviets had deliberately held up such activity—until the American signature was dry on the agreements. As director of Central Intelligence, I reported this immense Soviet R&D activity and its distrubing implication to the Natonal Security Council early in 1973. If the Soviets were to marry the huge throw-weight advantages that they retained under the agreement with the new technologies in missile guidance and MIRVing, the result would be an American disadvantage in counterforce that we could not tolerate.

For the next two and a half years—and far beyond—the question of how to rescind Soviet throw-weight advantages became central to our Strategic Arms Limitations Talks (SALT). In June of 1974 President Nixon carried to the Soviet Union a proposal to establish a firm limit on MIRVed missile throw-weight. The erosions of Watergate and the characteristics of Soviet bargaining led to its rejection. Nonetheless, it would have been in the Soviets' long-term interest to have accepted that proposal.

But for the time being the superpower relationship was characterized by an effusion of goodwill. Brezhnev's American tour in 1973—ten-gallon hats and all—was even more successful, if less ebullient, than Khrushchev's. Countless delegations spanned the oceans negotiating scientific and cultural exchange agreements on trade and technology, and the like. From the standpoint of the Soviet Union it was a rewarding period. But the Soviets could not leave well enough alone. They proceeded to poison the goose that laid the golden eggs.

It should perhaps be emphasized that for the Soviets the fault lay not in deception but in subconscious impulse. On the American side there was illusion—an exaggeration of the underlying meaning of détente. For the Soviets, détente represented simply an updated variant of Leninist peaceful coexistence: an absence of direct military conflict between the major powers. It certainly did not mean an end to international conflict. Indeed, the Soviets repeatedly stated that "détente requires an intensification of the ideological struggle." If there was deception, it was self-deception on the American side. Given the mood of the times, too many Americans insisted on reading more into détente than the Soviets intended.

Most dramatically was this the case in the Third World. The Soviets had, of course, paid some lip service to abandoning the search for marginal advantage—as in the

"Basic Principles" of U.S.-Soviet relations. But such grand declarations, however satisfying, were not much of an inhibition when good opportunities presented themselves. In American eyes an early blow against détente occurred in 1973 with the Yom Kippur War. Soviet attempts to stimulate and to exploit that war were startling to many Americans. The culmination was the Brezhnev letter to Nixon threatening to move Soviet forces into the region and urging, in effect, a Soviet-American condominium over the Middle East. It resulted in the alert of America's military forces and, ultimately, a slow ebbing of the crisis. But the atmosphere of détente never thereafter fully recovered.

While the Americans might not have known what the intensification of the ideological conflict implied in 1972, within a few years they were more enlightened. The Soviets had been quite clear regarding their obligation to continue to support wars of national liberation. Whether or not the Arab-Israeli conflict could qualify under this rubric, adventures in Africa or Southeast Asia clearly did. The intervention of Cuban troops in Angola in 1975 was a further blow to détente—and an indirect blow even to arms control negotiations. But the Soviets had intended no armistice in Third World rivalries. If the Americans were disappointed, it was because they had expected more of the Soviets than the Soviets believed they had promised.

Kissinger grittily attempted to keep the arms control negotiations going. At Vladivostok, President Ford in 1974 achieved a potentially useful cap on strategic offensive arms through joint acceptance of equal aggregates of 2,400 missile launchers and heavy bombers. But its potential was never realized. Moreover, during the political campaign in 1976 President Ford felt obliged to drop the word "détente" from his vocabulary.

The evolution of NATO relations during the Nixon-Ford years needs to be recounted. As the American-Soviet rapproachement grew, the European reaction was rather ambivalent. Needless to say, Europeans were generally pleased with the reduced threat for war. Yet, particularly on the European right, there was widespread apprehension that an American-Soviet condominium was being established over the body of Europe. The American style in negotiations, which the Europeans found to be excessively secretive and short on consultation, added to the suspicion.

The upshot came in the somewhat ludicrous quarrels about the "Year of Europe" that Henry Kissinger announced at the beginning of 1973. The Europeans, with their somewhat heightened sensitivities, took this to be condescending. Some tied the notion to a Soviet-American condominium to settle Europe—without further consultation. Resentment was widespread, fanned for its own special reasons by the French government. Yet the suspicion was unwarranted. What Kissinger desired—and desired most fervently—was more firmly to institutionalize the Atlantic relationship before the generation of Americans who recalled the postwar period passed away.

However worthwhile the effort, it was abortive. Soviet-American rapproachement seriously weakened the bonds of the alliance. Europeans felt the need for American protection less keenly, and their suspicion that the superpowers were plotting things behind their backs was increased. Problems within the alliance were intensified after the fall of 1973 because of basic disagreements regarding the handling of the Arab-Israeli war and its aftermath.

A few words should be said about military matters within NATO, for military developments tended somewhat to alleviate the political tensions within the alliance. With the end of the war in Southeast Asia, I was determined, as incoming secretary of defense, to refocus America's military commitment upon the European security issues that had been so neglected during the war years. I devoted considerable effort to defeating the Mansfield Amendment. Its failure came as a pleasant surprise to the Europeans, who had anticipated a drawdown of American forces. Also, the doctrine governing the use of America's strategic forces was altered to emphasize selective strikes. This would permit avoidance of the targeting of cities, which would provide the Soviets with a powerful incentive to avoid striking Western cities. By making an American nuclear response more credible, these changes served to recouple America's strategic forces to the security of Western Europe.

New emphasis was also placed on the conventional deterrent. This was, of course, made possible by the rebuilding and the ultimate reinforcement of America's ground and tactical air forces in Europe. But it also required a change in doctrinal emphasis. I had benefited from the doctrinal misfortunes of my predecessor, Secretary McNamara. I consequently coined the term "NATO triad." Its underlying analytical concept was that the triad's three legs—conventional, strategic and tactical nuclear—were mutually reinforcing. Thus the strengthening of conventional capabilities would, for example, augment the deterrent effect of tactical nuclear forces. I stressed that conventional forces were not intended to be a substitute for nuclear deterrence, but to strengthen it. With these changes in emphasis, European doctrinal objections to the strengthening of conventional forces were significantly diminished. Outside of France, the obstacle to the building of the conventional deterrent became primarily budgetary rather than doctrinal.

VI

In retrospect, the election of 1976 constituted a watershed in American foreign policy. It brought to an end an extended period of pragmatism, and launched a new period of the moralism-legalism that has long marked the American style in foreign policy. In the first phase, liberal moralism surged to the fore; in the second phase, conservative moralism.

After a few years in office both the Carter and Reagan Administrations moderated their policies and rhetoric, but compared to their predecessors the degree of ideological zeal remained notable. Not only was there a renewed note of oscillating moralizing, but American foreign policy also was characterized by substantial swings and by inconsistencies—foreigners called it unpredictable. It was perhaps more disturbing to our allies and dependents than it was to our opponents. This poses a deeper-seated question that should be examined before we bring the story of postwar superpower relations down to the present time.

Winston Churchill had limned one Western view of the Soviet Union in his pithy description: "a riddle, wrapped in a mystery, inside an enigma." Despite the mists of secrecy that still surround Soviet policymaking, that view has now become somewhat obsolescent. The passage of almost half a century has provided sufficient experience to make Soviet policy almost predictable. There is persistency, perhaps even consistency—and remarkably few sharp turns.

Can the same be said of U.S. attitudes and U.S. policy? Hardly so. The American mood is subject to much wider swings and, to a lesser degree, so is American policy. More than the highly structured societies of Europe with their established governing classes, the American democracy is governed by public opinion with all its vicissitudes. Moreover, changes in the party in power (unthinkable in the Soviet Union) may bring sharp swings in policy. It was the Americans who went home in 1945, and then reversed policy later in the 1940s. It was the Americans who shifted from the idealism of world organization to military containment. It was the Americans who so eagerly and innocently embraced détente—as the end to the "misunderstandings" in Soviet-American tensions. The Soviet view of détente was far less inflated, merely a somewhat modernized version of Lenin's "peaceful coexistence." It was the Americans again who, a few years later, could grossly overstate the military power of the Soviet Union and the strength of its so-called geopolitical momentum.

Over the intervening years, President Truman could assert mistakenly: "I like old Joe, but he is a prisoner of the Politburo." President Carter could state that so secondary (and predictable) an action as the Soviet move into Afghanistan had fundamentally altered his view of the Soviets. President Reagan could talk feelingly of "the empire of evil" and then embrace arms control. The early days of the Carter Administration and of the Reagan Administration provide a spectacular contrast in both the style and the substance of foreign policy. Was this great power—the great protecting power of the West—one that could recognize its *permanent* interests?

By contrast the Soviets seem staid, almost stodgy: solid (if somewhat brutal) men who persistently follow an established formula. The Soviets pride themselves on being realists—indeed, scientific materialists. With the exception of Nikita Khrushchev (who was precipitately removed for his "adventurism" and "harebrained schemes"), Soviet leaders come over as rather stolid Leninists, guided primarily by their prudence and by their respect for the correlation of forces. They are rather different from the frequently mercurial and incurably romantic Americans. To go back to Churchill's aphorism: which of the superpowers is the enigma?

In another guise, the same issue was eloquently framed by Alexis de Tocqueville almost a century and a half ago:

"It is especially in the conduct of their foreign relations that democracies appear to me decidedly inferior to other governments. . . . A democracy can only with great difficulty regulate the details of an important undertaking, persevere in a fixed design, and work out its execution in spite of serious obstacles. It cannot combine its measures with secrecy or await their consequences with patience."

In the first 30 years of the postwar era, the American democracy quite demonstrably rose to de Tocqueville's challenge. In the last decade, doubt has arisen over whether the United States, given a proclivity to sudden shifts in policy, can permanently match the steadier pressures of Soviet policy, despite its far greater inherent strength. No longer are the international responsibilities of the United States confined

to the relatively easy domain of the North American continent. As one moves closer to the sources of Soviet power—along the periphery of the Soviet Union—the requirement for perceived and acknowledged steadiness in the exercise of power becomes more demanding.

Today American policy must be more than synchronized with the moods of the American public. Leaders of smaller and less powerful states close to the Soviet Union must, above all, see a predictability in the basic course of American policy. While somewhat less necessary, since occasional unpredictability has its uses, our principal opponent should also be able to discern an underlying predictability most of the time. Given the greater volatility of American opinion in recent years, is the American democracy up to the task?

The Watergate episode may merely have accelerated a tendency that was already visible in the 1960s. In presidential politics it brought to the fore outsiders with no experience in Washington or in foreign policy, who proceeded to campaign against federal institutions and against Washington as a symbol. It may have been good politics; it was poor governance. Nowhere has this been clearer than in foreign affairs.

Instead of "managing the Soviet relationship," we are now more inclined to sermonize the Soviets on various subjects on which they appear unpersuadable—human rights, Star Wars, even Leninism itself. Sermonizing the Russians is an activity that one earlier president, Dwight Eisenhower, explicitly declared to be unproductive. Moreover, sermonizing provides a most awkward posture from which to work out a modus vivendi.

Foreign policy has become far more personalized, less institutional. A president guided by his personal vision is assumed to be in tune with the feelings of the people—the most appropriate guide to foreign policy. The judgments of any "establishment" count for far less. Commitments of earlier chief executives are not necessarily binding. And if one chief executive can pay scant regard to the commitments of his predecessors, so may the Congress disregard the commitments of the incumbent.

No doubt this represents a foreign policy that in some sense is more democratic, less hegemonial. But it is not consistent with the way that great powers are expected to conduct foreign relations—with steadiness and predictability. The United States has become a more inward-looking, self-oriented nation. The new American style has led to consternation as much among our friends as our foes. But the more basic question is whether such a style can sustain the American position over the long run.

President Carter brought to the Oval Office immense energy, idealism, an open mind and moral conviction. Certain accomplishments of his Administration—the Camp David accord between Egypt and Israel almost in its entirety and the Panama Canal Treaty to a lesser degree—were products of Jimmy Carter's special brand of moral fervor. (Whether it was politically prudent to accept the risks to the prestige of the American presidency embodied in the quest for Camp David is a different question.) Carter was, of course, building on the Nixon legacy in the normalization of relations with China as well as in the Middle Eastern peace process, but he added his own special touch. With the exception of China, all involved lesser powers. All were issues that could yield to enthusiasm and moral fervor. In the world of power politics—notably our relations with the Soviet Union and our European allies—the results of the Carter Administration were far less auspicious.

Carter early launched his old effort to lead the Soviet Union into the paths of righteousness through his human rights campaign. That was not, as the Soviets may have thought, a cynical propagandistic attempt to place the Soviet Union on the defensive. Rather it reflected a profound moral conviction. With respect to arms control, Carter immediately abandoned the Vladivostok accord and called for deep reductions—which would most immediately affect the Soviet ICBM force. This too reflected a conviction that his predecessors had not really tried hard enough to obtain arms reductions, and that the Soviets would be prepared to respond to his call. Both developments were rather bewildering to the Soviets. The Soviets work best when their opposite numbers, like themselves, are steady and predictable. Within a year the human rights campaign had been somewhat toned down and the SALT negotiations had been put back in the traditional mold. But considerable damage had been done in tearing up the accepted patterns of international relations.

In his relations with Europe, Carter early committed a capital blunder from which he never wholly recovered: the decision not to produce neutron weapons. It was a wholly personal decision, taken against the advice of all his agencies and in the face of prior understandings with the allies that had been worked out by his own underlings. In part it reflected his moral aversion to a new category of nuclear weapons; in part it reflected his irritation with his allies for their unwillingness to take the heat with him on a deployment decision. This last in itself reflected a lack of familiarity with the historic style of decision-making within the alliance. To be sure, Helmut Schmidt both distorted and exploited the events for his own domestic purposes. Yet, throughout the balance of the Carter presidency, Europeans continually worried about the strength and the reliability of the United States.

A string of actions—the cancellation of the B-1 bomber, the squeeze on defense spending, the sudden reduction in ship construction funds, the aborted attempt to remove our ground forces from Korea, the contination of negative comments on the Central Intelligence Agency—all reinforced the conviction that the Carter Administration was soft on defense. A series of setbacks—starting in the Horn of Africa, Yemen and Afghanistan, culminating ultimately in the disaster that was the fall of the Shah, followed by the seizure of the embassy and the hostage crisis and the Soviet invasion of Afghanistan—created for the Carter Administration a percepton of weakness that could not be dispelled. This had two immediate effects.

It led first to a slowly gathering storm on the American right, which ultimately came to view the developing world scene in apocalyptic terms. The vulnerabilities of our strategic forces were greatly exaggerated (which was subsequently to affect attitudes on the SALT II issue). The overall weakness of American and Western military strength was repeatedly stressed. By contrast, Soviet military strength was substantially overstated. Moreover, a portrait was drawn of a worldwide Soviet geopolitical offensive, which was alleged to be gathering momentum steadily. Indeed the very events, like Afghanistan, that in 1980 were taken as shrewd Soviet political moves in the quest for world domination, just a few years later were treated as serious Soviet setbacks.

But the public mood had been established. By the time the SALT II Treaty actually reached the Senate in 1979, there was an uphill fight for ratification—which would have occurred even in the absence of the invasion of Afghanistan in December. Unavoidable provisions of the treaty, which had been built into the respective strategic postures of the two sides, were treated as a source of American weakness or even a sellout. By this time the Carter Administration had scant credit to draw on in terms of its posture on defense and Soviet policy. That the Reagan Administration would adhere to the provisions of this fatally flawed treaty for at least five years confirms that its deficiencies were exaggerated at the time. Yet, overall, the episode leaves one with a single clear conclusion: only a president who enjoys a reputation for being strong on defense can be successful in obtaining Senate ratification of an arms control agreement with the Soviet Union.

VII

The Reagan Administration, it has frequently been observed, has no *specific* foreign policy monuments to its name. It does have one generic accomplishment, a vital one: it has restored America's international prestige and the perception of American power. In foreign policy, that is immensely important—and can compensate for a significant number of blunders elsewhere. Elsewhere, the Administration has had some modest achievements in Central America and in chastening the likes of Qaddafi, a serious defeat in Lebanon, and some success in easing tensions initially brought on by the Administration itself.

Like the Carter Administration, the Reagan Administration has been highly personalized—almost anti-institutional. In its early years, much of its foreign policy was set by the President's instincts, rhetoric and ideological convictions, that included a proclivity to blurt out half-remembered truths from *Reader's Digest*. Thus, it was early revealed that the Soviet leaders had been authorized to "lie, cheat and steal" to further their policy goals. Also disclosed was something called "the Ten Commandments according to Nikolai Lenin." The President was inclined to believe that his predecessors had failed to convey to the Soviets how tough America was and thereby to force them to abandon their base designs—just as Jimmy Carter had felt his predecessors had failed vigorously to pursue arms control. Moreover, the Administration's initial predilection was to believe that America had regularly been defrauded in arms limitation negotiations, and that any negotiations would have to be postponed until such time as America's military posture was restored. The net effect was to throw our relations with the Soviet Union during the first three years of the Administration into a chill as deep as the late 1940s.

These attitudes led to a rapid growth of alarm in Europe—and the Administration's reputation sank almost to the level of the Carter Administration's. It was partially rescued by an excellent, if belated, speech by the President in November 1981 on intermediate-range nuclear force negotiations. But early and indiscreet comments about nuclear war—and the tensions surrounding the prospective deployment of the Pershing II missile (ironically promised by the Carter

Administration to reassure the Europeans that America was not vacillating)—created steady problems for the United States. The President's inclination to view the Soviet Union as the source of all evil in the world also led to a last-minute effort to preclude construction of the Soviet natural gas pipeline, including the imposition of extraterritorial sanctions. The President had been warned against such an effort by his professionals, but those warnings were disregarded. In a sense it was the equivalent of Carter's plowing ahead in his neutron bomb decision. Eventually the Administration was obliged to back off.

The President's inclination to view all difficulties in terms of the East-West conflict, with a touch of Armageddon thrown in, has led to some exaggerated rhetoric. In Lebanon it was stated that the entire American strategic position in the Middle East would crumble if Syria's Assad and his Soviet sponsors had their way. It was followed by a precipitate withdrawal of American forces, and an even more precipitate dropping of the subject. In Central America, the importance of Nicaragua has similarly been overstated. While the Sandinista regime is a geopolitical nuisance which we wish would either disappear or moderate its behavior, it can scarcely be described as a major threat to the republic. It remains an impoverished country, almost like an Albania situated in the Western hemisphere. On strategic and pragmatic grounds we may reasonably seek to neutralize it as as potential base. But it ought not to be inflated into a substantial threat to our existence. And the rhetorical treatment of our henchmen in the region as the moral equivalents of James Madison and George Washington does seem a bit excessive.

The story of U.S.-Soviet relations during the first three Reagan years has been told sufficiently frequently that it need not be repeated here. Suffice it to say that the result was a chill that stirred Soviet paranoia and frightened our allies. That the Administration paid so small a price reflected the good luck of three succession crises in the Kremlin.

By 1984, the Administration had altered its original stance. The worldwide Soviet geopolitical momentum had become a thing of the past. Indeed, the Soviet Union might actually be "an economic basket case." Despite basically unchanged force ratios, the Administration, which at first had exaggerated Soviet military power, was now downplaying it. The window of vulnerability was forgotten. Moreover, the tone of public comment from Washington was reversed. Thus, the Administration was in a position to exploit such Soviet blunders as the heavy hand in Europe and the walkouts from Geneva, to say nothing of such adventitious developments as the shootdown of the Korean airliner. The President had also become seized with the desirability of arms control. His apparent eagerness combined with Soviet clumsiness helped turn international opinion in U.S. favor.

Whether for sustantive or political motives, the single most important ingredient in U.S.-Soviet relations has now become the negotiations over strategic defense. The President's original speech in March 1983 touched a sensitive nerve in light of Soviet experiences with Open Skies and the U-2, and the ABM negotiations with the Nixon Administration. Touching a sensitive nerve is not without utility; it certainly got the Soviets' attention. The Star Wars proposal was, however, another of those uncalculated ventures in personal diplomacy. Without any preparation, indeed without any realization, it attacked the prior foundation of the basic arms relationship. Our allies suddenly learned that deterrence, on which security had rested, was to be replaced. Britain and France learned that their independent nuclear forces, into which they had poured a considerable portion of the national treasure, were to be rendered obsolete. We were all to learn rather suddenly that deterrence was "immoral" and "flawed." Such phrases seemed to have been borrowed from the Catholic bishops. While there may be considerable satisfaction in dishing the left by stealing its clothes, it hardly seems necessary to undermine the foundation on which Western security must rest for the foreseeable future.

An extraordinary measure of American capital is now being invested in generating support for Star Wars among our allies. All of this is being done in the name of a research program that its strongest proponents regard as far-out and a very high risk. In an R&D effort, the normal behavior is to allow the technical uncertainties to be resolved before one reaches conclusions about force structures or strategy. In this case, the results are being announced in advance: a revolutionary change in strategic doctrine and the strategic relationships between the superpowers.

Not only our allies were caught by surprise. Even the Department of Defense was unprepared. The President had been moved not by the advice of the technical experts within his Administration, but by some elderly outside advisers. Until the President's address, the Department of Defense had steadily been expressing skepticism (to put it mildly) regarding spaceborne defenses. The Department was then obliged to wheel about in order to support the commander in chief. Suddenly altering the presuppositions on which international relations are based—with scarcely any technical or policy advice and without any advance warning—is not the way for the leading Western nation to maintain a reputation for steadiness.

The superpowers have returned once again to Geneva. For the Soviet Union that provides unqualified benefits. In a negative sense, much of the unwanted baggage of recent years has been left behind: the shootdown of the KAL airliner, the walkouts from Geneva, the possible involvement in the attempt on the pope's life, the three succession crises with the concomitant weakness and blundering. In a positive sense, the Soviet Union is well situated to achieve either its substantive goals or its political and propaganda objectives. On substance, the Soviets would clearly like to impose constraints on American technology for strategic defense. If anything stirs Soviet paranoia it is American technology and its possible implications. Consequently, the Soviets will be prepared to pay a price to obtain such constraints—and to avoid reopening the strategic arms competition.

The President has said, however, that Star Wars technology will not be negotiated. In that event, the Soviets are even better situated to exploit the abiding differences between the United States and its allies—especially the continuing, if not growing, allied concern about any Star Wars deployment. The structure of the negotiations, with separate tables for intermediate-range nuclear forces and strategic defense, lends itself to such Soviet exploitation. The Soviets are already saying to the Europeans that substantial concessions can be obtained on the weapons that threaten Europe, but the Americans are blocking that outcome by their obstinacy over Star Wars.

At Geneva we shall be reading a sermon to the Soviets to which they are unprepared to listen. That sermon propounds the supposed mutual advantages of strategic defense that the Soviets specifically rejected. It is based upon a "strategic concept" that in fact is less a strategic concept than it is a rationalization for the President's vision. The concept in itself is fundamentally flawed. According to the concept, when strategic defenses are deployed a so-called second phase will ensue. But the prospect of deployment of strategic defense in that second phase precludes attainment of the first phase, the radical reduction of offensive arms. This is because the prospective deployment of strategic defenses increases the premium on missile throw-weight and on offensive forces generally—to overwhelm any prospective defense. The Americans are now prepared not only to read to the Soviets a sermon to which they will not listen, but one that is internally inconsistent.

In Geneva we must prepare for an extended period of siege warfare—with the Soviets well positioned to exploit differences between our allies and ourselves. The United States has suddenly—and without thinking the consequences through in advance—altered the foundations on which East-West relations have rested. That raises anew the question posed by de Tocqueville in the 1840s—whether a democracy can adequately persevere in a fixed design or await the consequences of its measures with patience.

What then of superpower relations in the future? No one can rely on the early disappearance of the ideological tensions and the arms competition that have characterized the last 40 years. If liberty is to survive outside the western hemisphere, outside North America, the special role of the United States cannot be significantly altered. Will the United States be able to sustain its unique responsibilities during the decades ahead? The portents are somewhat worrisome. What is required of a great power is stability of policy combined with steadiness in execution.

In the late 1960s and early 1970s, the national mood was one of self-criticism bordering on masochism. In the 1980s the national mood has become one of self-congratulation to the point of narcissism. If one is forced to choose, perhaps the latter is preferable. But no more than masochism can narcissism be a proper foundation for the steadiness and stability demanded of the leader of the West.

THE BALANCED BUDGET AND EMERGENCY DEFICIT CONTROL ACT

Mr. COHEN. Mr. President, the Senate now finds itself in the midst of the periodic ritual of raising the permanent public debt limit. It is largely a redundant exercise, since the additional money that we will grant the Federal Government the authority to borrow is already as good as spent. The quasi-annual increase in the debt limit has become so routine that few take it seriously—except perhaps as an opportunity for righteous posturing or

as a juggernaut vehicle for otherwise hopeless amendments.

The Senate will soon raise the Federal Government's debt ceiling to over $2 trillion. The Senate must vote to raise the debt ceiling because the preceding votes of Congress have made the necessity inevitable. It is my hope, however, that we will note the grave significance of this impending necessity and take the opportunity to initiate action to halt the horrendous growth of the Federal debt. Indeed, we must do so. The amendment that my colleagues and I have offered, the Balanced Budget and Emergency Deficit Control Act, provides such an opportunity.

Thomas Jefferson considered the accumulation of debt by one generation to be a form of "taxation without representation" on the young and unborn. In his words:

> The principle of spending money to be paid by posterity under the name of funding, is but swindling futurity on a large scale . . . . We shall all consider ourselves unauthorized to saddle posterity with our debts, and morally bound to pay them ourselves . . . .

The current policy of funding Government through massive Federal borrowing is indeed "swindling futurity on a large scale." Like a deferred tax, the addition to the national debt, year after year, of huge Federal budget deficits imposes the greatest costs on future taxpayers—our children. The mountainous debt we are amassing will compel our children to bear a great burden in debt service and will inflict insidious harm upon the economy that they will inherit. It is a most selfish and shortsighted legacy. It is fiscal child abuse.

To a degree, we all have shared in the perpetuation of the practices which brought us to our current fiscal straits. We are all a part of a system and a process possessed of tremendous inertia. We can ill afford, however, to continue merely to ride the misguided momentum of the Federal budget process. Nor can we afford to waste our time and energies in debating whom is to blame. Rather, we must devote our full attention and efforts to reasserting congressional control over the Federal budget and reestablishing fiscal equilibrium. We must all share in seeking a solution.

The record of the recent proceedings of this body is replete with denunciations of our Federal Government's dangerous fiscal imbalance and the seeming inability of the U.S. Congress to do anything about it. The oracles of conventional wisdom and public opinion polls would have us believe that although the American people fear Federal budget deficits, they will abide neither reductions in Government services nor tax increases. Is it really beyond the wherewithal of Congress to address the problem of the Federal Government's precarious fiscal imbalance? No, it cannot be so. It is only political nearsightedness which makes it seem that Congress is somehow prevented, by those whom it represents, from serving the best interests of the represented.

I, for one, refuse to believe that the Congress is incapable of fulfilling one of its most basic obligations, the preservation of the Nation's well-being through the maintenance of sound fiscal policy. Certainly, Congress weilds the authority and the means to address the problem. It lacks, however, the resolve to employ them.

The pending amendment would enforce upon the Congress the resolve necessary to bring the Federal budget back into balance. The Balanced Budget and Emergency Deficit Control Act would amend the budget process to establish binding ceilings for the limitation of Federal budget deficits in each of fiscal years 1986 through 1991. Under the act, the Federal budget deficit for fiscal year 1986 could not exceed $180 billion—approximately the deficit assumed in the budget resolution for fiscal year 1986. In successive years, the act would decrease the deficit ceiling to zero in five equal steps. The measure would require that the Federal budget be balanced in fiscal year 1991.

More importantly, the Balanced Budget and Emergency Deficit Control Act sets forth the means by which Federal budget deficits would be held to within the prescribed limits. Under this legislation, for each of fiscal years 1986 through 1991, the President would be required to propose, and the Congress to adopt, a budget resolution which provides for a deficit no greater than the limit established by the act. In the event that projections show that the actual Federal budget deficit will exceed the maximum deficit limit for that fiscal year as established under the act, this legislation would require the President to withhold Federal expenditures as necessary to constrain the budget deficit to within the established limit. Half of the necessary reductions would be achieved through eliminating part or all of automatic spending increases in entitlements and half through withholding discretionary budget authority by a uniform percentage across the board. The President could also then propose to Congress an alternative plan for eliminating the deficit overage. The Budget Committees of the House and Senate could subsequently, either in response to the President or at their own initiative, report legislation as an alternative to across-the-board curtailment of expenditures, but which would also accomplish the same end.

Provisions of the act are waived in any fiscal year in which a declaration of war is in effect. Further, the President may delay the curtailment of Federal spending for 30 days if the country is in or entering a recession. In such an event, the President could propose to Congress alternatives to across-the-board spending curtailment, including suspension of the provisions of the act. However, any change in this emergency legislation must be adopted by both Houses of Congress and signed by the President.

The Balanced Budget and Emergency Deficit Control Act would revise the congressional budget process. It does not contain a prescription as to which programs should bear the brunt of spending cuts or which taxes should be raised. A proposal to change the budget process should not address such issues. These are matters to be determined through the process not in establishing the process.

The ink was scarcely dry on this amendment, however, before Senators began to feel pressure—or the irresistable urge—to exempt certain Federal programs from the automatic spending restraint provisions of the proposed amendment. But this is exactly the sort of business-as-usual politics has brought us huge Federal budget deficits year after year, and which has stymied every effort to address the problem. One thing leads to another as everyone succeeds in protecting favored programs until the public interest is buried by special interests. If the Congress is ever to break the budget deficit habit, business as usual must yield to getting down to business.

First things first. There will be ample time and opportunity to determine the nature of any necessary spending reductions or tax increases during each budget cycle. First, however, let us put in place a budget process which will enable the Congress to fulfill its constitutional responsibility—its responsibility to make spending and revenue decisions whereby the Federal Government can remain within its means.

The pending amendment would put in place an extraordinary and effective mechanism for enforcing fiscal restraint upon the Congress. The limits it sets forth are real. Its requirements would not be easily circumvented. The amendment compels the Congress to move toward fiscal balance, but provides for deficit reduction even if the Congress does not act. It would hold our feet to the fire by holding over us the prospect of automatic deficit reductions if we are unable to otherwise provide for their reduction. Some in this body are no doubt discomforted by the prospect of the processes that this legislation would—under certain circumstances—set in motion. We should be reminded and reassured, however, that if the Congress merely does what it should in any case, those processes will never be invoked.

The act does not specify which policy options the Congress should emply to close the gap between Federal spending and revenues, but it would commit the Congress to closing that gap. It neither guarantees nor precludes tax inceases. It does not favor any part of the Federal budget. It would, however, guarantee an end to the paralysis that has afflected the Congress in its attempts to move the Government toward fiscal balance.

This legislation is an emergency measure addressed to the fiscal crisis that this Nation has brought upon itself. This Nation is facing what can rightly be termed an emergency which demands commensurate action on the part of the U.S. Congress. The proposed legislation may seem to some to be harsh medicine. Unfortunately, the circumstances in which we currently find ourselves demand nothing less.

CONDOLENCES TO FAMILY OF ARKADY KATAKOV

Mr. CHAFEE. Mr. President, I want to offer my condolences to the family of the Soviet diplomat, Arkady Katakov, upon his tragic death at the hands of terrorists in Lebanon. Once again, a diplomat has been struck down in the line of duty. Once again, a senseless act has taken the life of a human being.

The Middle East continues to be a tinder box of competing emotions. Innocent people are plucked off the street and held captive, or worse as in this case, by this sect or that, for some unfathomable reason. One of our own citizens, U.S. Embassy official William Buckley, is rumored to have been murdered by his captors in retaliation for the Israeli raid on the Palestine Liberation Organization. We all pray that this is not so.

In the final analysis, however, laying aside all the reasons and rationale given by these barbarians, another life has been snuffed out senselessly. In this case a Soviet, but it could have been an Englishman or a Belgian—it makes no difference. Any act of terrorisim, regardless of the nationality of the victim, is a crime against all humanity.

Mr. President, I only hope that soon we can bring to justice the people that carry out these horrible crimes.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. Mr. President, I am advised that there is still a caucus going on with about half of the Senators, and we know that other Senators on our side are meeting on this amendment.

It would seem to me that the best course of business might be to recess until about 12:30 p.m.

I would state that it is my hope that at 12:30 p.m. we can quickly move to the Miller nomination, James Miller, to be Director of the Office of Management and Budget.

I assume there will be a rollcall vote on that.

I hope we can work out some agreement where we would set aside the pending amendment, bring up the Byrd-Chiles amendment, have a vote on that amendment, and then go back to the pending amendment, and then there may be, I hope, not any additional amendments but, if there are, dispose of those additional amendments and still finish all that some time early afternoon.

There may be plans afoot to undermine those great ideas. But in any event, our present intention is to complete action today. There will be votes of one kind or another.

RECESS UNTIL 12:30 P.M.

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate stand in recess until 12:30 p.m. today.

There being no objection, the Senate, at 11:37 a.m., recessed until 12:30 p.m., whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. GORTON].

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is declared closed.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

ORDER OF PROCEDURE

Mr. DOLE. Mr. President, I hope we can move to the nomination of James C. Miller III, to be Director of OMB. A rollcall vote will occur on his confirmation.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. President, while we are waiting to hear from the distinguished minority leader, I ask unanimous consent that there be extension of morning business until 12:45 p.m. with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ASPARTAME

Mr. DIXON. Mr. President, for some time there has been some debate regarding aspartame, a sweetener sold by the NutraSweet division of the Illinois-based G.D. Searle & Co. That debate has addressed both the FDA approval of the product, and questions about its safety. In addition to the discussion of this issue in the media and on Capitol Hill, the debate was also brought into Federal court by aspartame's critics.

Now the verdict is in. On September 24, a three-judge panel of the U.S. Court of Appeals held unanimously that the FDA had acted properly in approving aspartame, and that aspartame's critics had not presented any new scientific evidence questioning FDA's decision.

The unanimous opinion was written by Judge Abner Mikva whom I have known for more than two decades since we served together in the Illinois State Legislature. Judge Mikva is a man of deep intelligence and great thoroughness. Moreover, his service in the State legislature and in the Congress was marked by his intense devotion to consumer issues, and an unyielding concern for public health and safety.

The judge's opinion raises and answers the various questions that have been posed by aspartame's critics. He writes with clarity and finality about this issue. To help put the issue to rest, I ask unanimous consent to include the court of appeals decisions in the RECORD.

There being no objection, the decision was ordered to be printed in the RECORD, as follows:

(Notice: This opinion is subject to formal revision before publication in the Federal Reporter or U.S.App.D.C. Reports. Users are requested to notify the Clerk of any formal errors in order that corrections may be made before the bound volumes go to press.)

[U.S. Court of Appeals for the District of Columbia Circuit, No. 84-1153]

COMMUNITY NUTRITION INSTITUTE, et al., PETITIONERS, *v.* DR. MARK NOVITCH, ACTING COMMISSIONER, FOOD AND DRUG ADMINISTRATION, RESPONDENT, G.D. SEARLE & CO., INTERVENOR

[Petition for Review of an Order of the Food and Drug Administration, No. 84-5253]

COMMUNITY NUTRITION INSTITUTE, et al., APPELLANTS, *v.* DR. MARK NOVITCH, ACTING COMMISSIONER, FOOD AND DRUG ADMINISTRATION, APPELLEE

(Bills of costs must be filed within 14 days after entry of judgment. The court looks with disfavor upon motions to file bills of costs out of time.)

Appeal from the United States District Court for the District of Columbia

(D.C. Civil Action No. 83-03846)

Argued January 25, 1985.
Decided September 24, 1985.

James S. Turner for petitioners/appellants.

David A. Levitt, Attorney, Department of Justice, with whom *J. Patrick Glynn*, Director, Office of Consumer Litigation, Department of Justice, and *Thomas Scarlett*, Chief Counsel, Food and Drug Administration, were on the brief, for respondent/appellee.

James R. Phelps and *Robert A. Dormer* were on the brief for intervenor G.D. Searle & Co.

Before: MIKVA, EDWARDS and STARR, *Circuit Judges.*

Opinion for the Court filed by *Circuit Judge* MIKVA.

MIKVA, *Circuit Judge*: These consolidated cases arose out of the Food and Drug Administration's ("FDA" or the "agency") approval, without a public hearing, of the food additive aspartame for use in liquids. Aspartame is an artificial sweetener more commonly known as Nutra-Sweet, when used as a food additive, or as Equal, when used as a tabletop sweetener.

The underlying issue here is the FDA's action in approving the use of aspartame in liquids. Case No. 84-5253 is an appeal from the District Court's dismissal of a claim seeking to compel the FDA to conduct a hearing on aspartame, as well as a request to stay the approval pending the hearing, for lack of jurisdiction. In case No. 84-1153, we review the FDA's regulation approving the use of aspartame in liquids. For the reasons discussed below, we affirm the decisions of both the District Court and the FDA.

I. BACKGROUND

Aspartame, a combination of two amino acids, phenylalanine and asparitic acid, was discovered and formulated by G.D. Searle & Co. ("Searle"), intervenor in this case, in the early 1970's. Because aspartame is approximately 180 times as sweet as sugar, it is an effective sugar substitute for those who wish to reduce their caloric intake or who must limit their consumption of sugar. Since the FDA issued its approval, aspartame is used in nearly all major brands of diet soft drinks, either in a blend with saccharin or as the sole sweetener ("wet use"). Aspartame is also used as a sweetener in a variety of non-carbonated beverage mixes and foods ("dry use"). We note that the dry use of aspartame, previously approved by the FDA, *see* 39 Fed. Reg. 27317 (July 26, 1974), is not on appeal here. While the proceedings surrounding the approval for dry use are helpful to our analysis of the instant appeal, we review here only the actions of the FDA and the District Court concerning the wet use of aspartame.

A. *Approval of Dry Use*

In March 1973, Searle filed a petition with the FDA for the approval of aspartame for use in certain dry foods such as powdered beverages, desserts and dessert toppings, and chewing gum as well as for use as a tabletop sweetener ("dry use"). 38 Fed. Reg. 5921 (Mar. 5, 1973). In July 1974, aspartame was approved for the requested dry uses, provided that two warning notices appear on products containing aspartame. 39 Fed. Reg. 27317 (July 26, 1974). The first warning is: "Phenylketonurics: Contains Phenylanine 6." 21 C.F.R. § 172.804(e)(2). This warning is necessary because a high plasma level of phenylalanine is associated with mental retardation in a small number of individuals with a genetic disorder that results in a lessened ability to metabolize phenylalanine. The second required statement cautions that aspartame for table use is not to be used in cooling or baking 21 C.F.R. § 172.804(e)(3).

Two parties lodged objections to aspartame's dry use with the FDA. Dr. John Olney ("Olney") contended that the aspartic acid moiety of aspartame could cause brain lesions and neuroendocrine disorders in animals; therefore, according to Olney, aspartame posed a risk to human infants and children. 46 Fed. Reg. at 38285. James F. Turner, Esq. ("Turner"), who is counsel for petitioners in the instant cases, contended that phenylalanine moiety might lead to mental retardation. *Id.* Neither Olney nor Turner (collectively, the "objectors") are parties to the instant proceeding. The FDA granted the objectors' request for a hearing. Subsequently, the objectors and the FDA agreed to substitute a three member Public Board of Inquiry (the "Board") for the traditional hearing conducted by an Administrative Law Judge, as permitted by FDA regulations. *See* 21 C.F.R. Part 13. The Board was chosen by the FDA from a list of nominees submitted by the objectors. 46 Fed. Reg. 38286.

Before the hearing was convened the FDA received reports that raised serious questions about the safety of aspartame and the methods by which it had been tested. In 1974, Searle submitted to the FDA a report of a study in which rats fed a principal degradation product of aspartame, called diketopiperazine ("DKP"), developed uterine polyps. Four teams of pathologists, including an FDA team, investigated the results to determine if the polyps revealed a safety hazard in connection with the consumption of aspartame. In addition, an FDA inspector filed reports that were critical of Searle lab practices, raising doubts as to the authenticity of Searle's reported data. An investigative task force appointed by the FDA found extensive problems with the quality and reliability of Searle's research practices and test results relating to aspartame as well as to seven other products. The task force reported that the Searle research practices were so severely flawed that the test results were unreliable. As a result, in December 1975, the FDA stayed its approval of aspartame for dry use, *see* 40 Fed. Reg. 56907 (Dec. 5, 1975), and delayed convening the Board until Searle's aspartame safety studies could be audited.

Following the stay, fifteen of the Searle studies were selected for an audit as to authenticity, *i.e.*, that the tests and their results were neither faked nor misrepresented. The audit did not address the planning or execution of the studies or the correctness and meaning of the conclusions to be drawn from the studies. Twelve studies were audited by Universities Associated for Research and Education in Pathology (UAREP), a non-profit consortium of university pathologists. 46 Fed. Reg. at 38286. UAREP's inquiry was limited to "the question of whether the experiments were carried out according to protocol plans and the accuracy and reliability with which the experiments were performed and reported to FDA." *Id.* at 38302. The FDA reviewed the remaining three studies and found them to be authentic. In addition, the FDA examined UAREP's report and found that the test results described were authentic.

The Board was convened in January 1980. During three days of public hearings, the Board considered the following questions:

1. [W]hether the ingestion of aspartame, either alone or together with glutamate, poses a risk of contributing to mental retardation, brain damage, or undesirable effects on neuroendocrine regulatory systems[.]

2. [W]hether the ingestion of aspartame may induce brain neoplasms (tumors) in the rat[.]

3. Based on answers to the above questions, (a) Should aspartame be allowed for use in foods, or, instead should approval of aspartame be withdrawn?

(b) If aspartame is allowed for use in foods, *i.e.*, if its approval is not withdrawn, what conditions of use and labeling and label statements should be required, if any?

44 Fed. Reg. at 31717. At the close of the hearings, the Board recommended that approval of aspartame be withdrawn until further study to establish whether or not a relationship existed between the ingestion of aspartame and brain tumors. As a result of this recommendation, the Board did not respond to the labeling question. The Board did agree with the FDA's determination that aspartame posed no risk of causing brain damage or endocrine dysfunction in people who use it. 46 Fed. Reg. 38288-89.

All parties to the Board's proceedings filed exceptions to its decision pursuant to 21 C.F.R. § 12.125. On July 24, 1981, the FDA issued a final decision, concurring with the Board's finding that aspartame would cause no brain damage or endocrine dysfunction, but overruling the Board's conclusion regarding brain tumors. Consequently, the FDA's decision reinstated approval of aspartame for dry use. 46 Fed. Reg. 38285. None of the parties to the proceeding appealed the FDA's decision to the Court of Appeals.

B. *Approval for Wet Use*

In October 1982, Searle filed a petition to amend the aspartame food additive regulation to include the wet use of aspartame. 47 Fed. Reg. 46140. The petition referenced, *inter alia*, the scientific data contained in the petition for approval of dry use. 48 Fed. Reg. at 31378. In July 1984, the FDA issued a final rule permitting aspartame to be used in carbonated beverages and carbonated beverage syrup bases. *Id.* at 31376 (July 8, 1983) (amending 21 C.F.R. § 172.804 by adding § 172.804(c)(6)).

On August 8, 1983, the Community Nutrition Institute ("CNI"), Woodrow C. Monte, Ph.D. ("Monte") and Turner filed objections to the rule, and requested both a stay and a public hearing. The FDA denied the request for the stay. 48 Fed. Reg. 52899 (Nov. 16, 1983). On December 9, 1983, the Arizona Dietetic Association ("Arizona") and the Central Arizona District Dietetic Association ("Central") filed a Joinder of Petition, indicating they too objected to the rule. (We refer, hereafter, to these five individuals or organizations as "Appellants.") Also on December 9, Monte filed a supplement to his objections. On February 17, 1984, the FDA denied their objections and requests for a hearing on the ground that the objections failed to raise any genuine or substantial issue of fact. 49 Fed. Reg. 6672 (Fed. 17, 1984). On April 17, 1984, four of the objectors filed a petition for review of the FDA's denial of the hearing and interim stay. We review the actions of the FDA in Section III below.

C. *District Court Proceedings*

On December 23, 1983, while the request for a hearing was still pending before the FDA, the appellants also filed suit in District Court seeking an order requiring the FDA to hold a hearing and to stay the regulation until the hearing was completed. Thereafter, on January 24, 1984, the appellants filed a motion to stay the effective

date of the approval of aspartame for both wet and dry use. The basis for the motion was a series of consumer complaints regarding adverse health effects caused by aspartame as well as new evidence from medical researchers calling into question the safety of aspartame. After a hearing, the District Court denied the motion, finding that appellants' evidence was "anecdotal, unsubstantiated by direct scientific evidence and contains much that is hearsay." *Order*, Jan. 27, 1984.

On February 15, 1984, the appellants again filed a motion for a temporary restraining order supported by additional consumer complaints, affidavits describing issues that had been raised and considered by the Board in the dry use proceeding, and three letters from medical researchers commenting on various aspects of aspartame. In response to this second motion for a stay, the FDA filed a motion to dismiss, asserting that the district court lacked jurisdiction since judicial review of agency action or inaction was appropriate only in the Court of Appeals. The FDA also filed an Opposition accompanied by supporting affidavits, explaining that the FDA had reviewed the data provided by the appellants, but had found no pattern of complaints that would indicate that aspartame was unsafe.

Two days later, on February 17, 1984, the FDA denied the objectors' request for a hearing. Thereafter, on March 22, 1984, the District Court denied the second motion for a temporary restraining order and granted FDA's motion to dismiss the complaint on the ground that jurisdiction was lacking. The District Court concluded that since the "FDA [had] entered a final ruling on plaintiffs' request for an oral hearing and denied the hearings sought by the plaintiffs," only the Court of Appeals had jurisdiction. *See* Memorandum Order of Dismissal at 2.

II. THE DISTRICT COURT CASE: JURISDICTION

At issue in Case No. 84-5253 is whether the District Court erred in determining that it lacked jurisdiction once the FDA rejected Appellants' request for a hearing. In spite of the Food, Drug & Cosmetic Act's commitment to exclusive review in the Court of Appeals of final agency orders, appellants contend that policy dictates permit the District Court to retain jurisdiction over case even where the predicate for jurisdiction, here the lack of a final order, has evaporated. The policies underlying Appellants' argument are that first, a contrary holding would permit an agency to delay review by simply withholding final action until just before a district court holds a hearing; under this scenario, the FDA could lengthen the time for review of its action by the amount of time it takes to file in the District Court and obtain a hearing. Second, appellant argues that where there is no record to review, it is appropriate for a district court to have review in the first instance in order to develop the record.

We agree that the District Court did not have jurisdiction to review what had become a final order; by statute, such jurisdiction lies exclusively in the Court of Appeals. However, we find that the District Court erred in asserting jurisdiction over the case even before the FDA issued a final order; the FDA's ruling had no effect on the District Court's jurisdiction. Under the law of this circuit, the District Court *never* had jurisdiction over the agency's delay in ruling on the request for a hearing, neither before nor after the FDA denied the hearing request.

The question of where jurisdiction lies over interlocutory appeals from agency action (or inaction) has occasioned some anomalous results in the past. *Compare, e.g., Association of Nat'l Advertisers v. FTC*, 627 F.2d 1151, 1157 (D.C. Cir. 1979), *cert. denied*, 447 U.S. 921 (1980) (District Court had general federal question jurisdiction under 28 U.S.C. § 1331 over nonfrivolous constitutional claims of agency bias and prejudgment); *Public Citizen Health Research Group v. Commissioner, Food & Drug Administration* 740 F.2d 21, 34-35 (D.C. Cir. 1984) (original jurisdiction of District Court not questioned, Court of Appeals remands to District Court for further evidence) *with Potomac Electric Power Co. v. ICC*, 702, F.2d 1026, 1032-33 (D.C. Cir. 1983) (initially brought in Court of Appeals, jurisdiction upheld); *MCI Telecommunications Corp. v. FCC*, 627 F.2d 322 (D.C. Cir. 1980) (same). These inconsistent results signaled the need for close examination of the question of jurisdiction over interlocutory appeals. *See Telecommunications Research and Action Center v. FCC ("TRAC")*, 750 F.2d 70 (D.C. Cir. 1984).

In *TRAC*, this court fully resolved the issue, holding that

"Because the statutory obligation of a Court of Appeals to review on the merits may [pursuant to the All Writs Act] be defeated by an agency that fails to resolve disputes, a Circuit Court may resolve claims of unreasonable delay in order to protect its future jurisdiction."

750 F.2d at 76 (citations omitted). The jurisdiction to review agency inaction lies exclusively, in this court. *Id.* at 77. We affirm the District Court's dismissal of the request for the hearing because that case could be heard only in this court.

Although jurisdiction over claims of nonfinal agency action or of agency inaction lies in this court, we exercise this jurisdiction reluctantly. Mandamus is an extraordinary remedy; we require similarly extraordinary circumstances to be present before we will interfere with an ongoing agency process. In assessing claims of agency delay, we are guided by a "rule of reason." 750 F.2d at 80. While there is no absolute definition of what is a reasonale time, we know that it may encompass "months, occasionally a year or two, but not several years or a decade." *See MCI Communications Corp. v. FCC*, 627 F.2d 322, 340 (D.C. Cir. 1980). In the past, unreasonable delays have been found where the agency had not acted in six years, *see Abbott Loboratories v. Harris*, 481 F. Supp. 74, 76-77 (N.D. Ill. 1979), and after eight years, *see Potomac Electric Power Co. v. ICC*, 702 F.2d at 1033-35.

The delay complained of in the instant case was five months. Our precedents suggest that this is not an unreasonable delay. In addition, we note that the FDA's procedures, designed to be thorough and well-reasoned, do not permit quick decisions. A request for a hearing required the agency to examine the record closely, because hearings are appropriate only where material objections to the FDA's actions exist. *See Pineapple Growers Ass'n v. FDA*, 673 F2.d 1083, 1085 (9th Cir. 1982); *Pactra Industries v. Consumer Product Safety Comm'n*, 555 F. 2d 677, 684 (9th Cir. 1977); *Dyestuff Chemicals, Inc. v. Flemming*, 271 F.2d 281, 286, (8th Cir. 1959), *cert. denied*, 362 U.S. 911 (1960). Requests for hearings must be accompanied by objections "specifying with particularity the provisions of the order deemed objectionable, stating reasonable grounds therefor." 21 U.S.C. §348(f) (1982). The FDA has promulgated regulations that require the FDA to take a hard look at the objections. *See* 21 C.F.R. §12.24(b) (1)-(3). While the FDA's denial of the hearing obviates our need to assess whether the instant case meets the mandamus standard, we could not say that a period of five months to accomplish the statutory mandate approached an "excessive" period.

In addition to a ruling on the request for a hearing, Appellants also sought a stay of the effective date of the rules approving both wet and dry use of aspartame until the hearing was held. Appellants argue that the District Court's jurisdiction over the stay continues even after the FDA issued its denial of the request for a hearing. As with the request for a hearing, we find that the District Court never had jurisdiction over the request for a stay. Stays of administrative action are properly sought in this court under a writ of mandamus. *See In re GTE Service Corp.*, 762 F2d 1024, 1026 (D.C. Cir. 1985). The exclusive grant of jurisdiction to the Court of Appeals means that mandamus to obtain a stay also is available only in this court. *See TRAC*, 750 F.2d at 78-79. Accordingly, we affirm the judgment of the District Court dismissing the request for a stay for want of jurisdiction.

III. THE FDA CASE

At issue in Case No. 84-1153 is whether the FDA acted within its discretion under the Food, Drug, and Cosmetic Act in denying Appellants a hearing on the possible dangers of aspartame in carbonated soft drinks and other "wet" uses. Under 21 U.S.C. § 348(g)(1), any person adversely affected by the FDA's denial of a hearing request may, within sixty days, petition for review of the denial in the Court of Appeals. The Commissioner denied Appellants' request for a hearing on February 22, 1984, 49 Fed. Reg. 6672, and they filed a petition for review of the FDA's denial of a hearing in this court on April 17, 1984. Because Appellants have filed a timely petition for review, their appeal is properly before us. Appellants contend that Food, Drug & Cosmetic Act mandates a hearing when any interested party objects to the FDA's approval of a food additive as safe for a particular use. Appellants also argue that, even if an interested party is only entitled to a hearing upon a showing that a material issue of fact exists, they have met that burden.

We find that the FDA did not exceed its lawful discretion in denying a hearing to Appellants after the agency reviewed the record. The appellants raised no material objections to the safety of aspartame that would require the FDA to grant a hearing. Our review of the agency's action is limited to an evaluation of whether it has given adequate consideration to all rlevant evidence on the record. We conclude that the FDA properly denied a hearing after finding that petitioners have raised no material issue regarding the safety of the wet use of aspartame.

At the outset it is essential to distinguish the proper subject matter of our review of the agency's action from the scope or intensity of our review. Our delineation of the proper subject matter is determined by the procedural history of the FDA's aspartame approval proceedings. Appellants raise a number of objections to the safety of the artificial sweetener. However, some of these objections overlap with or are identical to challenges to the safety of aspartame that the FDA has already considered and rejected when it approved aspartame for dry use.

These issues may not be reopened. Since the only issue here is whether the FDA properly denied a hearing on the liquid uses of aspartame, only that evidence which bears on the dangers arising specifically from wet use is relevant to the FDA's determination that no material issues of fact existed. The agency's conclusions concerning the safety of the dry use of aspartame, except to the extent that new evidence suggests that the FDA may not rely on these prior findings in its deliberations on wet use, may not be raised again in this proceeding in the interests of administrative finality and judicial economy. *See Costle v. Pacific Legal Foundation*, 445 U.S. 198, 213, 217 (1980) (EPA permitted to condition an adjudicatory hearing, after its decision to extend a permit, on "identification of a disputed issue of fact by an interested party"); *Cooper Laboratories, Inc. v. Commissioner, Federal Food and Drug Administration*, 501 F.2d 772 (D.C. Cir. 1974). Thus we separate out those issues and that evidence which bear on the safety of wet use from the questions and data that were necessarily decided when the agency approved aspartame for dry use. The appellants may not now bring these dry issues before the FDA as reasons to require a hearing.

Having limited the issues which the FDA was required to consider before denying a hearing to Appellants, we next turn to the standard of review to apply in determining whether the FDA's denial of a hearing on that evidence constituted an abuse of agency discretion. Our scope of review, the exactitude of the fit that we require between the agency's conclusions and the germane facts it investigated, is necessarily deferential. The judiciary is ill-equipped to conduct investigations and analyze facts of the type involved in this case. Because of the agency's expertise and broad discretion in ensuring the safety of food additives, we cannot substitute our judgment for the agency's. The Commission's finding that there were no material issues of fact can be overturned only if an examination of the record discloses that material issues of fact are apparent to any reasonable examiner. *Smith-Kline Corp. v. Food and Drug Administration*, 587 F.2d 1107, 1119 (D.C. Cir. 1978) (record must disclose genuine issue of fact to be resolved in order for court to order hearings); *Greater Boston Television Corp. v. FCC*, 444 F.2d 841, 851 (D.C. Cir. 1970), *cert. denied*, 403 U.S. 923 (1971) (judicial review of agency's denial of hearing request need only "assure that the agency has given learned consideration to all the material facts and issues"). Mere differences in the weight or credence given to particular scientific studies, or in the numerical estimates of the average daily intake levels of aspartame, are insufficient. The court will not substitute its judgment on highly technical and factual matters for that of the agency charged with the supervision of the industry. *See Udall v. Tallman*, 380 U.S. 1 (1965).

A. *The Statutory Provision for a Hearing*

Under such limited scope of review and a delineation of the issues upon which the review must be focused, we conclude that Appellants have failed to demonstrate that the FDA abused its discretion by denying a hearing. The FDA's decision to approve a food additive is governed by Section 409 of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. § 348. Under this statute, a new food additive is to be approved if a "fair evaluation" of the data indicated the safety of the ingredient *Id.* at § 384(c)(3). FDA has interpreted "safety" to mean "that there is a reasonable certainty in the minds of competent scientists that the substance is not harmful under the intended conditions of use." 21 C.F.R. § 170.3(i). Appellants argue that the Act mandates a nondiscretionary grant of a hearing by the FDA upon the objection of an interested party. That is not what the statute says. A hearing is only available if petitioners raise a material issue in their objections. The statute provides that any person adversely affected by the approval or rejection of a food additive petition may within thirty days of the order file objections and request a hearing. 21 U.S.C. § 348(f)(1). However, the statute requires that the objections specify with particularity the provisions of the order deemed objectionable and state reasonable grounds for the objections. The Secretary shall hold such hearing *for the purpose of receiving evidence relevant and material to the issues raised by such objections.* If the agency determines that no hearing is necessary, the regulation approving the food additive becomes final.

It is well established that the statutory grant of a public hearing is not absolute. A request for a hearing must contain evidence that raises a material issue of fact on which a meaningful hearing might be held. *Pineapple Growers Ass'n v. FDA*, 673 F.2d 1083, 1085 (9th Cir. 1982). In addition, the issue of fact raised by the objecting party must go to the legality of the agency's order. *Id.* at 1085, quoting *Dyestuffs and Chemicals v. Flemming*, 271 F.2d 281, 286 (8th Cir. 1959), *cert. denied*, 362 U.S. 911 (1960) ("Where the objections stated and issues raised thereby are, even if true, legally insufficient, their effect is a nullity and no objections have been stated.") The FDA's own regulations reflect this requirement that a challenge to an agency's factual conclusion must present a live controversy and affect the legality of the agency's determination to act in a certain way. *See Weinberger v. Hynson, Westcott & Dunning, Inc.*, 412 U.S. 609, 620-22 (1973). In 21 C.F.R. § 12.24 (b), the FDA requires that a person seeking to justify a hearing on objections to approval of a food additive must show 1) the existence of a genuine and substantial issue of fact to be resolved at a hearing; 2) that the factual issue can be resolved by available reliable evidence; 3) the objecting party's data and information, if proved, would be sufficient to resolve the factual issue in the way sought by the objecting party; and 4) resolution of the factual issue in that way would suffice to warrant the relief requested. If the objecting party fails to make these threshold showings, the FDA denies the hearing request.

B. *The FDA's Examination of the Evidence of the Dangers of Aspartame for Wet Use*

As pointed out above, Appellants may obtain a hearing on issues decided during the approval of aspartame for dry use only if they introduced new evidence suggesting that reliance on those issues in the context of wet use is erroneous. Appellants contend that they have introduced this new evidence on the questions of: 1) the relationship between the ingestion of aspartame and brain lesions, mental retardation, and mental instability; 2) the availability of new and more sophisticated tests for the formation of the toxic chemical nitrosamine as a result of aspartame ingestion; 3) the increase in average daily consumption of aspartame resulting from its use in carbonated beverages; 4) the carcinogenicity of aspartame; and 5) the labeling requirements for aspartame. Our review of each of these contentions leads us to conclude that Appellants have not introduced any new evidence suggesting that the FDA, in its approval of aspartame for wet use, abused its discretion in relying on tests and studies conducted previously in connection with the effects of consuming aspartame in dry uses.

1. *Brain Damage.* Appellants argue that there is a material issue of fact on whether the approval of aspartame for carbonated beverage use would increase the level of phenylalanine in blood plasma, which would in turn cause changes in the production of the brain's neurotransmitters. Petitioners then speculate that these changes might lead to aberrations in behavior. In support of this argument. Appellants cite letters from Dr. Richard Wurtman to the director of the Bureau of Foods at the FDA. Two effects concerned Dr. Wurtman. First, his data indicated that large doses of aspartame given to humans and rats after they had been deprived of food increased the concentration of two amino acids, phenylalanine and tyrosine, which control production of two brain neurotransmitters, norephinephrine and dopamine. However, Dr. Wurtman did not demonstrate that these biochemical changes produced behavioral changes in humans or animals. In addition, another study, cited by the FDA in the preamble to the carbonated beverage approval, 48 Fed. Reg. 31379, found that high doses of aspartame did not significantly influence the amounts of either neurotransmitter in the brains of the subjects. Second, Dr. Wurtman was concerned that aspartame would interfere with the production of another neurotransmitter, serotonin, that normally occurred when sated rats were fed large amounts of carbohydrates. Dr. Wurtman asserted that aspartame's effect on neurochemical activity in the brain had previously been estimated without consideration of the effect of carbohydrates. Dr. Wurtman maintained that aspartame's effects could be "markedly amplified" when the sweetener was ingested with carbohydrates that consumers probably would consume at the same time as carbonated soft drinks. However, Dr. Wurtman failed to provide empirical support for his hypothesis that aspartame interferes with carbohydrates' usual effect of inducing serotonin production. The Commissioner evaluated this study, and concluded that the agency had fully evaluated all the issues about the safe use of aspartame in carbonated beverages.

Appellants also cite an assertion by Dr. Paul LeChance that the increased use of aspartame resulting from the addition to carbonated beverages may result in a narrowed "margin of safety between what could be labeled psychological levels of amino acids in a population known to consume high protein diets, and pharmacological levels with the possibility of exerting excitatory [sic] over time, and possible brain lesions. . . ." The FDA concluded that "an adequate margin of safety exists between the levels of phenylalanine [a component of aspartame] known to produce mental retardation and those resulting even from exaggerated exposure to aspartame in carbonated beverages." 49 Fed. Reg. 6674.

2. *Nitrosamines.* Nitrosamines, believed to be carcinogenic, are compounds that theoretically might result from the breakdown of aspartame and of diketopiperazine (DKP), a breakdown product of aspartame. The agency, however, basing its findings on Searle experiments which attempted to create nitrosamines under ideal laboratory

conditions, concluded that "stable nitrosamines were extremely difficult to form," and that "any amounts that could be formed were extremely unstable under conditions that would occur in the gastrointestinal system." *Id.* at 6674, 6677. Appellants have argued that the FDA should reopen the search for carcinogenic nitrosamines, citing the emergence of new analytical techniques since 1974 that enabled investigators to detect nitrosamine in malt beverages. We conclude that the FDA acted well within its discretion in concluding, based upon its expert review of the record, that Appellants offered no evidence that the "formation of nitrosamines in malt beverages has any possible relevance to structurally dissimilar nitrosamine formation in soft drinks containing aspartame." *Id.* at 6677. Absent proof by Appellants that new scientific procedures were relevant to beverages containing aspartame, FDA could as a matter of policy decide against requiring additional testing without holding a hearing on the issue.

3. *Increased Consumption.* Appellants maintain that the FDA's previous estimates of daily aspartame consumption, which formed the basis for its conclusion that dry use of aspartame was safe, cannot form the basis for approval of aspartame in wet uses without a hearing. The premise of Appellant's argument is that wet use will increase the overall average consumption of aspartame. Our review of the record convinces us that the FDA gave proper consideration to the effect of liquid use on overall consumption in concluding that the public would not be exposed to danger. In its hearing on dry use of aspartame, the Public Board of Inquiry used the consumption estimate of 34 mg of aspartame/kilogram (mg/kg) of body weight as the 99th percentile of estimated daily consumption for all age groups. 46 Fed. Reg. 38289-90. This estimate means that only one percent of those who consume aspartame would consume more than 34 mg/kg a day, while the vast majority of consumers would have lower consumption levels. Significantly, this 34 mg/kg figure was based on the assumption that aspartame would be used in the foods sought for approval in the dry use petition, in a number of other foods, and as the *only sweetener* in all carbonated beverages. *Id.* at 38285, 38290. The FDA also projected that an average daily intake of 50 mg/kg of body weight would be safe. 49 Fed. Reg. 6672, 6677, 6679. Since the FDA observed that the "no effect" dose for aspartame (the highest level at which no toxic effects on experimental animals were observed) was between 2000 and 4000 mg/kg of body weight, the agency concluded that a 50 mg/kg intake body weight was safe. The safety factor, between forty-fold and eighty-fold, provides a conservative safety margin; it indicates that the average daily consumption could be multiplied by that factor without exceeding the "no effect dose" of aspartame. *Id.* at 6677-78. Appellants also allege that some patterns of consumption of carbonated beverages—for example, drinking several cans in rapid succession on a hot day—would lead to higher concentrations of aspartame. The FDA acknowledged that some consumers may exceed 34 mg/kg of aspartame on some days, particularly consumers in hot weather or consumers, such as children, who have low body weight. 49 Fed. Reg. 6678. The agency, however, noted that studies conducted by Searle Laboratories, intervenors/respondents in this case, indicated that even levels of 200 mg/kg of body weight in a single dose did not produce acute toxicity. This concentration is the level that would result from a normal adult's consumption of 5.5 pounds of sugar or 13 quarts of orange soda containing aspartame in a single sitting. 48 Fed. Reg. 31380; 49 Fed. Reg. 6676. The FDA could properly exercise its discretion in deciding that "the pattern of aspartame ingestion over the day is not important as long as the total amount ingested per day does not exceed the 200 mg/kg level shown to be safe." 49 Fed. Reg. at 6678. we find no reason to disturb this conclusion.

4. *Carcinogenicity.* Appellants attempts to reopen the issue of the carcinogenicity of aspartame and its breakdown products. Although the Commissioner concluded, based on the dry use proceeding, that aspartame had not been shown to cause cancer, *Id.* at 6672, 6679-80, Appellants challenge this conclusion by attacking one of the studies that provided support for the Commissioner's conclusions. No party contested the agency's reliance on the study during the dry use proceeding. Nor do Appellants point to specific deficiencies in the study which have come to light since the time for appeal expired. We find that Appellants have failed to create a material issue on the carcinogenicity of aspartame that the agency overlooked in its decision to deny a hearing in this case.

5. *Labeling Requirements.* Appellants assert that the conditions of use and required labeling statements for aspartame in liquid use are new issues that the Public Board of Inquiry did not address. The Board and the FDA, however, have considered the issue of appropriate warnings. The Board required a caution to patients with phenylketonuria that aspartame contained phenylalanine. In addition, the Commissioner's dry use approval in 1981 required a statement on the label that aspartame, when packaged as a tabletop sweetener, should not be used in cooking or baking. 21 C.F.R. § 172.804(e)(3). Appellants' current objections do not present any new evidence or suggest any material issue of fact about the necessity of additional warning or labeling requirements.

Appellants also raise a number of issues which they maintain are unique to wet use and therefore were properly excluded from the dry use studies. Specifically, Appellants claim that wet use of aspartame 1) has a toxic effect on human embryos; and 2) decomposes at higher temperatures in a more dangerous way than aspartame carried in dry mediums. We find no evidence on either of these points that would require the FDA to hold a hearing.

1. *Danger to Fetuses.* Diketopiperazine (DKP) is the principal degradation product of aspartame. Seeking to prove the embryotoxic effects of DKP, Appellants advance a letter from Dr. Jean Lederer, reporting on his administration of DKP to rats. The FDA weighed this evidence, and concluded that aspartame and its breakdown products did not produce the fetal damage. 49 Fed. Reg. 6682. Dr. Lederer could not associate fetal damage with aspartame, 48 Fed. Reg. 31380. In its approval of July 8, 1983, the FDA concluded from Dr. Lederer's report, "Aspartame and its Effect on Gestation in the Rat," that animals fed at the highest level of DKP in the diet showed no embryotoxic effects.

2. *Decomposition.* Appellants argue that the use of aspartame in carbonated beverages is qualitatively different from its use in dry foods. They base this argument on the claim that carbonated liquid is peculiarly susceptible to changes of temperature and quality of the medium that lead to the breakdown of a large amount of the aspartame present in the liquid. In addition, Dr. LeChance asserted that the presence of carbonated beverages in distribution channels in "subtropical temperature conditions" during the summer months would lead to "deterioration of DKP and release of the free amino acids . . . ." It was within the FDA's discretion to conclude, based on its expert review of the evidence, that no safety issues respecting aspartame's instability at high temperatures warranted a hearing. 48 Fed. Reg. 31376-77, 31381.

We conclude that Appellants have failed to raise any material issues of fact requiring the FDA to grant a hearing. Therefore, we affirm the FDA's decision in Case No. 84-1153 to deny Appellants a hearing on the wet use of aspartame. In Case No. 84-5253, we affirm the District Court's dismissal for lack of jurisdiction of Appellants' request for a stay of approval pending the hearing.

It is so ordered.

Mr. DIXON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

A PROPOSAL WHICH NEEDS CONSIDERATION

Mr. MOYNIHAN. Mr. President, I wish to take this relatively quiet moment in the day to explore two aspects of the particular matter which I think may not be discussed if, as some have suggested, this most extraordinary legislation—perhaps the most so in the history of this body—is to be enacted in 3 or 4 hours under the threat, in effect, that if we fail to do so, the U.S. Government will default on its debts and go effectively into a form of bankruptcy.

Not ever in the wildest imaging have we thought that such a device would be used to force unconsidered and, in my view, ill-considered legislation on the Congress. No hearings have been held on this proposal, no definitions settled, no real understanding of what is involved. The legislation changes hourly.

Most recently another modification today. Anyone who supposed yesterday, for example, that this legislation would force deficit cuts beginning in fiscal 1986 was right yesterday; but wrong today. Now, it begins in fiscal 1987.

I wish to address two matters. First, I would expand on a statement I made yesterday, and I hope I will be understood when I say I am sorry this was not reported in the press. Actually, I made one of the few statements in opposition yesterday. The extraordinary fact is that under this legislation, farm programs would not be considered

among "relatively controllable expenditures" but, to the contrary, would come under the heading of "relatively uncontrollable" programs with "automatic spending increases." Military pay for example can come under relatively uncontrollable programs; the National Institutes of Health do not.

These are the categories of the legislation based on the categories the Office of Management and Budget uses in the Federal budget. Indeed, a table on page 9-44 tells us that farm programs would be so considered.

Relatively uncontrollable outlays cover spending that results from multiyear contracts and obligations that the Federal Government must honor. It freely enters those contracts, but once done, they are not relatively controllable.

Relatively controllable expenditures include the Federal Aviation Administration, the FBI, the Central Intelligence Agency, the National Security Agency, and the Weather Service. These normal functions of Government—some of which are very old, as the Coast Guard—are relatively controllable expenditures, and thus would automatically be subject to deep reductions across the board under this legislation.

Is it not surprising that farm programs are not so considered?

As a program with so-called automatic spending increases, the farm program might have to forego further increases but would not be cut.

Is it not a matter for some wonderment that health care services are not thought to require automatic spending increases, and therefore will be reduced, along with education, defense, and many of the normal functions of Government?

Of all the large and clearly optional outlays of the Federal Government—optional in the sense that our outlays on education are optional, our outlays on health are optional—well, so are our outlays on farm programs.

Mr. GRAMM. Would the distinguished Senator from New York yield?

Mr. MOYNIHAN. I would yield for a question to my friend.

Mr. GRAMM. If the Senator would yield?

Mr. MOYNIHAN. The Senator does not yield except the Senator yields for a question.

Mr. GRAMM. I then ask the question, has the Senator looked closely at this proposal? Because listening to him, it sounds as if the statements that are being made are not based on what the actual proposal is. My question is, if the Senator will yield, I would be very happy to go through in less than 3 minutes an outline of exactly what the proposal does, what is included and what is not included.

Mr. MOYNIHAN. With the understanding, Mr. President—do I have the understanding that I may yield the floor to the Senator from Texas and then regain the floor? I ask unanimous consent that that happen.

The PRESIDING OFFICER. The Senate is now in the course of the time for routine morning business, during which no speaker is permitted more than 5 minutes, most of which the Senator from New York has already utilized.

Mr. MOYNIHAN. In that case, Mr. President, I think it might be best if I proceeded, and I shall state my points. I shall then listen to the Senator from Texas and then ask for the floor again.

The second point I make, Mr. President, is that under the new "glidepath," we see what seems to me to be deeply unrealistic measures, suggestions, that over the next 5 years our $200 billion deficits are going to drop, on their own, to $163 billion, $143 billion, $132 billion, $120 billion, $105 billion, requiring only that relatively small additional sums be cut in the course of the automatic provisions of this proposed legislation.

May I just make a suggestion that there will be deep and grievous reductions and they will not just be in domestic affairs, but also in international affairs.

I should like to offer the Senate this thought: A vote for this amendment will, in the end, be a vote to end the military and economic aid the United States gives to Israel and Egypt. We perhaps have no idea how large a proportion of our foreign aid that is.

In fiscal year 1986, we anticipate spending $9.2 billion. Of that, $1.8 billion is in military assistance to Israel, $1.2 billion in economic assistance; $1.3 military assistance to Egypt; $800 million in economic aid. More than half of all our foreign aid goes to two countries.

Vote for this measure, and you will see the day that Middle East aid could be slashed under the requirements of a system of mechanical changes required as none other have ever been in this Congress. You will see that aid disappear, and we will wonder what happened.

We will look back to October 4, 1985, when—with no hearings, with a minimum of floor debate, with an absolutely unprecedented use of the debt ceiling as a device to force legislation, which in ordinary circumstances would take a year's consideration—we did it.

This is the day that adequate aid to Israel and Egypt and peace in the Middle East became impossible; to the degree that the prospects for peace depend upon American economic and military support, which they have done from the outset.

I take no pleasure in making that statement, Mr. President, but I feel a responsibility to do so.

I thank the Chair. My time is up.

ORDER OF BUSINESS

(Later the following proceedings occurred.)

Mr. DOLE. Mr. President, I wonder if I might interrupt the debate, and I think we need to debate these issues, so we might consider the nomination of James C. Miller III to be Director of the Office of Management and Budget, and then without interfering with the debate whatever the vote will not show up in the discussion, if we could move to executive session.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nomination of James C. Miller III, to be Director of the Office of Management and Budget, and following the disposition of the Miller nomination, the Senate resume legislative session.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas?

Mr. BYRD. Mr. President, reserving the right to object, and I shall not object, the nomination of Mr. Miller is cleared on this side.

May I say to the distinguished majority leader, later today we should consider the nomination of Mr. Calio to be Administrator of the National Oceanographic and Atmospheric Administration. As a matter of fact, we are ready to go with that nomination by voice vote now if the distinguished majority leader wishes.

There is one other nominee which we, on this side, have cleared and that is the nomination of Mr. Winston Lord, of New York, to be Ambassador Extraordinary and Plenipoteniary of the United States of America to the People's Republic of China. These three are cleared.

Mr. DOLE. What about Calendar No. 422, James A. Baker?

Mr. BYRD. I would say with the exception of those three, there is none other cleared.

Mr. DOLE. I thought the minority leader cleared that one. Baker, Calio, and Miller.

That is 422.

Mr. BYRD. Yes.

Mr. DOLE. Mr. President, before proceeding to the Miller nomination, I ask unanimous consent that the Senate consider Calendar No. 378, Anthony J. Calio, and Calendar No. 422, James A. Baker III.

Mr. BYRD. Mr. President, there is no objection on this side.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

THE NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

The bill clerk read the nomination of Anthony J. Calio, of Maryland, to be Administrator of the National Oceanic and Atmospheric Administration.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

INTERNATIONAL BANKS

The bill clerk read the nomination of James A. Baker III, of Texas, to be U.S. Governor of the International Monetary Fund, International Bank for Reconstruction and Development, Inter-American Development Bank, the African Development Bank, the Asian Development Bank, and the African Development Fund.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. DOLE. Mr. President, I move to reconsider the votes by which the nominations were confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, we are now on the nomination of the distinguished designee to be Director of the Office of Management and Budget, James C. Miller III.

The PRESIDING OFFICER. The nomination will be stated.

EXECUTIVE OFFICE OF THE PRESIDENT

The bill clerk read the nomination of James C. Miller III, of the District of Columbia, to be Director of the Office of Management and Budget.

Mr. ROTH. Mr. President, I rise today to offer a brief statement on the nomination of James C. Miller III to be the Director of the Office of Management and Budget. I support Mr. Miller's nomination and I urge my colleagues to join with me in securing his swift confirmation.

Mr. President, the position of OMB Director is one of the most important posts in the Federal Government today. As a key policy advisor to the President, the Director of the Office of Management and Budget is in a position to greatly influence the successful development of national policy—budgetary and otherwise—and ensure the efficient and effective management of Federal programs.

As we are all aware, Mr. Miller has big shoes to fill. His predecessor, David Stockman, made significant changes in the way the Federal budget is formulated, and in the operation of the OMB.

While the responsibility of the budget and the deficit burden will occupy a significant portion of the time of the Director of OMB, it must not be allowed to overwhelm the important role of OMB in the operation and management of the Federal Government. There are many significant areas—regulatory reform, information management, and paperwork reduction to name just a few—in which OMB plays a critical role in achieving the long-term success and ensuring the overall health of the Federal system.

The Governmental Affairs Committee held a hearing on Mr. Miller's nomination last week which provided an extensive view of his qualifications and his capabilities. James Miller brings an impressive array of credentials as the nominee to head the Office of Management and Budget. Both his undergraduate degree and his doctorate were earned in economics, and he has taught at such institutions as Georgia State University and Texas A&M. Mr. Miller has also held a variety of Government and Government-related positions. For the past 4 years, he has served ably as the Chairman of the Federal Trade Commission. Previous to that, he served as the Director of the Office of Information and Regulatory Affairs in OMB.

Mr. President, James Miller is a capable, as well as a personable, individual. I believe he has the knowledge, the resolve and the experience to direct this highly important Office. I strongly urge my distinguished colleagues to support his nomination.

Mr. DURENBERGER. Mr. President, today the Government Affairs Committee voted to confirm James Miller as the new Director of the Office of Management and Budget. This past Tuesday we held a confirmation hearing for him. This hearing was the occasion for a great deal of discussion about the OMB Director position. The dialog was a constructive one, yielding a great deal of insight into what we should expect from an applicant for OMB Director in these times of budgetary turmoil. As a result of our discussion, I feel strongly the need to share my views on this subject with my colleagues in the Senate who could not be present at this hearing.

Who is the OMB Director? What is his or her role? And what should I be looking for in the person who is applying for the job?

The most striking is how different the job is now from what it was 5 short years ago. The difference cannot be measured in degrees. The changes are too radical. It seems to me its a different job altogether.

Let me give you an example to make the point. I am willing to bet that few of us can remember who was the Budget Director before Burt Lance: It was Jim Lynn. Or after Burt Lance: It was Jim McIntyre. I doubt, however, that in 5 years or even 10, any of us will have forgotten the name Dave Stockman.

The reason is not that Lynn and McIntyre were undistinguished in the performance of their duties. It is because the job they did wasn't the kind that got them on the front page of the Washington Post day after day. When the position was created—and until very recently—the OMB Director was to serve as the coordinator for the President's budget, the gatekeeper against excessive agency budget requests, and he has also was given some broad management responsibilities with respect to the executive branch.

Today, the OMB Director has accumulated power far beyond what any of us would have imagined. OMB clears agency legislative proposals. OMB has control over agency personnel ceilings. OMB directs the budget process. OMB clears all executive branch agency proposed rules, regulations, and paperwork requests. Personnel, legislation, regulation, information, money. These are the tools by which public policy is made and implemented. And, OMB has a big say in all of them. The last two are worth considering in more detail because they represent a great change from just a few years ago.

Before Congress passed the Budget Act of 1974, the budget process was a reflection of policy decisions. It was the vehicle of incremental change—small additions or subtractions from agency appropriations to reflect congressional satisfaction or dissatisfaction with the way agencies were doing their jobs. The Omnibus Reconciliation Act of 1981 changed all that. Today the budget process is not a reflection of public policy decisions, it's about the only way we make policy anymore. Now we write law when we enact budgets. Not incrementally, but all at once and with long-term consequences. Whole programs are created or zeroed out as the result of the reconciliation process.

Before OBRA, the OMB Director was part of the audience in the congressional budget process. To be sure, he was always on tap, but he was not on top. Now the OMB Director is up on the stage itself. He is a central player—keeper of the numbers, carrier of the President's message on Capitol Hill, policymaker in his own right. Because this role is so different from what it was, we in the Senate need to know how the man or woman who will become the new OMB Director views a broad range of public policies.

The second difference worth considering in some detail is the fact that the OMB Director is now a regulatory as well as budgetary policymaker.

While every President since Ford has made an effort to improve Presidential oversight of agency rulemaking, this administration has taken the unprecedented step of centralizing the clearance process in OMB in the Office of Information and Regulatory Affairs.

This role is a familiar one to Jim Miller. He was the first Director of OIRA for the Reagan administration, and he played a key role in setting up the regulatory review process. Jim Miller is a fierce advocate of the free market. He is right. Yet, Jim Miller also knows that there are legitimate reasons for Government to regulate—to protect basic civil rights, to assure workplace safety, and to protect our air, water, and land, not just for you and I, but for the generations that are to come. Jim Miller knows that, and he told us so at his confirmation hearing. But, he also told us that if social regulation is worth doing, it's worth doing well. I could not agree with him more. Now, he is returning, and I hope that it is a signal of better times to come insofar as regulatory reform is concerned.

I say this as someone who cares deeply about regulatory reform. As Chairman of the Intergovernmental Relations Subcommittee, which is charged with responsibility for overseeing the regulatory process generally and OMB's exercise of its responsibilities under the Paperwork Act and Executive Orders 12291 and 12498 specifically, I can tell you that until a few years ago, the road to regulatory reform was pretty lonely. The public wasn't traveling that road. Neither was the Congress nor the President.

Today it seems hard to believe, but a few years ago most of the pressure was for more regulation not less. One reason is that while the Federal Government creates the regulatory programs, it is not the Federal Government that pays most of their costs. So there is little incentive in Washington to take a hard look at them. Most regulatory costs aren't reflected in the Federal budget: They are hidden in expenses paid by businesses, State, and local governments, and in the prices consumers pay for goods and services. While the costs are shifted and spread out across the economy, they mount up.

By one 1980 estimate, if the Federal Government had to write a check for the sum total of all the regulatory programs it was responsible for, that check would have been for over $100 billion in 1980 alone.

One hundred billion dollars. That is a big check. We ought to be sure that we are not paying for more than we need. No more regulatory overkill. We ought to be sure that what we are getting is worth what we're paying. No more getting taken for a regulatory ride.

Jim Miller believed that when he helped set up the regulatory oversight process in OMB. He and the President deserve a lot of credit for taking the challenge of regulatory reform. But, looking back over the 4 years Jim Miller has been gone from OMB, I have been disturbed by OIRA's failure to cooperate with those of us in the Congress who are also interested in promoting regulatory reform. I think the problem comes from OIRA's overly narrow interpretation of what regulatory reform means. Regulatory reform does not mean regulatory abandonment. There is no doubt in my mind that the older style economic regulatory programs have protected consumers and businesses alike from unfair practices in the marketplace. Nor is there any doubt that the newer social regulatory programs have brought us cleaner air and water and safer workplaces, and that they have protected our basic civil rights.

The danger today is to take care that we do not go to the extreme in deregulation to make up for having gone to the other extreme in the past. The challenge is to steer the always difficult middle course. We must regulate better. And we must regulate less. We must regulate better when the regulatory goals are worthwhile as in the case of clean air and water. We must regulate less when old regulatory programs have outlived their usefulness as in the case of the airlines and trucking.

Yet, by its actions OIRA has made it clear that the process is being used to the maximum extent possible to make agency regulatory activities conform to administration regulatory policy. And what is that policy? As a practical matter it has been to promote less regulation across the board: First, bring the regulatory juggernaut to a halt, then turn the regulators around and march them back down the hill. As I have said, in some cases—such as trucking and airlines—that is the right thing to do. But, in others—such as social regulatory programs—it may not be.

At its best, OMB review should be a process to improve the implementation of regulatory statutes—to be sure they are efficient, effective, and consistent with congressional intent. It is the President's responsibility to take care that the laws are faithfully executed.

But I am concerned that OMB has not always been at its best. This is especially so in the case of environmental regulation. Here economic efficiency was never our prime objective. Rather, we regulate to safeguard the resources we have for the generations that will follow. The message here—for OMB and for Congress—is not for Government to get out of the marketplace. It is for Government to get in the rulemaking business but to do it in a rational way. One that recognizes the limits of local capacity to pay, and of industry to respond.

The overly narrow definition of regulatory reform has sometimes led OIRA on a counterproductive crusade against particular environmental, consumer, and civil rights regulations—which in the long run pushes Congress to legislate more prescriptively than it should. All of that takes us further from, not closer to, our goal of more rational regulatory policies. So, at its worst, the OMB review process has been used as a short cut to regulatory reform which in the end may turn out to be just a detour. Now that Jim Miller is returning to OMB, there are two specific problems which are within his power to remedy. One is the problem of timeliness in the OMB review process. The other is the problem of "off the record" contacts between OMB and private parties.

Today, OMB stands accused of off-the-record dealings with regulated industries. That bothers me. It is certainly not in keeping with laws governing agency contacts. It's my view that the best way to be sure that regulatory reform is directed toward the broader public interest is to carry it out in the bright sunshine where the President, Congress, and the public can all participate on a level playing field.

What is more, many people—myself included—have locked horns with OMB on the timeliness of its reviews. I know that OMB says agencies don't have to "conform" to its views, only to "respond" to them. But the plain truth is that few if any rules have ever been promulgated over the objection of OMB. And, when OMB drags the process out endlessly, sometimes for years, "responsiveness" to OMB turns into "conformance" because the rules don't get out.

Now, what was once a small stream of congressional dissatisfaction with OMB is turning into a river, and the concern is bipartisan. When Congress has to hold a hearing, or worse, go to court to get the simplest program demonstration approved, to get information collected or released, or to get a rule published in the Federal Register, then we have more than a disagreement over policy. We have a disagreement over the role of our governmental institutions.

Jim Miller is an accomplished speaker and writer, and he is a first-rate thinker. What is more, first at OIRA and then at the FTC, he has shown himself to be a good manager and a strong leader. As one who would like to see the OMB regulatory review process survive and prosper to become a tool for assuring that regulatory statutes are implemented in the most efficient and effective manner possible, I am looking forward to Jim Mil-

ler's arrival at OMB. I anticipate cooperating with him to find ways to restore Congress and the public's legitimate role in the rulemaking process while at the same time preserving the flexibility OMB needs to carry out its responsibilities to improve regulatory administration. Thank you.

(At the request of Mr. BYRD, the following statement was ordered to be printed in the RECORD:)

● Mr. EAGLETON. Mr. President, during Mr. Miller's confirmation hearing before the Governmental Affairs Committee, I asked him his views on the administration's proposed revision of an Executive order dealing with affirmative action. Mr. Miller offered a response which I thought lacked some specificity, so I requested a more expansive statement in writing. In particular, I wanted assurance that the revision would not in fact remove the current requirement that Government contractors and subcontractors must keep statistics on the number of minorities and women they recruit and hire.

Mr. Miller's letter was, by itself, satisfactory as far as it went, but I believed that a large question still remained unanswered. I then spoke with and wrote to Secretary of Labor, William Brock, to ascertain whether he, as current Secretary of Labor and central in enforcing employment affirmative action, would uphold current procedures for the retention of statistics by those doing business with the Federal Government.

Secretary Brock wrote back, to my satisfaction, on this point. I ask that all of this correspondence, in the order indicated below, be printed in the RECORD, because it is too late in the day for the Federal Government to allow the best tool for detecting discrimination—employment statistics—to be thrown under the rug.

The items I refer to include:

The proposed draft Executive order.

Mr. Miller's letter to Senator EAGLETON.

Senator EAGLETON's letter to Secretary Brock.

Secretary Brock's letter to Senator EAGLETON.

The material follows:

EXECUTIVE ORDER

SECTION 1.

By the authority vested in me as President by the Constitution and statutes of the United States, and in order to further the purposes of Executive Order No. 11246, which mandates that contractors with the federal Government "not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin," it is hereby ordered that the following subpart is added to Part II of Executive Order No. 11246:

Subpart F—Affirmative recruitment and training programs required pursuant to regulations of the Secretary; preferential treatment neither required nor given a legal basis by this Executive order

SEC. 216.—Each Government contractor and subcontractor shall engage in affirmative recruitment and employment-related training programs designed to ensure that minorities and women receive full consideration for hiring and promotion. Such affirmative programs shall be developed pursuant to regulations promulgated by the Secretary of Labor, and shall describe the actions to be taken, including timeframes for taking such actions, to accomplish the objective of expanding the number of qualified minorities and women who receive full consideration for hiring and promotion.

SEC. 217.—Nothing in this Executive Order shall be interpreted to require or to provide a legal basis for a Government contractor or subcontractor to utilize any numerical quota, goal, or ratio, or otherwise to discriminate against, or grant any preference to, any individual or group on the basis of race, color, religion, sex, or national origin with respect to any aspect of employment, including but not limited to recruitment, hiring, promotion, upgrading, demotion, transfer, layoff, termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship. Nor shall any Government contractor or subcontractor be determined to have violated this Order due to a failure to adopt or attain any statistical measures. Further, nothing in this Order shall be interpreted to require or provide a legal basis for any Government contractor or subcontractor to exclude or in any respect limit the participation of any individual in any recruitment or training program on the basis of race, color, religion, sex, or national origin.

SEC. 2.

(a) The Secretary of Labor shall immediately revoke all regulations and guidelines promulgated pursuant to Executive Order No. 11246 inconsistent with this Order in that they require or provide a legal basis for a government contractor or subcontractor to use numerical quotas, goals, ratios or objectives, or otherwise to discriminate or grant such preferences as described in Section 217.

(b) The Secretary also shall, within 30 days of the effective date of this Order, issue such further regulations as are necessary to carry out the purposes of the Order which, where necessary for the integrity of ongoing programs, may be in the form of interim final regulations to be applicable during this interim period. Such regulations shall:

(1) ensure that the requirements of Section 216 will be met by Government contractors and subcontractors; and

(2) provide that compliance with this Order shall be determined on the basis of each Government contractor's and subcontractor's demonstrated nondiscriminatory treatment of its employees and potential employees without regard to race, color, religion, sex, or national origin, irrespective of the number of minorities and women recruited, trained, hired or promoted by the contractor or subcontractor.

SEC. 3.

This Order shall become effective immediately.

FEDERAL TRADE COMMISSION,
Washington, DC, September 25, 1985.

Hon. THOMAS F. EAGLETON,
Dirksen Senate Office Building, Washington, DC.

DEAR SENATOR EAGLETON: This is in response to the question you raised yesterday at my confirmation hearing regarding my views on a draft Presidential executive order [1] that would amend Executive Order 11246, issued by President Johnson on September 24, 1965. Specifically, you asked whether the draft executive order would prevent the Secretary of Labor from requiring that firms contracting with the Federal Government provide certain statistical information concerning their employment practices.

First, Senator, I'd like to emphasize my own views as articulated in our colloquy yesterday. Under no circumstances will I tolerate employment discrimination on the basis of race, color, religion, sex, or national origin. And while I take issue with the view that the goal of equal employment opportunity can best be accomplished through such means as hiring quotas, goals, and timetables, I am firmly convinced that a program of affirmative recruitment and training—one that gives opportunities to minorities and others who in the past may have been victims of discrimination—is not only a moral imperative but is a means of acquiring more effective personnel. On a related point, please find attached the statistical information you requested about employment here at the Federal Trade Commission.

On the basis of a review of Executive Order 11246 and the draft executive order that would amend it, I conclude that nothing in the proposed executive order would, in fact, preclude the Secretary of Labor from collecting statistics on recruiting, hiring, and/or training practices of government contractors. Instead, it would appear that the major thrusts of the draft executive order are (a) to clarify that Executive Order 11246 is not meant to constitute a legal basis for a showing that failure of a government contractor to adopt or attain certain statistical measures is prima facie evidence of a law violation, and (b) to direct the Secretary of Labor to revoke all rules and guidelines promulgated on the basis of Executive Order 11246 which are inconsistent with (a) above.

I trust this information is responsive to your request. If not, please let me know.

Sincerely yours,

JAMES C. MILLER III,
Chairman.

FEDERAL TRADE COMMISSION,
Washington, DC, December 10, 1984.

COMMISSION MEMORANDUM

Subject: Equal Employment Opportunity and Affirmative Recruitment.

I am encouraged by the progress the Commission is making with respect to equal employment opportunity. An indication of this progress can be found in the attached summaries.

Please note there has been a rise in: (a) the proportion of minorities and women in full-time permanent positions, (b) the average grade of minorities and women, (c) the proportion of minorities in the GS-13 to GS-15 grade group, and (d) the proportion of women in the GS-16 and SES corps. In

[1] Reprinted in Bureau of National Affairs, "Daily Report for Executives" (August 16, 1985), p. A-4.

addition, the number of offers to experienced minority attorneys and economists is up significantly, reflecting in part our affirmative recruitment efforts.

This progress would not have been possible without you. I therefore extend my personal thanks to all employees—managers, supervisors, and other staff members—for your personal commitment and support.

We shall not rest on our laurels. Let us resolve to do even better.

[Note: Summaries not reproductible for Record.]

U.S. SENATE,
COMMITTEE ON
GOVERNMENTAL AFFAIRS,
Washington, DC, September 26, 1985.

Honorable WILLIAM E. BROCK,
Secretary of Labor, Frances Perkins Building, Washington, DC.
Attn: Mike Baroody, Assistant Secretary for Policy.

DEAR SECRETARY BROCK: Two days ago James C. Miller III appeared before the Senate Governmental Affairs Committee for his confirmation as the next Director of the Office of Management and Budget. At that time I asked him about his views on the Administration's proposed revision of E.O. 11246 which, as you know, requires federal contractors to comply with affirmative action and to keep statistical information on their employment practices.

Mr. Miller responded that (to paraphrase him) he firmly believed in equal opportunity, that he was strongly opposed to any discriminatory employment practices but, that he wanted to underscore his opposition to quotas.

I then directed his attention to that portion of the revised Order which removes any requirement on a government contractor or subcontractor to adopt or attain statistical measures. As I understand it, it is such statistical compilation which has been used by the Secretary of Labor for the past twenty years as evidence to measure progress in fighting discrimination.

At my request, Mr. Miller responded in writing (copy enclosed) on this point saying, in part: ". . . nothing in the proposed executive order would, in fact, preclude the Secretary of Labor from collecting statistics on recruiting, hiring, and/or training practices of government contractors."

My problem with this statement is that the revised Order states: "Nor shall any Government contractor or subcontractor be determined to have violated this Order due to a failure to adopt or attain any statistical measures." (Sec. 217)

Although Mr. Miller's written answer by itself is satisfactory as far as it goes, nevertheless, there is still a large unresolved question.

How can you, as Secretary of Labor, effectively collect statistics in order to gauge contractor and subcontractor compliance with non-discriminatory principles if contractors and subcontractors no longer have to compile statistics because of this revised Order?

Even if it is argued that elsewhere in the law, contractors and subcontractors will continue to be required to collect employment statistics, I remain concerned about the justification for, and legal meaning of, the changed provision which I have cited insofar as such changed provision would impact on your ability to enforce affirmative action laws within the scope of your duties as Secretary of Labor.

I realize that you do not comment on draft changes in executive orders. However, I am seeking assurance on the following:

(1) That as Secertary of Labor, you intend to enforce fully all laws within the scope of your statutory duties pertaining to affirmative action; and

(2) That as Secretary of Labor you consider it necessary that contractors and subcontractors keep an adequate statistical data base as to employment hiring so as to properly enforce the affirmative action laws which are within the scope of your statutory duties.

Sincerely yours,

THOMAS F. EAGLETON,
U.S. Senator.

U.S. DEPARTMENT OF LABOR,
SECRETARY OF LABOR,
Washington, DC, September 27, 1985.

Hon. THOMAS F. EAGLETON,
U.S. Senate,
Washington, DC

DEAR TOM: This will respond to the two questions you posed in our conversation and your subsequent letter of the 26th regarding the Department of Labor's enforcement of affirmative action.

As we discussed, the draft document to which you referred has no standing as Administration policy and so you can understand that I do not direct my comments to that draft but to the questions as posed in your letter.

To your first question, of course, my answer is yes, firmly and emphatically. The Department has extensive enforcement responsibility under many different statutes. I intend to enforce all of them vigorously, none more so than those which are directed at ensuring equal employment opportunities are guaranteed to all Americans without regard to race, color, religion, sex or national origin.

As to the second question, please be assured that I will maintain all necessary tools of enforcement required for the Secretary of Labor to ensure that any contractor who wishes to do business with the federal government must not only refrain from discriminatory employment practices but must also take effective affirmative action steps. I certainly agree that adequate record-keeping and statistical compilations as to employment hiring are necessary both on the part of contractors and of the Department to properly enforce these requirements.

I hope the above answers your questions satisfactorily.

Very truly yours,

WILLIAM E. BROCK.

Mr. BAUCUS. Mr. President, today this body confirms James Miller to be head of the Office of Management and Budget. This position is of critical importance to all of us.

Over the 50-plus years of its existence, OMB—formerly BOB—has grown in importance. Certainly in the last 4 years it has played a central and visible role in setting the priorities of the Nation.

At this time, however, I do not want to speak about OMB's budgetary role. I want to focus on another activity: regulatory clearance.

The last few years have seen a quantum growth in the power of OMB over regulatory actions of executive agencies. All proposed regulations now go to OMB for clearance—and OMB has shown an increasing willingness to interfere with the will of Congress by frustrating the rulemaking process.

I am gravely concerned about this growing involvement by OMB in regulatory and policy areas where Cabinet officials, appointed by the President and confirmed by the Senate, have clear statutory responsibilities. All too often we have seen regulations altered or delayed and basic policy decisions made by lower level OMB functionaries who are not accountable to Congress or to the public.

I am sympathetic to any President's desire to put his stamp on the executive branch—but when a law directs an agency to regulate, I do not expect the OMB to use its clearance function to ignore that law.

Let me note just a few examples of great concern to me.

SBA SIZE STANDARDS FOR FARMS

First, the size eligibility standard for farmers to qualify under SBA programs. This year our farmers have faced both physical and economic disasters. They don't need a hostile government. Yet they find OMB violating its own rules and ignoring a request by the SBA to adjust a size standard.

In March 1984, the size standard for farm eligibility was dropped from $1 million in gross sales to $100,000—a drastic cut. To understand the inequity in this, it is worth noting that for businesses such as car washes, candy stores, or cigarette stores the size standard is $3.5 million—and that's the next smallest size standard.

The SBA recommended an increase in the limit to $500,000—still far below other size standards. The Senate Small Business Committee endorsed this recommendation. Still OMB has ignored the proposed rule—thereby killing it. The SBA proposal went to OMB on April 19. The 60 days permitted under OMB guidelines for consideration of the rule expired on June 19. On July 16, the full Senate voted to direct that the change be made. Yet, OMB still refuses to act.

SAFE DRINKING WATER

The second example I want to call to my colleagues' attention is the OMB's treatment of EPA's proposed regulations under the Safe Drinking Water Act.

EPA has been slow in proposing recommended maximum contaminant levels for drinking water contaminants. However, it did send a proposal to OMB on April 9 of this year. These regulations were not released until last week—more than 5 months later and a full 2 months after the distinguished chairman of the Environment and Public Works Committee, Senator STAFFORD, joined me and Senators DURENBERGER and BENTSEN in writing to OMB about this. I ask that the text of this letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE, COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS,
Washington, DC, August 1, 1985.

Hon. JOSEPH R. WRIGHT,
Acting Director, Office of Management and Budget, Old Executive Office Building, Washington, DC.

DEAR MR. WRIGHT: We are writing to express our concern about the lengthy delay in completion of the Office of Management and Budget's review of proposed recommended Maximum Contaminant Levels (RMCLs) for 30 drinking water contaminants. EPA's Office of Drinking Water sent these proposals to OMB on April 9, 1985 for your review which has yet to be completed nearly four months later. This appears to be an excessive amount of time for evaluation of the agency's scientific basis for setting RMCLs under the drinking water statute. The 30 Phase II contaminants submitted for review are those that the agency believes may have adverse effects on human health in accordance with their standard-setting responsibility under the Safe Drinking Water Act.

In the eleven years since enactment of this statute, EPA's Office of Drinking Water has not fulfilled the public health protection objectives mandated by Congress. Drinking water standards constitute the regulatory foundation of the Act. However, only 22 such standards have been established by the Agency. This is totally inadequate in view of the hundreds of contaminants that have been detected in public and private water systems, many of which are synthetic organic chemicals of significant public concern.

Public health officials and constituents from each of our states have indicated their urgent need for these standards to make sound water supply decisions. In their absence, States have had to expend limited resources to develop standards without adequate scientific information. A Federal responsibility to issue standards was established under this Act to eliminate such duplicative and ill-informed State efforts.

The great concern over the lack of sufficient standards to adequately protect public health from drinking water contaminants is reflected in amendments passed by the Senate and House that would significantly strengthen the standard-setting provisions of the Safe Drinking Water Act. Widespread concern about the Agency's historical inability to issue standards and indications of OMB resistance to the establishment of standards served as the impetus for the passage of schedules and deadlines in the Senate bill. It should be apparent from these actions that Congress intends that standards are to be set for drinking water contaminants in a responsible and timely manner.

Now that the Drinking Water Office has finally selected priority contaminants of public concern and gathered sufficient evidence on which to base RMCLs, we believe that your Office has a responsibility to review this information in an expeditious manner. Therefore, we ask that you allow EPA to publish the proposed RMCLs as soon as possible so they may begin to fulfill their regulatory responsibilities or provide an explanation for the excessive delay in completing your review.

Sincerely,

MAX BAUCUS,
U.S. Senator.
DAVE DURENBERGER,
U.S. Senator.
LLOYD BENTSEN,
Ranking Member.
ROBERT T. STAFFORD,
Chairman.

HEALTH CARE FINANCING

Mr. BAUCUS. Mr. President, the list goes on and on. Every Senator, I am sure, could add examples from personal experience.

I am particularly concerned about the heavy hand of OMB in the area of health-care financing. This year we have witnessed an extraordinary deluge of administrative rules, issued by the Department of Health and Human Services at OMB's direction and insistence, which attempt to preempt congressional decisions on the Medicare prospective payment system. By administrative rulemaking, OMB attempted to flaunt the prerogatives of Congress to determine payment rates for almost every aspect of the health-care system: hospitals, physicians, medical education, home health agencies, and many other health care providers.

I am pleased that under the leadership of the chairman of the Committee on Finance, Senator PACKWOOD, this body will have the opportunity to determine the direction of health policy. But I am deeply disturbed about OMB's practice of trying to find the back door means to alter our health-care system rather than including these policies in the legislative process where they belong.

Mr. President, I had no wish to delay or prevent the confirmation of Mr. Miller. I believe him to be an able and honest man. However, I do hope he will recognize the rights of the Congress—and the need to follow its directives.

THE NOMINATION OF DR. JAMES C. MILLER III, TO BE DIRECTOR OF THE OFFICE OF MANAGEMENT AND BUDGET

Mr. THURMOND. Mr. President, I rise in support of the nomination of Dr. James C. Miller III, who has been selected by President Reagan to serve as Director of the Office of Management and Budget.

Dr. Miller is superbly qualified for this position by reason of his educational background, his experience, and, most importantly, because of his philosophy. Dr. Miller received his undergraduate degree in economics from the University of Georgia and was awarded his doctorate from the University of Virginia. He has served as a college professor and is the author of numerous publications dealing with governmental regulatory practices.

Dr. Miller is no stranger to Government service. He has served as Assistant Director for Government Operations and Research for the U.S. Council on Wage and Price Stability, as well as senior staff economist with the U.S. Council of Economic Advisors. Additionally, Dr. Miller has worked in the Department of Transportation. For the last 4 years, Dr. Miller has served the President as Chairman of the Federal Trade Commission [FTC]. During his stay at the FTC he has proved himself an able administrator of a large independent regulatory agency and has effectively carried out the policies of the Reagan administration. Dr. Miller, who has served as the executive director of the Presidential Task Force on Regulatory Relief, continued his attack on cumbersome Government regulation at the FTC, demonstrating why he deserves the sobriquet of Ronald Reagan's "Deregulation Czar."

Mr. President, Dr. Miller is eminently qualified for the position of Director of the Office of Management and Budget. He is a noted economist and accomplished administrator. He has even had experience working in the OMB as Administrator for Information and Regulatory Affairs in the Office of Management and Budget during 1981. While Dr. Miller is unquestionably qualified for this appointment in terms of ability and experience, he is the proper choice for this job because of his commitment to the policies of fiscally responsible government.

Mr. President, Dr. Miller is an excellent choice for Director of the Office of Management and Budget. I commend President Reagan on his selection, and I urge my colleagues to support his nomination.

Mr. DOLE. Mr. President, I ask for the yeas and nays on the nomination.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, will the Senate advise and consent to the nomination of James C. Miller III, of the District of Columbia, to be Director of the Office of Management and Budget? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Minnesota [Mr. DURENBERGER], the Senator from North Carolina [Mr. EAST], the Senator from Kansas [Mrs. KASSEBAUM], and the Senator from Oregon [Mr. PACKWOOD] are necessarily absent.

I further announce that, if present and voting, the Senator from Kansas [Mrs. KASSEBAUM] would vote "yea."

Mr. CRANSTON. I announce that the Senator from Texas [Mr. BENTSEN], the Senator from Missouri [Mr. EAGLETON], the Senator from Hawaii [Mr. INOUYE], and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island [Mr. PELL] would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 90, nays 2, as follows:

[Rollcall Vote No. 202 Ex.]

YEAS—90

Abdnor	Goldwater	Melcher
Andrews	Gore	Metzenbaum
Armstrong	Gorton	Mitchell
Baucus	Gramm	Moynihan
Biden	Grassley	Murkowski
Bingaman	Hart	Nickles
Boren	Hatch	Nunn
Boschwitz	Hatfield	Pressler
Bradley	Hawkins	Proxmire
Bumpers	Hecht	Pryor
Burdick	Heflin	Quayle
Byrd	Heinz	Rockefeller
Chafee	Helms	Roth
Chiles	Hollings	Rudman
Cochran	Humphrey	Sarbanes
Cohen	Johnston	Sasser
Cranston	Kasten	Simon
D'Amato	Kennedy	Simpson
Danforth	Kerry	Specter
DeConcini	Lautenberg	Stafford
Denton	Laxalt	Stennis
Dixon	Leahy	Stevens
Dodd	Levin	Symms
Dole	Long	Thurmond
Domenici	Lugar	Trible
Evans	Mathias	Wallop
Exon	Matsunaga	Warner
Ford	Mattingly	Weicker
Garn	McClure	Wilson
Glenn	McConnell	Zorinsky

NAYS—2

Harkin	Riegle

NOT VOTING—8

Bentsen	East	Packwood
Durenberger	Inouye	Pell
Eagleton	Kassebaum	

So the nomination was confirmed.

Mr. DOLE. Mr. President, I move to reconsider the vote on the nomination.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will return to legislative session.

The Senate resumed the consideration of legislative business,

(Conclusion of later proceedings.)

CONCLUSION OF ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. The period for morning business has expired. The majority leader is recognized.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

The Senate resumed consideration of House Joint Resolution 372.

Pending:

(1) Dole Amendmemnt No. 729, to provide for a balanced budget and emergency deficit control.

(2) Dole Amendment No. 730 (to Amendment No. 729), of a perfecting nature.

MODIFICATION TO AMENDMENT NO 730

Mr. DOLE. Mr. President, I send a modification to the desk to the Gramm-Rudman amendment.

The PRESIDING OFFICER. The amendment is so modified.

The amendment, as modified, is as follows:

At the end of the matter proposed to be inserted, insert the following new section:

(b) CONGRESSIONAL BUDGET.—

(1) ONE CONCURRENT RESOLUTION ON THE BUDGET REQUIRED ANNUALLY.—

(A) IN GENERAL.—Section 310 of the Congressional Budget Act of 1974 is amended—

(i) by striking out all beginning with "SEC. 310. (a)" through "necessary—" in the matter preceding paragraph (1) of subsection (a) and inserting in lieu thereof the following:

"SEC. 310. (a) IN GENERAL.—Any concurrent resolution on the budget considered under section 301 or section 304 for a fiscal year shall, to the extent necessary—"; and

(ii) by striking out subsection (b) and redesignating subsection (c) as subsection (b).

(B) CONFORMING CHANGES.—

(i) The table of contents in subsection (b) of section 1 of the Congressional Budget and Impoundment Control Act of 1974 is amended—

(I) by striking out "Adoption of first concurrent resolution" in the item relating to section 301 and inserting in lieu thereof "Annual adoption of concurrent resolution";

(II) by striking out "First concurrent resolution" in the item relating to section 303 and inserting in lieu thereof "Concurrent resolution"; and

(III) by striking out "Second required concurrent resolution and reconciliation" in the item relating to section 310 and inserting in lieu thereof "Reconciliation".

(ii) Paragraph (4) of section 3 of such Act is amended—

(I) by adding "and" after the semicolon at the end of subparagraph (A);

(II) by striking out subparagraph (B); and

(III) by striking out "(C) any other" and inserting in lieu thereof "(B) a".

(iii) Section 300 of the Congressional Budget Act of 1974 is amended—

(I) by striking out "first" in the item relating to April 15 and in the second item relating to May 15; and

(II) by striking out the items relating to September 15 and September 25.

(iv)(I) The heading of section 301 of the Congressional Budget Act of 1974 is amended to read as follows:

"ANNUAL ADOPTION OF CONCURRENT RESOLUTION".

(II) Section 301(a) of such Act is amended by striking out "the first concurrent resolution on the budget" in the first sentence and inserting in lieu thereof "a concurrent resolution on the budget".

(III) Section 301(b) of such Act is amended—

(aa) by striking out "first concurrent resolution on the budget" in the matter preceding paragraph (1) and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)"; and

(bb) in paragraph (1) by striking out all beginning with "the concurrent resolution" through "both" the second place it appears and inserting in lieu thereof "the Congress has completed action on any reconciliation bill or reconciliation resolution, or both, required by such concurrent resolution to be reported in accordance with section 310(b)".

(IV) Section 301(d) of such Act is amended by striking out "first" each place it appears.

(V) Section 301(e) of such Act is amended—

(aa) by striking out "set for" in paragraph (1) and inserting in lieu thereof "set forth"; and

(bb) by striking out "first concurrent resolution on the budget" each place it appears and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)".

(v) Section 302(c) of such Act is amended by striking out "or 310".

(vi)(I) The heading of section 303 of such Act is amended by striking out "FIRST".

(II) Section 303(a) of such Act is amended by striking out "first concurrent resolution on the budget" in the matter following paragraph (4) and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(vii) Section 304 of such Act is amended—

(I) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)"; and

(II) by striking out "pursuant to section 301".

(viii)(I) Section 305(a)(3) is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(II) Section 305(b) of such Act is amended—

(aa) in paragraph (1) by striking out ", except that" and all that follows through "15 hours"; and

(bb) in paragraph (3) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(ix) Section 308(a)(2)(A) of such Act is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(x) Paragraph (1) of section 309 of such Act is amended by striking out ", and other than the reconciliation bill for such year, if required to be reported under section 310(c)".

(xi) Section 310(f) of such Act is amended by striking out "subsection (a)" and inserting in lieu thereof "301(a)".

(xii) Section 311(a) of such Act is amended—

(I) by striking out "310(a)" the first place it appears and inserting in lieu thereof "301(a)"; and

(II) by striking out "310(c)" and inserting in lieu thereof "310(b)".

(xiii) Clause 1. of Rule XLIX of the Rules of the House of Representatives is amended by striking out ", 304, or 310" and inserting in lieu thereof "or 304".

(2) MAXIMUM DEFICIT AMOUNTS.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) POINT OF ORDER.—Section 301 of the Congressional Budget Act of 1974 is amended by redesignating subsections (c), (d), and (e) as subsections (d), (e), and (f), respectively, and inserting after subsection (b) the following new subsection:

"(c) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(ii) CONFORMING CHANGE.—Section 301(e) of such Act, as redesignated by clause (i) of this subparagraph, is amended by inserting "; and when so reported such concurrent resolution shall comply with the requirement described in paragraph (1) of subsection (c), unless such paragraph does not apply to such fiscal year by reason of paragraph (2) of such subsection" after "October 1 of such year" in the second sentence thereof.

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—Section 304 of such Act is amended—

(i) by inserting "(a) IN GENERAL.—" after "SEC. 304."; and

(ii) by adding at the end thereof the following new subsection:

"(b) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(C) DEFINITIONS.—Section 3 of the Congressional Budget and Impoundment Control Act of 1974 is amended by adding at the end thereof the following new paragraphs:

"(6) The term 'deficit' means, with respect to any fiscal year, the amount by which total budget outlays for such fiscal year exceed total revenues for such fiscal year. For purposes of the Balanced Budget and Emergency Deficit Control Act of 1985, the receipts of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund for a fiscal year, and the taxes payable under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954 during such fiscal year, shall be included in total revenues for such fiscal year, and the disbursements of either such Trust Fund for such fiscal year shall be included in total budget outlays for such fiscal year.

"(7) The term 'maximum deficit amount' means—

"(A) with respect to the fiscal year beginning October 1, 1985, $180,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1986, $144,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1987, $108,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1988, $72,000,000,000;

"(E) with respect to the fiscal year beginning October 1, 1989, $36,000,000,000; and"

"(F) with respect to the fiscal year beginning October 1, 1990, zero.".

(3) RECONCILIATION.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) DIRECTIONS TO COMMITTEES.—Section 301(b) of the Congressional Budget Act of 1974 (as amended by paragraph (1)(B)(iv)(III) of this subsection) is further amended—

(I) by striking out "may also require" in the matter preceding paragraph (1) and inserting in lieu thereof "shall also, to the extent necessary to comply with subsection (c)";

(II) by inserting "require" after the paragraph designation in paragraph (1);

(III) by inserting "require" after the paragraph designation in paragraph (2); and

(IV) by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively, and inserting before paragraph (2) (as so redesignated) the following new paragraph:

"(1) specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a);".

(ii) CONFORMING CHANGES.—

(I) Section 310(a) of such Act is amended—

(aa) by inserting "or" at the end of paragraph (2);

(bb) by striking out "; or" at the end of paragraph (3) and inserting in lieu thereof a period; and

(cc) by striking out paragraph (4).

(II) Section 310(d) of such Act is amended by striking out "subsection (c)" and all that follows through "year" and inserting in lieu thereof "subsection (b) with respect to a concurrent resolution on the budget adopted under section 301(a) not later than June 15 of each year".

(III) Subsections (e) and (f) of section 310 of such Act are amended by striking out "subsection (c)" each place it appears and inserting in lieu thereof "subsection (b)".

(IV) Section 300 of such Act is amended by inserting immediately after the second item relating to May 15 the following new item:

"June 15	Congress completes action on reconciliation bill or resolution, or both, implementing first required concurrent resolution.".

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) IN GENERAL.—Section 304(a) of such Act (as redesignated by paragraph (2)(B)(i) of this subsection) is amended by adding after the period the following new sentence: "Any concurrent resolution adopted under this section shall specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a) to the extent necessary to comply with subsection (b).".

(ii) CONFORMING CHANGE.—Section 310(d) of such Act (as amended by subparagraph (A)(ii)(II) of this paragraph) is further amended by adding at the end thereof the following new sentence: "Congress shall complete action on any reconciliation bill or reconciliation resolution reported under subsection (b) with respect to a concurrent resolution on the budget adopted under section 304(a) not later than 30 days after the adoption of the concurrent resolution.".

(4) LIMITATION ON AMENDMENTS.—

(A) CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) HOUSE OF REPRESENTATIVES.—Section 305(a)(6) of such Act is amended—

(I) by inserting "(A)" after the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in the concurrent resolution is not increased, by making an equivalent reduction in other specific budget outlays or an equivalent increase in other specific Federal revenues.

"(ii) Clause (i) of this subparagraph shall not apply to any fiscal year for which a declaration of war has been enacted.".

(ii) SENATE.—Section 305(b)(2) of such Act is amended—

(I) by inserting "(A)" before the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in the concurrent resolution is not increased, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) RECONCILIATION BILLS AND RESOLUTIONS.—Section 310 of such Act is amended by inserting after subsection (b) (as redesignated by paragraph (1)(A)(ii) of this subsection) the following new subsection:

"(c) LIMITATION ON AMENDMENTS TO RECONCILIATION BILLS AND RESOLUTIONS.—

"(1) It shall not be in order in either the House of Representatives or the Senate to consider any amendment to a reconciliation bill or reconciliation resolution if such amendment would have the effect of increasing any specific budget outlays above the level of such outlays provided in the bill or resolution as reported, or would have the effect of reducing any specific Federal revenues below the level of such revenues provided in the bill or resolution, unless such amendment ensures that the amount of the deficit for any fiscal year set forth in the most recently agreed to concurrent resolution on the budget is not exceeded, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(2) Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(5) ENFORCEMENT.—

(A) ALLOCATIONS OF BUDGET AUTHORITY AND OUTLAYS.—

(i) REPORTING DATE FOR ALLOCATIONS.—Section 302(b) of such Act is amended by striking out "Each such committee shall promptly report" in the last sentence and inserting in lieu thereof "Each such committee, within ten days of session after the concurrent resolution is agreed to, shall report".

(ii) ALLOCATIONS MADE BINDING.—Section 311 of such Act is amended by redesignating subsections (a) and (b) as subsections (b) and (c), respectively, and inserting immediately after "SEC. 311" the following new subsection:

"(a) LEGISLATION SUBJECT TO POINT OF ORDER AFTER ADOPTION OF ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

"(1) IN GENERAL.—At any time after the Congress has completed action on the concurrent resolution on the budget required to be reported under section 301(a) for a fiscal year, it shall not be in order in either the House of Representatives or the Senate—

"(A) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides for budget outlays or new budget authority in excess of the appropriate allocation of such outlays or authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year; or

"(B) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides new spending authority described in section 401(c)(2)(C) to become effective during such fiscal year, if the amount of budget outlays or new budget authority that would be required for such year if such bill or resolution were enacted without change or such amendment were adopted would exceed the appropriate allocation of budget outlays or new budget authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year, unless such bill, resolution, or amendment was favorably reported by the Committee on Appropriations of the House involved under section 401(b)(2) along with a certification that if such bill, resolution, or amendment is enacted or adopted, the committee will reduce appropriations or take any other actions necessary to assure that the enactment or adoption of such bill, resolution, or amendment will not result in a deficit for such fiscal year in excess of the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) ALTERATION OF 302(b) ALLOCATIONS.—At any time after a committee reports the allocations required to be made under section 302(b), such committee may report to its House an alteration of such allocations, provided that any alteration of such allocations must be consistent with any actions already taken by its House on legislation within the committee's jurisdiction.

"(3) EXCEPTION.—Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 311(b) of such Act, as redesignated by subparagraph (A)(ii) of this subsection, is amended by inserting before the period at the end thereof the following: "or would cause the levels of deficits set forth in such concurrent resolution to be exceeded, or would otherwise result in a deficit for such fiscal year that exceeds the maximum deficit amount specified for such fiscal year in section 3(7) (except to the extent that paragraph (1) of subsection (b) of section 310 does not apply by reason of paragraph (2) of such subsection)".

(C) REPORTING REQUIREMENT EXTENDED TO CONFERENCE REPORTS.—Section 308(a) of such Act is amended by striking out "the report accompanying that bill or resolution" in the matter preceding paragraph (1) and inserting in lieu thereof the following: "or whenever a conference report is filed in either House, the report accompanying that bill or resolution or the statement of managers accompanying that conference report".

(c) BUDGET SUBMITTED BY THE PRESIDENT.—

(1) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 1105 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) The budget transmitted pursuant to subsection (a) for a fiscal year shall be prepared on the basis of the best estimates then available, in such a manner as to ensure that the deficit for such fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974; and the President shall take such action under subsection (d)(2) of the Balanced Budget and Emergency Deficit Control Act of 1985 as is necessary to ensure that the deficit for such fiscal year does not exceed such maximum deficit amount.

"(2) Subject to paragraph (3) of this subsection, the deficit set forth in the budget so transmitted for any fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974, with budget outlays and Federal revenues at such levels as the President may consider most desirable and feasible.

"(3) Paragraph (2) shall not apply with respect to any fiscal year for which a declaration of war has been enacted.".

(2) REVISIONS AND SUPPLEMENTAL SUMMARIES.—Section 1106 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) Subsection (f) of section 1105 shall apply to revisions and supplemental summaries submitted under this section to the same extent that such subsection applies to the budget submitted under section 1105(a) to which such revisions and summaries relate.".

(d) EMERGENCY POWERS TO ELIMINATE DEFICITS IN EXCESS OF MAXIMUM DEFICITS AMOUNTS.—

(1) REPORTING OF DEFICITS IN EXCESS OF MAXIMUM DEFICIT AMOUNTS.—

(A) IN GENERAL.—The Director of the Office of Management and Budget and the Director of the Congressional Budget Office (hereafter in this section referred to as "the Directors") shall, with respect to any fiscal year (I) estimate the levels of total revenues and budget outlays that may be anticipated for such fiscal year, (II) determine whether the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year and whether such excess is statistically significant, and (III) estimate the rate of real economic growth that will occur during such fiscal year. The Directors jointly shall report to the President and to the Congress on November 1 of such fiscal year (in the case of the fiscal year beginning October 1, 1985) and October 1 of such fiscal year (in the case of any succeeding fiscal year), identifying the amount of any excess, stating whether such excess is statistically significant, specifying the estimated rate of real economic growth for such fiscal year, and specifying the percentages by which automatic spending increases and relatively controllable expenditures shall be reduced during such fiscal year in order to eliminate any such excess. In the event that the Directors are unable to agree on an amount to be set forth with respect to any item in any such report, the amount set forth for such item in such report shall be the average of the amounts proposed by each of them with respect to such item.

(B) EXCEPTION.—Subparagraph (A) shall not apply to any fiscal year for which a declaration of war has been enacted.

(2) PRESIDENTIAL ORDER.—

(A) CONTENTS.—

(i) IN GENERAL.—Upon receipt of any report from the Directors under paragraph (1) of this subsection which identifies a statistically significant amount by which the deficit for a fiscal year will exceed the maximum deficit amount for such fiscal year, notwithstanding the Impoundment Control Act of 1974, the President shall issue an order that—

(I) subject to clauses (ii) and (iii) of this subparagraph, eliminates one-half of such excess by modifying or suspending the operation of each provision of Federal law that would (but for such order) require an automatic spending increase to take effect during such fiscal year, in such a manner as to reduce by a uniform percentage (but not below zero) the amount of increase under each such provision, and

(II) subject to clauses (ii) and (iii) of this subparagraph, eliminates one-half of such excess by sequestering such amounts of budget authority, obligation limitations, and loan limitations, and by adjusting payments provided by the Federal Government, to the extent necessary to reduce each relatively controllable expenditure by a uniform percentage;

and shall transmit to both Houses of the Congress a message—

(III) identifying—

(aa) the total amount and the percentage by which automatic spending increases are to be reduced under subclause (I) of this clause;

(bb) the total amount of budget authority, obligation limitations, and loan limitations which is to be sequestered and the total amount of payments which is to be adjusted under subclause (II) of this clause with respect to relatively controllable expenditures;

(cc) the amount of budget authority, obligation limitations, and loan limitations which is to be sequestered and payments which are to be adjusted with respect to each such relatively controllable expenditure in order to reduce it by the required percentage; and

(dd) the account, department, or establishment of the Government to which each amount of budget authority, obligation limitations, and loan limitations and each payment described in subclause (II) of this clause would be available for obligation; and

(IV) providing full supporting details with respect to each action to be taken under subclause (I) or (II) of this clause.

(ii) EXCEPTION.—If, in order to reduce by one-half the amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year, actions under subclause (i)(I) would require the reduction of automatic spending increases below zero, then, in order not to require such reductions below zero, the remaining

amount shall be achieved through further uniform reductions under subclause (i)(II).

"(iii) LIMITATION.—No action taken by the President under subclause (I) or (II) of clause (i) shall have the effect of eliminating any program, project, or activity of the Federal Government.

(B) DATE ISSUED.—

(i) POSITIVE REAL ECONOMIC GROWTH.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is zero or greater, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 14 days after transmittal of such report.

(ii) NEGATIVE REAL ECONOMIC GROWTH.—

(I) IN GENERAL.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is less than zero, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 30 days after transmittal of such report.

(II) ALTERNATIVE PROPOSALS.—The President may, during the 30-day period specified in subclause (I), submit to each House of the Congress a joint resolution that will, if enacted—

(aa) reduce the deficit for a fiscal year to an amount not greater than the maximum deficit amount for such fiscal year, or

(bb) subject to the requirements of subsection (f) of this section, suspend (in part or in whole) the requirements of this section and of the amendments made by this section with respect to such fiscal year.

Such joint resolution shall be introduced (by request) by the majority leader of each such House on the day on which it is submitted and shall be referred on such day to the appropriate committees of such House. The committees shall report the joint resolution not later than 10 days after the date on which it is introduced. Any committee failing to report a joint resolution within the 10-day period referred to in the preceding sentence shall be automatically discharged from consideration of the joint resolution, and the joint resolution shall be placed on the appropriate calendar. The provisions of section 305 of the Congressional Budget Act of 1974 for the consideration of concurrent resolutions on the budget shall also apply to consideration of any joint resolution submitted under this subparagraph and to conference reports thereon. Section 310(c) of such Act (as added by subsection (b)(4)(B) of this section) shall apply to any such joint resolution.

(C) EFFECTIVE IMMEDIATELY.—Except to the extent that it is superseded by a joint resolution enacted under paragraph (3) of this subsection, an order issued pursuant to this paragraph shall be effective from and after its issuance. Any modification or suspension of the operation of a provision of law that would (but for such order) require an automatic spending increase to take effect during a fiscal year shall apply for the one-year period beginning with the date on which such automatic increase would have taken effect during such fiscal year (but for such order).

(D) PROPOSAL OF ALTERNATIVES.—A message transmitted pursuant to this paragraph with respect to a fiscal year may be accompanied by a proposal setting forth in full detail alternative ways to reduce the deficit for such fiscal year to an amount not greater than the maximum deficit amount for such fiscal year.

(3) CONGRESSIONAL ACTION.—

(A) REPORTING OF JOINT RESOLUTIONS.—

(i) IN GENERAL.—Not later than 10 days after issuance of an order by the President under paragraph (2) with respect to a fiscal year, the Committee on the Budget of the House of Representatives or the Senate may report to its House a joint resolution superseding such order. The report accompanying such joint resolution shall explain in full detail the nature and effects of each provision of the joint resolution.

(ii) POINT OF ORDER.—It shall not be in order in the House of Representatives or the Senate to consider or agree to any joint resolution reported under clause (i) with respect to a fiscal year, any amendment thereto, or any conference report thereon if—

(I) the enactment of such joint resolution as reported;

(II) the adoption and enactment of such amendment; or

(III) the enactment of such joint resolution in the form recommended in such conference report;

would cause the amount of the deficit for such fiscal year to exceed the amount of the deficit set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year or the maximum deficit amount for such fiscal year.

(iii) DEFINITION.—For purposes of clause (i), the term "day" shall mean any calendar day on which either House of the Congress is in session.

(B) PROCEDURES.—

(i) IN GENERAL.—The provisions of section 305 of the Congressional Budget Act of 1974 for the consideration of concurrent resolutions on the budget and conference reports thereon shall also apply to consideration of joint resolutions reported under this paragraph and conference reports thereon.

(ii) LIMITATION ON AMENDMENTS.—Section 310(c) of such Act (as added by subsection (b)(4)(B) of this section) shall apply to joint resolutions reported under this paragraph.

(4) DEFINITIONS.—For purposes of this subsection:

(A) The term "automatic spending increase" shall include all Federal programs indexed directly or indirectly, whether appropriated or contained in current law. This shall include entitlements and other payments to individuals, open-ended programs and grants, and other similar programs, and shall not include increases in Government expenditures due to changes in program participation rates. Such term shall not include any increase in benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act.

(B) The term "budget outlays" has the meaning given to such term in section 3(1) of the Congressional Budget and Impoundment Control Act of 1974.

(C) The term "concurrent resolution on the budget" has the meaning given to such term in section 3(4) of the Congressional Budget and Impoundment Control Act of 1974.

(D) The term "deficit" has the meaning given to such term in section 3(6) of the Congressional Budget and Impoundment Control Act of 1974.

(E) The term "maximum deficit amount" has the meaning given to such term in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974.

(F) The term "real economic growth" means, with respect to a fiscal year, the nominal growth in the production of goods and services during such fiscal year, adjusted for inflation.

(G) The term "relatively controllable expenditures" means budget outlays that are classified as relatively controllable outlays in Office of Management and Budget, *Controllability of Budget Outlays*, Report No. BPS0701A (August 27, 1985).

(H) The amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount of such excess is greater than 5 percent of such maximum deficit amount. For purposes of the fiscal year beginning October 1, 1985, the preceding sentence shall be applied by substituting "7" for "5".

(5) CONFORMING CHANGES.—

(A) RULES OF THE HOUSE OF REPRESENTATIVES.—

(i) Clause 1.(e)(3) of rule X of the Rules of the House of Representatives is amended—

(I) by striking out "and" at the end of subdivision (C);

(II) by redesignating subdivision (D) as subdivision (E); and

(III) by inserting after subdivision (C) the following new subdivision:

"(D) to report joint resolutions with respect to Presidential orders issued under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985, and to take such other actions as may be required of it under that section; and".

(ii) Clause 4.(a) of rule XI of such Rules is amended by inserting after "Budget Act of 1974" the following: "and on joint resolutions under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985".

(B) STANDING RULES OF THE SENATE.—Rule XXV(e)(2) of the Standing Rules of the Senate is amended—

(i) by striking out "and" at the end of subdivision (C);

(ii) by redesignating subdivision (D) as subdivision (E); and

(iii) by inserting after subdivision (C) the following new subdivision:

"(D) to report joint resolutions with respect to Presidential orders issued under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985, and to take such other actions as may be required of it under that section; and".

(e) BUDGETARY TREATMENT OF SOCIAL SECURITY TRUST FUNDS.—

(1) FISCAL YEARS 1986 THROUGH 1992.—

(A) IN GENERAL.—Section 710 of the Social Security Act (as added by paragraph (1) of subsection (a) of section 346 of the Social Security Amendments of 1983) is amended—

(i) by striking out all beginning with "the" the first place it appears down through "Disability Insurance Trust Fund, the" and inserting in lieu thereof "The";

(ii) by striking out "sections 1401, 3101, and 3111" and inserting in lieu thereof "1401(b), 3101(b), and 3111(b)";

(iii) by redesignating all after the section designation as subsection (b);

(iv) by inserting after the section designation the following:

"(a) The receipts and disbursements of the Federal Old-Age and Survivors, Insurance Trust Fund and the Disability Insurance Trust Fund, and the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954, shall not be included in the totals of the budget of the United States Government as submitted by the President or of the congressional budget and shall be exempt from any general budget limitation imposed by statute on expenditures and net lending (budget out-

lays) of the United States Government."; and

(v) by adding at the end thereof the following new subsection:

"(c) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, or for payments from any such Trust Fund to the general fund of the Treasury.".

(B) APPLICATION.—The amendments made by subparagraph (A) shall apply with respect to fiscal years beginning after September 30, 1985, and ending before October 1, 1992.

(2) FISCAL YEAR 1993 AND THEREAFTER.—Section 710(a) of the Social Security Act (42 U.S.C. 911 note), as amended by section 346(b) of the Social Security Amendments of 1983 (to be effective with respect to fiscal years beginning after September 30, 1992) is amended by—

(A) inserting "(1)" after the subsection designation; and

(B) adding at the end thereof the following new paragraph:

"(2) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to any Trust Fund specified in paragraph (1) or for payments from any such Trust Fund to the general fund of the Treasury.".

(f) WAIVERS AND AMENDMENTS.—Notwithstanding section 904(b) of the Congressional Budget and Impoundment Control Act of 1974, any other provision of law, or any rule or standing order of the Senate or the House of Representatives, no provision of this section, or of any amendment made by this section, may be waived, amended, or otherwise modified except by a joint resolution that—

(1) does so in specific terms, referring to such provision by its designation and declaring that such joint resolution waives, amends, or otherwise modifies such provision; and

(2) is addressed solely to that subject.

(g) Section 1106(a) of title 31, United States Code, is amended by striking out "July 16" and inserting in lieu thereof "September 16".

(h) APPLICATION.—

(1) IN GENERAL.—Except as provided in paragraphs (2) and (3), this section and the amendments made by this section shall become effective on the date of the enactment of this section and shall apply with respect to fiscal years beginning after September 30, 1985, and before October 1, 1991.

(2) EXCEPTION.—The amendments made by subsections (b)(1), (b)(2)(A), (b)(3)(A), (b)(5)(A)(i), and (c) of this section shall apply with respect to fiscal years beginning after September 30, 1986, and before October 1, 1990.

(3) OASDI TRUST FUNDS.—The amendment made by subsection (e) shall apply as provided in such subsection.

Mr. BYRD. Mr. President, I ask for the yeas and nays on the second-degree amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, it is my hope that we can complete action on the debt limit extension this afternoon. I hear rumors from the House side that maybe we ought to have a 5-, 10-, 15-, or 20-day debt extension. We are prepared to vote. We have advised our Members on this side there will be votes today. We have nearly every Member present. We are told by the Treasury Secretary that October 7 is a critical day as far as the debt limit extension is concerned. This amendment is a bipartisan effort. We are prepared to set aside the pending amendment. If there is a Byrd-Chiles amendment or some amendment from that side, we can bring that up, vote on it this afternoon, and then go back to the Gramm amendment, vote on that and any other amendments that may be pending. I have not yet been able to make a judgment whether it is a good idea to pass an extension and let this ferment for 10, 15, or 20 days.

Mr. LONG. Will the Senator yield?

Mr. DOLE. We have the reconciliation bill that we are supported to take up next week. We have a number of appropriations bills, plus the textile bill will come back after reconciliation, plus the farm bill. So it seems to me we have all kinds of work to do.

I am happy to yield.

Mr. LONG. Mr. President, did I understand the Senator to say that he would be willing to pass a mere 5-day or 10-day increase in the debt limit so that we could have more time to consider and to work on suggested modifications of the Gramm amendment?

Mr. DOLE What I said is that I would rather not have an extension unless it was a very short extension. I am not even certain that I would agree to that. We might work that out if we had a time agreement on votes, but if we do not have an agreement to vote, I am ready to vote.

Mr. LONG. Mr. President, let me say something to the Senator as a friend and one who understands his problem. I have not decided just how I am going to vote on the Gramm amendment. It has a lot of appeal to it. I may vote for it, but I want to hear more debate. The way it looks to the Senator from Louisiana, having been in a caucus among Democrats and heard what they are thinking, as well as talking with some Republicans, even if we were to pass the Gramm amendment today—and I do not think it is going to happen, but even if we did—then the House would ask for a conference and that would undoubtedly be a protracted conference. There would be Democrats on the House side, where they are in the majority, who would want to have a Democratic caucus to talk about the matter, and everybody would get their 2 cents' worth expressed at that conference. So by the time you got through with the conference, it would take several days anyway.

My thought for our majority leader is that in any event, you are going to have to extend the debt limit. Assuming that the votes are there for the Gramm amendment, you are going to have to extend the limit temporarily in order to give the people on both sides a chance to work out the details. Even if you passed the Gramm amendment today in the Senate, the House will not act for several days. They will insist on talking about it, understanding it. And as I say, if the Republicans do not hold a caucus to discuss it, the Democrats undoubtedly will. So in my judgment you are going to have to have a temporary extension while this matter is being decided in the Senate and in the House.

Mr. DOLE. I would not want to rule that out. I am willing to listen to any reasonable proposition, but just extending it without any agreement to vote to me would not be a reasonable proposition. If we do not have to have an extension we will see what happens. If the Treasury is right and the seventh is what they described as a drop dead date, checks will start coming back not being honored, then we will see who blinks first in the Senate, whether it is those who do not want to attack the deficit or whether it is those who want to move on to something else. But I would be happy to discuss it with the distinguished minority leader. I know he has had an extensive caucus this morning. We have a lot of people who changed plans to be here to vote on the Gramm-Rudman-Hollings proposal today. Many changed plans to vote for or against many other amendments.

Mr. HART. Will the Senator yield?

Mr. DOLE. Obviously, if they do not want us to vote, we will not vote.

Yes, I will be happy to yield.

Mr. HART. I would like to second what the Senator from Louisiana has said. I think there is a substantial number of Senators, at least on this side of the aisle, who do not know what they will do. And the reason they do not know what they will do is they do not know the consequences of these plans. I can say as one Senator that a plea for temporary delay in voting on these plans is made in good faith. It is not for the purpose of delay, nor is it for the purpose of defeating one or more of these programs. But I think the worst thing the Senate could do is to pass a deficit reduction plan that has consequences for the Defense Department, for senior citizens, or anyone else that we do not

even understand. Part of the reason we are talking about a fundamental change in the budget process of this country is because the process has failed, and one of the reasons those policies have failed is because we did not think out the consequences of them when they were adopted. So let us not compound the mistake by running to a judgment on a plan to reduce the deficit, which we all believe is necessary, because of an artificial deadline created by another measure.

I know there is the thought that if we do not vote today or Monday, we are not going to vote at all. All I can tell the Senator is, as one who is deeply concerned, I want to vote. I want to vote on the Gramm proposal and the Hollings proposal. I want to vote on Chiles. I want to vote on something. But I want to know, unlike 1981, on what I am voting. I do not think we are going to find that out today or Monday; 4 or 5 days with an agreement to vote would be a proposal that I and I think an awful lot of others would jump at. We could get the questions answered and know what we are doing.

Mr. DOLE. Again, I do not have any quarrel with either the Senator from Louisiana or the Senator from Colorado, but we have agreed that on Thursday of next week, the evening of the 10th, to recess until Tuesday, the 15th, with no votes on Tuesday, the 15th, to accommodate colleagues on both sides who will be attending an important international meeting in San Francisco. So it seems to me that we might have until the evening of the 10th to complete action on something. But if it gets beyond that, then we have real problems. Then we are up into a number of things.

Mr. GRAMM. Will the distinguished majority leader yield?

Mr. DOLE. For a question.

Mr. MOYNIHAN. Will the majority leader yield for a question?

Mr. DOLE. Yes.

Mr. MOYNIHAN. Mr. President, the evening of the 10th is a solid week from now. That strikes me as being reasonable for those of us who would like to hear more and learn more in order that we might vote with more information, if not more wisely.

Mr. GRAMM. Will the Senator yield for a question?

Mr. MOYNIHAN. We are going to have to pass a debt ceiling. That deadline cannot be affected. And so if you were to put it off as a matter of comity and as a matter of good procedure, we would respect that.

Mr. DOLE. Again I have not discussed this with the minority leader. Maybe we should do that before we make any judgments. I would be happy to do that as soon as it is convenient with the distinguished Senator from West Virginia. We need to reach an agreement under which we are actually going to have a vote, not just have an extension, I think I did that once. I never did get a vote, as I recall. But if we could package everything, then I think I could reasonably present it to my side and then get it over to the Treasury Secretary and see what we could do.

I would be happy to yield to the Senator.

Mr. GRAMM. Is it not true, Mr. Leader, that our problem is that we do face a $2 trillion debt ceiling, that while we might have the luxury of debating it—of course, we do not want to postpone this problem for a recess—the truth is that the Treasury is running out of money and that adopting this procedure in the Senate is not the end but the beginning; it will then be required for us to go to conference and to meet with the House on this procedure and have the conference come to a determination, which possibly could mean that they would reject it, forcing us to come back and vote on it again before it could go to the House floor. They could produce a compromise which would have to be negotiated. They could take it back to the House and accept it. But is it not true that the problem is that this $2-trillion problem we created in the last few decades is bearing down on us and that our actions are only the beginning, they are not the end, and were we to delay even until Monday or Tuesday to act, we would impose on the conference a very tight time constraint?

Basically, I say to the majority leader, is it not true that we are here to debate this idea, which is a simple idea, which could be presented and on which I could answer questions?

Mr. HART. It is not a simple idea.

Mr. DOLE. I am not sure how simple it is. It depends on one's point of view and how much time they have looked at it.

I would think that would be implicit in any agreement we are talking about, completing it, on both sides.

I have had overtures from friends of mine in the House who think pretty much the same way. Representative FOLEY, a friend of mine, called me last evening. He likes the concept. He thinks it has potential. He would like to take a look at it. He was talking about 10 days, and I was talking about 5 days.

In any event, I think maybe I can discuss some of these possibilities with the distinguished minority leader. But we would like to do it fairly quickly, because it is now 1 o'clock. We are prepared to vote now. Obviously, other people have other ideas. We will not vote if people start talking on the other side, and will not be able to end any extended debate today.

It seems to me that if we adopt the Gramm-Rudman-Hollings amendment, we then go to conference, and we are not worse off. As the distinguished Senator from Texas points out, we would still be negotiating at that time. But, again, I understand that there are some who would prefer not to do it that way, and they can prevent us from voting until we can get cloture.

Mr. WEICKER. Mr. President, will the Senator yield for a question?

Mr. DOLE. I yield.

Mr. WEICKER. Is there any reason why we cannot vote on the debt limit today, a clean debt limit? I just propose that to the majority leader. I do not understand why we have merged two subjects. We could vote on the debt limit on Monday, without getting into these other matters.

Mr. DOLE. I doubt it. I think there is a recognition on both sides of the aisle that the deficit is going to consume us one of these days unless we find a way to reduce it. Everything we have tried is imperfect.

Congress is unwilling to make the tough choices, and now we have an enforcing mechanism to put the burden on the President. He says he is willing to accept it and would like us to act today.

I know that it will make changes in the programs, but if we are concerned about the deficit, that is why we have tied the two together. The debt ceiling has been used throughout the years for causes that were dusted off from time to time, as the Senator from Louisiana knows very well.

Mr. LONG. Mr. President, if the Senator will yield, Senators can sometimes make a mistake in permitting something to pass on the assumption that it is not going to become law. I believe that if we adopt the Gramm amendment, we should be willing to assume that it might become law. That is the object of approving it. I think we should act on the basis of that assumption.

The Senator from Louisiana strongly favors the purpose of the Gramm amendment, but there may be some aspects of it that he will not be happy about when he understands it better. He has heard a lot of consternation expressed by some Senators who are opposed to it and who think it would be a disaster. But insofar as there may be something in the amendment that perhaps should be changed, we should take enough time to know what we are doing, and that is the whole purpose of debate.

So far as the Senator from Louisiana is concerned, he is not trying to keep anybody from making a speech. The Senator from Louisiana thoroughly appreciates the problem of the managers of this bill. The Senator from Louisiana too often pleaded with people to vote for debt limit bills in the past, and has sympathy for the problems the leadership faces. At the same time, he is just looking at reality.

I say to the majority leader that we are not going to pass this bill today. So I strongly urge him to get an agreement to vote, if he can, but also to allow time for debate.

I think it would be wise to do what the House has already suggested, according to the news media, and that is to pass a temporary extension which increases the debt limit, but not pass the $2 trillion mark, and give us a chance to discuss this matter, let both sides explore their fears and their hopes, and come together on something that will be a limitation on spending. The Senator from Louisiana favors that. He hopes we can work out a good proposal.

(Mr. HECHT assumed the chair.)

Mr. DOLE. The Senator from Louisiana has been working with the Senator from Colorado [Mr. ARMSTRONG] for a number of years on enhanced rescissions, and I think most of us want to reach the same objective.

I yield to the distinguished minority leader.

Mr. BYRD. Mr. President, the distinguished Senator from Louisiana has said to the distinguished majority leader that this debt limit package which is now before the Senate is not going to pass the Senate today. It is not going to pass the Senate today, and it will not pass the Senate on Monday. That is not a threat.

I have been in my conference, and I have listened for 2½ hours to a well-attended conference, and the conference is confused as to what is in the pending package. It has just been modified less than 20 minutes ago. I do not suppose any Senator on this side has any idea whatsoever what this modification does.

Mr. MOYNIHAN. None.

Mr. BYRD. Nobody on this side knows what the Gramm-Rudman-Hollings amendment involves now that a new substitute by way of a modification has been sent to the desk. That is No. 1.

No. 2, the distinguished Senator from Colorado [Mr. HART] and others put their finger on the problem.

As I see it, this package, with all due respect to my friend, is a kind of bobtailed, hybrid item veto and a constitutional amendment to balance the budget, combined.

I do not know what impact it is going to have on the farmers; on the old people of this country; on the young people, with respect to education; on COLA's, with the exception of Social Security; on the poor.

Mr. DOLE. On the rich. [Laughter.]

Mr. BYRD. On the rich. That is where Senator CHILES and I come in. We have decided that we would try to do something on this to make those corporations and very high income taxpayers, some of which and whom, respectively, do not pay any Federal income taxes now, do so.

So I say to the distinguished majority leader that I hope he will consider extending this debt limit a week or 10 days, with whatever figure as a ceiling would be required to put us out to that point, and let us have a little more time to work together on this and see where we go. I think we should take a little time and let this saucer cool, so that we can more clearly see what the effects of these amendments will be.

So I say to the distinguished majority leader that I will be glad to sit down with him. We can sit down together and try to work out a simple extension which will take us to a week or 10 days from now. Once we have some time, we can establish what is really involved in the Gramm amendment—what impact it is going to have on the poor, the rich, the downtrodden, the young people of the country, the farmers of the country, the coal miners, the black lung recipients, and so on. We had better slow down a little and take more time to study so as to have a better understanding of what the amendment does, and be guided thereby.

Mr. DOLE. I thank the distinguished minority leader.

I think we are on about the 1-inch line, and somebody wants to call timeout. That is essentially what it is. We are about ready to score, and they say, "Let's call a timeout and maybe find a way to derail this team that has come charging down the field." They do not want a little timeout. They want a long timeout, and maybe they can change the weather or the playing field and bring in the widows and the orphans. They left those out.

Mr. BYRD. The Senator talked about a train or a football field. There is a train bearing down upon us, and it is an accident waiting to happen; and when that train goes off the track, we are going off the track with it. And who will get hurt? The farmers, the young people who want an education, black lung recipients, railroad retirees, civil and military retirees, those in need of health services, VA medical care, and so on.

Let us study the amendment. With a little time, we will be able to act with more wisdom.

Mr. DOLE. We have been acting with wisdom around here so long. That is why we have the $2 trillion debt. That is the part that worries some of us.

We have a little change in routine around here and everyone goes off the track.

This amendment may not be perfect. People are starting to read it and they are finding little things they do not like about it and a lot of things they do like about it.

I think we all should have an opportunity to study it carefully.

If we can figure out some way to vote while we extend the time, that would be all right. But I would not agree just to extend the time and have a big time out for 10 days while we try to figure out how to kill this amendment or water it down or weaken it so it does not amount to anything. If we are not careful we will end up with a sense-of-the-Senate resolution that we should reduce the deficit.

Then everyone votes for that can put out a press release and we blame the President. But the deficit keeps going up.

The President is on board. He said we should do it today. He is willing to make the decisions he will have to make under this procedure.

My view is we should go ahead and debate the amendment this afternoon and have three or four votes of one type or another for Senators kind enough to stay in town, and see what we can work out.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. BYRD. What are we going to vote on?

Mr. DOLE. We will figure out something.

Mr. BYRD. It is not that easy, unless the Senator wants to move to table his own amendment.

Mr. DOLE. We thought of that.

Mr. BYRD. We might have a vote on getting the Sergeant at Arms to bring in absent Senators.

Mr. DOLE. We thought of that.

Mr. BYRD. What I am saying to the distinguished majority leader is meant to help him. We are not going to act on this today. The amendment was just offered in midafternoon.

Mr. DOLE. We are not going to act on it Monday. Pretty soon people are going to ask why we do not act on it.

Mr. BYRD. Let us pass a temporary extension.

Mr. DOLE. The Senator worries about all those people he just discussed or itemized who are not going to be getting checks or the checks are not going to be honored one of these days, and it is not going to be blamed on this side. We are prepared to vote.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. BYRD. We are not prepared to vote. We are not prepared to bring the sword of Damocles down on the poor, on the young, on the old, on domestic and defense programs. We are not prepared to act on this amendment today. We are not buying a pig in a poke.

We can get together and work out a little extension that will give us time to understand what the amendment does.

Mr. BIDEN. Mr. President, will the Senator yield for a question?

Mr. DOLE. I yield.

Mr. BIDEN. I am a bit confused. I thought this comment by the Senator

from Connecticut was the most cogent and pertinent comment made today, and that is if the Senator from Texas is correct, what is breathing down on us is that $2 trillion number, and we have to do something to keep the Government rolling. We can accomplish that very easily without avoiding in any way determining whether or not we are on the one-inch line about to score or on the one-inch line about to go over a cliff. I do not know that. We are playing in the dark. That is the problem.

So I am confident we are on the 1-inch line. There is no question about that. I just do not know whether that 1-inch line brings me 6 points or puts me under 6 feet. So my concern is——

Mr. DOLE. The Senator might fumble and I could fumble.

Mr. BIDEN. I could fumble. I have observed a lot of fumbles around here.

Mr. DOLE. We do a lot of that around here.

Mr. BIDEN. We all do, and I have fumbled before, and it is not that I doubt the abilities of the Senator from Texas to be a quarterback, but he looks more like a lineman to me, and I am a little concerned about whether or not he is now quarterbacking my team.

I guess what I am saying is I may end up voting for the proposal of the Senator from South Carolina. He argues it as fervently as the Senator from Texas. But the fact of the matter is we have a number of Democrats who support the Senator from Texas and a number of us who are, quite frankly, more concerned about the deficit, very bluntly, than we are about the poor. I, quite frankly, think if we do not take care of the deficit we do not have anything to worry about with the poor. It is gone.

So it all depends on our perspective.

But the question is the lights are out. We can keep the Government going by just going on for a few days. We can, in fact, in no way derail the train that the Senator from Texas and the Senator from South Carolina are engineering right now. We can deal with that.

But again just give us time to turn the lights on to find out whether we are on the 1-inch line about to go over a cliff or on the 1-inch line about to score.

Several Senators addressed the Chair.

Mr. WEICKER. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The majority leader has the floor.

Mr. DOLE. Mr. President, I am going to yield the floor in a moment. We are prepared to vote and put the question and go ahead and let someone else start debating, if what we want to have is a debate, and not the editorials that I am guilty of and others. But hopefully we can get to a vote.

Now the minority leader tells me we are not going to vote today. Based on his statement, obviously, we are not going to vote today. But I think we at least should discuss it and indicate to the American people that we were trying to resolve it rather than having everyone take off.

So I think we should discuss it for a full afternoon and let people know if the debt ceiling is not extended at least all of us Republicans and Democrats were here in a serious debate trying to address a very serious amendment. This is a serious amendment. It is a change. It is a drastic change. It forces action, as the distinguished chairman of the Budget Committee indicated yesterday. Some of it we may like and some of it we may not like. But none of us appear to like the deficit.

I think probably what I should do is yield the floor to the managers on this side and that side and maybe the distinguished minority leader and I could confer.

Several Senators addressed the Chair.

Mr. WEICKER. Mr. President, before the Senator does that, will the Senator yield?

Mr. DOLE. Let me yield to the Senator from Connecticut.

Mr. WEICKER. Mr. President, there are two comments I wish to make.

Mr. JOHNSTON. Mr. President, a point of order.

Mr. WEICKER. Mr. President, I believe the majority leader yielded to the Senator from Connecticut.

Mr. JOHNSTON. Are we under time constraint or can the majority leader yield the floor?

Mr. DOLE. I yield for a question.

The PRESIDING OFFICER. We are not under time constraints.

Mr. DOLE. I yield to the distinguished Senator from Connecticut for a question.

Mr. WEICKER. Mr. President, the problem I have, and I asked the majority leader because he was there with me—I do not attend many functions around the city of Washington, and indeed I almost attend no functions in the White House because I am never invited. But I did attend the breakfast the other day, and if I am not mistaken the whole purpose of the breakfast was a fervent plea by the President of the United States that we should have a clean debt limit.

Now here I am ready to step in the line of march and be a good soldier, which most of the time is not the case. I am told no, we are not going to have a clean debt limit, the circumstances change, but they certainly have changed from breakfast on Wednesday, or whatever. I was told we were going to have a clean debt limit. I want to vote on a clean debt limit. That is what I think we should do.

I also have great respect for Senator GRAMM and Senator RUDMAN. They have a good idea here. But it seems to me that is totally separate and distinct from this other obligation which we should discharge today, a clean debt limit.

The question has to be asked, do we have the power right now to reduce the deficit? Could we raise taxes? You bet your life that we are able to do that. We did that the last several years while all of this was going on. We can do it but do not do it. We could cut defense spending. We do not do it. Or we could reform the entitlements. We do not do it.

All the power is here right now to do what needs to be done.

But I will tell you any other piece of legislation that comes down the pike, whether it is this or a balanced budget amendment or line item veto, its a legislative substitute for the guts which we do not have to do what needs to be done. It is as simple as that.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I do not disagree with the Senator from Connecticut. In fact, the point I made is we are not going to do it. Congress is not going to do it. We have demonstrated that in the last budget folly we had.

I must say the Senate made some rather difficult choices in terminating programs, attacking COLA's, including Social Security. About 80 percent of this body on both sides at one time or another voted to freeze Social Security benefits. It was bipartisan. But that was not the mood in the House of Representatives or the mood in the White House. So that did not happen.

It seems to me that having failed repeatedly we should try something that might work that will force action.

But I am not going to stand here and say it should not be discussed. I am just saying we are prepared to vote but if others want to discuss it then I would hope that we could get on to discussing it.

Mr. President, I suggest the absence of a quorum.

Mr. BYRD. Mr. President, before the Senator does that, will he withhold and yield to me?

Mr. DOLE. Yes.

Mr. BYRD. Mr. President, Senator have been under the understanding that there would be some votes today and I would suggest to the distinguished majority leader that we could have a vote on Mr. James C. Miller III to be director of the Office of Management and Budget, and I would be willing to agree to vote in 10 minutes on that nomination if he would like.

Mr. DOLE. I would like to do that and that would give us a little time during the vote to discuss what we might do during the remainder of the afternoon.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, I believe that the pending amendment constitutes one of the greatest exercises in self-deception and wishful thinking that I have seen on the floor of this Senate in a long time. And I say that, Mr. President, coming from the same place that the authors of this amendment are which is to get us to a balanced budget, and do it quickly. Lest I be accused of being one of those big-spending Democrats, please look back at the record of who has been in favor of cuts. I have been for cutting across the board, including entitlements. I have faced up to those things. I have faced up to taxes. I faced up to all the rest. So please understand where I am coming from. But, Mr. President, I believe that this piece of legislation—of which I have only gotten a copy in the last day or two—is the most far-reaching, the most horrendous, the most damaging to the constitutional processes, and the most extreme piece of legislation I have seen here in the Senate in 12½ years. It is nothing less, in my judgment, than legislative Armageddon. I think we ought to understand, Mr. President, what this does and what it requires us to do.

First of all, Mr. President, it says we balance the budget by cutting budget authority by one-fifth of the amount of the deficit in each of 5 years. If the deficit is about $200 billion, as I believe it is, then that means you cut about $40 billion each year. Mr. President, my colleagues should understand what a $40 billion cut means. First of all, it does not mean a $40 billion cut in budget authority. It means a $40 billion cut in outlays in current year outlays. And we all know that with outlays you have to cut 1½ to 2 times the amount of budget authority to get one dollar of budget outlays, and maybe even more than that when you try to get the effect in the same year.

So we are talking about having to cut maybe $60 billion—maybe $80 billion—in budget authority the first year, to get $40 billion in outlays. We say we cut $55 billion this last year. Well, we all know, Mr. President, that was mostly smoke and mirrors or to a large extent smoke and mirrors. But even to the extent it was not, that was not a $55 billion cut from last year's budget deficit. Rather, that was a $55 billion cut from certain extension or targets—the Rose Garden numbers or the CBO baseline. And they were not cuts in actual budget authority over last year. If you add up what we actually did this year, or what we will be expected to do if we live up to what the budget resolution says, then we will end up with maybe $20 billion in net cuts in the deficit.

So let us be clear, Mr. President—that this proposal is over twice as stringent as what we have done in the current year. That is No. 1. Mr. President, No. 2, on this matter the President has 14 days within which to come up with a Presidential order, and that is effective immediately. The President will lay down his order. It becomes effective at that point. It will have no congressional review. It will simply be effective.

Mr. President, there seems to be no limit on the authority that the President has. The President, at the top of page 20 of the modified amendment it is stated that the President shall take such action under subsection (d)(2) "as is necessary to ensure that the deficit for such fiscal year does not exceed such deficit amount." He shall do whatever is necessary. The only limitation, Mr. President, is that if he modifies or changes entitlements which would result in spending increases, that modification or that change in law can be effective for only 1 year. Apparently he may change laws across the board, modify laws across the board if that in his judgment is "necessary" to ensure that the deficit does not exceed the maximum amount.

I believe if my interpretation of that, Mr. President, is correct. I can tell this body that is what the language says because I quoted it exactly.

Second, Mr. President, this automatic increase which the President shall order shall go into effect and may be overcome if the Congress acts, and that action of the Congress will itself be subject to a Presidential veto. The President may not, of course, put in taxes. So all of the $40 billion reduction, if that is the figure, must come from spending cuts.

Mr. President, $40 billion in outlay spending cuts may not sound like a lot of money until you figure what is untouchable. In this act itself, we know Social Security is untouchable, and we know that prior year contracts by their nature are untouchable. In the Department of Defense alone there is $109.2 billion according to OMB which are prior year contracts. That is untouchable. We know that across the board there are a huge number of untouchables. For example, about 14 percent of the budget is untouchable because that is interest on the debt. We also know that defense contracts, for example, are roughly 11 percent. By the time you go through the untouchables, not just those that are specified in the act, but those which are untouchable by their nature, you end up with most of the budget being off limits and with only about 20 percent at most which can be touched by the President, and no taxes at all that can be put in.

So what you would have is an automatic cut of $40 billion, if that is the figure, in outlays which must occur on about 20 percent of the budget, must be effective immediately, and which the Congress cannot overrule unless they act by both Houses and unless they overcome a Presidential veto if he should exercise that veto.

Mr. President, the Gramm proposal provides that one-half of the cuts come from automatic spending increases, not including Social Security, but that this may not go beyond zero. The other one-half would have to come from the so-called "controllables." I doubt, Mr. President, that it is possible to get one-half of a $40 billion outlay decrease from automatic spending increases. I doubt that. And you cannot go beyond zero. So that part—the difference between zero and the one-half—would have to come from the controllables. So there would probably be more than the $20 billion that would have to come from the controllables. What is controllable and what is uncontrollable is determined by the President, or more accurately, by OMB.

Indeed, the only reference to these nonword's of art, controllable and noncontrollable, is in this statute itself which refers to OMB documents for definition.

So OMB has full authority to determine what is controllable and not controllable. So, in effect, the President has carte blanche authority as to where to take his cuts.

Mr. President, when you read this provision fast, it is easy to say that he must cut across the board because it says that expenditures must be uniformly cut. On page 24 it states that each relatively controllable expenditure is cut by a uniform percentage.

Mr. President, the word "expenditure" or "controllable expenditure" is, again, not a word of art.

So this would give to the President the authority to pick and choose among projects, programs, activities, and budgets where he would want to make his cuts. By moving around a project from one activity to another, by considering one subitem as not being an expenditure, the President has full authority as to how to make his cuts. For example, is the DOD budget one expenditure, or is each line

item in the budget an expenditure, or is a project which may come within a line item an expenditure? It is not defined in this act. So that power alone would give the President a super colossal line-item veto. Not only would he have the line-item veto authority, he would also have the right to specify what in itself is a line item because there is no restriction upon his ability to say what is an expenditure.

Let me give an example, Mr. President. I am the acting ranking minority member on the Interior Appropriations Subcommittee, and also on the Energy and Water Appropriations Subcommittee. In both those budgets, there are a large number of projects, such as clean-coal technology, the building of dams and many other subitems. Under this authority, the President could completely "X" out, completely stop spending on any of those subprojects, whether it be the $75 million which we just put in for clean-coal technology or money for any dam anywhere or any set of dams anywhere in the country. He could completely eliminate those while leaving in 100 percent of the funding for other projects and say, well, that is not an expenditure; the expenditure is the overall line item in the appropriations bill itself for all dams. Or the expenditure is the overall Interior budget. Or the expenditure is the overall budget function, function 270 in Budget Committee lingo.

What I am saying, Mr. President, is that it is very clear from this bill that the President can pick and choose what he wants to cut and what he does not want to cut so that he would, in effect, obtain the legislative power of this body. He would get the appropriations power of this body, and there would be no check upon that power save the ability of both Houses of Congress to pass a law which he would not overrule, or the ability of both Houses to muster a supermajority to override such an action.

Mr. President, if you consider what we have done in terms of cutting—and I would have cut a little further than we cut, as a matter of fact—you find how big this $40 billion cut would be if it is put all on discretionary nondefense items. And many of those cuts which we made this year are one-time cuts. For example, the strategic petroleum reserve has been eliminated in effect. It can be eliminated only once. Revenue sharing, in effect, has been eliminated. It can be eliminated only once.

You can cut Medicare—again, we cut it $2.6 billion this year, but it is hard to continue to do that. It is hard to continue to cut all of those discretionary nondefense items—15 to 20 percent of the budget—because there gets to be an absolute zero. I am sure many of them would have to be totally eliminated as budget functions under this act.

Mr. President, we are operating under a constitution. That Constitution clearly sets up a division of powers between the legislative and the executive branches. I have very, very serious doubts that the Gramm amendment or any variation of that theme can pass constitutional muster. I recognize that we rarely argue constitutional law on the floor of Congress because there is no court here; we are our own court as far as the passage of legislation. But, Mr. President, we have here an abdication of power and an abdication of responsibility by Congress. What we would end up doing under this proposal is giving to the President the total power of appropriation—that is to say, to decide what gets funded and what does not get funded—without restriction, without any limitations. And he would do this, his order would come down on November 1. Next year, I suppose when we would be in recess for the election. And somehow, I guess Congress thinks that by giving it to the President, we can avoid responsibility and that we can avoid our constitutional duties. I do not believe it would pass constitutional muster, Mr. President.

In the recent Chadha decision of the U.S. Supreme Court, where they outlawed the legislative veto, the Court went on at some length about the separation of powers between the congressional and the executive branches and pointed out that it simply is not constitutionally possible for one branch of the Government to exercise the duties of the other. As modest as the legislative veto was in terms of a delegation of executive power, the Supreme Court said it could not be done. How much further this matter goes than does the legislative veto matter.

This, Mr. President, is nothing less than a total abdication, in my judgment, of legislative power. If this were the only way to get at the problem of deficits, it would be different, Mr. President. But at the appropriate time, I shall propose an alternative. What my amendment will do is adopt the same mathematics that the Gramm amendment has, will provide that the President must submit to Congress an order for cutting spending in the same amount that the Gramm amendment provides.

Mr. President, there is a difference, because after the President's proposal is submitted under my amendment, it shall then be sent to the various committees, including Ways and Means in the House and the Finance Committee in the Senate, and should there be considered by those committees under a 10-day limit—10 days while Congress is in session. Thereafter, those committees would report back to the Budget Committee. If they fail to act, then the Presidential program would be considered as approved by that committee.

The Budget Committee would then package up this set of proposals, including whatever proposals from Ways and Means or the Finance Committee, including revenue mesasures, were recommended. The matter would then be reported within 3 days and then, under Budget Act limitaitons, it would be considered on the floor of the Senate and on the floor of the House.

Action is forced under Budget Act procedures, under a strict time-limit, nongermane amendment provision, so no filibuster could occur. Then Congress would finally vote and a measure would be passed or not passed, depending upon whether the votes were obtained.

Under my proposal, Mr. President, if Congress failed to act finally by December 31, then the President's order would go into effect. But if Congress did act by December 31, finally act, then the President's order would be suspended. The principal differences are, Mr. President, that under my proposal, Congress would have the power and the authority and the ability to act first, before the Presidential order went into operation. Second, Congress would have the power and ability to consider revenues as part of that package. Third, Congress would not have to meet any particular target save the time target of December 31.

It seems to me, Mr. President, that to subject the Congress to an artificial target involving budget outlays is an unwise matter. Those of us on the Budget Committee know that it is very difficult to reach outlays in the first year. If you want to make a basic reform, for example, in, let us say, a retirement system, you can make a basic reform that will save billions of dollars over time, but retirement system reform will give you almost nothing in outlay savings in the first year. So it is with many budget functions. They simply cannot be effected in terms of outlays the first year.

Accordingly, Mr. President, it seems to me very unwise for us to pick an outlay target for the first year that is a big outlay target when we know either that that cannot, as a practical matter, be achieved, or second, it would be unwise to do it because it would not be good policy to try to achieve that much outlay savings as opposed to budget authority savings in any particular year.

Accordingly, Mr. President, if the President, in accordance with a proposal of both Houses, will act, then that ought to be the policy of the Nation as opposed to an action of the President which is at odds with the proposal of both Houses.

Mr. President, I opposed the line-item veto for the same reason. In my

judgment, this is much, much worse than the line-item veto, because there is no restriction in this instance on the power of the President.

Mr. President, if my colleagues think that this legislation is as bad as I think it is—and I think there are some who do—may we have order, Mr. President?

The PRESIDING OFFICER. The Senate will be in order.

Mr. JOHNSTON. Mr. President, if this legislation is as bad as I think it is, and some of my colleagues share that view, then I can tell my colleagues it will not be passed this afternoon. We have had very little time to see it. It has been available in its final form only for a matter of hours. It is one of the most far-reaching pieces of legislation that I have seen since I have been in the Senate and we cannot and will not consider it this afternoon. We need more time. We will have more time if some of us have to be here to artificially make that time by talking.

This is no time for the Senate to get in a position of hostility. We need to solve this budget problem, to think rationally and coolly and at some length about how we are going to do it rather that to trot out one of the most far-reaching pieces of legislation ever to hit this floor, try to pass it in just a couple of hours, with little debate and not 1 hour of hearings—and then have everybody read it later and find out what it does.

Mr. MATTINGLY. Mr. President, will the Senator yield?

Mr. JOHNSTON. I will yield for a question.

Mr. MATTINGLY. When I came on the floor, I heard the Senator say this is worse than the line-item veto. Does that mean he may reconsider his position on line-item veto?

Mr. JOHNSTON. Does he ask if I may reconsider if it is as bad as this? I do not think it is as bad as this now. It is unlikely I shall ever be for the line-item veto legislation.

Mr. President, I would like to work in cooperation with the distinguished Senator from Texas, who is trying to solve a very difficult problem. I may come out on the same side of his proposal with respect to those items which need to be cut. But with respect to this machinery. I think it is a very bad idea and it will not pass today.

Mr. President, I ask unanimous consent that an amendment previously referred to be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

For subsection (b) beginning on line 7, pg. 24 and continuing through line 2 on page 30, substitute the following new subsection.

(b) PRESIDENTIAL SUBMISSION.—

(1) CONTENTS.—

(A) Upon receipt of any report from the Directors under subsection (a) identifying an amount by which the deficit for a fiscal year will exceed the maximum deficit amount for such fiscal year, notwithstanding the Congressional Budget and Impoundment Control Act of 1974, the President shall submit a joint resolution which will, if enacted, reduce such excess. Such joint resolution shall contain revenue increasing or spending reduction recommendations, or both. Such spending reduction recommendations may be accomplished only by a uniform percentage reduction with respect to each program, project or activity, but reductions in benefits under Title II of the Social Security Act, in existing formal contractual obligations, and in revenue-producing programs (if a spending reduction would be more than offset by lost receipts produced by such spending program) shall not be included in the joint resolution submitted.

(B) Such joint resolution shall identify

(i) the total amount and the percentage by which relatively controllable spending programs are to be reduced;

(ii) the total amount of budget authority and percentage reduction with respect to each such relatively controllable expenditure which is required.

(iii) the account, department or establishment of the Government to which each amount of budget authority specified under subdivision (ii) would be available for obligation (but for such joint resolution), and the specific project or governmental functions involved; and

(iv) full supporting details with respect to each action taken under subdivision (i) or (ii) of this section shall be provided along with the submission of the joint resolution.

(2) DATE OF SUBMISSION.—

The President shall submit such joint resolution and full supporting details required in paragraph (1) not later than 14 days after the transmittal of the report of the Directors.

(3) SUSPENSION.—

This subsection shall not apply to any fiscal year for which a declaration of war is in effect.

For subsection (c) beginning on line 3, page 30 continuing through line 22 on page 31, substitute the following new subsection.

(c) CONGRESSIONAL ACTION.—

(1) DEFINITION.—

For the purposes of this section, the term "day" shall mean any calendar day on which either House of the Congress is in session.

(2) INTRODUCTION.—

A joint resolution under subsection (b) shall be introduced (by request) by the majority leader of each House of the Congress on the day on which it is submitted and shall be referred on such day to the appropriate committee or committees of each such House. Such resolution shall be referred to the House Committee on Ways and Means and to the Senate Finance Committee whether or not such resolution recommends revenue increases. If such resolution contains provisions under the jurisdiction of more than one committee, the Parliamentarian of each House shall refer the resolution to the appropriate committees of jurisdiction.

(3) COMMITTEE CONSIDERATION AND REPORTING.—

A joint resolution referred pursuant to paragraph (2) shall be reported within 10 days of referral to the Committee on the Budget of each House.

(A) Each such committee may modify in whole or in part any provision within its jurisdiction referred to it, may report alternative savings in a similar amount or may report a substitute. Any modifications, alternatives or substitutes reported must be within the jurisdiction of the reporting committee as defined by the rules of each House. No matters not directly related to reducing excess deficits shall be included in such modifications, alternatives or substitutes.

(B) If a committee fails to report within 10 days, such committee shall be immediately discharged from further consideration of the joint resolution and the joint resolution shall be considered as if favorably reported to the Budget Committee.

(C) The Budget Committee, upon receipt of all recommendations from the committees, or in the case of discharge of the President's recommendations, shall report to its House the joint resolution carrying out all such recommendations within 3 days.

(i) In the event that two committees report differing recommendations on the same subject matter within their respective jurisdictions, the Budget Committee shall, if unable to reconcile the conflict, report a substitute for said provisions. Such substitute shall be within the scope of the two recommendations reported to it.

(ii) In the event that any committee reports any measure described in the last sentence of subparagraph (A) to the Budget Committee, the Budget Committee shall strike such matter from the resolution it reports and shall report which provisions have been so stricken. (iii) When reported, such joint resolution shall be immediately placed on the appropriate legislative calendar for further consideration.

(4) PROCEDURES.—

(A) IN GENERAL.—The provisions of section 305 of the Congressional Budget Act of 1974 for the consideration of concurrent resolutions on the budget and conference reports thereon shall also apply to consideration of joint resolutions reported under the above subsection and conference reports thereon.

(5) TIME LIMIT FOR CONGRESSIONAL ACTION.—If by midnight of December 31st of the year in which such joint resolution has been timely submitted by the President, the Congress fails to complete action on such joint resolution, then the President's recommendations with respect to spending reductions shall become effective immediately.

Strike subsections (d) and (e) beginning on line 23 on page 31 continuing through line 21 on page 34.

Strike Sec. 5 beginning on line 22 on page 34 and insert instead the following new section.

SEC. 5. EXERCISE OF RULEMAKING POWERS.

The provisions of the above section are enacted by the Congress—

(a) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(b) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

Mr. GRAMM addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Mr. President, let me begin by lamenting the fact that some who, a minute ago, were so eager to know what is in this bill, who found it impossible to proceed with the Nation's business, who thought that a $2 trillion deficit should not cause us to pause in our process of a recess coming up next week, that they were so concerned about finding out what was in the bill that they are gone; they are not here to give me an opportunity to explain it. But I am going to explain it very briefly.

Before I do that, let me make note of where we are. We are hearing the same old siren song, Mr. President, that we have heard for a decade. Deal with the deficit, deal with the problem, but do not do it now, not this vehicle, not this proposal. There is another proposal. I am for one. The day will come when I will support it but not now. We ought to go ahead and raise the debt ceiling, they say, go ahead and pay the bills and we will deal with the problem.

But that has been the siren song for a decade. We have not dealt with the problem. The Federal debt that we will be voting on is twice what it was 5 years ago. There is a crisis, and the crisis demands action. The action is before us today in a simple, straightforward, easily understood proposal. The proposal is not perfect because it was written by people who are not perfect, and it will be implemented, if adopted, by people who are not perfect, but the proposal is straightforward, balanced, and simple.

Finally, Mr. President, I am not going to vote for an increase in the debt ceiling for an hour or a day or a week or a year unless we deal with this problem. And I am hopeful that the President will not sign a debt ceiling increase for an hour or a day or a week or a month or a year unless we do. I think the analogy of the distinguished majority leader is a very good one. Those who want to go on with business as usual are ahead in this football game, but they fumbled on our 2-yard line. We had not been doing a very good job of controlling spending so we have decided not to pass.

We fumbled too many times to pitch it. So we started running quarterback sneaks up the middle, and with the clock running out next Tuesday or Wednesday, we are now on the goal line. And so what do they counsel? The number of time outs is all used up. They have been using time outs for the last 10 years as the deficit has gotten greater and greater.

They whisper across the line to us, after we have driven the ball 98 yards in 10 years to try to bring the agenda of the American people to the floor of the Senate and make it the agenda of the Congress, "Psst, boys, call time out, call time out, let's debate this thing, let's have a cooling off period. Let us look at it. We want to look at it very closely. It is an interesting idea, clever idea, good idea, let's look at it, let's study it, let's debate it, let's set up a commission, maybe a bipartisan commission." The opponents of this proposal say, "Oh, the poor, the sick, the tired, the bicycle rider." They are all deeply concerned. All the people riding in the wagon say, "Raise the debt ceiling, full speed ahead; don't worry about the deficit."

Well, let me assure those who want a timeout that there is not going to be a timeout. We have an opportunity on this debt ceiling to do something we have never done before. The debt ceiling is for all the people in the wagon. All the people benefiting from the Government can say, "Great, when we pass the debt ceiling and it is signed, the money is coming on." We have an opportunity here not only to do what we ought to do for the people riding in the wagon, pay our bills—I am for that—but we have an opportunity to do something for the people who are doing the work, paying the taxes, pulling the wagon. That is what this amendment is about.

Now, we hear great consternation about how this process works. And I want to go over it as simply as an old schoolteacher can do it and as briefly.

The idea is straightforward. First of all, we note what the deficit is. It is not $171.9 billion. That is what we claimed it was in a budget that has rosy assumptions and phony savings, so we give it $9 billion above what we have adopted in a budget before we even think about instituting any kind of across-the-board reductions. We take that $180 billion and we calculate some pretty simple arithmetic—in fact, I do not know a first grader in America who could not do it.

If you take $180 billion and you reduce it in five equal increments, how much do you have to reduce it each year to balance the budget in 5 years? Thirty-six billion. Every first grader in America would say $36 billion. Not very confusing. Then we say the President shall not present to the Congress budgets with deficits greater than that amount. Pretty straightforward. It shall not be in order on the floor of the House or Senate to bring a budget to the floor if that budget has a greater deficit than this maximum allowable amount. Still pretty straightforward.

On the floor of the House and Senate, all amendments are zero sum amendments. Now, that gets more complicated. What it means is that if you want to raise money in a mother's milk program, you have to kill off a hog somewhere else in the budget. If you want to raise spending in one area, you have got to cut spending in another or raise revenues. If you want to cut somebody's taxes, you have to raise somebody else's taxes or you have to cut spending. That is what a zero sum amendment is. We all have talked about it over the years. We have just never enforced it.

Mr. JOHNSTON. Will the Senator yield at that point for a question?

Mr. GRAMM. I will yield when I get to the end because I do not want to get lost on a side issue in trying to present the overall program.

Now, once the budget is adopted, we do something we have never done under the Budget Act. We make it binding down to the subcommittee levels. And I know there are those who serve on committees that make these allocations and add these programs that do not like that. And I understand it. When we are enforcing it on Armed Services and Banking, I may not like it either but I can assure you the American people like it. We make the budget binding down to the 302(b) levels, which means that if you are going to bring a bill to the floor of the Senate, if that bill contains a new entitlement or an expenditure that violates the allocation for that area, that bill is not going to be in order. You are not going to be able to bring it to the floor for consideration.

Now, before we have said, "This is a binding budget." The American people will think that means something, but the reality is the only number that is binding under the current Budget Act—which was really written to force Richard Nixon to spend money, not to control the budget—the Budget Impoundment Act was aimed at forcing spending, not controlling it. The only figure that is binding is the aggregate budget authority figure. So what do you think happens? We spend and spend on controversial programs and then we get down to the end and it just so happens that the thing that breaches the budget is the thing that everybody has to vote for, mothers' milk, things that have tremendous political bases. And we pass in the House a rule that says we waive the Budget Act. In fact, either House can do that.

Now, we do not do that any more under this 5-year emergency bill. When you write a budget and you allocate it down to the 302(b) levels, that budget is binding. Now, we have some flexibility in there. If we have to change spending in one area, the Appropriations Committee can reallocate it. But they have to certify that it will not cause the deficit to rise, that they will take action in the future. And of course we trust the Appropriations Committee.

Now, once the budget is adopted, it could not be sent over by the President unless it was within the limit. It could not be brought to the floor unless it was within the limit. We made amendments on a zero sum gain basis so it did not go up. Now we have imposed it down to the subcommittee

level. So we are within the target if we adopt a budget. Now, why would you end up being over, why would the deficit end up being bigger? Well, No. 1, you could have economic assumptions that were either phony or did not turn out to be right. You could have false savings. You could have different spending rates. I cannot think of another major reason why you would be over.

Come October 1 of next year—let us talk about one full cycle—the Directors of OMB and CBO are required to report jointly to Congress and to the President on what the projected deficit is. If they cannot agree, we take the midpoint of their two projections. If that projection is 5 percent above the maximum allowable deficit, which would be $144 billion next year, then they report to the President and to Congress the percentage by which you would have to reduce or sequester all automatic increases in the budget and relatively controllable expenses. This is where it gets a little tougher, but not much.

First of all, let us remember that entitlements are driven by eligibility. Entitlements are driven by the number of people who qualify, who meet eligibility requirements, and what they are eligible for. So we cannot reduce an entitlement by simply saying we reduce across the board.

I would like to see the guy at the hospital, when my mama goes into the hospital in September for her Medicare, who says, "Well, I'm sorry, but we ran out of money." She is eligible. She is going to get that medical care. Under this emergency bill, she is going to get that medical care.

So entitlements that are driven by eligibility set by the Federal Government will not be affected in those benefits by this bill. They may be altered by a budget that Congress adopted, but this across-the-board sequestering will not affect it.

What is affected, however, is any built-in, automatic program. Those are programs that are indexed, indexed to inflation.

This bill takes Social Security off budget. So if you want to debate Social Security, go to the museum, because that debate is over. We are taking Social Security off budget. We cannot drag that dead cat across the table again. The President cannot submit a budget that says anything about Social Security. It is not in order for the Budget Committee to bring a budget to the floor that does anything to Social Security. Social Security is off budget and is a free-standing trust fund.

However, every other cost-of-living increase would be sequestered across the board until half of the overage is eliminated. You cannot take the cost of living below zero. So if you use it up, what is left over shifts over into the next spot, which is budget authority, obligational limits, and loan limits.

A big question has been raised about what is included here and what is not included. What is included here is everything that is not an entitlement in the strict defintion of entitlements.

There is one additional problem you run into, and that problem is that the Government has made some contracts out there. We signed a contract with a plumber and agreed to pay him a certain amount a month to go around and fix the plumbing in HUD housing in Dallas. We cannot go in and invalidate that contract. But when the contract expires, we can change the amount of money we are spending in that area.

What is cut across the board? What is cut across the board in obligational authority, outlays, and loan authority are line items within the budget. What are these line items in the budget?

Some people have said, "Maybe you are talking about the budget for defense. What if Reagan cut defense across the board and then Weinberger decides where to cut it?" What if he shut down Fort Hood? What if he eliminated the F-16? It would be pretty rough on this Senator from Texas. But what are these line items?

Let me take agriculture, beginning at the top: timber purchase, road construction credits, national forest fund. That would be reduced in a sequester of $10 billion where, let us say, you got three or four out of the index programs. That might be reduced 0.02 percent.

Mr. JOHNSTON. Mr. President, will the Senator yield at that point?

Mr. GRAMM. I want to get through the whole thing. I am sort of wound up here. At the end, I will try to answer a couple of questions.

So, in timber purchase, road construction credits of the national forest fund, there would be an across-the-board 0.02 percent cut.

We do not go out and say, "You boys who are paving this road here, put 99.8 percent of the asphalt you are going to put on there." We do not say that. We just cut that fund. So people who are doing these highways have had 0.02 percent of their funds cut, and they decide where they are going to cut it.

Let me give some others. Office of the Secretary: We are not going to go in and say to the Secretary of Agriculture:

> We are going to force you to make fewer Xerox copies by 0.02 percent or fewer telephone calls by 0.02 percent; and if you have a money changer on the toilet, change that.

We are simply saying, "Your budget is cut by 0.02 percent."

It is true that then the Secretary of Agriculture is going to figure out whether he needs fewer Xerox copies or fewer telephone calls. If you are working for Xerox and he thinks he may send back a Xerox machine, that is discretionary power, and you ought to worry about that.

The Office of General Counsel: Same deal.

Buildings and Facilities: Same deal.

National Agricultural Library: We are not saying you go into the library and open every book and tear out the last page and run out to try to sell it and get 0.02 percent. We are simply saying, "In your operation, maybe you turn the lights off when you go home; maybe you cancel a subscription to a periodical."

World Agricultural Outlook Board: We are not saying here that this Board ought to reduce the amount of attention it is giving each country. It may decide: "We're not going to be fooling with this country because we're going to save 0.02." The point is that the cut is across the board in that category.

Agricultural Conservation Programs: We are not saying. "You stop 99.8 percent of the erosion in all the programs you are talking about." We are just saying, "You set priorities."

I think I have made my point about line items. With respect to line items, in such items as timber purchase, road construction credits, with a 0.02-percent reduction, the guys running that would decide where it went.

The Office of the Secretary: Within that account, the Secretary whose office it is would decide where to make those reductions by 0.02 percent.

Office of the General Counsel, Buildings and Facilities, National Agricultural Library, World Agricultural Board—those are all line items where the across-the-board reduction would occur.

The same thing would happen with regard to loan programs throughout the Government, as well as obligational limitations and payments to the States on things ranging from CCC to operation subsidies.

A question has been raised about these contracts. What if you have a contract with somebody? There is an easy answer. If we have a contract, we do not go out and void contracts. First of all, you cannot get away with it. They go to court and sue us and we have to pay. So if you have a contract, you have to fulfill it. But when that contract expires, you are then able to make the adjustment in that particular area, but the overall account is reduced.

What about the old bugaboo of who is being hit by this. The distinguished minority leader outlined all the groups he is concerned about in this deficit. They are really the people who have suffered the most in the deficit. Does this hit the poor, the old, the sick, the tired, the greedy defense contractor, the fat bureaucrat, Congress? The truth is that it hits all of them. It does not hit entitlements that are driven by

eligibility. Anything else we can reduce is reduced proportionately. So the priorities of Congress are not changed.

Our distinguished colleague who spoke a moment ago noted, in response to a question, that he was not for line-item veto. I am. But the point is that you can be for this, and be against this, because the strength of this proposal is that it is neutral. Everything we can control without changing eligibility or without violating contracts, we control; and we do it proportionately at the line-item level, which is the lowest level you can do it without producing ridiculous results. In doing so, we eliminate the discretionary power of the President to the maximum extent practical, by forcing the President simply to be the instrument of this bill in implementing the sequester.

Now, how does all this arithmetic work out? I have tried to work it out given the availability of figures. The truth is that we have never done this before and so in trying to go through it and look at it, I have tried to take a $10 billion overage. What would a $10 billion overage do? If you went through a $10 billion overage and divided it out, excluding loan programs, which I am still trying to bring into this general analysis, defense gets hit with about 55 percent of the cuts and nondefense gets hit with about 45 percent of the cuts. This is given the existing contracts that are out there and the existing budget which we have adopted. When you bring in loans, you are going to end up with about a 50-50 split between defense and nondefense. Maybe that is not fair, but I think the American people are going to believe it is fair.

Finally, let me say that all of the talk has been about sequestering, but remember that sequestering only happens if we do not do our job. It need never happen. The way it is set up right now for this coming year, November 1, if we do not violate our budget or if we do, if the President vetoes it, if we do not add any new spending that is not in the budget, that trigger will not be pulled, there will be no sequestering. If we do not, if we come in with a lot of new spending, if we violate the budget, if we create new authorization for expenditures, we are going to pull the trigger and we are going to have an across-the-board sequester.

But we control whether it happens. But it does not end there. Once the President has carried out the will of this bill, the law, with no discretionary authority, just simply an across-the-board reduction in automatic increases and controllable expenditures, then the President has the option to send a proposal to the Congress saying, "I think we ought to do it a different way. I think we ought to do it a different way. Look at this." That then becomes a highly privileged motion and has the procedure through the budget committees that guarantee that there is a vote.

Now if Congress rejects it, the President's action when he takes it goes into effect. The sequestered order is in effect when he orders it within 14 days after the report from OMB, Congress, and the President.

Now, the President may not send an alternative but either budget committee, on the highly privileged basis, can send forward an alternative. We can vote on it as a joint resolution, send it to the President. He signs it. The sequestered order is out. Our decision is in, except when there is not a recession. That alternative has got to totally eliminate the overage. Is this a straitjacket? Well, if you are used to not wearing clothes, it is pretty tight. But it has all kinds of protections.

No. 1, if there is a war, it is automatically eliminated. There is a 5-year emergency program. It is not permanent law. I hope we will adopt a balanced budget amendment in the future to make it permanent.

But this does not make it permanent. It is a 5-year emergency program to deal with an emergency.

(At this point the Senate, in executive session, considered certain nominations, which proceedings are printed earlier in today's RECORD, by unanimous consent. Thereafter, the debate continued, as follows:)

Mr. DOLE and Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. Mr. President, I yield to the Senator from West Virginia.

Mr. BYRD. Mr. President, I seek recognition for the purpose of asking the distinguished majority leader what the program for the rest of the day will be and what it will be on Monday and particularly with respect to rollcall votes on both days.

Mr. DOLE. Mr. President, I do not know that I am the one who is going to determine that. It seems to me that if I am going to ask unanimous consent to have a vote at 3 o'clock, it will probably be objected to. So if the forces that do not want us to vote today are here, we will not vote today. I understand the same group said we will not vote on Monday.

I am prepared to vote today. Nearly every Member here is on each side. We would like to have a vote on the Chiles amendment first. We are prepared to do that; then a vote on the Gramm-Rudman amendment and any other amendments. We are prepared to do that on Monday.

Again, I understand that Monday is the so-called critical day, according to the Secretary of the Treasury. I know others would like simply to extend the debt ceiling for 5, 10, 15, or 20 days while we discuss the pending amendment. It seems to me it is pending; why not discuss it now and vote?

The only other alternative the majority leader has is to file a cloture motion today, come in tomorrow, and vote on cloture on Sunday.

Whether we prevail or not, it will indicate to the American people that we are serious about trying to move on the debt ceiling. So I cannot answer the question because I am prepared to vote. Now, if the minority leader does not want to vote, then he will have to answer the question.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader.

Mr. BYRD. The minority leader is ready to vote on a motion to strip this bill of the amendments which are pending and extend the debt ceiling for a week, 10 days, 2 weeks, with the appropriate ceiling figure therein. Let me make it very clear for the RECORD that I am ready to vote; the Democrats are ready to vote and we will be glad to supply, as much as we can, votes to enable the majority leader to pass a temporary debt ceiling—a week, 10 days, 2 weeks, whatever, with the appropriate ceiling figure therein so that the Government will not come to a stop, no programs will be hurt in the meantime, nobody will be hurt in the meantime, but in the meantime we can have the time to carefully analyze what the Gramm package will do.

I want to say again that as far as I am concerned nobody on this side has had an opportunity to understand what is in the Gramm proposal today, because there was a modification of the previous amendment an hour and-a-half ago or an hour ago. So I myself and most others do not know what is in that proposal. We are not willing, may I say, under the circumstances, we are not willing to vote on the amendment by Mr. GRAMM that is pending. We do not know what the amendment does. So we are not willing to vote on that today, we are not willing to vote on it Monday, but we are willing to help supply the votes to provide a simple extension of the debt ceiling for a short period, as I have already indicated.

Now, as far as cloture is concerned, and as far as the Senate's meeting on Sunday is concerned, some of us have been here on Sundays in the past but we do not need to do that. We on our side will give the distinguished majority leader consent—if he offers a cloture motion, we will give him consent to vote on that cloture motion on Monday without his having to bring the Senate in tomorrow, in order to qualify under the rule. We are prepared to give consent on that. I hope that the distinguished majority leader and I will be able to sit down shortly and discuss a simple extension. I am quite sure—we have made some con-

tacts on the House side—that if we here originate a simple extension, it will probably be blue-slipped on the House side. I think we could probably get the House to send us a new extension over. But these things can be explored with a little time. I thank the distinguished majority leader.

Mr. DOLE Mr. President, if we are not prepared to vote on the Gramm-Rudman-Hollings amendment, maybe we can vote on the Byrd-Chiles amendment. We are prepared to do that this afternoon.

Mr. JOHNSTON. Mr. President, will the majority leader yield?

Mr. DOLE. That is the amendment from the other side. We are prepared to do that. There are 90 of us here I understand, or 92.

Mr. JOHNSTON. I just want to make clear to the distinguished majority leader that there are a number of us on this side who have been committed, as he has, to budget reduction, who are willing to concede, at least for the purpose of this debate, that this is a serious exercise in legislating. And if it is, then those of us who want to question what the meaning of this legislation is, what its provisions mean, this very far-reaching piece of legislation ought to be debated with time for deliberation. Up until this point I have been able to speak on the floor only by promising not to put in a motion. I have not even had time yet—and it is a question of time—to ask questions of the distinguished authors. So I would hope that we can have the necessary time to explore the meaning of this legislation and to put in alternatives and to debate it—this is very far-reaching—without being accused of being big spenders and wanting to let the deadlines go by. I can tell you, Mr. President, we cannot vote today or Monday in a final way and not because it is not important enough, not because the deficit is not a national catastrophe but because we are dealing with terribly important legislation which would fundamentally reorder the Government, turn over in my judgment legislative powers to the President, and we just cannot do that in a couple of hours' time. I hope that my bona fides in that feeling will be conceded as well by the majority leader.

Mr. HART. Will the majority leader yield?

Mr. DOLE. Mr. President, I do not have any quarrel with those who have serious reservations. That is the purpose of debate. But in many respects, as I read the Chiles amendment in large part it is pretty much the same as the Gramm-Rudman-Hollings amendment. The pending amendment is a self-enforcing mechanism that does yield certain powers to the President of the United States, primarily because we have been unwilling to make hard choices in the Congress. We are concerned about the deficit. I do not fault anybody about the hard choices. I am just saying it has not worked. The institutional will has not been there. The President is fully on board. I just talked to the Chief of Staff, Don Regan, from New Jersey, who indicates that they would very much like to complete action on this today. They will be back about 4:30 or 5 o'clock. And I hope we could reach some agreement where you had a very short, 2-, 3-, 4-day extension and then a vote, but otherwise I do not know what we gain.

Mr. President, just to determine when we might get a vote, I ask unanimous consent we may vote on the pending amendment at 5 p.m. today.

The PRESIDING OFFICER. Is there objection?

Mr. HART. Reserving the right to object, the pending amendment is?

Mr. DOLE. Gramm-Rudman-Hollings.

Mr. HART. I object.

Mr. DOLE. What about 4:30 p.m. on Monday?

Mr. WEICKER. I object.

Mr. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. DOLE. Yes.

Mr. BYRD. I make this suggestion. If the distinguished majority leader and I could discuss a time for a few days' extension of the debt limit, I would hope that we on this side could then agree to a time for a vote on the Chiles package; on the Johnston amendment; on the amendment by Mr. RUDMAN, Mr. GRAMM, and Mr. HOLLINGS, say, 10 days from now. I would have to go back to my conference to get clearance on a time and date for the votes on the various amendments. What I am trying to say to the distinguished majority leader, I think, depending upon my discussions with my colleagues in conference, is that I believe there would be a willingness on our side to enter into an agreement which would give the distinguished majority leader some votes on amendments.

On Monday, after we have had an opportunity to discuss in our conference, we hope to get an agreement and also a short-term extension of the debt limit so that the Government does not come to a stop, nobody gets hurt in the meantime, and it gives us all a little more time to analyze these amendments and really see where we are going with them.

We want to reduce the budget deficits over here, but we want to know who is going to get hurt and how much, what the priorities are going to be and how it is going to be decided and by whom. We do not want to cede more and more authority to the President. But let me say, just to emphasize, we are willing on this side to help the Senator to get the votes for a short-term extension of the debt ceiling and try to work out some agreement whereby there will be votes on a date and time certain for various amendments.

Mr. DOLE. Mr. President, it is obvious that we are not going to be able to vote today on this matter, but I hope that we can use the afternoon in debate. We are going to be here and we are going to vote if we get a chance to vote, so those who oppose the amendment or want it discussed I think should stay here and be prepared to do that. I know the distinguished Senator from Louisiana and others are acting in good faith. I am not questioning anyone's intentions, but I think there is an opportunity to discuss it. There may be some minor modifications that may be made. Maybe it ought to be tightened up a little more. Maybe it is too loose.

In my view, when we start dropping things out, we start causing everybody else problems. But that was a judgment that was made.

It is my hope that we could continue the debate this afternoon, knowing probably that there will not be an opportunity to vote, but at least a chance to discuss the amendment in some detail. Also, we would be pleased to vote on the Byrd-Chiles amendment at 5 o'clock today, even though we have not seen it.

Mr. HART. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. HART. So far as this Senator is concerned, the concern about how these sweeping processes would work extends to the Chiles proposal as well as the Gramm proposal. I have no clearer view, in the long term, how the Chiles proposal is going to work, any better than I have as to how the Gramm proposal is going to work.

I do not think it is a question of putting Gramm off to get to Chiles. It is a question of how Gramm works, how Chiles works, and how another proposal might work. That is all we want.

Mr. HOLLINGS. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. HOLLINGS. Mr. President, let me thank the distinguished majority leader for offering that we vote on Chiles-Byrd first, because as the day commenced, the big objection we heard was about a plan by Senator CHILES and Senator BYRD; but we are not going to be able to get that suggestion voted upon and blocked out, that Gramm-Hollings was in the second degree.

So I asked Senator GRAMM and the majority leader if they would agree to a unanimous-consent request to vote on Chiles-Byrd. Now they do not seem to understand anyone having made that agreement. I think the record should show that.

Similarly, it's like buying a pig in a poke—no one said this is simple. I have never understood a farm bill, and we vote for it, and I know of no one who can explain one. There is no pig and there is no poke.

On the contrary, we have taken the budget solemnly agreed to the 1st of August, which only had what they called a $171.9 billion deficit, and we raised that to $180 billion. Then, for the first year, to make sure no one was getting caught off base, because nobody was contemplating playing with real bullets at that time, we upped that from 5 to 7 percent.

So what we are really looking at is some $20 billion of exaggeration or overrun, however described, from what they actually voted on in August.

What is really happening this afternoon is that everybody's picture is being taken. We are having truth in budget, and there are those in Congress, on both sides of the aisle, who will resist that in 5 days, 10 days, 10 months. They do not want that.

I have tried for 5 years to put a freeze across the board, with revenues and everything else. They do not want that. Now they do not want this—they say they want to study it. If they really wanted to study it and do anything, they would debate.

Senator GRAMM is here. He is an expert at it. I have answered questions on it. I have chased down rumors all morning long, misrepresentations of it. It is not easy, but it is understandable, and the hour is now. I urge that we not put it off 5 days, 10 days, for those who just never will want to vote 10 months or 10 years from now. That is exactly where we are.

I do want to thank the majority leader for bringing it up clearly, on top of the table, so that there is no move to outmaneuver. We are trying to get a mechanism and the fix for the truth in budgeting, to say what we mean and to mean what we say. That is all this amendment does. We have exaggerated or taken care of the No. 1 consideration by putting a $20 billion overrun on before anything triggers off or any of these devastating things occur that are being described on the floor.

(Mr. GOLDWATER assumed the chair.)

Mr. BUMPERS. Mr. President, will the majority leader yield?

Mr. DOLE. Let me respond first.

I appreciate the comments of the distinguished Senator from South Carolina, because he did indicate this morning that one concern on that side was that we were trying to close off any opportunity. That was never our intent. We are prepared to set our amendment aside, bring up the leadership amendment on the other side, and have a vote. We are prepared to do that right now—to set aside the pending amendment, have the Chiles amendment laid down, and debated and voted on at 5 or 5:30 today or 5:30 on Monday.

I appreciate the comments of the Senator from Colorado. I think there are some concerns in each amendment. They are not that different. The Chiles amendment, as I understand it—unless it has been dropped—would include one-third revenues, but essentially it is pretty much the same beyond that. So if there is objection to the one, there is probably objection to the other.

I think the Senator from South Carolina hit it on the head: The question is whether we want to reduce the deficit or want to talk about how difficult this is or how we are changing the rules or how we cannot do it this way or how we have to go back to the other way. That is why we are here now with a $2 trillion debt ceiling.

I hope we can bring it all together and have a nice bipartisan vote. I know they are working on it on the other side of the Capitol.

I yield to the Senator from Nebraska.

Mr. EXON. I thank the majority leader.

Mr. President, while many Members who are authors of this bill are on the floor, I should like to ask them a question or two and have any one of them answer.

I have listened to the remarks of my friend and colleague from South Carolina, with whom this Senator has worked tirelessly for years and years to attack the very problem that the amendment we are discussing is intended to address. If this is as good as advertised, and it may well be, we should have done this long, long ago.

I recall that the Senator from South Carolina and I and others, as long as 2 years ago, brought up the fact that we are never going to get this deficit under control unless we take tough action. I believe the vote we forced at that time was 36 to 38 on the floor of the Senate, and that it even went so far as to say that we should freeze COLA's for 6 months or a year, that we should not exclude anything. That was defeated.

Later, after the senatorial elections of last year, that side of the aisle came forth with a proposal to do something about Social Security, and that also was shot down.

The Social Security COLA's, as I understand it, have been declared off limits on this piece of legislation. I suspect that that is a realistic, political move, that we cannot get anything done unless we exclude certain things that are sacrosanct in the minds of some people.

I say to the main sponsor of this bill that I have looked at it. I am attracted to many things that this purports to do. But I have also listened to some others who are very much concerned about making some fundamental changes, bordering on possible constitutional changes, in a bill, and that we rush this through without enough debate and understanding.

I may vote for this when it comes to a vote. But I do not see, nor do I understand, the implied pressure that is being brought to bear by those who have serious reservations—and I emphasize the words "serious reservations"—about what we are and are not doing.

Therefore, I gladly accept the suggestion by my colleague from South Carolina that if we have some questions, this is the time to bring them up and get them aired.

My question is this: If this deficit situation is as critical as this Senator thinks it is, as clearly evidenced by the action that I and others have taken over the years, then I think it is safe to say that, by and large, one of the reasons for bringing this up at this time is that we never come to grips with these things until we have something that focuses on the crisis, where tough votes have to be cast.

Breaking through the $2 trillion debt ceiling limit after going through the $1 trillion debt ceiling limit 4 short years ago is a very, very tough vote.

My quesiton is this, if the situation, therefore, is as serious as I think it is and as the proponents of this measure that I might vote for believe it to be, then why do we not face it right now? Why are we delaying it? Why do we not simply say that we will extend the debt ceiling limit for 3 days or 7 days or 10 days at a time? Is this not the time now to make the cuts that we think are going to be necessary and probably increase some revenues in the form of minimum taxes or some other form of revenue? Would this not be the time to do it now rather than starting forth with this more complex suggestion that has been made, although it might be well-intentioned? Why do we not do it now rather than to postpone it and force the triggering mechanism to come into place as it has been explained to me?

Mr. HOLLINGS. Mr. President, I will say in a breath the Senator's amendment showed how much we could get as he has described it. We did not do it in July. We will not do it now in October. The Senator's amendment is logical but it is not realistic because if we want to solve the problem we will have to put out real sacrifices—let us call it a shared sacrifice—that include revenues, holding up on Social Security, and holding up on defense. We made tremendous progress, the Senator and I, both on the Budget Committee. But at the present time, Senator CHILES and I worked on this side of the aisle earlier going up to this debt limit. We have all seen and known when the debt limit or the $2

trillion came that you were not going to be able to pass a debt limit unless we did something that acknowledged the breakdown of the so-called budget system. That is what the media is saying. All of a sudden it is catching on like a prairie fire. This has been discussed back and forth.

If you could come up with a budget that will say let us have so much in revenues, fine. But we cannot even mention that.

Now we provide for revenues in Gramm-Hollings, but we do not specify revenues. That is my big difference, one of the big differences. As I will point out the others with Chiles-Byrd, the specification of revenues makes it politically defeated.

You are not going to get it by just specifying the revenues because it is thereupon described as tax action and the rejoinder is what is new—tax and tax and spend and spend. They could not get the President, and we will say Republicans or whoever, or the House or whatever, to go along with revenues. They could not get TIP O'NEILL, or President Reagan to go along with revenues. They got together on no revenues, under that oak tree agreement. So you could not get them to do that. What makes you think you can get it done now?

What we are trying to do is nothing different. We are trying our dead-level best to take that budget—even though I did not vote for it—and not change it, not add any revenues or subtract any revenues, not add any programs or subtract them, not diminish or increase in any particular item. Instead, take that particular budget where we are now, three readings in the House and Senate, and measure it right straight across in equal proportion, not a new budget because the Senator is talking about the responsibility and the responsible way to approach it, and I agree with him that is the way to approach it.

But the Senator and I have tried for 5 years. Senator Howard Baker once said, "Present your freeze; I will get on the floor and say some laudatory remarks and we will have a bipartisan movement." Instead, we got tackled from behind. There you go.

So it is not as if we haven't tried pushing for a freeze. But a freeze is not going to pass. The Senator and I know that. You could not get revenues passed this minute. We cannot mention it affirmatively. I think we provide for it where the President cannot edict revenues. It has to come back in his plan to the Finance Committee and Ways and Means in the orderly constitutional process.

I have a constitutional objection to Chiles. His rhetoric says we are going to have a minimum tax. But where is the minimum tax? So you get the plan over there and it is passed and everything else and page 23 says there is a minimum tax. They do not say the rate. They do not say how. They do not say what corporations, how much it is going to raise, or anything else.

You just do not just pass a mimimum tax by referring to it rhetorically. You have to stipulate, itemize. A minimum tax is a complicated thing. We tried for 9 years in the Finance Committee to get one and we do not have it yet. It has been the same with indexing.

So that is why we are trying to be realists in this thing and be impartial. But it certainly affects the discipline. It is not easy.

But the Senator's suggestion is not making it easier. It is making it impossible. I would like to go along. I will join the Senator. Put up the amendment. I will vote for his amendment to see how far we go with that responsible approach, but he and I well know it is not going to follow.

Mr. EXON. Is the Senator from South Carolina telling the Senator from Nebraska, then, that to make this politically palatable——

Mr. HOLLINGS. Yes, that is right, politically palatable, acceptable.

Mr. EXON [continuing]. To get the votes that are necessary to break through the $2 trillion debt limit that we excluded even touching COLA's on Social Security and that, furthermore, there was an accommodation if not misrepresentation that this particular measure also authorizes the raising of general taxes in the future?

Mr. HOLLINGS. Yes.

Mr. EXON. What the Senator from South Carolina is telling the Senator from Nebraska——

Mr. HOLLINGS. That is what the Senator from South Carolina said; I understand the tone of the Senator's voice. But politically, Social Security has always been thought of as a trust fund and this general perception has made it difficult to cut the deficit by limiting COLA's. The White House, the House, the Senate—everyone has tried but we have not been able to make it politically palatable, politically feasible. The Senator is right, on Social Security, so we got rid of that. We are not going to pass that. We are talking about the art of the possible here because we are under the gun.

No, we are not going to pass three readings in the House of Representatives and three readings in the Senate. They have tax reform and you can see how far that has gotten and they hope to get it out by November 1 on just one House.

Mr. EXON. Would not my friend and colleague from South Carolina acknowledge that it might be more politically honest, then, if we are going to have to consider tax increases and if we are going to have to consider further cuts in the budget? Would my friend not agree that it would be more up front and more politically honest with the people of the United States of America if we used the leverage of not passing an extension of the debt ceiling over $2 trillion but to tackle that right now?

Mr. HOLLINGS. I would like to tackle it right now. Incidentally, politically honest is what we call down here an oxymoron. There is no such thing as politically honest but in any event the Senator is right. It would be nice to do that but that is not going to happen.

We are taking up the time of our colleagues in trying to identify provisions that could be mistaken in this bill, but I assure you we have been working with the artisans in taxation and budgeting and in finance, and trying to hone the phraseology. "Controllables" and "uncontrollables," mean one thing with respect to the defense budget and another thing with respect to something else. But we have been working around the clock. This amendment has been worked on since Labor Day by all of us, in one way or the other. We did not just conjure it up yesterday. We have all been working the month of September on this particular item. The Senator knows that and I know that. We have discussed it. We have had off-session meetings in each other's offices to see what we could do in order to try this one last chance to really doing something about the deficit. The difficulty with the executive branch is they are really spending their time on tax reform when they should be spending their time and leadership on the matter of this deficit. We at last got the attention of the executive branch just this morning on the deficit.

And I am delighted and I congratulate my friend from Texas for leading the way. I am glad to bring this into realism because we have changed the time, I emphasize that, with respect to actually getting these things done.

The big objection to all of this is the delay in getting nothing done. In other words, if you take the Chiles date of November 10 by the time all the checks and balances are in place you are 5 months down the road.

So you are talking in terms of April and May to cut back on defense. Then you really have what they are talking about. None of the defense contracts will be touched. You and I gave defense $300 billion in budget authority. Admittedly, $160 billion of that you cannot get to, but another half of it, you can, if you go along with the Gramm-Hollings proposal.

I want to be able to hold up so we do not have to get to readiness. That is a big objection we have with the Chiles-Byrd amendment.

Mr. EXON. Will the Senator yield?

Mr. HOLLINGS. Yes.

Mr. EXON. The Senator is reading something into my statement, I say to the Senator from South Carolina——

Mr. HOLLINGS. I do not intend to.

Mr. EXON [continuing]. That I suggested a delay.

Mr. HOLLINGS. Well, you said, "Let's do it right now."

Mr. EXON. That is the very opposite. I am not suggesting a delay, I am saying do it now.

The Senator from South Carolina is off on another tangent.

Mr. HOLLINGS. I thought the Senator wanted to pass revenues now. You want to pass one of these?

Mr. EXON. The Senator from South Carolina is off talking about Chiles-Byrd. I was yielded to ask a question. I did not mention the Chiles amendment. I do not think that necessarily is an interesting part of the discussion right now.

What I am saying, though, and what I am trying to get to is that because of the political reality of the situation we are going to pass the amendment that we are discussing that was originally proposed by the Senator from Texas and the Senator from New Hampshire, as I understand, it, to which my good friend and colleague from South Carolina and others have joined in, we are going to pass that because we cannot now or do not now have the courage to attack this up front before we go ahead and rush through to the $2 trillion debt ceiling. Is that not correct?

Mr. HOLLINGS. I think that is one good reasonable interpretation.

Mr. EXON. I have one more statement—the Senator from Texas has the floor—I read a rather interesting editorial in the New York Times this morning. I do not know whether anyone else has seen it or whether it has been discussed on the floor. I do not necessarily follow all of the editorial opinions of the New York Times, but they brought up some rather interesting arguments, as I understood it, opposed to this measure that we are considering or about to consider.

I am just wondering if it would be in order for the sponsors of the amendment to try and answer some of the things that were brought up in that editorial, for the education of the Senator from Nebraska. I am trying to find myself in the position to support the amendment, but I really believe that we have to look at this for a day or two before myself and others are advised as we would like to be.

Mr. BUMPERS. Will the Senator from Texas yield?

The PRESIDING OFFICER. The Senator from Texas has the floor.

Mr. JOHNSTON. Will the Senator from Texas yield for a question?

Mr. GRAMM. I will not yield at this point, since I wish to get an opportunity to respond to some of the comments that are being made here.

Mr. JOHNSTON. May I ask when the Senator would be ready to answer questions?

Mr. GRAMM. I will be ready in just a few minutes to answer them. I am delighted my colleague from Louisiana is here and I welcome the opportunity.

Mr. JOHNSTON. I thank the Senator.

Mr. GRAMM. Mr. President, our colleague from Nebraska is saying, "Well, why don't we just raise taxes today? Why don't we do that today?" It reminds me of the analogy of the majority leader about the goal line. Our situation is that those who want to go on spending have dominated the game. They are ahead by 6 points. We have taken the ball from our 2-yard line and driven it to the goal line and they have cried out, "Time out. Stop the debate. Stop the game."

The majority leader said, "We will let you bring up your substitute." In other words, we will give you the ball. Let us play ball, but we are going to give you the ball. And you say, "No, stop the game. Stop the game."

Our colleague from Nebraska whispers across the lines, "Let's play basketball."

Well, let me assure you that this timeclock is not going to be stopped. I intend to fight against any effort to have a temporary increase in the debt ceiling, period.

Now, maybe you can get the votes to do it. Maybe there are enough people who want to put this decision off. They are for dealing with the deficit, they are for dealing with the problem, but not now, not this vehicle, not this proposal.

This is the same siren song that we have heard over and over and over again for the last 10 years as the debt ceiling has gone up and up and up. It has doubled in the last 5 years.

Our proposal is to raise the debt ceiling. I will vote for it. But I will not vote to raise the debt ceiling unless we do something about the problem. We are willing to pay our bills, but we want to call in the credit cards.

Now, before we moved to the Executive Calendar to approve the appointment of Jimmy Miller as Director of OMB, I had the floor and was completing a statement about this proposal.

Mr. EXON. Will the Senator yield, since the Senator misrepresented my position?

Mr. GRAMM. I am glad to yield.

Mr. EXON. The Senator has indicated that the Senator from Nebraska wanted to raise taxes now.

Mr. GRAMM. That is what it seemed to me.

Mr. EXON. I made the statement that I was trying to find myself in a position to vote for this. I can only believe in listening to the Senator from Texas, that he intentionally or otherwise tried to misrepresent the position of the Senator from Nebraska, and I resent it.

Mr. GRAMM. Mr. President, I have the floor.

The PRESIDING OFFICER. The Senator from Texas has the floor.

Mr. GRAMM. Mr. President, let me reclaim my time by saying that the Senator, rhetorical or otherwise, said, "Why don't we deal with the problem now? Why don't we deal with taxes?"

Mr. EXON. The problem is cutting the expenditures.

Mr. GRAMM. Mr. President, I have the floor.

The PRESIDING OFFICER. The Senator from Texas has the floor.

Mr. GRAMM. Mr. President, my response was that it reminded me of the analogy of the football game, that we have the ball on the goal line, we offer to give you the ball to go on with the game but, no, you do not want to go on with the game, and then somebody suggested, "Why don't we play basketball."

My point is, we are here today debating raising the debt ceiling to $2 trillion. This is an emergency and a crisis. There are those that want to do the same thing we have done in the last 10 years—pay the bills, but do not call in the credit cards; do not disrupt the system. "Why, it may make committees operate differently."

Let me assure you that the American people do not care about our committees operating. What they care about is the fact that we have not done the job.

Now, the President was concerned about this proposal, as a lot of our colleagues are, because if the Congress does not do its job, the automatic across-the-board sequestering would hit defense hard. Over 50 percent of the savings in an across-the-board sequester would come from defense.

But the President decided that this is a give and take proposition and that it was important that we were committed to a process of dealing with the deficit. So the President this morning came out and endorsed this proposal.

We are ready to vote. I think Members know where the votes are. Now, I am in no way critical of anybody who opposes this bill. There are a thousand and one reasons to oppose it. But what I am critical of is people who do not want to vote. Vote no. I am not urging that anyone vote for it who does not think it is a good idea. But vote. Give us an opportunity to get on with the Nation's business.

The reason it is critical is that there is a $2 trillion debt. It is not as if suddenly we woke up 3 days ago and said, "Well, you know, there is probably a problem out there." This problem has been building in the whole post World War II period. We are looking at raising the debt ceiling to $2 trillion. The

time has come now to call in the credit cards.

I speak for myself. I am not going to vote to pay the bills until we call in the credit cards, but I am eager to vote. But the problem we have here is that the debt ceiling is running out. Come Monday or Tuesday, or maybe at the latest Wednesday, we are going to run out of money in this country. There are going to be people who are going to be kicking and screaming about it, and pointing the finger at those who they claim are responsible. I want it clear I am ready to vote. I am ready to vote on the debt ceiling today. I am ready to raise the debt ceiling to $2 trillion, admit that the budget process has failed, and that we have failed.

But I am not willing to do it without calling in the credit cards. That is the proposal we have before us. So let us vote on whether we are going to call in the credit cards, and then let us pay our bills.

Mr. JOHNSTON. Will the Senator yield for a question?

Mr. GRAMM. I am happy to.

Mr. JOHNSTON. I thank the Senator.

One thing I want to do is get the meaning of this bill as far as I can. On page 23 of what I understand to be the current bill—and the copies of the bill have been changing rather rapidly. I think this is the one we have on our desk that says "as modified." If you will turn to page 23, it says that to the extent necessary they must reduce each relatively controllable expenditure by a uniform percentage. The keys words there are "expenditure" and "uniform percentage." I want to ask the Senator what is an "expenditure"?

Mr. GRAMM. Let me respond by saying that in order to answer your question, I have to go through the process that would get us there. I will be happy to do that. What the bill requires is that the President submit budgets each year that are no greater than the maximum allowable deficit, which begins this year at $9 billion above the budget that we adopted.

Mr. JOHNSTON. I understand that.

Mr. GRAMM. I am going to go through the process to answer the question. The President must submit a budget in each fiscal year that is within the maximum allowable deficit to produce a balanced budget in calendar year 1990. It is not in order, neither for the House nor the Senate, to come to the floor from the Budget Committees with a budget proposal that has a deficit greater than the maximum allowable amount. All amendments on the floor of the House and Senate in consideration of the budget is zero sum amendments. If you want to raise spending in one area, you take it away from another. You can raise spending, and raise taxes. You can cut spending, and cut taxes. But you cannot have an aggregate impact on the deficit. Once the budget is adopted for the first time ever under the Budget Act, it will be binding down to the subcommittee levels. That is the budget process that will be in place under this 5-year emergency bill.

Under those circumstances, why would you have an overage? Well, if we do our job, we adopt the budget, we implement reconciliation, and we would have an overage really for three major reasons: No. 1, we use faulty economic assumptions or something changed; No. 2, we had phony savings; No. 3, the spendout rates were different than we thought. On October 1 of each fiscal year under this 5-year emergency plan to bring the deficit under control and to balance the budget, the Director of OMB and the Director of CBO must report jointly on the projected deficit for that fiscal year on the first day of the first calendar year. Where they do not agree on their projection, then we automatically take the midpoint of the two projections.

If the projected deficit is significantly greater than the maximum allowable deficit which, when the bill is fully in force, we define as 5 percent, then OMB and CBO jointly report to the President and to the Congress that there is an overage that is significant. They report the amount of the overage, and they report dividing overage into two equal amounts. How much is automatic increases? Automatic increases are indexed programs that increase because the inflation rate is indexed. Most entitlements are indexed. There are some programs that are indexed that are not entitlements. There are a lot of quasi-indexed programs. The OMB and CBO will report the percentage by which these automatic increases have to be reduced across the board to eliminate one-half of this overage. If they are reduced to zero before one-half is eliminated, then the rest of the overage transfers over to controllable expenditures. How are we defining controllable expenditures?

We are defining relatively controllable expenditures that have new budget authority. We are also including in controllable expenditure obligation limitations. We are also including payments to the States. These are all things that we control remembering as a good guideline that if you want to understand it instead of nitpicking it, remember this: That entitlements are driven by eligibility; that if somebody qualifies for Medicare, they get the benefit, and the amount of benefit they get is dependent on whether they are sick or whether they go to the hospital. We cannot come in and cut Medicare across the board because we cannot say to your mom and mine at the end of September, "Well, I am sorry you got sick today, but we do not have any money." So the programs that are driven by eligibility set by the Federal Government are not affected in the sequester—only the automatic increases in there. We take Social Security off budget as a freestanding trust fund.

I am sorry that our colleague from Nebraska left because he was basically discussing why we did it. Maybe it was not legitimate. As I recall, we had a motion to table, and a resolution to take Social Security off budget. The Senate voted against it. So in doing so, if you voted to table it, you were voting not to take Social Security off the budget. I know some of the colleagues here voted no.

It so happens that the Senator raising the question voted aye. But Social Security is off here. It is a freestanding trust fund. We know it is coming off the budget in 1992 anyway. We know that if we brought it forward with Social Security in it as a freestanding trust fund, it would be taken out. And we would be debating Social Security. So my point is if you want to debate Social Security, go to the museum. That debate is over here if this bill is adopted.

You have reduced your automatic increases across the board proportionately to try to eliminate half the overage. If you had done that, fine. If you have not, the other half goes into the other pot.

What we do in the other pot is the sequester order reduces the line-item accounts across the board proportionately so as to produce an equivalent percentage reduction in outlay.

Mr. JOHNSTON. Will the Senator yield at this point?

Mr. GRAMM. I do not yield at this point.

Some people have raised the question: Well, does this mean you are going to let the President cut agriculture? Are we going to cut agriculture across the board and let him decide? No. In the line-item accounts in agriculture on controllable expenditures, we have such line items as timber purchase, and road construction credit. What this would mean is if we had an overage of $10 billion and we implemented that across the board, we might have a 0.2 percent reduction in that account. As I noted earlier, that would not mean that we would pave the road 99.8 percent thick. They would decide what roads they pave and what they did not. But under current appropriations they do that anyway unless you have some micromanagement.

So in essence what we would do is reduce controllable expenditures, obligational limits, and payments to the States across the board, and credit limits across the board proportionate-

ly so as to reduce the deficit by the amount of the overage.

I am happy to yield for another question.

Mr. JOHNSTON. Mr. President, I think the Senator must not have obviously understood my question. Let me repeat the question. I think I understand what the Senator's bill does, and the Senator need not repeat that. I simply want to know what is an expenditure. And I heard line item.

Mr. GRAMM. I will be glad to respond.

A controllable expenditure, or what will be sequestered which is relevant here is relatively controllable expenditures.

These are expenditures that are controlled by action of the Congress other than those driven by eligibility set by the Federal Government under entitlements.

Mr. JOHNSTON. I am talking about what the word expenditure means.

Mr. GRAMM. It means, for budget purposes, outlays. Expenditure is equivalent to outlay here.

One of the confusions that has occurred is Members have talked about budget authority. Budget authority must be sequestered to produce a proportional reduction in outlays so that fast spendout programs will have budget authority reduced less, slow spendout programs will have budget authority reduced more so as to produce a proportional reduction in outlays.

Mr. JOHNSTON. I think the term expenditure could mean a budget function as under the Budget Act. It could mean that which is contained in an appropriations bill. It could mean that which comes under a Cabinet department, as, for example, Interior. It could mean a subdepartment, such as an expenditure for Fish and Wildlife. It could mean a project as contained in one of our appropriations reports. It could mean a line item as stated in an appropriations bill. It could mean, as I say, report language, because report language is the way we appropriate in detail, actually, in all the bills.

For example, to give you one illustration from the Department of Defense appropriations bill, one line item in the bill is $21 billion. The detail under that is specified in a report.

In the energy and water appropriations bill, the individual projects are specified in many pages, I do not know how many pages, but there must be 30 pages of projects there, individually identified, in the report. The overall appropriation, however, for all construction is contained in one big number, on one line, in the bill.

So when you say expenditure, it could mean all of those things.

You say back on page 31 that the term relatively controllable expenditures means budget outlays that are classified as relatively controllable outlays in the Office of Management and Budget outlays report number such-and-such.

Mr. GRAMM. It is obviously clear to the Senator from Louisiana that when we are talking about an across-the-board sequester by the President, the President cannot figure out these across-the-board sequesters, and the OMB clearly has to provide that account function. The language, the account, department, or establishment of the Government to which each amount of budget authority, obligation limit, and loan payment and any payments described in subclause 2 of the clause would be available for obligation, could mean a lot of things. But what it does mean is that we are talking about, so far as outlays are concerned, new budget authority, we are talking about line items.

Some line items are big and some line items are small.

It is true, for example, that if you take the Office of the Secretary of Agriculture, which is a line item, if that is reduced 0.2 percent across the board with other items, the Secretary could go in and make a discretionary decision. But my point is he is already making a discretionary decision unless we are micromanaging with some rider to the appropriations bill.

There are other areas which are bigger, where the degree of discretion is also bigger.

We are dealing here with clear necessity to balance our desire to control the Congress priorities with our desire to be practical.

For example, we run a deficit and we have not dealt with the problem, we have let the deficit get above the maximum limit. I want to emphasize to my colleagues, this will not happen if we do our job. There will never be a sequester order if we do our job. It only happens if we do not do our job.

Mr. JOHNSTON. I do not want to argue with the Senator.

Mr. GRAMM. I can answer the question very simply. So far as budget authority is concerned, we are talking about line items. Within those line items there is a discretionary decision made. But surely we do not want to go into the office of the Secretary of Agriculture, which is a line item of the budget, and say, "You shall, under this sequester, use your Xerox machine less, your telephone less, and you may need to let a secretary go or cut the lights off earlier."

Surely we want to give him the power to say, "I have a 0.2-percent reduction. I will not go to Kansas City this week. I will save the money there."

Mr. JOHNSTON. When you say line items, do you mean line items in an appropriations bill, the OMB report, or where?

Mr. GRAMM. I am talking about line items in the report, "Distribution of Controllables of the Budget." It is in the midsession review.

Mr. JOHNSTON. When the Senator says expenditure—

Mr. GRAMM. That conforms to the general line items accounts in our appropriations bills.

Mr. JOHNSTON. A line item in the OMB report, number one, is not the same as a line item in an appropriations bill. Some of them may be, but most of them are not. It is clearly not the same thing as a project, an activity, or a program, which are the usual words of art used.

Really, what I am trying to get at is what is the extent, and I think it is important to have it for legislative history, what is the extent of the Presidential authority?

For example, just to take a close at home, in the committee report, as part of the construction general account of the Corps of Engineers, there is an item stating "Lake Wichita, Holiday Creek, Wichita Falls," for which $16.4 million was projected.

I assume that Lake Wichita is not a line item.

Mr. GRAMM. Let me respond by saying that the Wichita project would not be a line item. It would be within a line item.

But I go back to my point. We all know that the Senator from Louisiana is a distinguished and brilliant member of the Appropriations Committee. If he is trying to demonstrate that his knowledge of the intricacies of that Byzantine process exceeds mine, I will concede that immediately.

This bill says specifically where the definition comes from with regard to the Holiday Creek project in Wichita Falls. Clearly we do not want the sequester order to say, "Build nine-tenths of the dam and leave one-tenth of it out."

What we want to do is to sequester across broad categories, line items, the way the accounts are kept by OMB, which is going to have to enforce this on behalf of the President, and they will report with CBO so both will have an input.

Mr. JOHNSTON. Is it correct that expenditure means whatever OMB says it does as put forth in their report?

Mr. GRAMM. No. What it means is the line items on new budgetary authority. As it says on page 31 of the bill, relatively controllable expenditures means budget outlays that are classified as relatively controllable outlays in OMB "Controllability of Budget Outlays Report No. BPS 0701A, August 27, 1985."

The reason that that is the only way to deal with it is because that is how the accounts are done by the Government. We are talking about the President ordering sequestering.

Let me get down to the bottom line and make the point the Senator wants to make.

Within line items, if we cut across the board, there will be discretion.

That provision says, "Limitation. iii." This is page 25. "No action taken by the President under subclause (1) or (2) of clause (i) shall have the effect of eliminating any program, project, or activity of the Federal Government."

Mr. JOHNSTON. Mr. President, can he delay that for a year? May he delay for a year a program, project, or activity? He does not eliminate it in the law. It is still authorized. May he delay it for a year? For 2 years? Indefinitely?

Mr. GRAMM. Under this definition, the President could not close out a program, could not zero-fund the program.

The President is not going to be doing this, anyway. The President, I can assure the Senator, clearly is not going to go out and in timber purchase, road construction credits, national forest fund, say, "Aha, Louisiana, knock that road out."

The point is—and I want to yield the floor and let others speak. My dear colleague from Oklahoma, who supports this provision, is standing up eager to speak.

Let me make my point; within line items of the budget, there is some discretion. But I remind my colleagues that the discretion is minimized within our accounting system that the President will have to rely on in issuing the sequestering order.

Before yielding back my time to let my colleague from Oklahoma speak, let me repeat, and I believe this point is lost so much in this debate: this automatic sequester—which, by the way, if you had a $10 billion average, would take a little more than half out of defense, not counting the credit programs and counting the credit programs, would give about a 50-50 split, about 50 percent out of defense, 50 percent out of nondefense.

Some people say that is not fair. The people who are strong for defense say that is too much out of defense. The people who are strong for other discretionary programs—mass transit, for example—say that is not enough out of defense, that is too much out of discretionary social programs.

If you asked the American people what they thought a fair split was, my guess is that more than any other number, they would say 50-50. That is roughly what we get.

Mr. President, so others may have an opportunity to speak, I yield the floor.

Mr. BOREN addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Oklahoma?

Mr. GRAMM. Yes, Mr. President.

Mr. BOREN. Mr. President, I want to thank my friend from Texas for his statement. He has given a very able description on the floor.

I think if my other colleagues had the experience of working with a similar provision, they would not have the fear of it that some of them appear to have. This is not an unknown proposal. There is always a tendency to fear the unknown, fear the kind of procedure with which we have not had experience. To those who feel this is a new proposal, one which is untried and untested, one which is difficult to understand, I urge them to talk to their colleagues who have had experience with the very same kind of provision in the operation of State government.

I had exactly the same kind of system in place that I worked with when I was Governor of Oklahoma. Our State had a budget-balancing requirement. We had what we called a State board of equalization, which made estimates for the State.

Mr. GRAMM. Mr. President, if the Senator will yield, I would like to yield back my time so the Senator from Oklahoma may be recognized on his own time.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized on his own time.

Mr. BOREN. I thank the Chair. I thank the Senator from Texas.

When I was Governor of Oklahoma, Mr. President, I operated under a system that was similar to that. There was a State board of equalization which was made up of State officials, including the budget director and the Governor, which prepared estimates of the anticipated revenues, estimates of the costs of programs that we had enacted, then they followed and tracked all the figures as they came in. If our estimates were over our projections, if they were too rosy, if the money we had expected did not come in or our expenditures went out too quickly, we had no choice; in our case, we had to balance the budget.

Just as under this proposal, we had to meet the budget deficit targets that are set out in this particular piece of legislation.

What happened was that if we failed to meet out targets, by automatic operation of the law, there was an across-the-board cut in everything. That meant in my operation of the Governor's office, if I were operating that office with a budget of, say, $1 million and I had to experience a $50,000 cut as a part of an across-the-board-in-all-functions-of-government cut; I had to sit down and figure out how I was going to operate the office with $50,000 less. As the Senator from Texas has said, the law did not specify to me that I had to cut my paper allowance or that I was going to buy fewer postage stamps that month or that I would cut down on the use of the telephone or I would tell my staff, only travel 10 miles instead of the 20 miles a day you were traveling before. Of course not. There is no way under the Sun anybody could ever write any kind of law that specified in every detail how many paper clips you were going to buy to operate any particular office.

Mr. FORD. Will the Senator yield?

Mr. BOREN. I would like to finish my remarks, Mr. President; then I shall be happy to yield for any question.

I can tell my colleagues this system works. It works. We faced the situation in my State just a few months ago. As all of us know and my colleagues have heard me talk about the agricultural economy and the oil price impact on the energy sector, we had a very difficult time in my State. We had a shortfall of revenues and could not continue our programs at the usual level. What we did is, we had to make some across-the-board cuts. The raises which policemen and teachers and others were looking for were not going to be able to take place. We had to take immediate action rather than hoping for a more productive economy.

What did we have to do? The Governor had to call the legislature back in session. They had to decide: Do we want these automatic cuts to go across? Did they want teachers not to get any raise? Did they want the road program cut, the corrections program cut, other education programs cut? They had to decide.

In the case of our State legislature and the Governor, they decided, yes, they would live with some of the cuts. In other cases, they decided that some of those programs were so vital that they would raise the revenue necessary for those programs and keep them in operation. In other words, they had the opportunity to meet their responsibilities.

I heard somebody the other day talk about this proposal. He said,

> This proposal is terrible. It puts us in a box. Do you realize that if we do not meet our budget deficit reduction targets, we will face the terrible choice of either having to cut programs or raise taxes to pay for them? We might either have to cut defense or raise the money to pay for the defense programs we think are important to the country. We might even have to cut some of the COLA's or raise the money to pay for some of the COLA's.

Mr. President, that is just the box that the American people and the taxpayers have been hoping and praying to put this Congress and this administration in for many, many years. And it is time we got put in that box, for heaven's sake.

Mr. HOLLINGS. Amen.

Mr. BOREN. It is time we were put there. It is time we had to face up to

our responsibilities. How in the world do you think we can balance a budget? There is only one way to balance a budget when you are spending more than you take in: You either have to cut back on what you are spending or increase your income.

I realize that is a radical statement here, in Washington, DC, because for some years, we have been balancing the budget with mirrors. We have canceled expenditures we have not even made yet. We have changed our estimates of economic growth.

It has been so long since people here realized how you really balance the budget, that you cannot do it with smoke and mirrors and resolutions about waste, that they have forgotten you either have to raise your income or cut your spending.

Well, put us in that box. Throw us in that brier patch. It is time we got in there and dealt with the real problems that are facing this country. That is exactly what this proposal does. That is why so many people want to squirm and squeeze and wriggle and find a way out of it. We are finally going to have to ask the American people—it is not only the Congress and the President that need to be put in this box. Truthfully, it is the American people as well. It is our fellow citizens. So when they come in and ask us for a program—maybe it is worthwhile—we can turn around to them and be honest enough to say, "We don't have any money to pay for it. Now do you want this program, American citizens, do you want it badly enough to pay for it or not? If you want it badly enough to pay for it, then that is the only way we can get it because we don't have the money". I see my good friend——

Mr. HART. Will the Senator yield?

Mr. BOREN. I will in a moment. I see my good friend from Louisiana on the floor, and I heard him jokingly say one day when he raised the question how are you going to pay for it, somebody said—and he quoted them—"We'll pay for it out of the deficit." That is the policy that has been followed here for years and years, and it is not only Democrats that have followed it; it is Republicans, too. My goodness, this particular President has followed it more than any other President in the history of this country. It took us 187 years to get us to a $1 trillion deficit and this President, under the Reagan administration, another trillion within less than 5 years.

Mr. LONG. Will the Senator yield?

Mr. BOREN. It has been a bipartisan policy of paying for it out of the deficit and it is time to establish a bipartisan policy to stop it.

Mr. LONG. Will the Senator yield?

Mr. BOREN. I yield to my colleague from Louisiana.

Mr. LONG. So far we have paid for $2 trillion out of the deficit.

Mr. BOREN. That is exactly right.

Mr. LONG. We have paid $2 trillion out of the deficit so far.

Mr. BOREN. The Senator is exactly right, $2 trillion out of the deficit and I tell you what, Mr. President, we cannot afford the third trillion to be paid out of the deficit. If we do, it is going to break the bank. Eleven days of interest payments on the national debt exhausts all of the money paid by the citizens of my State of Oklahoma in Federal individual income taxes for the whole year. You take all the individual taxes paid by the people of Oklahoma and that will pay the interest off on the national debt now for 11 days. Forty percent of all the individual income taxes paid in this country right now are going to pay the interest on the national debt. At the rate we are going, if we add that other trillion and pay for it out of the deficit, you know what is going to happen? Pretty soon we are going to face the time when 100 percent of the individual income taxes paid in this country are going to pay the interest on the national debt.

Mr. HART. Will the Senator yield?

Mr. BOREN. At what point is it all going to collapse? It is not a question of when will it collapse. It is a question, at what point will it collapse? Is it going to be next week? You come to my State. You talk to the farmers. This is not some abstract economic theory about what deficits do. It is not some argument economists make. They cannot sell their wheat overseas. They cannot sell their corn and their cotton. They are going broke. Farmland has gone down 38 percent in value on an annualized basis in my State this year.

That is no economic theory. That is no one in some ivory tower saying, "Here is what the deficits might do to you." It is a fact. It is what it is doing to them. It is absolutely bankrupting good, honest, hard-working Americans who are losing their farms. It is not a theory to the people who work in the B.F. Goodrich plant in Milo, OK, employing over 2,000 people, the largest employer in northeast Oklahoma. All of those employee recently received a notice saying the plant is going to be closed, you are going to be laid off not for a week, not for a month. You are going to be forever laid off because the overvalued dollar and the terrible situation in the farm economy makes it impossible for us to make and sell those tractor tires any more; we are closing the plant. It is not some abstract theory about what the deficit is doing. It is a matter of human tragedy it is inflicting. And it is putting stresses and strains on the banking and financial system of this country. Mr. President, if you do not think we are standing on the edge of a cliff, I tell you, you better take off your blindfold and look around because we are standing on the edge of a cliff. We are imperiling this country. We are committing the immoral action of taking away economic freedom for the future children of this country, for our children and our grandchildren, for the people we were sent to the Senate to serve. The Senate of the United States, of all bodies in this Republic, ought to be the preserver of the future, the protector of the future, to pass on the opportunities that we have been given to the succeeding generations. Of any body politic in this country, any institution that ought to take the long view, that ought to step away and not be afraid to make decisions based upon short-term political or popular feelings, it is the Senate of the United States.

Mr. HART. Will the Senator yield?

Mr. BOREN. And now we have an opportunity to do that. Now we have an opportunity to take action which puts us in that box and makes us honestly and squarely face the priorities that are before us and makes us decide which programs are important enough to this country that we should pay for them and those programs that are not that we should cut or that we should reduce.

I am happy to yield for a question.

Mr. HART. Does the Senator recollect off the top of his head how many sponsors of the Gramm proposal voted for the massive tax cuts in 1981 and how many sponsors of this proposal voted for the massive increase in spending over the first 3 or 4 years of the Reagan administration?

Mr. BOREN. I could not tell the Senator that offhand, no.

Mr. HART. I think it is, frankly, most of the sponsors, perhaps not all but most of them who voted for policies in the past 5 years that have brought us to this terrible plight. I agree with the Senator from Oklahoma.

Now, that is not to point the finger of blame, but I would ask the Senator from Oklahoma whether it is grounds to question whether what we have here is a failure of policy and not a failure of process? If policies keep failing, should we fundamentally alter the check-and-balance system which this proposal suggests we do because those policies fail?

Mr. BOREN. I would say to the Senator from Colorado I respect his own position on this matter. In fact, I think he has in the past sincerely tried to point out the dangers of depriving the Government revenues; that apparently there was a consensus in the country that wanted to keep spending levels for programs at a level that could be sustained by the revenue. So I respect his motives and I respect his record. But I would say I think we have a failure both of policy and process. I remember when the tax cuts were proposed—and I happened to

51-059 O-86-22 (Pt. 19)

support those because I happened to believe and I still believe that up to a point when you provide appropriate incentives, you can stimulate economic growth. But when you are running deficits that are too large and when those deficits begin to impact on real interest rates, you reach a point at which you cannot continue to cut back on the revenues and be responsible.

I remember at that time, I believe it was the Senator from Nebraska, who is now on the floor, offered a proposal to that tax cut which said that it should remain in effect. However, if deficits reached a certain level, there would again be—and we are talking about triggering devices here—an automatic trigger that would hold further reductions in revenue in check until we in the Congress had shown enough responsibility to earn the right to proceed ahead with the tax cuts. In other words, it was a sort of earn your right to cut taxes by constraining spending enough that we can afford to give those tax cuts, write them in black ink and not in red ink, not pay for the tax cuts either out of deficits. It is wrong to pay for programs out of deficits. It is also wrong to pay for tax cuts our of deficits—money that you do not have.

Now, when you look back on it, frankly, the record of the two parties is not very good. On this side of the aisle perhaps we have been most guilty of paying for programs with red ink, expanding the spending without expending the money in the till to pay for those programs, and I would have to say that this administration, quite frankly, has erred on the other side. They have loved to give those tax cuts, but they have written them with red ink. They have paid for those tax cuts out of the deficit, with money that we did not have. Each side of this process has been giving in to what has been politically easy. It is easy to give tax cuts. None of us every like to oppose tax cuts.

I remember when I first came to the Finance Committee someone said, "What tax increases are you for?" I said I wanted to get on the Finance Committee to be for tax cuts. We all want to be for tax cuts. And so it has been easy. We all want to be for programs that are worthwhile. Who is against programs to strengthen our national defense? Who is against programs to help the handicapped, for example? Who is against programs for medical research? Most of these programs we have passed were not evil. Most of them have good and worthy goals. It is easy to vote for them, and we all have been guilty of it.

I would not stand here as a paragon of virtue, I say to the Senator from Colorado. I would not say that I have never been tempted to vote for a program for which we did not have money. I would not say that I have never been tempted to vote for a tax cut that we did not have money in the till to give.

In my part of the country, we have a great institution called the tent meeting and the sawdust trail. This is the time for all of us to have a joint tent meeting and for us to walk down the sawdust trail. This is the time for those who pay for tax cuts with money we did not have and paid for programs with money we did not have to come forward and confess it and say they will sin no more.

We should have the President walk the sawdust trail first. That might get a great ecumenical spirit going in this country, if we would all confess, on both sides of the aisle, that we have done wrong. But now is the time for confession. Now is the time for the pastor to turn up the heat, so to speak, and to attack the consciences of each of us and put us in that box I mentioned a while ago which indicates that we ought to either raise the money to pay for a program or cut the program for which we do not have the money. Face up to these tough priorities.

I agree with what the Senator from Texas said earlier. We can become over concerned about every detail of this problem.

As a Governor, I never let, and my successors and predecessors never let, the actual effect of those across-the-board cuts occur for very long. If they occurred even for a short time, it was unusual. The legislature was always called into session, and the Governor said, "It's so painful to cut these programs. Lets see if we can raise money or set priorities and decide what is more important." It works.

The main point is that it is the sword of Damocles that we will be trying to avoid. I think the main feature is not what is going to happen if this occurs. The main, positive side of this proposal is that there is something out there that is so unpleasant that I do not believe Congress or even this President—someone has said, "Would the President ever agree to raise revenues of any kind to prevent, say, a defense cut?" I think he is concerned about the defense of this country. I believe it will make him think. He has been paying for all these defense programs with money that is not there. It will make him think:

Do I want those defense programs badly enough to pay for them, when they will be automatically gone if we don't do something about it?

This is a discipline we are imposing upon ourselves. None of us likes to be faced with an unpleasant decision. None of us likes to have to make those painful decisions. None of us ever likes to have priorities set for us in our personal budgets.

We all like to go to the store and buy everything we want. But we should realize, when we make a choice, that we should impose a discipline on ourselves. We impose it on all other aspects of our lives. We know that if you spend 10 minutes in one activity, you cannot spend it in some other activity. We understand that in our personal lives. Why in the world can we not understand it when it comes to setting the budget of the Government of the United States?

The Senator from Texas knows that I intend to offer two amendments to his proposal, if it is adopted. I want to complete the action of going down the sawdust trail and being honest. I have these amendments drafted, and I am going to send them to the desk and have them printed in the RECORD.

First, there is a minimum corporate tax to raise $4 billion a year. You can see what is in it. Every detail is written out. We have four corporations that made $10 billion—let me repeat that: $10 billion—in profit last year and paid no taxes whatsoever, and that would be $600 million back.

In my own conscience, I cannot afford to say that we are going to impose across-the-board cuts on the food stamp recipients or the veterans or the railroad retirees or some important defense programs of this country and still say that we are going to do it without first requiring that these companies, which have made these massive profits, pay their fair share of the taxes.

So that $4 billion would become effective the 1st of October, 1986. That would give the Finance Committee and the Ways and Means Committee plenty of time between now and then to revise this proposal, if we adopt it. It would automatically go into effect on that date if not changed. That $4 billion would come off the top. If we had $10 billion in shortfall, that $4 billion would come first.

The second one is something that really gets into the area of walking the sawdust trail and honesty within the tent meeting. I do not know how we can talk about across-the-board sacrifice by all the American people if we exempt 20 percent of the people from that.

If the Gramm amendment is adopted—and I will vote for it—I will offer an amendment to expand that sacrifice more by including Social Security COLA's up to a maximum of a 3 percentage point cut—not more than a 3-point cut in the proposal. How can we say we are asking all Americans across the board to sacrifice and leave out such a large and important group of our citizens?

I will tell you something else, as long as we are being honest: I think it demeans the senior citizens of this country to take them out of that process. I do not know of a more patriotic group of Americans than our senior citizens.

I would put the patriotism of the average person receiving Social Security in this country alongside the patriotism and commitment to this county of any other citizen of any other age.

The senior citizens I have talked to have said, "We don't want to be singled out and asked to sacrifice, we don't want our COLA's to be cut, if no one else is going to experience a cut."

I have yet to have a senior citizen say to me, "If everybody else in this country sacrifices, we don't want to do our part." They are the last ones to say that. They are the ones who have helped build this country, and they know that you cannot live beyond your means. They understand it a lot better than people my age. You cannot tell them that they do not want to sacrifice and that they are not patriotic.

For goodness sake, how can we say that we are having an across-the-board sacrifice if we leave out millions of people on Social Security?

There should be some protection. I am sensitive, as a political realist, to the feelings of my colleagues in this body. That is why I said we should put a limit of 3 percentage points on a cut in the COLA's and the Social Security Program. We should bring everybody in. Let everybody participate in this sacrifice and this discipline.

I have said this before, and it is no secret, and I admire the motives of all those who have spoken so far in this debate, and I think it is good and healthy that we have been brought to this point.

When I go home, people say: "What are you doing in the Senate? You pass a resolution declaring this week and that week in honor of some group in the country."

We have a debate going that the President sent down a tax reform proposal. I have yet to have 10 people walk up to me on the street or write letters and ask me what has happened to it. Nobody seems to care very much. We spend a lot of time debating things totally insignificant.

They say: "When are you people there going to deal with the real problem of this country, that cancer that is eating away at the strength of this country, that deficit that cost me my job with the Goodrich factory, that deficit that cost me my farm, that deficit that is threatening the banking system? When are you going to deal with that?"

Well, we are on that issue now, and thank goodness. I think it is a good thing that we are debating it, that we are honestly laying out the priorities, laying out what we believe in.

I have reached the point, and I said it in every forum where I could, this Senator cannot in good conscience vote to extend the debt limit one more time, not for a minute, not for an hour, not for a day, not for a week, not for 2 weeks, not for 3 weeks, until this Senate has had a chance to vote for some proposal that effectively puts us on a path toward reducing these deficits.

I happen to be for the Gramm proposal. If the Gramm proposal is not adopted, if someone else has a better idea—I know the Senator from Louisiana and Senator ARMSTRONG have another kind of proposal, and there are other ideas floating around; the Senator from Florida, Senator CHILES, has been working very hard on a proposal and the minority leader has talked about some ideas he has.

I am not hung up on one particular proposal. I happen to think the proposal before us now is the one that has the most teeth in it and is most effective. I am going to vote for it and support it.

Until we have a chance to vote on something like that, I am not going to vote the debt limit any more, and I do not think we should. We are on the hook. I said a while ago this proposal, this Gramm proposal, puts us in the box. We are on the hook. This proposal is before us. We are having to face it. If we give ourselves more days and more days and more days, you know we are all kind of tomorrow things, maybe things will be different in the morning—things will not be different in the morning. This country is on the road to bankruptcy and when we wake up in the morning if we do not act tonight or tomorrow, if we wait until Monday morning, it is going to be the same Monday morning on the road to bankruptcy. It is the same Tuesday morning.

One of these days when we wait and one of these weeks when we wait a little longer we will wake up and the banks will be closed and what we have been thinking about will have happended, and I am not going to have it on my conscience that I tried to get us off the hook so that we wait too long, too long to act. Let us do it now.

This proposal is not perfect. I have already said I am going to move to amend this proposal after it is adopted before we vote the debt limit. I am going to try to improve it from my point of view. But I hope we have a chance to vote on it and I hope we have a chance to move forward, and those who have better ideas let them offer them, but let us grapple with it now. Let us not get off the hook. The American people have been trying to get us on the hook for years. Let us not get out of the box. Let us stay in the box and deal with the problem. Let us do the job that is the responsibility of this institution. Let us prove the Senate of the United States is not dead, that it is not reduced to passing resolutions on national wildflower week, as much as I love wildflowers. It is an institution that deals with the real problems of the country.

Let us bring this Senate to life again and let us grapple with these real issues and let us get a decision made and let us do the work not only that the people elected us to do but let us do the work that history demands of us as Members of the U.S. Senate, of an institution that amounts to something.

Let us prove that it still has a place in the confidence of the American people. Let us prove that this institution is still the custodian of the Nation's future and let us do not leave here until we resolve these issues for the good of our country.

Mr. HART. Mr. President, will the Senator yield for a question?

Mr. BOREN. I am happy to yield.

Mr. HART. Mr. President, I think we will probably get to a vote quicker if the questions some of us have can be asked. I think we all agree on the crisis. We all agree we have to step up with the lick law and all the rhetoric. Let us find out how it works.

The Senator from Louisiana was trying to find it out. I have been trying to find it out. We are not going to find it out by grandiose statements.

May I ask the Senator from Oklahoma one question? If under this proposal Congress fails to meet the budget cuts that are prescribed and the initiative then moves to the White House and the President is required to make across-the-board cuts of a percentage nature, or whatever, and those cuts include the Department of Defense, is it under this proposal within the discretion of the President to make the cuts in the Department of Defense from what we call maintenance accounts, the operations and maintenance of our conventional forces——

Mr. BOREN. Yes.

Mr. HART [continuing]. And leave untouched procurement accounts, particularly in the nuclear weapons area?

Mr. BOREN. I would say in answer to the first part of the Senator's question: Yes, certainly in operating accounts, and that would include maintenance accounts, and other similar accounts, yes. Yes, it would be possible those cuts would apply. In terms of weapons systems——

Mr. HART. No. I am saying under this proposal, does the President have the authority to make the defense portion of those accounts——

Mr. BOREN. Come out of that?

Mr. HART [continuing]. Come out of operations.

Mr. BOREN. No, absolutely not. It is a ministerial function.

When I have been listening to people say the initiative is going to shift to the White House, the initiative is not going to shift to the White House any more than our State board of equalization met in Oklahoma, when I was Governor, where they sent me the word and sent the word to the

Speaker of the House and the President of the State Senate at the same time. They said: "Governor elected legislators, we are out of money. Your budget estimates proved to be too rosy. That money did not come in like we thought it would. But the money you planned to spend sure did go out."

That is usually the way with estimates. What you plan to spend usually always goes out; what you think might come in from economic growth does not always come in.

Then we all had to grapple with it, and it was not a matter of me having a discretion. I just signed a simple order. The Constitution required it. In this case it would be the statute. Cut all functions, and the functions are listed in this bill. They refer to the actual date of the OMB circular. It is specific. It is already in writing.

We know exactly what the functions would be. It is not as if the President or OMB could ever change those functions. They could not issue a new circular.

Mr. GRAMM. Mr. President, will the Senator yield?

Mr. BOREN. I will yield to the Senator from Texas in a minute.

Let me ask the Senator from Texas, have I not answered correctly? They could not create new functions and say, "OK, we modified that circular." He refers to that particular circular by date, so those functions are clearly spelled out.

It is not as if we are having to commit ourselves to across-the-board cuts in unknown functions. The Senator from Texas has it in his hands.

Mr. GRAMM. Mr. President, will the Senator yield?

Mr. BOREN. I am happy to yield.

Mr. GRAMM. Mr. President, as virtually everything else he said today, although I might take exception to one or two, the Senator from Oklahoma kind of makes me wish Oklahoma were back in Texas where it should be. Maybe he would be here and I would not.

But let me just give the Senator from Colorado a few examples, and I think this really takes away the concern. Let me read from line items:

Rent of equipment and other personal property, Air Force; deposit for survivor annuity benefits, Air Force; sale of scrap and salvage material, Defense agency; recovery for Government properties lost or damaged not otherwise—going down—military personnel, Marine Corps; Reserve personnel, Navy; Reserve personnel, Army; Reserve personnel, Air Force——

Mr. HART. Mr. President, will the Senator yield for a question?

Mr. GRAMM. Courts of Military Appeal—I do not have the time, but I will finish a few. I think this might——

Mr. HART. That is not addressing the problem.

Mr. GRAMM. National Board for Promotion of Rifle Practice, Army.

Those are the line items we are talking about.

Mr. BOREN. I think the Senator from Oklahoma still has the floor.

Mr. HART. Will the Senator respond to the question put. The question was not what are the line items. The question was under the pending proposal does the President of the United States, to meet the proportion of cuts required by this proposal from defense have the ability to choose what action he will take.

Mr BOREN. No. The answer is no. The President cannot say "I am going to cut these line items by 1 percent but not going to cut these lines at all. If he has 1 percent or 0.2 of 1 percent across the board he has to cut every function by 0.2 of 1 percent. It is a ministerial function.

That is what I think has been confusing. This is not a new power to the President. This is a specific requirement of law that is imposed upon the President. He does not have discretion not to do it that way. It is Congress here telling the President what to do and it puts the President just as much in a box as it does us.

Mr. HART. Why do we not do it, then? Why does not Congress impose a 2-percent cut?

Mr. BOREN. I think we can say that the majority leader and minority leader of the U.S. Senate shall certify that they have been informed that the estimates have fallen short this much and shall sign their names to an order which establishes an across-the-board cut in all functions or say the Speaker of the House. The result is going to be the same. Or you can say the King of Siam or whoever the leader of Siam is after the latest coup. But you can say whoever you want to say.

Mr. HART. So there is no reason it needs to go back to the President.

Mr. BOREN. There is really no reason.

Mr. GRAMM. Mr. President, will the Senator from Oklahoma yield?

Mr. BOREN. I am happy to yield.

Mr. GRAMM. One additional point that I ask my colleagues to remember is that this concept is not some abstract concept that was thought up by schoolteachers in a big library. This is a procedure that is used to some extent or another in 43 States today. In my home State of Texas, for example, the comptroller makes estimates of revenues and expenditures and if we are looking at a deficit under existing law, then expenditures are cut across the board to eliminate that difference, just as the past distinguished Governor of Oklahoma said.

So there are 43 States that, to some degree or another, are doing this today.

Mr. HART. Will the Senator yield?

Mr. BOREN. I am happy to yield.

Mr. HART. Then why not have a proposal that says, if the Congress in the first round does not meet the targets by picking and choosing programs to cut, then automatically they are cut 2 percent? Why go through this dancing back and forth with the executive branch?

Mr. BOREN. If I could answer the question, that is exactly what this does. Now, we have the President; that is our system. A State government has a Governor. Therefore, it is simply the usual fashion that someone with elected authority is the one that signs his name on the order or makes the certification.

But we know the difference between a policymaking function and a ministerial function. That is something we learned in the first month in law school. There are policymaking functions, there are discretionary powers of government, and there are ministerial functions.

I remember, when I was Governor, there was a proposal that said that if the Governor received a petition signed by a certain percentage of voters in the district, the Governor shall call a grand jury or the Governor shall order an audit. I remember one time a group of people came to me and said, "Governor, why did you order an audit in such and such a county?" I said, "Because I received a petition signed by so many registered voters as provided by the constitution that said the Governor shall order an audit." So the Governor signed his name to that order. That was not discretionary. I did not do it because I did not like somebody being audited. It was a requirement of law. So I think that is what we are dealing with here.

Mr. FORD. Will the Senator yield?

Mr. BOREN. I would like to yield to my friend from Nebraska, who has been wanting to ask a question for some time.

Mr. EXON. Mr. President, in the first place, I would like to request that I be added as a cosponsor to the two amendments that the Senator described when he introduces them.

Mr. BOREN. I am honored to do that.

Mr. EXON. I hope they might be introduced even before we vote on this.

Mr. BOREN. I have not sent them to the desk.

I ask unanimous consent, Mr. President, that the two amendments that I planned to present later on be sent to the desk and be printed and that a statement describing them also be printed in the RECORD at this point and that the Senator from Nebraska be added as a cosponsor on these two amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EXON. Let me ask the Senator one or two questions.

Mr. DOLE. Will the Senator yield so I might give an advisory, like a weather advisory?

Mr. BOREN. I am happy to yield.

Mr. DOLE. Mr. President, I am going to visit with the distinguished minority leader, but I wanted to indicate, after conferring with a number of colleagues on my side, it appears we will have a session on tomorrow. There will probably be a cloture vote at about 4 o'clock on Sunday. That could change.

Mr. BOREN. I yield to the Senator from Nebraska.

Mr. FORD. I would just as soon go to church here as home.

Mr. EXON. We have been talking about confession here today, so it all fits into the gospel.

I wish to ask a question of my friend from Oklahoma which may answer the question of the Senator from Colorado. I do not believe that the question of the Senator from Colorado has been adequately answered.

It just so happens that this Senator was Governor for 8 years in my State. I had the power, and I used it whenever I thought it was appropriate, exactly as the Senator from Oklahoma described that he did in his State.

But, at least in Nebraska, if I was going to cut, for example, the budget, through whatever means I had, either line-item veto or making up the budget, I had the option—and I think this is what the Senator from Colorado was trying to ask—I had the option of telling the department of transportation whether I wanted them to cut automobiles or whether I wanted them to cut gasoline that they used in those automobiles.

Is that not what the Senator from Colorado is trying to get at?

Mr. HART. The Senator is correct. But it is also a fact that about one-third of this budget does not fall under the title of controllables. It is multiyear weapons and those are not being cut.

Mr. BOREN. To give an honest answer, if it is a contractural obligation, if there is procurement for it, if we have contracted with some company to produce so many airplanes or missiles or whatever it happens to be, during the terms of that contract, that contract you have to live up to. That is a requirement of law.

However, as soon as that contract lapses, even if it has been authorized to buy an additional 25 airplanes—let us say you are under contract to a company to buy 25 airplanes, they are building them, you have to live up to that contract. That cannot be cut. But the minute that contract expires, even if Congress has authorized the purchase of 25 additional airplanes, you could not enter into that new contract.

At that time that function, if it is cut, you might have to cut and order 24 airplanes, if you follow the analogy.

Mr. FORD. Will the Senator yield for just a moment?

Mr. BOREN. I am happy to yield to the Senator from Kentucky.

Mr. FORD. The Senator has been portraying the authority of Governors today.

Mr. BOREN. I know that is a danger with so many distinguished colleagues who have held that position.

Mr. FORD. But the thing I wanted to caution the Senator about, when he gets his spiritual fervor here and talks about sawdust trails and tents and guitars and 200 hymn books and 150 chairs and a collection plate, I have been there. I want the Senator to know that. The Senator is mixing and mingling the constitutional authority and statutory authority. He has talked about the constitution requires him to do certain things in Oklahoma.

We are talking about statutory authority here.

As a Governor, the only thing I could do without the authority of the legislature was what I had under the constitution. And the constitution said we would have a balanced budget.

Mr. BOREN. Yes.

Mr. FORD. We do not now have that. So we are getting into a line-item veto.

I heard the Senator from Texas read them off a while ago, even rifle practice. I heard him get down into those. That is all we have talked about is item veto.

Under the statute, under the constitution of Kentucky, the Governor has to bring it down.

Mr. BOREN. Yes.

Mr. FORD. He is not told where to get it or how to get it, he just has to reduce it. He may take it out of excess revenue in the highway department.

Mr. BOREN. You do not have to do it across the board?

Mr. FORD. No.

Mr. BOREN. We have to do it across the board.

Mr. FORD. So let us be very careful. The Senator is talking about the constitutional authority he had as a Governor.

Mr. BOREN. We have had constitutional authority further described by statutory authority.

Mr. FORD. Every constitutional provision you have is provided by the statute. You have to, at some point, put that into the statute to carry that out.

Mr. BOREN. If we were to pass a budget-balancing amendment at the Federal level tomorrow, we would have to pass implementing statutory legislation to say you have to balance the budget.

Mr. FORD. I have no problem with that. But the Senator's legislature is not in every day, at least mine is not. It is in 60 days every 2 years. So the Governor, defined as the No. 1 magistrate in the constitution, has the authority when the legislature is out, unless he wants to call them in. We understand that.

But we do not have a balanced budget and we are not operating under a balanced budget provision. I will vote for it in a minute, to have a constitutional amendment to balance the budget. I will vote for that this afternoon.

But I want the Senator to be very careful that when he starts talking about the constitutional provision of the States and the balanced budget, they have been operating under that since 1891. It is not anything new. It is just like operating in the red up here. We operate in the black down there. So it is something that is natural and everybody assumes that.

I wanted the Senator to be very careful that he is not saying Oklahoma and this piece of legislation and the way they operate are identical, just like they are not under the 43 States, as the distinguished Senator from Texas has said. We are all a little bit different.

This legislation is not constitutional. We can, in February of next year, exclude any reduction in the military. We just go back and amend this and do that; or we can exclude COLA's for civilian and military retirees.

Mr. BOREN. The Senator from Kentucky is correct on that.

Mr. FORD. So this extends any problem of dealing with the deficit until after the November elections, not 1986.

Mr. BOREN. The Senator from Kentucky is correct in part of what the Senator says. Let me clarify. The Senator is correct because this is only a statute. If both Houses of Congress passed a statute exempting anything, defense, railroad retirees, the agriculture program, education, whatever, and the President did not sign it and vetoed it, both Houses could override his veto. Yes. You could do that. I think if we pass this into law, I think the Members of the House and Senate will bear the responsibility for dismantling this once we get it in place. I hope the President of the United States will not agree to it either. I think there would be a lot of political responsibility. That is why I agree with the statement made, I believe, by the President this morning. He said he was for this, but he also wanted to still have the constitutional amendment to balance the budget. This would get us to a balanced budget by 1990, 1991, at which time if we had the constitutional amendment then in place, we could be sure that by statute Congress could change it later. I would like to see us do both things. But even if we had the constitutional amendment we would have the statutory methodology in place for putting us on a guidepath—and I believe even most of the proposed constitutional amendments have

said within so many years, 3 years, whatever period of time after the enactment of the constitutional amendment Congress shall reach a balanced budget. We have always envisioned exactly this kind of process where by a statute you established a glidepath and mechanism for following the dictate of the Constitution. But I think the essential thing here is not the commingling of constitutional and statutory language.

Mr. FORD. There is no constitutional provision?

Mr. BOREN. No; the Senator from Kentucky is quite right in pointing that out because I do not think if we passed this rule we finish our work. I would also like to see us pass the constitutional amendment to balance the budget.

Mr. FORD. Would it be much better to put the cart before the horse or the horse before the cart?

Mr. BOREN. I do not think so. Even if we were to pass the constitutional amendment to balance the budget tomorrow it will take us realistically 3, 4, or 5 years to reach the target, and implement it. Therefore, I think the sooner we start on that the better. People are always saying to me, why wait until you have a constitutional amendment to balance the budget even if you are for it?—which I am. Why wait until you have it? Go ahead and do your job now.

What this does is give us a mechanism to go ahead and do our job now while many of us are still for the constitutional amendment to balance the budget so we can permanently lock in the improvements that we have made. But I think the central thing—obviously from listening to the Senator from Kentucky—is we have a little different situation. Many State governments—and it is the strength of our country that we have diversity in the way the States operate, but there is some difference. In my State we have by statute, practice, and court decisions set up a procedure that indicates that the way the constitutional amendment requiring a balanced budget is enforced is by ministerial action by the Governor, not by his having the discretion to cut one thing and not another. It has to be an across-the-board reduction in all functions which is the same mechanism being proposed here, and I suspect that is in place in many other States. All I was saying is this does not enhance the power of the President.

The President is in the same box as the Congress. The President does not have any choice. He has to cut across the board including maybe a lot of his own pet programs or programs that he thinks should not be cut. That maybe goes against the grain of his priorities just like it would go against the grain of the priorities of many in this Congress if we had to go across the board. What happens? The President can come to the Congress and urgently say, look, this is bad. I think defense is cut too much. I think some people at the low end of the poverty scale are being hurt too much. We need to change the priorities. We in the Congress can say that. It is the process as it is now. The President can propose. Any of us can introduce legislation. We can pass bills to change that as long as we come in within the budgetary target. But there is something that happens to us if we do not do it. There is a penalty. There is a discipline. You see now if we fail to act, I remember the first year I was up here—I believe the first year I was so enthusiastic. We passed a budget resolution to balance the budget or came close to it or at least said we would have the budget balanced in a very short period of time.

I remember talking to my good friend, Henry Bellmon, my senior colleague from Oklahoma. I was ecstatic. I said, "Senator Bellmon, isn't this a wonderful day?" Henry had been here longer. He said, "Oh, David, I have seen this budget balanced on paper so many times I would have to take off my shoes and count my toes as well as both hands." But he said, "When the real figures come in, the estimates are off."

Let me yield to the Senator from Montana just a minute.

Mr. MELCHER. I thank my friend for yielding. I want to go back over the Senator's statement.

The Senator described the precarious situation this economy is in, and he described it from the standpoint of somebody from Oklahoma. It sounded a lot like somebody describing it from the State of Montana. We find ourselves in an extremely precarious situation. While most of the people—not meaning most of the land—most of the people perhaps think this economy is going along OK. Maybe we have economic recovery. I have to differ with it as my friend from Oklahoma does with the popular conception. I see these times as extremely precarious. We are on the verge of probably a very great recession. Having said all that, my friend from Oklahoma describes the proposal which is before us which he is cosponsoring, as discipline, a glidepath. They are establishing a glidepath. These are sort of trite phrases that get overused.

But I wonder if my friend from Oklahoma does not really agree that this is an extension of the budget process to accomplish what we have not been able to accomplish under the present Budget Act?

Mr. BOREN. I agree. I would say the present budget process has failed because it does not have enough teeth in it. I guess instead of the word glidepath and targets I ought to use the word teeth, because that is what we are arguing about. We are arguing about whether we are going to improve the budget process, to put some teeth into it.

Mr. MELCHER. Would my friend also agree that the budget we passed here after so many days of debate that says we are going to get down to x amount of deficit within a certain period of time is as phony as a $3 bill?

Mr. BOREN. I would agree with that. I think the President himself shot down some of the more responsible proposals when he would not touch COLA's, and he would not look at oil import fees and other things that were packages that were responsible. I think he has to bear responsibility. We ended up with a budget with deficits much higher than the rosy projections would indicate.

Mr. MELCHER. I know we are in agreement on these basic points. I want to make this statement. I shall vote for this extension of the Budget Act. I shall vote for the Byrd-Chiles or the Chiles-Byrd extension of the Budget Act. And I shall do so as symbolic gestures more than reality, knowing that the only way to control this under the Constitution is through the appropriations and the taxation powers that are vested in Congress. I believe my friend agrees with that.

Mr. BOREN. Absolutely.

Mr. MELCHER. Would my friend also agree that the moment of truth where we start that process is now, and that while this may be symbolic and may be a good discipline what really counts is how much money we appropriate, and how much revenue we take in? That is today, tomorrow, and every day, and we cannot really wait for discipline to come into effect. I daresay this takes about a year to come into effect.

Mr. BOREN. Mr. President, my colleague from Montana is always a person of great candor. I think he has spoken the truth, and the complete truth. He is absolutely right. The truth is on down that line. We have to make sure we do not undermine this thing if it is passed by exempting all after these areas. It really comes down to we have to pass spending bills that are within limits, and if they do not pay for all the programs, we have to raise the revenue if there is some essential program that people want, and we want to pay for it. He is absolutely right. I mentioned to the Senator from Montana before he came on the floor, and this is a matter that he and I have discussed. I already indicated my intention. I am going to vote enthusiastically for the Gramm proposal but I am also going to offer amendments immediately following thereon. The first one is going to be to impose the minimum corporate tax effective the 1st of October so that those corporations that are making billions in profits and

paying no tax will do their fair share before we ask others to make the contribution. I know the Senator from Montana has been very active in that. He agrees with that approach as well.

Mr. MELCHER. Yes; I say to my friend—and I do thank him very much for yielding—I have exactly the same intentions in regard to imposing a minimum tax on profitable corporations. I too will offer an amendment, and perhaps we will blend our amendments. But those things need to be done, and you cannot wait any longer. We have been putting it off for over a year just doing that one little step. It will not bring in enough money to balance a budget. But it will help correct the deficit.

Mr. BOREN. The Senator is correct.

Mr. President, the Senator from Connecticut has been waiting for a long time. I know he is under some time constraints. If my colleagues will permit, I would like to yield the floor so my friend from Connecticut may speak.

Mr. FORD. Will the Senator yield for a parliamentary inquiry?

Mr. DODD. I am glad to yield.

Mr. FORD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. FORD. Is there not or has there been recently a statute that directs the Congress to balance the budget?

The PRESIDING OFFICER. Public Law 95-435 contains that provision.

Mr. FORD. If that is in the statute now and we are not complying with it, what procedure is being used by this legislative body to get around the statutory provision?

The PRESIDING OFFICER. Is that really a parliamentary inquiry?

Mr. FORD. Is it? I do not know. I am not a lawyer, Mr. President. I am just asking the question in trying to find out something.

The PRESIDING OFFICER. The Chair is not a lawyer either. The Parliamentarian has to answer the question.

Congress by one law can assume the same provisions of another law.

Mr. FORD. So we can pass this into law and we could supersede it tomorrow by another law? Is that what the Chair is telling me?

Well, I will yield to the Senator and get a little more information.

I think I have made my point. I hope I have.

The PRESIDING OFFICER. I guess you are right. I would not bet on it.

The Senator from Connecticut.

Mr. DODD. Mr. President, first of all, I rise as a cosponsor of the Gramm-Rudman-Hollings et cetera amendment. I suppose, in fact it has come to my attention, this is seen by many as being somewhat of an unlikely coalition that I should be joining in an effort with my colleague from Texas, Senator GRAMM, along with others in such a proposition as we have before us today.

Mr. President, first of all, let me say as an aside that I happen to think these last several hours here have been the kind of debate that I wish we might have seen more of. It has taken this crisis and the fact that we must deal with the debt limit that we are engaged in this debate. I suspect that were it not for this sense of urgency, we would not be spending the time obviously on a Friday afternoon discussing this subject. It is regrettable that, for obvious reasons, we do not spend more time in such debate. If nothing else occurs this afternoon, certainly we have seen more discussion and more debate about what I suspect everyone else in this body agrees upon, and that is that the growth of the Federal deficit, particularly in the last 4 years, is certainly one of the one or two most important problems or crises that we face.

So I commence, Mr. President, by commending my colleagues for the debate and discussion about this subject.

I would like to first of all indicate a very important factor which drew this unlikely coalition together in support of this proposition.

There is only one reason that the junior Senator from Connecticut has joined with the junior Senator from Texas and others in support of this proposition.

This is a process question. This has to do with procedures over how we would try and deal with the Federal deficit.

I happen to believe very strongly that the proposed constitutional amendment to balance the budget and the proposed line-item veto are bad ideas as ways of trying to reduce that Federal deficit and to restore some soundness to our fiscal policies.

Those, as I have said on other occasions, Mr. President, are what I call bumper sticker politics.

The constitutional amendment, while it is an appealing notion politically, does not even give us the slightest indication of what process or procedure we would go through to achieve that goal. Some have suggested that we might as well add the eradication of ignorance, poverty, and diseases on such an amendment and it would have about as much effect.

The line-item veto is also, I believe, a simplistic notion that would defer to the President of the United States unwarranted power. It would destroy the delicate balance of compromise that must be engaged in as we wade through the budgetary battles of this body and the other body.

So, again I emphasize, Mr. President, that this is a process question which joins those of us who support this proposition.

There are problems with it. I have some very real concerns about the Gramm-Hollings-Rudman proposal. Let me just mention a few of them.

The PRESIDING OFFICER (Mr. COHEN). If the Senator will suspend, the Senate is not in order.

The Senate will be in order.

The Senator from Connecticut.

Mr. DODD. Thank you, Mr. President.

The first problem that I see is that I think the effects of this particular proposition are exaggerated. The Senator from Kentucky recently pointed out that there have been other statutes that have been adopted to try to deal with this very problem which have been circumvented.

I suspect that there are those at this very hour who are looking at this proposition who are already trying to figure out ways by which they can get around the intent of the amendment. I suspect that sooner or later they will enjoy some success in that endeavor. It would not be the first time that happened and it certainly would not be the last.

For those who suggest that this proposition is going to create a massive derailment of the existing balance of power between the executive and legislative branch, I think they are exaggerating the influence of this amendment.

Second, Mr. President, I am concerned that this amendment, if adopted, is going to extend even additional or further power to the Budget Committee. I say that with all due respect to those who serve on that committee. As one Member of this body, I feel very strongly that too much power has moved to the Budget Committee; that the authorizing committees particularly in their role in setting policy in this country have been diminished significantly over the last several years.

I do not like to see further and additional power accumulated in that committee.

Third, Mr. President, this proposition is certainly not perfect. The Senator from Oklahoma has already indicated that he will offer at least two amendments to this proposition, if it is adopted. I suspect that there will be others who will try to improve on what exists in the present draft.

Certainly, the issue regarding SSI, the possibility of minimum corporate tax, the length of time that a recession would have to be in place that my distinguished colleague from Michigan has raised on a number of occasions in the last 24 hours, I think could be very important and positive additions to this proposition. I intend to at least support some if not all of these amendments to this proposition to try and improve upon what I believe to be a very sound idea.

Certainly, we also do not know all the ramifications of this proposition. There have been those, I think with very good justification, who have raised the question of whether or not we ought to be acting as quickly as we may in these next several hours, to adopt a proposition that does have broad implications.

I am not opposed to the notion of delaying for a few days to give people an opportunity to examine this proposition. That does not mean that my support for the underlying tenets of this proposition are in any way diminished. But I have enough respect for my colleagues on both sides of the aisle here to know that people of good will and sound judgment can examine a proposition and make improvements upon it.

So we will be discussing it for the next few days.

There will be others who will examine this issue and examine this amendment and can improve upon it. I am not threatened by it. Certainly, the historic role of the U.S. Senate was to take the second look, to slow down the emotions of the hour. So, if such a proposition is made, I would support it provided that such a delay were not excessively long. I think that may well be in the interest of all concerned, including the authors and proponents of this amendment.

Mr. President, those are two or three concerns that I have about this amendment. But as strong as I feel about those concerns, they do not in any way outweigh what I think are the very positive aspects of this amendment.

The positive aspects are the following: It involves the President of the United States. President Reagan is going to have to make some choices. All of us in this Chamber and across this country have heard the President from time to time go before a national audience and call for a balanced budget. In fact, he has supported vociferously a constitutional amendment to balance the budget. But during that entire period of time over the last 5 years, while his voice has been strong and eloquent in calling for a balanced Federal budget, time and time again, the very same President has submitted to this Congress budgets which have increased on a yearly basis in the size of their deficits.

It is somewhat hypocritical to be, on the one hand, calling for balanced budgets and not submitting anything that remotely approaches a balanced budget to the Congress of the United States. The Gramm-Hollings-Rudman amendment, for the first time in 5 years, will insist that the President of the United States step up to the bar and make choices. I applaud that.

I suspect that at this very hour, and possibly my colleague from Texas can confirm this, there is some unease at 1600 Pennsylvania Avenue. I suspect that there is some unease in the Office of Management and Budget over what the implications and ramifications of this amendment will be if, in fact, they have to reach budget targets that deprive them of supporting certain budget expenditures that they find near and dear to their hearts. This amendment does that.

Second, it of course forces us to make choices. That is painful in politics, to make choices. It is so much more comfortable, so much easier to try to please as many constituencies and individuals as we have in our respective States, to go through our terms in office without antagonizing people whose values, whose principles, whose jobs, whose needs we identify with. But the hard truth in reality is that we cannot continue doing that, that we have to make choices in this body.

I suspect that PHIL GRAMM, the distinguished Senator from Texas, and I are going to fight like hell when we come down to making those choices. No one in this Chamber should suspect for 1 second that the Senator from Texas and I have changed our philosophies. I suspect he will be just as conservative at 5:02 p.m. on October 4 as he was the day he entered this Chamber. And I do not doubt for 1 second that the junior Senator from Connecticut will be just as progressive at 5:02 on October 4, 1985, as the day he entered this Chamber. What joins us here today is not some metamorphosis philosophically; it is a common conclusion that we cannot continue doing what we are doing without making some choices. And we are going to fight over those choices. We are going to have some knock-down-drag-out battles over what the priorities in this country ought to be.

But until we set up the process that insists upon that debate, we will continue inevitably and indefinitely on this sloppy, bumpy, pointless road we have been following for too many years. Let me say why.

If you are relatively conservative in this country, you are willing to deficit-finance anything that Pentagon wants and you can sell it. And if you are a pretty good liberal, you can deficit-finance anything out of the Department of HHS or Labor that you want and be OK. Depending on the mood of the country, how people are leaning in one year or the next ideologically, you get elected or reelected or defeated. But the problem is the sin is the same.

The sin of deficit financing is the problem. So whether you deficit-finance defense or housing or education, we create the same problem. We have to make some choices.

All this amendment does, with the flaws I have identified and the flaws we may discover over the next several weeks or several months, is say to the President of the United States and the Congress of the United States: Stand up and make choices. Do you have the guts to make them or do you not? You want to continue giving the great speeches about reducing the deficit and restoring fiscal responsibility in this country and avoid the actual decisionmaking and continue to exacerbate the accumulated debt and all the problems associated with it.

Why are there 350 bills on protectionist legislation sitting on my desk and every other Member's desk in this Chamber? Because of this problem.

Why are we not doing enough in education, housing, and other areas that I feel very strongly about? Because we are not doing anything about this problem.

I have spent 5 years around here trying to reduce the level of cuts. I would like to think we might get to the point, before I leave this Chamber, when I can actually propose legislation that might do something for those people that I feel strongly about. But if we continue going down this road for the next 4 or 5 years, I am never going to get that opportunity. I will be lucky to be able to do anything for them in the final analysis.

This amendment, with all its flaws, with all of its imperfections, I think, gives us that opportunity, gives us a chance to restore some soundness, to allow the debate, the kind of debate we have had here today, to proceed. Our constituencies will know where we stand. They will be able to make choices about the people they send to public office. They deserve that much, at least to know where their elected representatives stand.

As I said, we may find there are some things we need to have changed. But it is a statute, I say to my colleagues. This is not amending the Constitution of the United States. I suspect if the problem continues for much longer, this body and the other body will adopt a constitutional amendment to balance the budget. And that will be the tragedy.

That will be the real mistake when that occurs.

I might point out to my colleagues that in my home State of Connecticut, we narrowly defeated in our State legislature this year a resolution calling upon this body and the other to adopt a constitutional amendment to balance the budget. That is the frustration they feel. They were almost the 32d State to do so. I happen to believe that the adoption of this amendment, with improvements to it, or something like it, will certainly defer the demand, the rush, to adopt what I would consider to be a far more injurious proposition for dealing with the budget deficit such as the constitutional amendment and the line-item veto.

Last, I point out something I should have raised at the outset. I think it is regrettable that over the last 4 years, we have accumulated the debt we have. I hope this debate over this amendment does not deflect in any way from an assessment of who ought to be held responsible for the accumulation of that debt. I happen to believe that it is the President's budget policies. I say to my good friend from Texas, I opposed the Gramm-Latta proposition. I think it was a tragic mistake because it contributed to the very situation we find ourselves in today. Certainly, I hope over the next several days we shall lay out as clearly as possible for the American public to read and understand how we got into this situation. Unfortunately, discussing that for the next several days does not tell us how to get out of this situation.

Certainly, there will be a thousand questions raised legislatively, about exactly what the implications of this amendment will be. I think those questions ought to be answered as thoroughly as we can to allay the fears and concerns of our colleagues. But in the final analysis, I hope this proposition would enjoy more broad-based bipartisan support then it presently does.

I emphasize again in conclusion this is not a policy issue. This is not a substantive issue about where you are at certain issues. It is a process question. As far as this eye can see, it is the best alternative that has come before this body. I do not like the hour it is coming. I wish it had been raised 2 weeks ago so we might have more time to debate it. But I suspect if it had been raised 2 weeks ago or a month ago, we would not be debating it. It is because of the debt limit problem that we face that brings us to it this afternoon.

And so, Mr. President, while I would certainly consider the amendments to be offered by my colleagues to such a proposition, I think we do ourselves a great deal of good if we support this proposition with perfections and give us at least the opportunity to try it, just to try it. If it does not work, we change it, but give us at least the opportunity to try to reduce these Federal deficits and get about the business of trying to do something about these pressing problems we face as a nation. I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. RIEGLE. Mr. President, I have been listening with great interest to this debate and particularly to the most recent remarks of my friend and colleague from Connecticut that relate importantly to two or three of the points I would like to make. First of all, the Federal deficit is an urgent problem. I think we all understand that I think the trade deficit is an equally urgent problem. I happen to think that we ought to try to do tax reform. The President has put that first. I would put the Federal deficit and the trade deficit ahead of it, but clearly all three issues are ones which deserve our attention. We do need strong action and we ought to take it now. There ought to be something done on some kind of cooperative basis, I think between the administration and the Congress, both the House and the Senate. But I think it is very important, before we dive into this procedure that is offered by the Senator from Texas and the other cosponsors, that we take a minute and look at the history to understand how it is that we got into the present fiscal disaster. And I intend to see to it right now that we look at a little bit of that history because some of the same people who are putting forward this proposition were the architects for the blueprint that caused the very problem we have today. Back in 1981, the Federal debt was in the range of $1 trillion. We are meeting today to raise the debt limit because the national debt has doubled over that period of time and is now about to break the $2 trillion mark.

Well, I think we better figure out how it is we got into this fiscal hole in order to try to determine not only how we get out of it but we do so in a way that is not going to take us down another side road into another set of problems that we may not be properly anticipating. I say to my senior colleagues, those who have been around the Congress longer than I, we have established procedures in the Senate on serious propositions where we take them to the committees of jurisdiction; bills are submitted; they are brought up within the committees of jurisdiction; hearings are held; people have an opportunity to come in and testify on one side or the other, and gather a body of pertinent opinion. The committees of jurisdiction then meet. They report out legislation. It comes to the Senate floor. It comes with an accompanying report. If there are minority views, they are there. We have a whole foundation of work and careful attention to detail to have available to us before we make sweeping legislation decisions.

That is the way we have organized the work process around the Senate. I am struck by the fact that this is a proposition coming from the majority side of the Senate, the side of the Senate which controls the committee structure, controls all the committee chairmanships and subcommittee chairmanships and where it has been entirely within their prerogative to bring up a matter like this in the orderly process within committee and to have hearings on it, to gather evidence, to let people express their opinion so that we can craft it with some care if we are going to go down this road.

But that whole process has been put aside. It is very important for us to ask why, because it is illogical that it has been put aside. It makes no sense, on something of this magnitude and of this complexity, to short circuit the committee process and particularly so when the committee process is under the control of the party that is advancing this proposition. So I think you have to ask yourself; why has this committee process been circumvented? I think the answer is obvious. We are being wedged against a time deadline on the debt limit expiration because this proposal will not stand the kind of careful scrutiny it ought to have and that this country deserves to see it does have. It will not stand that kind of scrutiny, the light of day, open debate, careful deliberation, and so what we are seeing is an effort to ram it through, ram it through hurriedly, with the proposition being changed almost by the hour, certainly by the day, from one version to another version.

We hear all this hysterical talk that we have to act now; we cannot wait; we are on the 1-yard line; there has been all this delay.

As I reflect back over my 19 years in the Congress, when I have heard that kind of stampede mentality and verbiage used, it has been designed to try to ram something through, poorly designed, poorly thought out, that has not been sufficiently challenged. The hope is that somehow it will get jammed into law before people have a chance to take a close look and perhaps change it and, if not change it, perhaps put it aside altogether.

You might say, "Why would I have that particular concern in this case?" Well, I have other reasons to have that concern. As I go back and reconstruct how we got into this fiscal disaster, we got into it by passing a blueprint in 1981, in May, in the House of Representatives known as the Gramm-Latta budget resolution which set us precisely on the road to the disaster that we have arrived at today. When that package passed the House of Representatives with many of the same arguments, put as attractively as possible from what I have heard here in the last few hours, this is what was supposed to happen. The Gramm-Latta proposition of 1981, which was adopted, said that we would see the Federal deficit in fiscal year 1982 drop to $31 billion, if we would just pass Gramm-Latta. And then the fiscal deficit would drop further in 1983 to a mere $14.5 billion. And lo and behold, by 1984, we not only were going to have a balanced budget; we were going to have a surplus. That was the promise. That is what was offered by the same authors we are seeing and hearing today. When that package, as terrible as it was and as damaging as it

has been to this country, was offered in 1981 and later signed into law, we were promised a Federal budget surplus by 1984.

Well, my friends, it did not work out that way. I wish it had. But in fact it worked out exactly the opposite, in fact, so much so that we now have the most extreme fiscal crisis on our hands that we have seen in the history of this country, because we did not get the promised Gramm-Latta deficit of $31 billion in 1982. Instead, we got a deficit of $127.9 billion, and in 1983, instead of the promised deficit of $14.5 billion, no, the deficit came in that year at $207 billion. And in 1984, the year that Gramm-Latta promised us a balanced budget with a surplus, lo and behold, we saw a final fiscal deficit in that year of $185 billion.

What was the difference in the sum totals over those 3 years in terms of what was advertised and used as the basis for arguing and passing that resolution? We were told we were going to have a deficit of less than $50 billion cumulatively over the 3 years and in fact we got cumulative deficits of half a trillion dollars. They were off by a factor of 10 times.

Now, were they off because they did not know what they were doing? Were they off because they were devious and misleading? I do not know why they were off, but I know what the facts show. The facts show that they were off and they were off by a factor of 10 times. That is why we are here today, because we are in a fiscal disaster. And so when I hear the same people coming forward with the same arguments, saying we cannot take the time to deliberate this; we have got to do it in a hurry; we are at the 1-yard line; we have to pass it tonight and if we cannot pass it tonight then we failed our responsibility, well, we went down that route in May 1981 and look where it has brought us. It has brought us to a situation that is virtually unmanageable. And so now we are being treated to a repeat of exactly the same parliamentary tactics, and that is we do not have time to think about it. We have to rush. We cannot go through the hearing process even though we control the hearing process. We have to have action now. We have to have action tonight. We have to have action tomorrow, even though it means fundamental changes in the way our federal system works and has worked over the years since it was first initiated.

I am very troubled by the kind of stampede mentality in which we are told we have to accept this package. I remember when Gramm-Latta was passed in 1981. It was in poor shape—and I do not mean its architectural flaws, massive as they were. I mean just the literal text of it. In fact, jokes were made a long time after, because paragraphs were in the wrong place, people's names and phone numbers were in the text of the legislative document, because it was thrown together in such a haphazard manner. I do not want to see that happen this time.

We have already suffered in terms of a trillion dollar addition to the national debt because of the mistakes that were made in 1981, so I am a little skeptical. I have to say to the sponsor of this amendment that when I look at the history, I am a little skeptical, and I think Members on both sides of the aisle have a right to be skeptical as well.

There are a lot of problems with this proposal that have not been answered, and the Senator from Connecticut has mentioned some of them. A lot of the provisions are unclear, because there is no hearing record and care has not been taken to put this legislation together, because there is an effort to ram it into place, regardless of how it may work or fail to work.

Look at the recession trigger. As I read the recession trigger, it says it is based on a different test of the way we measure recession in this country. The standard test today, within the executive branch of Government and elsewhere, is that if we have two consecutive quarters of negative real GNP growth, that is thought of as a recession. At a minimum, that should be the test to use. Instead, a different test is proposed here to be applied, and that is a test that is over a period of a fiscal year. A fiscal year is a lot different from two quarters. It is four quarters.

Anybody who understands economics—and I think we all do, to some extent—knows that if we find ourselves moving into a serious recession and if the recession is advanced, and perhaps it has been going on during the better part of a year, the last thing we want to do at that time is to come in and, with an automatic procedure, start cutting away the safety net that is designed to stabilize the economy when it is plunging.

We spent years crafting those stabilizing mechanisms, so that when a recession starts, we can level it and turn it around, so that it does not go into a deeper recession or even a depression. So we do not want to trigger these very dramatic cuts in a recession cycle that would have the effect of cutting away the very things that could help us get out of a recession. We do not want to say to the unemployed people in this country, who need the things to enable us to get through a recession, that we are withdrawing the Government, at that time when it is designed to be there for that purpose.

This part of the bill has not been thought out, and it is no different, in my view, from the same ramrod, late-at-night proposition we saw with Gramm-Latta in 1981. We now have a trillion dollars of additional national debt on our back because of the failure of that plan, and I do not want to duplicate it.

I want to know what we are doing, and not just for the citizens of my State, although clearly for them. I want it for the citizens of every other State as well. We have a responsibility to be better legislators than we were in 1981 and not repeat the disastrous errors in judgments we made at that time. So I am concerned about that recession trigger.

I am also concerned about giving power to the executive branch that the Constitution vests in the Congress. I think that to continue to pile up power in the executive branch is a mistake, regardless of what party holds that branch of Government.

I am concerned particularly at this time, as this administration goes through its second term, that we have a President, as we all know, who is not terribly involved in the details on most of the major issues, and he relies on senior staff people, people who have not been elected by anybody, but appointed, often anonymous bureaucrats whose names we do not know. I do not want to vest in them the powers that have been vested in us. I do not want to see Congress willingly give away its responsibility to some unelected bureaucrat, and that is precisely what is designed here.

I am troubled by another point: If we adopt this proposal, we are putting ourselves in a straitjacket, and we may not have the power in the future to get out of that straitjacket.

As I read the way this would work, if this becomes law, with the support of the President's signature, if we come along later and Congress decides that we made a terrible mistake, as we did with Gramm-Latta in 1981, and we want to undo it, a majority will not accomplish that. We can have a majority in the House and in the Senate in the future that will say, "I made a terrible mistake and must undo this thing." We may have strong majority votes to take it off the books, but the President can veto it.

So we cannot easily get out of this straitjacket if it turns out to be as defective as the straitjacket we put ourselves in in May 1981.

In fact, we may not even get out of it if a President of the other party, of a different point of view, is elected in 1988; because we can find ourselves in a position where we may try to pass legislation to get out of this straitjacket—if we should put ourselves in it now, and I hope we will not—but if we do so, we may find that a new President in 1989 does not even get a chance to sign the legislation because we cannot even move it out of the U.S. Senate, because of a determined minority who may be able to use the rules of the Senate, in terms of the fil-

ibuster procedure and others, to prevent us from taking that particular law off the books.

So we face here a situation where we may find that a determined minority that wants to rule will end up in fact ruling, and for long after anybody imagines might be the case. That is why fundamental changes in law are not to be made abruptly, not to be made late at night, when there is a time crunch, and when there have been no committee hearings, no careful deliberation, and no chance to dig into the substance of how it will work.

Another concern I have has to do with the defense cuts. As I understand it, a major part of the defense budget is out of reach when it comes to making the cuts that are required under this kind of automatic process. If we cannot cut those areas and if the share of defense cuts have to come out of readiness and manpower, that may be a dangerous strategy for the country and may not be one we can safely follow. If we exempt that particular area, with the support of the President, those mandated cuts will have to fall someplace else.

I have served on both sides of the aisle in Congress, as has the main sponsor of this legislation, and I have had a chance to see it from both sides, but I will say this: If Congress surrenders its responsibilities and its authorities and powers under the Constitution by throwing up its hands and saying, "We botched the job so badly 4 years ago that we are going to surrender all responsibilities and our opportunity to fix it by putting ourselves into an automatic procedure and a straitjacket," then I think we have taken away much of the meaning of this job and much of the responsibility that we are here to carry, which we take an oath to carry and are paid to carry.

So I hope we will take the time it needs. I do not mean needless and long-term delay. I think a period of days—a week or two at a minimum—is the time we should take to make sure that we are not following a blueprint that is as much a disaster as the last blueprint we got in Gramm-Latta, in May of 1981. We cannot afford another mistake of that size and dimension.

I want to be sure before we act in haste, as we acted in haste at that time, that we are not making a mistake of an equivalent size, because we cannot afford to do so. I think we are out to the outer margins of the safety of our system today in terms of the debt buildup that I see in every direction.

So I could not feel more strongly about it. It seems to me that if we do not take the time to understand what we are doing, I would say that looking at the historical record both in terms of the haste of the procedure and the folks that were in charge of drafting the blueprint that we are likely to repeat that disaster only this time in just a different form.

We cannot afford it. We do not have to do it, and we ought to take the time to deliberate this thing with the seriousness that it requires.

I yield the floor.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, this Senator will probably vote for the amendment, but I think the Senator from Michigan has made a good point. We ought to know what we are doing.

The majority leader made the point I think very effectively that we ought to take our time on something this important. By "our time" I mean a few days. I think it would be very helpful to have hearings and have testimony on both sides of this issue so that we do understand this. It is a profound change.

The Senator from Michigan is exactly right that we should not make this kind of a change without a record and without the most competent people we can find discussing it.

Mr. President, when I say I will probably support this measure, I do so with a heavy heart but it is quite different than the view of everyone else I have heard speaking in what I think has been a very good debate today.

In my judgment, this amendment is too weak, it is too soft, it is too slow. If everything worked out right, we would eliminate the deficit 5 years from now in 1991.

I have great admiration for the Senator from Texas and for the other sponsors of the bill and those who may have spoken today, but 1991 is 5 fiscal years away. The country will have a Presidential election before fiscal 1991 begins and two congressional elections. Once again Congress will be going through the same motions we have gone through so often over the last 4 or 5 years.

After all, when the Reagan administration took office in 1981 it planned to balance the budget when—in 1984. When 1984 came, the country enjoyed the most prosperous year since way back in 1951, an ideal time to balance the budget. Balancing the budget should have been a breeze. What happened to the budget deficit of 1984? The deficit of 1981 had been $79 billion. How much did that Reagan resolution to balance the budget in 1984 actually achieve by 1984? The tragic answer was that in 1984 the deficit had not only not declined, it had more than doubled, more than doubled. It had risen to $175 billion. Some reduction.

Now we are being told just wait until 1991 and we will eliminate the deficit entirely. Does anyone in or out of Congress really believe that? Of course not. We did not do it before; we will not do it this time.

Mr. President, there is only one way to balance the budget and that is to balance the budget cold turkey—at once, right now. This Senator would prefer to kill any extension of the debt limit today forever. Vote it down. Kill it. Federal employees, including Senators, might receive little or no pay for a while. The Federal Government would not pick up our travel costs. Our staffs might go payless. All the people in here who are employees, including the doorkeepers, the reporters, and the people at the desk would have to wait for their pay. In fact, the utility might turn off the lights in the Senate.

None of that would be a catastrophe. But there could be some serious hardships.

It is my understanding that although the Social Security fund now operates with a surplus, Social Security payroll tax money has been kicked into a common pool. I think that is outrageous, but I think I understand that is exactly what happened. And the cash balances have been drawn down so that Social Security checks might not go out on time for pensions, Medicare, and so forth.

Welfare payments, Medicaid, Social Security disability payments, veterans' pensions, veterans' health care all would be lacking funds.

The hardships would be obvious and the hardships would be cruel. They would be imposed on innocent people who had no responsibility for the deficit.

So, unfortunately, it is simply not practical to slam the door shut on borrowing right now for good. But, Mr. President, we should try very hard to do exactly that. We obviously cannot do that between now and early next week when the Federal Government runs out of cash. But we should not give the deficit 5 years either.

We should serve notice now, today, to the administration that the Social Security account is in surplus and all funds from now on from payroll taxes and other Social Security sources of income will be strictly segregated and be used only to pay Social Security benefits, nothing else.

We should then raise the debt limit by precisely the amount necessary to take the Federal Government through December 31, 1985, the next 12 weeks. That means we should not raise the debt limit to well over $2 trillion ever, ever.

How much should we raise it? At this moment the debt limit is $1,825,800 billion.

Based on our experience in fiscal year 1985 that ended on September 30, we should raise the debt limit to only $1,896 billion. Why that figure? I arrive at that figure by adding 1985

fiscal deficit for October, November, and December. That is $72.5 billion. The addition of $72.5 billion to the present debt ceiling will give Congress not 5 years to act but just 12 weeks to act. We will have a very short deadline to make some very deep cuts in spending. We will also obviously have to raise taxes. How much? Well, by enough to make the difference between what we find we have to spend to keep our Government going with essential services and what it takes to meet our obligations as a nation, on the one hand, and what our present tax system will raise in the period beginning January 1, 1986, on the other. We raise taxes to make up that difference.

The United States would go on a pay-as-you-go plan virtually cold turkey. That is just as fast as is practically possible. Congress would serve notice that the deficit nightmare has been banished. It is over, gone.

What would be the result? Would this country be better for it? You betcha.

Mr. President, think of how the country would gain a virtually immediate cold turkey pay-as-you-go policy. No. 1, the Federal Government would stop borrowing immediately. Lenders all over the country and indeed all over the world would suddenly wake up to the fact that the U.S. Federal Government deficits were over with, gone, finished. This colossal demand for credit that absorbs more than half of all the savings of American people would suddenly disappear.

With that kind of drop in the demand for credit, what would happen to the price of credit or interest rates? Is it not obvious? The interest rates would fall and they would fall sharply and go into a prolonged happy nose dive.

That would be simply the mechanical effect of a cold turkey transition as pay as you go.

The pyschological effect of this sudden transition would be even more profound. Foreign governments and bankers and businessmen, and even more important, American businessmen and lenders, would understand that this would not just be rhetoric, not just another empty promise. They would know that Congress is determined to end the Federal deficits and has done it. It would be a clear, definitive fiat accompli. The American people would know that low interest rates were here to stay.

What effect would this cold turkey treatment have on American foreign trade? That is easy. We know the deficits have bloated the dollar as foreigners have sold their currencies to buy high-yielding, risk-free American securities. With pay as you go the supply of American securities would dry up. Net foreign borrowing from foreigners would quickly convert into net foreign investment by Americans investing abroad. The dollar would drop, sharply and swiftly in relation to other currencies. American autos, steel, and computers, radios, and everything else we have exported in the past would become very attractive buys to foreigners. Foreign tariffs and quotas would impede this increase in export but American products would once again reclaim the American market. We would have revival of industries that have been flat on their back since 1982. And what industry would gain the most? The industry that suffered the cruelest setback, as the distinguished Senator from Nebraska knows so well, agriculture. The hard working, efficient American farmer today is in deep depression trouble. A sudden, swift pay-as-you-go Federal Government transition would put the American family farmer on its feet like no other medicine we could administer.

With the dollar down 40 or 50 percent in value, and that is what would happen with this kind of dramatic and sudden traumatic change, American produced soybeans, corn, and wheat would flow in abundance overseas. Farm prices in the marketplace would recover vigorously and that is not all the farmer would enjoy. No single group in America would benefit more from the very sharp and swift drop in interest rates that would accompany pay as you go than the American farmer. The farmer is necessarily an overwhelming borrower. High interest rates as well as the high dollar today are killing him. Pay-as-you-go would knock out both.

Mr. President, what empirical evidence is there that this kind of sudden, traumatic treatment would work? Well, it has worked in the past, and I can cite where. The most impressive experience with the application of an overnight pay-as-you-go system on a national economy was post-World War I—not World War II, World War I—Germany. In the early 1920's, the German economy was staggering under the twin blows of a war-ravaged industry plus the imposition of huge reparations by Allied Governments. Its outlook seemed bleak. What did the German Government do? It drastically cut its spending, including the layoff of more than a fourth of its Federal Government personnel. It raised taxes sharply. And, above all, it went on a pay-as-you-go basis—no more borrowing.

What happened? The massive inflation ceased. Prices dropped. Prices actually dropped 8 percent during the next year. And how about unemployment? Did not unemployment rise? No, it did not. Unemployment diminished and employment increased sharply. Germany made the grade.

Earlier this year, Argentina confronted an economic crisis that had forced literally 1,000 percent inflation. It was meeting its Government spending by printing about 25 percent of the money necessary to make up for the difference between its spending and revenue. President Raul Alfonsin proposed a radical economic program. The heart of that program was to end the Government's deficits and go on a pay-as-you-go basis at once. Now, it is too early to tell what will happen finally in Argentina. But in the couple of months since the program was put into effect, it has won astonishing public support.

Argentina is a very difficult country to rule. It has Peronista labor unions that are very tough, indeed. But people are astonished by the support for this program and it seems that it is on its way.

Both Germany and Argentina suffered real economic devastation from sky-high inflation before they moved to a pay-as-you-go basis. Most of those who have thought about pay as you go as a national policy have assumed the United States will not adopt it until we have huge deficits that have pushed the American economy into triple- or quadruple-digit inflation, with all the misery that will bring. Those cynics may be right. Any Senator who has been listening to his constituents in the past several months must recognize that the American people are ready right now for pay as you go, tough and painful as it may be. I think the American people are right.

Will the Senate agree? Will it refuse to raise the debt limit? Will this body put our Government on a pay-as-you-go basis right now today? Well, probably not. In all likelihood, the Senate will make the same old mistake we have made for some many years, and once again advance the debt limit—this time to more than $2 trillion.

Eventually, I am sure that the Congress will wake up to its responsibility to end this cowardly collapse to economic irresponsibility. The sooner we end it the better. In this Senator's view, we should do it now. Today.

Mr. President, I say once again that I will probably support the amendment, but I do think it could be greatly improved. It could be put into effect not over a 5-year period, when all kinds of things can happen, including a recession that might set it back and force the Congress to feel it has to change the law, but to do it at once the way it has been done elsewhere.

If we do not do that this year, I hope we do that sometime in the future.

Mr. President, I yield the floor.

Mr. HART. Mr. President, there is a suggestion by those sponsoring the pending legislation that some in Congress and the Senate, particularly on this side of the aisle, are delaying action on this matter. That is not the case. Drastic actions need be taken to force action on this matter.

The issue is not whether we should vote. The issue is when we vote and whether, when we vote, we all know what we are voting on.

There is a saying that most of us heard the first day we walked into law school that "hard cases make bad law." I have not been in the Senate as long as many. The Senator from Wisconsin is one who has been here many years; the Senator from Mississippi, Mr. STENNIS; and the Senator from Louisiana, Mr. LONG.

It would be interesting to know from those more senior whether they are aware of any major change in the laws of procedures or balance of power of the U.S. Government that have been done in haste that have worked.

Mr. PROXMIRE. Will the Senator yield?

Mr. HART. Yes; I yield to the distinguished Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I could not agree more with the distinguished Senator from Colorado. He is absolutely right.

As the Senator knows, we have hearings on these matters, we have people come in to testify, the most expert people we can find. We should do that over 2 or 3 or 4 days and develop a record so we know what we are doing. Then we should have a debate. And maybe in that period of 10 days or 2 weeks we could act, knowing what we were doing and do it right.

As I say, I am inclined to favor this amendment, but I think it is a great mistake to make what is probably the most serious change we have made in American policy without hearings and without any substantial period for debate or discussion.

Mr. HART. I thank the Senator.

I just wanted the leadership to know once again, because there is some suggestion that there is a conspiracy to delay action or postpone or deny action, that that is not the purpose of any Senator in this Chamber that I am aware of or any Senator at all.

I believe there is a constitutional obligation on the part of Senators to know what they are voting on. I hear the Senator from Texas saying we are on the 2-yard line and we want to score. Well, I do not know, what in the world that means. This is not a football game. It is not any kind of contest. It is a question of how to solve one of the most perplexing issues facing this Government.

If the Senator from Colorado had any more time, it would take a long time to discuss how we got into this fix. The Senator from Colorado happens to believe it is failed policies, not failed procedures.

But I know the leadership wants to try to sort its way through all this. I just think it is important for everybody to understand that there are Senators who neither support nor oppose this measure that want to know, in a lot more detail than we have found out yet, what is going to happen if this measure passes, and it probably will. Because I do not want to be one of those who, a week from now or a month from now or a year from now, is second-guessed by outside observers or experts or constituencies hurt by this measure, who say, "Didn't you know what you were doing? When you passed that tax cut in 1981, didn't you know you were compounding this deficit? When you authorized $1 trillion on defense in increasing spending, didn't you know you were compounding this deficit?"

Well, I think it ought to be clear before any vote is cast—and that vote can be within a reasonable period of time, a very reasonable period of time—what the impact of this measure is going to be to the degree human intelligence can tell us. We have not heard those questions answered yet.

So I would just urge that we have some limited period, a specific period of time, with a guaranteed time to vote in the reasonably foreseeable future, so that we know what we are voting on.

Mr. DOLE. Mr. President, I thought in the last couple of hours I might be able to reach some accommodation and visit with the minority leader, but I apologize to the minority leader that I have not been able to do that.

Again, I do not have any quarrel with anybody who thinks we ought to discuss this. This is an important change. So I am not here to quarrel on a partisan basis or any other basis.

Again, I have checked with Treasury to make certain that they are leveling with us as far as Monday is concerned. The world is not going to end on Monday, but I understand it will cause some inconvenience and might cost some taxpayers' funds. But I assume if there is a little fudge factor, at least I always did when I was chairman of the Finance Committee. There always seemed to be an extra day or two there built into their letters. That is true of any administration. I do not single out any administration.

I do not disagree that we ought to discuss the amendment and we ought to discuss the Chiles amendment. As I understand, the Senator from Colorado pointed out earlier he is not singling out this amendment. The other amendment has the same concerns; the same questions will be directed at that amendment as this amendment.

So I do not suggest there is any partisan game going on. I assume there will be some Republicans voting for the Chiles amendment and some Democrats voting for the Gramm-Rudman-Hollings amendment.

I know one way to do it is to say, "Well, let's just have an extension for a few days of the debt ceiling and then try to work it out." And that may come to pass.

But it seems to me, in the meantime, what I would like to do is propose that we vote on the Gramm-Rudman-Hollings amendment at 2 o'clock tomorrow. I make that unanimous consent request.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object. I think we have been through this already. We do not need to go through it again.

We on this side are ready to help the distinguished majority leader to pass a measure extending the debt limit for a week, 10 days, 2 weeks, or whatever and with a figure therein commensurate with the time period for the extension. In the meantime, we will have an opportunity to look through the newly modified measure at the desk. Most of us have not had a chance to look at it.

I do not know what changes have been made therein. But in the meantime I think that on Monday we would have an opportunity to take the matter to our conference again. We could hope to work out an agreement by which we would set a date and a time, I would hope, for a vote on the Gramm amendment, and for a vote on the Chiles amendment, and on other amendments. That no one would be hurt, the Government would not stop operating and I think we would be better prepared to cast our votes if we knew more about the amendments that I mentioned.

So that being the case, if the distinguished majority leader was putting a request, then I would have to object.

Mr. DOLE. I was putting the request.

The PRESIDING OFFICER. Is there objection? Objection is heard.

Mr. DOLE. I assume if I made that 4 o'clock tomorrow, it would not make any difference. [Laughter.]

The point is, the distinguished minority leader indicates that they need more time, and whether it is 2 o'clock, 4 o'clock, or 6 o'clock—I am not going to make all those requests—I think it is clear there will not be a vote tomorrow.

I think many Members on this side and some on the other side who support the Gramm-Rudman amendment feel if in fact there is an emergency as we are told there is, and if in fact we have an opportunity to also address deficit reduction, we ought to seize it: If it is an emergency, it ought to be treated as an emergency and we ought to try to deal with it. I have had a call since 4 o'clock from the chairman of the Ways and Means Committee on the House side, Chairman Rostenkowski, who is indicating pretty much the same thing. They are not certain just what the Gramm-Rudman amendment may do. It is very complicated. They are not yet prepared to deal with

it. At the same time, as I have indicated, I am not certain we could pass a 5-day extension or a 10-day extension. I think there are enough Members on both sides who want to try to see if we can come to grips with both the debt ceiling extension and a new way to approach deficit reduction. That may disappear in a few days. Things do have a habit of changing. But for the present moment, let me say that I talked with 20 or 25 of my Members in the past couple of hours. I cannot find any consensus. In fact, I cannot find many who think we ought to extend it at all. The debt ceiling we have known for some time had to be extended. Maybe it should have been brought to the Senate's attention earlier. And I do not disagree that the Gramm-Rudman amendment was offered only on yesterday. It was modified not to any great extent today but there was a modification. I have only seen an outline of the Chiles proposal but in looking at the two side by side, I note a number of similarities, the biggest difference being that in the Chiles proposal about one-third of any deficit reduction would come from revenues.

Mr. President, I do not want to offend the sensibilities of any of my colleagues. But it seems to me that we should be here tomorrow to give those who have serious questions about the amendment an opportunity to discuss the amendment. I understand the sponsors of the amendment will be here, and that they are prepared to address the questions of the Senator from Colorado, the Senator from Wisconsin, or any Senator on the other side, and some Senators on this side. It is not unanimous on this side.

It appears there will be no opportunity to vote tomorrow, but at least I hope we would have an opportunity for discussion and then decide whether or not to vote on cloture on Sunday afternoon or on Monday because if we do not vote until Monday, we have lost another full day. If in fact there is an emergency on Monday, then I am not certain we should lose another day.

Mr. HART. Will the leader yield for a question?

CLOTURE MOTION

Mr. DOLE. Mr. President, let me first send to the desk a cloture petition.

The PRESIDING OFFICER. The cloture motion having been presented under the rule XXII, the Chair, without objection, directs the clerk to read the motion.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment No. 730, as modified, to H.J. 372, a joint resolution increasing the statutory limit on the public debt.

Bob Dole, Al Simpson, Bob Packwood, Phil Gramm, Rudy Boschwitz, Chic Hecht, Jake Garn, Malcolm Wallop, Ernest F. Hollings, Orrin Hatch, Steve Symms, David Boren, Thad Cochran, Warren B. Rudman, John Danforth, Slade Gorton, Mark Andrews, Gordon Humphrey, Strom Thurmond, Mitch McConnell, Bill Cohen, Edward Zorinsky, Richard G. Lugar, John Warner, Frank Murkowski, Alphonse D'Amato, Ted Stevens, Chuck Grassley, Daniel J. Evans, Jesse Helms, Barry Goldwater, Thad Cochran, Bob Kasten, James A. McClure, Paul Laxalt, Don Nickles, James Abdnor, Paul Trible, Pete Wilson, and Pete Domenici.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

Mr. HART. Will the distinguished majority leader yield for a question?

Mr. DOLE. Yes.

Mr. HART. Mr. President, will the leader yield to tell the Senator what the objection would be to the agreement by which we would vote on the full extension of the debt ceiling on Monday with a consent agreement that there will be a vote up or down on the Gramm proposal or any others by, say, a time certain on Wednesday or Thursday of next week? What is the objection to that? Certainly no one can object to postponing.

Mr. DOLE. No; again, I do want to be conscientious as I said earlier. It seems to me we have to come to terms on something like that sooner or later. But I think the point is that we are scheduled to leave next Thursday evening because of an official event that takes several Senators away from Washington.

Mr. HART. That is why I said Thursday night at 5 o'clock.

Mr. DOLE. Again, I think it may have to be in consultation with the House at the same time. If they do not act, then we do not complete action next week. So I just hope perhaps between now and tomorrow sometime I will be in a better position. But I think, as I understand, there is no Democratic caucus until Monday morning. Is that correct?

Mr. BYRD. Yes; I reserved Monday for a conference.

Mr. HART. So there is no specific objection to that procedure.

Mr. DOLE. I think, if in fact we are locked in concrete, and we were certain that the House would respond, I think we would be moving very responsibly. I do not see that as a delay. There may be a reason to debate this amendment or any other amendment for some time. But I do not know how the House will react and how quickly they will respond if we wait until Wednesday or Thursday to send them the debt ceiling extension with an amendment—which may or may not have the Gramm amendment, maybe Chiles, maybe there will be other amendments. But I do have a meeting with the chairman of the Ways and Means Committee scheduled for Monday.

Mr. HART. So the concern is really the House, not so much as the Senate?

Mr. DOLE. I think we have to get consent here. We cannot control the House. If we can get some agreement here, that would end our responsibility, I would think.

ORDERS FOR SATURDAY

Mr. DOLE. I hope there is not too much objection to coming in tomorrow at 10 o'clock and giving those who want to debate the matter an opportunity to do that. And I apologize because I announced earlier that there would not be a Saturday session. At that time I did not know we would be in this predicament either.

RECESS UNTIL 10 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that once the Senate completes its business today it stand in recess until the hour of 10 a.m. on Saturday, October 5, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

Mr. DOLE. Further, Mr. President, I ask unanimous consent that following the two leaders under the standing order there be a special order in favor of the Senator from Wisconsin [Mr. PROXMIRE], for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. Following the Proxmire special order, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond the hour of 10:30 a.m. with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. I think following routine morning business, the Senate will resume consideration of House Joint Resolution 372, the debt limit. Again I must say to my colleagues, based on the objection to the unanimous-consent request, I do not anticipate votes but that does not preclude votes. I will advise my colleagues that votes could occur tomorrow, even if they be other votes. I think it is fairly certain to assume there will be no votes on the amendment itself.

As far as Sunday is concerned, I am now inclined to believe that we will probably have a vote on the cloture petition just filed about 4 o'clock Sunday afternoon.

Mr. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. DOLE. I am happy to yield.

Mr. BYRD. Mr. President, if it is the intention of the distinguished majority leader to bring the Senate in on Sunday, will he not get consent now so that all Senators on both sides of the aisle will know we will have a Sunday session?

ORDER FOR RECESS FROM SATURDAY UNTIL SUNDAY, OCTOBER 6, 1985, AT 3 P.M.

Mr. DOLE. Mr. President, I ask unanimous consent that on Sunday October 6, 1985, the Senate convene at 3 p.m.

The PRESIDING OFFICER (Mr. SYMMS). Is there objection? Without objection, it is so ordered.

Mr. BYRD. This would mean that the cloture vote could occur on Sunday.

Mr. DOLE. Yes, but not before 4 o'clock.

Mr. GRAMM addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. BYRD. Mr. President, will the distinguished Senator indulge me for a moment?

Mr. GRAMM. Yes.

Mr. BYRD. Can we inform Senators on both sides of the aisle there will be no more votes today?

Mr. DOLE. Yes.

ORDERS FOR SUNDAY, OCTOBER 6, 1985

RECESS UNTIL 3 P.M., SUNDAY, OCTOBER 6, 1985

Mr. DOLE. Mr. President, with reference to convening Sunday at 3 o'clock, that request was made and agreed to. I ask unanimous consent that when the Senate completes its business on Saturday, it stand in recess until 3 p.m., Sunday, October 6.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

Mr. DOLE. Following recognition of the two leaders under the standing order, Mr. President, I ask unanimous consent there be a special order in favor of the Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. DOLE. Following the Proxmire special order, Mr. President, I ask unanimous consent there be a period for the transaction of routine morning business not to extend beyond 4 p.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. And then under the provisions of rule XXII of the Standing Rules of the Senate, a live quorum will begin at 4 p.m., to be followed by a cloture vote on amendment 730, as modified, to the debt limit extension bill.

Mr. President, I thank the distinguished Senator from Michigan for letting me wrap up the Senate's business and I now yield the floor.

Mr. BYRD address the Chair.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Mr. President, if the distinguished Senator from Michigan will indulge me briefly, may I ask the Chair is there a standing rules change included in the modification that was sent to the desk?

The PRESIDING OFFICER. There is.

Mr. BYRD. This will mean that in order to invoke cloture—I think I should say this for all Senators on both sides of the aisle who may read the RECORD—a two-thirds vote will be required. In other words, two-thirds of those Senators present and voting will be required to invoke cloture on this measure because of the fact that there is at least one or more changes in the Standing Rules of the Senate involved, am I accurate?

The PRESIDING OFFICER. The Senator is correct.

Mr. BYRD. Mr. President, I thank the Chair. I yield to the Senator from Michigan.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

Mr. GRAMM. Mr. President, all day long we have heard discussion about the need for debate and the need to have questions answered. I am here to debate, and I am here to answer questions. In fact, I have gone through this proposal three times today in the minutest detail. I have answered questions today from those who wish to discuss the merits. I would be willing to yield now to anyone who would like to ask me a question about this proposal.

If there is anyone who would like to debate this measure, who would like to know more about it, who would like to cast an informed vote, I am here and I would be happy to have the opportunity to answer their questions or to engage in debate.

Mr. President, I do not see anybody here to debate. I do not hear any questions to answer.

The truth is, it seems to me, Mr. President, that while this is a complicated proposal in so many ways, it is very simple in so many other ways. I think the choice is clear. I think it is important that we vote.

It seems to have escaped the attention of so many Members that we still have to go to conference with the House if we adopt the Chiles amendment or the Gramm-Rudman-Hollings amendment. We have to have a conference. We have to discuss the amendments which would be included in our debt ceiling and not in theirs. I have already contacted the House leadership and offered to sit down with them and answer any questions and attempt to work out any concerns they have so that we might have a quick conference and so that we might bring back the debt ceiling, paying our bills, calling in the credit cards, before the time limit expires where we have to reduce the functions of the Government and reduce the services and payments to our people.

But, Mr. President, I do not see any inclination on the part of those who oppose this measure to discuss it, to debate it, to pose questions. It seems to me that there is a determination to wait and let the clock run out on the debt ceiling.

Maybe there are those who hoped we could escape this debate, who hoped we could pass the debt ceiling and have a cooling-off period and maybe the American people will forget about the issue.

But let me assure them that while I can speak for only myself, I have talked to a lot of Members today, a lot of Republicans and a lot of Democrats. I can assure my colleagues that while there may not be 50 people right now who would refuse any temporary increase in the debt ceiling that does not include this provision, we are close to it. If anybody thinks that we are going to run away and leave this issue and let the American people tire of it and move on to something else, I think they misjudge this body.

I do not believe there is going to be a temporary debt ceiling increase. We are either going to do an increase for the entire year with this provision on it or we are not going to raise the debt ceiling.

Mr. PROXMIRE. Will the Senator yield?

Mr. GRAMM. I will yield in just a moment.

But come Tuesday, Wednesday, or whenever the clock runs out, I do not want it said that the Senator from Texas is "holding up my mamma's Social Security check." I want my mamma and everybody else to know that I am ready to raise the debt ceiling.

I want to do what my mamma taught me. When I was a boy, my mamma was a practical nurse and we would get together and decide which bills we were going to pay. We knew we had paid this doctor last month and we did not have to pay him this month. But when we had problems of living within our budget, we sat around the kitchen table and worked it out. I do not believe my mamma would want me to raise the debt ceiling without working it out for the Federal Government.

So I will never vote to raise the debt ceiling on a temporary basis for a

period of time to allow us to run away from this issue. I suspect that perhaps the majority feel the same way.

So come Tuesday or Wednesday when the Government is collectively shutting down, I hope no one will point the finger at me and say, "That Senator from Texas is the reason that the debt ceiling has expired."

I am ready to vote on it today, Mr. President.

Mr. ARMSTRONG. Mr. President, will the Senator yield?

Mr. GRAMM. I am happy to.

Mr. ARMSTRONG. I do not want to get ahead of the Senator from Wisconsin. I wanted to pursue the point that the Senator from Texas raises.

Mr. PROXMIRE. I have great admiration for the Senator from Texas. I had intended to vote for his amendment, and I intend to vote for it now. The Senator has certainly been making himself available as the author of the amendment. That is a real accommodation.

Does the Senator appreciate the fact that the Senator from Texas has a strong bias here as he should have? He is for the amendment, all the way.

The minority leader, Senator BYRD, earlier in the day made clear how complicated this amendment is and that we should have an opportunity to hear from people who have a contrary view. We should understand this very thoroughly before we go into it. It is a profound change, the most profound change I can think of in recent years in the deficit and the approach to solving this deficit problem. It is ingenious.

Does the Senator understand in all sincerity, whether we are for this or against it, we ought to know what we are doing and we ought to take time to discuss it?

Mr. GRAMM. If the Senator's question was posed 10 years ago or 5 years ago, it would have been an eminently reasonable proposal and the question would have been easy to answer. The answer would be yes.

But we are raising the debt ceiling to $2 trillion. We have said for 10 years running, let us not do it now. Let us go ahead and raise the debt ceiling. Let us look at this thing, debate this thing. Not this proposal, not now.

I recall the words of our President: If not us, who? If not now, when?

I am hoping to go home and have supper with my children, but if somebody really wants to know what is in this amendment, I will go to supper with them and I will pay the bill to get an opportunity to talk to them about the proposal. I know that there are uncertainties. But I remind my colleagues, the reason we have to act is to go to conference.

I have contacted the Democratic leadership in the House and said, "I am willing to meet with you now so we can begin to work out differences. I do not claim to have any monopoly on wisdom. If you have suggested changes or proposals, let us meet all we can and try to work out and get a proposal."

You say you liked this proposal and the House leadership has said that. Let us sit down over the weekend and work it out so that when we act, we can go to conference. You do not have a proposal but we have one. We work out a compromise, you accept it, we go back and we raise the debt ceiling.

So there is time for debate but the hour is late.

I take the question of the Senator from Wisconsin very seriously and respectfully.

My concern is if we let Congress off the hook again as we have done so many times, this historic moment to do something that I think is vitally important will pass. Our colleague from Michigan got up today and gave a very eloquent speech about the failures of the Gramm-Latta budget. Let me assure my colleagues that I am painfully aware of it. We promised in 1981 that we would do some things in that Gramm-Latta budget, and I am the GRAMM of the Gramm-Latta.

We said we would put America back to work. Our program did it. Eight million jobs in 4 years.

We said we would stop inflation. We brought it to a standstill.

We said we would rebuild defense, and we did.

We said we would save Social Security, and we did.

We said we would cut taxes and provide incentives for people to work, save, and invest. And we did.

We said we would balance the budget, and we did not. I have an opportunity here today, it seems to me, an unusual opportunity that may not come again.

With a $2 trillion debt ceiling, this is not some hold-on decision that the public is going to sleep through. The public is awake. The public has seen this proposal, which seems to them reasonable.

I do not want to let this opportunity pass, because this proposal will do what I promised our program would do—put people to work. We have already done it. Rebuild defense; we have already done it. Stop the inflation; we have already done it. Cut taxes, we have already done it. Save Social Security; we have already done it. But we have not balanced the budget. This will do it. That is why I am for it.

That is why on this issue, as far as this individual freshman Senator is concerned, there is not going to be any compromise on this issue. I am happy to yield to my colleague from Colorado.

Mr. ARMSTRONG. Mr. President, I rise for two reasons, first to compliment the Senator from Texas and also his cosponsors, especially the Senator from New Hampshire [Mr. RUDMAN], for a really remarkable presentation today and in the days leading up to this debate.

I think they have done a wonderful service to the Senate and to the country, and I compliment them. I congratulate them for the effort and I salute them for what I think is going to be a very significant victory.

I do want to say to the Senator from Texas that I have agreed with just about everything that he said. But in the last few minutes, he has skated out on what I think is a treacherously thin patch of ice.

In his desire to be accommodating to those who may have a different point of view than ours, he came close to hinting that somehow, it was essential to increase this limit on the debt. It may be that the Senator's mother in Texas thinks that is necessary and it may be that the other body thinks that is necessary. But there are some Senators who really do not think that is necessary at all.

My first preference is the passage of the Gramm-Rudman amendment. If that should be added to the extension of the debt limit, I would for the first time—maybe the last time, but certainly for the first time—in my life vote to increase the national debt. But I must say if that does not happen and we are not able to amend the bill, I shall be perfectly content, indeed I shall be cheerful, at the prospect of simply defeating the bill, leaving the limit where it is. It is already high enough.

All this talk about Monday being a crisis, the Government grinding to a halt, no bills being paid, is absolutely pure unadulterated bunkum, in my opinion. We have faced such deadlines before. We have passed the drop-dead moment in the past, we have gone up to the brink, then past the brink by 1 day, 1 week, 2 weeks, 3 weeks, 2 months—the reality is that this is all exaggerated.

What if we never increased the limit on the national debt? What if we never did it—not for a day or for a week or a month, but forever. What if we said this indebtedness on the part of the Government at $1.8 trillion is plenty? What would happen?

Nothing too serious would happen. We would not have to disband the defense of this country. We would not have to dismantle large segments of our economy. We would simply be on a cash basis. And it is not a lot different than businesses or families find themselves in when they find themselves cut off at the bank.

They begin to scale back their expenditures. There is no doubt it would be a painful process. It would be a process that some people would think would be too painful. But the Senator

from Colorado does not think that. In my opinion, that would be a responsible alternative, even a good alternative, and a vastly preferable alternative to the passage of an additional increase in the national debt without some stringent measure of budgetary reform.

I just wanted to note before we adjourn for the day that there may be some who are dreading the prospect that somehow we might delay the increase in the national debt. I, for one, think that would be wonderful. If, you know, Mr. President, by some chance, somebody wants to filibuster the whole thing, that would suite me to a T. I do not intend to do it. I am not much of a person to filibuster an issue of this kind. But if somebody should come forward and say, "I am going to filibuster this with or without the Gramm amendment," I should cheerfully head out to Colorado for a day, a week, or a month while that issue is being filibustered and would consider it all to the benefit of the country.

Let me close as I began by congratulating the Senator from Texas, who has contributed so much to getting this thing turned around. I hope in the next few days, we will be able to sound out three cheers for the Gramm amendment when the measure they have advanced is not just passed by the Senate but signed by the President.

Mr. MATTINGLY. Mr. President, I would like to offer my congratulations, as the Senator from Colorado has, to the Senator from Texas on this proposal that he has. I think it is sort of ironic that here we see standing on the floor three authors of four strong budget proposals. I wish Senator THURMOND were here. He would add the constitutional amendment to balance the budget. We have Senator ARMSTRONG, advocate of giving rescission power to the President, myself with the line-item veto, Senator GRAMM with the Gramm budget proposal.

I agree with Senator GRAMM. We are down to the 1-foot line. I agree with the Senator from Colorado. I, for one, would not let that debt ceiling increase. We have to change the way we are doing business. I think what the Senator from Texas is doing is he is not satisfied with the status quo. We are not going to be satisfied with the status quo, we are not going to let it go on the way it has been going on.

Finally, we are getting down to the point where we are going to have to answer the question: Do you want to go ahead and do business in this country the way we have been doing it, which has failed? Or do we now really want to make a fundamental reform and change? They can say it is too complicated. In fact, it is not complicated. There really is going to be a change of temperament from some of the people we have here in this body. We either have to make some difficult choices which, in the past, they have not had to make.

In other words, it is easier to go ahead and spend more than you are taking in. People in the galleries and people west of the Potomac cannot do that. The Senator's proposal is going to bring that to an end.

I hope that now, as we close this evening, but eventually, we are going to come to an up-or-down vote on his proposal and they will make a change to require that. I congratulate the Senator.

Mr. GRAMM. Mr. President, I thank my colleague from Georgia. I would like to thank him for another reason. My colleague from Georgia has been the leader on the line-item veto proposal. It would have been easy for him to have stepped forward and said, "No, I am not willing to let this be the unified position of our conference; I want my line-item veto on as well," and we would have had two strong proposals and people would have been torn. I think a lesser man would have refused to step aside and let this vehicle be used. But he did step aside, thinking it would enhance the possibility of this one being adopted. I want him and the author of the Presidential rescission proposal, who has done the same thing, to know how much I appreciate it personally and how much whatever victory we may get here is just as much theirs as it is mine.

Finally, before I yield back so the majority leader can complete our business—I know he has seen and heard too much from me over the last few days—I would like to reiterate my offer that if there are those here who long to know what is in this proposal, who find it complex, I am willing to cancel supper with my two little children and my wife to go to supper with them and talk about it. I will pay. I warn them ahead of time this may be McDonald's. Of course, that is the kind of budget I want for the Government. And there will be, if they do not call time out here, on the goal line, if we do not listen to that same siren song, "Not today, not now." It is sort of like the sinner who wants to go to Heaven and wants to do what is right, and the Lord calls on him to do it and he says, "Lord, not today, not today. Maybe tomorrow. Maybe next week, maybe next year but not now, not today. I have a few more sins in mind."

This is probably the only real opportunity we are going to have for the foreseeable future until we get to $3 trillion, and we will get there fast. And I hope I am here because I will try it again then. But I truly believe this is a historic opportunity. I also believe with equal strength that if we walk away from it, if we pass a debt ceiling, temporary or permanent, or whatever, and take the pressure off and take the focus of debate away, we may never get this opportunity again. I for one do not intend to let it pass.

Mr. President, I yield back the remainder of my time.

THE CALENDAR

Mr. DOLE. Mr. President, I understand that we have about three items we can dispose of. I inquire of the distinguished minority leader if he is in a position to pass any or all of the calendar items——

Mr. LEVIN. Will the majority leader yield? I apologize for interrupting. Before my friends from Texas and New Hampshire leave the floor, I would like to make a 1- or 2-minute comment, if I could. I am wondering if I could just say something in the presence of my friends from Texas and New Hampshire before they leave, because I would rather they be here when I say this.

Mr. DOLE. I wonder if I might do this, if I could just go through these—it will just take about a minute—and then I will be happy to yield the floor.

I wonder if the distinguished minority leader is in a position to pass any or all of the following calendar items: Calendar No. 326, Senate Joint Resolution 97; Calendar 334, Senate Joint Resolution 150, and Calendar No. 335, Senate Joint Resolution 174.

Mr. BYRD. Mr. President, on this side we are ready to go forward. No objection.

Mr. DOLE. Mr. President, I ask unanimous consent that the calendar items just identified be considered en bloc and adopted en bloc and all preambles be agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL STUDY CENTER FOR TRAUMA AND EMERGENCY MEDICAL SYSTEMS

The Senate proceeded to consider the joint resolution (S.J. Res. 97) designating the Study Center for Trauma and Emergency Medical Systems at the Maryland Institute for Emergency Medical Services Systems at the University of Maryland as the National Study Center for Trauma and Emergency Medical Systems.

Mr. MATHIAS. Mr. President, each year 10 million people are involved in accidents requiring emergency medical services; 350,000 of those people are permanently disabled. This year over 90,000 will die from accidental injuries.

Over the past 20 years, the disciplines of trauma care and emergency medical services [EMS] have emerged as integral components of the health care delivery system. All of the States in and territories of the United States have developed some form of an EMS

system in an effort to address the escalating rates of death and disability due to accidents. These systems are becoming more sophisticated, and the demand for better training, research, literature, and information services is also increasing. Too often this information is difficult to locate because it is not publicized, centralized, or accessible; therefore EMS systems may not be able to locate the resources necessary to upgrade the care and services they provide.

The National Study Center for Trauma and Emergency Medical Systems [NSC] will address these issues by providing centralized access to these essential resources.

Congressional designation of this national study center will improve dramatically our ability to provide state-of-the-art trauma care nationwide.

I thank the chairman of the Senate Labor and Human Resources Committee, Senator HATCH, and the ranking minority member, Senator KENNEDY, for their help and enthusiastic support for this resolution, in addition to the other cosponsors, Senators SARBANES, INOUYE, STAFFORD, MATSUNAGA, and PELL.

The joint resolution (S.J. Res. 97) ordered to be engrossed for a third reading, read the third time and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 97

Whereas Federal funding for emergency medical services systems has decreased, and some States have provided less support for such lifesaving systems;

Whereas private efforts are the primary means of improving the delivery of emergency medical services, and improvements are needed to meet the needs of increasing numbers of the critically ill and injured;

Whereas the designation of a national study center for trauma and emergency medical systems would focus attention on those areas needing improvement in the delivery of systematic emergency care;

Whereas a national study center for trauma and emergency medical systems is needed to serve as a resource center for information and data and to provide technical assistance concerning emergency medical systems; and

Whereas the Maryland Institute for Emergency Medical Services Systems at the University of Maryland has been a national leader in the development of systems of care for the critically ill and injured: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Study Center for Trauma and Emergency Medical Systems at the Maryland Institute for Emergency Medical Services Systems at the University of Maryland shall be known and designated as the "National Study Center for Trauma and Emergency Medical Systems". Any reference in a law, map, regulation, document, record, or other paper of the United States to such Study Center for Trauma and Emergency Medical Systems shall be held to be a reference to the National Study Center for Trauma and Emergency Medical Systems.

NATIONAL HEMOPHILIA MONTH

The Senate proceeded to consider the joint resolution (S.J. Res. 150) to designate the month of March 1986 as "National Hemophilia Month."

Mr. BRADLEY. Mr. President, I am pleased that today the Senate is taking up Senate Joint Resolution 150, to designate March 1986 as "National Hemophilia Month." Mr. President, I introduced this resolution in June in order to educate the public about hemophilia, to highlight the medical advances in the field and to try to dispel the myths and misconceptions that surround the disease.

Mr. President, hemophilia is a hereditary disorder afflicting approximately 1 in 4,000 males. The disease, which is equally common among all races and socioeconomic groups, involves a deficiency in a cloting factor in blood. As a result, bleeding due to cuts and bruises does not, as is normal, automatically stop.

The primary danger to those with the disease is not, as many suppose, external bleeding; rather, severe internal hemorrhaging presents the greatest threat to these individuals. Hemophiliacs depend for their very lives on infusion treatments derived from human plasma. Hemorrhaging episodes usually entail frantic trips to the hospital to receive these expensive infusions.

While plasma treatments are the hemophiliac's lifeline, these treatments can also carry diseases such as hepatitis and, recently, acquired immune deficiency syndrome [AIDS], thus fostering the myth that day-to-day contact with hemophiliacs can lead to AIDS. This is not true, and I hope that placing greater attention on hemophilia will help to correct this misconception. Even hemophiliacs themselves, Mr. President, are not free from these misconceptions. There have been numerous cases reported of hemophiliacs foregoing treatment out of fear of AIDS. This is extremely dangerous; the risk involved in withholding treatment is several times greater than the risk of contracting AIDS.

This is clearly a serious disease, Mr. President, but there is hope. We should be cognizant of the tremendous progress researchers have made in the last two decades. Donald Goldman, who heads the National Hemophilia Foundation, and who is a hemophiliac from West Orange, NJ, said recently: "I feel I've been traveling across an ocean during my lifetime and I'm now able to see land in the distance." This is no exaggeration.

Twenty years ago patients needed whole blood transfusions just to stay alive; even then they had to avoid all potential dangers. In the 1970's plasma treatments were developed, allowing more widespread treatment for hemophiliacs. Today, scientists are working to perfect a process developed last year that enables cloning of the clotting factor. This advance promises to eliminate the risk of contracting diseases through transfusions. Another advancement is a pilot program just recently developed in which hemophiliacs administer injections themselves, without hospitalization. The effectiveness of this program indicates that annual medical costs for treating hemophilia could be significantly reduced nationwide.

Mr. President, both to further public awareness and knowledge of hemophilia, and to recognize the outstanding work being done by scientists to help hemophiliacs, I urge adoption of this resolution.

The joint resolution (S.J. Res. 150) was ordered to be engrossed for a third reading, read the third time and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 150

Whereas hemophilia is an incurable hereditary disorder that prevents proper coagulation of the blood;

Whereas hemophilia, which strikes males almost exclusively, occurs in one of every four thousand live male births regardless of race, nationality, or family economic status;

Whereas hemophilia can lead to disabilities or death for some hemophiliacs;

Whereas, despite recent medical advances in the diagnosis and treatment of hemophilia, many hemophiliacs continue to face unpredictable medical complications due to the disorder;

Whereas, with proper medical treatment and adequate financial assistance, hemophiliacs can live healthy, normal, and independent lives; and

Whereas increased public awareness of the causes and effects of hemophilia will help dispel many common misconceptions concerning the disorder: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of March 1986 is hereby designated as "National Hemophilia Month", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such month with appropriate ceremonies and activities.

EUGENE ORMANDY APPRECIATION DAY

The joint resolution (S.J. Res. 174) to designate November 18, 1985, as "Eugene Ormandy Appreciation Day," was considered, ordered to be engrossed for a third reading, read the third time and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 174

Whereas November 18, 1985, marks the anniversary of the birth of Eugene Ormandy;

Whereas Eugene Ormandy was music director and conductor laureate of the Philadelphia Orchestra for over forty years, receiving honorary degrees from eighteen universities and medals of honor from eight nations, including the United States, France, Italy, and Great Britain;

Whereas Eugene Ormandy is known throughout the world for his extraordinary ability and innovation and his unique contribution to orchestral playing, the creation of "The Philadelphia Sound";

Whereas Eugene Ormandy performed invaluable service to the Nation through tours of China, the Soviet Union, Europe, and South America; and

Whereas Eugene Ormandy passed away on March 12, 1985: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That November 18, 1985, is designated as "Eugene Ormandy Appreciation Day" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the day with appropriate ceremonies.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolutions were agreed to.

Mr. BYRD. I move to lay that motion on the table.

HEALTH PROFESSIONS TRAINING ASSISTANCE ACT

Mr. DOLE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 2410.

The PRESIDING OFFICER laid before the Senator the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 2410) entitled "An Act to amend the Public Health Service Act to revise and extend the programs under title VII of that Act", with the following amendment:

In lieu of the matter proposed by said amendment, insert:

That this Act may be cited as the "Health Professions Training Assistance Act of 1985".

REFERENCE

SEC. 2. Except as otherwise specifically provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

TITLE I—AUTHORIZATIONS OF APPROPRIATIONS

SCOPE AND DURATION OF FEDERAL LOAN INSURANCE PROGRAM

SEC. 101. (a) The first sentence of section 728(a) is amended by striking out "and" after "1983;" and by inserting before the period a semicolon and "$250,000,000 for the fiscal year ending September 30, 1985; $275,000,000 for the fiscal year ending September 30, 1986; $290,000,000 for the fiscal year ending September 30, 1987; and $305,000,000 for the fiscal year ending September 30, 1988".

(b) The second sentence of such section is amended by striking out "1987," and inserting in lieu thereof "1991,".

SCHOLARSHIPS FOR STUDENTS OF EXCEPTIONAL FINANCIAL NEED

SEC. 102. Section 758(d) is amended by striking out "and" after "1983," and by inserting before the period a comma and "$7,000,000 for the fiscal year ending September 30, 1986, $7,000,000 for the fiscal year ending September 30, 1987, and $7,000,000 for the fiscal year ending September 30, 1988".

DEPARTMENTS OF FAMILY MEDICINE

SEC. 103. Section 780(c) is amended by striking out "and" after "1983," and by inserting a comma and "$7,000,000 for the fiscal year ending September 30, 1986, $7,000,000 for the fiscal year ending September 30, 1987, and $7,000,000 for the fiscal year ending September 30, 1988" after "1984".

AREA HEALTH EDUCATION CENTERS

SEC. 104. The first sentence of section 781(g) is amended by striking out "and" after "1983," and by inserting before the period a comma and "$18,000,000 for the fiscal year ending September 30, 1986, $18,000,000 for the fiscal year ending September 30, 1987, and $18,000,000 for the fiscal year ending September 30, 1988".

PHYSICIAN ASSISTANTS

SEC. 105. Section 783(d) is amended by striking out "and" after "1983," and by inserting before the period a comma and "$4,800,000 for the fiscal year ending September 30, 1986, $4,800,000 for the fiscal year ending September 30, 1987, and $4,800,000 for the fiscal year ending September 30, 1988".

GENERAL INTERNAL MEDICINE AND GENERAL PEDIATRICS

SEC. 106. Section 784(b) is amended by striking out "and" after "1983," and by inserting before the period a comma and "$18,500,000 for the fiscal year ending September 30, 1986, $19,500,000 for the fiscal year ending September 30, 1987, and $22,000,000 for the fiscal year ending September 30, 1988".

FAMILY MEDICINE AND GENERAL PRACTICE OF DENTISTRY

SEC. 107. (a) The first sentence of section 786(c) is amended by striking out "and" after "1983," and by inserting before the period a comma and "$36,000,000 for the fiscal year ending September 30, 1986, $37,000,000 for the fiscal year ending September 30, 1987, and $39,400,000 for the fiscal year ending September 30, 1988".

(b) The second sentence of such section is amended by striking out "and" after "1983," and by inserting "September 30, 1986, September 30, 1987, and September 30, 1988," after "1984,".

EDUCATIONAL ASSISTANCE TO INDIVIDUALS FROM DISADVANTAGED BACKGROUNDS

SEC. 108. The first sentence of section 787(b) is amended by striking out "and" after "1983," and by inserting before the period a comma and "$26,000,000 for the fiscal year ending September 30, 1986, $28,000,000 for the fiscal year ending September 30, 1987, and $30,000,000 for the fiscal year ending September 30, 1988".

CURRICULUM DEVELOPMENT AND FACULTY TRAINING GRANTS

SEC. 109. Section 788(f) is amended by striking out "and" after "1983;" and by inserting before the period a semicolon and "$8,000,000 for the fiscal year ending September 30, 1986; $8,000,000 for the fiscal year ending September 30, 1987; and $8,000,000 for the fiscal year ending September 30, 1988".

ADVANCED FINANCIAL DISTRESS ASSISTANCE

SEC. 110. The first sentence of section 788B(h) is amended by inserting before the period a comma and "$4,200,000 for the fiscal year ending September 30, 1986, and $3,800,000 for the fiscal year ending September 30, 1987".

GRADUATE PROGRAMS IN HEALTH ADMINISTRATION

SEC. 111. Section 791(d) is amended by striking out "and" after "1983," and by inserting before the period a comma and "$1,500,000 for the fiscal year ending September 30, 1986, $1,500,000 for the fiscal year ending September 30, 1987, and $1,500,000 for the fiscal year ending September 30, 1988".

TRAINEESHIPS FOR STUDENTS IN OTHER GRADUATE PROGRAMS

SEC. 112. Section 791A(c) is amended by striking out "and" after "1980;" and by inserting before the period a semicolon and "and $500,000 for the fiscal year ending September 30, 1986, and each of the next two fiscal years".

PUBLIC HEALTH TRAINEESHIPS

SEC. 113. Section 792(c) is amended by striking out "and" after "1983;" and by inserting before the period a semicolon and "$3,000,000 for the fiscal year ending September 30, 1986; $3,075,000 for the fiscal year ending September 30, 1987; and $3,150,000 for the fiscal year ending September 30, 1988".

TRAINING IN PREVENTIVE MEDICINE

SEC. 114. Section 793(c) is amended by striking out "and" after "1983," and by inserting before the period a comma and "$1,600,000 for the fiscal year ending September 30, 1986, $1,600,000 for the fiscal year ending September 30, 1987, and $1,600,000 for the fiscal year ending September 30, 1988".

TITLE II—PROGRAM REVISIONS

SCHOOLS OF CHIROPRACTIC

SEC. 201. (a) The first sentence of section 701(4) is amended—

(1) by striking out "and" after " 'school of veterinary medicine',";

(2) by inserting a comma and "and 'school of chiropractic' " after " 'school of public health' ";

(3) by striking out "and" after "a degree of doctor of veterinary medicine or an equivalent degree,"; and

(4) by inserting "and a degree of doctor of chiropractic or an equivalent degree," before "and including advanced training related to".

(b) Section 701(5) is amended—

(1) by striking out "or" after "pharmacy,"; and

(2) by inserting "or chiropractic," after "public health,".

(c) Section 737 is amended by striking out paragraph (2) and by redesignating paragraphs (3), (4), and (5) as paragraphs (2), (3), and (4), respectively.

TRAINING OF PHYSICIAN ASSISTANTS

SEC. 202. Section 701(8) is amended to read as follows:

"(8)(A) The term 'program for the training of physician assistants' means an educational program which (i) has as its objective the education of individuals who will, upon completion of their studies in the program, be qualified to provide primary health care under the supervision of a physician, and

(ii) meets regulations prescribed by the Secretary in accordance with subparagraph (B).

"(B) After consultation with appropriate organizations, the Secretary shall, not later than October 1, 1986, prescribe regulations for programs for the training of physician assistants. Such regulations shall, as a minimum, require that such a program—

"(i) extend for at least one academic year and consist of—

"(I) supervised clinical practice, and

"(II) at least four months (in the aggregate) of classroom instruction,

directed toward preparing students to deliver health care;

"(ii) have an enrollment of not less than eight students; and

"(iii) train students in primary care, disease prevention, health promotion, geriatric medicine, and home health care.".

SCHOOLS OF ALLIED HEALTH

SEC. 203. (a) Section 701(10) is amended—

(1) by inserting "college," before "junior college,"; and

(2) by striking out "in a discipline of allied health leading to a baccalaureate or associate degree (or an equivalent degree of either) or to a more advanced degree" in subparagraph (A) and inserting in lieu thereof "to enable individuals to become allied health professionals or to provide additional training for allied health professionals".

(b) Section 701 is amended by adding at the end thereof the following new paragraph:

"(13) The term 'allied health professional' means an individual—

"(A) who has received a certificate, an associate's degree, a bachelor's degree, a masters' degree, a doctoral degree, or postbaccalaureate training, in a science relating to health care;

"(B) who shares in the responsibility for the delivery of health care services or related services, including—

"(i) services relating to the identification, evaluation, and prevention of diseases and disorders;

"(ii) dietary and nutrition services;

"(iii) health promotion services;

"(iv) rehabilitation services; or

"(v) health systems management services; and

"(C) who has not received a degree of doctor of medicine, a degree of doctor of osteopathy, a degree of doctor of dentistry or an equivalent degree, a degree of doctor of veterinary medicine or an equivalent degree, a degree of doctor of optometry or an equivalent degree, a degree of doctor of podiatry or an equivalent degree, a degree of bachelor of science in pharmacy or an equivalent degree, a degree of doctor of pharmacy or an equivalent degree, a graduate degree in public health or an equivalent degree, a degree of doctor of chiropractic or an equivalent degree, a graduate degree in health administration or an equivalent degree, or a doctoral degree in clinical psychology or an equivalent degree.".

GRADUATE PROGRAMS IN CLINICAL PSYCHOLOGY

SEC. 204. (a) Section 701 (as amended by section 203(b) of this Act) is further amended by adding at the end thereof the following new paragraph:

"(14) The term 'graduate program in clinical psychology' means an accredited graduate program in a public or nonprofit private institution in a State which provides training leading to a doctoral degree in clinical psychology or an equivalent degree.".

(b) Section 701(5) (as amended by section 201(b) of this Act) is further amended—

(1) by striking out "or" after "chiropractic,"; and

(2) by inserting "or a graduate program in clinical psychology," after "health administration,".

(c) Section 737 (as amended by section 201(c) of this Act) is further amended by striking out paragraph (2) (as redesignated by section 201(c) of this Act) and by redesignating paragraphs (3) and (4) (as redesignated by section 201(c) of this Act) as paragraphs (2) and (3), respectively.

NATIONAL ADVISORY COUNCIL ON HEALTH PROFESSIONS EDUCATION

SEC. 205. (a) Section 702(a) is amended by striking out the last sentence and inserting in lieu thereof the following: "Of the appointed members of the Council—

"(1) twelve shall be representatives of the health professions schools assisted under programs authorized under this title, including—

"(A) one representative of each of schools of veterinary medicine, optometry, pharmacy, podiatry, public health, and allied health, and graduate programs in health administration; and

"(B) at least six persons experienced in university administration, at least one of whom shall be a representative of a school described in subparagraph (A);

"(2) two shall be full-time students enrolled in health professions schools; and

"(3) six shall be members of the general public.".

TECHNICAL ASSISTANCE

SEC. 206. Section 709(d) is amended to read as follows:

"(d) Funds appropriated under this title may be used by the Secretary to provide technical assistance in relation to any of the authorities under this title.".

RECOVERY OF ASSISTANCE

SEC. 207. (a) Section 723 is amended to read as follows:

"RECOVERY

"SEC. 723. (a) If at any time within twenty years (or within such shorter period as the Secretary may prescribe by regulation for an interim facility) after the completion of construction of a facility with respect to which funds have been paid under section 720(a)—

"(1)(A) in case of a facility which was an affiliated hospital or outpatient facility with respect to which funds have been paid under section 720(a)(1), the owner of the facility ceases to be a public or other nonprofit agency that would have been qualified to file an application under section 605,

"(B) in case of a facility which was not an affiliated hospital or outpatient facility but was a facility with respect to which funds have been paid under paragraph (1) or (3) of section 720(a), the owner of the facility ceases to be a public or nonprofit school, or

"(C) in case of a facility which was a facility with respect to which funds have been paid under section 720(a)(2), the owner of the facility ceases to be a public or nonprofit entity,

"(2) the facility ceases to be used for the teaching or training purposes (or other purposes permitted under section 722) for which it was constructed, or

"(3) the facility is used for sectarian instruction or as a place for religious worship,

the United States shall be entitled to recover from the owner of the facility the base amount prescribed by subsection (c)(1) plus the interest (if any) prescribed by subsection (c)(2).

"(b) The owner of a facility which ceases to be a public or nonprofit agency, school, or entity as described in subparagraph (A), (B), or (C) of subsection (a)(1), as the case may be, or the owner of a facility the use of which changes as described in paragraph (2) or (3) of subsection (a), shall provide the Secretary written notice of such cessation or change of use within 10 days after the date on which such cessation or change of use occurs or within 30 days after the date of enactment of this subsection, whichever is later.

"(c)(1) The base amount that the United States is entitled to recover under subsection (a) is the amount bearing the same ratio to the then value (as determined by the agreement of the parties or in an action brought in the district court of the United States for the district in which the facility is situated) of the facility as the amount of the Federal participation bore to the cost of construction.

"(2)(A) The interest that the United States is entitled to recover under subsection (a) is the interest for the period (if any) described in subparagraph (B) at a rate (determined by the Secretary) based on the average of the bond equivalent rates of ninety-one-day Treasury bills auctioned during that period.

"(B) The period referred to in subparagraph (A) is the period beginning—

"(i) if notice is provided as prescribed by subsection (b), 191 days after the date on which the owner of the facility ceases to be a public or nonprofit agency, school, or entity as described in subparagraph (A), (B), or (C) of subsection (a)(1), as the case may be, or 191 days after the date on which the use of the facility changes as described in paragraph (2) or (3) of subsection (a), or

"(ii) if notice is not provided as prescribed by subsection (b), 11 days after the date on which such cessation or change of use occurs,

and ending on the date the amount the United States is entitled to recover is collected.

"(d) The Secretary may waive the recovery rights of the United States under subsection (a)(2) with respect to a facility (under such conditions as the Secretary may establish by regulation) if the Secretary determines that there is good cause for waiving such rights.

"(e) The right of recovery of the United States under subsection (a) shall not, prior to judgment, constitute a lien on any facility.".

(b) In the case of any facility that was or is constructed on or before the date of enactment of this Act or within 180 days after the date of enactment of this Act, the period described in clause (i) or (ii), as the case may be, of section 723(c)(2)(B) of the Public Health Service Act (as amended by subsection (a) of this section) shall begin no earlier than 181 days after the date of enactment of this Act.

(c) The amendment made by subsection (a) of this section shall not adversely affect other legal rights of the United States.

(d) In addition to the authority of the Secretary of Health and Human Services under subsection (d) of section 723 of the Public Health Service Act (as amended by subsection (a) of this section), the Secretary may waive the recovery rights of the United States under subsection (a) of such section 723 with respect to St. Joseph's Hospital in Omaha, Nebraska, if the Secretary determines that adequate provision has been made, through establishment of an irrevocable trust or other legally enforceable means, to assure that the teaching and other obligations assumed with respect to such St. Jo-

seph's Hospital as a condition of assistance under title VII of the Public Health Service Act will continue to be met.

(e)(1) Section 858(b) is amended—

(A) by striking out "not later than" and inserting in lieu thereof "within"; and

(B) by inserting "or within 30 days after the date of enactment of the Health Professions Training Assistance Act of 1985, whichever is later" before the period.

(2) Section 858(c)(2)(B) is amended by striking out "(1)" and inserting in lieu thereof "(i)".

(3) Section 858(d) is amended by striking out "subsection (a)" and inserting in lieu thereof "subsection (a)(2)".

(4) Section 9(c)(2) of the Nurse Education Amendments of 1985 is amended by striking out "subsection (c)(2)(B)(i) of section 858" and inserting in lieu thereof "clause (i) or (ii), as the case may be, of section 858(c)(2)(B)".

HEALTH EDUCATION ASSISTANCE LOAN PROGRAM

SEC. 208. (a)(1) Section 731(a)(1)(A) is amended by striking out "and" at the end of clause (iii), by redesignating clause (iv) as clause (v), and by inserting after clause (iii) the following:

"(iv) if required under section 3 of the Military Selective Service Act to present himself for and submit to registration under such section, has presented himself and submitted to registration under such section; and".

(2) Section 731(a)(1)(B) is amended by striking out "and" at the end of clause (ii), and by inserting after clause (iii) the following:

"(iv) if required under section 3 of the Military Selective Service Act to present himself for and submit to registration under such section, has presented himself and submitted to registration under such section; and".

(b)(1) Section 731(a)(2)(B) is amended to read as follows:

"(B) provides for repayment of the principal amount of the loan in installments over a period of not less than 10 years (unless sooner repaid) nor more than 25 years beginning not earlier than 9 months nor later than 12 months after the later of—

"(i) the date on which—

"(I) the borrower ceases to be a participant in an accredited internship or residency program of not more than four years in duration;

"(II) the borrower completes the fourth year of an accredited internship or residency program of more than four years in duration; or

"(III) the borrower, if not a participant in a program described in subclause (I) or (II), ceases to carry, at an eligible institution, the normal full-time academic workload as determined by the institution; or

"(ii) the date on which a borrower who is a graduate of an eligible institution ceases to be a participant in a fellowship training program not in excess of two years or a participant in a full-time educational activity not in excess of two years, which—

"(I) is directly related to the health profession for which the borrower prepared at an eligible institution, as determined by the Secretary; and

"(II) may be engaged in by the borrower during such a two-year period which begins within twelve months after the completion of the borrower's participation in a program described in subclause (I) or (II) of clause (i) or prior to the completion of the borrower's participation in such program,

except as provided in subparagraph (C), except that the period of the loan may not exceed 33 years from the date of execution of the note or written agreement evidencing it, and except that the note or other written instrument may contain such provisions relating to repayment in the event of default in the payment of interest or in the payment of the costs of insurance premiums, or other default by the borrower, as may be authorized by regulations of the Secretary in effect at the time the loan is made;".

(2) Section 731(a)(2)(C) is amended—

(A) by inserting "(including any period in such a program described in subclause (I) or subclause (II) of subparagraph (B)(i))" before the comma in clause (ii);

(B) by striking out "or the 33-year period" in clause (vi);

(C) by striking out "or" after "National Health Service Corps," in clause (v); and

(D) by inserting "or (vii) any period not in excess of two years which is described in subparagraph (B)(ii)," after "Domestic Volunteer Service Act of 1973,".

(3)(A) The provisions of clause (i) of section 731(a)(2)(B) of the Public Health Service Act (as amended by paragraph (1) of this subsection) and the provisions of clauses (ii) and (vi) of section 731(a)(2)(C) of such Act (as amended by subparagraphs (A) and (B) of paragraph (2)) shall not apply to any individual who, prior to the date of enactment of this Act, received a loan insured under subpart I of part C of title VII of such Act.

(B) The provisions of clause (ii) of section 731(a)(2)(B) of the Public Health Service Act and clause (vii) of section 731(a)(2)(C) of such Act (as added by the amendments made by paragraphs (1) and (2)(D) of this subsection, respectively) shall apply to any loan insured under subpart I of part C of title VII of such Act after the date of enactment of this Act.

(4) Within 90 days after the date of enactment of this Act, the Secretary of Health and Human Services shall promulgate regulations to carry out clause (ii) of section 731(a)(2)(B) of the Public Health Service Act and clause (vii) of section 731(a)(2)(C) of such Act (as added by the amendments made by paragraphs (1) and (2)(D) of this subsection, respectively). Such regulations shall—

(A) prescribe criteria for the determination of the types of fellowship training programs and full-time educational activities which will be permitted under such clauses; and

(B) establish procedures for a borrower to apply to the Secretary for a determination concerning whether a particular fellowship training program or full-time educational activity will be permitted under such clauses.

(c)(1) Section 731(b) is amended by striking out "3½" and inserting in lieu thereof "3".

(2) The amendment made by paragraph (1) of this subsection shall apply to any loan insured under subpart I of part C of title VII of the Public Health Service Act after the date of enactment of this Act.

(d) Section 731(c) is amended—

(1) by striking out "section 731(a)(2)(C)" and inserting in lieu thereof "subsection (a)(2)(C)"; and

(2) by inserting before the period a comma and "unless the borrower, in the written agreement described in subsection (a)(2), agrees to make payments during any year or any repayment period in a lesser amount".

(e) Section 732(c) is amended—

(1) by redesignating clauses (1) and (2) of the second sentence as clauses (A) and (B), respectively;

(2) by inserting "(1)" before "The" in the first sentence;

(3) by striking out "2 percent per year" in the first sentence and inserting in lieu thereof "8 percent";

(4) by striking out "in advance, at such times" in the first sentence and inserting in lieu thereof "in advance at the time the loan is made"; and

(5) by adding at the end thereof the following new paragraph:

"(2) The Secretary may not increase the percentage on the principal balance of loans charged pursuant to paragraph (1) for insurance premiums, unless the Secretary has, prior to any such increase—

"(A) requested a qualified public accounting firm to evaluate whether an increase in such percentage is necessary to ensure the solvency of the student loan fund established by section 734, and to determine the amount of such an increase, if necessary; and

"(B) such accounting firm has recommended such an increase and has determined the amount of such increase necessary to ensure the solvency of such fund.

The Secretary may not increase such percentage in excess of the maximum percentage permitted by paragraph (1) or increase such percentage by an amount in excess of the amount of the increase determined by a qualified accounting firm pursuant to this paragraph.".

(f) The first sentence of subsection (a) of section 734 and the first sentence of subsection (b) of such section are each amended by inserting "collection or" before "default".

(g)(1) Section 729(a) is amended by inserting "allied health," after "public health," each place it appears.

(2) Section 737 (as amended by sections 201(c) and 204(c) of this Act) is further amended—

(A) by inserting a comma and "allied health," after "public health" in paragraph (1); and

(B) by adding at the end thereof the following new paragraph:

"(4) The term 'school of allied health' means a program in a school of allied health (as defined in section 701(10)) which leads to a masters' degree or a doctoral degree.".

(h) Section 728(a) (as amended by section 101 of this Act) is further amended by inserting after the first sentence the following new sentence: "If the total amount of new loans made and installments paid pursuant to lines of credit in any fiscal year is less than the ceiling established for such year, the difference between the loans made and installments paid and the ceiling shall be carried over to the next fiscal year and added to the ceiling applicable to that fiscal year.".

(i) Section 731(a)(2) is amended by striking out "and" at the end of subparagraph (F), by redesignating subparagraph (G) as subparagraph (H), and by inserting after subparagraph (F) the following new subparagraph:

"(G) provides that the check for the proceeds of the loan shall be made payable jointly to the borrower and the eligible institution in which the borrower is enrolled; and".

HEALTH PROFESSIONS STUDENT LOAN PROGRAM

SEC. 209. (a)(1) Section 740(b)(4) is amended by inserting "doctor of pharmacy or an equivalent degree," before "doctor of podiatry".

(2) Section 741(b) is amended by inserting "doctor of pharmacy or an equivalent degree," before "doctor of podiatry".

(3) Section 741(f)(1)(A) is amended by inserting "doctor of pharmacy or an equiva-

lent degree," before "or doctor of podiatry or an equivalent degree".

(4) Subpart II of part C of title VII is amended by adding at the end thereof the following new section:

"DEFINITION

"SEC. 745. For purposes of this subpart, the term 'school of pharmacy' means a public or nonprofit private school in a State that provides training leading to a degree of bachelor of science in pharmacy or an equivalent degree or a degree of doctor of pharmacy or an equivalent degree and which is accredited in the manner described in section 701(5).".

(b) Section 741(b) (as amended by subsection (a)(2) of this section) is further amended by inserting "(1) who is" after "student" and by inserting before the period a comma and the following: "(2) who, if pursuing a full-time course of study at the school leading to a degree of doctor of medicine or doctor of osteopathy, is of exceptional financial need (as defined by regulations of the Secretary), and (3) who, if required under section 3 of the Military Selective Service Act to present himself for and submit to registration under such section, has presented himself and submitted to registration under such section.".

(c)(1) Section 741(c) is amended to read as follows:

"(c) Such loans shall be repayable in equal or graduated periodic installments (with the right of the borrower to accelerate repayment) over the ten-year period which begins one year after the student ceases to pursue a full-time course of study at a school of medicine, osteopathy, dentistry, pharmacy, podiatry, optometry, veterinary medicine, excluding from such ten-year period—

"(1) all periods—

"(A) not in excess of three years of active duty performed by the borrower as a member of a uniformed service;

"(B) not in excess of three years during which the borrower serves as a volunteer under the Peace Corps Act; and

"(C) during which the borrower participates in advanced professional training, including internships and residencies; and

"(2) a period—

"(A) not in excess of two years during which a borrower who is a full-time student in such a school leaves the school, with the intent to return to such school as a full-time student, in order to engage in a full-time educational activity which is directly related to the health profession for which the borrower is preparing, as determined by the Secretary; or

"(B) not in excess of two years during which a borrower who is a graduate of such a school is a participant in a fellowship training program or a full-time educational activity which—

"(i) is directly related to the health profession for which such borrower prepared at such school, as determined by the Secretary; and

"(ii) may be engaged in by the borrower during such a two-year period which begins within twelve months after the completion of the borrower's participation in advanced professional training described in paragraph (1)(C) or prior to the completion of such borrower's participation in such training.".

(2) The provisions of section 741(c)(2)(A) of the Public Health Service Act (as added by the amendment made by paragraph (1) of this subsection) shall apply to—

(A) any individual who received a loan under subpart II of part C of title VII of the Public Health Service Act and to whom the provisions of such section (if such provisions had been in effect) would have applied between June 17, 1982, and July 7, 1983; and

(B) any individual who, after the date of enactment of this Act, is a full-time student in a school referred to in such section and who (prior to, on, or after the date of enactment of this Act), receives a loan under such subpart to assist such student in such student's studies in such school.

(3) The provisions of section 741(c)(2)(B) of the Public Health Service Act (as added by the amendment made by paragraph (1) of this subsection) shall apply to any loan made under subpart II of part C of title VII of such Act after the date of enactment of this Act.

(4) Within 90 days after the date of enactment of this Act, the Secretary of Health and Human Services shall promulgate regulations to carry out section 741(c)(2) of the Public Health Service Act (as added by the amendment made by paragraph (1) of this subsection) with respect to any loan made under subpart II of part C of title VII of such Act on or after the date of enactment of this Act. Such regulations shall—

(A) with respect to the provisions of subparagraph (A) of such section—

(i) prescribe criteria for the determination of the types of full-time educational activities which will be permitted under such subparagraph;

(ii) require the school in which the borrower was enrolled as a full-time student to determine, prior to the borrower's leaving such school, whether an educational activity in which the student proposes to engage qualifies for purposes of such subparagraph and such regulations; and

(B) with respect to the provisions of subparagraph (B) of such section—

(i) prescribe criteria for the determination of the types of fellowship training programs and full-time educational activities which will be permitted under such subparagraph; and

(ii) establish procedures for a borrower to apply to the Secretary for a determination concerning whether a particular fellowship training program or full-time educational activity will be permitted under such subparagraph.

(d) Section 741(i) is amended to read as follows:

"(i) Subject to regulations of the Secretary, a school may assess a charge with respect to loans made under this subpart to cover the costs of insuring against cancellation of liability under subsection (d).".

(e) Section 741(j) is amended—

(1) by inserting "and in accordance with this section" after "Secretary" in the first sentence;

(2) by striking out "may" in such sentence and inserting in lieu thereof "shall"; and

(3) by striking out the second sentence and inserting in lieu thereof the following: "No such charge may be made if the payment of such installment or the filing of such evidence is made within 60 days after the date on which such installment or filing is due. The amount of any such charge may not exceed an amount equal to 6 percent of the amount of such installment.".

(f) Section 741 is amended by adding at the end thereof the following new subsection:

"(m) The Secretary is authorized to attempt to collect any loan which was made under this subpart, which is in default, and which was referred to the Secretary by a school with which the Secretary has an agreement under this subpart, on behalf of that school under such terms and conditions as the Secretary may prescribe (including reimbursement from the school's student loan fund for expenses the Secretary may reasonably incur in attempting collection), but only if the school has complied with such requirements as the Secretary may specify by regulation with respect to the collection of loans under this subpart. A loan so referred shall be treated as a debt subject to section 5514 of title 5, United States Code. Amounts collected shall be deposited in the school's student loan fund. Whenever the Secretary desires the institution of a civil action regarding any such loan, the Secretary shall refer the matter to the Attorney General for appropriate action.".

(g) Section 742(b) is amended by adding at the end thereof the following new paragraph:

"(5) Any funds from a student loan fund established under this subpart which are returned to the Secretary in any fiscal year shall be available for allotment under this subpart, in such fiscal year and the fiscal year succeeding such fiscal year, to schools which, during the period beginning on July 1, 1972, and ending on September 30, 1985, established student loan funds with Federal capital contributions under this subpart.".

(h) Subpart II of part C of title VII (as amended by subsection (a)(4) of this subsection) is further amended—

(1) by redesignating section 745 (as added by subsection (a)(4) of this section) as section 747; and

(2) by inserting after section 744 the following new sections:

"STUDENT LOAN INFORMATION BY INSTITUTIONS

"SEC. 745. (a) With respect to loans made by a school under this subpart after June 30, 1986, each school, in order to carry out the provisions of sections 740 and 741, shall, at any time such school makes such a loan to a student under this subpart, provide thorough and adequate loan information on loans made under this subpart to the student. The loan information required to be provided to the student by this subsection shall include—

"(1) the yearly and cumulative maximum amounts that may be borrowed by the student;

"(2) the terms under which repayment of the loan will begin;

"(3) the maximum number of years in which the loan must be repaid;

"(4) the interest rate that will be paid by the borrower and the minimum amount of the required monthly payment;

"(5) the amount of any other fees charged to the borrower by the lender;

"(6) any options the borrower may have for deferral, cancellation, prepayment, consolidation, or other refinancing of the loan;

"(7) a definition of default on the loan and a specification of the consequences which will result to the borrower if the borrower defaults, including a description of any arrangements which may be made with credit bureau organizations;

"(8) to the extent practicable, the effect of accepting the loan on the eligibility of the borrower for other forms of student assistance; and

"(9) a description of the actions that may be taken by the Federal Government to collect the loan, including a description of the type of information concerning the borrower that the Federal Government may disclose to (A) officers, employees, or agents of the Department of Health and Human Services,

(B) officers, employees, or agents of schools with which the Secretary has an agreement under this subpart, or (C) any other person involved in the collection of a loan under this subpart.

"(b) Each school shall, immediately prior to the graduation from such school of a student who receives a loan under this subpart after June 30, 1986, provide such student with a statement specifying—

"(1) each amount borrowed by the student under this subpart;

"(2) the total amount borrowed by the student under this subpart; and

"(3) a schedule for the repayment of the amounts borrowed under this subpart, including the number, amount, and frequency of payments to be made.

"PROCEDURES FOR APPEAL OF TERMINATIONS

"SEC. 746. In any case in which the Secretary intends to terminate an agreement with a school under this subpart, the Secretary shall provide the school with a written notice specifying such intention and stating that the school may request a formal hearing with respect to such termination. If the school requests such a hearing within 30 days after the receipt of such notice, the Secretary shall provide such school with a hearing conducted by an administrative law judge.".

(i) Section 743 is amended by striking out "1987" each place it appears and inserting in lieu thereof "1991".

(j)(1) Section 740 is amended by adding at the end thereof the following new subsection:

"(c)(1) Any standard established by the Secretary by regulation for the collection by schools of medicine, osteopathy, dentistry, pharmacy, podiatry, optometry, or veterinary medicine of loans made pursuant to loan agreements under this subpart shall provide that the failure of any such school to collect such loans shall be measured in accordance with this subsection.

"(2) The measurement of a school's failure to collect loans made under this subpart shall be the ratio (stated as a percentage) that the defaulted principal amount outstanding of such school bears to the matured loans of such school.

"(3) For purposes of this subsection—

"(A) the term 'default' means the failure of a borrower of a loan made under this subpart to—

"(i) make an installment payment when due; or

"(ii) comply with any other term of the promissory note for such loan,

except that a loan made under this subpart shall not be considered to be in default if the loan is discharged in bankruptcy or if the school reasonably concludes from written contacts with the borrower that the borrower intends to repay the loan;

"(B) the term 'defaulted principal amount outstanding' means the total amount borrowed from the loan fund of a school that has reached the repayment stage (minus any principal amount repaid or cancelled) on loans—

"(i) repayable monthly and in default for at least 120 days; and

"(ii) repayable less frequently than monthly and in default for at least 180 days;

"(C) the term 'grace period' means the period of one year beginning on the date on which the borrower ceases to pursue a full-time course of study at a school of medicine, osteopathy, dentistry, pharmacy, podiatry, optometry, or veterinary medicine; and

"(D) the term 'matured loans' means the total principal amount of all loans made by a school under this subpart minus the total principal amount of loans made by such school to students who are—

"(i) enrolled in a full-time course of study at such school; or

"(ii) in their grace period.".

(2) Section 835(c)(3) is amended—

(A) by striking out subparagraph (C) and inserting in lieu thereof the following:

"(C) the term 'grace period' means the period of nine months beginning on the date on which the borrower ceases to pursue a full-time or half-time course of study at a school of nursing; and"; and

(B) by striking out "first" in subparagraph (D)(ii).

SCHOLARSHIPS FOR FIRST-YEAR STUDENTS OF EXCEPTIONAL FINANCIAL NEED

SEC. 210. (a) Section 758(b) is amended by redesignating paragraph (3) as paragraph (6) and by striking out paragraph (2) and inserting in lieu thereof the following:

"(2) A scholarship provided to a student for a school year under a grant under subsection (a) shall consist of—

"(A) payment to, or (in accordance with paragraph (4)) on behalf of, the student of the amount (except as provided in section 710) of—

"(i) the tuition of the student in such school year; and

"(ii) all other reasonable educational expenses, including fees, books, and laboratory expenses, incurred by the student in such school year; and

"(B) payment to the student of a stipend of $400 per month (adjusted in accordance with paragraph (5)) for each of the 12 consecutive months beginning with the first month of such school year.

"(3) Notwithstanding paragraph (2), the total scholarship award to a student for each year shall not exceed the cost of attendance for that year at the educational institution attended by the student (as determined by such educational institution).

"(4) The Secretary may contract with an educational institution in which is enrolled a student who has received a scholarship with a grant under subsection (a) for the payment to the educational institution of the amounts of tuition and other reasonable educational expenses described in paragraph (2)(A). Payment to such an educational institution may be made without regard to section 3324 of title 31, United States Code.

"(5) The amount of the monthly stipend, specified in paragraph (2)(B) and as previously adjusted (if at all) in accordance with this paragraph, shall be increased by the Secretary for each school year by an amount (rounded to the next highest multiple of $1) equal to the amount of such stipend multiplied by the overall percentage (as set forth in the report transmitted to the Congress under section 5305 of title 5, United States Code) of the adjustment (if such adjustment is an increase) in the rates of pay under the General Schedule made effective in the fiscal year in which such school year ends.".

(b) Section 338A(g)(1) is amended by striking out "or under section 758 (relating to scholarships for first-year students of exceptional financial need),".

CAPITATION GRANTS FOR SCHOOLS OF PUBLIC HEALTH

SEC. 211. (a)(1) Section 770 is amended to read as follows:

"CAPITATION GRANTS FOR SCHOOLS OF PUBLIC HEALTH

"SEC. 770. (a)(1) The Secretary shall make annual grants to schools of public health for the support of the education programs of such schools. The amount of the annual grant to each such school with an approved application shall be computed for each fiscal year in accordance with paragraphs (2) and (3).

"(2) Each school of public health shall receive for the fiscal year ending September 30, 1986, and for each of the next two fiscal years, an amount equal to the product of—

"(A) $1,400, and

"(B) the sum of (i) the number of full-time students enrolled in degree programs in such school in the school year beginning in such fiscal year, and (ii) the number of full-time equivalents of part-time students enrolled in degree programs in such school, determined pursuant to paragraph (3), for such school for such school year.

"(3) For purposes of paragraph (2), the number of full-time equivalents of part-time students for a school of public health for any school year is a number equal to—

"(A) the total number of credit hours of instruction in such year for which part-time students of such school, who are pursuing a course of study leading to a graduate degree in public health or an equivalent degree, have enrolled, divided by

"(B) the greater of (i) the number of credit hours of instruction which a full-time student of such school was required to take in such year, or (ii) 9,

rounded to the next highest whole number.

"(b) Notwithstanding subsection (a), if the aggregate of the amounts of the grants to be made in accordance with such subsection for any fiscal year to schools of public health with approved applications exceeds the total of the amounts appropriated for such grants for such schools under subsection (e), the amount of a school's grant for such fiscal year shall be an amount which bears the same ratio to the amount determined for the school under subsection (a) as the total of the amounts appropriated for that year under subsection (e) for grants to schools of public health bears to the amount required to make grants in accordance with subsection (a) to each of the schools of public health with approved applications.

"(c)(1) For purposes of this section, regulations of the Secretary shall include provisions relating to the determination of the number of students enrolled in a school or in a particular year-class in a school on the basis of estimates, on the basis of the number of students who in an earlier year were enrolled in a school or in a particular year-class, or on such other basis as the Secretary deems appropriate for making such determination, and shall include methods of making such determination when a school or a year-class was not in existence in an earlier year at a school.

"(2) For purposes of this section, the term 'full-time students' (whether such term is used by itself or in connection with a particular year-class) means students pursuing a full-time course of study leading to a graduate degree in public health or equivalent degree.

"(d) In the case of a new school of public health which applies for a grant under this section in the fiscal year preceding the fiscal year in which it will admit its first class, the enrollment for purposes of subsection (a) shall be the number of full-time students which the Secretary determines, on the basis of assurances provided by the school, will be enrolled in the school, in the fiscal year after the fiscal year in which the grant is made.

"(e) For payments under this section, there are authorized to be appropriated $5,000,000 for the fiscal year ending September 30,

1986, $5,125,000 for the fiscal year ending September 30, 1987, and $5,250,000 for the fiscal year ending September 30, 1988.".

(2) Section 731(a)(1)(A)(ii) is amended by striking out "(as defined in section 770(c)(2))" and inserting in lieu thereof "(as defined in section 770(c)(2) (as such section was in effect on September 30, 1985))".

(b) Section 771 is amended to read as follows:

"ELIGIBILITY FOR CAPITATION GRANTS

"SEC. 771. (a)(1) The Secretary shall not make a grant under section 770 to any school of public health in a fiscal year beginning after September 30, 1985, unless the application for the grant contains, or is supported by, assurances satisfactory to the Secretary that—

"(A) the enrollment of full-time equivalent students enrolled in degree programs in the school in the school year beginning in the fiscal year in which the grant applied for is to be made will not be less than the enrollment of such students in degree programs in the school in the school year beginning in the fiscal year ending September 30, 1983; and

"(B) the applicant will expend in carrying out its functions as a school of public health during the fiscal year for which such grant is sought, an amount of funds (other than funds for construction as determined by the Secretary) from non-Federal sources which is at least as great as the amount of funds expended by such applicant for such purpose (excluding expenditures of a nonrecurring nature) in the fiscal year preceding the fiscal year for which such grant is sought.

"(2) For purposes of subsection (a)(1)(A), the number of full-time equivalent students enrolled in a degree program in a school in a school year is equal to the sum calculated under section 770(a)(2)(B) for that school year.

"(b) The Secretary may waive (in whole or in part) application to a school of public health of the requirement of subsection (a)(1)(A) if the Secretary determines, after receiving the written recommendation of the appropriate accreditation body or bodies (approved for such purpose by the Commissioner of Education) that compliance by such school with such requirement will prevent it from maintaining its accreditation.".

(c)(1) Section 772(b) is amended—

(A) by striking out "or subsection (a) or (b) of section 788";

(B) by striking out "medicine, osteopathy, dentistry, public health, veterinary medicine, optometry, pharmacy, or podiatry," and inserting in lieu thereof "public health,";

(C) by striking out "Commissioner of Education" and inserting in lieu thereof "Secretary of Education"; and

(D) by striking out "Commissioner" each place it appears and inserting in lieu thereof "Secretary of Education".

(2) The section heading for section 772 is amended to read as follows:

"APPLICATIONS FOR CAPITATION GRANTS".

(d) The heading for part E of title VII is amended to read as follows:

"PART E—GRANTS TO IMPROVE THE QUALITY OF SCHOOLS OF PUBLIC HEALTH".

DEPARTMENTS OF FAMILY MEDICINE

SEC. 212. Section 780 is amended by redesignating subsection (c) (as amended by section 103 of this Act) as subsection (d) and by inserting after subsection (b) the following new subsection:

"(c) In making grants under subsection (a), the Secretary shall give priority to applicants that demonstrate to the satisfaction of the Secretary a commitment to family medicine in their medical education training programs.".

AREA HEALTH EDUCATION CENTERS

SEC. 213. (a) Section 781(a)(2) is amended by redesignating subparagraphs (A), (B), and (C) as clauses (i), (ii), and (iii), respectively, and by striking out all that precedes clause (i) (as so redesignated) and inserting in lieu thereof the following:

"(2)(A) The Secretary shall enter into contracts with schools of medicine and osteopathy—

"(i) which have previously received Federal financial assistance for an area health education center program under section 802 of the Health Professionals Educational Assistance Act of 1976 in fiscal year 1979 or under paragraph (1), or

"(ii) which are receiving assistance under paragraph (1),

to carry out projects described in subparagraph (B) through area health education centers for which Federal financial assistance was provided under paragraph (1) and which are no longer eligible to receive such assistance.

"(B) Projects for which assistance may be provided under subparagraph (A) are—".

(b) The last sentence of section 781(g) is amended by striking out "may" and inserting in lieu thereof "shall".

(c) Section 781(d)(2)(F) is amended to read as follows:

"(F) conduct interdisciplinary training and practice involving physicians and other health personnel including, where practicable, physician assistants and nurse practitioners;".

GENERAL INTERNAL MEDICINE AND GENERAL PEDIATRICS

SEC. 214. Section 784 is amended by redesignating subsection (b) (as amended by section 106 of this Act) as subsection (c) and by inserting after subsection (a) the following new subsection:

"(b) In making grants and entering into contracts under subsection (a), the Secretary shall give priority to applicants that demonstrate to the satisfaction of the Secretary a commitment to general internal medicine and general pediatrics in their medical education training programs.".

FAMILY MEDICINE AND GENERAL DENTISTRY

SEC. 215. (a) Section 786(b) is amended—

(1) by inserting "or an approved advanced educational program in the general practice of dentistry" before the semicolon in paragraph (1); and

(2) by striking out "residents" in paragraph (2) and inserting in lieu thereof "participants".

(b) Section 786 is amended by redesignating subsection (c) (as amended by section 107 of this Act) as subsection (d) and by inserting after subsection (b) the following new subsection:

"(c) In making grants and entering into contracts under subsection (a), the Secretary shall give priority to applicants that demonstrate to the satisfaction of the Secretary a commitment to family medicine in their medical education training programs.".

(c) Section 786(d) (as amended by section 107 of this Act and redesignated by subsection (b) of this section) is further amended by inserting before the period in the second sentence a comma and "and shall obligate not less than 7.5 percent of such amounts in each such fiscal year for grants under subsection (b)".

EDUCATIONAL ASSISTANCE TO INDIVIDUALS FROM DISADVANTAGED BACKGROUNDS

SEC. 216. (a) Section 787(a)(1) is amended—

(1) by inserting "chiropractic," after "allied health,"; and

(2) by inserting after "podiatry" a comma and "public and nonprofit private schools which offer graduate programs in clinical psychology,".

(b) Section 787(a)(2) is amended—

(1) by striking out "and" after the last comma in subparagraph (D);

(2) by striking out the period at the end of subparagraph (E) and inserting in lieu thereof a comma and "and"; and

(3) by inserting after subparagraph (E) the following:

"(F) paying such stipends as the Secretary may determine for such individuals for any period of health professions education at a school of medicine, osteopathy, or dentistry.

The term 'regular course of education of such a school' as used in subparagraph (D) includes a graduate program in clinical psychology.".

(c) Section 787(b) is amended by adding at the end thereof the following new sentence: "Of the funds appropriated under this section for any fiscal year, 20 percent shall be obligated for stipends under subsection (a)(2)(F) to individuals of exceptional financial need (as defined by regulations promulgated by the Secretary under section 758) who are students at schools of medicine, osteopathy, or dentistry.".

SPECIAL PROJECTS

SEC. 217. (a)(1) Section 788(a)(1) is amended to read as follows:

"(a)(1) The Secretary may make grants to maintain and improve schools which provide the first or last two years of education leading to the degree of doctor of medicine or osteopathy. Grants provided under this paragraph to schools which were in existence on September 30, 1985, may be used for construction and the purchase of equipment.".

(2) Paragraph (2) of section 788(a) is repealed and paragraph (3) of such section is redesignated as paragraph (2).

(3) Section 788(a)(2) (as redesignated by paragraph (2) of this subsection) is amended by inserting "or last" after "the first", by inserting "or osteopathy" after "medicine" and by inserting "or be operated jointly with a school that is accredited by" after "accredited by".

(b) Section 788(b) is amended to read as follows:

"(b)(1) The Secretary may make grants to and enter into contracts with any health profession, allied health profession, or nurse training institution, or any other public or nonprofit private entity for projects in areas such as—

"(A) health promotion and disease prevention;

"(B) curriculum development and training in health policy and policy analysis, including curriculum development and training in areas such as—

"(i) the organization, delivery, and financing of health care;

"(ii) the determinants of health and the role of medicine in health; and

"(iii) the promotion of economy in health professions teaching, health care practice, and health care systems management;

"(C) curriculum development in clinical nutrition;

"(D) the development of initiatives for assuring the competence of health professionals; and

"(E) curriculum and program development and training in applying the social and behavioral sciences to the study of health and health care delivery issues.

"(2)(A) Of the amounts available for grants and contracts under this subsection from amounts appropriated under subsection (g), at least 75 percent shall be obligated for grants to and contracts with health professions institutions, allied health institutions, and nurse training institutions.

"(B) Any application for a grant to institutions described in subparagraph (A) shall be subject to appropriate peer review by peer review groups composed principally of non-Federal experts.

"(C) The Secretary may not approve or disapprove an application for a grant to an institution described in subparagraph (A) unless the Secretary has received recommendations with respect to such application from the appropriate peer review group required under subparagraph (B) and has consulted with the National Advisory Council on Health Professions Education with respect to such application.

"(3) Of the amounts available for grants and contracts under this subsection from amounts appropriated under subsection (g), not more than 25 percent shall be obligated for grants to and contracts with public and nonprofit entities which are not health professions institutions, allied health institutions, or nurse training institutions.".

(c) Section 788(d) is amended to read as follows:

"(d)(1) The Secretary may make grants to and enter into contracts with accredited health professions schools referred to in section 701(4) or 701(10) and programs referred to in section 701(8) to assist in meeting the costs of such schools or programs of providing projects to—

"(A) improve the training of health professionals in geriatrics;

"(B) develop and disseminate curricula relating to the treatment of the health problems of elderly individuals;

"(C) expand and strengthen instruction in methods of such treatment;

"(D) support the training and retraining of faculty to provide such instruction;

"(E) support continuing education of health professionals and allied health professionals who provide such treatment; and

"(F) establish new affiliations with nursing homes, chronic and acute disease hospitals, ambulatory care centers, and senior centers in order to provide students with clinical training in geriatric medicine.

"(2)(A) Any application for a grant or contract under this subsection shall be subject to appropriate peer review by peer review groups composed principally of non-Federal experts.

"(B) The Secretary may not approve or disapprove an application for a grant or contract under this subsection unless the Secretary has received recommendations with respect to such application from the appropriate peer review group required under subparagraph (A) and has consulted with the National Advisory Council on Health Professions Education with respect to such application.".

(d) Section 788(f) (as amended by section 109 of this Act) is further amended by adding at the end thereof the following new sentence: "Of the amounts appropriated for each fiscal year to carry out this section—

"(1) 25 percent of such amount for the fiscal year ending September 30, 1986; and

"(2) 37.5 percent of such amount for each of the fiscal years ending September 30, 1987, and September 30, 1988,

shall be available to carry out subsection (d).".

(e) Section 788 is amended by redesignating subsection (f) (as amended by section 109 of this Act and subsection (d) of this section) as subsection (g) and by inserting after subsection (e) the following:

"(f) The Secretary may make grants to schools of veterinary medicine for—

"(1) the development of curricula for training in the care of animals used in research, the treatment of animals while being used in research, and the development of alternatives to the use of animals in research;

"(2) the provision of such training; and

"(3) large animal care and research.".

(f) The heading for section 788 is amended to read as follows:

"TWO-YEAR SCHOOLS OF MEDICINE, INTERDISCIPLINARY TRAINING, AND CURRICULUM DEVELOPMENT".

ADVANCED FINANCIAL DISTRESS ASSISTANCE

SEC. 218. Subsections (b)(1) and (f) of section 788B are each amended by striking out "five" and inserting in lieu thereof "six".

GRADUATE PROGRAMS IN HEALTH ADMINISTRATION

SEC. 219. Section 791(c)(2)(A)(i) is amended by inserting before the semicolon a comma and "except that in any case in which the number of minority students enrolled in the graduate educational programs of such entity in such school year will exceed an amount equal to 45 percent of the number of all students that will be enrolled in such programs in such school year, such application shall only be required to contain assurances that at least 20 individuals will complete such programs in such school year".

PROGRAM ELIMINATIONS

SEC. 220. (a) Section 703 is repealed.

(b) Section 708(c) is repealed.

(c) Part D of title VII is repealed.

(d) Section 782 is repealed.

(e) Section 785 is repealed.

(f)(1) Section 788A is repealed.

(2) The second sentence of section 788B(a) is amended by inserting "(as such section was in effect prior to October 1, 1985)" after "section 788A".

(3) Section 788B(f) (as amended by section 218 of this Act) is further amended by striking out the last sentence.

(4) Section 788B(h) (as amended by section 110 of this Act) is further amended—

(A) by striking out "and section 788A" in the first sentence; and

(B) by striking out the second sentence.

(g) Section 789 is repealed.

ANALYSIS OF FINANCIAL DISINCENTIVES TO CAREER CHOICES IN HEALTH PROFESSIONS

SEC. 221. By October 1, 1986, the Secretary of Health and Human Services shall prepare and transmit to the Congress a report which contains—

(1) an analysis of any financial disincentive to graduates of health professions schools which affects the specialty of practice chosen by such graduates or the decision of such graduates to practice their profession in an area which lacks an adequate number of health care professionals; and

(2) recommendations for legislation and administrative action to correct any disincentives which are identified pursuant to clause (1) and which are contrary to the achievement of national health goals, including recommendations concerning the appropriateness of providing financial assistance to mitigate such disincentives.

STUDY ON COMPLIANCE WITH SELECTIVE SERVICE ACT

SEC. 222. The Secretary of Health and Human Services, in cooperation with the Director of Selective Service, shall conduct a study to determine if health professions schools are engaged in a pattern or practice of failure to comply with section 12(f) of the Military Selective Service Act (50 U.S.C. App. 462(f)) (or regulations issued under such section) or are engaged in a pattern or practice of providing loans or work assistance to persons who are required to register under section 3 of such Act (and any proclamation of the President and regulations prescribed under that section) and have not so registered. The Secretary shall complete the study and report its results to the Congress not later than one year after the date of enactment of this Act.

STUDY OF THE ROLE OF ALLIED HEALTH PERSONNEL IN HEALTH CARE DELIVERY

SEC. 223. (a)(1) The Secretary of Health and Human Services shall arrange for the conduct of a study concerning the role of allied health personnel in health care delivery. The Secretary shall request the National Academy of Sciences to conduct the study under an arrangement under which the actual expenses incurred by the Academy in conducting such study will be paid by the Secretary and the Academy will prepare the report required by subsection (c). If the National Academy of Sciences is willing to do so, the Secretary shall enter into such an arrangement with the Academy for the conduct of the study.

(2) If the National Academy of Sciences is unwilling to conduct the study required by paragraph (1) under the type of arrangement described in such paragraph, the Secretary shall enter into a similar arrangement with one or more appropriate nonprofit private entities.

(b) The study required by subsection (a) shall—

(1) assess the role of allied health personnel in health care delivery;

(2) identify projected needs, availability, and requirements of various types of health care delivery systems for each type of allied health personnel;

(3) investigate current practices under which each type of allied health personnel obtain licenses, credentials, and accreditation;

(4) assess changes in programs and curricula for the education of allied personnel and in the delivery of services by such personnel which are necessary to meet the needs and requirements identified pursuant to paragraph (2); and

(5) assess the role of the Federal, State, and local governments, educational institutions, and health care facilities in meeting the needs and requirements identified pursuant to paragraph (2).

(c) By October 1, 1987, the Secretary of Health and Human Services shall transmit to the Committee on Labor and Human Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives, and make available to the public, a report—

(1) describing the study conducted under this section;

(2) containing a statement of the data obtained under such study; and

(3) specifying such recommendations for legislation and administrative action as the Secretary considers appropriate.

STUDY OF THE SUPPLY OF, AND REQUIREMENTS FOR, HEALTH PROFESSIONALS

SEC. 224. (a) The Secretary of Health and Human Services shall conduct or enter into contracts for the conduct of analytic and descriptive studies of chiropractors, clinical psychologists, veterinarians, optometrists, pharmacists, podiatrists, public health professionals, and health administrators. The studies shall include evaluations and projections of the supply of, and requirements for, each such profession by specialty and geographic location. The Secretary shall include in the report submitted on October 1, 1987, under section 708(d)(1) of the Public Health Service Act the results of the studies conducted under this subsection.

(b) The authority of the Secretary of Health and Human Services to enter into contracts under subsection (a) shall be effective for any fiscal year only to the extent or in such amounts as are provided in advance by appropriation Acts.

STUDY OF THE DELIVERY OF HEALTH CARE SERVICES TO HOMELESS INDIVIDUALS

SEC. 225. (a) The Secretary of Health and Human Services shall arrange, in accordance with subsection (c), for the conduct of a study of the delivery of inpatient and outpatient health care services to homeless individuals. Such study shall include—

(1) an evaluation of whether eligibility requirements in existing health care programs prevent homeless individuals from receiving health care services;

(2) an evaluation of the efficiency of the delivery of health care services to homeless individuals; and

(3) recommendations for activities by Federal, State, and local governments and private entities that would improve the availability of health care service delivery to homeless individuals.

(b) The Secretary shall report the results of the study required by subsection (a) to the Committee on Labor and Human Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives not later than September 30, 1986.

(c)(1) The Secretary shall request the National Academy of Sciences, acting through the Institute of Medicine, to conduct the study required by subsection (a) under an arrangement whereby the actual expenses incurred by the Academy directly related to the conduct of such study will be paid by the Secretary. If the Academy agrees to such request, the Secretary shall enter into such an agreement with the Academy.

(2) If the National Academy of Sciences declines the Secretary's request to conduct such study under such arrangement, then the Secretary, after consultation with the Committee on Labor and Human Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives, shall enter into a similar arrangement with another appropriate public or nonprofit entity to conduct such study.

RECOVERY OF ASSISTANCE FOR COMMUNITY MENTAL HEALTH CENTERS

SEC. 226. (a) Section 2115 is amended to read as follows:

"RECOVERY

"SEC. 2115. (a) If any facility with respect to which funds have been paid under the Community Mental Health Centers Act (as such Act was in effect prior to October 1, 1981) is, at any time within twenty years after the completion of remodeling, construction, or expansion or after the date of its acquisition—

"(1) sold or transferred to any entity (A) which would not have been qualified to file an application under section 222 of such Act (as such section was in effect prior to October 1, 1981) or (B) which is disapproved as a transferee by the State mental health agency or by another entity designated by the chief executive officer of the State, or

"(2) ceases to be used by a community mental health center in the provision of comprehensive mental health services,

the United States shall be entitled to recover from the transferor, transferee, or owner of the facility, the base amount prescribed by subsection (c)(1) plus the interest (if any) prescribed by subsection (c)(2).

"(b) The transferor and transferee of a facility that is sold or transferred as described in subsection (a)(1), or the owner of a facility the use of which changes as described in subsection (a)(2), shall provide the Secretary written notice of such sale, transfer, or change within 10 days after the date on which such sale, transfer, or cessation of use occurs or within 30 days after the date of enactment of this subsection, whichever is later.

"(c)(1) The base amount that the United States is entitled to recover under subsection (a) is the amount bearing the same ratio to the then value (as determined by the agreement of the parties or in an action brought in the district court of the United States for the district in which the facility is situated) of so much of the facility as constituted an approved project or projects as the amount of the Federal participation bore to the cost of the remodeling, construction, expansion, or acquisition of the project or projects.

"(2)(A) The interest that the United States is entitled to recover under subsection (a) is the interest for the period (if any) described in subparagraph (B) at a rate (determined by the Secretary) based on the average of the bond equivalent rates of ninety-one-day Treasury bills auctioned during that period.

"(B) The period referred to in subparagraph (A) is the period beginning—

"(i) if notice is provided as prescribed by subsection (b), 191 days after the date on which such sale, transfer, or cessation of use occurs, or

"(ii) if notice is not provided as prescribed by subsection (b), 11 days after such sale, transfer, or cessation of use occurs,

and ending on the date the amount the United States is entitled to recover is collected.

"(d) The Secretary may waive the recovery rights of the United States under subsection (a)(2) with respect to a facility (under such conditions as the Secretary may establish by regulation) if the Secretary determines that there is good cause for waiving such rights.

"(e) The right of recovery of the United States under subsection (a) shall not, prior to judgment, constitute a lien on any facility.".

(b) In the case of any facility that was or is constructed, remodeled, expanded, or acquired on or before the date of enactment of this Act or within 180 days after the date of enactment of this Act, the period described in clause (i) or (ii), as the case may be, of section 2115(c)(2)(B) of the Public Health Service Act (as amended by subsection (a) of this section) shall begin no earlier than 181 days after the date of enactment of this Act.

(c) The amendments made by subsection (a) of this section shall not adversely affect other legal rights of the United States.

NURSING EDUCATION IN GERIATRICS

SEC. 227. (a)(1) Section 820(a) is amended by redesignating paragraphs (4), (5), (6), (7), and (8) as paragraphs (5), (6), (7), (8), and (9), respectively, and by inserting after paragraph (3) the following new paragraph:

"(4) demonstrate improved geriatric training in preventive care, acute care, and long-term care (including home health care and institutional care);".

(2) Section 820(d) is amended—

(A) by striking out "paragraphs (1) through (5)" in paragraph (1) and inserting in lieu thereof "paragraphs (1) through (6)";

(B) by striking out "paragraphs (6), (7), and (8)" in the first sentence of paragraph (2) and inserting in lieu thereof "paragraphs (7), (8), and (9)"; and

(C) by striking out "paragraph (7)" in the second sentence of paragraph (2) and inserting in lieu thereof "paragraph (8)".

(b) Section 821(a) is amended by adding at the end thereof the following new sentence: "In making grants and entering into contracts under this section, the Secretary shall give priority to applications for grants and contracts for education projects in geriatric and gerentological nursing.".

(c) The second sentence of section 822(a)(1) is amended by inserting "(particularly problems in the delivery of preventive care, acute care, and long-term care (including home health care and institutional care) to such patients)" after "geriatric patients".

EFFECTIVE DATE

SEC. 228. (a) Except as provided in subsection (b), this Act and the amendments and repeals made by this Act shall take effect on the date of enactment of this Act.

(b)(1) The amendments made by section 101(a) of this Act shall take effect as of October 1, 1985.

(2) The amendments made by section 208(e) of this Act shall take effect nine months after the date of enactment of this Act.

(3) The amendment made by section 208(h) of this Act shall take effect as of October 1, 1983.

(4) The provisions of section 746 of the Public Health Service Act (as added by the amendment made by section 209(h)(2) of this Act) shall take effect as of June 30, 1984.

(5) The amendments made by section 209(j) of this Act shall take effect as of June 30, 1984.

(6) The amendments made by section 213(a) of this Act shall take effect as of October 1, 1985.

Mr. HATCH. Mr. President, we have just received H.R. 2410 from our colleagues in the House of Representatives. This is an amended version of S. 1283, the Health Professions Training Assistance Act, which was approved by the Senate on July 19. My colleagues and I on the Labor and Human Resources Committee have worked with members on the House Subcommittee on Health and the Environment to revise this legislation and have reached a consensus. I urge the bill, as amended, be approved by my colleagues in the Senate and I urge its enactment into law.

Following is a statement developed in cooperation with my colleagues in the Labor and Human Resources Committee and the House Subcommittee on Health and Environment which I wish to represent in a "statement of managers" in the absence of a formal conference in this bill.

The material follows:

COMMENTS AND LEGISLATIVE DESCRIPTION

This legislation reauthorizes Title VII of the Public Health Service Act, commonly referred to as the Health Manpower law. Current law is also significantly modified, recognizing that it is no longer necessary or appropriate for the federal government to provide incentives for training increasing numbers of health professionals. Instead, this revised version of Title VII is focused on three areas:

(1) Student assistance through a loan guarantee program and a limited federally financed loan program (neither of which requires the appropriation of funds), and through scholarships and stipends to disadvantaged students. Management and accountability of all student support programs have been clarified and strengthened to ensure timely payment of debts.

(2) Support for programs designed to encourage minority and disadvantaged students to pursue careers in the health professions. The statute was amended to clarify that the federally funded loan program is only for economically disadvantaged students, and the Disadvantaged Assistance Program was amended to direct 20% of those funds to stipends for students.

(3) Support for primary care training programs in family medicine, general internal medicine, and general pediatrics.

Furthermore, this revised bill repeals numerous obsolete and redundant sections of Title VII and the budget authority for FY 1986 is reduced by $37 million from that authorized for FY year 1984, the most recent fiscal year for which funds were authorized by this Act.

AUTHORIZATIONS FOR APPROPRIATIONS

This legislation is a strong endorsement of the importance of reauthorizing the programs in Title VII, but federal budget deficits warrant freezing total funding at the level of the FY 1985 appropriation for one year. It is not necessary to provide for continuing services at that level, but funding in the two subsequent years is authorized to rise by about one-half of the appropriate inflationary estimates of the Congressional Budget Office. These authorizations are some $50 million below the levels for comparable years that were in the Conference Agreement that was pocket-vetoed late in 1984.

HEAL LOAN PROGRAM

Under the HEAL program, students borrow private, not federal, funds from commercial lenders at market rates. The Secretary maintains a student loan insurance fund with premiums charged to lenders, who pass on the premium costs to the student borrowers. The federal government reinsures the loan insurance pool and would be liable if the poll were bankrupted by excessive defaults.

When the reauthorization of Title VII was pocket-vetoed, the authority for issuing federal guarantees for loans to new borrowers expired. The program was continued into FY 1985 with unused obligational authority from previous fiscal year. There have been numerous reports that this balance will soon be exhausted and no further loans to new borrowers could be made.

Because this program involves very limited federal expenditures (only administrative costs unless the insurance fund were to have insufficient funds), and is a critical source of last-resort funds for many health professions students, authority for loans for FY 1985 and authority to carry over unobligated balances from previous years have been added. The authorized level for subsequent years was raised by $25 million for FY 1986, and by $15 million for each of the remaining two years. If the total amount of new loans made and installments paid is less than the authorized level for a fiscal year, the balance remaining is added to the authorized level for the next fiscal year. Thus in any year, the ceiling established for that year is the authorized amount for that year plus any balance carried over from previous years.

The Inspector General of the Department of Health and Human Services completed an extensive report on the HEAL program on March 22, 1985. The report identified serious interrelated deficiencies in program operations, insufficient insurance premiums, unnecessary borrowing by students and inefficient collection efforts. A number of the Inspector General's recommendations to improve collections and stabilize the insurance pool are included in this bill, including increased insurance premiums, requiring an actuarial analysis as a basis for increases in the insurance premiums, narrowing the payback period, and allowing negative amortization. In addition, loan disbursements must be issued jointly to the student and eligible institution.

The majority of the Inspector General's recommendations can be accomplished through regulations, and the Secretary of Health and Human Services is encouraged to implement those recommendations that are consistent with the overall purposes of the HEAL program. Specifically, the following should be incorporated in regulations as soon as possible:

1. Require financial aid officers to reconcile information provided on the HEAL application with any prior loan application on file, and report any discrepancies found in that examination which cannot be reconciled to the lender.

2. Allow borrowers to receive loan payments covering costs for no more than six months at one time.

3. Formalize specific requirements for entrances and exit interviews, inlcuding debt counseling for student borrowers.

4. Require lenders to inform borrowers of their loan balance and projected payment for that balance at least semiannually.

5. Require lenders to contact borrowers promptly to convert loans to repayment status.

6. Require lenders to determine that an applicant has no prior default on any loan.

7. Require lenders to use collection practices which are at least as extensive and effective as those used in other collections done by the lender. These requirements should include at least the use of a collection agency (which may be internal) and the referral of delinquent accounts to a national credit agency.

The cost to borrowers who participate in this unsubsidized loan program are substantial. At the same time, it is important to provide access to adequate capital for health professions students from limited financial backgrounds, who must finance the high cost of obtaining their professional training. In order to maximize the availability of this essential program while minimizing student indebtedness, the HEAL program should be used only to meet necessary educational expenses. In considering the amount for which a student is eligible, the institution shall review at least the financial assistance available to the student and the income available to the student and to the student's spouse.

The vetoed bill also contained a provision, added by Mr. Stokes on the House Floor, that would have changed the way in which interest accrues on HEAL loans prior to the payback period, from semi-annual compound to simple interest. Some banks, however, claimed that this provision would threaten their continued participation in the HEAL program because of the cost of holding assets drawing simple interest that cannot be collected annually. This bill modifies the Stokes Amendment by returning to semiannual compounding but lowering the interest rate from T-bill + 3½ percent to T-bill + 3 percent. This modification was found acceptable because the monthly payments would be virtually the same as they would have been under the simple interest formula, thus accomplishing Mr. Stokes' intent of reducing student indebtedness. This version of the Stokes amendment was preferred by the banks that had raised concerns about simple interest and is intended to assure their continued participation.

The bill also incorporates a provision increasing the insurance premium payable by borrowers to cover the cost of loan defaults and requiring a qualified public accounting firm to evaluate whether additional funds are needed to keep the fund solvent. Insurance premiums must be collected at the time the loan is made, not over the life of the loan, so that persons who ultimately default will share equally in the costs of insurance. It is expected that the Department of Health and Human Services will coordinate better with lenders and schools the ongoing administration of the HEAL program with respect to the collection of delinquent and defaulted loans.

Another provision allows insurance funds to be used for collection costs. It is intended that this refers only to those costs incurred by the federal government, not the costs incurred by lenders. Lenders are expected to make every effort to collect loans prior to requesting reimbursement from the insurance fund. The costs of such collection activities are to be borne out of the interest rates provided.

To stimulate repayment during low-earning years, the prohibition against negative amortization is modified. The bill now gives to students (not to lenders) the option to elect a repayment schedule incorporating annual payments that are less than the interest accruing during that year.

HEALTH PROFESSIONS STUDENT LOANS

Under the HPSL program, health professions schools maintain revolving funds from which they make loans at 9 percent interest to their students. Medical and osteopathic students must meet a definition of exceptional financial need to qualify for these loans. Because no funds were appropriated in FY 84 or FY 85 for new federal capital contributions to the revolving funds, no new authorizations are included at this time. The bill does provide that any excess cash or other funds returned to the Secretary from a school loan fund in any fiscal year are required to be available in that and succeeding fiscal years for payment to other school loan funds. To assist schools that have relatively small revolving funds, many of which also have a high proportion of students from disadvantaged backgrounds, distribution of this money is limited to schools establishing loan funds in recent years.

The bill includes last year's Conference provisions intended to improve loan collections. Schools may refer defaulted loans to the Secretary for assistance in collection.

Penalty charges are provided for when installments are past due, and detailed information is to be made available to students on their loan obligations. Health professionals who have received low-interest loans at public expense for their education must be held to their responsibility to repay their loans, and, in so doing, to replenish the revolving loan funds.

Many schools have commented that the June 3, 1983, regulations regarding loan collection performance standards have placed an impossible burden on them by redefining previously ambiguous regulations in ways that cannot now be met. Further, they argue that they should not be excluded from the loan program for previous administrative inadequacies that were not monitored adequately by the Department and for which no corrective action was ever recommended by the Department.

Schools should be required to do everything currently possible to collect old loans and come into compliance on a reasonable timetable. In addition, when determining compliance, the Department should consider administrative problems beyond the control of current officials responsible for loan collection. Termination of a loan agreement with a school benefits virtually no one and may preclude needy students from attending a particular school. Therefore, termination should be reserved for recalcitrant institutions that do not make good faith efforts to redress previous administrative shortcomings. In particular, the Department should not take measures that would penalize future students unfairly by terminating loan agreements before schools have adequate opportunity to bring their collection procedures into conformance with current regulations. Thus, the bill includes the Conference provision requiring written notice and a formal hearing before an administrative law judge when agreements are to be terminated. The bill also includes a new formula for determining loan collection performance standards. The Committee on Labor and Human Resources and the Subcommittee on Health and the Environment intend to monitor the performance of the Department in improving loan collections and will consider the need for additional legislation in the future if insufficient progress is made or unfair procedures are applied.

Under current law, when a loan is cancelled, the Secretary is required to pay the schools its proportionate share of the loan. The bill deletes this requirement but allows schools to assess charges to cover the costs of insuring against cancellation caused by the death or permanent and total disability of the borrower. It is intended that regulations implementing this charge will provide for a uniform insurance program based on expected national rates of cancellation, rather than permit individual schools to determine the charges.

EDUCATIONAL ASSISTANCE TO INDIVIDUALS FROM DISADVANTAGED BACKGROUNDS

The bill includes new authority directing that 20% of the funds appropriated for this program in each fiscal year be awarded as stipends to students who meet the exceptional financial need criteria set forth by the Secretary pursuant to Section 758 and who are enrolled at schools of medicine, osteopathy, or dentistry.

In light of increasing tuition costs and limited federal resources it is appropriate to target a portion of the funds under this program directly to students in serious financial need. These funds are to be utilized to assist students in schools of medicine, osteopathy and dentistry in all years of attendance. The stipends awarded under this program are to be awarded only to assist students in attendance at these schools for the purpose of meeting the costs of their tuition, books and equipment, and living expenses. Such stipends are to be awarded to needy students in amounts no greater than $10,000 per student per year.

This new aspect of the Disadvantaged Assistance Program should be administered by the Division of Student Assistance in the Bureau of Health Professions.

CAPITATION SUPPORT FOR SCHOOLS OF PUBLIC HEALTH

Capitation support is intended to create incentives to address personnel shortages in the various health professions. The capitation provisions for all professions other than schools of public health have had no appropriations authorized in recent years because personnel needs appear to have been met or even exeeded in those fields. Those provisions are repealed by the bill.

Because public health can still demonstrate some shortages, the bill reauthorizes appropriations for capitation for schools of public health.

The schools have reported that many students now must attend graduate school part-time and that this makes it difficult for some schools of public health to meet the capitation requirements in current law. But since capitation is meant to stimulate enrollment, it would not be appropriate to continue reauthorizing appropriations while deleting or seriously weakening that requirement. To address the situation of schools with increasing numbers of part-time students, the bill changes the method of calculating a school's eligibility. The capitation requirement is expressed in terms of "full-time equivalent" students as of 1983, and calculates enrollments using the formula already applied under Section 770(a)(2)(A) of the Act. This eliminates the burdensome aspects of the current requirement while continuing the encouragement to keep up enrollments that is embodied in the capitation approach.

A waiver from these requirements exists in the current law. Quality of education is essential, and when enrollment requirements clearly would compromise training of a limited number of public health specialists to meet documented needs, the waiver provision should be utilized. However, the waiver should not be applied in a way that undermines the enrollment requirement.

SUPPORT FOR PRIMARY CARE PROGRAMS IN FAMILY MEDICINE—GENERAL INTERNAL MEDICINE AND GENERAL PEDIATRICS

Continuing support for these programs is necessary because of the difficulty in financing primary care training programs out of patient care revenues, research monies and institutional support as other departments and residency programs are able to do. Because these programs serve important National health care needs and cost-containment objectives by encouraging medical students to enter primary care specialties. This is particularly important while the method of payment for primary care services and education are being revised to provide more equity with other specialties. In addition, schools should demonstrate a real commitment to primary care training and, accordingly, the bill instructs the Secretary to give priority to applicant institutions that demonstrate such commitment. Because expressions of commitment might vary among programs, the bill leaves the definition of commitment flexible, to be interpreted by the Secretary, taking into account the characteristics of the applicant institution and its other training programs.

Development of adequate numbers of educators in general internal medicine and general pediatrics is an important adjunct to efforts to foster primary care medicine through the funding of residency programs. The training of such faculty further enhances the necessary integration of general internal medicine and general pediatrics into traditional medical education training programs. Accordingly, if sufficient funds are available to maintain approved residencies, it would be appropriate for a portion of funds under section 784 to be used for model faculty development programs.

SUPPORT FOR PROGRAMS IN GENERAL DENTISTRY

The need to expand the number and types of programs to train general dentists has become clear in recent years. Accordingly, the bill expands the program to include advanced educational programs, in addition to residencies, and sets aside for general dentistry 7½ percent of funds appropriated for programs in family medicine and general dentistry.

TWO-YEAR SCHOOLS OF MEDICINE, INTERDISCIPLINARY TRAINING, AND CURRICULUM DEVELOPMENT

It is no longer appropriate to encourage additional conversion of two-year schools of medicine to four-year schools. Nevertheless, some existing two-year schools require assistance in maintaining and improving their programs. This is equally the case for schools that provide the first two years of training as for those that provide the last two years, and the restriction of grants to only the former group was eliminated. Because of the importance of certain improvements such as medical libraries for schools without libraries, it should be clear that grants under this section may be used for construction and the purchase of equipment, as well as for other projects, in schools already in existence.

The list of twenty-four areas for special projects in existing law provides insufficient direction to the Secretary. Accordingly, the list was reduced to five high-priority topics. One particular area that needs greater emphasis is training of health professionals in geriatrics and the problems of the elderly, as documented by recent studies. To highlight this need the bill specifies it in greater detail and provides that a specified portion of appropriations for this section shall be devoted to such training and curriculum development.

The bill also incorporates a provision requiring that at least 75 percent of amounts appropriated for special projects shall go to peer-reviewed applications from health professions schools and not more than 25 percent to other applicants. Two-year schools that are eligible for grants for their maintenance or improvement should be considered health professions schools for the other projects in this provision.

REPEALS

The bill includes provisions adopted in the Conference agreement repealing numerous sections considered obsolete or redundant. None of the repealed authorities relate to currently funded activities in health professions training.

Mr. QUAYLE. Mr. President, I rise in support of H.R. 2410. This legisla-

tion renews and modifies programs authorized under title VII of the Public Health Service Act that provide assistance to health professions schools and to the students enrolled in these institutions.

Last year the President vetoed health manpower legislation on several grounds: excessive authorization levels; the fact that we will soon be faced with a surplus of physicians; the maintenance of obsolete Federal subsidies to health professions students; and, the static and rigid categorical framework to deliver such aid. I think that Chairman HATCH and the other members involved in developing this bill have gone a long way toward meeting these concerns. The authorization levels are approximately $50 million below the version vetoed last year and are considerably below those authorized by the Congress in fiscal year 1984.

While I am disappointed that the committee chose not to take advantage of the veto as an opportunity to fully re-examine our Nation's physician manpower policy, I am pleased that a number of changes were made that reflect the need to reevaluate our priorities.

Today, with the rising costs of tuition, student financial assistance is at a premium. Because demand is so high, and the Federal, as well as State and institutional, resources are limited, we are being forced to look at our priorities and bascially to ration what aid is available. For these reasons, I am very pleased that the final version of the bill retains an amendment which I offered that earmarks 20 percent of the funds under the Educational Assistance to Individuals from Disadvantage Backgrounds Program for direct aid to students of exceptional financial need who are enrolled in schools of medicine, osteopathy, or dentistry to assist them in paying for their tuition and living expenses.

While I regret that this percentage is not higher, I believe it is an important step in targeting our limited Federal resources to those who need them the most. I urge my colleagues to support this important legislation.

Mr. KENNEDY. Mr. President, it is with pleasure that I join my colleague, Senator HATCH, in support of this reauthorization of the programs described in title VII of the Public Health Service Act. I feel especially gratified to bring this legislation to the Senate today because of my longtime interest and involvement in the area of health manpower and education.

The programs contained in this legislation have been crafted by our Committee on Labor and Human Resources over two decades as part of a rational manpower policy. They have stimulated the development of a health professions education capability that truly meets national needs and is of great value, not only to our own country but to the world.

These programs have enhanced that capability in several ways. First, they have compensated for imbalances in our health training system that have perpetuated geographic and specialty maldistribution of health professionals. Second, through student loan and scholarship programs, they have guarded against domination of the health professions by any one socioeconomic class, ethnic group, or gender. Third, they have stimulated academic interest in health subject areas that have been singled out by Congress as national priorities.

There are a number of provisions in the current reauthorization bill that strengthen and update the existing programs in title VII. The student loan programs—HEAL and HPSL—have been strengthened, after careful consideration and much deliberation, by provisions that will improve their management, reduce the danger of student default, and unify standards for the various Government loan programs.

The Educational Assistance to the Disadvantaged Program, which has supported minority recruitment and tutoring at schools of medicine, dentistry, and osteopathy, has been expanded in both concept and budget authority. For the first time, this program will give direct monetary support to financially needy students. This is a much-needed and welcome addition to this program.

In the special projects section of title VII, which stimulates curriculum development, special emphasis has been placed on the important areas of geriatrics and health policy and financing. These are apt focuses of attention for the 1980's.

The authorization levels in this bill are conservative, but far more appropriate than they might have been. Though these important disciplines could, no doubt, have benefited from increased support, I believe that we have done relatively well by all of them, in keeping with the crucial role they play in guaranteeing that our health system truly meets national need.

Mr. DOLE. Mr. President, I move the Senate concur in the House amendment.

The motion was agreed to.

REFERRAL AND DISCHARGE OF S. 744

Mr. DOLE. Mr. President, I ask unanimous consent that Calendar No. 336, S. 744, a bill to amend the Agriculture and Food Act of 1981, to provide protection for purchases of farm products, be referred to the Committee on Banking for the period ending October 18, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I further ask unanimous consent that if the Banking Committee does not report the bill by October 18, 1985, it be automatically discharged.

The PRESIDING OFFICER. Without objection, it is so ordered.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

The Senate continued with the consideration of House Joint Resolution 372.

Mr. LEVIN. Mr. President, let me briefly say to my friends from Texas and New Hampshire, both of whom I consider to be my friends, I am somebody who has felt for a long time that we needed significant deficit reduction and who has indeed voted that way and cast some extremely painful votes politically in order that we have significant deficit reduction. I share that belief to the same extent they do. I think the deficit represents a threat to our economic well-being in a significant way.

I, also, happen to be one to whom your proposal and its general outlines have some real appeal. I consider myself a serious legislator. I consider myself somebody who wants to take the time necessary to do a conscientious job on significant legislation. You have proposed significant legislation, and I congratulate you for it. You have focused us on a real need, which is significant deficit reduction before we raise the debt limit. I congratulate you for it.

What troubles me deeply is that those of us who want to take 1 week or 2 weeks, which is a very small amount of time in a deliberative body of this nature, where we are acting without hearings and without committee reports on significant legislation, do not have the benefit of hearings, no witnesses, no benefit of a committee report. We should take 5 or 10 days of legislative time to read this and understand it and to think. It is not just to be here and ask questions.

My friend from Texas is a conscientious legislator, too. I believe he has spent months, if not years, of thought on this approach—surely, months. It reflects it. Your colleagues are entitled to spend a few days in thought, reading this, thinking about it, asking themselves questions.

We are going to scramble around to ask questions, surely, because we should. But that is not the way we should do business here. The hammer of the debt limit should stay there. We should have a short debt limit extension and come back after 1 week or 2 weeks of thoughful deliberation and address these amendments. Indeed, I may vote for your amendment, even

though, at first blush, I happen to prefer the version that Senator CHILES is offering, because I think it is a more honest approach, because it includes revenues as well as cuts.

Your amendment has some appeal to me in these general outlines, but I want to think through the impact on programs, think through the shift in power, if any, think of questions, and so forth. It is not the time to ask questions. We can do that tomorrow.

Even though the Senator from Texas and I and other members of the Armed Services Committee have made a long commitment to be at a conference tomorrow, I am willing to cancel that. But I have to spend time in thoughtful contemplation, to ask questions which are significant, not just for 3 minutes to be here to ask them.

So I really tell my friends, as somebody who has voted for significant deficit reduction, who thinks the deficit is a threat, who is glad that the hammer of the debt limit is being applied, that before we do anything final on that, beyond a week or two, I think we should handle deficit reduction.

Indeed, I participated in meetings to work out a version as to how to do that, in the last few weeks, a very different version from what you have come up with. I am telling you in a heartfelt way that the responsible way to legislate this is to have the short-term debt limit extension, keep the hammer there 1 week or 2 weeks, and to let your colleagues who feel they need the time to read, think, contemplate, and maybe support your provision and perhaps improve it—I do not know how many months or years you have put in on this, but surely a week or two is not too much for colleagues who are supposed to be in the world's greatest deliberative body.

Mr. RUDMAN. Mr. President, I wish to respond to my good friend from Michigan, and he is a good friend. We serve on a committee together and have worked in this Chamber on a couple of major legislative initiatives that were satisfying to both of us.

The Senator from Michigan also happens to be probably one of the brightest minds in this Chamber and has powers of legal analysis that he has proved over and over again in our work.

On the face of it, what the Senator says does not seem unreasonable. The problem we face in this Congress, unfortunately, is that—excluding all whom I see on the floor at this moment—there are those who, in the view of the Senator from Texas and the Senator from New Hampshire—and I would expect in the view of the Senator from Michigan—really are very troubled about legislation which will force them to make decisions, decisions that, frankly, none of us, including those of us in this Chamber tonight, enjoy making.

I say to the Senator from Michigan that I have voted, as he has, on a number of complex pieces of legislation that the staff was only able to put together on fairly short notice. Yet, we voted on the legislation—ranging from major agricultural legislation to major tax legislation.

The Senator from Texas, the Senator from South Carolina, and I put this together. Most of it was done during the month of August.

In fact, as the most distinguished expert on the Senate rules, who sits in the chair of the Democratic leader, would tell us, the major portion of what is before us changes what is now part of the Senate and the House rules, the Budget Act, and puts it in statutory form.

There are really two parts of this proposal before us: Part A changes some of the methods of the budget process. I must say that for any skilled or unskilled lawyer, or anyone with a very basic amount of understanding, I do not think it is a matter of more than hours to understand what that is.

We have done that in summary form which I am willing to place my reputation for integrity on the line and say that summary which encapsulates all of the changes is a frank, candid, and honest statement of what this is.

The second part of this proposal is a far different kind of proposal. The second part, in fact, is new, and I will tell the Senator from Michigan that it in no way resembles anything in the Budget Act. That is the section that we have heard discussed at great length here on the floor this afternoon and which I intend to address myself to on tomorrow, Sunday, and Monday if there are sufficient people in the Chamber to discuss it with.

That is the section which is gravely concerning in the most honest and sincere way most of the Members on that side of the aisle and some on this side of the aisle, and that is this question. It is really the key essential legal question, the only legal question of any gravity that is contained in this entire proposal. Let me phrase it if I can. It is this: Is there anything within this statute that attempts to delegate to the President of the United States additional powers than those already contained in the Constitution? In other words, if the trigger is pulled in this mechanism can the President do some things that Congress under the Constitution must do and only Congress can do?

I would say to the Senator from Michigan that when this was drafted—I think the Senator knows my background—I was very conscious of the case of Richard Nixon and the impoundment case and I imagine the Senator from West Virginia could probably give us a lecture on the history of that and I would love to hear that lecture sometime because I find the history lessons here interesting. In fact, I have collected them.

In that case the Supreme Court set the guidelines of what Congress could do with the appropriations and what the President could do with those appropriations. And what we have done here and what we are prepared to talk about and in I think several days ought to be able to do it is that the President has the most simple of ministerial functions to perform. In fact, the President will not perform them. They will be performed by a computer because the Senator from Texas has in his possession every line item that is referenced in our legislation and if in fact the trigger is pulled and the reductions are made and let us assume it is a 2.357-percent reduction it will be applied down the line. There is no discretion whatsoever.

I heard discussions here this afternoon about people who are Governors in this State and the other State. It is a far different situation.

In this Constitution in this country, only Congress may appropriate and prioritize funds.

So let me simply wind up to the Senator from Michigan by saying this: If I thought for one moment that there was an extraordinarily complex piece of legislation that really needed several weeks of study I in good faith would agree with him, but I would ask my good friend who I say and in no manner of extraordinary senatorial courtesy but in a very sincere way, because I work with the Senator from Michigan—he has one of the best legal minds in this body and we all know that. Let him look at this and analyze it himself over the weekend. Then if he is dissatisfied with what I say I would be willing to entertain what he has asked for.

Let me say that I respect and understand the Senator's sincerity in the issue. I know where he is coming from. I hope he will look at it over the weekend and he will find that what appears to be complex is of the most essential simplicity.

Mr. HOLLINGS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, in response, the Senator from New Hampshire has really touched upon the points I wanted to emphasize, the sincerity of the Senator from Michigan. I have talked off and on with him over the past month. He is very much concerned as we all are concerned about doing something. Yet at the same time, of course, I also attribute to him as the Senator from New Hampshire the best of legal minds in this body.

I think the real test is have we been impartial? This is a complexity. There are terms—what is controllable and

uncontrollable under a defense budget, and those are to be studied out. But the real test is to go to the intent. The intent here is not to give anybody an advantage. Specifically, in the Chiles amendment, he puts on the front piece we want to look out for export-import, promote imports, we want to take care of education. There are some intentional priorities.

In contrast, Gramm-Rudman-Hollings has the priority of impartiality, an impartial discipline. If the Senator can catch me off base and say, "Oh, no, you have been partial," then I want to be corrected and I would like to make that correction.

I continue to study the proposal amidst the complexity of definitions and items included in the budget and whether or not you can include an item for proportional reduction.

Mind you me, the starting point, the starting point is the budget overwhelmingly passed with the vote of most every Senator on this floor. That is the budget that we take, not my budget or one that was defeated because of defense or the one defeated for any other reason. It was just what we passed 60 days ago. In our proposal we include a cushion of $20 billion.

All of this talk about trauma is really misguided in the context of the Senator from Texas, myself, or others just come barreling in with some kind of theoretical, a line here and a line there, and everything else like that. We tried to give us another test, realistic. Is this realistic, politically attainable? If you are going to be impartial, there is no use in dancing around the fire with respect to the trust fund of Social Security, and that is established. We have acted realistically in crafting our proposal.

I cannot say that for the other entitlements. I can keep Social Security separately.

I look at Social Security. If the truth is that there is, as has been represented, a growing surplus, let us lower Social Security taxes.

You and I know that the taxes on Social Security in many instances exceed the contribution paid by the employee.

So give us that test and see whether or not our proposal is realistic. That is why we put in that $20 billion cushion and said wait, we put in a 5-percent threshold to trigger the spending cuts. We first had 4 percent. We put in 5 years. We first had budget deficit at $179.9 billion. We upped it to $180 billion. Back and forth we negotiated and developed the most impartial, realistic proposal possible.

True those adjustments came about in large measure by our participation and negotiation of a plan because I wanted to make sure we were not off on a political toot that was just going to be hooted down again, would go nowhere, and was just something that I could use as a headline, and then we would go on back to the drawing board for another plan. Our plan is crafted to be a realistic approach to the budget problem and once and for all get the job done.

I am tired, I say to the Senator from Michigan, of this Government not working. The government of Michigan worked. It faced up to the tough decisions. The Democratic Governor faced up to it, under the threat of recall, or whatever system Michigan has. He was responsible, he met the challenge, Michigan overcame its fiscal crisis.

I know if we had that kind of system here, there would not be many of us Senators sitting around here on Friday wondering whether we had enough time to deliberate. We would be headed pellmell over each other, knocking down desks to vote for something, because the voters would be recalling us because we have not made Government work.

The Senator from Michigan was in an election year. I admire him. He in an election year went along with a freeze on that fundamental commitment to our senior citizens and he went along with revenues.

So I am talking to the already converted in the church here this afternoon. But be that as it may, he and I have been up that hill four or five times. I started in 1981 and it had not worked and so now we come with our plan and this is no surprise. We all have been working on our side of the aisle, on the other side of the aisle, to draft a solution. So please find out what those questions are, so we can answer them and move to a vote.

Our minority leader here is disturbed. He is genuine and he has been asking the questions, as has the other Senator from Michigan and the Senator from Colorado. But I can tell the Senator just as colleagues in the club that we have a good 2 dozen Senators who would like not 5 days but 5 years. I mean let us be realistic. We are not going to please them. I would love to. I respect them. I understand their priorities, but they have no idea of approving this plan. They have been on this treadmill. They love it. There is no responsibility. There is no accountability. We just send letters over to the President. I know we might have to double the White House staff. Report to us on that, this, and report that, do not spend this, do not report that, report this.

We all act like we are President around here having a big day. I would say 20 percent of the time is expended on us playing President in this Chamber and not doing our fundamental duty.

So it is. Test our proposal. Find out. Ask those questions. We have got today, we have got tomorrow, and we have got all day Monday. And, of course, we could go over until Tuesday, we have that.

But I do not want our colleagues, I say to Senator Levin, he and I blamed on this Democratic side as closing down the Government. And that is what I am really concerned about. Because I know that a good majority over here feel just as keenly as any on the other side of the aisle that Government has not been working and they would like to see it work.

We do not want to be looked upon as obstructionists and all of a sudden I cannot understand—well here it is, you see.

We come with the Chiles-Byrd amendment in one breath saying, "Oh, we can't get a vote. We can't get a vote." And Chiles-Byrd is just as complex as Gramm-Hollings. And then, when you suggest that Chiles-Byrd have a vote, they say, "Oh, no, we don't want a vote. We don't want either one."

We cannot play that game and get by. We just cannot go along with that kind of charade.

Mr. BYRD. Will the Senator yield?

Mr. HOLLINGS. Yes, I am delighted to yield.

Mr. BYRD. The Senator can speak for himself, not for me.

Mr. HOLLINGS. I am speaking for myself. That is exactly right.

Mr. BYRD. But do not be characterizing me, or what I stand for, or whether I want a vote and why. The Senator has a perfect right to speak for himself.

Mr. HOLLINGS. Exactly; and that is who I am speaking for.

Mr. BYRD. Fine; just do not attempt to characterize my position.

Mr. HOLLINGS. Well, I had only characterized it to describe your position as one of sincerity and concern about the deficit, as I said, about the deficit and about getting something done. But I can certainly characterize how I feel about this.

Mr. LEVIN. Mr. President, will the Senator yield?

Mr. HOLLINGS. Yes.

Mr. LEVIN. Mr. President, I happen to agree with the Senator that we must act on the debt limit and we must act on it responsibly. I am more than happy to act responsibly. I have joined with him, I think consistently, as a matter of fact, in his deficit reduction program.

Mr. HOLLINGS. Right.

Mr. LEVIN. I am an ally in this. I am not an ally in the process which takes a complicated or a seemingly complicated piece of legislation and says we can have a weekend to digest it with no committee hearings, no committee report. It is a piece of legislation which has taken months of thoughtful preparation. I know that, because I know my friends from Texas, New Hampshire, and South

Carolina, who are the prime cosponsors. You are thoughtful people. I know you have spent months on it.

Now you have colleagues who are inclined to support something like this—I am in that group—who are telling you that we do not feel comfortable in reaching a decision on this over a weekend without the benefit of a committee report. I would like to get a week or 10 days to think about this. That is all we are saying, not to put off a decision for a year.

By the way, I happen to agree. I think there are some probably who would like to delay this for 5 years. Not me. I am delighted there is an action forcing a mechanism on deficit reduction. I am happy it came along with this. I may even vote for it if you will give me a chance to act responsibly, in good conscience, and to review a complicated piece of legislation for a few days. Believe it or not, I may vote for this. There is a lot of appeal in this for me.

My friend from South Carolina has reached a conclusion that this is impartial. He may be right and I may join him in that conclusion.

But give us a few days, those of us who are conscientiously telling you that this has some real appeal, the general matrix, to look at the details.

Somebody said in a different setting yesterday that the devil is usually in the details. Give those of us who are not trying to delay this 5 years, but to whom this has some appeal, the time to act responsibly according to our likes. We may be with you. Do not drive us away from you. You should be driving us toward you. You always have. You should be reaching out to us, providing we are not eliminating your hammer, which no one is proposing to do. You have a hammer, which is great. I am glad you have that hammer on the debt limit, by the way. I am all for it.

I do not think we ought to raise this debt limit without doing some difficult things on some deficit reductions.

I have been meeting with people and dealing with you over the last years on this question, and over the last weeks meeting with Senator CHILES and others to try to use the debt limit extension exactly for this purpose. Because we should not extend this debt without doing something significant to deficit reductions.

But not on a weekend, when those of us who are conscientious and telling you we are geniunely attracted to this in its general outline want to study the details of it. Then we may reach the same conclusion you have, that it is impartial. I would like to reach that conclusion. I know that is your motive, by the way, I know you folks. I know that is your motive.

Mr. HOLLINGS. Maybe we missed the mark. I would be delighted to stand corrected. I continue to look at it and listen to the debate.

No one is trying to drive either way. We are trying to persuade. I know that mind of yours. We have had three caucuses on this. We have had meetings. We have talked about every particular feature and how you can do it. We have come around, all of us have come around substantially in the last 10 days to a general provision that is not that substantially different between the two major submissions here on the floor, or let us say the three major ones, counting the one from the Senator from Louisiana. So they are drawn and we have had expert staff. We have had that expert staff from the policy committees on both sides and they are looking at it.

In drawing, let us say, Chiles-Byrd, at least the staff had the advantage of looking at the Gramm-Rudman-Hollings proposal. I am convinced they would point out the differences and are prepared to point those differences out, where this is provided here and that is not provided there.

What I am saying is, we have had a good bit of analysis. Now every Senator, in his own judgment, would like to reflect on it.

I am possibly very much like you, I would like to hear some other Senators. I know it is going to be pretty tough, for example, on committee chairmen. We may be some chairmen around here in a year or so, you do not know.

But in all of these committees, we have never discussed at length exactly what would occur when these bills come down and the President submits that budget. It is going to be pretty tough on the President. I do not think that has been discussed. I do not know that he appreciates it that much, to tell you the truth, when he has to come in. Because he is going to have to come in at that limit, and coming in at that limit everybody is going to be looking at him, because we are all now having our picture took. So we are all sort of, as the Senator from Oklahoma says, in the box or under the klieg light of truth in budgeting, as I have characterized it. So we have got today and tomorrow. The staffs will look and they will pick. And you know these staffs and I know these staffs.

I would like to discuss it more and reflect. But it should not be assumed that we have not had due time to reflect. A reflection will take place today. It has. It will take place tomorrow. It will take place, unfortunately, on Sunday and on Monday. And that is the kind of box that we ought to be in.

We ought to be able to deliberately look at something over a 4- or 5-day period, with the best of staff and advisers asking all of these particular questions, and then, if we make a mistake, the colleagues are not going to support it. You and I both know that.

I thank the distinguished Senator from Texas.

Mr. GRAMM. Mr. President, I am going to be brief because no one has taken me up on dinner.

Let me say to my dear colleague from Michigan, a man who I serve with on the Armed Services Committee and who has outsmarted me on most things we have dealt with there this year, that I would be terribly swayed by his arguments were we not listening to the same arguments, not made as persuasively or as well before, but arguments we have heard echoing through the decade. "Give us more time. Not now. Delay the process. Take the spotlight off. Call time out and let us think about it and discuss it. Set up a committee."

But the truth is that if we went out and gave a test this afternoon to every Member of the Senate—of course, we know Members of the Senate would not take it—but if we did, I would be willing to lay a sizable wager—that if you took this proposal and you wrote 10 multiple-choice questions on what does this do, and then you took the immigration bill and you wrote 10 multiple-choice questions about it, and you took the farm bill—and we have been holding hearings on this farm bill over and over and over—and we could pick out any other major legislation we have done this year, give that test, and I would be willing to submit today that the Members of this body would score higher on the test on this bill by Senator HOLLINGS, Senator RUDMAN, and myself than on any major piece of legislation we voted on this year.

And the reason is this is not a complicated bill. Its intentions are clear. Its processes are clear. Its procedures are used more or less in 43 States. Finally, let me remind my colleagues if we were voting here today, it is not the end of the process. It is the beginning. We are going to conference. I have been trying to get the leadership on the House side who say they find this interesting to sit down with me, and let us work out this thing. Let us look at changes they might want. Let us look at some compromise language because we are going to conference if we adopt this amendment with a provision. They are not going to have a provision. So the scope problem is eliminated. Let us reason together, and try to get a proposal they can adopt. So we have time this weekend, and we have time next week. I am willing to talk with anyone, listen to anyone, and answer questions as long as I do it quickly so that we might recess today. But the time has come to get on with the job. I am ready.

Thank you, Mr. President.

Mr. RUDMAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. RUDMAN. I say to my friend from Texas that I think the idea of taking exams on what we are doing around here would strike a chill in the heart of most Members of this body, and probably the other one, too.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 10:33 a.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its clerks, announced that the House has agreed to the amendment of the Senate to the bill (H.R. 2410) to amend the Public Health Service Act to revise and extend the programs under title VII of that act, with an amendment, in which it requests the concurrence of the Senate.

EXECUTIVE AND OTHER CUMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1837. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a report on a foreign military aid sale to the United Kingdom; to the Committee on Armed Services.

EC-1838. A communication from the Deputy Assistant Secretary of Defense transmitting, pursuant to law, notice of a determination by the Air Force to deny examination of certain records by the Comptroller General; to the Committee on Armed Services.

EC-1839. A communication from the Acting Secretary of State transmitting, pursuant to law, a report on the situation in El Salvador; to the Committee on Foreign Relations.

EC-1840. A communication from the Acting Director of the Office of Management and Budget transmitting a draft of proposed legislation entitled the "Simplified Competitive Acquisition Technique Act of 1985"; to the Committee on Governmental Affairs.

EC-1841. A Communication from the Secretary of Labor transmitting a draft of proposed legislation to provide for four new Assistant Secretaries of Labor, and for other purposes; to the Committee on Labor and Human Resources.

EC-1842. A communication from the Chairman of the Federal Home Loan Bank Board transmitting, pursuant to law, the 1984 Annual Report of the Board; to the Committee on Banking, Housing, and Urban Affairs.

EC-1843. A communication from the Secretary of Transportation transmitting a draft of proposed legislation to permit the Secretary of Transportation to protect Government assets in bankruptcy; to the Committee on Commerce, Science, and Transportation.

EC-1844. A communication from the chairman of the D.C. Council transmitting, pursuant to law, D.C. Act 6-83; to the Committee on Governmental Affairs.

EC-1845. A communication from the chairman of the D.C. Council transmitting, pursuant to law, D.C. Act 6-80; to the Committee on Governmental Affairs.

EC-1846. A communication from the chairman of the D.C. Council transmitting, pursuant to law, D.C. Act 6-77; to the Committee on Governmental Affairs.

EC-1847. A communication from the chairman of the D.C. Council transmitting, pursuant to law, D.C. Act 6-85; to the Committee on Governmental Affairs.

EC-1848. A communication from the chairman of the D.C. Council transmitting, pursuant to law, D.C. Act 6-74; to the Committee on Governmental Affairs.

EC-1849. A communication from the chairman of the D.C. Council transmitting, pursuant to law, D.C. Act 6-76; to the Committee on Governmental Affairs.

EC-1850. A communication from the chairman of the D.C. Council transmitting, pursuant to law, D.C. Act 6-75; to the Committee on Governmental Affairs.

EC-1851. A communication from the chairman of the D.C. Council transmitting, pursuant to law, D.C. Act 6-78; to the Committee on Governmental Affairs.

EC-1852. A communication from the chairman of the D.C. Council transmitting, pursuant to law, D.C. Act 6-79; to the Committee on Governmental Affairs.

EC-1853. A communication from the chairman of the D.C. Council transmitting, pursuant to law, D.C. Act 6-81; to the Committee on Governmental Affairs.

EC-1854. A communication from the chairman of the D.C. Council transmitting, pursuant to law, D.C. Act 6-84; to the Committee on Governmental Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LUGAR, from the Committee on Foreign Relations, with amendments:

S. Res. 227. A resolution urging a joint United States-Soviet effort to achieve worldwide disease immunization by 1990 (Rept. No. 99-148).

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs.

Special report entitled "Second Monetary Policy Report for 1985" (Rept. No. 99-149).

By Mr. RUDMAN (for Mr. LAXALT), from the Committee on Appropriations, with amendments:

H.R. 2965. An act making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1986, and for other purposes (Rept. No. 99-150).

By Mr. WEICKER, from the Committee on Appropriations, with amendments:

H.R. 3424. An act making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1986, and for other purposes (Rept. No. 99-151).

By Mr. ANDREWS, from the Committee on Appropriations, with amendments:

H.R. 3244. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1986, and for other purposes (Rept. No. 99-152).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. COCHRAN:

S. 1734. A bill prevent distortions in the reapportionment of the House of Representatives caused by the use of census population figures which include illegal aliens; to the Committee on Governmental Affairs.

By Mr. MATHIAS:

S. 1735. A bill for the relief of Sarwat Anjum Ali; to the Committee on the Judiciary.

By Mr. PRESSLER:

S. 1736. A bill to amend the Public Health Service Act to provide assistance for education, research, and treatment programs for Alzheimer's disease and related disorders, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. HEFLIN:

S. 1737. A bill for the relief of Edwin L. McCulloch; to the Committee on the Judiciary.

By Mr. GRASSLEY:

S. 1738. A bill to amend the Farm Credit Act of 1971 to provide for U.S. Government guarantees for certain obligations of the Farm Credit System; to the Committtee on Agriculture, Nutrition, and Forestry.

By Mr. FORD (for himself and Mr. BOREN):

S.J. Res. 213. Joint resolution to designate January 19-25, 1986, "National Jaycee Week."; to the Committee on the Judiciary.

By Mr. GOLDWATER (for himself, Mr. GARN, and Mr. SASSER):

S.J. Res. 214. Joint resolution to provide for the reappointment of Carlisle H. Humelsine as a citizen regent of the Board of Regents of the Smithsonian Institution; to the Committee on Rules and Adminstration.

S.J. Res. 215. Joint resolution; to provide for the reappointment of William G. Bowen as a citizen regent of the Board of Regents of the Smithsonian Institution; to the Committee on Rules and Administration.

By Mr. LUGAR (for himself and Mr. PELL):

S.J. Res. 216. Joint resolution approving the proposed agreement for cooperation between the United States and the People's Republic of China; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. COCHRAN:

51-059 O-86-23 (Pt. 19)

S. 1734. A bill to prevent distortions in the reapportionment of the House of Representatives caused by the use of census population figures which include illegal aliens; to the Committee on Governmental Affairs.

(The remarks of Mr. COCHRAN and the text of the bill appear earlier in today's RECORD.)

By Mr. PRESSLER:

S. 1736. A bill to amend the Public Health Service Act to provide assistance for education, research, and treatment programs for Alzheimer's disease and related disorders, and for other purposes; to the Committee on Labor and Human Resources.

COMPREHENSIVE ALZHEIMER'S ASSISTANCE, RESEARCH, AND EDUCATION ACT

Mr. PRESSLER. Mr. President, today I am rising to introduce legislation to help address one of the most insidious health problems facing this Nation. This disease is perhaps best described by the sad ironies that surround it. The characteristics of this disease were first identified nearly 80 years ago. Yet despite this Nation's otherwise impressive health record, scientists have only recently begun to understand its mysteries. It is a disease that has stricken more than 2.5 million Americans; yet only a handful of us had ever heard of it until a few years ago.

Perhaps the saddest irony of all, Mr. President, is that despite this country's elaborate system of social protections, the vast majority of its victims and their families still suffer in silence.

This legislation is intended to help ease the burden of the unfortunate victims of Alzheimer's disease and their families.

For those who may not be familiar with it, Alzheimer's disease is the most common cause of mental impairment among the elderly. It is neurological disorder that runs a painfully slow course, often lasting between 5 to 15 years as it gradually deprives its victims of their ability to function. Eventually, the Alzheimer's victim requires around-the-clock supervision, including medical, personal, and mobility assistance.

According to the Public Health Service, this horrible illness strikes at least 1 person in 20 between the ages of 65 and 75, and every fifth person over 80. And to make matters worse, demographic projections indicate that the elderly—those most vulnerable to Alzheimer's disease—comprise the fastest growing segment of our population. Unless we find a way to stop this disease, it could very well become the biggest health problem of the next century.

We need not wait until then to see just how devastating an illness Alzheimer's disease can be. We have already received reports that as many as one-half of the nursing home admissions in the United States are victims of Alzheimer's disease. To that, add the hundreds of thousands who are being cared for at home by a spouse or a loved one. This represents a tremendous loss of precious human resources, as well as a substantial emotional and financial hardship on families.

Because Alzheimer's disease is not covered by Medicare or by most private insurance plans, much of the financial burden of this disease must be borne by families and loved ones. Some Medicaid assistance is available but only after the family's resources have been depleted.

Quite frankly, I believe that the basic principle of our social welfare system is undermined when a substantial and growing number of elderly individuals must seek public assistance or else subsist below minimum standards of health and comfort. Furthermore, I believe that to meet the array of challenges presented by Alzheimer's disease and similar disorders—to fulfill the role we cannot avoid—we must eventually reexamine and revise our policies regarding long-term care. It is a complex and costly issue, I know, but we cannot put it off much longer.

Now may not be the time to discuss a major expansion of the Federal role. Still, there are some steps we can take to help ease the burden of families and perhaps hasten the progress of medical research. The bill I am introducing—the Comprehensive Alzheimer's Assistance, Research, and Education Act of 1985—is intended to do just that.

Among other things, this legislation calls for the establishment of a National Alzheimer's Education Program, first to promote coordination among the various Government agencies involved, such as the National Institutes of Health and the Veterans' Administration, and, second, to make information on research, treatment, and services available to those who need it most—to health care professionals and to the families of Alzheimer's patients.

At some stages of their illness many victims of Alzheimer's disease can fare better in their own homes if proper care is available. To this end, this legislation proposes incentive grants to States to help coodinate support services for Alzheimer's patients and their families. Up to 25 percent of these funds could be used by the States to make respite care available to patients, thereby affording family members some small measure of relief from the constant pressures of care giving.

Finally, this legislation would permit expansion of the research center program administered by the National Institute on Aging and allow for specially targeted research in such areas as family stress management.

Mr. President, more than 13 percent of the people in my home State of South Dakota are age 65 or older. That places the State fifth in the Nation in percentage of senior citizens—again, the age group most vulnerable to Alzheimer's disease. However, Alzheimer's disease and its devastating consequences are not confined to any State or region, or any occupation or economic level. This is a matter of national concern.

I ask my Senate colleagues to consider this legislation carefully and to join me in cosponsoring this important measure.

By Mr. HEFLIN:

S. 1737. A bill for the relief of Edwin L. McCulloch; to the Committee on the Judiciary.

RELIEF OF EDWIN L. MC CULLOCH

● Mr. HEFLIN. Mr. President, I rise today to introduce legislation providing for the relief of Edwin McCulloch.

In 1977, while Edwin was stationed at an Air Force base in Germany, he was given an injection of iodine by an Air Force medic. The iodine was administered despite a clear notice on his medical chart indicating that the patient was allergic to iodine. Mr. McCulloch also kept a medical alert card with him at all times. As a result of negligent administration of iodine, Edwin is suffering a progressively degenerative spinal condition. At this point, he is permanently disabled and complete paralysis may result. Because Edwin was on active duty while he was injected with the iodine, he cannot bring a negligence action for injuries suffered.

This private relief bill authorizes the Court of Claims to pay $900,000 in damages to Edwin McCulloch for his injuries. This legislation would allow Mr. McCulloch to have his grievances addressed. Although this man was on active duty, his injuries were not service-related, but were caused by a strictly negligent and inexcusable action on the part of medical personnel. It is my hope that Congress will sympathize with his situation and address this legislation without further delay.●

By Mr. FORD (for himself and Mr. BOREN):

S.J. Res. 213. Joint resolution to designate January 19-25, 1986, "National Jaycee Week"; to the Committee on the Judiciary.

NATIONAL JAYCEE WEEK

● Mr. FORD. Mr. President, I am introducing a joint resolution to designate the week of January 19-25, 1986, "National Jaycees Week." This commemorative legislation is scheduled to coincide with the annual celebration of this week nationwide by the 6,500 local Jaycee chapters.

The Jaycee movement began in St. Louis, MO, by Henry Giessenbier on October 13, 1915. A national organization was formally created by 29 chap-

ters at the first convention in St. Louis on January 21, 1920.

For the past 66 years, the U.S. Jaycees have offered personal development and leadership training for young people ages 18 through 35. A major portion of their efforts are directed toward finding solutions to specific problems in their individual communities.

The membership of the U.S. Jaycees has grown to 268,000 persons in all 50 States. There are 6,500 local chapters nationwide.

Each year, the membership of the U.S. Jaycees celebrate "National Jaycee Week." This week spotlights the yearlong community service of the local Jaycee chapters. Various citizens are honored in the individual communites with awards such as the Boss of the Year, the Distinguished Service Award, and the Outstanding Young Businessman presentation. Other activities for the week include Senior Citizen's Day, Student Government Day, and the Mayor's Prayer Breakfast.

The U.S. Jaycees serve a vital function by bringing together outstanding young members of various communities throughout the United States. As a former president and international vice president of this proud organization, I urge my colleagues to cosponsor this joint resolution designating "National Jaycee Week."●

● Mr. BOREN. Mr. President, I am proud to support with my good friend from Kentucky, efforts to designate January 19-25, 1986, "National Jaycees Week." The designation of this week is scheduled to coincide with an annual celebration nationwide by the over 6,200 local Jaycee chapters. The U.S. Jaycees, headquartered in Tulsa, OK, will be celebrating 66 years of service to communities across America in January 1986. Annually the Jaycees outdo themselves in their community service throughout the United States.

This valuable community service goes on all year long and provides unique and irreplaceable benefit for many vital functions for which there is no other assistance. Some of the Jaycees' important community projects involve public education on alcohol and other drugs, energy awareness, CPR training, and muscular dystrophy fundraising. The U.S. Jaycees also provide a unique service of bringing together outstanding young members of various communities throughout the Nation.

The U.S. Jaycees is a civic service organization of young people between the ages of 18 and 35 dedicated to providing leadership training for its members through active participation in local community betterment programs designed by the local members to meet specifically local needs coexistent with national policy of the Jaycees. The organization has always been involved—and always on a nonpartisan basis—with governmental issues and programs as well. The Jaycees campaigned in support of political freedom for civil servants, were instrumental in formation of the ACTION agency and lobbied in favor of statehood for Alaska. More recently, the Jaycees have concentrated their government efforts on matters of economy, having repeatedly called for a balanced Federal budget.

The Jaycees now number over 300,000 members in approximately 6,200 chapters. As a service organization, the Jaycees have done much to enhance the communities in which they serve. By supporting this resolution, we will be honoring an organization that has given much toward the health and vitality of our cities, towns, and communities throughout America. This resolution is but a small expression of America's gratitude for the many significant contributions of the U.S. Jaycees. I urge my colleagues to join me in cosponsoring this joint resolution.●

By Mr. GOLDWATER (for himself, Mr. GARN, and Mr. SASSER):

S.J. Res. 214. Joint resolution to provide for the reappointment of Carlisle H. Humelsine as a citizen regent of the Board of Regents of the Smithsonian Institution; to the Committee on Rules and Administration.

REAPPOINTMENT OF CARLISLE H. HUMELSINE TO THE BOARD OF REGENTS OF THE SMITHSONIAN INSTITUTION

● Mr. GOLDWATER. Mr. President, today, along with Senators GARN and SASSER, I am introducing a joint resolution to reappoint Mr. Carlisle H. Humelsine of Virginia as a Citizen Regent of the Board of Regents of the Smithsonian Institution. Mr. Humelsine has done an outstanding job, not only as a member of the Board, but also as Chairman of the Executive Committee of the Board of Regents.

Mr. President, I ask unanimous consent that a biographical sketch on Mr. Humelsine be inserted in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Humelsine, Carlisle Hubbard, found. exec.; b. Hagerstown, Md., Mar 12, 1915; s. Charles Ellsworth and Anna Barbara (McNamee) H.; A.B., U. Md., 1937, H.H.D. By Mr. GOLDWATER (for himself, Mr. GARN, and Mr. SASSER):

S.J. Res. 215. Joint resolution to provide for the reappointment of William G. Bowen as a citizen regent of the Board of Regents of the Smithsonian Institution; to the Committee on Rules and Administration.

REAPPOINTMENT OF WILLIAM G. BOWEN TO THE BOARD OF REGENTS OF THE SMITHSONIAN INSTITUTION

● Mr. GOLDWATER. Mr. President, today, along with Senators GARN and SASSER, I am introducing a joint resolution to reappoint Dr. William G. Bowen of New Jersey as a Citizen Regent of the Board of Regents of the Smithsonian Institution. Dr. Bowen has performed his responsibilities as a Regent in a very thorough, conscientious, and intelligent manner.

Mr. President, I ask unanimous consent that biographical material about Dr. Bowen be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Bowen, William Gordon, univ. adminstr., economist; b. Cin., Oct. 6, 1933; s. Albert A. and Bernice (Pomert) B.; B.A. Denison U., 1955; Ph.D., Princeton, 1958; m. Mary Ellen Maxwell, Aug. 25, 1956; children—David Alan, Karen Lee. Mem. faculty Princeton, 1958-, prof. econs., 1965-, dir. grad. studies Woodrow Wilson Sch. Pub. and Internat. Affairs, 1964-66, provost, 1967-72, pres., 1972-. Dir. NCR Corp., 1975-. Trustee Denison U., 1966-75, Center for Advanced Study in the Behavioral Scis., 1973-77, Alfred P. Sloan Found. Mem. Am. Econ. Assn., Indsl. Relations Research Assn., Phi Beta Kappa, Sigma Chi. By Mr. LUGAR (for himself and Mr. PELL):

S.J. Res. 216. Joint resolution approving the proposed agreement between the United States and the People's Republic of China; to the Committee on Foreign Relations.

UNITED STATES-CHINA NUCLEAR COOPERATION AGREEMENT

● Mr. LUGAR. Mr. President, on July 24, 1985, the President transmitted the United States-China Nuclear Cooperation Agreement to the Congress for its review in accord with the Atomic Energy Act of 1954, as amended. That act provides for a 30-day period of consultation followed by a more formal 60-day review period. The act also requires the majority and minority leaders of the Senate, or their designees, to introduce a joint resolution concerning the agreement on the first day of the 60-day review period.

As the designees of the two leaders, I am introducing together with the distinguished ranking minority member of the Foreign Relations Committee [Mr. PELL], the required resolution. Neither the Senator from Rhode Island [Mr. PELL] nor I are taking a position for or against the China agreement at this time. Our introduction of the resolution is solely to comply with the statute and to provide a basis for committee review.

The Committee on Foreign Relations has scheduled 2 days of hearings on the agreement for October 9 and 10. At that time, administration representatives and witnesses from the private sector will discuss the merits of the agreement.●

ADDITIONAL COSPONSORS

S. 426

At the request of Mr. WALLOP, the name of the Senator from Louisiana [Mr. JOHNSTON] was added as a cosponsor of S. 426, a bill to amend the Federal Power Act to provide for more protection to electric consumers.

S. 519

At the request of Mr. EVANS, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 519, a bill to require a study of the compensation and related systems in executive agencies, and for other purposes.

S. 881

At the request of Mr. KENNEDY, the name of the Senator from California [Mr. WILSON] was added as a copsponsor of S. 881, a bill to extend title X of the Public Health Act for 3 years.

S. 925

At the request of Mr. HUMPHREY, the names of the Senator from Nevada [Mr. LAXALT], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Alaska [Mr. STEVENS], and the Senator from Wisconsin [Mr. KASTEN] were added as cosponsors of S. 925, a bill to deny most-favored-nation trading status to Afghanistan.

S. 985

At the request of Mr. GRASSLEY, the name of the Senator from Oklahoma [Mr. BOREN] was added as a cosponsor of S. 985, a bill to protect the rights of victims of child abuse.

S. 1018

At the request of Mr. GORTON, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of S. 1018, a bill to amend the National Labor Relations Act to clarify the meaning of the term "guard" for the purpose of permitting certain labor organizations to be certified by the National Labor Relations Board as representatives of employees other than plant guards.

S. 1187

At the request of Mr. SPECTER, the name of the Senator from Oklahoma [Mr. BOREN] was added as a cosponsor of S. 1187, a bill to amend title 18, United States Code, including the Child Protection Act, to create remedies for children and other victims of pornography, and for other purposes.

S. 1209

At the request of Mr. CHILES, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 1209, a bill to establish the National Commission To Prevent Infant Mortality.

S. 1222

At the request of Mr. GORTON, the names of the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Vermont [Mr. STAFFORD], the Senator from Rhode Island [Mr. CHAFEE], and the Senator from Ohio [Mr. METZENBAUM] were added as cosponsors of S. 1222, a bill to amend the Agricultural Act of 1949 to provide price support for the 1985 and subsequent crops of sugar.

S. 1259

At the request of Mr. THURMOND, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of S. 1259, a bill to correct certain inequities by providing Federal civil service credit for retirement purposes and for the purpose of computing length of service to determine entitlement to leave, compensation, life insurance, health benefits, severance pay, tenure, and status in the case of certain individuals who performed service as National Guard technicians before January 1, 1969.

S. 1280

At the request of Mr. STEVENS, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of S. 1280, a bill to amend title 18, United States Code, to create a new Federal criminal offense of treasonous espionage—the unauthorized disclosure of classified information relating to national defense for profit, and to provide for the penalty of death by firing squad for such offense.

S. 1446

At the request of Mr. ANDREWS, the names of the Senator from Rhode Island [Mr. CHAFEE], and the Senator from Alabama [Mr. HEFLIN] were added as cosponsors of S. 1446, a bill to amend title 38, United States Code, to improve veterans' benefits for former prisoners of war.

S. 1451

At the request of Mr. CHAFEE, the name of the Senator from Minnesota [Mr. DURENBERGER] was added as a cosponsor of S. 1451, a bill to allocate funds appropriated to carry out section 103 of the Foreign Assistance Act of 1961 for nutrition programs which reduce vitamin A deficiency.

S. 1457

At the request of Mr. LAUTENBERG, the names of the Senator from Colorado [Mr. ARMSTRONG], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Hawaii [Mr. MATSUNAGA], and the Senator from Rhode Island [Mr. PELL] were added as cosponsors of S. 1457, a bill to amend the Internal Revenue Code of 1954 to establish certain rules regarding the regulatory treatment of certain Federal tax credits and deductions allowable to regulated electric utilities.

S. 1543

At the request of Mr. MATHIAS, the name of the Senator from Missouri [Mr. DANFORTH] was added as a cosponsor of S. 1543, a bill to protect patent owners from importation into the United States of goods made overseas by use of a U.S. patented process.

S. 1654

At the request of Mr. STEVENS, the names of the Senator from Utah [Mr. HATCH], and the Senator from Oklahoma [Mr. NICKLES] were added as cosponsors of S. 1654, a bill to amend title 18, United States Code, to provide for criminal forfeiture of proceeds derived from espionage activities and rewards for informants providing information leading to arrests in espionage cases.

S. 1682

At the request of Mr. BENTSEN, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of S. 1682, a bill to provide emergency assistance to Mexican earthquake victims.

S. 1702

At the request of Mr. THURMOND, the names of the Senator from Oklahoma [Mr. BOREN], the Senator from Nevada [Mr. HECHT], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Kansas [Mrs. KASSEBAUM], and the Senator from Indiana [Mr. LUGAR] were added as cosponsors of S. 1702, a bill to amend the Congressional Budget and Impoundment Control Act of 1974 to require a graduated re-

duction of the Federal budget deficit, to establish emergency procedures to avoid unanticipated deficits, and for other purposes.

SENATE JOINT RESOLUTION 196

At the request of Mr. THURMOND, his name was added as a cosponsor of Senate Joint Resolution 196, a joint resolution designating September 22, 1986, as "American Business Women's Day."

SENATE JOINT RESOLUTION 207

At the request of Mr. WILSON, the names of the Senator from Arkansas [Mr. BUMPERS], the Senator from North Dakota [Mr. BURDICK], the Senator from California [Mr. CRANSTON], the Senator from Arizona [Mr. DECONCINI], the Senator from Kansas [Mr. DOLE], the Senator from New Mexico [Mr. DOMENICI], the Senator from Nebraska [Mr. EXON], the Senator from Arizona [Mr. GOLDWATER], the Senator from Utah [Mr. HATCH], the Senator from Florida [Mrs. HAWKINS], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Nevada [Mr. LAXALT], the Senator from Michigan [Mr. LEVIN], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Georgia [Mr. NUNN], the Senator from Illinois [Mr. SIMON], the Senator from Mississippi [Mr. STENNIS], the Senator from Connecticut [Mr. WEICKER], and the the Senator from Nebraska [Mr. ZORINSKY], were added as cosponsors of Senate Joint Resolution 207, a joint resolution to designate November 1, 1985, as "National Philanthropy Day."

SENATE JOINT RESOLUTION 208

At the request of Mr. COCHRAN, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of Senate Joint Resolution 208, a joint resolution to designate the week of October 27, 1985, through November 2, 1985, as "National Alopecia Awareness Week."

SENATE CONCURRENT RESOLUTION 68

At the request of Mr. DURENBERGER, the name of the Senator from Kansas [Mr. DOLE] was added as a cosponsor of Senate Concurrent Resolution 68, a concurrent resolution expressing support for Chile's National Accord for the Transition to Full Democracy.

AMENDMENT NO. 730

At the request of Mr. HOLLINGS, the name of the Senator from Alabama [Mr. HEFLIN] was added as a cosponsor of amendment No. 730 proposed to House Joint Resolution 372, a joint resolution increasing the statutory limit on the public debt.

AMENDMENTS SUBMITTED

INCREASE IN PUBLIC DEBT LIMIT

JOHNSTON AMENDMENT No. 731

(Ordered to lie on the table and be printed.)

Mr. JOHNSTON submitted an amendment intended to be proposed by him to the joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt; as follows:

In lieu of the matter proposed to be inserted, insert the following:

SEC. DEFICIT REDUCTIONS PROCEDURES.

(a) SHORT TITLE.—This section may be cited as the "Balanced Budget and Emergency Control Act of 1985."

(b) CONGRESSIONAL BUDGET.—

(1) IN GENERAL.—Section 310 of the Congressional Budget Act of 1974 is amended—

(A) by striking out all beginning with "SEC. 310. (a)" through "necessary—" in the matter preceding paragraph (1) of subsection (a) and inserting in lieu thereof the following:

"SEC. 310. (a) IN GENERAL.—Any concurrent resolution on the budget considered under section 301 or section 304 for a fiscal year shall, to the extent necessary, specify—"; and

(B) by striking out subsection (b) and redesignating subsection (c) as subsection (b).

(2) CONFORMING CHANGES.—

(A) The table of contents in subsection (b) of section 1 of the Congressional Budget and Impoundment Control Act of 1974 is amended—

(i) by striking out "Adoption of first concurrent resolution" in the item relating to section 301 and inserting in lieu thereof "Annual adoption of concurrent resolution";

(ii) by striking out "First concurrent resolution" in the item relating to section 303 and inserting in lieu thereof "Concurrent resolution"; and

(iii) by striking out "Second required concurrent resolution and reconciliation" in the item relating to section 310 and inserting in lieu thereof "Reconciliation".

(B) Paragraph (4) of section 3 of such Act is amended—

(i) by adding "and" after the semicolon at the end of subparagraph (A);

(ii) by striking out subparagraph (B); and

(iii) by striking out "(C) any other" and inserting in lieu thereof "(B) a".

(C) Section 300 of the Congressional Budget Act of 1974 is amended—

(i) by striking out "first" in the item relating to April 15 and in the second item relating to May 15; and

(ii) by striking out the items relating to September 15 and September 25.

(D)(i) The heading of section 301 of the Congressional Budget Act of 1974 is amended to read as follows:

"ANNUAL ADOPTION OF CONCURRENT RESOLUTION"

(ii) Section 301(a) of such Act is amended by striking out "the first concurrent resolution on the budget" in the first sentence and inserting in lieu thereof "a concurrent resolution on the budget".

(iii) Section 301(b) of such Act is amended—

(I) by striking out "first concurrent resolution on the budget" in the matter preceding paragraph (1) and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)"; and

(II) in paragraph (1) by striking out all beginning with "the concurrent resolution" through "both" the second place it appears and inserting in lieu thereof "the Congress has completed action on any reconciliation bill or reconciliation resolution, or both, required by such concurrent resolution to be reported in accordance with section 310(b)".

(iv) Section 301(d) of such Act is amended by striking out "first" each place it appears.

(v) Section 301(c) of such Act is amended—

(I) by striking out "set for" in paragraph (1) and inserting in lieu thereof "set forth"; and

(II) by striking out "first concurrent resolution on the budget" each place it appears and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)".

(E) Section 302(c) of such Act is amended by striking out "or 310".

(F)(i) The heading of section 303 of such Act is amended by striking out "FIRST".

(ii) Section 303(a) of such Act is amended by striking out "first concurrent resolution on the budget" in the matter following paragraph (4) and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(G) Section 304 of such Act is amended—

(i) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)"; and

(ii) by striking out "pursuant to section 301".

(v) Section 301(e) of such Act is amended—

(I) by striking out "set for" in paragraph (1) and iserting in lieu thereof "set forth"; and

(II) by striking out "first concurrent resolution on the budget" each place it appears and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)".

(E) Section 302(c) of such Act is amended by striking out "or 310".

(F)(i) The heading of section 303 of such Act is amended by striking out "FIRST".

(ii) Section 303(a) of such Act is amended by striking out "first concurrent resolution on the budget" in the matter following paragraph (4) and inserting in lieu thereof "concurrent resolution and the budget referred to in section 301(a)".

(G) Section 304 of such Act is amended—

(i) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)"; and

(ii) by striking out "pursuant to section 301".

(II)(i) Section 305(a)(3) is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(ii) Section 305(b) of such Act is amended—

(I) in paragraph (1) by striking out ", except that" and all that follows through "15 hours"; and

(II) in paragraph (3) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(I) Section 308(a)(2)(A) of such Act is amended by striking out "first concurrent

resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(J) Paragraph (1) of section 309 of such Act is amended by striking out ", and other than the reconciliation bill for such year, if required to be reported under section 310(c)".

(K) Section 310(f) of such Act is amended by striking out "subsection (a)" and inserting in lieu thereof "301(a)".

(L) Section 311(a) of such Act is amended—

(i) by striking out "310(a)" the first place it appears and inserting in lieu thereof "301(a)"; and

(ii) by striking out "310(c)" and inserting in lieu thereof "310(b)".

(M) Clause 1. of Rule XLIX of the Rules of the House of Representatives is amended by striking out ", 304, or 310" and inserting in lieu thereof "or 304".

(b) MAXIMUM DEFICITS AMOUNTS.—

Section 3 of the Congressional Budget and Impoundment Control Act of 1974 is amended by adding at the end thereof the following new paragraphs:

"(6) The term 'deficit' means, with respect to any fiscal year, the amount by which total budget outlays for such fiscal year exceed total revenues for such fiscal year.

"(7) The term 'maximum deficit amount' means—

"(A) with respect to the fiscal year beginning October 1, 1985, $175,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1986, $163,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1987, $134,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1988, $52,000,000,000;

"(E) with respect to the fiscal year beginning October 1, 1989, $0, zero.".

(c) RECONCILIATION.—

(1) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(A) DIRECTIONS TO COMMITTEES.—Section 301(b) of the Congressional Budget Act of 1974 (as amended by subsection (a)(2)(C)(iii) of this section) is further amended—

(i) by striking out "may also require" in the matter preceding paragraph (1) and inserting in lieu thereof "shall also, to the extent necessary to comply with subsection (c)";

(ii) by inserting "require" after the paragraph designation in paragraph (1);

(iii) by inserting "require" after the paragraph designation in paragraph (2); and

(iv) by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively, and inserting before paragraph (2) (as so redesignated) the following new paragraph:

"(1) specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a);".

(B) CONFORMING CHANGES.—

(i) Section 310(a) of such Act is amended—

(I) by inserting "or" at the end of paragraph (2);

(II) by striking out ", or" at the end of paragraph (3) and inserting in lieu thereof a period; and

(III) by striking out paragraph (4).

(ii) Section 310(d) of such Act is amended by striking out "subsection (c)" and all that follows through "year" and inserting in lieu thereof "subsection (b) with respect to a concurrent resolution on the budget adopted under section 301(a) not later than June 15 of each year".

(iii) Subsections (e) and (f) of section 310 of such Act are amended by striking out "subsection (c)" each place it appears and inserting in lieu thereof "subsection (b)".

(iv) Section 300 of such Act is amended by inserting immediately after the second item relating to May 15 the following new item:

"June 15	Congress completes action on reconciliation bill or resolution, or both, implementing first, required concurrent resolution".

(2) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—

(A) IN GENERAL.—Section 304(a) of such Act (as redesignated by subsection (b)(2)(A) of this section) is amended by adding after the period the following new sentence: "Any concurrent resolution adopted under this section shall specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a) to the extent necessary to comply with subsection (b).".

(B) CONFORMING CHANGE.—Section 310(d) of such Act (as amended by subsection (c)(1)(B)(ii) of this section) is further amended by adding at the end thereof the following new sentence: "Congress shall complete action on any reconciliation bill or reconciliation resolution reported under subsection (b) with respect to a concurrent resolution on the budget adopted under section 304(a) not later than 30 days after the adoption of the concurrent resolution.".

(d) REPORTING DATE FOR ENFORCEMENT—ALLOCATIONS OF BUDGET AUTHORITY AND OUTLAYS.—

Section 302(b) of such Act is amended by striking out "Each such committee shall promptly report" in the last sentence and inserting in lieu thereof "Each such committee, within ten days during which the Congress is in session after the concurrent resolution is agreed to, shall report".

SEC. . BUDGET SUBMITTED BY THE PRESIDENT.

(a) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 1105 of title 31, United State Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) The budget transmitted pursuant to subsection (a) for a fiscal year shall be prepared on the basis of the best estimates than available, in such a manner as to ensure that the deficit for such fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974.

"(2) The President may also recommend alternative budgets, with outlays and revenues at higher or lower levels to take account of possible changes in economic conditions or other circumstances.

"(3) Paragraph (1) shall not apply with respect to any fiscal year for which a declaration of war is in effect,".

(b) REVISIONS AND SUPPLEMENTAL SUMMARIES.—Section 1106 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) Subsection (f) of section 1105 shall apply to revisions and supplemental summaries submitted under this section to the same extent that such subsection applies to the budget submitted under section 1105(a) to which such revisions and summaries relate.".

SEC. 4. EMERGENCY POWERS TO ELIMINATE DEFICITS IN EXCESS OF MAXIMUM DEFICITS AMOUNTS.

(a) REPORTING OF DEFICITS IN EXCESS OF MAXIMUM DEFICIT AMOUNTS.—

(1) IN GENERAL.—

(A) FISCAL YEAR FOR WHICH CONCURRENT RESOLUTION ON THE BUDGET IS ADOPTED.—The Director of the Office of Management and Budget and the Director of the Congressional Budget Office (hereafter in this section referred to as "the Directors") shall, with respect to any fiscal year for which a concurrent resolution on the budget has been adopted before the first day of such fiscal year (i) estimate the levels of total revenues and budget outlays that may be anticipated for such fiscal year, (ii) determine whether the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year and whether such excess is statistically significant, and (iii) estimate the rate of real economic growth that will occur during such fiscal year. The Directors jointly shall report to the President and to the Congress not later than November 1 of such fiscal year (in the case of the fiscal year beginning October 1, 1985) and October 1 of such fiscal year (in the case of any succeeding fiscal year) if either such Director determines that the amount of the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year, identifying the amount of such excess, stating whether such excess is statistically significant, specifying the estimated rate of real economic growth for such fiscal year, and specifying the percentages and amounts by which expenditures shall be reduced or revenues increased, or both, to eliminate such excess. In the event that the Directors are unable to agree on an amount to be set forth with respect to any item in any such report, the amount set forth such item in such report shall be the average of the amounts proposed by each of them with respect to such item.
